Question 1	
Respondent's Name and/or Organisation	Caenwood Estates Ltd
Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Section 3: Vision and Objectives

*[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP\_2003), Vision and Objectives (PSLP\_2005), Policies STR1 (PSLP\_2006), STR4 (PSLP\_2008), STR9 (PSLP\_2015) and Section 6 Development Management Policies (PSLP\_2016)]*

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

##### **1.1 Introduction**

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

##### **1.2 The site**

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

###### Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

*[TWBC: for Figure 1: Site location see full representation attached].*

### Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

### **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

### **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## 1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

### Vision and Strategic Objectives

1.5.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

*[TWBC: PSLP Vision has been duplicated here - see full representation attached]*

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

*[TWBC: PSLP Strategic Objectives have been duplicated here - see full representation attached]*

#### 1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

**'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.**

1.5.10 We consider that objective 2 should be modified to read:

**'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing and in a manner that best compliments the distinctive qualities of the Borough'**

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

## 1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a

greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read:

**'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.**

1.5.10 We consider that objective 2 should be modified to read:

**'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing and in a manner that best compliments the distinctive qualities of the Borough**

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

##### **1.1 Introduction**

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this this land to be suitable for development.

##### **1.2 The site**

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

##### Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

*[TWBC: for Figure 1: Site location see full representation attached].*

### Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

### **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

### **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

### **Development Strategy and Strategic Policies (Policy STR1)**

1.5.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.5.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.5.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.5.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.5.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

*[TWBC: PSLP Figure 5 Key Diagram see full representation attached]*

1.5.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

*[TWBC: PSLP Policy STR1 wording has been duplicated here - see full representation attached]*

1.5.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.5.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.5.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.5.21 The full proposed distribution of development is set out below.

*[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached]*

1.5.22 It should be noted that TWBC has recently refused planning permission for a 71-unit development on PSLP allocation site AL/HA4 at Highgate Hill/Copthall Avenue, which is proposed for the allocation of 71-79 dwellings. The application was refused on points of principle relating to the impact on Highgate Crossroads and the AONB. Whilst the allocation remains in the draft Local Plan, since the Council appears to be opposed to the scheme in principle, it does call into question whether the site has sufficient political support to be retained in the plan.

#### Response

1.5.23 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.5.24 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.5.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.5.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.5.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.5.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.5.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.5.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.5.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend well beyond 2038.

1.5.32 We also have concerns about the sustainability of Tudeley Garden Village, given that it appears it will not be served by a railway station, and is in an area at risk of flooding – an issue which has raised concerns from Greg Clark MP.

1.5.33 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means their area, and be sufficiently flexible to adapt to rapid change.

1.5.34 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with NPPF paragraph 11 and lacks sufficient strategic flexibility.

1.5.35 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley, such as expanded development at Caenwood Farm which, according to the Council's own analysis, would result in significantly less harm to the Green Belt.

1.5.36 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements.

### **Green Belt vs AONB Release**

1.5.39 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.5.40 We support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.5.41 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.5.42 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.5.43 *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.5.44 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However,

it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is possible to channel much of the development beyond this designated area.

1.5.45 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.5.46 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

### **Housing Delivery**

1.5.47 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.5.48 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.5.49 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.5.50 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

*[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached]*

1.5.51 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.5.52 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

*[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]*

1.5.53 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.5.54 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

1.5.55 No major national housebuilder has an option on the site and therefore the site is not "land banked".

### **Maintaining a Five Year Housing Land Supply**

1.5.56 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.5.57 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.5.58 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.5.59 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

*[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached]*

1.5.60 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.5.61 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

### **Affordable Housing Need**

1.5.62 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.5.63 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual shortfall of 443 affordable dwellings across the Borough.

1.5.64 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.5.65 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.5.66 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.5.67 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy as a start.

#### **The case for further development in Royal Tunbridge Wells**

1.5.68 We have set out above why we feel that further development allocations are necessary. There is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

1.5.69 PSLP paragraph 4.45 recognises that the Main Urban Area of Royal Tunbridge Wells and Southborough is a “prime candidate” for meeting housing needs. As with much of the borough, the urban areas are surrounded by land which is in the Green Belt and/or in the High Weald AONB, though land to the west and north in particular (including the wider Caenwood Farm site) falls outside the AONB. With opportunities for development in Tunbridge Wells constrained, the Council needs to make the best use of the least constrained, most sustainable options such as the wider Caenwood Farm site.

1.5.70 PSLP Table 4 shows that only around 15-16% of the proposed housing allocations are in Royal Tunbridge Wells, a very small proportion given the town’s position in the settlement hierarchy. There is clearly scope for this to be increased.

1.5.71 The same paragraph notes that Tunbridge Wells is also constrained by the A26 and A264 corridors, although evidence submitted previously by Caenwood Estates demonstrated that a wider development at Caenwood Farm could be achieved without causing a **severe** impact to the A26.

1.5.72 Caenwood Estates recognise that there is a perception of highway capacity issues locally and have undertaken surveys to provide evidence that the development can be accommodated. It is noted in this respect that Automatic Number Plate Recognition (ANPR) surveys carried out for Kent County Council (KCC) suggest that the majority of traffic travelling on the A26 at peak times is destined for, or originates from within, the Tunbridge Wells urban area.

1.5.73 The potential transport impacts of an expanded development at Caenwood Farm have been assessed in a Transport Technical Note which has been previously submitted, and is attached as Appendix 1. That assessment shows that the A26 London Road/Yew Tree Road/Speldhurst Road junction would continue to operate within its design capacity during both peak hours with the development in place, both at present and by the end of the emerging local plan period. Indeed, the assessment is extremely robust in that it has assumed a higher level of development than the expanded 280-unit scheme being proposed by Caenwood Estates.

1.5.74 The Caenwood site is adjacent to the town’s best served public transport corridor linking Southborough with Tunbridge Wells and Tonbridge, with the nearest bus stop only 130 metres away. High Brooms railway station is only a short walk to the east and offers frequent services to London, Tonbridge, Tunbridge Wells and Hastings. School transport services are also already focused on this area.

1.5.75 The area has already benefited from highways improvements funded by the Local Growth Fund, the aim of which is to finance infrastructure works that would lead to further growth. The nearby A26 junction with Speldhurst Road and Yew Tree Road has recently been upgraded by KCC to cater for growth arising from the new Tunbridge Wells Local Plan. In order to get best value from these works, the Council should be investigating every opportunity for growth in this area.

1.5.76 Furthermore, the recent dualling of the A21 between Tonbridge and Tunbridge Wells has reduced the pressure on the A26 London Road. The South East Local Enterprise Partnership has also contributed £1.039m to the recently-completed A26 Cycle Route Phase 1 scheme between Tunbridge Wells and Southborough, which has further enhanced sustainable transport options on this corridor. More recently, Reynolds Lane, which is adjacent to the site, has been turned into a walking and cycling route.

1.5.77 As a result, the Council can have confidence that both the RTW/AL5 allocation and indeed any expanded allocation to 280 units would not have a significant adverse impact on the local road network. Indeed it would represent a suitable and sustainable location for development in highways and transportation terms.

1.5.78 It is important that housing and employment allocations are sustainably located to assist the Council's ambitions for carbon neutrality by 2030. An expanded housing allocation at Caenwood Farm would be easily accessible from the existing and proposed expanded business parks at North Farm.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

**Do you consider that the Local Plan is not sound because:**

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

#### 1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this this land to be suitable for development.

#### 1.2 The site

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

##### Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The

site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

#### Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

### **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

### **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

### **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

#### Policy STR 4: Ensuring Comprehensive Development

1.5.37 This policy notes that where development sites are in multiple ownerships, development should be secured by an appropriate means of masterplanning.

1.5.38 Caenwood Estates supports a proportionate approach along these lines. It confirms that a joined-up approach to planning will be pursued at the AL/RTW 5 Caenwood Farm allocation, where Caenwood Estates represents a larger parcel of land, with a smaller 1.18ha (2.9 acre) parcel controlled by Dandara. The land which Caenwood Estates represents enjoys at least two potential access points onto Speldhurst Road. Both parties have been in discussions for some time in relation to these allocations, and indeed a joint submission was made at the Regulation 18 stage.

### **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

## **Question 7**

The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

*[TWBC: for Figure 1: Site location see full representation attached].*

### Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

### **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

### **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

### Policy STR9

1.5.85 Caenwood Estates also agrees with Policy STR9 insofar as it confirms that the removal of this land from the Green Belt has been fully justified through the consideration of reasonable alternatives and is supported by exceptional circumstances.

1.5.86 The proposed RTW/AL5 allocation site was assessed in the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) which concluded that it was suitable for the development of around 100 houses, and would form a sustainable extension to the built-up area of Royal Tunbridge Wells.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

## **Question 7**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

**To which part of the Local Plan does this representation relate?**

Policy

**Question 3a**

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road

[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP\_2003), Vision and Objectives (PSLP\_2005), Policies STR1 (PSLP\_2006), STR4 (PSLP\_2008), STR9 (PSLP\_2015) and Section 6 Development Management Policies (PSLP\_2016)]

**Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

**Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

**1.1 Introduction**

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

**1.2 The site**

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities

at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

#### Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

### **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

### **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority

issues; and• ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

### **Place Shaping Policies**

1.5.79 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

#### Policy AL/RTW5

1.5.80 Caenwood Estates Ltd are promoting land at Caenwood Farm which is proposed to be allocated under Policy AL/RTW5. Caenwood Estates fully SUPPORTS this allocation.

1.5.81 We can confirm that detailed transport assessment work will be undertaken in support of any future application as required by the draft policy.

1.5.82 Whilst we have no objection to the aims and objectives of criterion 6, we object to the current wording, which lacks clarity and precision. The criterion, as worded, requires:

"6. Improved access to the wider area, which should be secured as public open space"

1.5.83 The phrase "the wider area" is vague and open to a number of different interpretations. We suggest the alternative wording below, which would address our objection on this issue:

6. Improved access to the area shaded green on Map 5, which should be secured as public open space and as a landscape buffer

1.5.84 We would comment further at this point that there would be potential for a wider area of public open space on adjacent land, as part of an expanded development, if additional land was to be allocated for development at Caenwood Farm.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### Policy AL/RTW5

1.5.80 Caenwood Estates Ltd are promoting land at Caenwood Farm which is proposed to be allocated under Policy AL/RTW5. Caenwood Estates fully SUPPORTS this allocation.

1.5.81 We can confirm that detailed transport assessment work will be undertaken in support of any future application as required by the draft policy.

1.5.82 Whilst we have no objection to the aims and objectives of criterion 6, we object to the current wording, which lacks clarity and precision. The criterion, as worded, requires:

“6. Improved access to the wider area, which should be secured as public open space”

1.5.83 The phrase “the wider area” is vague and open to a number of different interpretations. We suggest the alternative wording below, which would address our objection on this issue:

6. Improved access to the area shaded green on Map 5, which should be secured as public open space and as a landscape buffer

1.5.84 We would comment further at this point that there would be potential for a wider area of public open space on adjacent land, as part of an expanded development, if additional land was to be allocated for development at Caenwood Farm.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

##### **1.1 Introduction**

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this this land to be suitable for development.

##### **1.2 The site**

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

###### Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

*[TWBC: for Figure 1: Site location see full representation attached].*

### Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

### **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

### **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

### **Development Management Policies**

1.5.87 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.5.88 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.5.89 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.5.90 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.5.91 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.5.92 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a support SPD not policy.

1.5.93 Turning to housing policies, policy H2 states that development should make efficient use of land, having full regard to the context of the site, including its character, landscape setting, topography, surrounding built form, and access to infrastructure and services.

1.5.94 In our view, this policy adds nothing beyond the advice contained in the NPPF and therefore adds little. It also goes against the principle of preparing succinct Local Plans.

1.5.95 Policy H3 sets out affordable housing requirements. Whilst we support the general thrust of the objectives and the securing of affordable provision, we object to the rounding up of the calculations and contributions being based on a net rather than gross number of units. For small scale proposals this will often see the proposed percentage increase to closer to 45% and 35% respectively. Such thresholds would therefore need to be tested and justified by evidence. A pragmatic approach would be to apply traditional rounding up or down.

1.5.96 The phasing of affordable provision also needs to be sufficiently flexible so as to not prohibit wider delivery. In this regard, we consider that entering into contract with a registered affordable

provider prior ahead of the 50% occupation should provide the certainty of delivery, but without risking a wider delay in market delivery. The timing of affordable delivery should also be dictated by scale, size and type of site.

1.5.97 The Council will be aware of wider country wide discussions regarding the viability of providing social rented accommodation as part of a wider offer. Such provision is becoming increasingly difficult and without robust policy in place that addresses this matter, this matter is likely to significantly slow its delivery.

1.5.98 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

Consultation Point	Policy STR/SS 3 The Strategy for Tudeley Village ( <a href="#">View</a> )
Status	Processed
Submission Type	Web
Version	0.1
Question 1	
Respondent's Name and/or Organisation	Alison Cain
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I live close to the centre of Capel with my family. In my view, the sustainability and viability of the plan (Policy STR/SS3) has not been adequately addressed in in many areas and as such the plan is unsound, but of key importance to me are the following four aspects:

- . 1) The increased risk of flooding has not been investigated sufficiently or evaluated properly. There is presently already a very high flood risk potential in this area for the local communities (not to mention the proposed new homes) which would be made significantly worse as a result of building such a huge number of houses directly on and next to recognised flood plain areas. Flooding in this area is already an almost annual major problem with many peoples live being adversely impacted. Increasing this risk further by building and concreting on huge area of agricultural farm land will only increase the risk of flooding and make it even harder and significantly more costly for residents and businesses (both in terms of insurance premiums, if available, uninsured damage and the devastating mental anguish). Building in such an area and to such a disproportionate extent should not be promoted by any council and is not part of the Governments' local planning objectives. Drainage at the new houses can by no means remedy this. This risk is exacerbated even further by the acknowledged impact of climate change on flood potential.
- . 2) The destruction of vast areas of Green Belt land bordering AONB land is abhorrent. This development would obliterate the rural setting that Capel and Five Oak Green presently enjoy, along with destroying the current high levels of biodiversity that surrounds us. The extent of the proposal is such that it effectively merges Tonbridge, Tudeley, Capel and Paddock Wood and thereby totally ignores the purpose of designated 'Green Belt' land which is "to assist in safeguarding the countryside from encroachment" and "to prevent neighbouring towns from merging into one another". The negative impact of the proposed development on climate change is clearly demonstrated in the sustainability appraisal, along with air, light and noise pollution levels increasing significantly.
- . 3) The existing foul drainage and sewerage system is already totally inadequate even for the existing population and frequently fails and is a major environmental disaster national headline waiting to happen. The massively increased burden that the proposed development would place on the system has not been considered (or whether it is even possible at all) or allowed for in the plan (from either an engineering or cost perspective) and would undoubtedly make this disaster a near term reality.
- . 4) The plan does not include anywhere close to proper or full consideration of the detrimental impact on the local transport network and road infrastructure of building such a large number of new houses in this location. The huge amount of roadworks required by the proposal would place severe disruption, strain and untold stress on the local community and infrastructure, not to

mention the long term massively damaging and irreparable impact on this beautiful rural Green Belt / AONB setting.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Areas other than this are more variable, including use of brownfield sites adjacent to existing villages and towns.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

We believe that the plans for Tudeley Village are **unsound and have not been positively prepared** for several reasons, which are outlined below.

Firstly, in terms of whether the plan has been positively prepared, we believe the various supporting documents, assessments and conclusions have been shaped to make it possible to put forward the plans for Tudeley Village, rather than to assess its suitability and viability – for the following reasons:

At the very first public meeting, held to share plans for Capel parish and Paddock Wood, the head of planning at Tunbridge Wells Borough Council (TWBC), Stephen Baughen, told the room that the Tudeley Village development had been chosen because it was ‘the easy option’. When challenged on this point in the following months, he denied this and tried to backtrack from the comment. However, the meeting was attended by well over 100 local residents and representatives from the local media who have his statement on record. Taking the easy option is not a justification to destroy hundreds of acres of prime green belt agricultural land and blight the lives of several hundred local residents for 10-20 years.

We do not believe that the planners have given due regard to Para 137 of the NPPF, which states that:

*‘Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development.’*

The results of the original consultation into available sites are now unavailable on the TWBC website – and instead, the results are merely préciséd in a 2019 document. This missing document pointed to the fact that a garden village was not the preferred option.

Indeed, one of the preferred options until this point was known as the A21 Growth corridor, but it was not pursued as an agreement between multiple landowners had not been reached.

Further calls for sites were issued, and when the CA1 land was offered up for development by the landowner, late in the local planning process and after two calls for land, the strategies chosen originally suddenly changed. This reversed the original reasons set out for not using land in the vicinity of CA1.

Then, sometime later, a developer was able to secure an agreement with the landowners at the site known as Castle Hill and proposed an alternative site to CA1. However, TWBC dismissed the proposal out of hand, citing reasons it had not cited at the first assessment of the area.

These are two key reasons why we believe the work has been carried out to support, not truly assess, the development of CA1. This is backed up by detailed legal and procedural failures, which the Save Capel campaign will be highlighting in its representation.

The plan also fails in regard to whether it has been positively prepared where consultation is concerned.

The NPPF Para 72 states that:

*'The supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well located and designed, and supported by the necessary infrastructure and facilities. Working with the support of their communities, and with other authorities if appropriate, strategic policy-making authorities should identify suitable locations for such development where this can help to meet identified needs in a sustainable way.'*

In developing the Local Plan, TWBC did not effectively work with the community. Yes, it went through the process, but it ignored the results of that process. Indeed the views of the local community have been ignored, and existing Capel residents marginalised during the entire plan-making process. The council received what it said itself was the largest response to a consultation it had seen. And over 90% objected to the plans for CA1, CA2 and CA3. The council's response to this massive rejection of its plans was to increase the number of houses to be built in CA1 and CA2. The community then came together to support an alternative large-scale development within the parish, Castle Hill, as mentioned above. This recognised that the community accepts the need for housing but proposing an alternative that the community could support. And this was rejected out of hand and with questionable justification.

In addition, claims made by TWBC about its consultation are simply wrong. In Para 3.11 of the Consultation Statement for Pre-Submission Local Plan, TWBC states that its Local magazine is sent to every resident in the Borough and that that action formed part of its consultation. It is not. Residents in Brampton Bank, a section of the B2017 where resident's gardens join the perimeter of the CA1 site, have never received the title.

The plan is **not being positively prepared** as the master planning carried out by Hadlow Estate for its CA1 site is not included in what is being presented to the Planning Inspector. We feel it is impossible to judge the sustainability and deliverability of the Local Plan without the inclusion of this key series of documents for the CA1 site.

As the master planning for CA1 has been carried out separately from the wider context master planning, there is a complete disconnect between it and other externally created reports. This approach has resulted in a confused and disjointed plan. The submitted Strategic Sites Masterplanning and Infrastructure Main Report focuses heavily on the detail of Paddock Wood plans but barely mentions the Tudeley, CA1, site in any detail.

Allowing these two huge new developments within a few miles of each other to be planned by separate entities cannot deliver a plan that properly allows for the impact on infrastructure, let alone many other aspects reliant on local influence and impacts.

We also believe that the plan is **not sound**. The head of planning at TWBC, Stephen Baughen, also said in public that the Tudeley Village would become a 'dormitory town' for residents in London looking to move to the country and commuters looking for easy commuting access. This was yet again a comment he later tried to distance himself from. But it flatly contradicts any claims that the increase in housing is to meet the needs of the Borough's residents.

The plan is also not sound for its failure to meet the NPPF para138, which states that:

*'Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport.'*

The CA1 proposal does not meet this requirement.

No green belt land has been safeguarded between urban areas and the green belt. In order to meet longer-term development needs stretching well beyond the plan period, this is very likely to result in coalescence and urbanisation between paddock wood and Tonbridge. This fear has already been demonstrated by the late addition of more building on green belt land adjacent to the CA1 site for a secondary school.

The plan is also **not sound** in terms of the infrastructure plans.

Whilst it may be possible to use the 'infrastructure before expansion' soundbite being bandied about by politicians and supporters of the plan, the reality is that it only refers to the planning of infrastructure, not its delivery. The phasing of the development of critical infrastructure, particularly in CA1, suggest serious transport issues will be felt for many years, even decades. Shops, primary schools and

secondary schools are not planned on the CA1 site until a late stage in the site development process – where will all the residents of CA1 go to shop, and 1000s of children go to school and where will they register for a GP before the site is large enough to offer these facilities? The result of this will be hugely detrimental to existing residents of Capel and local areas – most of the CA1 residents will be aiming for Tonbridge town for these vital facilities for many years.

The *Tunbridge Wells Local Plan Update Baseline Review Report Tudeley Village* (produced by Stantec) suggests that 11% of residents will go to neighbouring Tonbridge. That suggestion is massively out of touch with reality. This is especially the case when it is noted that there is a forecast of 20% traffic heading in the opposite direction to Paddock Wood. Having lived in the area, abutting the border of the CA1 site, for some 20 years and being familiar with traffic movements, we cannot understand how modelling can suggest this.

Across all documents we have reviewed, we can see no suggestion that the B2017 between Tudeley Village and Tonbridge will be developed to cope with a massive increase in vehicle journeys. At key commuter times during school term times, the B2017 is already highly congested. This is due to the extra vehicle traffic taking and collecting students from the Somerhill school close to the B2017/A26 roundabout. The traffic heading from Five Oak Green to Tonbridge on this route is regularly start-stop backing up from the B2017/A26 roundabout past the Hartlake Road junction and stretching for close to a mile and a half, sometimes more. It is impossible to see how improvements to the B2017/A26 roundabout can improve this situation. And when hundreds of additional cars are added to this route, it will become even worse.

Also, no improvements are planned to the road infrastructure which carries on from this roundabout into Tonbridge town ctr and its schools, shops and businesses. This is because it falls outside TWBC's reach. These routes are also already heavily congested. And not just at key commuter times. In between building the first houses and any infrastructure development, this will make moving around the area neigh on impossible.

Also, we would call into question the forecasts around journey carried out by bicycle. There is a suggestion that there will be significant journeys between the CA1 and CA2 developments and key town centres, including Tunbridge Wells. This assessment fails to recognise elevation. The elevation at the centre of CA1 is approximately 73ft above sea level. At the A26 close to Pembury, a relatively direct route to Tunbridge Wells centre, it is 376ft – over 300ft difference. At the bottom of Colts Hill at the B2017/A228 roundabout, the elevation is 79ft, and at the top of Colts Hill it is 440ft, a difference of 361ft. Surely it cannot be expected that anyone other than a few dedicated cyclists will use these routes regularly.

For these reasons, we believe the plans set out in Policy STR/SS 3 and the supporting documents have not been properly prepared and are unsound.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at**

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In respect of Policy Number STR/SS 3 we believe that no modifications can be made to make CA1 a suitable development, and therefore it should be removed from the TWBC Local Plan.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR/SS 1 - The Strategy for Paddock Wood, Including Land at East Capel

### Question 4

**Do you consider that the Local Plan:**

Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I have been a resident of Paddock Wood for around 28 years now and have grown up here. Over the last 3 years, I have seen the town go through significant changes due to major new developments and I fear the character of Paddock Wood is changing from a small country town into an urban sprawl.

I strongly object to Policy STR/SS 1 - The Strategy for Paddock Wood, Including Land at East Capel for reasons as I will detail below.

**Flood Risk** - During periods of heavy rain, there are often flooding issues in Paddock Wood. Badsell Road (B2017) is prone to flooding and these incidents have become more frequent since the Foal Hurst Green development began. I have also walked around Church Farm after periods of heavy rain to find myself ankle deep in water and the ground extremely boggy. Again, this was before development of Church Farm had begun. If there have been problems with flooding before these developments started, I fear that any further housing developments (building over fields and tearing up trees and hedgerows) will pose an increased flood risk, not just to Paddock Wood but also the surrounding towns and villages such as East Peckham, Yalding, Golden Green and Tonbridge. The proposed development at East Capel is on a flood plain and we cannot assume that flood mitigation measures will be enough to minimise flood risk and they could potentially fail, especially when you consider unpredictable climate change. Surely building on a flood plain is both ridiculous and unsustainable?

**Wildlife and Environment** - These plans seek to build on Green Belt land, which does not make sense for sustainability or reducing environmental impact. I have noticed more wildlife presence in the town and housing estates since the three new housing developments began. I think this is due to destruction of habitat/sources of food and I really feel for the wildlife, as with the town further expanding, they will have nowhere to go. I have recently been on walks through Foal Hurst Wood and the amount of noise and disturbance coming from the neighbouring Foal Hurst Green development is very noticeable and a nuisance. More new developments will surely have a further negative impact on our local wildlife. There have been frequent national news headlines over the last year that Britain is losing much of its biodiversity and that it is even at risk of collapse. I fear this will worsen if further major development is allowed to go ahead, especially if they are within our Green Belt areas and AONB. Many people have found nature and the outdoors a great source of wellbeing, especially during the covid pandemic and I think it is vitally important that these areas are protected from development, for the benefit and wellbeing of both local wildlife and residents.

**Traffic and Congestion** – I used to commute to Tunbridge Wells each day by car for work. Since the new developments began, I certainly noticed a difference in the traffic and especially at peak times (7:30am – 9am and 5pm – 6:30pm) there was increased congestion, especially with school traffic and fellow commuters. I think it would be naive to assume that improved cycle and walking routes would mean a reduction in the amount of traffic. It may help, but I think many residents would still choose to drive private vehicles, especially if they are a further walking distance from the train station (where

they would have to drive and park) or if they work in neighbouring towns or even further afield. The train stations at Paddock Wood and Tonbridge were also packed at peak times (pre-covid), as I had experienced many a time. An influx in housing and a large increase in population, without improved infrastructure, will put more pressure on these amenities and contribute further to traffic congestion and air pollution.

I also want to object to the idea of closing the railway bridge on the Maidstone Road. This would effectively cut Paddock Wood in half and put increased traffic pressure onto Badsell Road (B2017) and smaller country lanes such as Queen Street. I regularly visit family and friends in East Peckham and it would increase my journey distance and fuel use, which is not economical or environmentally friendly.

Facilities - Paddock Wood has seen little or no improvement to infrastructure or facilities over the years. We have been made promises of 'infrastructure before development' which have not been kept. Our sports centre is small with no swimming pool. The health centre is oversubscribed and it is sometimes difficult to get an appointment when needed. There is also a lack of facilities and activities for young people here. How is the town supposed to cope with an increased population when these facilities are not yet provided?

'Affordable' Housing – I do not think that any housing in these new developments can be deemed as 'affordable' if prices on the new Foal Hurst Green development are anything to go by. A one bedroom apartment at Foal Hurst Green starts from £255,000. As a single first time buyer saving up for my first home, I do not think that this price can be deemed as 'affordable' and if many buyers (especially first time buyers) cannot afford these new homes – how can these proposed developments be considered as a response to solving the supposed housing shortage? I also wonder why these sites have been allocated a disproportionate amount of housing compared to the rest of the borough, as this seems unreasonable.

I also feel that Tunbridge Wells Borough Council have not done enough to engage with the community about these plans and take into consideration and address residents concerns.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

We strongly support the overall development strategy put forward in the Pre-Submission Local Plan. In particular we very much welcome and support the changes made in response to the 2019 consultation on the Draft Local Plan and the removal of a number of large proposed housing allocations in Hawkhurst and Cranbrook. We consider that this overall approach is sound.

However, we have a number concerns regarding the remaining specific Hawkhurst and Cranbrook Policies relating to Transport and AONB issues.

These comments are common to STR/HA1, HA3, CRS1 and CRS3 and therefore are submitted for consideration in respect of all these policies. We have not submitted duplicate representations for each policy.

##### **Transport Issues**

Policy STR/HA1 sets out the overall development strategy for Hawkhurst (policy STR/CRS1 does the same for Cranbrook and Sissinghurst).

Both these draft policies contain a criterion that development proposals must have an acceptable impact on the Hawkhurst crossroads and the Flimwell crossroads.

This criterion is welcome, however there is no analysis in the evidence base of the impact of the remaining allocations in both Hawkhurst and Cranbrook on these highway junctions. The March 2021 SWECO Transport Assessment does not contain an assessment the impact of the proposed allocations on these junctions.

There is an internal consistency in the draft policies recognising the potential impact on the Hawkhurst and Flimwell junctions as a concern, without undertaking any strategic assessment of the capacity of those junctions to accommodate the proposed allocations as part of the Local Plan process.

The Council will be aware that in respect of the proposed Copthall Avenue allocation HA/4, KCC objected to the planning application on the basis of the impact of the proposals on the Hawkhurst

crossroads. The Council subsequently refused the application for that reason (as well as the harm to the AONB).

Having very recently resolved that a planning application for the site would have an unacceptable impact upon the Hawkhurst crossroads, it would be irrational for the Council to seek to retain the site as an allocation.

For this reason, we do not consider that STRA/HA1, HA4, STR/CS1 and STR/CS3 are sound because:

- 1 They are not “justified” as they are not based on a proportionate evidence base – indeed there is no evidence base regarding their impacts on highways junctions at Hawkhurst and Flimwell which the Council has acknowledged in the draft wording of the policies to be a concern; and
- 2 They are not consistent with national policy because they do not focus development in sustainable locations and will not limit the need to rely on private car trips – contrary to the requirements of paragraphs 103 and 104 of the NPPF.

#### **AONB issues**

Notwithstanding the welcome revisions at the Pre-Submission Stage, the draft Plan will still propose very significant major development in the High Weald AONB.

The Council recently refused a planning application for the HA4 allocation site due to the harm caused to the AONB. It would therefore be inconsistent for that allocation to be pursued through the Local Plan.

Criterion 1 of Policy HA1 seeks to define Limits of Built Development “as a framework for new development over the plan period”.

We do not consider that this criterion is sufficiently robust or effective. The criterion has been added to seek to minimise harm to the AONB. However, as drafted it would not operate to in any way restrict or limit development outside the Limits of Built Development. Unless the criterion makes explicit that development outside the Limits of Built Development as a general presumption will be resisted (particularly on greenfield sites) other than in the specific exemptions addressed elsewhere in the plan, it will be completely ineffective as it will not limit built development outside the defined area. The very concept of Limits of Built Development will therefore be entirely redundant.

Against this background we do not consider that STR/HA1, AL/HA4, STR/CRS1 and AL/CRS3 are sound because they are not consistent with paragraph 172 of the NPPF which seeks to preserve and enhance the AONB and limit development in such areas.

#### **Question 6**

**Please note:** *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would therefore request the following modifications:

The removal of allocation AL/HA4

- 1 The consequent amendment of STR/HA1 Criterion 2 to reduce the overall housing numbers to reflect the removal of allocation AL/HA4
- 2 The amendment of STRA/HA1 Criterion 1 to make clear that proposals for development on greenfield sites outside the Limits of Built Development will be resisted unless they fall within one of the exceptions identified elsewhere in the Plan
- 3 The removal of allocation AL/CRS3

- 4 The consequent amendment of STR/CRS1 Criterion 2 to reduce the overall housing numbers to reflect the removal of allocation AL/CRS3

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To ensure that the transport impacts of the proposed allocations on the Hawkhurst and Flimwell are taken into account.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Campaign to Protect Hawkhurst Village
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR/HA 1 The Strategy for Hawkhurst parish

Policy AL/HA3 Land off Copthall Avenue and Highgate Hill

Policy STR/CR1 The strategy for Cranbrook and Sissinghurst

Policy AL/CRS3 Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies STR/HA 1, AL/HA 4, STR/CR1 and AL/CR3 – see Comment Numbers PSLP\_1473, PSLP\_1490, PSLP\_1491 and PSLP\_1492]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

We strongly support the overall development strategy put forward in the Pre-Submission Local Plan. In particular we very much welcome and support the changes made in response to the 2019 consultation on the Draft Local Plan and the removal of a number of large proposed housing allocations in Hawkhurst and Cranbrook. We consider that this overall approach is sound.

However, we have a number concerns regarding the remaining specific Hawkhurst and Cranbrook Policies relating to Transport and AONB issues.

These comments are common to STR/HA1, HA3, CRS1 and CRS3 and therefore are submitted for consideration in respect of all these policies. We have not submitted duplicate representations for each policy.

##### **Transport Issues**

Policy STR/HA1 sets out the overall development strategy for Hawkhurst (policy STR/CRS1 does the same for Cranbrook and Sissinghurst).

Both these draft policies contain a criterion that development proposals must have an acceptable impact on the Hawkhurst crossroads and the Flimwell crossroads.

This criterion is welcome, however there is no analysis in the evidence base of the impact of the remaining allocations in both Hawkhurst and Cranbrook on these highway junctions. The March 2021 SWECO Transport Assessment does not contain an assessment the impact of the proposed allocations on these junctions.

There is an internal consistency in the draft policies recognising the potential impact on the Hawkhurst and Flimwell junctions as a concern, without undertaking any strategic assessment of the capacity of those junctions to accommodate the proposed allocations as part of the Local Plan process.

The Council will be aware that in respect of the proposed Copthall Avenue allocation HA/4, KCC objected to the planning application on the basis of the impact of the proposals on the Hawkhurst

crossroads. The Council subsequently refused the application for that reason (as well as the harm to the AONB).

Having very recently resolved that a planning application for the site would have an unacceptable impact upon the Hawkhurst crossroads, it would be irrational for the Council to seek to retain the site as an allocation.

For this reason, we do not consider that STRA/HA1, HA4, STR/CS1 and STR/CS3 are sound because:

- 1 They are not “justified” as they are not based on a proportionate evidence base – indeed there is no evidence base regarding their impacts on highways junctions at Hawkhurst and Flimwell which the Council has acknowledged in the draft wording of the policies to be a concern; and
- 2 They are not consistent with national policy because they do not focus development in sustainable locations and will not limit the need to rely on private car trips – contrary to the requirements of paragraphs 103 and 104 of the NPPF.

#### **AONB issues**

Notwithstanding the welcome revisions at the Pre-Submission Stage, the draft Plan will still propose very significant major development in the High Weald AONB.

The Council recently refused a planning application for the HA4 allocation site due to the harm caused to the AONB. It would therefore be inconsistent for that allocation to be pursued through the Local Plan.

Criterion 1 of Policy HA1 seeks to define Limits of Built Development “as a framework for new development over the plan period”.

We do not consider that this criterion is sufficiently robust or effective. The criterion has been added to seek to minimise harm to the AONB. However, as drafted it would not operate to in any way restrict or limit development outside the Limits of Built Development. Unless the criterion makes explicit that development outside the Limits of Built Development as a general presumption will be resisted (particularly on greenfield sites) other than in the specific exemptions addressed elsewhere in the plan, it will be completely ineffective as it will not limit built development outside the defined area. The very concept of Limits of Built Development will therefore be entirely redundant.

Against this background we do not consider that STR/HA1, AL/HA4, STR/CRS1 and AL/CRS3 are sound because they are not consistent with paragraph 172 of the NPPF which seeks to preserve and enhance the AONB and limit development in such areas.

#### **Question 6**

**Please note:** *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would therefore request the following modifications:

The removal of allocation AL/HA4

- 1 The consequent amendment of STR/HA1 Criterion 2 to reduce the overall housing numbers to reflect the removal of allocation AL/HA4
- 2 The amendment of STRA/HA1 Criterion 1 to make clear that proposals for development on greenfield sites outside the Limits of Built Development will be resisted unless they fall within one of the exceptions identified elsewhere in the Plan
- 3 The removal of allocation AL/CRS3

- 4 The consequent amendment of STR/CRS1 Criterion 2 to reduce the overall housing numbers to reflect the removal of allocation AL/CRS3

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To ensure that the transport impacts of the proposed allocations on the Hawkhurst and Flimwell are taken into account.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Policy AL/HA2 is the allocation for the Brook House site. Policy AL/HA3 is the adjoining Springfield Gardens site.

Both sites were comprised within the allocation for the current Site Allocations Local Plan – AL/HA2.

Both sites benefit from extant planning permissions.

However, the new allocation policy wording is different to the current allocation.

Within the main inset map on the draft plan (Map 15) there is an Area of Landscape Importance which acts as a buffer between the proposed allocations and the northern boundary of Oakfield.

However, this Area of Landscape Importance is not replicated on the drawings attached to the individual allocations.

Furthermore the existing policy in the Site Allocations Local Plan contains a criterion which states:

“the area designated as an Area of Landscape Importance should be retained and reinforced with additional planting and further structural planting should be incorporated within the northern and western boundaries of the site”

This criterion has not been replicated in the new proposed allocations – the wording of which does not even note the Area of Landscape Importance.

There is a risk that revised planning applications could be made which seek to infringe upon the Area of Landscape Importance and reduce the buffer zone.

Against this background we do not consider the proposed wording on Policies AL/HA2 or AL/HA3 are sound because they are not consistent with national policy, specifically NPPF paragraph 172 as they do not preserve or enhance the AONB.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Both AL/HA2 and AL/HA3 should be amended to include a criterion that replicates the wording in the existing Site Allocations Local Plan:

“the area designated as an Area of Landscape Importance should be retained and reinforced with additional planting and further structural planting should be incorporated within the northern and western boundaries of the site”

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**      Yes, I wish to participate in hearing session(s)

Policy AL/CRS3 Turnden Farm, Hartley Road, Cranbrook

[TWBC: this representation has been input against Policies STR/HA 1, AL/HA 4, STR/CR1 and AL/CR3 – see Comment Numbers PSLP\_1473, PSLP\_1490, PSLP\_1491 and PSLP\_1492]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

We strongly support the overall development strategy put forward in the Pre-Submission Local Plan. In particular we very much welcome and support the changes made in response to the 2019 consultation on the Draft Local Plan and the removal of a number of large proposed housing allocations in Hawkhurst and Cranbrook. We consider that this overall approach is sound.

However, we have a number concerns regarding the remaining specific Hawkhurst and Cranbrook Policies relating to Transport and AONB issues.

These comments are common to STR/HA1, HA3, CRS1 and CRS3 and therefore are submitted for consideration in respect of all these policies. We have not submitted duplicate representations for each policy.

##### **Transport Issues**

Policy STR/HA1 sets out the overall development strategy for Hawkhurst (policy STR/CRS1 does the same for Cranbrook and Sissinghurst).

Both these draft policies contain a criterion that development proposals must have an acceptable impact on the Hawkhurst crossroads and the Flimwell crossroads.

This criterion is welcome, however there is no analysis in the evidence base of the impact of the remaining allocations in both Hawkhurst and Cranbrook on these highway junctions. The March 2021 SWECO Transport Assessment does not contain an assessment the impact of the proposed allocations on these junctions.

There is an internal consistency in the draft policies recognising the potential impact on the Hawkhurst and Flimwell junctions as a concern, without undertaking any strategic assessment of the capacity of those junctions to accommodate the proposed allocations as part of the Local Plan process.

The Council will be aware that in respect of the proposed Copthall Avenue allocation HA/4, KCC objected to the planning application on the basis of the impact of the proposals on the Hawkhurst

crossroads. The Council subsequently refused the application for that reason (as well as the harm to the AONB).

Having very recently resolved that a planning application for the site would have an unacceptable impact upon the Hawkhurst crossroads, it would be irrational for the Council to seek to retain the site as an allocation.

For this reason, we do not consider that STRA/HA1, HA4, STR/CS1 and STR/CS3 are sound because:

- 1 They are not “justified” as they are not based on a proportionate evidence base – indeed there is no evidence base regarding their impacts on highways junctions at Hawkhurst and Flimwell which the Council has acknowledged in the draft wording of the policies to be a concern; and
- 2 They are not consistent with national policy because they do not focus development in sustainable locations and will not limit the need to rely on private car trips – contrary to the requirements of paragraphs 103 and 104 of the NPPF.

#### **AONB issues**

Notwithstanding the welcome revisions at the Pre-Submission Stage, the draft Plan will still propose very significant major development in the High Weald AONB.

The Council recently refused a planning application for the HA4 allocation site due to the harm caused to the AONB. It would therefore be inconsistent for that allocation to be pursued through the Local Plan.

Criterion 1 of Policy HA1 seeks to define Limits of Built Development “as a framework for new development over the plan period”.

We do not consider that this criterion is sufficiently robust or effective. The criterion has been added to seek to minimise harm to the AONB. However, as drafted it would not operate to in any way restrict or limit development outside the Limits of Built Development. Unless the criterion makes explicit that development outside the Limits of Built Development as a general presumption will be resisted (particularly on greenfield sites) other than in the specific exemptions addressed elsewhere in the plan, it will be completely ineffective as it will not limit built development outside the defined area. The very concept of Limits of Built Development will therefore be entirely redundant.

Against this background we do not consider that STR/HA1, AL/HA4, STR/CRS1 and AL/CRS3 are sound because they are not consistent with paragraph 172 of the NPPF which seeks to preserve and enhance the AONB and limit development in such areas.

#### **Question 6**

**Please note:** *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would therefore request the following modifications:

The removal of allocation AL/HA4

- 1 The consequent amendment of STR/HA1 Criterion 2 to reduce the overall housing numbers to reflect the removal of allocation AL/HA4
- 2 The amendment of STRA/HA1 Criterion 1 to make clear that proposals for development on greenfield sites outside the Limits of Built Development will be resisted unless they fall within one of the exceptions identified elsewhere in the Plan
- 3 The removal of allocation AL/CRS3

- 4 The consequent amendment of STR/CRS1 Criterion 2 to reduce the overall housing numbers to reflect the removal of allocation AL/CRS3

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To ensure that the transport impacts of the proposed allocations on the Hawkhurst and Flimwell are taken into account.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

Sally and David Campbell

X Willow Crescent

Five Oak Green

Tonbridge

Kent

TN12 XXX [TWBC: full postal address redacted for personal data protection]

Dear Sir or Madam,

We are writing to express our concerns with regard to the above draft plan

Well being

We relocated from Redhill to Five Oak Green over 35 years ago to live in a quiet village setting. We wanted to bring up our children in a quiet area and less polluted environment. Our children attended Capel Primary School, a small village school allowing them to appreciate the beautiful surroundings.

Our concerns centre on the following areas:

Public Services

The road from Five Oak Green to Tonbridge B2017 is already seriously congested during the school run period. This plan will result in even more congestion as people try to get to the new schools or Tonbridge Station. There does not appear to be a solution in the plan.

It is difficult to judge the size of proposed schools, Health Centres and Sports Centre and you cannot zoom in on the drawings included with the plan.

We are both retired and make use of the local buses. The plan mentions the intention to increase the bus services but these will be impacted by increase in traffic as mentioned above.

Trains from Tonbridge station are already over crowded during rush hour, we cannot see any proposals for additional services or capacity. The plan states that cycling and walking to the station will be encouraged by the building of new cycle and pedestrian routes. The route from Tudeley to Tonbridge is shown as following the B2017 which is not wide enough to allow a separate cycle or pedestrian path. The proposed cycle route from Five Oak Green to Paddock Wood requires either crossing the

busy A228 adjacent to the railway bridge limiting oncoming driver's vision or crossing at the centre of a right hand bend which has already been the site of several accidents.

TWBC has recently proposed making the B2160 Maidstone Road over the railway in Paddock Wood a one way system which would require a diversion of several miles if you wanted to go to a location the wrong direction to the one way route over the bridge. This proposal would only be feasible if all the new roads indicated in the submission were completed. A major assumption on behalf of TWBC.

#### Schools

The Plan proposes additional schools to be built in both sites. Also an additional single form entry at Capel Primary. By the time this additional form ripples through the school it will have double the number of pupils. Also there will be a need for additional classrooms to accommodate these pupils. The site does not have space for these extra classrooms. This will also lead to the need for additional staff both teaching and support as well a parking for these people. The road outside the school is already congested at school drop off and pick up time as parents are willing to travel from a wide area because it is such an excellent school.

#### Health

Our local health centre at Woodlands Paddock Wood is already stretched to capacity making it difficult to book appointments. This has been compounded by the closure of East Peckham Health Centre.

Even with the proposal for a medical centre in the plan we are still concerned about the increased demand. It is difficult to judge the capacity of the proposed Health Centres as no size is given in the Plan.

#### Infrastructure

The proposed bypass for Five Oak Green would not stop vehicles using the road thru the village as a short cut, especially those heading towards Maidstone. Also the proposed bypass assumes that the Colts Hill bypass will be in place. As the Colts Hill bypass has been agreed for over twenty years and not even scheduled how likely is it that the Five Oak Green bypass will be built? So we are likely to have to suffer the lorries required for the building work going through the village for the 20+ years necessary to complete the plan.

We have already had to suffer significant disruption between Five Oak Green and Paddock Wood as the Foals Hurst Green site has been developed.

Will the existing electrical substations be able to cope with the increased demand? It states in the plan that ground cables will be used rather than pylons. This would mean addition disturbance as these are laid.

Mobile signal in our area is patchy so will this require additional signal masts to meet additional demand?

#### Flooding

The villages of Tudeley and Five Oak Green are located on a flood plain and has been subject to flooding in the past.

We do not think the drainage system will be able to handle the additional demand as in the past we have been informed that the drains in the village are at full capacity. Even with the improvement to the drains put in place a few years ago.

We are concerned that the increase in hard surfaces will exacerbate the risk of flooding. Any mitigation for Tudeley and Capel will just move the flooding problem further down the River Medway to places such as Yalding which has suffered from significant flooding over many years.

#### Greenbelt

As mentioned before we moved to this area specifically for the beautiful countryside and wildlife. Building on this greenbelt area will destroy it forever. The already threatened wildlife will be homeless. The plan will increase air noise and light pollution. There will be a significant increase in traffic pollution which is of a great concern to us as both our daughters suffer from asthma which maybe triggered.

#### Housing

We cannot see from this plan how the lack of affordable houses in Tonbridge and Paddock Wood will be alleviated by this plan as it only mentions a small number. If more flats or single person accommodation were built then less land would be required and the impact on the Greenbelt significantly reduced.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

We are residents of Paddock Wood, backing onto the proposed East Capel site. We brought our property 2 years ago to start our family. We loved the small town friendly feel of Paddock Wood and the beautiful surrounding countryside. Which will all be lost with the proposed plan.

Creating a 4000+ new houses in paddock wood, almost 40% of all the new housing in the whole of Tunbridge Wells (1,500 new houses in East Capel) and a garden settlement at Tudeley of 2,800 dwellings will cause immense harm to residents of the Parish of Capel and Paddock Wood as well as to residents of Tonbridge. So 65% of the new houses will be in the Capel and Paddock Wood parishes. There are other more suitable sites such as the A21 corridor

Here we outline some of our main concerns:

##### **Flooding**

The plan is to build on flood plan. This will require extensive flood defences – which will divert funding from other areas and increase the flood risk to Paddock Wood and the surrounding area.

Last year many houses on our road, Ribston Gardens, flooded leading to destruction of property and upset, and we can expect this to be common place if the land behind our house is built on.

Any mitigation for Tudeley and Capel will just move the flooding problem further down the River Medway to places such as Yalding which has suffered from significant flooding over many years.

##### **Biodiversity**

Pipistrelle bats (various species) are nesting in the local area, including our neighbour's trees, which will back onto the new development. These bat species have a conservation order protecting them, so any planned development needs to abide by the standards set out by British law. We also have a huge range of animal and bird species, listed below, which visit our garden regularly: Hedgehogs (Listed on Britain's most endangered animals, population has declined by a third since the millennium) Badgers Foxes Rabbits Robins Blackbirds Wood pigeons Blue tits (nesting in the woods by Tudeley brook behind house) Goldfinches Thrushes Magpies

Sparrow Hawk – in field behind

Heron – Tudeley brook

Butterflies – cabbage white, red admiral and Kentish blue

Dragonflies

Frogs.

The current plan does not appear to be taking the wildlife into account. The table listed on the plan for this area simply said 'limited biodiversity constraints', which we feel is not taking into account the range of animals present in the area, particularly the endangered ones, which will be severely affected.

## **Green belt**

1000's of acres of Green belt land will be lost. Why are the brown belt sites not being considered first?

The current plan will destroy existing old woodland, which is vitally important for countering global warming. The companies building may well plan to plant new trees to offset new carbon emissions, however trees take many years to mature and so this will not benefit the environment for many years to come. Global warming is a huge problem which we have to tackle now before it's too late and this will exasperate it.

Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land and should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land that can be used to provide food.

This land is Green Belt land and should only be built upon if an "exceptional circumstance" exists. Most of our objects outlined above apply to the Tudeley settlement as well.

## **Wellbeing**

We have lived in many places (Cambridge, Portsmouth and Gravesend) but chose to buy our first house in Paddock Wood as we wanted to live in a beautiful green belt area. With all the health and wellbeing advantages of being in the countryside. This last year with the Covid-19 pandemic has shown how important wellbeing is. We wanted to bring up our children in a quiet area and less polluted environment.

## **Pollution**

Air quality will decrease – this is very worrying to us as I suffer from asthma. One of the reasons we chose to buy a house in Paddock Wood this year was the lovely fresh air to help me, which will be lost with this new construction. Additionally light and noise pollution will increase.

## **Sewage and water**

Sewage systems already can't cope, already approved developments now being delayed because of this and additional work having to be done to make them viable, for example the development along Badsell Road.

## **Housing need**

Currently, the area of Paddock Wood has seen a massive slowdown in the property market. People are preferring to look at places such as Tunbridge Wells, Sevenoaks and for convenience to London places such as Ebbsfleet Garden Village. When we were buying our house there were many properties which had been on the market for a very long time and having to make multiple price reductions to try to sell as this is not a popular area at present. The rate of sales has slowed down so much that local estate agents have started closing down. We struggle to see who will be buying these thousands of new homes when the houses already in Paddock Wood aren't selling.

## **Health services**

Paddock Wood already requires a new Health centre for the current population, Woodlands Health Centre is already stretched to capacity, and wait times for doctors' appointments are excessive. Plus there is a lack of dental and social care which is not addressed in the local plan. Even with the proposal for a medical centre in the plan we are still concerned about the increased demand. It is difficult to judge the capacity of the proposed Health Centres as no size is given in the Plan.

## **Schools**

The Plan proposes additional schools to be built in both sites. But it is not clear if this will be done before all the houses are built leading to oversubscribed schools.

## **Roads and Transport**

We both commute to work and the trains are already crowded, the new development will make trying to catch peak time trains impossible. Other public transport will need to be increased tenfold to cope with the additional people wanting to get to Tonbridge and Tunbridge Wells, currently bus services are inadequate at best. Road congestion will become normal in Paddock Wood with the 4000+ proposed houses. The road from Paddock Wood to Tonbridge B2017 is already seriously congested during the

school run period. This plan will result in even more congestion as people try to get to the new schools or A21. There does not appear to be a solution in the plan.

The plan states that cycling and walking to the station will be encouraged by the building of new cycle and pedestrian routes. The route from Tudeley to Tonbridge is shown as following the B2017 which is not wide enough to allow a separate cycle or pedestrian path. The proposed cycle route from Five Oak Green to Paddock Wood requires either crossing the busy A228 adjacent to the railway bridge limiting oncoming driver's vision or crossing at the centre of a right hand bend which has already been the site of several accidents.

TWBC has recently proposed making the B2160 Maidstone Road over the railway in Paddock Wood a one way system which would require a diversion of several miles if you wanted to go to a location the wrong direction to the one way route over the bridge. This proposal would only be feasible if all the new roads indicated in the submission were completed. A major assumption on behalf of TWBC. This much longer route will again increase congestion and air pollution.

### **Emergency services**

Currently, Paddock Wood only has a part time fire service and doubling the number of properties will require a full time permanently operational fire station which there appear no plans for. Also, the local hospital in Pembury will have to expand to cope with the mass increase in the local population.

### **Utilities**

Will the existing electrical substations be able to cope with the increased demand? Would additional pylons be required or will the main power supplies be sunk in the ground resulting in either additional eye sore and environmental impact.

We have heard there is a lack of a gas pipe across the Capel Parish and worry about the implications of this for the new development.

Overall, we are deeply trouble about the new plans which will destroy the beautiful green belt land, kill the wildlife and will also apply pressure onto the neighbouring borrow of Tonbridge and Malling owing to Paddock Wood location next to Tonbridge.

**Yours sincerely**

**Heather Campbell and Alexander Christofis**

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

<b>If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?</b>	<input type="checkbox"/> No, I do not wish to participate in examination hearing session(s)
---	---

### **Future Notifications**

<b>Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:</b>	<input type="checkbox"/> Yes, I wish to be notified of future stages of the Local Plan
--	--

We wanted to bring up our children in a quiet area and less polluted environment.

## **Pollution**

Air quality will decrease – this is very worrying to us as I suffer from asthma. One of the reasons we chose to buy a house in Paddock Wood this year was the lovely fresh air to help me, which will be lost with this new construction. Additionally light and noise pollution will increase.

## **Sewage and water**

Sewage systems already can't cope, already approved developments now being delayed because of this and additional work having to be done to make them viable, for example the development along Badsell Road.

## **Housing need**

Currently, Paddock Wood and the surrounding has seen a massive slowdown in the property market. People are preferring to look at places such as Tunbridge Wells, Sevenoaks and for convenience to London places such as Ebbsfleet Garden Village. When we were buying our house there were many properties which had been on the market for a very long time and having to make multiple price reductions to try to sell as this is not a popular area at present. The rate of sales has slowed down so much that local estate agents have started closing down. We struggle to see who will be buying these thousands of new homes when the houses already in Paddock Wood aren't selling.

## **Health services**

Paddock Wood and the surrounding area already requires a new Health centre for the current population, Woodlands Health Centre is already stretched to capacity, and wait times for doctors' appointments are excessive. Plus there is a lack of dental and social care which is not addressed in the local plan. Even with the proposal for a medical centre in the plan we are still concerned about the increased demand. It is difficult to judge the capacity of the proposed Health Centres as no size is given in the Plan.

## **Schools**

The Plan proposes additional schools to be built in both sites. But it is not clear if this will be done before all the houses are built leading to oversubscribed schools.

## **Roads and Transport**

We both commute to work and the trains are already crowded, the new development will make trying to catch peak time trains impossible. Other public transport will need to be increased tenfold to cope with the additional people wanting to get to Tonbridge and Tunbridge Wells, currently bus services are inadequate at best. Road congestion will become normal in Paddock Wood with the 4000+ proposed houses. The road from Paddock Wood to Tonbridge B2017 is already seriously congested during the

school run period. This plan will result in even more congestion as people try to get to the new schools or A21. There does not appear to be a solution in the plan.

The plan states that cycling and walking to the station will be encouraged by the building of new cycle and pedestrian routes. The route from Tudeley to Tonbridge is shown as following the B2017 which is not wide enough to allow a separate cycle or pedestrian path. The proposed cycle route from Five Oak Green to Paddock Wood requires either crossing the busy A228 adjacent to the railway bridge limiting oncoming driver's vision or crossing at the centre of a right hand bend which has already been the site of several accidents.

The proposed bypass for Five Oak Green would not stop vehicles using the road through the village as a short cut, especially those heading towards Maidstone. Also the proposed bypass assumes that the Colts Hill bypass will be in place. As the Colts Hill bypass has been agreed for over twenty years and not even scheduled how likely is it that the Five Oak Green bypass will be built? So we are likely to have to suffer the lorries required for the building work going through the village for the 20+ years necessary to complete the plan.

### **Emergency services**

Currently, Paddock Wood only has a part time fire service and doubling the number of properties will require a full time permanently operational fire station which there appear no plans for. Also, the local hospital in Pembury will have to expand to cope with the mass increase in the local population.

### **Utilities**

Will the existing electrical substations be able to cope with the increased demand? Would additional pylons be required or will the main power supplies be sunk in the ground resulting in either additional eye sore and environmental impact.

We have heard there is a lack of a gas pipe across the Capel Parish and worry about the implications of this for the new development.

Overall, we are deeply trouble about the new plans which will destroy the beautiful green belt land, kill the wildlife and will also apply pressure onto the neighbouring borrow of Tonbridge and Malling owing to Paddock Wood location next to Tonbridge.

**Yours sincerely**

**Heather Campbell and Alexander Christofis**

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Canterbury Diocesan Enterprises Ltd
Question 2	
Agent's Name and Organisation (if applicable)	John Bishop and Associates

### Question 3

To which part of the Local Plan does this representation relate? Policy

### Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Policies Map (Inset Map No(s)) 10

### Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

The existing Local Plan allocates The Vicarage Waterloo Road Cranbrook TN17 3 JQ for residential development. All of the reasons for allocation then are applicable now and the site should be reinstated as an allocation site for three dwellings in addition to the existing dwelling. For the detailed case see planning application 20/01335/FULL.

I also attach a site plan and proposed housing layout drawing for the site. [TWBC: see attached plans]

### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The site should be reinstated as an allocation site for three dwellings in addition to the existing dwelling.  
For the detailed case see planning application 20/01335/FULL.

#### **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### **Question 7a**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To make the case for reinstatement of the allocation.

**If you would like to attach a file in support of your comments, please upload it here.** [PSLP\\_432\\_John Bishop for Canterbury Diocesan Enterprises\\_SI-1\\_Site Plans.pdf](#)

#### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

**Comments on STR/SS1** by Capel Parish Council.

These comments have been drafted by the Chairman of the Council (who since 6th May 2021 has also been the Borough Councillor for Capel Ward) in consultation with other members of the CPC and contributed to by members of the Capel Neighbourhood Plan Working Group.

The policy is not legally complaint because you are in breach of your Statement of Community Involvement para 1.7 "The objective is to ensure that everyone with an interest in planning understands how they can contribute to, and influence, the planning decision-making process"; this has clearly not been possible as you have insisted in rushing this through during a pandemic. 1.10 fails to comply with the Equality Act 2010 as you have not ensured that involvement will be open to all, regardless of **age, disability**, gender, pregnancy and maternity, race, religion and belief, **rurality**, and sexual orientation and 1.12 it does not produce "better outcomes that meet local aspirations and requirements". We would submit the local aspirations and requirements of the residents of Capel Parish have been completely ignored, despite you having been repeatedly been made aware of them by Capel Parish Council and others.

**Capel Parish Council believes the PSLP proposal for SS/STR1 fail the test of soundness:**

#### 1 It is not positively prepared:

Policies STR/SS1 and 3 will have a huge impact on our residents and are NOT locally led. Any future planning decisions in Capel Parish will be dwarfed by the impact of the plan. At no point has this council expressed a view supportive of this strategy.

The planning process lacks community engagement and support. TWBC has only made limited attempts to engage with local residents or win their support. There was an exhibition at Regulation 18 in the summer of 2019 but nothing since. In the 'Vision for Capel' consultation carried out by Capel Parish Council's Neighbourhood Plan Working Party in August 2020, to which 25% of all households replied (the consultation was not online – but required residents to post their responses through a nominated post box) found 96% opposition to the plans at East Capel. You have carried out no such attempt to gauge the views of residents. The local election results in May 2021 showed the highest turnout,

biggest swing and largest majority for the candidate clearly campaigning against these proposals. The lack of community engagement is clearly demonstrated.

CPC deplore that this consultation has been carried out during a pandemic when it easily could have been delayed. Not only did it start before the election period for our Parish and Borough elections (something you seemed to have overlooked in your haste) but proceeded despite the pleas of the parish council to delay until after the local election and pandemic lockdown. The online nature of the consultations (necessitated by the insistence in carrying them out during lockdown) excluded those of our residents with no or limited access to the Internet. Your provision of access to a hard copy available in the Gateway in Tunbridge Wells (over 6 miles away with no direct public transport service) was inadequate. It was only on May 11th six weeks into the consultation that a copy was provided to the Parish Manager and Clerk; and even then, she had to collect it herself from Tunbridge Wells.

There is only very limited information in the PSLP and SA on why alternative strategic sites to Capel were rejected (far less information than on small scale sites rejected) e.g., there is no comparison between the site in Horsmonden and its 'severe access difficulties' [not explained] and the sites chosen; it is not measured against the comparative negative criteria in Tudeley and East Capel despite both being in the Green Belt. The Borough Council's Planning Policy Working Group (where presumably these plans were drawn up) has no published minutes or clear terms of reference. The formulation of these plans therefore lacks transparency. When contacted the Office of the Information Commissioner told the Vice Chairman of CPC, "Your complaint has been accepted as eligible for further consideration and a case worker allocated" accepting there are grounds for complaint against TWBC on your lack of transparency in developing these plans.

Your officers only made attempts to work with Capel Parish Council (at the time there was no neighbourhood planning group) after the strategic sites in Capel Parish had already been determined. The views of Capel Parish Council were only sought after this strategy had been adopted in spring 2018. The council's view is that there is no need to build housing in the Green Belt and the Borough Council's strategy is flawed. CPC were invited to send one representative to the SSWG (again a body with no published minutes and not open to public scrutiny) along more latterly with one from the Neighbourhood Plan working party. But they were clearly outnumbered by developers and representatives from Paddock Wood and at no point have any of their views influenced the PSLP. Similarly, representatives were invited to one Zoom session by DLA on 28 September 2020. At no point did DLA make any other attempt to understand the aspirations of Capel residents. The Zoom session involved deciding where to build on East Capel and not if. CPC were concerned that not only were Paddock Wood representatives asked to plan what was to be built in East Capel, but that you had also carried out a consultation with Paddock Wood Town Council/NP Group on the siting of the sports hub in East Capel without informing or consulting Capel Parish Council. The Parish Council were subsequently informed of the Masterplan for East Capel and the associated infrastructure by TWBC planning department and DLA in a Zoom meeting. This does not amount to consultation. At no time beforehand was Capel Parish Council consulted about the site of the sports hub nor the detail of the offline A228 improvement nor the 'Five Oak Green bypass'. Neither has CPC been consulted about the closure of Paddock Wood railway bridge to all but bus traffic. Although this is not in our parish the knock on effect would be to send all the traffic **through our parish** on the B2017 and the A228.

On p.140 the PSLP says "the expansion **was** facilitated through the release of land from the Green Belt: the exceptional circumstances to justify this are set out in the Development Strategy Topic Paper". We note the past tense. At no point has Capel Parish Council been informed that part of its parish has been removed from the Green Belt.

In the 'Strategic Sites Master planning and Infrastructure Study' DLA assert para 1.8 that remote working did not affect the study - without presenting any evidence to support this. The lack of consultation with Capel residents might cause this to be doubted. For example. "Garden City [sic] principles are supposed to be locally led" para 2.3 – this has clearly not been the case in Capel. DLA have focused most of their work on the town of Paddock Wood and frequently describe the whole area as the 'town'. In para 2.9 p.13 they describe "Capel Parish is a rural parish comprised of small villages,

where the community comes together in shared facilities such as schools.” Apart from the fact there is only one school - Capel Primary School - in the parish (discounting the Independent Schools at Somerhill on the edge of the parish, which draws students mainly from Tonbridge), this is a really inaccurate and superficial statement written by someone who has clearly never visited the Parish. There are four pubs and restaurants open at the time of writing, a cricket club with a large membership, football, and other sporting clubs as well as a range of voluntary organisations. Furthermore 75% of the population live in Five Oak Green, a larger village, something that seemed to have escaped DLA’s less than exhaustive research, and which they referred to as ‘Five Oaks’ throughout the Zoom call. On page 35 they assert that Whetsted Road is a possible ‘quiet lane’ route for bicycles. Anyone with a passing knowledge of the parish would know that the road is a rat run used by through traffic to access the A228 and residents have persistently complained about traffic issues on the road. P.53 also refers to the Medieval moated Badsell Manor (the oldest secular building in the parish) as ‘Badsell Farm’. The proposed planning of East Capel p.81 in a way ‘akin to the villages and hamlets’ of the parish seems uninformed and patronising to local residents, especially when building this way is really an effort to mitigate the worst of the flood risk. A better solution would be to build outside the Green Belt and not in Flood Zone 2 where the housing is being planned. DLA have master planned development in a parish which they clearly do not understand and have seemingly never visited. Their assertion that Covid did not affect their study is clearly not true in this regard. Capel Parish Council reject the assertion at para 4.3 p.10 of the Strategic Sites Topic Paper that ‘a detailed understanding of the land which forms part of the growth around Paddock Wood and East Capel has been obtained’. DLA have done nothing of the sort for East Capel as the examples above illustrate.

Capel Parish Council also deplore that the SPD for this site is not available and we have not had sight of it at this important stage, especially since TWBC stated that consultations with stakeholders would commence in early 2021. This is another sign that this plan is being rushed through without sufficient and **transparent** consideration.

1 **It is not justified.**

1 **No exceptional circumstances have been put forward for building on the Green Belt outside Paddock Wood in Capel Parish when there are alternatives which would leave the MGB intact. The Parish Council’s view is that there is no need to build housing in the Green Belt and the Borough Council’s strategy is flawed.**

One of the differences between Paddock Wood and Capel is that the section of SS/STR 1 in Capel is part of the Metropolitan Green Belt and Paddock Wood is not. The other options around Paddock Wood examined before Regulation 18 would have produced fewer houses but would not have impinged on the MGB. The PSLP now seeks to put even more houses on the MGB section of this site than at the draft plan stage despite the huge majority of comments being against this aspect of the Plan. There are no exceptional circumstances because the council could have pursued an alternative development strategy combining other sites around Paddock Wood and brownfield sites across the Borough to produce the required housing numbers. The expansion of Paddock Wood can be achieved without using Green Belt land at East Capel for housing. 4,000 new dwellings in Paddock Wood are in any case excessive given the scale of recent developments, and overambitious and Green Belt land in a neighbouring parish should not be taken to provide for this. Capel Parish Council believe that if TWBC is not willing to argue that the housing need given to them by government is too high, you can use the NPPF’s protection of Green Belt to adjust your expansion plans. CPC believe Paddock Wood can be regenerated without using greenbelt land at East Capel for housing and that either another location without constraints should have been chosen for a garden settlement, or one of the other Growth Strategy options should have been adopted.

1 **The section of STR/SS1 in Capel Parish makes a strategic contribution to the MGB preventing the coalescence of Five Oak Green and Paddock Wood. Its removal from the MGB is not justified in light of other non-Green Belt options around Paddock Wood that have not been pursued and would cause less damage.**

Policy EN18 of the PSLP p.374 says that “Development proposals should have regard to the setting of all types of settlement with particular regard to the **underlying historic pattern of settlement** and should seek to **avoid coalescence between settlements**”. The removal of this section from the MGB goes completely against this policy.

In your Green Belt Study Stage 2 in 2017, both sites were included in Broad Areas BA3 and BA4, making up the area between Tonbridge in the West and Paddock Wood in the East, and between the road through Five Oak Green in the South and the River Medway in the North. Both BA3 and BA4 were judged to cause **VERY HIGH** harm to the Green Belt if released.

The NPPF is clear that protection of the Green Belt is a high priority and can provide a strong reason for not meeting the OAN. The summary of your own Green Belt study (Stage 3) says: ‘The findings of the assessment of harm are summarised in Table 4.1 in Chapter 4 and depending on location, range from low harm associated with the release of land around Speldhurst and Pembury, to **very high** harm at Tudeley Village and Paddock Wood.’ However, in the main body of the report, the harm done by the release has been further downgraded to **high**. This is due to the very dubious argument that the contribution the site makes to Purpose 2 (preventing neighbouring towns from merging) is relatively weak which is clearly not true. On the contrary CPC would argue this is the most important part of the MGB in Capel parish as it prevents the convergence of Paddock Wood and Five Oak Green. In other words, it maintains a sense of openness and separateness between the two communities which is the whole point of the MGB – it does not therefore ‘weakly’ contribute to the MGB. The road between Five Oak Green and the Badsell roundabout on the A228 does not give this impression to the same degree, as there is not a clear sense of separateness between the village and its surroundings at this point. But once across the A228 it is very different – after a few houses near the roundabout there is open countryside right up to the LBD of Paddock Wood. The boundary between the two parishes is at its clearest here – yet the proposal of TWBC to end the MGB at the A228 would destroy this clear distinction between rural and urban which is one of the main functions of the MGB. **This most strategic section of the MGB preventing the coalescence of the two settlements would be removed by this proposal. The NPPF clearly states in paras 133 to 147 that green belt should only be released in exceptional circumstances. This land is key to preventing convergence between Five Oak Green and Paddock Wood and CPC do not believe these exceptional circumstances are supported.**

- 1 The proposals do not recognise the historic nature of Capel Parish as a settlement distinct from Paddock Wood nor do they give any consideration to the impact of the development of the proposals on the setting of the medieval moated Badsell Manor, nor recognise its impact on the biodiversity of this part of the Borough.**

The countryside between Paddock Wood and Capel is highly valued for footpaths, ancient woodland, wildlife, and its function separating the existing settlements. The proposals alongside those for SS/STR 3 cannot possibly lead to a net gain in biodiversity, contrary to the aims of the PSLP, and the associated road building conflicts with TWBC’s stated aim (Council motion: 17/7/2019) to be a carbon neutral council by 2030, and with the third bullet point of your recently published Climate Emergency Declaration.

- 1 The site lies at the lowest point in the parish of Capel; large parts of it lie in flood zones 2 and 3 and it is vulnerable to flooding from Tudeley Brook. Historically, this explains why the Medieval Badsell Manor is moated. CPC does not believe planning for house building in the flood plain is justified.**

While the PSLP maintains this risk will be mitigated by the developers CPC believe it is ill advised to develop on the flood plain in a period of climate change. The site flooded as recently as February 2020 when houses in Five Oak Green and Capel hamlet were inundated. The Tudeley Brook also feeds the Medway through the SS/STR1 site. Even though there are proposals for flood mitigation (though in the absence of the SPD it is difficult to know how effective they will be) the land in its current form is able to act as a sponge for much of the water. With more built form the water is likely to find its way to the Medway more quickly which will cause more frequent flooding and a bigger threat to the communities downstream, for example at Yalding, than at present. This is not a moment to increase the number of dwellings in a flood risk area.

Despite this site’s removal from the Green Belt, you have argued that betterment more widely in the Green Belt can be achieved by flood relief measures in Paddock Wood and elsewhere. Most houses affected by flooding in Capel Parish are in Five Oak Green which is not in the Green Belt. (For your information, there is a Five Oak Green Alleviation Scheme meant to protect c.100 houses in Five Oak

Green from fluvial flooding was originally drawn by the EA a decade ago). CPC maintain that introducing hard surfaces and dwellings on to the meadows and fields of East Capel and Tudeley will increase the flood risk beyond any mitigation measure, and although investment in flood relief measures elsewhere in Capel Parish would be welcome, it should not come at the price of further development on the flood plain in this parish.

**1 The plans do not contribute positively to TWBC's climate change targets nor its aspiration to be a carbon neutral council by 2030.**

The impact on carbon sequestration provided by the farmland, meadows, mature trees, and hedgerows on this site cannot be offset by a nod to zero/low carbon energy production. The impact of this development on climate change is clearly negative as demonstrated in the sustainability appraisal. Moreover, as you are no doubt well aware Local Plans should include policies to ensure that the development and use of land contributes to the mitigation of, and adaptation to, climate change consistent with S19 (1A) of the Planning and Compulsory Purchase Act 2004. It is clear that this plan does not make sufficient effort to encourage mitigation of and adaptation to climate change. The Policy STR7 titled 'Climate Change' lacks urgency and bears no relationship to the Government's 'nearly zero' targets. It is important that TWBC's strategic commitment is clear and achievable. It is essential that large scale development in the Borough can aim to be a zero-carbon development. If this cannot be achieved on a new development site, then the TWBC target to achieve net zero emissions across the Borough by 2030 is all but certain to fail. The failings of the largest strategic sites (which are fundamental to the overarching strategy of the Local Plan) to contribute adequately to the Government's 'nearly zero' 2030 targets, means that this Local Plan does not secure development and use of land which will contribute to the mitigation of, and adaptation to, climate change consistent with S19 (1A) of the Planning and Compulsory Purchase Act 2004.

**1 This site combined with the proposals for STR/SS3 would mean one parish (with around 2% of the Borough's population) being expected to accommodate 63% of TWBC's housing need.**

This is hugely disproportionate and will completely change the nature of this parish. The environmental impact of the development in the Green Belt in one small parish, when set alongside the impact of the associated transport infrastructure for these schemes which will carve its way through the remainder of the parish, will disproportionately damage the quality of life for Capel residents over the coming years. Essentially the council needs to rethink its strategy and avoid building on the Green Belt, to protect the quality of life for its residents in Capel who cannot be expected to bear the full burden of development for the whole borough. This SA is based on the needs of the Borough as a whole it pays little attention to the cumulative effect on Capel Parish and the impact for current residents.

## **Question 6**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Capel Parish Council maintain there are other non MGB options around Paddock Wood that should be revisited, and could in combination with Brownfield development e.g. at Blantyre House in Goudhurst provide the required housing numbers without building on the Green Belt.

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As the Parish Council representing the parish most heavily affected by this plan we should have the right to put the views of our parishioners whose views are overwhelmingly against this policy. Our view clearly has the support of our residents given the result of the recent Borough Council Election in Capel and the 'Vision For Capel' survey (part of a preparatory document for the Capel Neighbourhood Plan which is attached).

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Capel Parish Council/ Hugh Patterson Chair of CPC and Borough Councillor for Capel Ward
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

##### **Comments on STR/SS3 by Capel Parish Council.**

These comments have been drafted by the Chairman of the Council (who since 6th May 2021 has also been the Borough Councillor for Capel Ward) in consultation with other members of the CPC and contributed to by members of the Capel Neighbourhood Plan Working Group.

The policy is not legally complaint because you are in breach of your Statement of Community Involvement para 1.7 "The objective is to ensure that everyone with an interest in planning understands how they can contribute to, and influence, the planning decision-making process"; this has clearly not been possible as you have insisted in rushing this through during a pandemic. 1.10 fails to comply with the Equality Act 2010 as you have not ensured that involvement will be open to all, regardless of **age, disability**, gender, pregnancy and maternity, race, religion and belief, **rurality**, and sexual orientation and 1.12 it does not produce "better outcomes that meet local aspirations and requirements". We would submit the local aspirations and requirements of the residents of Capel Parish have been completely ignored, despite you being repeatedly been made aware of them by Capel Parish Council and others.

Capel Parish council have major concerns about the lack of sustainability of the site, and the weakness of community engagement, alongside its impact on the historic Medway Valley landscape, and the historic town of Tonbridge.

##### **A. It is not positively prepared.**

The planning process lacks community engagement and support. TWBC has only made limited attempts to engage with local residents or win their support. There was an exhibition at Regulation 18 in the summer of 2019 but nothing since. In the 'Vision for Capel' consultation carried out by Capel Parish Council's Neighbourhood Plan Working Party in August 2020, to which 25% of all households replied (the consultation was not online – but required residents to post their responses through a nominated post box) found 95% opposition to the plans at Tudeley. TWBC have carried out no such attempt to gauge the views of residents. The local election results in May 2021 showed the highest turnout, biggest swing and largest majority for the candidate clearly campaigning against these proposals. The lack of community engagement is clearly demonstrated.

CPC deplore that this consultation has been carried out during a pandemic when it easily could have been delayed. Not only did it start before the election period for our Parish and Borough elections (something you seemed to have overlooked in your haste) but proceeded despite the pleas of the parish council to delay until after the local election and pandemic lockdown. The online nature of the consultations (necessitated by the insistence of carrying them out during lockdown) excluded those of our residents with no or limited access to the Internet. Your provision of access to a hard copy available in the Gateway in Tunbridge Wells (over 6 miles away with no direct public transport service) was inadequate. It was only on May 11th six weeks into the consultation that a copy was provided to the Parish Manager and Clerk; and even then, she had to collect it herself from Tunbridge Wells.

**It is unclear to us why in the Issues and Options stage when 60% of the responses favoured the A21 Corridor this option was not pursued given the money recently invested in dualling the road and its good connections to the rest of West Kent and further afield. Capel Parish Council have supported another site (also within the parish) at Castle Hill which would provide 1600 houses close to the A21. Although this site is in the AONB it is much more enclosed than STR/SS3 and building there would have a much more limited impact on the landscape. STR/SS3 adjoins the AONB and building on this sloping site would both be visible from the AONB but also damage the unique Low Weald landscape of the Medway valley. The Castle Hill site we understand is also in one ownership (something the council claims as an advantage for STR/SS3) and adjoins a key employment area, also in the AONB, which you have already identified and included in the plan.**

There is no real explanation in the PSLP as to why other large scale sites were rejected. Capel Parish Council believes that Tudeley was not the original choice as a stand-alone garden settlement, and that the choice was more to do with the single landownership than the absence of constraints. The nature of land ownership is not a good argument for rejecting a site outside the Green Belt for one inside it.

The original Distribution of development topic paper prepared for the DLP in 2019 Chapter 6: Formulating the development strategy (p.14): Paragraph 6.2 also expressly stated that the second 'Call for Sites' was undertaken between May and June 2017. In the Interim New Local Plan Strategic Housing & Economic Land Availability Assessment 2017 it was stated "although the call for sites remains open, it will no longer be possible to include any new sites within the site assessment process that is informing the Draft Local Plan (being prepared under Regulation 18) **as there is insufficient time to adequately assess such sites.** (TWBC will continue to accept in order that they may be assessed & potentially included at Reg 19)". The evidence base persuaded you to opt for Growth Strategy Option 3 (existing urban distribution plus villages) and Option 4 (A21 growth corridor). There was a possibility of Option 5 (new settlement) in the longer term (8 possible sites but 5 not shortlisted including STR/SS3). Presumably, this underwent a robust process based on robust evidence. This was still the preferred stance in March 2018, however in April 2018, there appeared to be a complete change of direction which resulted in the allocation of 60% of the proposed development to the Parish of Capel. **Where in the Local Plan is this new evidence base?** There has been no convincing explanation of the Council's change of course in the Spring of 2018 and no convincing reason why SS/STR3 was chosen over the alternatives. There is only very limited information in the SA on why alternative strategic sites to STR/SS 3 were rejected (far less information than on small scale sites rejected) e.g., there is no comparison with the site in Horsmonden and its 'severe access difficulties' [not explained] and the sites chosen. It is not measured against the comparative negative criteria in Tudeley despite the latter being in the Green Belt and bordering on AONB. A garden settlement, should there be one, would be best in the middle of the Borough, to make it accessible north and south. It is totally counterproductive to put affordable housing right at the very north of the borough when so many residents live in the south, and where there is little demand for it. The Castle Hill proposal would be a much better solution in this regard. There is also only limited demand for this number of houses in Capel Parish which has a comparatively small population, as most prospective buyers and tenants would be expected to come from outside the Borough and would presumably prefer to live in or nearer Tunbridge Wells.

There is no evidence that makes Tudeley a better site for a Garden Village than for example, Horsmonden. The justification for not placing a garden settlement at Horsmonden is that "This would be a very large scale strategic allocation that would be disproportionate to the size of the settlement, with concern about landscape and heritage". Tudeley is a tiny hamlet, with 50 houses at most. The whole of the Parish of Capel has only 954 houses in it. Adding 2,800 new houses at Tudeley is a

massive increase that is far higher than the proportional increase would be elsewhere in the Borough. Tudeley is also home to a world renowned heritage asset – All Saints Church - the only church in the entire world to have a complete set of stained glass windows designed by the artist Marc Chagall. There is no equivalent heritage asset elsewhere in the rural parts of the Borough.

Tudeley has a beautiful, rolling landscape with abundant wildlife, fertile soil, and high biodiversity scores. This is undervalued in the PSLP, for example, Policy EN13 makes no mention of historic hedgerows and patterns which cover the Low Weald Area and have their roots from mediaeval times. The site is entirely within the Green Belt, and the High Weald AONB is within a few yards of the proposed development site. Views in particular from the High Weald looking over the Low Weald will be seriously compromised.

Comparatively, it is stated that Horsmonden, for example, has severe access difficulties. The access difficulties on the B2017 and Hartlake Road are at least as severe and the impact of the extra traffic on Tonbridge's overloaded road infrastructure will have severe effects there too. Capel Parish Council does not believe exceptional circumstances exist to justify building at Tudeley. The only argument presented anywhere is that Tudeley has a single landowner and other sites multiple landowners. **Your reluctance to deal with multiple landowners is not an “exceptional circumstance”.**

**Since the Regulation 18 consultation and the exhibition put on by Hadlow Estate in Tunbridge Wells (6 miles away from Capel parish) in October 2020 there has been little attempt at community engagement in relation to this site.** The feedback form attendees were asked to fill in largely related to the design of the houses not the principle of development. At the exhibition HE's representatives focused on the site itself and displayed little interest in the requisite infrastructure or the impact of their development on surrounding communities. Hadlow Estate's representative has attended the SSWG but has only engaged once with the parish council as a corporate body, which was about arrangements for the proposed Charette in March 2020. Hadlow Estate's original intention seems to have been engagement with individual parish councillors, but they refused to present before the whole council when invited in 2019. All questions put to you about the site have been treated as a matter for Hadlow Estate. All we now have is their 'Delivery Plan' on their website, which we are treating as indicative only.

Para 5.4 under Hadlow Estate's vision and Approach p. 18 of the SS Topic Paper talks of a landowner-led project. Yet we are told that the inspiration for Garden City projects is 'community led' [para 2.3 of the Strategic Sites Master planning and Infrastructure study] and thus far there have been no attempts to involve the community in the principle of what the landowner himself at a SSWG meeting called an 'urban development'. They have only tried to cajole residents into expressing opinions on the nature of the housing design. We are faced with a development, that far from being community led, will be one planned by the landowner, who seems to want to retain control of it into the future. This is a top down plan not a bottom up community led plan, which was the model to which garden settlements were meant to conform.

Capel Parish Council also deplore that the SPD for this site is not available and we have not had sight of it at this important stage, especially since TWBC stated that consultations with stakeholders would commence in early 2021. This is another sign that this plan is being rushed through without sufficient and **transparent** consideration.

#### **B. It is not effective.**

The PSLP is over reliant on this one site to deliver a large proportion of its housing with no guarantee that this landowner with no experience of large scale housing development can deliver in a timely manner. The logistical difficulties of building a 'Garden Village' from scratch with no existing infrastructure and relying on two rural lanes to move plant, machinery, equipment and building materials seem not to be a consideration of this PSLP. We consider the Castle Hill site would present much less of a risk by comparison, surrounded as it is by existing infrastructure and backed by more experienced developers.

#### **C. It is not justified.**

- 1 **This site when seen in combination with STR/SS1 and the recently adopted Kent Minerals Plan, will put a disproportionate burden on this parish as it is required to take 4160 houses in the plan period with another 700 to follow in Tudeley.** This can be seen alongside a total of c.2000 houses being built in next door Paddock Wood, work on which is already underway. The impact of this will change the nature of our small rural community forever.

The Local Plan will destroy rural enterprises, such as the equestrian facilities at Bank Farm alongside other businesses in Capel Parish. The natural environment will be badly damaged if the development of new housing in Tudeley together with East Capel goes ahead. Neighbouring businesses will also be affected during the long building process, including huge amounts of roadworks on one of the busiest roads in the Borough, the B2017. These works are bound to take many years and will put untold stress on the local community. Moreover, the Tudeley and East Capel proposals, which are within two miles of each other and share the same road links, are scheduled for development in the same timeframe. This will place severe and disproportionate strain on the local community and infrastructure. A garden settlement would be better in a more remote part of the borough outside the Green Belt and AONB, to give that area a boost and to minimise disturbances caused by construction. The two sites that satisfy the criteria and are identified in the evidence base have not been explored further in the sustainability appraisal. This site is within the recognised 1km AONB buffer zone and so is entirely unsuitable for development of this scale. The associated road infrastructure will have an even more damaging impact on the setting of the AONB.

The plan proposes to release land at the very heart of the Green Belt in the parish to accommodate Tudeley village and despite the words in para 5.17 of the SS Topic Paper such a large intrusion in the Green Belt only just west of Five Oak Green is going to lead to the impression of urban sprawl all the way from Paddock Wood to the Hartlake Road junction. The compensatory improvements to the Green Belt are limited, unclear and superficial.

- 1 **CPC believe the site is not sustainable. The council relies on Hadlow Estate for the Master planning of the site. They seem more concerned about the internal layout and appearance of their site than its impact on the local infrastructure.**

Without a railway station (which Network Rail have said is not possible for technical reasons) communications with the surrounding area will rely on the car and active travel. There is little evidence put forward by you or by Hadlow Estate of a Modal shift in transport and the impact on the road westward towards the A26/B2017 roundabout has been underestimated.

- . The site is too far away and too ill lit for cyclists and walkers to use for commuting to Tonbridge, particularly in winter. Para 5.21 estimates the cycle journey time 'could be 22 minutes' across what is at the moment unlit farmland. The evidence of a modal shift of transport in this way is limited and given a car journey to Tonbridge outside rush hour of 5 minutes, it is unlikely that most residents will do this.

The settlement will be dependent on the B2017 for traffic westwards to Tonbridge. This is now a heavily used rural lane with queuing traffic towards Tonbridge in the early morning peak. The plan proposes works to create a roundabout at Hartlake Road with junctions to the proposed estate roads within the site. Once again it is difficult to comment when the SPD has not been provided. But the plan seems to require Hartlake Road to be closed at the bridge sending the traffic through the development which would imply a roundabout further to the East (where?). However, in our judgement these works will not be sufficient to cope with the traffic from this site combined with a proportion of that from the sites near Paddock Wood. The DLA infrastructure study also suggests that there will need to be widening of the B2017 as well as 'improvements' to the junction at Hartlake Road and elsewhere but para 5.19 of the SS Topic paper says traditional orchards adjacent to the B2017 will be protected. Both will clearly not be possible at the same time.

- . The plan would also put an unfair burden on the residents of Tonbridge and Malling whose infrastructure the new residents will access. 'The 'master planning approach' will come to a grinding halt at the boundaries of Tonbridge, a town whose infrastructure has grown slowly over the last millennium and can hardly be expected to adjust to this challenge imposed on it by the planners of the neighbouring authority. We note the open opposition to this part of the Plan by all Tonbridge and Malling Council members who spoke at their Planning and Transportation

Committee meeting on 17/5/21 and that by the end of this Consultation T&M still have not signed a Statement of Common Ground. Capel Parish Council believe you are in breach of your Duty to Co-operate with Tonbridge and Malling given the impact this development will have on the neighbouring settlements there and the concerns raised by their elected members in a public meeting only a few days before the close of this consultation.

- . Without this site your own documentation states the proposed 'Five Oak Green by-pass' would not be necessary. This road will require the loss of productive agricultural land, affect the setting of the AONB and damage two designated rural lanes (Sychem Lane and Church Lane). It will also require the building of a roundabout opposite Capel Primary School; given the traffic difficulties here at drop off and pick up time this would seem a particularly retrograde step. We are also concerned at the traffic pollution risk posed to Capel Primary School (not to mention a future proposed secondary school) especially at a time when government is trying to alleviate pollution levels on roads near schools. In any case a bypass round Five Oak Green would also not solve the traffic issues further westward along the B2017 something that is not addressed in this Plan and would not help the Borough achieve its net carbon zero target by 2030. The plans for this road seem particularly under-developed, we suspect partly because this was not the main focus of DLA's flawed master planning for Capel. Once again comment is made more difficult by the absence of the SPD at the time of this consultation.
- . **CPC believe it is two settlements divided by a railway line, neither of which satisfy garden settlement principles.** The site is divided by the main railway line to Ashford with only Hartlake Road and a narrow Tunnel on Sherenden Road linking the two sides. Not only does this render the southern part of the site prone to flash flooding it also makes it difficult to see Tudeley as one community in the future. It is unsuitable for a garden settlement because it has a main railway line running through the middle of it with only two crossings. At Hartlake Road on its boundary (no more than a country lane) and Sherenden Road which is so narrow that only one car can pass at a time under the railway embankment. (Both are designated rural lanes – Hartlake Road is in the top 10% of the Borough in terms of historic and amenity value). The developers propose to create a tunnel (which would be very expensive and require major works to the railway which is the main Tonbridge – Dover line) as part of the main spine through the development. This would again damage this designated rural lane, but without an SPD it is difficult to use our local knowledge to comment further.
- . This site is under single ownership which appears to be the overriding factor in its selection. The landowner has no track record in managing or master planning a development of this size, and they are not widely trusted to do so within the wider Capel community.
- . Development on the site will adversely affect flood risks in Tudeley and neighbouring Yalding, Golden Green, East Peckham, Hadlow and Tonbridge. The River Medway is more prone to flooding in recent years, and the impact of a failure in the Leigh Barrier has not been considered, particularly in light of rapid increase in sea levels and other Climate Change factors.
- . The proposed phasing of the build would mean disruption to the local community and the traffic along the B2017 for the whole of the plan period. For example, it appears there will be no school built in Tudeley until phase 3 (1,000) houses, and the costings suggest that infrastructure will be paid for by S106's which will mean the houses will be built first putting an additional strain on the local community, facilities and the road infrastructure.

1 **CPC believe the effect of the development on the parish is disproportionate.**  
**The SA is based on the needs of the Borough as a whole it pays little attention to the cumulative effect on Capel Parish and impact for current residents.** It is clear that this parish is bearing a hugely disproportionate burden of this plan. The environmental impact of the development in the Green Belt (with these two major sites in one small parish), added to the impact of road building and associated transport infrastructure for these schemes on the setting of the AONB will disproportionately damage the quality of life for Capel residents over the coming years. This strategy needs to be rethought to protect the quality of life for residents in Capel who cannot be expected to bear the full burden of development for the whole borough.

1 **CPC believe the design plans for Tudeley village will not respect the historic Low Weald countryside and will be an urban intrusion on this rural landscape.**

Unlike the master planning for STR/SS1 master planning of Tudeley is the preserve of Hadlow Estate. Hadlow Estate are not experienced developers and have only shared indicative plans with the local community. These appear to be an urban intrusion on a rural landscape and will be completely inappropriate for this Low Weald landscape. We fear a high end urban development completely out of keeping with the local heritage and landscape, designed to appeal to an upmarket London based clientele. The comparison the developers have made with the soulless and still unfinished Poundbury estate does not fill us with confidence. In addition to the damaging impact this development will have on the Greenbelt, following its removal from it, there is also the strong adverse impact of the proposed Tudeley Village on the landscape of the whole Medway Valley. You should be more sensitive to the fact that the site SS/STR 3 lies on the southern slope of the Medway Valley, and is visible from all points along the north slope from up to twelve miles away appearing against the backdrop of the High Weald AONB. The view (for example, from St Michael's East Peckham) will be severely damaged from points right across a 60 square mile area.

**1 CPC believe the plans will lead to the loss of BMV agricultural land and have a negative impact on the Borough's climate change targets.**

The area is predominately comprised of BMV agricultural land, hence its importance historically for fruit and hop growing. As the Policy recognizes there are few areas of Grade 2 land in the Borough one being in the area of SS/STR3 so it would be scandalous to lose it to concrete at a time when government policy is encouraging the more effective use of land for agriculture. The impact on carbon sequestration provided by the farmland, meadows, mature trees, and hedgerows on this site cannot be offset by a nod to zero/low carbon energy production. The impact of this development on climate change is clearly negative as demonstrated in the sustainability appraisal. Moreover, as you are no doubt well aware Local Plans should include policies to ensure that the development and use of land contributes to the mitigation of, and adaptation to, climate change consistent with S19 (1A) of the Planning and Compulsory Purchase Act 2004. It is clear that this plan does not make sufficient effort to encourage mitigation of and adaptation to climate change. The Policy STR7 titled 'Climate Change' lacks urgency and bears no relationship to the Government's 'nearly zero' targets. It is important that TWBC's strategic commitment is clear and achievable. In policy STR/SS3 the requirement for renewable energy production should be specified as an item 'which will be delivered'. Instead, the renewable energy element of the policy is buried under 'high quality layout and design'. This is insufficient, given the scale of the climate emergency and the end date of the plan which corresponds closely with the Government's 2030 target for net zero. Given this relationship it is essential that large scale development in the Borough can aim to be a zero-carbon development. If this cannot be achieved on a new development site, then the TWBC target to achieve net zero emissions across the borough by 2030 is all but certain to fail. The failings of the largest strategic sites (which are fundamental to the overarching strategy of the Local Plan) to contribute adequately to the Government's 'nearly zero' 2030 targets, means that this Local Plan does not secure development and use of land which will contribute to the mitigation of, and adaptation to, climate change consistent with S19 (1A) of the Planning and Compulsory Purchase Act 2004.

**D. It is not consistent with NPPF guidance.**

You have chosen to accept the government's housing need for Tunbridge Wells Borough based on the standard method of calculation. Later ONS figures show a smaller housing need, and that policy may reflect that in due course. TWBC could protect this Parish from the destruction of Green Belt and the setting of the AONB by following NPPF guidelines, but this plan shows no interest in doing so, and in fact is planning for even more housing than required despite the MGB and AONB taking up such a large proportion of the Borough.

Paragraph 11 of the NPPF (2019) states: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that: (a) plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change; (b) strategic policies should, as a minimum, provide for objectively assessed needs for housing

and other uses, as well as any needs that cannot be met within neighbouring areas, unless: i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.” Paragraphs 11(b)(i) and (ii) are of crucial importance. They provide for TWBC to have a choice in the provision of the objectively assessed number of houses. **If provision of these houses is really only possible by sacrificing Green Belt land, as you concede at paragraph of the Non-Technical Summary of their Sustainability Appraisal, then the NPPF makes it perfectly possible for TWBC to say that this is not achievable. You have chosen not to do so.**

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As stated above you could substitute the much more sustainable and more deliverable site at Castle Hill and delete SS/STR 3. This in our view would be a more reliable route to deliver the bulk of the relevant housing requirement during the plan period..

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As the Parish Council representing the parish most heavily affected by this plan we should have the right to put the views of our parishioners whose views are overwhelmingly against this policy. Our view clearly has the support of our residents given the result of the recent Borough Council Election in Capel and the 'Vision For Capel' survey (part of a preparatory document for the Capel Neighbourhood Plan which is attached).

**If you would like to attach a file in support of your comments, please upload it here.** [VfC Document v11.2.pdf \(1\)](#)

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Response Date	02/06/21 10:55
Consultation Point	Policy STR/CA 1 The Strategy for Capel parish ( <a href="#">View</a> )
Status	Processed
Submission Type	Web
Version	0.1
Question 1	
Respondent's Name and/or Organisation	Capel Parish Council/ Hugh Patterson Chair of CPC and Borough Councillor for Capel Ward
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/CA1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

**Comments on STR/CA1** by Capel Parish Council

These comments have been drafted by the Chairman of the Council (who since 6th May 2021 has also been the Borough Councillor for Capel Ward) in consultation with other members of the CPC and contributed to by members of the Capel Neighbourhood Plan Working Group.

The policy is not legally complaint because you are in breach of your Statement of Community Involvement para 1.7 "The objective is to ensure that everyone with an interest in planning understands how they can contribute to, and influence, the planning decision-making process"; this has clearly not been possible as you have insisted in rushing this through during a pandemic. 1.10 fails to comply with the Equality Act 2010 as you have not ensured that involvement will be open to all, regardless of **age, disability**, gender, pregnancy and maternity, race, religion and belief, **rurality**, and sexual orientation and 1.12 it does not produce "better outcomes that meet local aspirations and requirements". We would submit the local aspirations and requirements of the residents of Capel Parish have been completely ignored, despite you having been repeatedly been made aware of them by Capel Parish Council and others.

**Not properly prepared.**

Capel Parish Council are perturbed by the inaccuracies and lack of detail in this policy.

Point 4: Compensatory improvements to the Green Belt including to 'particular areas of Five Oak Green' [sic]. The roads and properties that most recently flooded in Five Oak Green are widely known and had you wished to find out where they are you could have asked the parish council. Furthermore, Five Oak Green has its own planning envelope and therefore is not in the Green Belt and neither are most of the properties flooded. The ones that flooded in the hamlet of Capel are in the Green Belt but are not directly referred to.

The plan envisages taking 182 ha out of the Green Belt at Tudeley and 148 ha at East Capel with just over 1 ha around Badsell Road being added to it. Hardly compensatory improvements.

Point 6b: Refers to improvements in recreational and sporting facilities including football pitches [sic]. There is only one football pitch on Five Oak Green Recreation Ground something the planners / DLA would have known had they visited the parish.

Unlike other settlements in the Borough no “opportunities” or “benefits” have been identified, for example meeting local needs housing, a 20mph speed limit, traffic calming, a new village hall as CPC has not been consulted about any of these. If the Tudeley settlement is removed from the plan (and therefore the FOG bypass) there has been no traffic modelling to identify the need for road safety improvements throughout Capel along the B2017 and elsewhere despite the massive impact on the parish expected by the expansion of next door Paddock Wood.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

## Future Notifications

Question 1	
Respondent's Name and/or Organisation	Revd Dr Jeremy G A Ive, Vicar of Tudeley, Capel and Five Oak Green within Capel United Church (Church of England and United Reformed Church)
Question 2	
Agent's Name and Organisation (if applicable)	N/A
Question 3	
To which part of the Local Plan does this representation relate?	Policies Map
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Map 32 Tudeley Village Plan

#### **Question 4**

**Do you consider that the Local Plan:**

**Is legally compliant** Don't know

**Is sound** Don't know

**Complies with the Duty to Cooperate** Don't know

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

#### **Regulation 19 Proposed Representation by the Ecumenical Church Council of Capel United Church to the planned development of Tudeley Village by Hadlow Estate.**

Capel United Church (being a Local Ecumenical Partnership between the Church of England and the United Reformed Church) and by the Diocese of Rochester. Members of the church community have a range of views on the proposals and many will express their views through various means, including participation in the formal Regulation 19 consultation exercise which TWBC is running in 2019. For this reason, we shall not be taking a general view on the proposals such as those of Capel Parish Council (q.v).

However, the Ecumenical Church Council has specific areas of concern as was resolved on 2 December 2020 (with subsequent changes to the plan taken into account). The application by the Vicar and Churchwardens to the Regulation 18 process in October and November 2019 is below with additional areas of concern for submission to the Regulation 19 process in March and April 2021 regarding the proposal from Hadlow Estate for the development of the proposed Tudeley Village.

#### **All Saints' Church, Tudeley**

All Saints' Church is a mediaeval parish church, lying within the ecclesiastical parish of Tudeley, Capel and Five Oak Green and in the civil parish of Capel. It is in regular use for public worship. What makes it extraordinary is that it houses stained glass windows designed by Marc Chagall, of great beauty and artistic significance, which attract visitors from around the world.

#### **Matters of concern**

**1.Location:** The location of the church in any development would need to be carefully planned, so that the church setting relates well to its environs, rather than being cut off from a new centre of

population. Ideally, All Saints' would be approached by an open precinct, providing a clear focus for the community.

We are glad that this concern has been responded to through the provision of a green between All Saints' Tudeley and the centre of the Village, including the proposed Primary School. However, there is a concern about the proposed housing block to the NE of the church S of the railway line, which will affect its surroundings not least the view N from the churchyard to Greensand Ridge and beyond. This will significantly affect the situation of a building much-beloved internationally. **The Ecumenical Church Council of Capel United Church, therefore, oppose this block of housing, and propose instead that it be turned into parkland, which could also help in the following ways:**

- . **Offset the run-off from the road and church down the slope towards the railway line which might be adversely affected by the new building development perhaps with the provision of more ponds and suitable vegetation to absorb excess water immediately to the S of the railway line;**
- . **provide a preservation area for local biodiversity;**
- . **serve as a 'green lung' and a place of immediate access for the residents of Tudeley Village for quick nature breaks and dog-walking; and**
- . **offset the problem of the massing and density of housing around All Saints' Church at the point which most affects its cherished view and outlook.**

**2. Parking:** Effective ministry to our congregation and community, as well as the benefit to tourism and the local economy of welcoming visitors to view the Chagall windows or to attend concerts and other events, depends on the availability of sufficient parking for cars and coaches. Two parking areas that are leased by the church from the Hadlow Estate appear to be included within the footprint of the garden village. There is also a risk of the church parking areas being pre-empted by others, should insufficient (or inconvenient) parking be provided within the development. There should be careful consideration as to how suitable parking for the church will be maintained and protected.

**There is a concern that the existing additional parking area seems to be no longer designated in the plans.**

**3. Access:** At present, access to All Saints' is along a shared private road, which is in an indifferent state of repair. Should development take place, this may have to change. Certainly, the existing access road cannot easily sustain even the present strain upon it. It may well be that access to All Saints' should be from a different direction, depending on whatever roads were developed for the future. This should not adversely affect access.

The issue of access is more widely affected by the growth in traffic which the new development will cause along the B2017 between Five Oak Green and Tonbridge. **We welcome the plans for a cycle route and walkway to run between Tudeley Village and Tonbridge Station but stress the need for a shuttle service between Five Oak Green and Tonbridge, ideally on its own dedicated route, to offset the pressure of traffic along that section of the B2017.**

**4.Security:** The church is normally open (and unattended) during daylight hours. Its celebrated stained-glass windows have no physical protection, which would diminish their visual impact. It would be unfortunate if concerns over nuisance, noise, damage, or insurance were to inhibit either of these circumstances. Moreover, the church would need to cover the cost of any security arrangements which would need to be put in place.

**The placing of the housing block mentioned in 1. and the increased traffic along the B2017 have bearing on these concerns as well.**

Revd Dr Jeremy Ive, Vicar of Tudeley, Capel and Five Oak Green, 27 May 2021

The Vicarage, TN12 6TL [TWBC: telephone number and email address redacted]

## Question 7

*Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

#### Question 7a

*Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

#### **Regulation 19 Proposed Representation by the Ecumenical Church Council of Capel United Church to the planned development of Tudeley Village by Hadlow Estate.**

Capel United Church (being a Local Ecumenical Partnership between the Church of England and the United Reformed Church) and by the Diocese of Rochester. Members of the church community have a range of views on the proposals and many will express their views through various means, including participation in the formal Regulation 19 consultation exercise which TWBC is running in 2019. #### Question 1

Respondent's Name and/or Organisation	Christopher Carney
---------------------------------------	--------------------

#### Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

#### Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW6

Land at 202 and 230 Upper Grosvenor Road

#### Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I believe the proposed inclusion of the site at 230 Upper Grosvenor Road is outside of established planning principals and the size and circumstances of the site does not support the proposed level of development.

There have been multiple attempts to develop the garden of No. 230, all of which have been unsuccessful due to a number of confounding factors.

The NPPF Paragraph 117 states that: -

*"Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions"*

I do not believe this site meets the stated criteria

In 2005 permission (05/00066/OUT) was sought to erect **2 dwellings** on the land and permission was **refused** on multiple grounds, including: -

*"The proposal would give rise to a cramped and discordant form of backland development... The development would threaten existing trees (some of which are covered by Area tree preservation order No.8 2005) and Laurel hedge screen, which act as significant landscape features, the potential loss of which... would severely impact on the visual amenity and character of the area and create overlooking to the rear gardens of nos 204-220 Upper Grosvenor Road, thereby harming the privacy and amenity of the occupants of those properties..." It was decided that this comparatively low key development was contrary to Policies ENV7 and ENV15 of the Kent Structure Plan and policies EN1 and H9 of the Tunbridge Wells Borough Local Plan 1996, Policy EN1 and H5 of the Tunbridge Wells Borough Local Plan Review and Policy QL1 of the Kent and Medway Structure Plan."*

The proposed allocation to develop 40-45 residential units is a **massive overdevelopment** of a site not deemed capable of supporting an additional 2 dwellings in 2005.

One of the issues with the proposed site is the combination of its shape (broadly triangular) and the many tree preservation orders. When taking into account the multiple TPO's, particularly the root protection zones during construction, the developable area of the land is severely reduced. I do not believe that it is possible to create a development of the proposed scale and respect the TPO's in place.

To squeeze an additional 40-45 housing units onto the site is overreaching. The large buildings required will result in inappropriate density, as illustrated by the submitted pre-planning application.

This proposal requires constructing housing that is single aspect, with poor orientation due to unsolvable issues with overlooking neighbours, leading to a risk of overheating on one aspect & poor light quality on the opposing side.

The proposed density leads to characterless, poor quality living accommodation with little communal space and, given the nature of the site, a lack of integration with the local community.

The proposed density of habitation will also lead to parking overspill into the neighbouring roads, which are busy and have very limited on-road parking. Many local residents beyond Upper Grosvenor Road have pointed this out on the outline planning that has been submitted for this site.

From an environmental perspective the development of this site will have a significant detriment to the local area.

### **Amenity**

The NPPF paragraph 180 states

*"Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should:*

- a) mitigate and reduce to a minimum potential adverse impacts resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life<sup>60</sup>;*
- b) identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason; and*
- c) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation."*

The proposed extent of development does not comply with this requirement.

The land is an important amenity for the residents of 178-228 Upper Grosvenor Road, serving as a calming counterpoint to the road & traffic noise of Upper Grosvenor Road. It is an important green corridor from Hilbert Woods and the railway and development of the scale proposed would destroy this amenity and wildlife corridor.

b) A development of the proposed scale will negatively impact the lives of the local residents through, noise pollution from vehicles entering & exiting the site, and the noise generated by the 100 or so residents

c) Increase air pollution from the increased vehicle traffic, and idling vehicles on the new access road trying to join traffic on Upper Grosvenor Road

d) Create significant light pollution from the proposed accommodation, carparking and outside areas. The night sky will be lost.

To create the proposed housing density, blocks will need to be built. These will create a significant overlooking problem for the existing residents of 178-228 Upper Grosvenor Road. Many of the trees on the perimeter of the site are deciduous and provide little screening in the winter months and are not of sufficient height to prevent overlooking into rear gardens and house elevations. There is also a significant risk that development will damage / destroy many of the trees (including those with TPO's) further reducing the screening effect and of course, a substantial number of trees will need to be removed to provide access to the site.

### **Site Access and public safety**

Finally, we must examine the proposed method of access to the site, which requires the demolition of 202 Upper Grosvenor Road. I strongly request that the planning officers visit the site in person to see the folly of this suggestion.

NPPF paragraph 108 states that:

*"In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that:*

- b) safe and suitable access to the site can be achieved for all users; "*

A site visit would immediately identify that this proposed access is: -

a) At the apex of a bend, limiting visibility to oncoming traffic. The splay angles are exceedingly tight when neighbours' hedges are catered for and when bins are out for collection, visibility is dangerously hampered looking downhill. Commonly delivery vans park on the pavement completely obscuring

visibility to oncoming traffic. Please refer to photographs at this link to see example visibility challenges <https://photos.app.goo.gl/KKfuF81EQHgbWpVx7>

b) Is on a hill where, during the winter months, traffic approaching the proposed exit from the site have to contend with low sun during school run hours. From personal experience, I can say this can be blinding when the road is wet. Please refer to photographs at this link for evidence of sun angles <https://photos.app.goo.gl/KKfuF81EQHgbWpVx7>

c) Hampered by the bus stop outside 229. This leads to long queues of traffic and occasional accidents & close calls as impatient drivers try to overtake the stationary bus into oncoming traffic, which frequently then mounts the pavement endangering pedestrians.

d) Opposite Silverdale Lane. This is a quiet street, often used by school children and typically a crossing point for school journeys or on their way to Hilbert / Grosvenor Park. The new access road will make this a much more hazardous crossing.

e) Narrow and will require bin lorries, and other large vehicles to swing into oncoming traffic to be able to negotiate the bend to the access road. One particular concern is if parking overflow from the site spills into this access road and prevents access by Fire Engines in an emergency. The existing entrance to 230 is inaccessible by large vehicles.

c) On a road that is busy and frequented by speeding traffic. As previously stated, the speed & volume of traffic on Upper Grosvenor Road is significant. There have been many accidents on the stretch from Silverdale Lane to Silverdale road, including fatalities.

Overall, this site is difficult to develop due to it's size, shape, TPO's and access limitations. It may be possible to engineer a smaller development of a several family houses, but planning (05/00066/OUT) ruled this out for just 2 dwellings, recognising the site limitations.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To provide local context to my objections to this part of the local plan.

**If you would like to attach a file in support of your comments, please upload it here.** UGR Street Scene.pptx

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

#### **Question 4**

**Do you consider that the Local Plan:**

**Is sound**

No

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

***Objection to Policy H9 and specifically the Greenfields Farm allocation which seeks to allocate further land for a travellers/gypsy site.***

***The Plan is not sound because insufficient consideration has been given towards the resultant traffic impacts, suitability of the site and other Local Plan conflicts. As such it has resulted in a Plan which is unsound not effective and not justified. Nor is it consistent with Planning Policy. The following explains the objections in more detail.***

It is noted in the draft Plan as a footnote on page 415 that the Greenfields site is a new site submitted after the Regulation 18 draft Plan. It has no context in terms of being a historic gypsy site and as such must be considered on the basis of a new allocation in the countryside.

On behalf of the objector's we take the view that the site is wholly unsuitable for residential uses of the type envisaged based on the character of the area. It will be clear on the site visit that the access is narrow and already serves a number of non conforming land uses such as a scrap yard (Scrapco Metal Recycling and waste transfer business), CJ Enterprises which specialise in material processing including bulk deliveries and export of materials with HGV's, a car body repair business (Riverdale Body Repair Centre), various other automotive companies, including Osmonds a road planings company that results in heavy plant using the lane, and other HGV Transport and tyre services. Although there are some residential properties along the access lane, they experience noise and disturbance that affects their residential amenity. The site is therefore clearly unsuitable for further residential uses such as a gypsy or traveller sites on amenity grounds and the Plan is therefore unsound.

The level of traffic along this access road is significant and the access is unsuited to additional traffic generated by the allocation given its single width character. The nature of the traffic along this access road comprises HGV's, high sided vehicles and skip lorries at very regular intervals. There is a shooting club, which uses a site off this access and generates significant traffic. The sheer volume of traffic is

such that the access and junction is at over capacity. Congestion along this access road and especially at the junction where large vehicles cannot pass results in an unsafe existing situation. This, together with the limited visibility on the 60mph Pearsons Green Road leads us to conclude that any further intensification of the access and junction by this allocation is wholly undesirable and puts highway safety at issue. The proposed allocation is not supported by a road safety audit to confirm that both Pearsons Green Road and the access track/junction is safe for the additional traffic proposed and neither is there evidence that the roads have sufficient capacity by way of a Transport Assessment. In the absence of this information, the site cannot reasonably be allocated as it would result in an unreasonable intensification of the uses.

The Policy criteria of H9 fail to consider either the amenity of those expected to use the Traveller site or the suitability of the access. In the absence of these criteria it is the case that this Policy is unsound and not effective.

The site that is to be allocated is significantly larger than the 3 pitches that are allocated in Table 11. This suggests that the draft Policy is not sound. It invites additional pitches notwithstanding criterion 1 of Policy H9.

The site is unsustainable in its location. There is no opportunity to access local facilities or public transport and although the site is for a Travellers site there should be an expectation that some services and facilities could be accessed by foot. Shopping and schools would require additional car journeys. The NPPF explains that sustainability comprises both environmental, social and economic matters and in all respects the site does not comply with these guiding principles.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Modify H9 and Table 11 to delete the proposed allocation at Greenfields Farm (Inset Map 82) and to consider additional land at the other sites to compensate.

To amend Policy H9 to require residential amenity and highways access safety and capacity to be specific criteria for this Policy.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I am entirely happy with the way I have been kept informed about the Local Plan's development and the opportunities provided to me to make my inputs.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Note . This is an edited and improved version initially submitted to Tunbridge Wells Borough Council's Planning Department on 12th November, 2019 in response to their 'Call for Sites' programme first announced in 2017.**

**REF : Land in Pembury village registered as Site No.304.**

**Land Registry Title No. K50612.**

**Owner - Douglas Carroll.**

**The site was not included in the original approved list on Council's 'Call for Sites' list.**

**The site should be reconsidered in line with the latest version of the Local Plan.**

## SUSTAINABILITY FOR HOUSING.

All of the Borough Council's requirements for building a sustainable housing development will be met in his area of Pembury. The 'sticking points' mentioned in my previous submission should now no longer exist:-

We already have a 'farmyard' metal gate at the southern end of the plot providing access off the A228. Southern Water, who have their own key, continue use it when servicing the main drains which pass east/west across the land to the hotel area.

A safer access off the A228 should now be considered as the local plan has introduced

- a) the requirement to make improvements to the Woodsgate Corner cross roads and
- b) to improve the A228 itself inviting more dual carriageway.

Therefore an entrance from the A228 to either the southside or to the north of the property adjacent to Marshleyharbour woods would both become very feasible options adhering to all Highway safety rules.

### **Previous objections:-**

- 1 Land of Outstanding Natural Beauty. The land in question, designated as Plot 304, has also been designated as land of outstanding natural beauty. It used to be a meadow when it was part of the Dower House, garden and woodland. The 13 acre estate belonged to my grandmother, Mrs Irene Bird.. I spent my early years there and went to school locally. Every year, the family used to bring in the hay. There also used to be a caravan parked on it. Plot 304 had no formal trees growing on it at all.
- 2 Green Belt. Since the A228 (formerly the B2015) was constructed to run through the property to Paddock Wood and beyond, it has added enormous amounts to the local and national economy over time. With increased employment forecasted and an improved economic and social outlook forecasted, the plan should now disregard the 'Green Belt' designation and seriously reconsider this available land for development. The Strategy of Pembury PSTR/PE1 adds weight to my submission. Providing 24 to 33 new dwellings, it would provide the perfect 'Infil' between Pembury village and the Hotel and the developing hospital beyond that. Different types of housing as per Policy numbers H6 and H8 could also be considered.

### **The sustainable 'plus points' are:-**

- A) A new development designed to meet all planning requirement, properly landscaped and providing adequate parking, loading and turning for all vehicles as will be shown in the plans.
- B) There are growing job opportunities in the Pembury area, along the A21 and the A228 adjacent the proposed new development.
- C) All three possible objections 1, 2 and 3, previously put forward by the council can now be overcome.
- D) All Utility connections from telecommunication to mains drainage are already available in this area and ready for connecting.
- E) Land clearance in preparation for building to commence would be a straightforward operation. There are no protected trees as this site once a meadow when part of the Pembury Dower House estate.
- F) there are excellent transportation links already in place.
- G) There would be no noise, loss of light or pollution hindrances caused to either the local residents in the next door estate to the east nor the hotel to the west.
- H) To the south is Woodsgate Corner and a large 24 hour Supermarket store just beyond. All essential public services, Pembury village shops, pubs, amenities and social life are on the doorstep with a Garden Centre and of course Pembury Hospital just minutes away.
- I) Due to the size of the proposed estate (24 to 33 dwellings), there would be very little impact on traffic volumes in this area.

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Should I need to be contacted to clarify and aspects of my submission, please contact me on xxx xxx [TWBC: phone number redacted but retained in records].

#### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

All included in Question 6.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

It is neither positively prepared, effective, justified or consistent with national policy for the points made 1-5 below, referring, to STR1-8.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before invitirn1 AECOM to produce its Strategic Environmental Assessment.

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. beforeLP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks ofmaking "modifications to the LP" so that it matches the BNP.

**1. Community involvement. EN1: this requirement has not beenrespected.**• In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.• See EN1 para 9 requiring the effective engagement of the local community,neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures

<https://www.change.org/EastEndFriends> • Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward." • One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments. • The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE. • The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.

- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021. • The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP \_ 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

## **2. The PSLP is not based on sound evidence**

- Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site. • In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading. • The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End. • The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only. • The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental

basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Clevelands. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

### **3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use

thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been amongst those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans run counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject). • **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for longterm management of the core areas of LWS associated with the hospital land This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare Jitngi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP 3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP \_3458 High Weald AONB Unit** (which objects to the Plan) : " ... *In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.*"

- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development ..... (b) strategic policies should provide for objectively assessed need for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

**PSLP EN1 para 5. Biodiversity and geodiversity.**AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

## **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5** (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

## **4. Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development .." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3** and **AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

## **5. The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in IdenGreen, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## **Question 6**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

#### **Question 7**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**      Yes, I wish to participate in hearing session(s)

#### **Question 7a**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

#### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there

come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th 2018, the minutes reported that "At times the workshop was emotive ... " Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mr William Casement [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr William Casement [REDACTED]
Comment ID	PSLP_326
Response Date	12/05/21 11:03
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Letter
Version	0.4
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Mr William Casement
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468  
Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1  
Sustainability Appraisal  
SHELAA Policies Map (Inset Map No(s)) Inset Map 18

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP\_306, PSLP\_326 and PSLP\_327]*

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

It is neither positively prepared, effective, justified or consistent with national policy for the points made 1-5 below, referring, to STR1-8.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before invitirn1 AECOM to produce its Strategic Environmental Assessment.

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. beforeLP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks ofmaking "modifications to the LP" so that it matches the BNP.

**1. Community involvement. EN1: this requirement has not beenrespected.**• In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.• See EN1 para 9 requiring the effective engagement of the local community,neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures

<https://www.change.org/EastEndFriends> • Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward." • One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments. • The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE. • The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to ENI para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.

- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021. • The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP \_ 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

## **2. The PSLP is not based on sound evidence**

- Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site. • In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading. • The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End. • The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only. • The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental

basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Clevelands. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

### **3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use

thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been amongst those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans run counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject). • **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for longterm management of the core areas of LWS associated with the hospital land This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare Jitngi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP 3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP \_3458 High Weald AONB Unit** (which objects to the Plan) : " ... *In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.*"

- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development ..... (b) strategic policies should provide for objectively assessed need for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

**PSLP EN1 para 5. Biodiversity and geodiversity.**AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

## **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5** (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

## **4. Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development .." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3** and **AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

## **5. The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in IdenGreen, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## **Question 6**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

### **Question 7**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**      Yes, I wish to participate in hearing session(s)

### **Question 7a**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there

come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th 2018, the minutes reported that "At times the workshop was emotive ... " Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mr William Casement [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr William Casement [REDACTED]
Comment ID	PSLP_327
Response Date	12/05/21 11:03
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Letter
Version	0.3
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Mr William Casement
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468  
Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1  
Sustainability Appraisal  
SHELAA Policies Map (Inset Map No(s)) Inset Map 18

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP\_306, PSLP\_326 and PSLP\_327]*

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

It is neither positively prepared, effective, justified or consistent with national policy for the points made 1-5 below, referring, to STR1-8.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before invitirn1 AECOM to produce its Strategic Environmental Assessment.

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. beforeLP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks ofmaking "modifications to the LP" so that it matches the BNP.

**1. Community involvement. EN1: this requirement has not beenrespected.**• In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.• See EN1 para 9 requiring the effective engagement of the local community,neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures

<https://www.change.org/EastEndFriends> • Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward." • One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments. • The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE. • The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.

- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021. • The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP \_ 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

## **2. The PSLP is not based on sound evidence**

- Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site. • In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading. • The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End. • The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only. • The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental

basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Clevelands. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

### **3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use

thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO<sub>2</sub> emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been amongst those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans run counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject). • **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for longterm management of the core areas of LWS associated with the hospital land This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare Jitngi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP 3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP \_3458 High Weald AONB Unit** (which objects to the Plan) : " ... *In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.*"

- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development ..... (b) strategic policies should provide for objectively assessed need for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

**PSLP EN1 para 5. Biodiversity and geodiversity.**AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

## **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5** (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

## **4. Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development .." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3** and **AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

## **5. The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in IdenGreen, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## **Question 6**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

#### **Question 7**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**      Yes, I wish to participate in hearing session(s)

#### **Question 7a**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

#### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there

come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th 2018, the minutes reported that "At times the workshop was emotive ... " Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Rachel Casement [REDACTED]
Email Address	[REDACTED]
Address	## ## ##
Event Name	Pre-Submission Local Plan
Comment by	Rachel Casement [REDACTED]
Comment ID	PSLP_214
Response Date	19/05/21 12:41
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.10
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Rachel Casement
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP\_214, PSLP\_304 and PSLP\_305]*

**Question 4**

**Do you consider that the Local Plan:**

**Is legally compliant** Don't know

**Is sound** No

**Complies with the Duty to Cooperate** No

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

It is neither positively prepared, effective, justified or consistent with national policy for the points made 1-5 below, referring to STR1-8.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment.

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

I. Community involvement. ENI: this requirement has not been respected. • In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group. • See EN I para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to ENI para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

**2. The PSLP is not based on sound evidence** • Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.

- In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- The TP A refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is

able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.

- The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transp011 from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

- Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

### **3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is: "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para

2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BEI, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .. " This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .. " This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (OLP\_ 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP' s approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and

no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- *The Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP \_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network"* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan): *".... In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- *The NPPF section 2 para 11 states: "Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"* And see Footnote 6:

*the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and/or designated as SSSI, AONBs ....*

•NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

**PSLP ENI para 5. Biodiversity and geodiversity.**AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

**The Environment**STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**ENI para 5** (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in ENI are mocked by AL/BE3 & 4.

#### **4. Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a reduction of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

## **5. The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE 1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp33 I-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of I: primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS 16 of AL/BE 1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

#### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

No, I do not wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Rachel Casement
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP\_214, PSLP\_304 and PSLP\_305]*

**Question 4**

**Do you consider that the Local Plan:**

**Is legally compliant** Don't know

**Is sound** No

**Complies with the Duty to Cooperate** No

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

It is neither positively prepared, effective, justified or consistent with national policy for the points made 1-5 below, referring to STR1-8.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment.

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

I. Community involvement. EN1: this requirement has not been respected. • In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group. • See EN I para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to ENI para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

**2. The PSLP is not based on sound evidence**• Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.

- In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- The TP A refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is

able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.

- The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transp011 from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

- Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

### **3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is: "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para

2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BEI, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .. " This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .. " This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (OLP\_ 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP' s approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and

no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- *The Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP \_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network"* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan): *".... In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- *The NPPF section 2 para 11 states: "Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"* And see Footnote 6:

*the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and/or designated as SSSI, AONBs ....*

•NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

**PSLP ENI para 5. Biodiversity and geodiversity.**AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

**The Environment**STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**ENI para 5** (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in ENI are mocked by AL/BE3 & 4.

#### **4. Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a reduction of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

## **5. The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE 1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp33 I-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of I: primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS 16 of AL/BE 1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

#### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

No, I do not wish to be notified of future stages of the Local Plan

Consultee	Rachel Casement [REDACTED]
Email Address	[REDACTED]
Address	## ## ##
Event Name	Pre-Submission Local Plan
Comment by	Rachel Casement [REDACTED]
Comment ID	PSLP_305
Response Date	12/05/21 09:00
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.2
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Rachel Casement
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468  
Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1  
Sustainability Appraisal  
SHELAA Policies Map (Inset Map No(s)) Inset Map 18

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP\_214, PSLP\_304 and PSLP\_305]*

**Question 4**

**Do you consider that the Local Plan:**

**Is legally compliant** Don't know

**Is sound** No

**Complies with the Duty to Cooperate** No

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

It is neither positively prepared, effective, justified or consistent with national policy for the points made 1-5 below, referring to STR1-8.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment.

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

I. Community involvement. ENI: this requirement has not been respected. • In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group. • See EN I para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to ENI para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* allocation. See HE's comments on the first draft LP (DLP 4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

**2. The PSLP is not based on sound evidence** • Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.

- In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- The TP A refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is

able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.

- The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transp011 from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

- Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

### **3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- The PSLP's Vision Objective 1 is: "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para

2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BEI, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .. " This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

- **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments .. " This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be overruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.

- **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (OLP\_ 4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP' s approach does not take comments to the first draft LP into account.

- **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and

no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

- **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

- **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

- *The Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no cafe (BHS says its cafe was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP \_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network"* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan): *".... In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- *The NPPF section 2 para 11 states: "Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"* And see Footnote 6:

*the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and/or designated as SSSI, AONBs ....*

•NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

**PSLP ENI para 5. Biodiversity and geodiversity.**AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

**The Environment**STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**ENI para 5** (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in ENI are mocked by AL/BE3 & 4.

#### **4. Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's cafe; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a reduction of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

## **5. The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the newsite at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE 1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp33 I-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of I: primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS 16 of AL/BE 1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

#### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

No, I do not wish to be notified of future stages of the Local Plan

**Question 1**

Respondent's Name and/or Organisation Castle Hill Developments Ltd

**Question 2**

Agent's Name and Organisation (if applicable) Woolf Bond Planning

**Question 3**

To which part of the Local Plan does this representation relate? Policy

**Question 3a**

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR 1 The Development Strategy

*[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP\_1912), STR8 (PSLP\_1922 ), STR9 (PSLP\_1925), STR/RTW1 (PSLP\_1929) and STR/SS3 (PSLP\_1932). See also appendices attached]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

**Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

**Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

## 1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

*[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]*

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

## 2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

### **Policy**

#### **Representation**

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

#### 7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

### 3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

#### 4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

#### 5. POLICY STR1: THE DEVELOPMENT STRATEGY

##### Representations

##### The Housing Requirement and Plan Period and robustness of supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area’s minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an areas housing need. It confirms that the area’s housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area now, especially as the Housing

Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London and the wider South East. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy. The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority is currently committed to delivery within policy STR1.

5.3 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However, on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG ID ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.4 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa ( $484.3 \times 1.579375$ ). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. Had the authority (as we contend) relied upon the uncapped requirement to set their target in the draft submission Local Plan, it would negate the need for an early review to address this need as obligated in the NPPF and PPG (ID ref 2a-007-20190220).

5.5 Achieving delivery of the uncapped housing need of 765dpa would ensure that the authority is actively seeking to address the very significant affordability issues within the Borough (as a result of the high median workplace based ratio) together with demonstrating that it is seeking to contribute towards addressing the very significant unmet housing needs of other authorities, especially Sevenoaks District as detailed below.

5.6 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the clear obligation in the NPPF to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

#### Housing needs of other authorities

5.7 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.8 In addition, paragraph 60 is clear that in determining an areas' housing needs, account should also be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's current Duty to Co-operate (DtC) Statement accompanying the Draft Submission document summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate.

5.9 The current DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks District, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa, the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.10 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivering growth consistent with the uncapped housing needs is therefore a reasonable and justified approach. For the reasons detailed in the representations, had the draft Submission Local Plan included the Castle Hill site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.11 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.12 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that Tunbridge Wells Borough on 11th April 2019 received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request from Sevenoaks DC are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells' analysis. This is a clear illustration that the authority has not provided the full evidence of engagement with other authorities and our view outlined earlier that the Council has failed in its obligation.

5.13 The Sevenoaks Local Plan Inspector was clear that the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore, that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.14 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.15 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take. The Sevenoaks judgement (appendix 4) was issued before Tunbridge Wells agreed the draft Submission Local Plan and therefore it was clear that there would be unmet need arising from Sevenoaks District (as acknowledged in paragraph 6 of the letter of the Inspector's examining the Tonbridge & Malling Local Plan (appendix 2)).

5.16 Furthermore, the latest position of Sevenoaks District (appendix 15) confirms that the authority is still unable to address its housing needs and consequently is reliant upon neighbouring authorities like Tunbridge Wells Borough to contribute towards the solution.

5.17 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (TMBC) (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.18 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. The Inspectors report states:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Maling would be 'no' due to 'constraints'<sup>1</sup>. We consider Tonbridge

and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings<sup>2</sup>. So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.19 The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in its obligation within statute with respect of the Duty to Co-operate.

5.20 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared. The TMBC Inspector also emphasised that it had been a long standing issue that Sevenoaks District was unable to address its housing needs and therefore was reliant upon its neighbours to help resolve. Tunbridge Wells cannot therefore absolve itself from contributing towards its resolution given this long standing position.

5.21 Therefore, having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough, as indicated in their DtC Statement (page 18), it is not considered reasonable that it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) would have been a means of addressing unresolved housing needs of others, whilst also making a contribution towards significantly boosting the supply of housing.

5.22 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.23 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore, the Plan should be found not to be legally compliant and should not be examined further.

5.24 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

5.25 Additionally, whilst the current DtC Statement for the Draft Plan indicates that the authority has effectively engaged with TMBC, as confirmed in the report to that authority's Planning & Transportation Advisory Board on 17th May 2021 (appendix 14), this has yet to be confirmed. As indicated in the minutes of the meeting, TMBC was of the view that:

Members expressed concerns on a number of matters including the significant impacts related to increased volumes of traffic; lack of infrastructure to support health care and education; insufficient assessment of visual, ecological and biodiversity impacts; and an increased risk of flooding and did

not feel that the mitigation measures proposed by Tunbridge Wells Borough Council adequately offset the scale of development in this location.

5.26 Furthermore, as indicated in the TMBC Report (appendix 14), they have concerns with respect of the infrastructure impacts of Tudeley village on them, especially as it lies close to the borough boundary and the town of Tonbridge would be attractive to any residents as a result of its proximity and extensive range of services. There concerns indicates that this is a further failure of the currently drafted Local Plan with respect of the Duty to Co-operate and the significant cross-boundary impacts that arise from Tudeley.

5.27 Consequently, alongside the obligation with respect of unmet housing need from Sevenoaks District, there are clearly other strategic concerns with respect of the approach envisaged by Tunbridge Wells Borough and its impacts upon Tonbridge & Malling Borough. These also have yet to be resolved.

#### Robustness of Plan period

5.28 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.29 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK ([www.gov.uk](http://www.gov.uk))) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).5.30 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.31 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.32 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.33 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.34 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should still be made. The Borough's housing requirement should be increased from 678dpa to 756dpa.

5.35 This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells.

5.36 A March 2039 plan end date would therefore provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

#### Robustness of housing land supply

5.37 Irrespective of the need for the plan to identify between 678 and 2,162 additional dwellings, the Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670

dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.38 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.39 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for between 8,399 and 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Castle Hill. The suitability of this site is detailed in the section with respect of the omission site.

#### Employment land need

5.40 Policy STR1 indicates that the authority needs to identify at least 14ha of employment land. The Employment Development Topic Paper indicates that this quantum of employment land is derived from extrapolation of the need as evaluated in the Economic Needs Study with an adjustment to ensure that the timeframe is consistent with the draft Submission Plan. Whilst we have no comments on the overall quantum of employment land required, we note that the justification within the Economic Needs Study is clear (Table 10.1) that the 14ha of employment floorspace required is derived from the combination of growth in both offices (around 6ha) alongside industrial/warehousing premises (around 8ha).

5.41 Whilst we have no comments on the derivation of the requirement for employment floorspace through the Economic Needs Study, having regard to the clear advice in the NPPF that offices are a main town centre use, the Council's strategy for delivering employment floorspace must recognise this distinction, especially with respect of the assessment of sites to address the identified need.

5.42 With regard to the identification of sites, the plan allocates land at Paddock Wood (policy STR/SS1) together with north of Longfield Road, Tunbridge Wells (policy AL/RTW17). These were the areas promoted for employment uses as indicated in the SHLAA. As these locations are not in town centres, the authority would need to demonstrate why the office element could not be accommodated in the relevant areas where the NPPF is clear with respect of the suitability of land for main town centre uses.

5.43 The extent of these areas significantly exceeds the 8ha of land necessary to address the Council's identified need for industrial/ warehousing. The Economic Needs Study is clear (Paragraph 5.6) that both Paddock Wood alongside Longfield Road, Tunbridge Wells are both existing significant employment locations and are therefore suitable for further growth reflecting market demand (NPPF chapter 6).

5.44 Whilst we do not comment on the Council's approach to allocating significant areas of employment land at both Tunbridge Wells and at Paddock Wood, it is noted that the site north of Longfield Road is located within both the Green Belt and AONB. The Draft Submission Local Plan (paragraph 5.109) indicates that the Council has resolved to grant permission for the erection of up to 74,000m<sup>2</sup> of office/ warehousing development (Class E) on this site, notwithstanding that it is located within these designations. This permission has subsequently been issued by the authority (appendix 12) following the Council's consideration of the application (appendix 11).

5.45 The Council's approval of significant employment development north of Longfield Road, Tunbridge Wells was due to the limited opportunities for such floorspace in the Borough. However as indicated in the SHLAA, significant areas were and have been promoted for employment development at Paddock Wood which is also attractive for operators and occupiers. These areas could have come forward instead of the Council's acceptance of major development in both the AONB and Green Belt. Nevertheless, as indicated by the draft allocation in the Plan together with the Council's resolution to approve (Appendix 11) (now granted (Appendix 12)), the authority has concluded that sites within these constraints can be developed notwithstanding the availability of alternatives in other locations.

5.46 As indicated in these submissions, the Council's approach with respect of housing is inconsistent with that applied for employment in that it has arbitrarily rejected locations in the AONB for major development, like Castle Hill whereas due to its inherent sustainability from proximity to Royal Tunbridge Wells it should have been selected. In contrast, the authority has selected less sustainable housing locations like Tudeley village due to the availability of options outside of the AONB. As indicated, this is inconsistent with the Council's approach to employment whereas notwithstanding opportunities which could address employment needs outside of both the Green Belt and AONB at Paddock Wood, it has nevertheless selected a location within it – land north of Longfield Way (policy AL/RTW17).

#### Conclusions

5.47 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing. This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.48 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.49 Irrespective of the failure to comply with the Duty to Co-operate, the policy is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later);e) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; andf) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.50 To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

5.51. Those consequential amendments are made to the document to reflect these revisions.

## 11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and  
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

## 12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

**Question 1**

Respondent's Name and/or Organisation Castle Hill Developments Ltd

**Question 2**

Agent's Name and Organisation (if applicable) Woolf Bond Planning

**Question 3**

To which part of the Local Plan does this representation relate? Policy

**Question 3a**

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

*[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP\_1912), STR8 (PSLP\_1922 ), STR9 (PSLP\_1925), STR/RTW1 (PSLP\_1929) and STR/SS3 (PSLP\_1932). See also appendices attached]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

**Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

**Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

## 1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

*[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]*

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

## 2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

### **Policy**

#### **Representation**

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

#### 7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

### 3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

#### 4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

#### 6. POLICY STR8: CONSERVING AND ENHANCING THE NATURAL, BUILT, AND HISTORIC ENVIRONMENT

##### Representations

6.1 Policy STR8 indicates how the authority will protect important features in the borough, included the High Weald AONB. As indicated in the representation to policy STR1, the authority has allowed major development in the AONB north of Longfield Road, Tunbridge Wells notwithstanding there were clear opportunities to deliver this outside of the designation at Paddock Wood. Paddock Wood like Tunbridge Wells are both key employment areas with demand for additional floorspace.

6.2 As indicated in the omission site section which emphasises that Castle Hill is a suitable and sustainable location for growth, a reason why this was discounted for housing growth was the extensive opportunities outside of the AONB within the Borough (Row 14 in Table 27 of the Sustainability Appraisal).

6.3 However, the authority has been inconsistent in its approach to employment which; as indicated in the representation to policy STR1; has confirmed development in the AONB even though there were sufficient suitable alternatives outside of this designation available. Therefore, it is clear that the Council

allows major development in the AONB notwithstanding the availability of alternatives. This should therefore be recognised in the policy alongside the allocation of land at Castle Hill.

## Conclusions

6.4 The approach of the policy should consequently allow development in the AONB where it is allocated for development within the Local Plan.

## 11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and  
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

## 12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Changes sought to the Local Plan with respect of policy STR8.

6.5 The Plan therefore as currently prepared in not sound with respect of:

- a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and
- b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

**Question 1**

Respondent's Name and/or Organisation Castle Hill Developments Ltd

**Question 2**

Agent's Name and Organisation (if applicable) Woolf Bond Planning

**Question 3**

To which part of the Local Plan does this representation relate? Policy

**Question 3a**

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR 9 Green Belt

*[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP\_1912), STR8 (PSLP\_1922 ), STR9 (PSLP\_1925), STR/RTW1 (PSLP\_1929) and STR/SS3 (PSLP\_1932). See also appendices attached]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

**Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

**Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

## 1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

*[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]*

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

## 2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

### **Policy**

#### **Representation**

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

#### 7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

### 3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

#### 4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

#### 7. POLICY STR9: GREEN BELT

3.1 Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley whereas it does not propose the exclusion of the Castle Hill site, adjoining north Royal Tunbridge Wells.

3.2 For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council’s Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Castle Hill is viable at property values expected elsewhere in the Borough.

3.3 The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions

are envisaged the consequences for the achievement of sustainable development must be examined. The paragraph is clear that:

“Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which is previously development and/or is well served by public transport.”

3.4 The Council's choice of Tudeley village does not accord with either of these criteria, whereas Castle Hill, with its relationship to existing services and facilities in north Tunbridge Wells, does accord with this advice. Furthermore, as indicated in other representations, although Castle Hill lies within an AONB, the authority has accepted major employment growth north of Longfield Road which is within both the AONB and Green Belt although there were clear opportunities for development in attractive areas for commercial development outside of both designations (at Paddock Wood). Therefore, it is clear that the need for development, be this either employment or housing can justify major development in both designations. This therefore confirms the preference for Castle Hill in contrast with the unsuitability of Tudeley Village.

3.5 Additionally, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

3.6 The Council in advancing revisions to its Green Belt is under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

3.7 Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

3.8 At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

3.9 In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

3.10 In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected

housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor”.

3.11 The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However, whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

3.12 As outlined within this statement and appendix 21, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with Castle Hill where sustainable development will be achieved and therefore exceptional circumstances can be demonstrated.

3.13 The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

“In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

3.14 Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

3.15 Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However, matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

3.16 The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

3.17 The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms

that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

3.18 The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

3.19 Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

3.20 This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

3.21 Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

3.22 By contrast, the Castle Hill Masterplan highlights the very limited harm to the borough's Green Belt given the well contained nature and definition of the site (by the A21 to the east, railway line to the west and mature Ancient Woodland to the north) which would arise from this site's omission from the Green Belt. This matter is addressed further below.

## 11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and  
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039. B) That the housing requirement is increased to 14,364 dwellings; C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and D) That reference to a new garden settlement at Tudeley Village is removed from the plan. E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

## 12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

3.23 The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

3.24 To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

#### Question 7a

*Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

**Question 1**

Respondent's Name and/or Organisation Castle Hill Developments Ltd

**Question 2**

Agent's Name and Organisation (if applicable) Woolf Bond Planning

**Question 3**

To which part of the Local Plan does this representation relate? Policy

**Question 3a**

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR/RTW 1 The Strategy for Royal Tunbridge Wells

*[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP\_1912), STR8 (PSLP\_1922 ), STR9 (PSLP\_1925), STR/RTW1 (PSLP\_1929) and STR/SS3 (PSLP\_1932). See also appendices attached]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

**Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

**Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

## 1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

*[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]*

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

## 2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

### **Policy**

#### **Representation**

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

#### 7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

### 3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

#### 4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

#### 8. POLICY STR/RTW1: THE STRATEGY FOR ROYAL TUNBRIDGE WELLS

8.1 This policy provides an overview of the allocations and development proposed for the town. To be consistent with the amendments advocated elsewhere in these representations it is essential that the policy is revised to ensure that it reflects the changes associated with the allocation of Castle Hill.

#### 10. OMISSION SITE: FAILURE TO INCLUDE ALLOCATION OF LAND AT CASTLE HILL, TUNBRIDGE WELLS AS AN ALLOCATION WITHIN THE LOCAL PLAN CONSISTENT WITH POLICY STR/RTW1 (DPC7)

10.1 Through the other representations submitted to the policies of the plan, there is a need to allocate additional land for housing development. Having regard to the representations and the earlier promotion of the Castle Hill site for residential development, it is clear that this is a suitable location for allocation. These reasons for this are detailed below.

Consideration of Castle Hill through the Sustainability Appraisal

10.2 Alongside the requirements for duty to Co-operate, the authority also has to provide a Sustainability Appraisal (SA). As acknowledged in the Inspector's conclusions on the St Albans Local Plan (paragraph 3) (appendix 13), the assessment can be regarded as flawed if it omits consideration of seemingly obvious reasonable alternatives. In the case of St Albans District, this was with respect of the consideration of smaller non-strategic locations (up to 500 dwellings) which could be reviewed for potential removal from the Green Belt to address the authority's housing needs.

10.3 With respect of employment opportunities, the Sustainability Appraisal for Tunbridge Wells appraised the potential of sites within the AONB and whether the need for this use would justify development within this protected landscape. As indicated in the SA, the authority accepted that the need for employment justifying the release of 13.4ha of land north of Longfield Road, Tunbridge Wells (AL/RTW17) from the Green Belt, notwithstanding its location within the AONB. The SA refers to the role of landscaping as part of the mitigation of the impacts of this employment development (page 304).

10.4 However, the SA discounts all potential strategic allocations for residential development where the site is within the AONB (Table 27, page 86). There is therefore an inconsistency in the Council's approach and therefore an indication that the authority has rejected a reasonable alternative. This is explored further.

10.5 Since the Castle Hill site adjoins the land north of Longfield Road, Tunbridge Wells employment allocation (AL/RTW17), it would be appropriate to have considered its suitability as part of a wider mixed use development as a reasonable alternative.

10.6 The current SA indicates that only two strategic sites were identified as reasonable alternatives (Table 27, page 86). These were growth at Paddock Wood together with the new settlement at Tudeley. The latter was on the basis that the site:

"has potential for good road and rail transport links to London and the larger settlements of Tonbridge and Paddock Wood. Cycle and pedestrian links to either of the latter were felt to be possible. Additionally, the total area of the sites combined would be sufficient to provide many services and facilities within the settlement, thus reducing the need for regular travel to other centres. For these reasons, this site was considered to be worthy of further examination."

10.7 Although this was the justification for assuming Tudeley was a reasonable alternative for a new settlement, there is no reappraisal of whether the assumptions over the deliverability of potential sustainable transport links for the current proposal and infrastructure requirements.

10.8 As indicated in the review of the viability study for Tudeley, it remains unclear how the scheme is supported by robust evidence to secure an effective and justified plan. Similar parallels with the failure of the North Essex Authorities Plan with respect of several of their proposed new communities (appendix 10), the Uttlesford Local Plan (appendix 9) alongside the one in Tandridge (appendix 8). Consequently, the identified viability confirms that other reasonable alternatives such as Castle Hill must be reviewed.

10.9 Furthermore, Castle Hill has ready access to the services of Tunbridge Wells, by virtue of its proximity, as well as being co-located adjacent to major employment opportunities. Consequently, sustainable behaviours can be embedded in new residents here. This contrasts with Tudeley where the necessary local facilities to enable a sustainable lifestyle will not be available for several years, and the scheme will not deliver the scale and scope of facilities and services that can compare to those present at Tunbridge Wells. Therefore, early residents will not have embedded sustainable behaviours.

#### Landscape impacts upon the AONB

10.10 The Sustainability Appraisal current discounts strategic housing sites like Castle Hill due to their inclusion within the AONB. It has nevertheless through the identification of the employment allocation on land north of Longfield Road, Tunbridge Wells accepted the principle of major development within the AONB (albeit for commercial units).

10.11 This has been further confirmed by the authority's resolution to grant planning permission for up to 74,000m<sup>2</sup> GEA of B1 and B8 class floorspace on the site (19/022870/OUT). This application was subsequently approved (appendix 12). The Planning Panel Report which considered this application (appendix 11) details the justification in employment terms for allowing the major scheme in the AONB. It states:

“It is recognised within the evidence base for the Draft Local Plan that there is limited availability of potential economic sites and existing sites able to accommodate growth. Bearing in mind the level of employment land required (as discussed above) together with the nature of such sites which generally comprise large buildings with extensive areas of hardstanding, such sites are better positioned within or next to existing built up areas. Another important factor is the connectivity of the sites and their positioning in relation to the surrounding highway and public transport networks. More isolated sites in rural areas (but outside of the AONB) are less suited to this type of use purely due to connectivity and even if such sites were to be allocated, they are less desirable in the market which therefore jeopardises the delivery of planned employment growth.”

10.12 However as indicated above, there were sites promoted at Paddock Wood (Land west of Maidstone Road and north of Eldon Way (Site ref 51 (7.5ha)), land at Little Rhoden Farm, Lucks Lane (site ref 218 (15.8ha)), land at Eastland Cottages, Maidstone Road (site ref 315 (3.16ha)), Kerrylands Sale Field, Lucks Lane (site ref 340 (6.23ha)) and Swatlands Farm, Lucks Lane (site re 347 (8.56ha))) which have been allocated for Employment use in the draft Submission Plan (Policy STR/SS1) and are outside of both the AONB and Green Belt. Furthermore, the Council's evidence on employment indicates that Paddock Wood is an equally attractive location to the market for employment and like Royal Tunbridge Wells has access to both road and rail networks. Therefore, it is clear that there were clear opportunities for employment growth within the Borough whilst avoiding both the Green Belt and AONB. This is especially important as sufficient land had been promoted at Paddock Wood to address the identified needs for employment floorspace, especially for industrial/warehousing without any need to consider land in either the AONB and/or Green Belt.

10.13 It is therefore clear that there were alternatives to the Longfield Road site. Nevertheless, the Council has confirmed major employment growth within the AONB and Green Belt. Consequently, the Council's discounting of major housing growth in the AONB is inconsistent with its acceptance for employment where there were clear opportunities in unaffected areas.

10.14 Therefore, this is a further illustration that the authority has discounted a reasonable alternative with respect of housing growth at Castle Hill, the same applies with respect of the undue weight given to the protection of designated landscape. The authority is clear that development needs can justify major employment development in the AONB notwithstanding the availability of alternatives (as recognised in paragraph 172 of the NPPF), the same therefore applies with respect of housing growth as confirmed above, the potential of employment growth at Paddock Wood was a suitable and deliverable alternative for major employment growth whilst avoiding the AONB and Green Belt at Royal Tunbridge Wells.

10.15 The NPPF (paragraph 172) acknowledges that great weight should be given to conserving and enhancing landscape and scenic beauty in AONB. With respect of the determination of applications, it identifies three elements that could be included in an assessment of the scheme. These are.

a) The need for the development;b) The cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; andc) The effect on the environment, landscape and recreational opportunities, and the extent to which that could be moderated.

10.16 The Council's rejection of opportunities for strategic residential growth in the AONB through the SA does not confirm that the authority has particularly considered the latter criterion for considering schemes, especially when it has accepted major employment growth in the designation, notwithstanding the suitability and viability of land outside of the designation.

10.17 As indicated on the Castle Hill Masterplan (appendix 18) there are clear opportunities for mitigating the impacts upon the wider AONB in allowing development of the site for around 900 dwellings.

10.18 Through robust assessment, the resulting scheme, as shown in the illustrative masterplan, is located sensitively within an edge of the AONB, an edge adjacent to the major settlement of Royal Tunbridge Wells, where the settlement's urban influence is very apparent.

10.19 Both desk-based and field-based baseline assessments, have informed the illustrative design response, from the initial spatial arrangement to an exceptional vision. In relation to the former, development is located down the hill and towards the urban edge, adjacent to existing built edge. One of the attributes of the AONB, the woodland, enable development to be sensitively assimilated into the receiving landscape, set below and behind adjacent mature trees. The retained and enhanced woodlands, Castlehill Wood, Appletree Wood, Devils Wood and Pilgrims Wood, with associated ghyll streams further down the slopes, visually frame and contained the illustrative scheme.

10.20 All of these landscape elements are retained and enhanced as part of the emerging place, as are the two significant hilltop green spaces which includes Castle Hill and the Hilltop Park. In totality, the site is an area of a little over 118.24ha and the land proposed for new built form is 30.34ha. This limitation of extent has moderated the effect of the scheme on the AONB consistent with NPPF paragraph 172 c.

10.21 Beyond the above moderation, further moderation is to be achieved through high quality design, including commitment to a Design Guide. This will commit to the delivery of an exceptional scheme where blue and green infrastructure, biodiversity net gain, detailing of the built form and assemblage of this built form into lanes and streets, that is characteristic of the best parts of the AONB, will positively responded to the High Weald AONB.

10.22 As with any greenfield site, there will be adverse effects upon the environment, landscape and recreational opportunities, but through successful design, the scheme will moderate such effects to the extent that there are beneficial outcomes, as follows:

- Protects and enhances the green, wooded framework, in part (Ancient Woodland) of the site;
- Protects and enhances blue infrastructure, through the retention of ponds and ghyll streams, and the addition of new components of this 'blue' network through a Sustainable Urban Drainage System;
- Provides new accommodation of a high quality, characteristic form and appearance;
- Provides a landscape mosaic of grassland, and buffer planting;
- Improves accessibility through the landscape, via footpath improvements and links into the major development of Tunbridge Wells;
- Proposes a network of external spaces, for both amenity and ecological benefits, spaces for the benefit of the new and existing community alike;
- Creates a new place where both the homes and the landscape positively respond to their context and reflect local character. The scheme recognises that design quality has to be high, and the early visioning work will be translated into an exceptionally high quality scheme.

10.23 Overall, the scheme represents a logical inclusion of a high quality new place into its urban edge context where the sensitivities of the AONB have been recognised. Great weight has been applied to conserving and enhancing the landscape and scenic beauty of the designation, whilst significantly moderating the extent of any detrimental effect on the environment and landscape, through sensitive master planning and design; and the natural ability of the site to successfully assimilate built form. The proposal is therefore consistent with NPPF paragraph 172.

10.24 The authority has indicated that there were limited opportunities promoted for employment development which necessitated the allocation of land within it to meet the identified needs off Longfield Road. Without commenting on this, the draft policy in the Plan emphasises the role of this location (criterion 4 of Policy STR/RTW1) of providing significant employment growth with approximately 90,000m<sup>2</sup> of B2 and B8 floorspace. The preceding paragraph 5.15 highlights the importance of the Longfield Road allocation to reinforce the site as a prestigious business park for the town, Borough and west Kent. This therefore illustrates the importance of the site.

10.25 With significant job growth envisaged at Longfield Road of between 950 and 2,500 workers on the site (Applying the employment density matrices in the HCA Employment Density Guide of 36m<sup>2</sup>/worker (B2) and 70-95m<sup>2</sup>/worker (B8)), there would be a justification for additional homes nearby to minimise journey lengths and providing the opportunity to embed sustainable behaviours i.e., walk and cycle to work. This would therefore provide justification for the development of homes on the adjoining Castle Hill.

10.26 It is also acknowledged that although the draft Plan envisages some employment development at the expanded Paddock Wood (A recognised existing employment location in the Borough as detailed in the Employment Needs Study (i.e. paragraphs 6.49 and 7.8)), there is none specified for Tudeley Garden Settlement in Table 5 of Draft Plan (Paragraph 5.204 of Draft Plan indicates that 10,000m<sup>2</sup> of commercial and office space will be provided in Tudeley village centre. This will include retail alongside of commercial activities and business space. The Tudeley Delivery Strategy from the site promoters indicates that less than 3,000m<sup>2</sup> commercial space would be provided alongside more significant retail development). This Table is followed by further explanation (paragraph 4.56) indicating:

"These allocations total some 26.5 hectares. The sites, which are all 'key employment areas' in the Local Plan, each provide for a mix of business (B and E class) uses. They tend to be developed at a lower density than purely office sites, with consequently lower floorspace coverage. Overall, it is still expected that these allocations are appropriate in relation to the minimum provision required. This takes account of the geographic spread of the sites and their relationship to major housing growth. Also, it recognises that there will be additional floorspace, likely in the form of smaller offices and

possibly workshops, as part of the new settlement at Tudeley Village, the locations of which will be identified through the proposed Supplementary Planning Document (SPD).” (My underlining)

10.27 It is therefore clear that locations for housing and employment growth have been carefully considered to be reflective of the distribution. However, with Tunbridge Wells providing over ½ the employment growth, it would be logical and appropriate for it to provide a similar share of housing.

10.28 The authority has indicated that the limited promotion of employment land necessitated the identification of land in the AONB for employment whereas this was not required for housing. The analysis with respect of policy STR1 indicates that the borough’s need for industrial and warehousing space could readily have been met through locations outside of both the AONB and Green Belt at Paddock Wood (Review of the site submissions/assessments especially those of Paddock Wood). Nevertheless, the Council has concluded that it is justified for employment development in both these designations.

10.29 Therefore, the discounting of Castle Hill for housing due to the availability of alternatives is inconsistent with the Council’s approach to employment. Therefore, as indicated in the landscape submissions above, residential development at Castle Hill can be achieved without harm to the wider area. Furthermore, due to the proximity of the site to existing and committed infrastructure and services, Castle Hill is sustainably located for such development, especially as resident’s sustainable behaviour can be embedded from initial occupation. This contrasts with a need for measures to change resident’s behaviour at Tudeley once the services and facilities can be provided.

10.30 Through the examination of the West Dorset, Weymouth & Portland Local Plan (an authority which also had the potential for growth on land within and outside of an AONB (alongside other significant constraints detailed in footnote 6 of the NPPF – see extract below)), nevertheless considered the suitability of an allocation for significant growth at Bridport. This was a site for around 760 homes and 4ha of employment at Vearse Farm, west of Bridport.

[TWBC: see full representation attached for Extract of constraints in West Dorset and Weymouth & Portland]

10.31 The suitability of the Vearse Farm allocation in the draft Plan was assessed in paragraphs 172-177 of the Inspector’s Report (appendix 16). These indicate:

“172. As the largest settlement in this part of West Dorset, Bridport is the most suitable location to meet future development needs in both the immediate and wider area. The proposed development of Vearse Farm on the western fringes of Bridport is therefore consistent with sustainability principles but led to a large number of representations, including a petition, opposed to the allocation. Local residents and organisations object to the choice and scale of the site and contend that development would see a significant expansion in the population of the town adding to existing problems of traffic congestion and pressure on local services and facilities.

173. The size and extent of the allocation challenges the presumption in the NPPF that major development should be avoided in AONB unless there are exceptional circumstances. It is clear to me that the Councils are well aware of the importance of protecting designated landscape but face the difficult problem of balancing such concerns with the need to provide homes and jobs to meet future needs. In order to achieve this and adhere to sustainable development principles it is inevitable that some areas in the AONB will be affected.

174. From my visits to the area I concur with those who say that buildings on Vearse Farm would be visible from various points in the immediate and wider landscape. However, the topography would make it difficult to appreciate the size of the development from any one location and this could be reinforced by appropriate landscaping. If attention is paid to the design throughout the phasing programme it would be possible to introduce variety in the form and layout to help offset some of the concerns about the scale and massing of the development.

175. I was told of various issues such as flooding problems affecting the site, as well as land downstream, which could increase the likelihood that development would intensify run-off and have adverse consequences for areas between Bridport and West Bay. I cannot discount this but there has been no formal objection by the Environment Agency to suggest this is so serious an issue to curtail either some or all of the housing and employment uses proposed for the site.

176. Similarly, there are fears that traffic generated by the scheme would add to congestion and pressure on the highway network, particularly West Allington Road (B3162). This is the main route into Bridport from the west and one which, I was told, is very sensitive to further development. I am aware that congestion is a significant issue, particularly at peak times and during the summer months. Nevertheless, the Highway Authority is satisfied that measures can be taken to accommodate the level of development involved.

177. It was suggested the forthcoming neighbourhood plan for Bridport could be used to examine development options before a final decision was made. I regard this as unrealistic given that the plan is at an early stage of preparation. The delivery of Vearse Farm is a crucial element in the Councils' housing land supply calculations. Deferring a decision until such time as a neighbourhood plan can be put in place would undermine the soundness of the LP and increase the risk of schemes being promoted in locations where the individual and cumulative impact of development may be greater. On balance and having regard to the site's location and other issues I have referred to, I consider there are exceptional circumstances to justify the identification of Vearse Farm in the LP."

10.32 The approach in West Dorset clearly considered the impact upon the AONB and how the housing/employment needs of the area justified major development in this designation through the Local Plan. The same approach can readily be followed in Tunbridge Wells Borough with respect of Castle Hill, given the benefits of providing housing and employment growth on adjoining sites adjacent to the main town in the authority.

10.33 The appropriateness of the approach for Vearse Farm, Bridport, Dorset in accepting major development in an AONB has been endorsed by the Courts in the judgement of *Adverse et al v Dorset Council* [2020] EWHC 807 (Admin) (appendix 17). This related to an assessment of the Council's determination of an application for 760 dwellings, 4ha of employment and other uses on the site allocated in the Local Plan. The judgement (paragraph 40) acknowledged that the suitability of major development in the AONB had been thoroughly reviewed through the examination of the Local Plan and therefore the authority was justified to conclude the application was acceptable. The judgement (paragraph 41) referenced that the Local Plan Inspector had considered the scope for meeting development outside the designated area before concluding it was appropriate.

10.34 Whilst the NPPF (paragraph 171) indicates that there should be a hierarchy to the protection of designated sites, it recognises that land of the least environmental value should be selected for development. As outlined in the representations, the site at Castle Hill is significantly better in terms of its sustainability credentials due to its proximity to existing and committed services and facilities to ensure appropriate behaviours are embedded from initial construction, unlike that feasible at Tudeley village.

10.35 Although paragraph 172 is of particular relevance to determining applications, it also provides a framework for determining the suitability of growth within an AONB through plan making.

10.36 Having regard to the three criteria, both housing and employment need (latter already accepted by the authority with respect of the land east of Kingstanding Way) provides justification for development in the AONB. As noted, the Council's acceptance of a need for employment was accepted, notwithstanding the clear suitability and availability of land at Paddock Wood which could meet the identified needs whilst avoiding both the AONB and Green Belt.

10.37 Secondly, in contrast to the clear sustainability benefits arising from the proximity of housing at Castle Hill to the existing and committed services and facilities in Royal Tunbridge Wells, it is clear that this is a further factor in support of the site, rather than Tudeley village. The benefits of locating significant housing and employment close to each other at Royal Tunbridge Wells is therefore a further justification for growth at Castle Hill.

10.38 Thirdly, the Castle Hill scheme will retain the existing blocks of woodland (as indicated on the masterplan). The scheme will also include significant landscaping to further minimise impacts (A solution accepted by the authority as mitigation for the Kingstanding AONB impacts in paragraphs 10.78 of the Planning Committee Report (appendix 11)). Additionally, the bulk and scale of buildings will be less than the commercial units which the authority have accepted on the land east of Kingstanding Way (see paragraph 10.68 of the Planning Committee Report (appendix 11) and like the employment scheme, will be viewed within the context of the adjoining built development (paragraphs 10.69 & 10.70).

10.39 Consequently, as recognised by the Council in their assessment of the employment site on land east of Kingstanding Way, development at Castle Hill would also be acceptable having regard to paragraph 172 of the NPPF. accordingly, the Castle Hill site has the ability to successfully accommodate the proposed form and scale of development within the AONB without overriding detrimental effects.

10.40 Furthermore, the SA approach to the strategic employment allocation within the AONB (Appendix F, Page 304) notes the highest levels of employment need occur at Tunbridge Wells as a justification for development within the AONB and that the landscape score reflects the significant but, short-term impacts that will arise but will reduce once the woodland to the east matures. Adopting this NPPF 172 compliant approach to the Castle Hill scheme, this too is in the area of highest residential need.

10.41 As to the extent to which the proposal can be moderated (NPPF paragraph 172c), the Council have relied upon proposed landscaping maturing for the Longfield Road employment allocation. In contrast, the Castle Hill project is moderated by its existing blocks of mature woodland that already contain and therefore moderate the effect of the proposal on the wider surrounding AONB landscape. Evidently, there is an inconsistency within the SA to the consideration of these major schemes within the AONB. If the approach adopted by the SA to the Longfield Road employment site is applied to the Castle Hill scheme, then the latter should not have been rejected at the initial AONB sieving stage and could have come forward as a reasonable alternative and be included within the local plan. A modification to the Local Plan is consequently required to address this.

#### Green Belt

10.42 The Castle Hill Masterplan highlights the very limited harm to the borough's Green Belt given the well contained nature and definition of the site (by the A21 to the east, railway line to the west and mature Ancient Woodland to the north) which would arise from this site's omission from this designation.

10.43 Although the Council's Stage 1 and 2 Green Belt assessments discounted the suitability of the Castle Hill site, this was with respect of a larger area of land that had been promoted for development. The studies also rejected the suitability of the Tudeley new settlement location, nevertheless through an unpublished 3rd Study an alternative conclusion has potentially been reached. Had the same exercise been undertaken for a more refined Castle Hill site, its acceptability would have also been confirmed.

10.44 Castle Hill lies within the wider BA2 parcel with Tudeley split between parcels BA3 and BA4 which is also a large parcel.

*[TWBC: for map see full representation attached]*

10.45 Although the Castle Hill site was appraised through the Council's Green Belt assessment (parcel BA2), as illustrated on the extract above, this related to an extensive area of land. In contrast, the Council in assessing the parcel containing the land off Kingstanding Way allocation concluded that the site could be developed without significant impact or harm to the Green Belt (parcel TW4 in the Stage 2 Study).

10.46 The table below therefore assesses the contribution of the Castle Hill site based upon the smaller area promoted through site DPC7, rather than the extensive area of BA2.

#### Purpose

#### Comments

#### Rating

##### 1 – Check the unrestricted sprawl of large built-up areas

The parcel is adjacent to the large built-up area and has a strong degree of containment by permanent features including rising land, the A21, railway line and blocks off ancient woodland. This containment limits the degree of unrestricted sprawl of a large built up area to only a localised and site area only degree.

#### Moderate

##### 2 – Prevent neighbouring towns merging into one another

Development of this parcel would result in no perception of the narrowing of the gap between towns, especially in the context of the topography and screening provided by the woodland on the northern edge of the site which would be retained

Weak or no contribution

3 – Assist in safeguarding the countryside from encroachment

The parcel relates more strongly to the settlement than to the wider countryside. The strong degree of site containment limits the degree of encroachment to a localised and site area only degree.

Relatively weak

4 – To preserve the special character of historic towns

The parcel forms a minor element in the historic setting of Tunbridge Wells

Relatively weak

5 – Assist in urban regeneration by encouraging the recycling of derelict and other urban land

Individual parcels are considered by the authority in their Green Belt Assessment to make an equal contribution towards this purpose. The same logically applies to the Castle Hill site and therefore it is not assessed further.

Not assessed

Green Belt boundary Strength

The distinct change in landform, mature blocks of woodland, the A21 and railway line create strong Green Belt boundaries, as confirmed in the Landscape Assessment.

10.47 The assessment in the table is clear that development of the Castle Hill site can be released from the Green Belt without significant harm, comparable to the position of the authority with respect of the Kingstanding Way allocation (that has subsequently been granted permission). The Castle Hill site by its degree of containment and physical and visual association with the existing built up area of Royal Tunbridge Wells is less sensitive in Green Belt terms than the Tudeley village allocation, irrespective of the relative sustainability characteristics of the two locations.

Castle Hill Transport Connectivity and Sustainability

10.48 The client's transport consultants have prepared a note of an overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. This is attached as appendix 19.

[TWBC: see full representation for Location and Connectivity of Castle Hill to Tunbridge Wells]

10.49 The location of Castle Hill makes it highly suitable for major and sustainable development being:

- Located adjacent to the main service and administrative centre in the area (Tunbridge Wells), reducing the length of journeys required to reach key services and facilities;
- Collocated with major employment opportunities, offering an unrivalled opportunity for sustainable access to jobs on the doorstep and promoting access by active mode;
- Closely located to everyday facilities within reasonable walking and cycling distance of the site;
- Well-connected to key transport infrastructure, including an established bus and rail network, and good quality walking and cycling connections to local destinations and attractions; and
- Adjacent to the primary road network (the A21 and Longfield Road) ensuring that residual car demands are directed to roads suitable and able to accommodate additional traffic.

10.50 Overall, the scheme would represent a logical and sustainable extension to Tunbridge Wells and one that is better located by comparison to most if not all other alternatives at this scale of development.

10.51 Underpinning the proposals for Castle Hill are a series of transport principles which will guide the development of the site to ensure the delivery of a sustainable and successful new community:

- Connected Communities
- Healthy Lives
- Better Environment
- Smart Development

10.52 The location of the site relevant to key local facilities, and benefiting from sustainable travel connections on the doorstep, means that the development offers a significant opportunity to create a sustainable and integrated development, without the need for a significant and unviable / undeliverable transport strategy, a characteristic of the Tudeley village allocation.

10.53 Existing opportunities for sustainable movement will be enhanced by the provision of a mixture of everyday uses on the site and the delivery of a comprehensive Sustainable Transport Strategy comprising a package of measures to enhance access by all travel modes.

10.54 Existing bus services can be extended to incorporate the site and the scheme can connect to established movement corridors, and the national rail network is within easy reach of the scheme.

10.55 Walking and cycling connections can be achieved to Pembury Road, to connect to the existing Tonbridge – Tunbridge Wells cycle route, and south to North Farm / Kingstanding major employment area and wider Tunbridge Wells urban area, accessing established walking and cycling infrastructure. Public rights of way and local routes can be improved to enhance opportunities for sustainable movement.

10.56 Vehicular access to the site can be achieved to the A21 at Pembury Road, with secondary access to Longfield Road and North Farm Lane (for access to Dowding Way). The northbound A21 slips would be relocated to the site and would deliver quality access to Castle Hill.

10.57 Notwithstanding the sustainable credentials of the site, Castle Hill will generate traffic demands on the local network. Appraisal of traffic impacts identifies that:

- The Castle Hill Scheme is well located to the strategic road network, in a location which does not exhibit any significant congestion issues; and
- The scheme will result in generally a less than 5% impact on the local network, resulting in 1-2 additional vehicle trips each minute on local roads in peak periods. This is a modest impact and capable of being accommodated.

10.58 The location of the Castle Hill adjacent to the established main settlement and connecting to existing and established infrastructure means that no major infrastructure (such as new roads) is needed.

10.59 Overall, there are no transport reasons why Castle Hill cannot be successfully achieved in line with National Planning requirements. The site would represent an excellent opportunity to achieve a sustainable new community, connected to the primary settlement in the district which offers unrivalled sustainable travel opportunities, and in an area where there is adequate infrastructure to accommodate the demands of growth.

#### Castle Hill A21 Access

10.60 The clients transport consultants have prepared a 'A21 Impact Appraisal' (appendix 20 which sets out the proposed access strategy to the Castle Hill site and provides an assessment of the impact of the access strategy on the A21. The assessment has been informed by engagement with Highways England. It has been demonstrated that:

1) New slip roads can be provided onto the northbound A21 carriageway that comply with design standards and have sufficient capacity to accommodate the additional traffic from the proposed development; 2) The geometry of the Capel junction onto the southbound A21 carriageway complies with design standards and has sufficient capacity to accommodate the additional traffic from the proposed development; 3) The layout of the existing on and off slips at the A22 / Longfield Road / Tonbridge Road junction are underutilised and therefore no junction layout alterations are necessary; 4) The A21 / Longfield roundabout and A21 / Tonbridge Road roundabout improvement being delivered as part of the expansion to Kingstanding Business Park will operate within capacity with the additional traffic from the proposed development; 5) New slip roads will be provided onto the northbound A21 carriageway to address concerns raised by Highways England in relation to the separation between the Capel and Longfield Road junction; and 6) The existing slip roads onto the A21 southbound carriageway will be retained (which have a greater degree of separation). The development will only result in a modest increase in weaving movements. The analysis indicates that short weaving sections of around 200m may be appropriate on urban roads with weaving flows of the magnitude anticipated in the Design Year. This is shorter than the 400m weaving section available between the junctions on the southbound A21 carriageway. Moreover, the additional weaving movements will be undertaken by motorists largely familiar with the layout of the junctions and because there is no lane gain or lane drop between the junctions, traffic from the development does not need to change lane between the junctions.

10.55 The A21 impact appraisal confirms that the site can be satisfactorily accessed off the A21 in addition to vehicular connections to the south.

[TWBC: see full representation for Castle Hill Masterplan]

10.61 The masterplan for Castle Hill looks to bring together a new neighbourhood of an exceptional quality, inspired by the High Weald and set within a natural, well-enclosed site on the northern edge of Royal Tunbridge Wells. New homes build upon the surrounding High Weald character and form,

drawing on the AONB Design guide to reflect the architectural and landscape qualities found within the area. The scheme will function as a natural sustainable urban extension to the town, well-contained by the A21 to the east, a woodland ridge to the north and a railway line to the west.

10.62 The site is naturally formed by the wooded areas that frame the site. The north-eastern part of the site is on rising ground, with mature woodland forming the wooded ridge that forms a prominent skyline feature within distant views to the south and also north on the approach along the A21. The masterplan successfully retains and works around these wooded areas that act as a strong visual amenity feature, contributing to the appearance of the local and wider landscape, and enclosing the site and embedding it into the landscape. The site includes areas of Ancient Woodland and Castle Hill Scheduled Ancient Monument, both of which have been incorporated into the masterplan design. Each are dealt with in turn below.

10.63 The woodlands within the site form a strong sylvan framework within the local and wider landscape. In particular, the wooded ridge to the north forms a prominent skyline feature within views from the south that naturally contains the site. As previously stated, the site is well-enclosed in the wider landscape, is physically and visually well related to the urban area of Royal Tunbridge Wells to the south and will, for the scale of the proposed development, have limited localised effects on the wider AONB landscape. The mature landscape framework ensures that the proposal and its effect on the AONB is moderated to a significant degree from the outset. More localised effects will be moderated by the careful location of development parcels and its sensitive integration with green and blue infrastructure. New homes will be planned within this existing landscape framework, enclosed by the woodland ridgeline and setting of Castle Hill.

10.64 Given the inclusion of Priority Habitat woodland on the site, the masterplan incorporates 25m buffer zones within the design, protecting the Ancient Woodland. The size and type of buffer zone required varies depending on the type, scale and impact of development. Natural England recommend a development set back of at least 15m to protect the woodland, create an appropriate setting and contribute to wider ecological networks and be part of the green infrastructure of the site. The masterplan has, however, increased the buffer zone to 25m, in accordance with TWBC draft Local Plan Policy EN15. The masterplan respects these features by using the appropriate offsets to secure the preservation of the Ancient Woodland. There will be a positive opportunity to improve the Ancient Woodland through the development scheme, including woodland management, rationalising existing recreational activities and woodland restoration including a transition to native species.

10.65 The masterplan creates new areas of parkland, linking together key landscape features and woodland groups. A northern ridgeline park opens views to the northern woodland ridge and acts as a connecting parkland between both the hilltop areas to the east (Castle Hill) and west (proposed Hilltop Park). A new wetland and wooded parkland is also created in the southern part of the site, with the creation of new habitat and drainage ponds located within new woodland groups. This southern park also acts to protect the character of the western hamlet and creates key habitat and ecological connections between Ancient Woodland groups.

10.66 The Castle Hill Scheduled Ancient Monument lies on the north-eastern part of the site. It is primarily of significance for its archaeological value and is of limited historical value. It is not considered that the SAM has any architectural or artistic value. Based on the information currently available, the significance of the Scheduled Monument is considered to be high and the remains of national importance. However, the condition of the monument is likely to have been degraded as a result of historic and particularly modern ploughing. In addition, a series of archaeological excavations and the installation of pylons during the 20th century will have further degraded the condition of the monument.

10.67 A new local centre has been created around the existing Oast House, located at Castle Hill Farm, establishing a new heart to the community and creating a welcoming arrival from the A21. New community facilities and a retirement / care home are located at the foot of Castle Hill. A new two-form entry primary school has been located closely to the local centre, benefitting from the immediate access to the A21 and the local facilities. The school pitches offer the potential to offer additional provision and use to the local and wider community.

10.68 The local centre acts as a central hub for infrastructure, with traffic incoming from the A21 with northbound access. Connections to the old A21 provide southbound access to the A21. The local centre acts as the interchange for these routes, with links further into the development via the proposed spine street. Primary access to the development is located to the east, with immediate access from the A21. A newly designed slipway from the motorway provides access into the scheme, running

adjacent to the historic driveway. New landscape and avenue planting create a unique arrival into the development and extends along the spine street through the development.

10.69 The spine street acts as the primary route through the scheme, as well as key pedestrian and cycle links. The historic driveway is also identified as a key pedestrian and cycle route east-west through the development and links to wider cycle and pedestrian routes. The route will be enhanced to function as a key route with new landscaping and tree planting along its route to create a feature route and sets the edge to the development.

10.70 The masterplan seeks to achieve access to the south from the recently approved Kingstanding development and from North Farm Lane. These routes provide immediate access to Dowding Way and North Farm Road, with direct links towards the centre of Royal Tunbridge Wells.

10.71 The masterplan for Castle Hill sets out a strategic framework for delivering a new community set within the existing landscape setting north of Royal Tunbridge Wells. The site takes into account all the physical constraints of the site, above and below ground, to create a scheme that achieves a balance between both nature, landscape and new homes. In doing so, the proposal creates a place that is embedded within the character of the High Weald as a Hillside community, set within the existing landscape framework.

10.72 We consider that part of the solution to addressing the identified shortfall is to allocate land at Castle Hill, Tunbridge Wells as a high quality and sensitive sustainable urban extension for residential development alongside consequential changes to the policy map.

## 11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and  
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039. B) That the housing requirement is increased to 14,364 dwellings; C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and D) That reference to a new garden settlement at Tudeley Village is removed from the plan. E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

## 12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Change sought to the Local Plan.

10.73 To ensure that the plan is therefore sound as detailed in the representations, land at Castle Hill should be included as a residential allocation with consequential amendments to settlement boundaries on the northern edge of Royal Tunbridge Wells.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** Yes, I wish to participate in hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

**Question 1**

Respondent's Name and/or Organisation Castle Hill Developments Ltd

**Question 2**

Agent's Name and Organisation (if applicable) Woolf Bond Planning

**Question 3**

To which part of the Local Plan does this representation relate? Policy

**Question 3a**

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy STR/SS 3 The Strategy for Tudeley Village

*[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP\_1912), STR8 (PSLP\_1922 ), STR9 (PSLP\_1925), STR/RTW1 (PSLP\_1929) and STR/SS3 (PSLP\_1932). See also appendices attached]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

**Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

**Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

## 1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

*[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]*

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

## 2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

### **Policy**

#### **Representation**

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

#### 7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

### 3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

#### 4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

#### 9. POLICY STR/SS3: THE STRATEGY FOR TUDELEY VILLAGE

9.1 Through policy STR/SS3, the Council seeks to remove land from the Green Belt for the delivery of a new village at Tudeley.

9.2 For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is with respect of the scale of housing development envisaged as detailed in the representation to policy STR9. As we do not consider that very special circumstances have been demonstrated, this is a further indication that no revision to the Green Belt should occur at Tudeley as detailed in the representation to policy STR9.

##### Sustainability of Tudeley village

9.3 Appendix 21 prepared by the client’s highway consultants examines the sustainability credentials of the Tudeley village (TV) proposal. Fundamental to the allocation is the delivery of a sustainable development using ‘garden village’ principles.

9.4 It is inescapable that TV is not in a site in a sustainable location, and that the combination of the scale of the scheme (for example TV would generate only 500 jobs for its ~6,750 residents), and the significant travel distances to higher order settlements which are well beyond walkable distances, will lead to an unsustainable development and increased car use compared to more sustainable solutions. The measures proposed will not make what is an unsustainable location, sustainable.

9.5 The assumptions in the Transport Assessment are significantly overly optimistic (in terms of traffic generation and trip containment of TV, and in relation to the success of modal shift measures). The traffic generation that TV will create beyond the garden settlement is significantly underestimated, and there are significant differences between the traffic generation of TV assumed in the SWECO TA (700 external trips) and the Stantec Assessment supporting the DL Masterplan Study (1200-2000 external trip). The proposed submitted local plan (PSLP) does not therefore provide for the infrastructure that will be needed to soundly support the proposal.

9.6 Indeed, the only means by which the PSLP Transport Assessment has managed to conclude that the PSLP is sound is by applying a universal reduction in traffic flows (of 10%) across the entire network and greater still reductions in Tunbridge Wells, TV and Paddock Wood (15%), on the basis of what in real terms is limited investment in sustainable travel measures. The majority of the planned investment is focussed on the Strategic Sites and will do little if anything to create what is a very significant change in behaviour of general traffic patterns on the wider network. This is unrealistic and not supported by the limited evidence base.

9.7 TV really falls between stalls; it is not far enough away from key service centres (i.e. Tonbridge and Royal Tunbridge Wells) that TV residents will be disincentivised from obtaining their services in the higher order settlements; is not of sufficient scale to meaningfully deliver many everyday needs can be properly addressed internally to the site; and is not close enough to the higher order settlements to make sustainable travel options realistic for many. It risks creating a car dominated development area, contrary to the Vision and does not demonstrate the high levels of connectivity and containment that the PSLP seeks.

9.8 Furthermore, there are a series of disconnections between the evidence base and policy requirements, as well as significant delivery risks to key infrastructure:

- The SWECO Transport Assessment identifies that the A228 Colts Hill Bypass and Five Oak Green bypass are required – it did not test any other options. Yet the PSLP identifies a reduced scheme for A228 Colts Hill. There is no evidence to demonstrate this will be successful. The DL Masterplan Study goes further to assume that if TV comes forward in isolation, the A228 improvements may not even be needed. There is no published evidence to show how this conclusion has been reached. • No assessment has been carried out to determine the point in development at TV that the A228 improvements and Five Oak Green Bypass are needed, and the PSLP does not secure their ultimate delivery, simply deferring to the payment of contributions. There is no guarantee that there will be sufficient funding to deliver the works, that the schemes are deliverable, or that the council will receive funding in a timely and coordinated manner to allow the schemes to be delivered when they are needed.
- The PSLP advocates the accessibility of TV to higher order settlements by walking and cycling. In practical terms, this is simply not feasible for many people to achieve the distances required on a regular basis. Moreover the PSLP does not identify in detail how any connections will be formed. The Walking and Cycling Strategy advocates use of private tracks, countryside links and rights of way. Such routes will not offer attractive, accessible and convenient routes which have a real prospect of attracting regular users. • TV is reliant on three separate improvements to crossings of the mainline rail network. No evidence has been presented to demonstrate that these connections can actually be achieved, or that Network Rail are supportive of the schemes. The viability assessment does not demonstrate how NR expected consideration / compensation has been factored into the estimates, which may be significant sums. • TV is also reliant on various schemes which require third party land / and/or where no feasibility work has been presented, including Five Oak Green Bypass (in third party ownership), the B2017 widening (where no scheme or assessment is presented) and at A228 Colts Hill. The PSLP does not identify how these schemes will be delivered and instead seeks simple contributions from TV to their delivery. The viability assessment did not include allowances for land costs. There is a significant risk that essential infrastructure will not be delivered. • The PSLP identifies in its vision that TV will deliver high frequency / Rapid bus connections, yet the frequencies assumed offer nowhere near this level of service and will not offer the 'turn-up-and-go style service that would stand any chance of attracting significant trips away from car based travel. The viability assessment has assumed a bus service contribution of £3m across TV and Paddock Wood. This will be wholly

inadequate to provide the service levels needed to achieve the laudable sustainability aspirations, and will ultimately expire, leaving a very real prospect that services will not be available at any sort of attractive frequency in the longer term. • The only locational advantage of TV is its placement on the mainline rail network. Despite this, and contrary to the NPPF, the PSLP does not require a rail connection to be formed and provides only tepid aspirations that this may be considered later. If the connection is not planned and required at the start, it will not be delivered. The lack of rail connectivity, alongside the limited public transport on offer and the prohibitive distances from TV to higher-order centres will result in unsustainable development and will not achieve the PSLP Vision.

9.9 The key impacts of this approach are likely to be:

- A development that will not achieve the high aspirations for containment and sustainability, leading to significant car-based travel demand outside of TV.
- Car dominated patterns of travel between TV and higher order settlements (Tonbridge, Paddock Wood and Royal Tunbridge Wells). The lack of realistic alternatives to car travel will not create the aspired transport behaviour.
- A significant underestimation of traffic generation of TV and overestimation of the success of travel planning measures in the wider district, undermining the evidence base.
- A demand for significant further highway interventions to accommodate the development demands.

9.10 On this basis, the allocation of TV is not sound, is not sustainable, is not supported by adequate and robust evidence to demonstrate that the scheme can be achieved without significant unreported impacts and that it will be accompanied by the necessary mitigation measures at the right time.

9.11 The KCC concerns raised in relation to TV at the Reg 18 stage, have not been addressed in the PSLP.

#### Infrastructure

9.12 As noted in the SA, to enable the delivery of Tudeley, significant infrastructure improvements will be required. This includes:

- Colts Hill - £20m includes, £8m of which for TV
- Five Oak Green Bypass - £9m, all on TV
- Rail Tunnel - £20m on TV
- All modes rail bridge - £10m on TV
- Ped Cycle rail bridge - £3.5m on TV
- Widening of B2017 (to Tonbridge) - £3.1m
- Bus route subsidy - £3m, of which £1.5m on TV
- Travel Plan - £1.25m

9.13 Additional infrastructure to serve the site will include utility services, education, community, health and leisure facilities. For these factors, no indication has been provided in the current Draft Infrastructure Delivery Plan of the costs or delivery mechanism of these significant and also essential infrastructure investments. Without this information there is no certainty that the Plan can be delivered and consequently would be effective.

9.14 The Plans prepared by both Uttlesford Council (appendix 9) and the North Essex Authorities (appendix 10) failed with respect of some of the new settlements envisaged as the costs assumed were unrealistic and did not include sufficient contingency. The Tandridge Local Plan Inspector has significant doubts with respect of the uncertainty of funding the major new road infrastructure associated with the South Godstone Garden Village, following a rejected HIF bid (appendix 8).

9.15 Although the Council has prepared information with respect of costs and delivery mechanisms for Tudeley, as indicated earlier in this submission, the new settlement is not expected to contribute towards all the necessary infrastructure i.e. the Colts Hill off-line improvement (This is only included in the financial appraisals for development at Paddock Wood) which is required alongside the Five Oak Green bypass (which Tudeley is expected to contribute towards) (See the Viability assessment schedules in Appendix II of the Stage 2 Viability Appraisal). Furthermore, notwithstanding the financial viability assessments not including all infrastructure, development at Tudeley is not as viable as indicated under the same range of variables as other schemes. Tudeley is reliant on lower existing land values and higher property values to show it is viable. The limited evidence that development at Tudeley is viable is a further indication of the unsuitability and soundness of the current strategy.

#### Conclusion

9.16 Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

## 11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and  
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

## 12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3.

3.25 The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

3.26 To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

15th August 2019

Dear Sir

We are writing to you as concerned citizens and residents of Golden Green. WE are wondering why, when there is so much space in Tunbridge Wells you have found it necessary to try and impose the erection of 4,000 homes on the borders of Tonbridge. You state that you are interested in helping to maintain green belt land and ancient woodland but have chosen a site in Tonbridge borders where both of these are going to be destroyed.

How can you justify putting large expensive, unaffordable houses on land bordering Tonbridge and then using the revenue to support Tunbridge Wells facilities? Not really fair is it.

Not only is Tonbridge green belt but also in a flood plain as well as an ANOB. Are you suggesting that you erect all 4,000 home in Tonbridge borders without providing a decent system to deal with the flooding? What happens when the Medway overflows as often happens in the winter, especially around the swimming pool area and Sainsburys. Don't you think the concrete involved in erecting these houses will exacerbate the flooding situation?

I wonder how you think you are going to solve the traffic problem with the addition of a further 4,000 homes. Tonbridge is already suffering from tailbacks in both directions onto the high street much of the day. Rush hours are practically impossible to move around in. I suppose the plan is to use even more green belt land to increase the road area.

Where are those commuters in the expensive houses going to park their cars when they travel to London? Are they even going to be able to board the trains? These are often packed by the time they arrive at Tonbridge. There aren't going to be parking places at other stations are there. There has been mention of new businesses in Tonbridge but where are they? And where are they going to go if more are mooted? There was mention of a new station being built at Capel. I wonder what the situation is regarding this? Capel and Tudeley are small and charming little villages where there is the renowned church – a major tourist attraction with the Chagall Windows.

WE have heard too that there is talk of a Capel bypass. How much greenbelt land will disappear under tarmac and how many animals and natural habitats will be destroyed to achieve this aim?

Rumour has it that Tonbridge Cottage Hospital could be commandeered by the local council who will then use the land to build houses. That is a very important facility for the people of Tonbridge with many facilities, the disappearance of which would lead to more disruption.

There is talk about a new school being built opposite Somerhill Schools. How is this even possible? How is it proposed that the children get to school? This will only add to the already hugely overcrowded roads in Tonbridge. ON top of that how many children will be bussed in from other areas. Imagine the destruction to the roads!

How will the small town of Tonbridge sustain such a huge influx of people? Are there plans to knock down the High Street and rebuild?

What a shame that Tonbridge is being used to achieve the aims of Tunbridge Wells fulfilling their housing quota just because the boundary seeps over the edge – BUILDING A NEW TOWN.

Yours faithfully

Alan & Claire Cattermole

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

For office use only

**If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box.** Not Stated

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

Is sound	No

## Complies with the Duty to Cooperate

No

### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Since the website is extremely difficult to navigate, I am enclosing my views as a Word Document and hope that the Planning Department are able to include these views in the consultation responses, as the website set up seems not to work well.

Introduction - I am a regular visitor to Tudeley and have been so for over 26 years, visiting family who live just outside Tudeley village, in the country. They will be directly affected by what is proposed and the consequences.

I am aware that my grown up nieces cannot afford to buy houses locally, as the market is well out of reach of those on even medium income salaries.

I have experienced the **traffic volumes** currently on the B2017 and the idea of adding yet more is horrific. Not only will more housing **increase the traffic, pollution and noise on the B road, it is counter to government policy to reduce emissions** [The Climate Change Act 2008 (2050 Target Amendment) Order 2019] not only from the vehicles needed to build the proposed homes over a prolonged period of time, but then also from the people who are expected to live in that housing. Either way, this is not in line with current government policy. I will expand on this below at paragraph 1[1]

Climate change

Local Plans should include policies to ensure that the development and use of land contributes to the mitigation of, and adaptation to, climate change consistent with S19 (1A) of the Planning and Compulsory Purchase Act 2004. It is clear that this plan does not make sufficient effort to encourage mitigation of and adaptation to climate change. The Policy STR7 titled 'Climate Change' lacks urgency and bears no relationship to the Government's 'nearly zero' targets. It is important that TWBC's strategic commitment is clear and achievable.

In policy STR/SS3 (The Strategy for Tudeley Village) the requirement for renewable energy production should be specified as an item 'which will be delivered'. Instead the renewable energy element of the policy is buried under 'high quality layout and design'. This is insufficient, given the scale of the climate emergency and the end date of the plan which corresponds closely with the Government's 2030 target for net zero. Given this relationship it is essential that large scale development in the Borough can aim to be a zero-carbon development. If this cannot be achieved on a new development site, then the TWBC target to achieve net zero emissions across the borough by 2030 is all but certain to fail. The failings of the largest strategic sites (which are fundamental to the overarching strategy of the Local Plan) to contribute adequately to the Government's 'nearly zero' 2030 targets, means that this Local Plan does not secure development and use of land which will contribute to the mitigation of, and adaptation to, climate change consistent with

S19 (1A) of the Planning and Compulsory Purchase Act 2004.

The village of Tudeley is precisely that – a village “a group of houses and associated buildings, larger than a hamlet and **smaller than a town, situated in a rural area**”. The proposal would entirely change the nature of the village into a town, but one without infrastructure. Tudeley is not the right place for the level of housing proposed. It is a small village and the imposition of thousands of houses would have a grave impact on the lives of the people there.

The people coming to live in the proposed houses will expect to gravitate to Tonbridge for their education, health and shopping needs, as it is far closer than Tunbridge Wells. But there are **no proposals** to address these resulting shortages, in education, health or transport. It has absolutely **no infrastructure, and none is proposed**. Effectively what is proposed is a large estate with no connections, no transport and utterly requiring the use of cars (see paragraphs 1 & 3 below)

For me the overriding reason not to build at Tudeley is that the area identified for development **floods**. I have seen this on numerous occasions for myself. The land is on a **flood plain**. To build there is a monumental error, other than the developer taking the receipts and leaving the people with the flood problems and the risk of never being able to purchase home insurance.[2] This will create massive problems for the householders and much misery.

The land identified is in the **Green Belt, and is active productive farmland**.

There are 4 houses at Bank Farm Cottages which will be in the middle of the proposed development. Those householders were not made aware of the plans originally, they have asked for the incorrect information in the original consultation to be rectified to show their ownership of those houses, which was not done, they have received no individual notifications from TWDC about these proposals, all of which indicates that their interests as residents are not being considered and **the process is flawed**.

I will address both of these issues at paragraph 2 & 10[3]

## DETAILED RESPONSE

- 1 The huge amount of documentation issued by TWBC does not include any specific named document on Climate Change, recognised by government as a requirement in planning.[4]  
“Effective spatial planning is an important part of a successful response to climate change as it can influence the emission of greenhouse gases. In doing so, local planning authorities should ensure that protecting the local environment is properly considered alongside the broader issues of protecting the global environment. Planning can also help increase resilience to climate change impact through the location, mix and design of development.

In addition to the statutory requirement to take the Framework into account in the preparation of Local Plans, there is a statutory duty on local planning authorities to include policies in their Local Plan designed to tackle climate change and its impacts. The National Planning Policy Framework emphasises that responding to climate change is central to the economic, social and environmental dimensions of sustainable development.”

I have read the documents published, which purport to generally address some of these issues, but in reality woefully fail to consider the impact on the countryside, the village and its inhabitants of building so many houses on Green Belt land, which was so designated for a purpose, to ensure that it remained green, for the benefit of the people, both near and far. Significantly the Glossary does not mention “Climate Change” or the Climate Change Act at all.

The Sustainability Appraisal at page 10 of the Local Development Scheme equally omits any mention of either. This means that the Scheme does not directly, or in my view indirectly, address the Council's climate change obligations, which means it is seriously deficient as a document, and one that no local authority could reasonably adopt or approve. In fact the Plan contradicts the TWBC's own Environmental policy to achieve Carbon Reduction targets. To fail to mention the 2008 Act, and also to fail to mention the local authority's duties under Section 19(1A) of the Planning and Compulsory Purchase Act 2004 which requires local planning authorities to include in their Local Plans “policies designed to secure that the development and use of land in the local planning authority's area contribute to the mitigation of, and adaptation to, climate change”. Government makes clear that “This will be a consideration when a Local Plan is examined”. [5]

- 1 The 5 main purposes of the Green Belt in the National Planning Policy Framework are :
  - . **To check the unrestricted sprawl of large built up areas**
  - . **To prevent neighbouring towns merging into one another**

- . **To assist in saving the countryside from encroachment**
  - . To preserve the setting and special character of historic towns
  - . **To assist in urban regeneration, by encouraging the recycling of derelict and other urban land**
- 1 Regarding the **unrestricted sprawl**, what is being proposed will have the effect of joining Tonbridge to Paddock Wood via Tudeley and East Capel, **neighbouring areas merging into one another**. Exactly the kind of urban sprawl the Green Belt was created to ensure does not happen.
  - 1 The proposed development is utterly out of kilter with local needs. The physical factors which the local people will have to endure are noise, vibration, small, fumes, smoke and artificial lighting, as well as the discharge on to their properties of any solid or liquid substance. The plans do not mention the additional traffic which will be generated, the noise from the plant and generating equipment, the odour and dust problems, the light pollution, over a proposed 15 year period. Tudeley village is a rural place and is constrained with limited capacity to develop services and infrastructure to support such significant development. The roads already struggle to cope with present traffic, and would be much more impassable with more development.
  - 1 Regarding **saving the countryside from encroachment**, in 2016 the Inspector considering the Site Allocation Local Plan said "I do not accept a need to allocate any land currently in the Green Belt" and "I have not recommended that any land within the Green Belt should be allocated". The situation regarding the need to safeguard green spaces has not changed, indeed it has grown. Climate change and the safety of our green resources is now even more important.
  - 1 Regarding the encroachment of the countryside, in order to develop in the Green Belt "very special circumstances" are needed to be proven to outweigh the harm caused. Other than 'we need to build houses' TWBC have not shown what the special circumstances are, and proven they exist. Circular 42/55 from 3 August 1955 set out the original Green Belt policy: *"Inside a Green Belt, approval should not be given, except in very special circumstances for the construction of new buildings or for the change of use of existing buildings for purposes other than agriculture, sport, cemeteries, institutions standing in extensive grounds, and other uses appropriate to a rural area."* The successor to Circular 42/55, The National Planning Policy Framework (19 February 2019) (NPPF), has the Green Belt still entrenched in policy and on a similar basis *"The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence (Paragraph 133 NPPF).*
  - 1 As recently as 5th February 2020 Lord Carnwath in the Supreme Court [6] stated *"Key features of development control in Green Belts are the concepts of "appropriate" and "inappropriate" development, and the need in the latter case to show "very special circumstances" to justify the grant of planning permission. In R (Lee Valley Regional Park Authority) v Epping Forest District Council [2016] EWCA Civ 404; [2016] Env LR 30 ("the Lee Valley case"), Lindblom LJ explained their relationship:*  
*"18. A fundamental principle in national policy for the Green Belt, unchanged from PPG2 to the NPPF, is that the construction of new buildings in the Green Belt is 'inappropriate' development and should not be approved except in 'very special circumstances', unless the proposal is within one of the specified categories of exception in the 'closed lists' in paras 89 and 90.... The distinction between development that is 'inappropriate' in the Green Belt and development that is not 'inappropriate' (ie appropriate) governs the approach a decision-maker must take in determining an application for planning permission. 'Inappropriate development' in the Green Belt is development 'by definition, harmful' to the Green Belt - harmful because it is there - whereas development in the excepted categories in paras 89 and 90 of the NPPF is not. ..."*
  - 1 *These concepts are expressly preserved in the policies for the control of development set out in paras 87ff of the NPPF:*  
*"As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.*  
*... 'Very special circumstances' will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations."* (paras 87-88)"
- Nowhere in the vast array of documents on the TWBC website is any document headed "very special circumstances". There is a definition section saying an inadequate definition of Green Belt, but no single document explaining explicitly what the very special circumstances are which justify this

redesignation of the Green Belt land at Tudeley. TWBC have cited reasons for not allocating houses at other, alternative, sites (including that at Castle Hill) – but disregard such reasons when selecting CA1 (Tudeley) for a Garden Village. They justify a single land-owner as being the reason for the special circumstances. And state Castle Hill is a multi-land-owner site (which it is not). Lazy Planning is not a reason for Very Special Circumstances. No alternative creation of Green Belt is planned by TWBC in mitigation to the reclassified Green Belt to be lost.

- 1 With regard to urban regeneration, this is woefully not addressed in the documentation. One would think there were no brownfield sites at all in the Tunbridge Wells area – this has clearly **not** been a priority for the Council. There has been an inadequate analysis of brownfield sites such as Castle Hill, Blantyre and of vacant offices in Tunbridge Wells itself. A Google search by me today indicates there are at least 38 offices available in Tunbridge Wells and I dare say more would be available if I spent time canvassing local estate agents. This whole availability of brownfield sites is available on [digital-land.github.io](https://digital-land.github.io) (via [www.gov.uk](https://www.gov.uk)) shows 41 sites on the Tunbridge Wells BC area. This is not addressed in any significant way in the documentation currently available for consultation. This deficiency shows that inadequate consideration has been given to this issue – a failing of a duty and a flaw in the process. No reasonable Council can or should adopt a plan with such ineffective analysis.

#### 1 **Flooding**

I have seen for myself the fields flooded, over a number of fields. The 48,000 homes affected by the 2007 floods cost, on average, between £20,000 to £30,000 to repair while the cost to the economy was £3.2bn. About 30% of householders had to move out while repairs were carried out, with 1 in 10 displaced for more than a year, creating huge disruption to home life - source The Environment Agency Report – The Costs of the Summer 2007 Floods in England, available at [www.gov.uk](https://www.gov.uk). “The flooding in 2015/16 was estimated to cost the economy £1.6bn. The flooding in 2019/20 was estimated to be £78m”, again on [www.gov.uk](https://www.gov.uk) from the Environment Agency.

#### 1 **Flawed Process**

This process has been flawed from the beginning. The residents of Tudeley were not notified individually about the plans of TWBC which if passed will impact immensely on their quiet enjoyment of their homes. During the Regulation 19 consultation, 97% of the respondents opposed the plans. The response from TWBC was not to address the concerns expressed but, to add insult to injury, added in hundreds of more dwellings to Capel parish, thereby not allowing the residents of those dwellings to be able to respond to the Regulation 18 consultation. By any legal test, this has disadvantaged those people. But that is not the only procedural flaw. The website which is supposed to attract responses to this plan is extremely difficult to make work, as if designed to NOT allow responses. I have used a computer since 1998, and consider myself a competent amateur, but that website would not allow me to insert my comments, hence this submission being by post.

The 1985 Gunning case[7] set out the principles for a fair and proper consultation exercise :

- . That consultation must be at a time when proposals are at a formative stage
- . That the proposer must give sufficient reasons for any proposal to permit of intelligent consideration & response
- . That adequate time is given for consideration and response
- . That the product of consultation is conscientiously taken into account when finalising the decision.

These principles have been reaffirmed as lately as November 2020 in the Court of Appeal[8] and therefore remain requirements.

One of the pre-requisites of the above is that information provided by the public authority involved is accurate. TWBC were informed by residents at Bank Farm Cottages that the Regulation 19 consultation information provided was accurate in that it stated that the land their houses are on was owned by the proposed developer. That was inaccurate and could have been checked with the Land Registry. Not only did TWBC not check ownership of the land (and thereby identify people entitled as of right to be consulted on the proposals) but when told of the correct information, declined to alter their own information, thereby continuing the misleading information for that consultation. It is hard for people to give “intelligent consideration & response” when the information provided is just plain wrong.

I don't believe that there are sufficient reasons set out for the proposals to build thousands of houses on Green Belt land. TWBC have not entered into this consultation ‘with clean hands’ by the way that they did not inform residents about their plans directly, did not alter their information when told it was inaccurate, and added in additional houses to Capel parish without giving those residents the opportunity to make their own representations.

Section 61W of the 1990 Town & Country Planning Act requires a prospective developer to “publicise the proposed application in such manner as .....is likely to bring the proposed application to the attention of a majority of the persons who live at, or otherwise occupy premises in the vicinity of the land.” Since the residents of Bank Farm Cottages who live at and in the vicinity of the land received no such information from the developer, the developer failed in his statutory duty, which MUST affect the legitimacy of his proposals and should be taken into account by TWBC and the Inspector when considering the future of this plan.

TWBC has not fulfilled its duty to co-operate under section 111 of the Localism Act 2011. The duty:

- . relates to sustainable development or use of land that would have a significant impact on at least two local planning areas or on a planning matter that falls within the remit of a county council
- . requires that councils set out planning policies to address such issues
- . requires that councils and public bodies 'engage constructively, actively and on an ongoing basis' to develop strategic policies
- . requires councils to consider joint approaches to plan making.

TWBC launched into planning the development affecting Tudeley without consulting Tonbridge and Mailing Council, which is the area most likely to pick up the infrastructure problems, until eventually it had to. It has in no way engaged constructively to develop strategic policies, at every turn being dismissive of accurate information and not engaging truly in proper consultation.

## **CONCLUSION**

To go back to the issues listed in Question 4, my responses address the issues

### **Issue**

#### **My response**

Local Plan as proposed is **legally compliant**,

**Paragraphs 1, 2, 5, 6, 8, 9, 10**

#### **Sound**

**Paragraphs 1, 2, 3, 4, 7, 8, 10**

**Complies with the duty to co-operate**

**Paragraph 10**

**The plan is not positively prepared**

**Paragraph 10**

**The plan is not effective**

**Paragraphs 2, 3, 8, 9**

**The plan is not justified**

**Paragraphs 4, 5, 6, 8**

**The plan is not consistent with national policy**

**Paragraphs 1, 2, 3, 5, 6, 8, 9, 10**

[1] Paragraph 1 below

[2] The 48,000 homes affected by the 2007 floods cost the economy £3.2bn - source The Environment Agency Report – The Costs of the Summer 2007 Floods in England, available at [www.gov.uk](http://www.gov.uk)

[8] R (On the application of) v Secretary of State for Education [2020] EWCA Civ 1577

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is necessary for me to attend so that the Inspector hears from people other than locals about the wider impact and consequences of what is being proposed.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I wish to comment on STR/SS3 and also STR/SS1

We have lived in North Tonbridge for 38 years, worked locally and educated two children in local schools. Obviously there have been many changes in the town and surrounding area over the years but nothing so drastic as the proposed developments in the Tudeley and Capel area. These, to me, seem insensitive on many levels and possibly unnecessary if TWBC recheck some of their data which may not be as up to date as it could be. There does seem to be a cynical element to this proposal sited as it is so near the borough boundary, with the obvious local amenities and the station being situated in Tonbridge rather than Tunbridge Wells who will collect the Council Tax but be relieved of the burden of the extra population and traffic.

Creating a garden settlement at Tudeley of 2,100 dwellings together with a further 2,100 at Capel will cause immense harm to residents of the Parish of Capel and to residents of Tonbridge. There will be a significant increase in traffic into Tonbridge from the B2017, exacerbating the extreme traffic congestion that exists on this road and generally in Tonbridge every morning.

People living in Tudeley will use Tonbridge Station for commuting and Tonbridge town services creating parking issues. The increase in traffic may be more than Tonbridge can cope with. Its roads are already full at peak times and can't be made wider in most places. The increased numbers of passengers on already packed commuter trains from Tonbridge Station will be unsustainable. Parking in and around Tonbridge Station will be even more difficult. Network Rail have confirmed that a station at Tudeley is not viable at present and so will not be built in this plan period.

Paras 5.210 and 5.217. Most people living in the new garden settlements will drive privately owned cars, despite initiatives to encourage bus and bicycle use. Many will have to travel for work, school etc even if many 'day-to-day requirements' can be met on site as stated. It is unrealistic to label local roads as pedestrian/cycle routes as shown on your maps due to narrowness, bends and increased traffic. Even with completely separate cycling provision cycling is likely to be within the proposed new development rather than for school, work journeys.

The costs of infrastructure on the Tonbridge & Malling side of the boundary will have to be carried by Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings. The cost to Tonbridge based businesses due to traffic issues may drive businesses from the area. There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, not Tunbridge Wells, because Tonbridge is much closer.

Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that does not fully consider the impact of climate change. Flood mitigation measures may help, but I believe that flood risks will increase. Covering farmed fields with houses and roads will

make the Medway flood more often and cause increased flood risk not only in Tudeley but in Golden Green, East Peckham, Tonbridge and Yalding. Surely we should be learning from the flooding in Yorkshire in 2019. There will be an increase in air, light and noise pollution that will spread across the boundary into Tonbridge & Malling and create a visual scar across the landscape as the area is visible for many miles. Views from Tonbridge to the Low and High Weald will be impaired, including the setting of historic assets like All Saint's Church in Tudeley and the Hadlow Tower. The church at Tudeley may end up being surrounded by houses, bus lanes and sit next to a busy road in sight of a big roundabout. That will cause great harm to its value as a heritage asset of world renown (due to the complete set of Marc Chagall windows). We have, over the years, had many adult language students staying here all of whom have been taken to see the Chagall windows as well as for country walks in the area with which they have been impressed.

Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land and should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land that can be used to provide food.

Para 4.125 I do not agree that 'there are exceptional circumstances' which justify the removal of land at Tudeley and East Capel from the Green Belt.

I believe that housing need calculated by the government can be reduced if it requires development of Green Belt land unless "exceptional circumstances" exist. I would like to see TWBC use this argument to remove the garden settlement at Tudeley from this plan. TWBC is already providing more than their housing need figure in the draft Local Plan.

Para 4.52. The difference in the Local Plan allocations between Paddock Wood/Capel/Tudeley and Tunbridge Wells/Southborough/Bidborough is startling. Surely Tunbridge Wells has more capacity for expansion? Since Covid 19 work patterns have changed, office space may now be available for conversion.

The proposed Tudeley Village has been referred to as securing a long term option for the borough to deliver the needs of future generations. It is clear from this statement that you intend to add more and more housing to this "garden settlement" in each five year review of future Local Plans. I think that TWBC want to fill Tudeley and East Capel with housing until they coalesce with Tonbridge to the West and Paddock Wood to the East, ultimately creating a massive conurbation that will dwarf Tunbridge Wells town centre. TWBC is using Capel to dump their housing needs on green fields and meadows, polluting a rural area rather than spreading development across the borough on brownfield sites or placing the garden settlement in the middle of the borough, to make it accessible north and south. The developments in Tudeley and East Capel are unsustainable and place huge pressure on Tonbridge. Will they actually meet TWBC's housing need which to me suggests the need of local people to find housing in the area. I suspect that this type of development is likely to be too expensive for many local people including some of the carers I currently have contact with. and is more likely to encourage commuters wishing to move from London and thus to need road and rail transport from Tonbridge.

I object to the inclusion of land in East Capel in "The Strategy for Paddock Wood" (STR/SS1)

This land is Green Belt land and should only be built upon if an "exceptional circumstance" exists. TWBC's own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan's aims without using the Green Belt land at East Capel. The comment above about coalescence and the creation of a conurbation from Paddock Wood right across to Tonbridge is very relevant here, as is the land's use as a flood plain. Building here, even with flood risk mitigation and "betterment" could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the impact of climate change. As the current flooding elsewhere shows there is a lot to be learnt about the causes and the prevention of flooding and about how actions in one area can have serious effects elsewhere. This surely should, at present, be a very strong argument against building on any area of flood plain.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

**Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

I wish to comment on STR/SS3 and also STR/SS1

We have lived in North Tonbridge for 38 years, worked locally and educated two children in local schools. Obviously there have been many changes in the town and surrounding area over the years but nothing so drastic as the proposed developments in the Tudeley and Capel area. These, to me, seem insensitive on many levels and possibly unnecessary if TWBC recheck some of their data which may not be as up to date as it could be. There does seem to be a cynical element to this proposal sited as it is so near the borough boundary, with the obvious local amenities and the station being situated in Tonbridge rather than Tunbridge Wells who will collect the Council Tax but be relieved of the burden of the extra population and traffic.

Creating a garden settlement at Tudeley of 2,100 dwellings together with a further 2,100 at Capel will cause immense harm to residents of the Parish of Capel and to residents of Tonbridge. There will be a significant increase in traffic into Tonbridge from the B2017, exacerbating the extreme traffic congestion that exists on this road and generally in Tonbridge every morning.

People living in Tudeley will use Tonbridge Station for commuting and Tonbridge town services creating parking issues. The increase in traffic may be more than Tonbridge can cope with. Its roads are already full at peak times and can't be made wider in most places. The increased numbers of passengers on already packed commuter trains from Tonbridge Station will be unsustainable. Parking in and around Tonbridge Station will be even more difficult. Network Rail have confirmed that a station at Tudeley is not viable at present and so will not be built in this plan period.

Paras 5.210 and 5.217. Most people living in the new garden settlements will drive privately owned cars, despite initiatives to encourage bus and bicycle use. Many will have to travel for work, school etc even if many 'day-to-day requirements' can be met on site as stated. It is unrealistic to label local roads as pedestrian/cycle routes as shown on your maps due to narrowness, bends and increased traffic. Even with completely separate cycling provision cycling is likely to be within the proposed new development rather than for school, work journeys.

The costs of infrastructure on the Tonbridge & Malling side of the boundary will have to be carried by Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings. The cost to Tonbridge based businesses due to traffic issues may drive businesses from the area. There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, not Tunbridge Wells, because Tonbridge is much closer.

Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that does not fully consider the impact of climate change. Flood mitigation measures may help, but I believe that flood risks will increase. Covering farmed fields with houses and roads will

make the Medway flood more often and cause increased flood risk not only in Tudeley but in Golden Green, East Peckham, Tonbridge and Yalding. Surely we should be learning from the flooding in Yorkshire in 2019. There will be an increase in air, light and noise pollution that will spread across the boundary into Tonbridge & Malling and create a visual scar across the landscape as the area is visible for many miles. Views from Tonbridge to the Low and High Weald will be impaired, including the setting of historic assets like All Saint's Church in Tudeley and the Hadlow Tower. The church at Tudeley may end up being surrounded by houses, bus lanes and sit next to a busy road in sight of a big roundabout. That will cause great harm to its value as a heritage asset of world renown (due to the complete set of Marc Chagall windows). We have, over the years, had many adult language students staying here all of whom have been taken to see the Chagall windows as well as for country walks in the area with which they have been impressed.

Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land and should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land that can be used to provide food.

Para 4.125 I do not agree that 'there are exceptional circumstances' which justify the removal of land at Tudeley and East Capel from the Green Belt.

I believe that housing need calculated by the government can be reduced if it requires development of Green Belt land unless "exceptional circumstances" exist. I would like to see TWBC use this argument to remove the garden settlement at Tudeley from this plan. TWBC is already providing more than their housing need figure in the draft Local Plan.

Para 4.52. The difference in the Local Plan allocations between Paddock Wood/Capel/Tudeley and Tunbridge Wells/Southborough/Bidborough is startling. Surely Tunbridge Wells has more capacity for expansion? Since Covid 19 work patterns have changed, office space may now be available for conversion.

The proposed Tudeley Village has been referred to as securing a long term option for the borough to deliver the needs of future generations. It is clear from this statement that you intend to add more and more housing to this "garden settlement" in each five year review of future Local Plans. I think that TWBC want to fill Tudeley and East Capel with housing until they coalesce with Tonbridge to the West and Paddock Wood to the East, ultimately creating a massive conurbation that will dwarf Tunbridge Wells town centre. TWBC is using Capel to dump their housing needs on green fields and meadows, polluting a rural area rather than spreading development across the borough on brownfield sites or placing the garden settlement in the middle of the borough, to make it accessible north and south. The developments in Tudeley and East Capel are unsustainable and place huge pressure on Tonbridge. Will they actually meet TWBC's housing need which to me suggests the need of local people to find housing in the area. I suspect that this type of development is likely to be too expensive for many local people including some of the carers I currently have contact with. and is more likely to encourage commuters wishing to move from London and thus to need road and rail transport from Tonbridge.

I object to the inclusion of land in East Capel in "The Strategy for Paddock Wood" (STR/SS1)

This land is Green Belt land and should only be built upon if an "exceptional circumstance" exists. TWBC's own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan's aims without using the Green Belt land at East Capel. The comment above about coalescence and the creation of a conurbation from Paddock Wood right across to Tonbridge is very relevant here, as is the land's use as a flood plain. Building here, even with flood risk mitigation and "betterment" could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the impact of climate change. As the current flooding elsewhere shows there is a lot to be learnt about the causes and the prevention of flooding and about how actions in one area can have serious effects elsewhere. This surely should, at present, be a very strong argument against building on any area of flood plain.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

**Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### 1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

#### 1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

### **Regulation 18 Local Plan**

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

### **Planning application and non-determination appeal**

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

## **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

## **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

### **Vision and Strategic Objectives**

1.5.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

*[TWBC: representation sets out duplicate of PSLP Vision here - see full representation attached]*

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

*[TWBC: representation sets out duplicate of PSLP Strategic Objectives here - see full representation attached]*

### **1.5.7 Response**

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 Furthermore, we consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing'

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of

supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 Furthermore, we consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing'

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

To which part of the Local Plan does this representation relate?

Policy

### Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/HA (PSLP\_2053), Vision and Strategic Objectives (PSLP\_2054), Policy STR1 (PSLP\_2055), Policy AL/HA3 (PSLP\_2056) and Development Management Policies (PSLP\_2057)

### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### 1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

#### 1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

### **Regulation 18 Local Plan**

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

### **Planning application and non-determination appeal**

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

## **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

## **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

### **Development Strategy and Strategic Policies (Policy STR1)**

1.5.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.5.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.5.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.5.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.5.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

*[TWBC: PSLP Figure 5 Key Diagram has been duplicated here - see full representation attached]*

1.5.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

*[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached]*

1.5.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.5.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.5.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.5.21 The full proposed distribution of development is set out below.

*[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached]*

1.5.22 It should be noted that, as referred to below, TWBC has recently refused planning permission for a 71-unit development on PSLP allocation site AL/HA4 at Highgate Hill/Copthall Avenue, which is proposed for the allocation of 71-79 dwellings. The application was refused on points of principle relating to the impact on Highgate Crossroads and the AONB. Whilst the allocation remains in the draft Local Plan, since the Council appears to be opposed to the scheme in principle, it does call into question whether the site has sufficient political support to be retained in the plan.

#### Response

1.5.23 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.5.24 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.5.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.5.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large- Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.5.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.5.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.5.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.5.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has

only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.5.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend well beyond 2038.

1.5.32 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.5.33 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with NPPF paragraph 11 and lacks sufficient strategic flexibility.

1.5.34 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley. In particular, the previously proposed allocation at Hawkhurst Golf Club should be added back into the Plan.

1.5.35 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements.

### **Green Belt vs AONB Release**

1.5.36 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.5.37 We acknowledge that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.5.38 *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land *prima facie* suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.5.39 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is possible to channel much of the development beyond this designated area.

1.5.40 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.5.41 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

### **Housing Delivery**

1.5.42 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.5.43 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.5.44 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.5.45 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

*[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached]*

1.5.46 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.5.47 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

*[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]*

1.5.48 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.5.49 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

### **Maintaining a Five Year Housing Land Supply**

1.5.50 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.5.51 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.5.52 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.5.53 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

*[TWBC: for table showing LPA published five year supply no of dwellings see full representation attached]*

1.5.54 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The claimed justification for this is that the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.5.55 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

1.5.56 Cedardrive has not given an option to any major national housebuilder and is therefore able to ensure that the site is not land-banked, but rather will be delivered quickly.

### **Affordable Housing Need**

1.5.57 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.5.58 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within subareas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual shortfall of 443 affordable dwellings across the Borough.

1.5.59 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.5.60 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.5.61 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.5.62 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, start.

1.5.63 Cedardrive Ltd has not given an option to any major national housebuilder and is therefore able to ensure that the site is not "land banked".

## 1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

Respondent's Name and/or Organisation	Cedardrive Ltd
Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

### Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/HA 1 The Strategy for Hawkhurst parish

[TWBC: the full representation attached has been divided between Policy STR/HA (PSLP\_2053), Vision and Strategic Objectives (PSLP\_2054), Policy STR1 (PSLP\_2055), Policy AL/HA3 (PSLP\_2056) and Development Management Policies (PSLP\_2057)

### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### 1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

#### 1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

### **Regulation 18 Local Plan**

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

### **Planning application and non-determination appeal**

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

## **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

## **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

### **Place Shaping Policies**

1.5.64 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

### **Policy STR/HA1**

1.5.65 Cedardrive Ltd STRONGLY OBJECTS to Policy STR/HA1. In particular:

- The proposed reduction in development at Hawkhurst (criterion 2), compared to the Reg 18 proposals, is unacceptable and unsound;
- In particular, the deletion of Reg 18 allocation of Hawkhurst Golf Club is unsound; and
- The requirement for development proposals to establish an acceptable impact on the Hawkhurst crossroads (criterion 3) cannot be achieved without the relief road proposed as part of the Golf Club scheme, and is therefore also unsound.

1.5.66 The PSLP proposes a significantly reduced level of development in Hawkhurst compared to the Regulation 18 plan – reducing from up to 731 homes in the Reg 18 version to up to 170 in the PSLP. Paragraph 5.354 of the PSLP states:

"This is a substantial reduction on that put forward for consultation at an earlier stage. This reflects the outcome of additional evidence base studies and research, notably in relation to the likely impacts of sites' development, individually and cumulatively, on the High Weald AONB, as well as in relation to traffic congestion at the crossroads and associated air quality implications (now recognised by the recent declaration of an Air Quality Management Area)..."

1.5.67 This "justification" for reducing development ignores that fact that the proposed Hawkhurst Golf Club development would both reduce congestion at the crossroads and reduce air quality effects to the level that would effectively remove the need for the AQMA. These issues are discussed further below.

1.5.68 For the reasons set out below, the removal of the Golf Club from the PSLP results in a Local Plan which has not been positively prepared, is based on a strategy which is not justified, and would not be effective.

### **The case for development at Hawkhurst Golf Club**

1.5.69 It is clear that TWBC were previously of the view that the public benefits of the Golf Club proposal outweighed any landscape and other harms that would result, in proposing to allocate the site for development in the Reg 18 Local Plan.

1.5.70 In addition to the significant public benefit of providing much-needed market housing and affordable housing (including the provision of specialist elderly care housing, for which there is also a particular need), the main benefit of the proposals is the delivery of a new relief road which would address a serious traffic congestion problem which has existed for decades and continues to get worse. There are also various other benefits as identified below.

#### *Traffic congestion*

1.5.71 As is recognised at paragraph 3.12 of TWBC's Infrastructure Delivery Plan (IDP), "the A229 is constrained at the junction with the A268 in Hawkhurst and this crossroads suffers from **severe congestion** at peak times and other times of the day." (our emphasis).

1.5.72 A relief road for Hawkhurst has been mooted since at least the 1990s. The crossroads in the centre of Hawkhurst are severely congested, and not just at peak hours, with the north-south alignment in particular slowing larger vehicles down. This is compounded by parked cars along Cranbrook Road meaning that vehicles often have to stop and wait to allow traffic to pass the parked cars, which can often result in the crossroads becoming blocked and the efficiency of the junction being compromised.

1.5.73 Policy AM1 of the Hawkhurst Neighbourhood Plan highlights the crossroads as a major problem and seeks a solution. That plan envisaged a double-roundabout solution, but this has since been discounted as technically unworkable.

1.5.74 The IDP lists several proposed road improvements at paragraph 3.15. Despite up to 170 new homes being proposed at Hawkhurst in the PSLP, neither the Local Plan nor the IDP propose any improvements to the junction. The Local Plan therefore makes no provision whatsoever to address congestion which the Council's own evidence acknowledges to be severe.

1.5.75 On 19 May 2021, TWBC refused planning permission for the development of 71 dwellings at Highgate Hill (PSLP allocation site AL/HA4), the second reason for refusal for which was:

"The development would result in a quantum of traffic that would have a significant adverse effect on capacity and congestion of the crossroads in Hawkhurst and the wider transport network. This effect would not result in a sustainable development and would be contrary to Core Policy 3 of the Core Strategy 2010, Policy AM1 of the Hawkhurst Neighbourhood Plan and paragraph 108 of the National Planning Policy Framework 2019 and the National Planning Practice Guidance."

1.5.76 It is evident from this that there is a severe problem at Hawkhurst Crossroads which the PSLP does not attempt to address and which is causing the Council to refuse planning permission for a development in Hawkhurst on the only draft allocated site not to already have planning permission.

1.5.77 PSLP paragraph 5.358 states that future applications for development in Hawkhurst will need to consider traffic impacts on the crossroads and provide suitable mitigation.

1.5.78 It should be noted here that in its response to the Golf Club planning application (see Appendix 1), KCC Highways agreed in September 2020 that the Golf Club's relief road proposals, together with the proposed closure of the Cranbrook Road arm of the crossroads (and taking into account the planned housing both at the Golf Club and in the Reg 18 Local Plan) "will improve the overall junction operation, with a lower average delay per vehicle" and would result in "overall betterment".

1.5.79 By contrast, nobody else has ever identified a workable and deliverable scheme to improve the congestion at the crossroads. The relief road proposed by the Cedar drive at a cost of several million pounds is therefore the only realistic potential solution. As will be summarised below, any pedestrian, driver and cyclist using the Highgate Crossroads will benefit.

#### *Air Quality*

1.5.80 The traffic congestion issues at the Hawkhurst crossroads currently lead to air quality problems, as recognised in PSLP paragraph 4.46.

1.5.81 TWBC's Environmental Health Officer has confirmed that there were no objections to the planning application on air quality grounds. Indeed, Cedar drive will demonstrate at the forthcoming appeal that the proposed closure of the northern arm of the Highgate crossroads will lead to significant

air quality benefits within the recently declared AQMA on Cranbrook Road by removing all through traffic from the worst affected part of village centre.

1.5.82 This is a very significant benefit of the proposals.

#### *Walking and cycling infrastructure*

1.5.83 IDP paragraph 3.59 refers to a list of other future improvements required to deliver Local Plan growth. These include:

- A Local Cycling and Walking Infrastructure Plan for Hawkhurst village with improved pedestrian and cycling routes within the existing area; and
- An improved footpath on A229 between Hawkhurst, Cranbrook and Sissinghurst

1.5.84 In relation to the latter point, there is currently a continuous footpath along the A229 past the Golf Club site, though this runs adjacent to the busy road. The Golf Club proposals include new footpaths through the proposed new village park, which would provide a more attractive route for pedestrians than at present. Improvements to cycling and walking links are an objective of the Parish Council as set out in Policy AM4 of their made Neighbourhood Plan.

1.5.93 The HDA assessment notes that the site is a “typical golf course” which “is not representative” of any of the key landscape characteristics of the landscape character areas – indeed, it is a “landscape pattern [which] is at odds with the wider landscape”. It is “very well contained from public viewpoints”.

1.5.94 The assessment recognises that development would have positive effects on recreation as there is currently no public access within the site.

1.5.95 Overall the assessment acknowledges that there are both adverse and beneficial effects resulting from the development. Some concerns are raised in relation to particular aspects of the proposal, specifically the northern parcel, though it concludes that any changes to the draft allocation would need to be balanced against the viability of the site.

1.5.96 Indeed, HDA's summarised policy recommendations are limited to the following:

- Include wording restricting built development, road infrastructure and external lighting within the proposed open space and landscape buffer;
- Seek a requirement for a detailed access design for the vehicular junction onto the A229. The design should include tree survey data, proposed changes in level and visibility splays and should clearly identify and feature loss and subsequent mitigation planting.
- Provision of a long-term maintenance plan for the open space within the site; and
- Include a requirement for an LVIA as part of the application, to inform the masterplan for the site.

1.5.97 All of these recommendations could have been easily accommodated.

1.5.98 Since HDA did not recommend removal of the site, and they recognise that there are benefits as well as concerns, this report does not provide strong evidence to justify the removal from the plan of an allocation which provides so many clear public benefits. The Council could and should have weighed up any remaining concerns against the public benefits and concluded that the allocation should have been retained, whilst reducing the quantum of development to match the 374 units shown in the revised planning application.

#### *Comments on the Sustainability Appraisal*

1.5.99 The Sustainability Appraisal for the site has been altered from that published at the Reg 18 stage. Two changes have been made:

- The Biodiversity score has been downgraded from ‘neutral’ to ‘slightly negative’. It is not clear why this change has been made. The accompanying commentary remains as when assessed previously, stating that “Despite being a predominantly greenfield site, the previous use as a golf course would mean impacts upon biodiversity are limited and can be adequately controlled with protection buffers.”
- The Air Quality score has been upgraded from ‘slightly positive’ to ‘slightly to very positive’, with the commentary now amended to state that “The relief road is a significant piece of transport infrastructure and is likely to bring large noise and air benefits to the centre of Hawkhurst by diverting traffic away from the AQMA on Cranbrook Rd.”

1.5.100 These appear to be the only changes to the appraisal and do not provide justification for removing the site from the plan.

#### *TWBC Development Strategy*

1.5.101 The Development Strategy Topic Paper (DSTP) states at paragraph 6.40 that the Sustainability Appraisal justifies the reduction of development in the AONB, including in Hawkhurst, subject to further consideration of site-specific merits and 'exceptional circumstances'.

1.5.102 National policy must of course be followed, though in a borough where 69% of the land area is within the AONB, it is almost inevitable that some major development will be required there. This is especially the case in larger settlements such as Hawkhurst which are washed over by the AONB designation, and particularly so where there are existing problems that urgently require a solution, such as the severe traffic problems that already affect the village.

1.5.103 Adverse effects to the AONB cannot always be avoided, as is recognised at DSTP paragraph 6.140. The benefits of a proposed allocation must also be weighed in the balance.

1.5.104 DSTP paragraph 6.161 states that the Golf Club allocation – originally for up to 450 units – was removed primarily due to AONB impacts. The current planning appeal is for a scheme already reduced from this figure, with up to 374 units proposed – 24 of which are already accounted for within allocation AL/HA3.

1.5.105 According to the DSTP, the Council considers all of the following PSLP allocations to comprise "major development" in the AONB:

- AL/RTW16 Spratsbrook Farm, Tunbridge Wells: 120 dwellings
- AL/RTW17 Longfield Road, Tunbridge Wells: 80,000sqm employment – planning permission already granted
- AL/CRS1 Brick Kiln Farm, Cranbrook: 180 dwellings – planning permission already granted
- AL/CRS3 Turnden Farm, Cranbrook: 204 dwellings – resolution to grant planning permission subject to S106, though the SoS has called the application in for his own determination
- AL/HA1 White House, Hawkhurst: 43 retirement apartments – planning permission already granted
- AL/HA4 Copthall Avenue/Highgate Hill: Up to 79 dwellings – planning permission refused, on grounds of AONB and effect on Hawkhurst crossroads
- AL/BM1 Brenchley Road, Matfield: 45 dwellings – planning permission granted
- AL/PE2 Hubbles Farm, Pembury: 80 dwellings
- AL/PE3 Land south of Hastings Road, Pembury: 80 dwellings

1.5.106 Of these, two of the three largest allocations already benefit from a planning permission, where the paragraph 172 exceptional circumstances test has already been applied.

1.5.107 In the case of Brick Kiln Farm, the committee report for the 2018 outline permission concluded that:

"There is an unmet housing need, together with ongoing supply challenges that represent the exceptional circumstances necessary to justify the growth of Cranbrook." (Planning committee report 28 March 2018 for application reference 16/502860/OUT)

1.5.108 In the case of an application for 165 dwellings at Turnden, the 2021 committee report concluded that:

"it is considered that principally due to the housing delivery benefits (market and affordable at 40%) outweighing the identified harm to the landscape and environment, there are exceptional circumstances in this instance to depart from the NPPF presumption against major development in the AONB" (Planning committee report 27 January 2021 for application reference 20/00815/FULL)

1.5.109 The Turnden committee report also refers to landscaping improvements and a greater than 10% biodiversity net gain as contributing to the exceptional circumstances.

1.5.110 It is recognised that the Hawkhurst Golf Club proposals are larger than these two schemes. But it should also be noted that the public benefits arising from the proposal are significantly greater too. These include but are not limited to:

- The boosting of the Council's housing supply by up to 374 units (assuming a reduction in allocated numbers to match that of the current scheme);
- A significant boost to the Council's affordable housing supply;
- A recognised improvement to the village crossroads junction where existing transport congestion is agreed to be severe, and where no other solution has been identified, and at a cost of several million pounds;
- Improvements to air quality in the village centre that would remove the need for the recently confirmed Air Quality Management Area;
- The provision of a new public park;
- The provision of a new public car park, in a village where parking options are very limited;
- New pedestrian and cycle routes between Highgate and Gills Green;
- Closing off the northern arm of the Highgate crossroads has the potential to create an attractive, pedestrianised new focal point for the

village; and• The re-use of a little-used golf course, which has already created an unnatural landscape feature, in preference to developing on agricultural fields.

1.5.111 This is a substantial list of public benefits which outweigh any landscape harm.

#### *Conclusion*

1.5.112 It is clear from the above analysis that the removal of the Golf Club allocation is not justified by the evidence which is claimed in support of the decision. Not only does the plan unnecessarily remove 374 planned homes, it also means that the only identified solution to address Hawkhurst's longstanding severe traffic congestion issues has been removed from the plan. No alternative solution is suggested, thereby preventing existing residents from seeing this burden addressed, whilst also limiting the potential for future growth in Hawkhurst and any other nearby settlements, such as Sandhurst, where travel through this junction would be required.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

Question 3	

To which part of the Local Plan does this representation relate?

Policy

### Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 3 Former site of Springfield Nurseries, Cranbrook Road, Hawkhurst

[TWBC: the full representation attached has been divided between Policy STR/HA (PSLP\_2053), Vision and Strategic Objectives (PSLP\_2054), Policy STR1 (PSLP\_2055), Policy AL/HA3 (PSLP\_2056) and Development Management Policies (PSLP\_2057)

### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### 1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

#### 1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

### **Regulation 18 Local Plan**

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

### **Planning application and non-determination appeal**

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

## **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

## **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

### **Policy AL/HA3: Former site of Springfield Nurseries, Cranbrook Road, Hawkhurst**

1.5.113 Cedardrive **SUPPORTS** this policy which allocates this site for up to 24 dwellings. This is consistent with the planning permission which Cedardrive secured on appeal in 2020.(APP/M2270/W/20/3245562)

1.5.114 The site also forms part of the wider Golf Club planning application site, which is currently the subject of a non-determination appeal. However, Cedardrive confirms that this scheme is deliverable independently of the Golf Club scheme.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

## **Question 7**

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

#### 1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

#### 1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

### **Regulation 18 Local Plan**

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

### **Planning application and non-determination appeal**

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

## **1.3 Background**

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

## **1.4 Legal Compliance**

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

## **1.5 Assessment of Soundness**

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

### **Development Management Policies**

1.5.115 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.5.116 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.5.117 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.5.118 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.5.119 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.5.120 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a support SPD not policy.

1.5.121 Turning to housing policies, policy H2 states that development should make efficient use of land, having full regard to the context of the site, including its character, landscape setting, topography, surrounding built form, and access to infrastructure and services.

1.5.122 In our view, this policy adds nothing beyond the advice contained in the NPPF and therefore adds little. It also goes against the principle of preparing succinct Local Plans.

1.5.123 Policy H3 sets out affordable housing requirements. Whilst we support the general thrust of the objectives and the securing of affordable provision, we object to the rounding up of the calculations and contributions being based on a net rather than gross number of units. For small scale proposals this will often see the proposed percentage increase to closer to 45% and 35% respectively. Such thresholds would therefore need to be tested and justified by evidence. A pragmatic approach would be to apply traditional rounding up or down.

1.5.124 The phasing of affordable provision also needs to be sufficiently flexible so as to not prohibit wider delivery. In this regard, we consider that entering into contract with a registered affordable provider prior ahead of the 50% occupation should provide the certainty of delivery, but without risking a wider delay in market delivery. The timing of affordable delivery should also be dictated by scale, size and type of site.

1.5.125 The Council will be aware of wider country wide discussions regarding the viability of providing social rented accommodation as part of a wider offer. Such provision is becoming increasingly difficult and without robust policy in place that addresses this matter, this matter is likely to significantly slow housing delivery.

1.5.126 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

## **1.6 Summary and Conclusions**

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

## **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

Submission Type	Web
Version	0.2
Question 1	
Respondent's Name and/or Organisation	Paul Chalklin
Question 3	
To which part of the Local Plan does this representation relate?	Policies Map
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Map 33	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

##### Link road from proposed Colts Hill Bypass to junction of B2017 and Church Lane

The plan for a new road linking the potential Colts Hill bypass to the junction with the B2017 and Church Lane proposes a junction outside Five Oak Green Infants and Junior school and the proposed Secondary school. This junction will be busy and producing pollution at the junction in close proximity to children, being a primary link between Tunbridge Wells to the proposed Tudeley Village and a link from villages to the east and Tonbridge.

This proposed link road also crosses Sychem Lane with no indication on the plan how this intersection is to be made. This road is very popular with local residents walking in the area. It would appear to just sever the lane.

The proposed link road although to the south of Five Oak Green still passes very close to residential housing and will be a permanent source of noise and light pollution. This road also proposes to cross Green Belt land.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

	Policy AL/RTW 5
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

**Complies with the Duty to Cooperate**

Don't know

#### Question 4a

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:** . It is not justified

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Firstly, the representation process is extremely confusing for a member of the public with no prior knowledge of the process. I am completing this form to the best of my ability in the hope that my comments will be taken in to account regardless of whether I have completed the form correctly. I currently live on Prospect Road at the end adjoining Speldhurst Road. I recently moved from Speldhurst Road. I completed on my purchase in February 2021 and was extremely shocked to learn of the inclusion of this site in the local plan. It was omitted from our local searches because a formal planning application has not been submitted. This feels like a flawed system to me and i feel misled in our purchase. Google shows mention of this development back in 2019 so i find it hard to compute why this isn't made clear on local searches.

In my opinion, the proposed development of the Caenwood Farm site is not justified for the following reasons:

##### **- Impact on Wildlife**

I have witnessed badgers and deer in the proposed site. Please see attached photograph of the Deer. I have proof of Badgers too but cannot upload more than 3 photos. I cannot see how building on the green belt site will not decimate the habitat of countless species.

##### **- Traffic**

Please see attached photographsshowing the gridlocked traffic already present on Speldhurst Road, backed up to the junction of Prospect Road. I have multiple examples of this but cannot upload more than 3 photos. I also attach a photograph of my car that was written off on Speldhurst Road. I know of other incidents of cars being damaged on this road caused by the already overcrowded locality.

The introduction of a further 100 houses all with cars accessing the site via Speldhurst Road will impact the air quality and flow of traffic significantly. There are many schools in the vicinity and it is surely only a matter of time before a child is hit by a car. You can see in one of the photos taken from my house in Prospect Road the car exiting the junction on the wrong side of the road with a pedestrian in front of them. I can only assume that the entrance to the proposed site will be opposite the junction of Prospect Road. There are metal gates present and it is the only gap in the protected trees along Speldhurst Road. This entrance would be incredibly damaging to our way of life.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I consider the site at Caenwood Farm to be completely unsuitable for development and believe it should be removed from the local plan entirely.

#### **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

I would like to mirror my comments on wildlife and traffic.

**If you would like to attach a file in support of your comments, please upload it here.** [Deer on Speldhurst Road.jpg](#)

**If you would like to attach a file in support of your comments, please upload it here.** [Traffic on Spelhurst Rd & Prospect Road.jpg](#)

**If you would like to attach a file in support of your comments, please upload it here.** [Damage to car on Speldhurst Road.jpg](#)

#### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I wish to support the reduced housing allocation for Hawkhurst, as the previous plan had too many houses. The traffic in the village is already excessive and pollutes the High Street and traffic lights.

I am particularly pleased that Hawkhurst Golf Club is no longer included for housing development in the new local plan. The Hawkhurst Golf Club proposal is not suitable for an AONB.

It would be more appropriate surely to increase development at larger sites of T'Wells and Paddock Wood.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

I strongly welcome the changes in the current draft plan, removing the housing allocation for the Golf Club site in Hawkhurst.

I also support the reduction in the housing allocation for Hawkhurst, as the previous numbers were unsustainable and not suitable for the AONB.

#### Question 7

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

**1 Community involvement. EN1: this requirement has not been respected.**

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP\_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
  - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
  - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
  - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP\_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

**PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

**Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

**Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

**Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP\_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

NPPF para 177 states *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

#### **PSLP EN1 para 5. Biodiversity and geodiversity.**

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

#### **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5 (Biodiversity and geodiversity)** says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

#### **1 Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

**1 The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Fiona Chapman [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Fiona Chapman [REDACTED]
Comment ID	PSLP_246
Response Date	18/05/21 12:24
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Fiona Chapman
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP\_243, PSLP\_246 and PSLP\_247]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

**1 Community involvement. EN1: this requirement has not been respected.**

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP\_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
  - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
  - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
  - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP\_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP\_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

NPPF para 177 states *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

#### **PSLP EN1 para 5. Biodiversity and geodiversity.**

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

#### **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5 (Biodiversity and geodiversity)** says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

#### **1 Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

**1 The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Fiona Chapman
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP\_243, PSLP\_246 and PSLP\_247]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

**1 Community involvement. EN1: this requirement has not been respected.**

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP\_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
  - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
  - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
  - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP\_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

**PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

**Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

**Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

**Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP\_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

NPPF para 177 states *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

#### **PSLP EN1 para 5. Biodiversity and geodiversity.**

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

#### **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5 (Biodiversity and geodiversity)** says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

#### **1 Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

**1 The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I have lived in this area all my life. Tudeley /Capel is a small rural community of around 900 homes, consisting mainly of apple orchards, and sheep and cow grazing. It is an Area of Natural beauty- concreting it over is NOT the future in a post-covid world. The local residents are universally opposed to a huge "New town" being inflicted upon them, increasing the local population by six times over. There are not the shops, trains, buses, roads, Doctors, dentists, schools to cope with such a huge population explosion.

Green Belt is Green belt – needing more housing is NOT a special circumstance to concrete over Green belt- it will turn the area into one long urban sprawl from Tonbridge through to Padock wood.

TWBC want to inflict a gigantic "New town" the size of Monaco smack bang in a section of Greenbelt. NO ONE wants this grotesque scheme except the leader of TWBC, his planning officer, and the rich land owner who will make a fortune from selling his fields. I have not spoken to a single other person who thinks this is a good idea. This is such lazy planning- rather than find smaller, more suitable brownfield sites they have plonked for one easy huge site. Lazy lazy lazy.

Having grown up here, I know from experience that this area floods badly. If an area the size of Monaco is concreted over where will future rain water run off to?

My family have enjoyed growing up here, in this rural, beautiful part of Kent. We enjoy the many walks the area offers. My children are keen to get on the property ladder but they too are horrified with new homes/affordable homes being in such huge numbers in an area they love being destroyed. Locals will in no way benefit- these new houses will attract people from LONDON NOT locals- many will commute back to London every day.

My children understand the need for more housing but they agree a huge new town just slapped on pristine green fields in Tudeley is not the future in a post covid world. Local residents will benefit in no way from this monstrous development. They will suffer DECADES of construction noise, traffic, dust, mess, hugely damaging their quality of life they cherish.

The Tudeley development is completely unsustainable.

\*There is no railway station (nor ever will be) It will be totally car- centric however many bus /cycle lanes TWBC say they will build. These will be expensive home- every family will have at least two cars, pouring out towards already gridlocked Tonbridge every morning. The B2017 into Tonbridge already backed up in rush hour every day. It is a pipe dream for TWBC to say that all these thousand

of new residents will cycle to work school on a rainy cold January morning. This will just NOT happen. Tonbridge station is already packed to capacity in normal non-covid times.

\* The proposed huge Tudeley development is in the middle of nowhere- there is no infrastructure in place- The sewerage /water supply requires major upgrading. The electricity supply will need upgrading. All at a cost of tens of millions of pounds.

\*Local roads are little more than country lanes- TWBC propose new roads- which may not be built for many years/decades- in the meantime thousands of cars with no where to go apart from gridlocked Tonbridge, a medieval market town that cannot be extended with new roads- there is no space. Any new road into Tonbridge has no where to go- it will just jam up close to Tonbridge as it does now- this problem cannot be solved- this is the WRONG place for a huge new housing development.

Tonbridge Borough council were only consulted late in the planning process. This development lies right on the edge of Tonbridge. Tunbridge Wells residents will be totally unaffected by thousands of new homes whilst Tonbridge residents will suffer gridlock- packed roads, no town parking, packed trains into London. A huge development on the edge of Tonbridge is crazy! Very poor engagement with local residents and local council. (Tonbridge)

If the development is built a new road bypassing Five Oak green is proposed- This will carve a hideous dual carriage way across yet MORE Green belt- these beautiful fields are currently used for farming and grazing.

Air quality will suffer hugely- thousands of cars in use every day, thousands of central heating boilers, all polluting daily- sustainable???

Democracy?? TWBC are determined to ram this grotesque scheme through- They have totally ignored the opinions of local residents whose lives will be ruined/changed for decades to come. They did not consult with Tonbridge Borough Council until late in the planning process. Tonbridge Council are alarmed how their town will be over whelmed.

TWBC refuse to consider more suitable area to develop such as Castle Hill- much of the infrastructure is already there- particularly roads.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

TWBC have NOT considered alternative site for development, such as castle Hill, or other brown field site that wil inevitably appear in a post-covid world.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

**Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

Unsustainable- No infrastructure in place without spending tens of Millions on new infrastructure- inadequate roads, inadequate water/sewage, inadequate drainage leading to even more flooding. Thousands of polluting cars pouring into already gridlocked Tonbridge every morning. The New Town will have NO SHOPS initially, possibly for years. All residents will have to drive into Tonbridge for just a pint of milk! No supermarkets have agreed to locate in the "New Town" No railway station- EVER says network Rail

If the New Town is built, a new bypass is proposed for Five oak green- possibly a dual carriage way- this is literally where it will run across this field.....seriously? They want to build a road across this bucolic Green belt countryside?? See pic below

TWBC say they will build new roads to Tonbridge- There is no space for new roads. Tonbridge is already gridlocked.

**If you would like to attach a file in support of your comments, please upload it here.**

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

**1 Community involvement. EN1: this requirement has not been respected.**

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE's comments on the first draft LP (DLP\_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
  - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
  - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
  - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
  - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
  - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
  - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
  - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP\_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP\_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

NPPF para 177 states *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

#### **PSLP EN1 para 5. Biodiversity and geodiversity.**

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

#### **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5 (Biodiversity and geodiversity)** says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

#### **1 Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

**1 The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Paul Chapman [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Paul Chapman [REDACTED]
Comment ID	PSLP_251
Response Date	18/05/21 12:24
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Paul Chapman
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP\_250, PSLP\_251 and PSLP\_252]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

**1 Community involvement. EN1: this requirement has not been respected.**

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE's comments on the first draft LP (DLP\_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
  - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
  - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
  - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP\_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP\_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

NPPF para 177 states *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

#### **PSLP EN1 para 5. Biodiversity and geodiversity.**

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

#### **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5 (Biodiversity and geodiversity)** says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

#### **1 Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

**1 The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Address	[REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Paul Chapman [REDACTED]
Comment ID	PSLP_252
Response Date	18/05/21 12:24
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Paul Chapman
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

*[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP\_250, PSLP\_251 and PSLP\_252]*

**Question 4**

**Do you consider that the Local Plan:**

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability AppraisalSHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

**1 Community involvement. EN1: this requirement has not been respected.**

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE's comments on the first draft LP (DLP\_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
  - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
  - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
  - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
  - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
  - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
  - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
  - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP\_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

**PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

**Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

**Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

**Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP\_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP\_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs ....

NPPF para 177 states *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

#### **PSLP EN1 para 5. Biodiversity and geodiversity.**

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

#### **The Environment**

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

**EN1 para 5 (Biodiversity and geodiversity)** says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

**EN1 provides for Long-term Management plans** which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

#### **1 Site policies**

**AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

**AL/BE3 and AL/BE4** provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

**AL/BE3&4** both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

**AL/BE3&4** calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP\_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

**1 The PSLP is unsound because of inconsistencies in the treatment of different sites.**

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

*[TWBC: This representation has been input against Policies STR 1, STR 2, STR 3, STR 4, STR 5, STR 6, STR 7, STR 8, STR 9 & STR SS 1 – see Comment Numbers PSLP\_1014, PSLP\_1016 -1024. A full copy of the representation can be found on attached Supplementary Information]*

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

#### Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

#### Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

*"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:*

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

#### Charterhouse comments on specific Pre-submission Local Plan Policies

## Draft Policy STR 1 – The Development Strategy

Charterhouse supports STR 1 and in specifically section 3;

*“3. Provides for the growth of settlements, having regard to their role and function, constraints, and opportunities, together with the development of two strategic sites, namely: a. major, transformational expansion of Paddock Wood (including land at east Capel), following garden settlement principles and providing flood risk solutions; and b. the creation of a new garden settlement: Tudeley Village between Paddock Wood and Tonbridge;”*

It is good planning practice to proactively address the housing needs of the borough through the allocation and expansion of Paddock Wood. The head on approach Tunbridge Wells Borough Council (**“the council”**) is taking to ensure it delivers the necessary housing is commendable, and we fully support the number of homes to be delivered at Paddock Wood. However the plan only provides a 10% buffer to the housing numbers, as set out in **4.53** with a provision of 13,059-13,444 dwellings to a target of 12,204 net additional dwellings. Charterhouse raise concern whether a 10% margin of over performance being put in place will allow the council enough flexibility on housing numbers. Between the strategic urban extension to Paddock Wood and Tudeley Village this equates to nearly half (46%) of the overall housing target and 10% flexibility being tied up in these two allocations.

Given the long term delivery prospects of settlement expansions and garden villages, Charterhouse do not consider that the 10% is adequate. It is our opinion that with such projects and such a considerable percentage of the plans housing targets being tied up within the two allocations, any slippage or delays impacting either site could have a damaging effect on the councils housing delivery. We believe that for these reasons it would be advisable for the council to increase their overprovision through smaller allocations within alternative settlements.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

### **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

For office use only

**If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box.**      Not Stated

Do you consider that the Local Plan is not sound because:

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

#### Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

#### Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

*"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:*

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

#### Charterhouse comments on specific Pre-submission Local Plan Policies

#### Policy STR 4 – Ensuring Comprehensive Development

Charterhouse acknowledges and agrees with the councils aim to ensure the development of strategic sites and to ensure the delivery of sites in a comprehensive manner with place making as the overarching aim. We further acknowledge and accept that the multi-developer delivery is a necessity on sites such as Paddock Wood. We would however comment that in order for comprehensive development to be achieved the council must ensure suitable mechanisms are put in place to facilitate collaboration between developer. High quality placemaking is only possible when all landholdings come together, work effectively and cooperatively to deliver the required homes and infrastructure. Charterhouse controls a crucial parcel of land within the proposed [northern] parcel of the strategic allocation and whilst the council's masterplanning work undertaken by David Lock Associates shows the land as being required for green and blue landscaping, the land will be integral to any flood compensation works required to deliver the allocation. Accordingly, the draft policy should be appropriate provision. Further, the Council's work developing the Paddock Wood Town Centre Masterplan shows the Charterhouse land as a key link between the town centre and the proposed homes. Accordingly, it is clear to us that our land is fundamental to achieving sustainable development at Paddock Wood.

Charterhouse supports and is cooperating with the councils masterplanning exercise for Paddock Wood.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

#### **Question 7**

***Please note*** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

For office use only

**If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box.**      Not Stated

#### **Charterhouse comments on specific Pre-submission Local Plan Policies**

### Policy STR 6 – Transport and Parking

Charterhouse supports STR 6, it is imperative that the location of new development is sustainable and the provision of active travel. This must be held in high regard within policy STR/SS 1 in the delivery of appropriate cycle and pathways into the town centre in particular within the masterplans for Paddock Wood which include pedestrian and cycle routes within Charterhouse's landholding which could ensure a sustainable and well connected Paddock Wood.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

#### Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

#### Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

#### Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

*"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:*

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

#### Charterhouse comments on specific Pre-submission Local Plan Policies

## Policy STR/SS 1 – The Strategy for Paddock Wood, including land at east Capel

Charterhouse's land sits within the western parcel of the STR/SS 1 boundary. We support the policy in the principle of 3,490-3,590 houses, and furthermore we are/SS glad to see the councils explicit inclusion into the policy of the potential necessity of equalization. However, we express concerns over the lack of appropriate infrastructure provisions and the mechanisms by which this will be provided, without this in place we fear that the delivery of STR/SS 1 may be compromised.

David Lock Associates Ltd ("**DLA**") structure plan (Map 28) shows Charterhouse's land holding as Green & Blue Strategic Landscape Corridors with Pedestrian/Cycle Routes intersecting the site. As per section 9;

*"9. Provide walking and cycling linkages within the site, together with links to Paddock Wood town centre, employment areas, and surrounding countryside. Development in the eastern parcel, shown as land edged in yellow on Map 27, should make use of, and enhance, the Hop Pickers Trail;"*

The allocation of Charterhouse's site as a landscape corridor with a provision for pedestrian/cycle, this will be instrumental in delivering walking and cycling linkages into Paddock Wood town centre. This is vital to ensuring the sustainability, connectivity and "*High standard of design and layout*" as set out in the policy.

Charterhouse's land holding has the ability to ensure that the high quality placemaking agenda which the council is seeking to achieve is delivered via pedestrian and cycling routes. The Town and Country Planning Association ("**TCPA**") define one of the eight key principles of new garden villages as;

*"Planned for healthy living: Planning for healthy communities is integral to the creation of new places today. New garden villages should foster healthy and active communities by encouraging walking and cycling (emphasis added) and by providing a comfortable, stimulating and therapeutic environment, bringing together the best of the urban and natural environments, for people of all ages. Key considerations for active design and a more detailed examination of how to plan for healthy communities in new Garden Cities are set out in the TCPA's Guide 8: Creating Health-Promoting Environments"*

*Within the TCPA's Garden City Standards for the 21st Century – Guide 13 Sustainable Transport* they reiterate the impact of car usage upon the environment and that new built environments must be 'people focused' not vehicle focused'. When creating new built environments such as the urban extension at Paddock Wood, the council and developers have an opportunity to create a settlement in which active transport is at the heart. Moving away from vehicle based travel and facilitating cycling, walking and public transport as the primary forms of transport by ensuring that we are 'tipping the balance' in favour of sustainable transport modes as clear, easy and preferred option. Charterhouse would like the council to ensure that active and sustainable travel is enshrined within the policy STR/SS1.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

### **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

#### **TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION**

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**").

Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the Local Plan and trust that our comments will be given detailed consideration.

Charterhouse has a promotion interest in land at Cranbrook – Land west of Tilsden Lane – and this representation is provided in this context.

The purpose of this representation is to respond to the issue of 'soundness'. Paragraph 35 of the National Planning Policy Framework ("**the Framework**") advises that Local Plans must be examined to assess whether they are sound. Paragraph 35 states: -

"Plans are 'sound' if they are: a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development; b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence; c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"

The Regulation 18 version of the Local Plan covered the 20 year period 2016 to 2036, whereas the Regulation 19 version is now intended to cover the period 2020 to 2038. The proposed housing requirement 678 dwellings per annum has however remained. Charterhouse considers there inadequate reasoning for the amended Plan period. Charterhouse is concerned that this change is being used to artificially reduce the overall quantum of development that the Plan must provide. For example, the identified Plan period is now 2 years shorter and will result in some 1,344 fewer dwellings being provided to meet identified housing need, assuming 678 dwellings is the correct housing requirement figure for the Local Plan. This figure broadly corresponds with the figure of 1,360 dwellings when looking at the difference between the housing requirement figure in Table 1 of the Regulation 18 version and Table 3 of the Regulation 19 version of the Plan. Accordingly, Charterhouse object to policy STR1, considering it not 'sound' as it fails the test of being 'positively prepared' and being adequately 'justified'.

With reference to table 4 in the Regulation 19 version of the Plan and table 3 within the Regulation 18 version the overall quantum of housing proposed has reduced from 10,178 homes to 8,076 homes on the lower range applying the discount, a difference of 2,102 dwellings. This figure is considerably higher than the 1,344 or 1,360 dwelling figures noted above. It is not clear to Charterhouse why this

is so, and we have additional concerns that the Local Plan lacks sufficient flexibility as required by the Framework.

It is incumbent on the Plan to identify a sustainable, deliverable distribution of new housing growth to ensure the timely delivery of new homes and meet national planning objectives set out in the Framework. Charterhouse do not support the apportionment of housing development proposed. This is considered to place an over-reliance on strategic sites through the expansion of Paddock Wood and a new settlement at Tudeley for housing and conversely fails to properly support the long-term sustainability of settlements like Cranbrook.

Charterhouse consider that there is an enhanced role for smaller sites and lower hierarchy settlements (such as Cranbrook) to make a more of a contribution towards meeting housing delivery requirements and ensuring an effective five-year housing land supply in addition to the contribution that strategic housing sites might make over the longer term plan period. Smaller sites have a distinct advantage in efficient housing delivery as they tend to be less encumbered by physical constraints and require less new or improved infrastructure to be provided for them to deliver housing swiftly. Smaller sites and settlements such as Cranbrook therefore offer more opportunities for residential development and, in Charterhouse's view, should be given greater prominence and priority in the Local Plan with appropriate additional sites allocated to enable this.

Accordingly, Charterhouse disagree with the approach being taken by the Council with regards to scale of growth being proposed for Cranbrook.

The Regulation 18 version of the Plan showed housing allocations at Cranbrook of approximately 718-803 houses, whereas the Regulation 19 version reduce this quantum to approximately 415-429 homes, without adequate justification. Having regard to the above, it appears simply a case that the Council has arbitrarily cut growth to settlements to suit the housing position it wants to advance. It is not simply a case of this former level of growth at Cranbrook being 'inappropriate' as alleged – a point returned to below.

The reduction in proposed housing growth at Cranbrook equates to over 45% (300 homes on the lower of the range) and it is not clear from the supporting evidence how the Council has arrived at such a reduction, especially where the overall minimum additional allocations to meet housing need has only fallen 372 dwellings since publication of the Regulation 18 version of the Plan.

We are concerned that the reduction in numbers will leave Cranbrook unprovided for, over the Plan period. Cranbrook is classified within Policy ED 8 (Settlements Hierarchy) as a town centre and is therefore a sustainable location for growth.

The allocations at Cranbrook makes up only 4.57% of the overall housing allocations in the plan. Comparatively the urban extensions at Paddock Wood and Tudeley Village make up nearly 61% of the plan's allocations. We are concerned therefore by the reduction in the overall number of houses being now proposed for Cranbrook, with such a high percentage of housing allocations being tied up in long term garden village urban extensions, there is a real and tangible risk that without sites which are deliverable in the short to medium term the housing land supply position could be compromised should there be delays to the overall timescale of the larger sites in which considerable infrastructure and masterplanning is necessary prior to building out.

The draft Plan claims the reasoning for the reduction in numbers at Cranbrook is because it was shown as 'inappropriate', particularly in regards of the impact of individual sites and cumulatively upon the High Weald AONB. The council's reduction in numbers, is therefore a product of the fact that the Council believes Cranbrook is not suitable for major development, a point Charterhouse dispute.

For an authority like Tunbridge Wells housing need relies upon modelled projections and the use of the relevant Standard Method to identify the local housing need requirement and this approach is relevant for establishing the Borough requirement. However, for smaller areas such as an individual area like Cranbrook the local housing need approach of projection is simply not robust, (due largely to the small size of the areas total population) and additional contextual issues to consider in terms of availability of relevant individual and households earning data.

In addition, where, for reasons linked to an affordability and availability of suitable local housing stock, there is evidence of population decline and yearly fluctuations (as is evident in Cranbrook), it is not appropriate to base an assessment of local housing need on a projection of the shifting/declining population driven by a lack of available housing stock (market and affordable housing) which serves

to suppress local households from forming and staying within an area or allowing newcomers to come and choose to live in Cranbrook.

An alternative approach is therefore to consider local housing need by way of proxy data from the district as a whole, based on pro rata population share approach. The pro rata approach allows for a reasonable understanding of an areas population based likely need.

The population of Cranbrook and Sissinghurst is 5.8% of Tunbridge Wells districts total population which enables a straightforward pro rata estimate of the share of housing need to show what an unconstrained area may need to provide to house likely generated need. Accordingly, over the Plan period, the Cranbrook and Sissinghurst contribution should be circa 708 dwellings (12,204 multiplied by 0.058). This figure is a context to understanding what Cranbrook and Sissinghurst share of need would be if Cranbrook and Sissinghurst were getting their fair share of homes. The quantum currently being provided in the Local Plan by comparison (415 homes) falls short of this pro rata contribution and only equates to a 3.42% contribution.

We understand and recognise that Cranbrook does sit within the High Weald AONB for which the Framework says 'great weight' should be given to its protection and that 'major' development should be refused in all but 'exceptional circumstances'. The determination of whether a scale of growth is major development or not is a matter for the decision-maker, but given Cranbrook and Sissinghurst's pro rata population share it is submitted that growth in the order of 700 net additional homes would not constitute major development.

The March 2021 Infrastructure Development Plan ("IDP") identifies Cranbrook and Sissinghurst socio-economic infrastructure requirements for the Plan period and lists with the following: -

- 1 FE expansion to Cranbrook Church of England Primary School – Cost £3,862,576;- Potential for additional secondary places in Cranbrook towards the end of the plan period (No cost or timescale provided);- New premise for the three existing doctors practises – Cost approximately £4 million;- New community hall for the parish – No cost given;- Improvement or replacement of St George's Hall, Sissinghurst – No cost given;- Provision of a new book stock for the library – No cost given;- Extension to current open space and sport recreation across the parish – No cost given;- Re-designation of junior pitches to adult pitches at King George Field at Sissinghurst and Ball Field at Cranbrook – No cost given;- Improvements required to the King George Field and the Tomlin Ground at Cranbrook – No cost given; and- Improvement to the changing rooms and a new pavilion at Cranbrook Rugby Club – No cost given.

Of the ten projects which have been included within the IDP only two have been given an associated cost, but the Council will reasonably expect development coming forward in the Cranbrook and Sissinghurst area to contribute. The cost alone of the 1 FE extension and the new doctors surgery if to be burdened by the proposed level of housing growth will amount to a high per dwelling contribution of £18,632. It is likely however that the per dwelling contribution will be higher than this given the other scale of infrastructure identified.

Charterhouse is therefore concerned that the scale of financial burden placed on the developers of the planned level of growth at Cranbrook will lead to pressures on affordable housing delivery. We are concerned that the developers of the proposed allocated sites will run viability arguments to reduce their respective contributions towards affordable housing delivery. The scale of the financial burden on the proposed allocations is therefore unsustainable and we consider it could be alleviated by allocating more sites for housing at the settlement.

In order to make the Local Plan 'sound', Charterhouse considers that further housing must be allocated at Cranbrook to correct affordability and availability of suitable local housing stock issues locally.

Land west of Tilsden Lane, previously submitted by Charterhouse, provides a real opportunity to deliver much needed housing (both market and affordable) within an area of Cranbrook where it can be readily assimilated into the landscape without significant or demonstrable adverse impact on the prevailing AONB character and appearance. As such, Charterhouse objects to the omission of the site from the Local Plan.

A Landscape and Visual Technical Note prepared by Huskisson Brown Associates concludes that the intrinsic qualities of the site itself could be addressed through a sensitive development approach that would respect key sensitivities and not intrude on the wider rural landscape. Taking account of the supporting material that would be produced as part of a planning application, the studies to date concludes that development of this site would be possible whilst respecting the function of the adjoining

Ancient Woodland and wooded valley, without intrusion into the wider AONB landscape and respecting the character of Tilsden Lane. Any development proposal would take account of the recommendations made in the supporting material to date, and would incorporate the following: -

- The creation of a planted boundary to the south of the site, potentially created on a bund to accentuate the 'bowl' characteristics of the site's natural topography. This intention would be for this area to provide net biodiversity gain
- A 15 metre buffer from the canopy line of the Ancient Woodland, to minimise the impact of development
- Development of a woodland management plan
- Planting within the development and to the boundaries
- Protection and enhancement of the inherent character of Tilsden Lane

For the Local Plan to be found 'sound' Charterhouse considers there is a need to refine and amend the Plan so that an effective spatial strategy is created which better supports the Borough to meet its evident, pressing, housing needs. Accordingly, Charterhouse support greater levels of housing growth for Cranbrook, and invite the Council to identify the land west of Tilsden Lane for a modest amount of new housing.

### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

For office use only

**If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box.** Not Stated

Respondent's Name and/or Organisation	Clarendon Homes
Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore
Question 3	
To which part of the Local Plan does this representation relate?	Policy

### Question 3a

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy PSTR/BM 1 The Strategy for Brenchley and Matfield parish

Map 56

*[TWBC: this representation has been input against Policies PSTR/BM 1 and AL/BM 2 – see Comment Numbers PSLP\_1849 and PSLP\_1854]*

### Question 4

**Do you consider that the Local Plan:**

Is sound

No

### Question 4a

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:** . It is not justified

### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

**POLICY NUMBER: PSTR/BM 1 (The Strategy for Brenchley and Matfield Parish)**

The Policies Map needs amending. Inset Map 21 should be amended to show the same red line boundary as Map 56 to be consistent with the site allocation.

### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

*After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.*

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**POLICY NUMBER: PSTR/BM 1 (The Strategy for Brenchley and Matfield Parish)**

The Policies Map needs amending. Inset Map 21 should be amended to show the same red line boundary as Map 56 to be consistent with the site allocation.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We trust our above points can be dealt with as proposed modifications as submitted to the Local Plan Examination. However, should TWBC not include such proposed modifications as part of the submitted Local Plan, we would seek to make our case at the Examination on the specific policy requirements for the site.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

##### **POLICY NUMBER: AL/BM 2 (Land at Maidstone Road, Matfield)**

Clarendon Homes, as promoters to this site, broadly supports this policy as including the objective of securing approximately 11 – 15 dwellings at the site. Clarendon does however make the following representations concerning the policy.

##### **Fully equipped children's play space/additional parking for Village Hall**

As above, Policy AL/BM2 seeks to secure 11 – 15 dwellings at the site, subject to 8no. policy requirements.

Requirement no. 5 requires the provision of a fully equipped children's play area, to be delivered on the area of the site indicated in "green" on the site layout plan (i.e. Map 56).

Requirement no. 6 seeks for additional public car parking to serve the Village Hall to be sited in the area indicated as "purple" (i.e. "community use") on the site layout plan (Map 56). Requirement no. 7 goes on to seek to align the delivery of the car parking area with new housing at the site.

Clarendon has undertaken extensive recent engagement with the Matfield Village Hall Management Committee and the Neighbourhood Plan Group. Through this engagement Clarendon has established that there is no salient demand/need for additional parking facilities to serve the adjacent Village Hall. In this context, the Village Hall already provides ample and abundant parking facilities in front of/east of the Village Hall building.

This is reflected in the Brenchley and Matfield Neighbourhood Plan (Reg 14 - Pre-Submission Draft) which is currently the subject of consultation (17 May - 28 June 2021). Refer to [www.bandmnp.com](http://www.bandmnp.com) for details of the Neighbourhood Plan consultation document.

The draft Neighbourhood Plan (policy H11b) seeks to provide the fully equipped children's play area as well as allotments at the site. The Neighbourhood Plan proposes that these facilities are provided in the "purple area" identified in the TWBC Local Plan for car parking - refer to requirements 2b and 2d of policy H11b and figure 17 of the Neighbourhood Plan.

Clarendon supports part of the NP requirement and considers that the "purple area" to the rear/west of the Village Hall is best suited to provide children's play area, but that allotments would not be a suitable use of any part of the site.

The Neighbourhood Plan does not seek to directly secure the additional parking area for the Village Hall, yet it refers to the need to "assess the need for extra parking spaces to serve the Village Hall and provide them if necessary. Any extra parking will be located in the non-allocated area of the site, to the rear of the Matfield Village Village" (requirement 2a – NP policy H11a).

Clarendon does not consider there to be a need for extra parking to serve the Village Hall. The request for additional parking from TWBC has not been evidenced so should be removed from the policy requirement. The Matfield Village Hall Management Committee have not requested additional parking and confirm the existing parking is sufficient for their requirements. The Neighbourhood Plan Group has also recognised there is no current parking problem, however it seems that the suggestion to assess the need for additional parking is a response to the Local Plan requirement.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**POLICY NUMBER: AL/BM 2 (Land at Maidstone Road, Matfield)**

**Outline Policy – amendments set out in red text**

[TWBC: red text replaced with underlining due to formatting differences]

**This site, as defined on the Brenchley and Matfield Policies Map, is allocated for residential development providing approximately 11-15 dwellings, of which 40 percent shall be affordable housing and a fully equipped children's play space shall be provided, and additional car parking provision for the village hall.**

**Requirement no. 5 – amendments set out in red text**

[TWBC: red text replaced with underlining due to formatting differences]

**Provision of a fully equipped children's play space, to be delivered on the area of the site indicated in green purple on the site layout plan.**

**Requirement no. 6 and 7 – as above it is recommended that both of these requirements are deleted.**

**Amendments to Map 56 – Site Layout Plan**

It is recommended that the Site Layout Plan (Map 56) is amended to align with the proposed modifications set out above. In this context the children's play area should be provided within the "purple shaded" community use area.

Accordingly, the area shaded green (directly south of the Village Hall) should form the "orange shaded" development area. This area is unconstrained in land use terms and is expected to deliver part of the housing numbers within the allocation. The orange shaded area should continue through the south of

the site to the boundary. Adjacent to the south of the site is an access drive which is itself lined with trees on its southern boundary, so an additional landscape buffer would not be warranted and would also be a poor waste of developable land.

The Site Layout Plan also includes an “indicative access” entering the site at a point south of the Village Hall. Clarendon does not necessarily object to this, however from initial work, Clarendon has established that there are other suitable access points south of this along Maidstone Road. This matter can be firmed up/considered further at the planning application stage.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We trust our above points can be dealt with as proposed modifications as submitted to the Local Plan Examination. However, should TWBC not include such proposed modifications as part of the submitted Local Plan, we would seek to make our case at the Examination on the specific policy requirements for the site.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Please accept this as a response to the Tunbridge Wells Borough Council Regulation 19 consultation, which is currently in progress.

I support the intention to adopt a local plan, since this is the most secure way to ensure that important decisions - such as where new development takes place, the conditions development must meet, protection of our beautiful and precious natural environment, safeguarding against flooding and the provision of local infrastructure - are made locally. A failure to adopt a local plan that passes examination in public would mean that all parts of the Borough - towns and villages - would be subject to uncontrolled, unplanned speculative development with the national Planning Inspectorate deciding on individual applications, rather than our own elected councillors with their deep knowledge of our local area.

I note that the draft plan has been developed by a cross-party working group and that it was supported by all of the political parties represented in the Tunbridge Wells Borough Council. For such a detailed and long-lasting plan this seems to me to be the right approach to take to its development.

Clearly the most appropriate forum for detailed proposed changes is the Examination in Public that follows submission of a proposed plan. At the Examination in Public members of the public and their representatives will be able to make detailed proposals for change to particular sites directly to the Inspector who will have the power to order modifications to the submitted plan.

I intend to request to appear in person at the Examination in Public to represent the views of my constituents in every part of my constituency.

While this stage is not for the detailed changes that the Examination in Public will consider, it is important that the draft plan is clear about strategic objectives. I set out here a number that I would be grateful to have taken into account prior to submission. They comprise seven principles for a sustainable local plan that I would like to see the plan reflect.

These are:

#### 1. Protecting our precious natural environment

It is of prime importance that any new development, anywhere in the Borough, must be environmentally sustainable. We are fortunate to live in one of the most beautiful parts of Britain, with both Green Belt and Areas of Outstanding Natural Beauty, as well as environmentally important and beautiful land that does not carry such a formal designation.

In areas of proposed significant development - including but not limited to those close to Capel, Paddock Wood, Ramslye, Hawkhurst and the Weald villages - it is important at the Examination in Public that the impact on the natural environment - including the volume, design, density and sustainability of the proposals - is assessed in detail, including by independent bodies such as The Woodland Trust and Kent High Weald Partnership, and that alternatives to the initially proposed sites are rigorously considered.

For example, too many recent developments have involved the loss of mature trees which I believe must be avoided in a sound plan. It will also be necessary to consider the differences in the character of the settlements - including in Capel, for example, the centuries-old tradition of smaller, hamlet-like settlements.

#### 2. "I before E": Infrastructure before Expansion

Too often new development takes place before - and in many cases, without - the necessary infrastructure being provided. This includes not just road capacity, but provision for GP surgeries, schools, public transport (buses and trains), drainage and sewerage capacity and other aspects of supporting investment.

I strongly urge the Council to emphasise in the proposed plan and through the Examination in Public a clear principle of "I before E": no expansion should take place by way of development being started

unless and until the supporting infrastructure is agreed, funded, contracted and construction started or work commenced.

### 3. Brownfield first

Once built on, it is difficult to return land to nature in the future. So we must be sparing in our use of green fields, even outside the formally-designated Green Belt and Areas of Outstanding Natural Beauty. The plan should adopt the principle of 'Brownfield first' - making use of land that has been previously developed and is no longer needed for its current use. Sometimes this will involve the Council or developers investing to remediate land that has been contaminated by previous uses. The plan should be clear that gardens should not be considered to be previously developed ie brownfield land.

### 4. Establish walking, cycling and equestrian connections between every settlement in the Borough

The opportunity of a 10-year local plan is that it should establish connections between places that would not be possible through piecemeal, unplanned development. There is a major opportunity to do this with walking and cycling routes connecting our settlements.

Many local people have, during lockdown, discovered the delights of the area around us. They have made use of public footpaths and bridleways that have been established in the past. This plan should be an opportunity to provide more connections for this and future generations. Too often, especially in the countryside, the ability to enjoy the glories of our natural environment and to live in rural areas are impeded by the lack of safe pedestrian or cycle or equestrian routes between settlements and sometimes even within them.

I believe that the plan should set out a clear ambition to ensure that all settlements within the Borough are connected to each other by safe routes for non-motorised traffic. Sometimes they will be provided alongside motor vehicle routes - such as the cycleway which follows the A21 between Tonbridge and Pembury, for which I successfully campaigned. At other times, the opportunity should be made to establish walking and cycling routes away from roads, such as using existing public rights of way and establishing new ones.

### 5. Road traffic should be provided for, not wished away

The plan should embody a significant upgrade in our road capacity. In the past, it was thought that if road capacity was restricted, making travel by car more unpleasant and unpredictable, it would cause car use to fall away. That was a fallacy. Locally, the dualling of the A21 shows the right approach. When it was restricted to a single carriageway between Tonbridge and Pembury, traffic did not reduce but instead pollution, environmental degradation and accidents (several of them fatal) increased. The dualled A21 is a better, safer, cleaner and more environmentally positive road than the one it replaced.

By 2030, no car with a petrol or diesel engine will be sold in the UK. This means that during the lifetime of the proposed plan, the assumption that cars are sources of pollution - damaging air quality and contributing to climate change - will have to change. Soon, all cars will be powered by clean electricity or hydrogen and contribute no damaging emissions.

There is much that needs to be upgraded in our road network. In particular, the plan should emphasise the importance of dualling the A21 south of Kippings Cross. It should also provide for an alleviation of the dangerous and congested A228 crossing Colts Hill - which, as the principal route between Tunbridge Wells, Maidstone and the Medway towns, should be regarded as a prime strategic route. The congestion within our towns should be addressed - including the Pembury Road into Tunbridge Wells and the notorious crossroad at Hawkhurst. The proposed plan would be an important place to emphasise a vision for reduced speeding between villages. It goes without saying that the plan should not reduce road capacity. In that respect, the bizarre appearance of an option of closing to traffic (other than buses) the railway bridge at Paddock Wood should be dropped immediately. It is so obviously inappropriate that residents should not have to worry about it.

### 6. Any new development must positively reduce, and not add to, the flood risk for existing residents

Several parts of the Borough are in low lying areas and/or in areas with a history of flooding. All the indications are that we should prepare for more frequent incidences of weather events that give rise to flooding than was typical in the past.

I share the concerns of my constituents that existing levels of protection have often not been adequate to the demands of current meteorological conditions. Through a debate in the House of Commons, and subsequent pressure on Southern Water, I have obtained action to install a new "round-the-town"

drainage system in Paddock Wood, as well an investment in infrastructure such as in Nevill Street, Tunbridge Wells. The local plan should make two inviolable requirements of any new development:

(i) That it will not add to the overall flood risk of the area in which it is proposed;

and

(ii) That it will take the opportunity to *reduce* the current flood risk faced by existing residents. This can be achieved by requiring, for example, investment in new drainage infrastructure or upgraded pumping stations to serve existing populations, or to create flood defences such as flood containment areas.

Consistent with principle 2, these commitments should be required to be enacted *before* development can take place.

#### 7. Better provision should be made for playing fields, sport and leisure facilities

An advantage of development that is planned rather than speculative and piecemeal is that it can provide for collective facilities that will be needed now and in the longer term.

Sports and leisure facilities are prime among these. The erosion of playing fields must be ended and the local plan should establish the principle that no playing field should be lost - in whole or part - without an equal or better new facility provided in its place. In this respect, better should refer to both area and quality.

New sports and leisure facilities should be established in return for new development.. This will involve providing for upgraded facilities - for example all-weather pitches are increasingly demanded to allow year-round sporting events to take place. Care should be taken that the provision of new sports facilities is undertaken sensitively and not at the expense of other valued uses.

I would be grateful if the Council would consider these recommendations as it revises the plan for Examination in Public, at which point I will contribute further specific requests and representations on individual sites directly at the Examination in Public.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I would be grateful if the Council would consider these recommendations as it revises the plan for Examination in Public, at which point I will contribute further specific requests and representations on individual sites directly at the Examination in Public.

Question 1	
Respondent's Name and/or Organisation	Graham Clark
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph 1.29	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Paragraph 35 of the NPPF states that one of the purposes of local plan examinations is to assess whether they have been prepared in accordance with legal and procedural requirements and whether they are sound. It then goes on to say that plans are 'sound' if they are positively prepared, justified, effective and consistent with national policy.

Tunbridge Wells is located within the West Kent Housing Market Area, which includes Tonbridge & Malling and Sevenoaks Councils.

Sevenoaks Council published their Submission Draft Local Plan in December 2018. This Plan proposed some 8,000 dwellings, a shortfall of some 6,000 dwellings from their acknowledged housing requirement of 13,960 dwellings.

The Inspector stopped the Examination into this Plan in October 2019. She concluded that the Council had failed in its Duty to Co-operate with other planning authorities within the HMA to ascertain whether they could accommodate some of Sevenoaks unmet housing need. The Inspector stated:

*My main concern relates to the lack of constructive engagement with neighbouring authorities to resolve the issue of unmet housing need and the absence of strategic cross boundary planning to examine how the identified needs could be accommodated.*

Sevenoaks Council subsequently challenged this decision through the High Court. Justice Dove found that "there is no substance in any of the grounds upon which this claim is advanced."The Council's case was therefore dismissed.

Subsequently, the Tonbridge & Malling Local Plan Examination was halted by the inspector in October 2020. The inspector concluded that TMBC had failed in its Duty to Co-operate with Sevenoaks Council to see whether it could assist in meeting some of their unmet housing need.

What all of this points to is the need for joint working on such matters as development constraint studies, settlement capacity studies and green belt assessments. Perhaps even a West Kent wide local plan?? Unfortunately, none of this has work been undertaken on this basis.

I am afraid that Tunbridge Wells Borough Council faces the same dilemma as Sevenoaks and Tonbridge & Malling.

The TWBC Duty to Co-operate Statement (March 2021) is a voluminous document. Unfortunately, it doesn't contain any evidence that there has been any serious consideration given as to whether the borough is in a position to accommodate some of the unmet housing need arising at Sevenoaks.

In this context, it is apparent that Tunbridge Wells Council has also failed in its Duty to Co-operate. Until it has been resolved as to how the shortfall in housing at Sevenoaks is to be met there is no point in opening the Examination into this Local Plan.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation	Graham Clark
---------------------------------------	--------------

### Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

### Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1: The Development Strategy

### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

The development strategy as set out in the Policy STR1 and the Key Diagram is flawed.

The National Planning Policy Framework (NPPF) makes it clear that the primary purpose of the planning system is to achieve a future development pattern that is sustainable.

The Plan acknowledges that Tunbridge Wells and Southborough is by far the largest urban area in the Borough with the widest range and concentration of services and facilities. The town is a sub-regional shopping centre with a wide range of shops, pubs, restaurants and places of entertainment. There are numerous primary and secondary schools and excellent medical facilities. It is located on the Hastings to London railway line, with two well connected railway stations.

Whilst Tunbridge Wells and Southborough is the largest urban area in the Borough, it is not without significant challenges:

1. Since 2011 the birth rate in the town has collapsed. This has led to a number of primary schools threatened with closure. At least one primary school in the town has already had to reduce its intake and this position will invariably worsen as the population ages.
2. The town centre has been suffering with multiple store closures and appears to be in decline. This was happening well before the Covid-19 pandemic. The housing allocations in Paddock Wood, Capel and the other settlements will do little to alleviate this issue. Many of these new residents will invariably look to other towns for entertainment/ shopping, such as Maidstone, Ashford and Tonbridge.
3. The town suffers from heavy traffic congestion. This is partly a result of through traffic from the A21 travelling to places such as Crowborough, Gatwick and Newhaven having to pass through the town centre.
4. As the Local Plan acknowledges, affordability is a major issue in the Borough. By allocating the bulk of the housing outside of Tunbridge Wells and Southborough this will do little to resolve this problem of affordability in the main urban area. In addition, a lot of the people occupying the affordable housing stock will be looking for employment in the larger urban areas of Tunbridge Wells, Maidstone and Tonbridge. Invariably, most people will drive which will add to the traffic congestion that all of these town suffer from.

At paragraph 5.14 the Plan states '*The scale and nature of proposed development at Royal Tunbridge Wells reflects its existing position as the largest settlement within the borough*'. This is clearly not true!!

Roughly 60% the population of the Borough resides in the urban area comprising Tunbridge Wells and Southborough. The Plan however, only proposes that some 12% of the new dwellings should be located in the town itself. This 12% relies on a significant number of brownfield sites, which are 'old chestnuts'. They have been identified in earlier plans and still remain undeveloped. It is probable that many of these sites will remain undeveloped at the end of this Plan.

Given the problems highlighted above, the strategy (Policy STR1) should be to focus more of the housing development in Tunbridge Wells and Southborough and significantly less in Paddock Wood.

I have highlighted some of the challenges facing the town. The Council should be seeing this as an opportunity to plan for the future and to improve the environment and economy of the town by linking new housing development to major and transformative infrastructure improvements.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Plan should be modified such that there should be a higher concentration of new housing at Tunbridge Wells and Southborough and significantly less at Paddock Wood.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

The proposal to allocate land for housing development to the west of Paddock Wood flies in the face of Government advice contained in the NPPF and indeed to approved policies in the adopted Tunbridge Wells Core Strategy (2010).

The NPPF states:

*Para 155: 'Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future).'*

*Para 158: 'The aim of the sequential test is to steer new development to areas with the lowest risk of flooding. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding.'*

The Adopted Core Strategy states:

*Para 2.11: 'The Borough has a high-quality environment, which could be affected by future climate change. The impacts of climate change may be felt within the Borough by increased frequency and severity of weather events, such as flooding and extreme temperatures'....and*

*Core Policy 5: 'All new developments will be expected to....be located in accordance with the PPS25 sequential test, generally outside of the Borough's high-risk flood zones'*

*Paragraph 5.112 recognises that Paddock Wood is 'particularly high risk and in accordance with the sequential test and principles of PPS25, development will generally be steered away from areas of greatest risk'.*

Much of the land to the west of Paddock wood is in Flood Zones 2 and 3. Indeed, it forms part of one of the largest alluvial flood plains in Kent, where the rivers Teize, Medway and Beult converge.

Flood Zone 3 is land having a 1 in 100 or greater annual probability of river flooding.

Flood Zone 2 is land having between a 1 in 100 and 1 in 1,000 annual probability of river flooding. In this zone vulnerable development, which include housing, should be avoided. With global warming the incidence of flooding might well be worsen over time.

Much of the land shown for housing to the west of Paddock Wood either adjoins Flood Zone 3 or is actually in Flood Zone 2.

What is worrying is that the Council is being disingenuous about all of this. The Key Diagram fails to identify the land covered by Flood Zone 2.

The NPPF and the Core Strategy is clear that development in areas at risk of flooding should be avoided. The NPPF advises that all plans should apply a risk-based approach to the location of development and consider current and future impacts of climate change so as to avoid flood risk to people and property. To put it bluntly, the aim of the sequential test is to steer new development to

areas with the lowest risk of flooding. Over 90% of the Borough is outside of any flood zone. Clearly, the Plan fails to apply this test.

In addition, the northern part of the allocation is protected by the Leigh Flood Storage and Barrier. This has struggled to cope with recent flood events and there are proposals to upgrade this facility. If this was ever to fail, for whatever reason, the impact upon the northern part of the allocation could be severe.

Finally, has the Council consulted with lenders and insurers to see whether this proposal is acceptable from their perspective

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Plan should be modified to delete all of the allocations for residential development on land to the west of Paddock Wood.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

I have been resident in Five Oak Green for 17 years, and spend a lot of time walking in my local area. The proposal for a new garden village at Tudeley is not sound.

- 1 It will destroy valuable green belt land that is currently used for agriculture. We should plan to grow as much of our own food as possible. Once food growing space is used for housing, it never comes back.
- 2 It is in the wrong place: on the edge of Tunbridge Wells borough, but close to Tonbridge, which will see all the increased demands on resources. The local roads are not adequate, and TWBC has not planned properly in that they have not yet asked local landowners on their views for roads being built across their land, and no infrastructure analysis has been carried out.
- 3 Flooding in this area has improved in recent years, but will deteriorate if absorbent fields are concreted over. If you walk through the proposed area for development, you will find metal posts next to the public footpaths, and these contain plumb-lines down to the water level below. I often look at these on my walks. See how close to the surface the water level is for most of the year, and you will see how disastrous this housing development would be in terms of flood risk.
- 4 It is a disproportionate load on a small rural parish.
- 5 A housing development will lead to Tarmac taking up its options for gravel removal at Moat Farm, which will destroy even more of the local landscape. They are currently waiting to see if there have a near market for the building material. See also point 1 above in relation to this.
- 6 The plan is not sound in terms of all the extra utilities that would be required in the middle of the countryside, where there is currently very little. Millions of pounds will be needed for new sewerage, gas, electric, telecoms, drainage, etc. but TWBC have only put a fraction of the money required into the project budget, so it has not been thought through adequately.
- 7 The number of houses being built does not match the projected figure for local growth. The Office for National Statistics project only 5% growth for this area, but TWBC have used an out of date 2014 algorithm instead. Currently, 80% of local house purchases are made by people who live outside the area, so what we will be doing is building houses for other boroughs, so that they don't have to. This is not only unfair, but makes no sense. I have had a good opportunity to study what happens when a house goes up for sale here- it takes a long time to sell, because there is a limited market locally, in each house-type bracket. However, developers will market the new village all over the South-East.
- 8 The plan is not sound as it is not consistent with either the TWBC own sustainability objectives, or the effects of climate change. There will be loss of trees and wildlife, and more roads, noise and pollution. Railtrack have stated they will not build a rail junction there, so there will be people driving into Tonbridge to go to the station and commute back up to London. TWBC talks about electric cars and bikes, but these are out of the range of most people by reason of cost, and will be for many years yet. All the time a petrol car is cheaper than electric, people will use them.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- 1 TWBC should reconsider how the actual projected local growth could be catered for across the borough, to reduce the effect of building in just one place. This would be more effective in terms of cost, as local services such as sewerage, water, drainage, gas, electric, and telecoms may be able to cope with a small increase in demand and therefore will not need to be replaced.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

The project for a new garden village does not comply with TWBC's own sustainability objectives, as listed in table 6 on page 36 of the Sustainability Appraisal.

Also, the scores given for 'services and facilities' are high, which does not make sense. There are no facilities or services in the middle of the countryside - new sewers, drainage, gas, electric, telecoms, water supply, flood protection, as well as new roads will be required. Railtrack have stated that there will not be a station there, and the development is not big enough to warrant a supermarket.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

### Question 4a

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

Tunbridge Wells Borough Council Consultation on the Local Plan Pre Submission – Regulation 19 - Pembury

In November 2019 I submitted to the Borough Council my comments on the Local Plan; and as a result I have been advised of the option to file further comments on or before June 4 2021, which I now address. I have had sight of the response by Pembury Parish Council filed earlier this month which I fully support.

#### **The Local Plan consultation. 2019-2020**

Following the consultation a revised local Plan was submitted for further comment and consultation which included new designations for the land at Woodsgate Corner on the A 264 adjacent to Tesco's, and the removal of designation of commercial use at Downingbury Farm.

However the replacement proposal for the land at Woodsgate now proposes a care/nursing facility with between 80 and 120 residential units, certain of which are to be affordable. We are now also advised of the proposal to site a Medical School for the University of Kent at the Tunbridge Wells Hospital at Pembury for which student accommodation will be necessary, the number of eventual occupants is not identified.

#### **General comments on the Local Plan - Infrastructure**

Reading the original documents and now the revised Local Plan, it is clear that this area of West Kent is to be subject to the most substantial increase in housing provision in areas of Outstanding Natural Beauty, the High Weald and in the Green Belt. The current massive explosion of housing development at Paddock Wood is an indication of the absence of proper consideration of the potential issues raised in the current version of the plan. The plan does not include any overall guidance or proposals to address the issues of transport, medical care, infrastructure i.e. the provision of adequate water supply and waste water disposal, flooding mitigation, to name but the most apparent. The area to the Eastern boundary of Tunbridge Wells immediately appears as a dumping ground to provide the Borough Council's housing quota without any consideration of the impact on the existing communities and parishes. There seems to have been no joined-up thinking on the provision of infrastructure; rather that the designations/allocations will be subject to assessment when allocated!

#### **Transport**

The town centre of Tunbridge Wells is at risk of being strangled. The retail and hospitality sector has been decimated by the Covid pandemic lockdowns. Now the sectors are re-opening the transport problems which were clear in 2019 and before, have now become critical. For a journey between Pembury and the Town Centre on the A 264 to take 50 minutes by car as it did on May 28 mid -morning is ludicrous, when to that traffic problem it is now proposed to add the potential for thousands more road journeys, increased pollution and an inability to access local services.

The Green Belt is being ravaged to satisfy an allocation which cannot be justified. Pembury is on the main north/south route of the A21, with local lanes being the subject of destructive overspill when the A21 cannot deal with the level of traffic; the A264 is the main feeder route from the Medway towns. Neither have any effective projected improvements to cope with increased traffic movement, the problem will only get worse. Whilst the absence of a motor village at Woodsgate is welcomed, its

replacement will also have traffic consequences. However the proposed sites AL/PE/1 (50/60 dwellings), AL/PE/2 (80 dwellings) and AL/PE/3(80 dwellings) together with AL/PE/4 (25 dwellings) all have as part of the rationales for their use a reliance on walking and cycling.

With respect to the planners, the infrastructure documents make no mention of managing the increased households and their actual transport needs. Over 240 new dwellings without those for which permission has already been granted will result in increased traffic movements on Hastings Road, High Street, Lower Green Road/Maidstone Road and eventually A 21 and A 264. This is without the transport impact of the up to 9,000 dwellings in Paddock Wood, Capel and Tudeley and an indication on how traffic flow from these areas will be managed. The A 21 bypass completed in 1984 and the improvements to the A 228 again to by-pass the village were intended to alleviate traffic bottlenecks and congestion, the current proposed housing allocations could lead to these problems recurring.

### **Water, sewerage, waste water and flooding**

Having read the submissions of Southern Water on the 4 sites proposed for development in Pembury, it is clear that to serve the increased allocations, substantial improvements will be needed before the waste water and sewerage systems can effectively support the increased dwellings. The authority seeks to rely on the new infrastructure charge, although reference is made in the local plan infrastructure documents to s. 106 agreements.

The representations of the supplier of water, South East Water, also make it clear that to service the proposed allocated dwellings capacity will need to be increased. Water is a finite and precious resource, yet the Borough's housing plans are reliant on someone else finding a delivery strategy!

In both cases the issues need to be addressed before any form of construction can be permitted, otherwise Pembury will be faced with the same supply and drainage problems which occurred in the 1960/1970s and continue to this day in part of the village.

Both the sites AL/PE 2 and 3 are at a higher level than Hastings Road, AL/PE 3 significantly so, with potential increased problems of water penetration into the existing houses on Hastings Road. Nothing is proposed to alleviate this.

### **Education**

The list of primary schools in the Borough itself and in the surrounding towns and villages set out in the supporting documents does not identify the existing primary school in Pembury. The last period of development in Pembury caused the construction of temporary classrooms in the grounds of the school. No mention is made of this.

### **Health**

Since the publication of the revised site allocations including the change of policy for Woodsgate Corner, it has become clear that with the increase in beds in the care sector, Pembury is likely to have more than the projected 13% increase in population. It is not clear whether the Primary Care network has been consulted on and/or responded to the additional proposals generally and the specific belief that the Waterfield Surgery can simply be extended.

### **The Sites – AL/PE 3 and 4**

For many reasons, the increased number of dwellings causes great concern, the change in character of a community which has functioned reasonably well and the lack of any actual proposals to alleviate such increase. All result in a loss of Green Space, particularly precious as once lost it cannot be replaced.

AL/PE 3 if used for construction will completely change the character of the Bo Peep end of the village in Hastings Road, as even with A 21 buffers, the land, which is significantly higher, will be visible from both north and south.

AL/PE 4 will be to the rear of The Hospice in the Weald with access proposed via Church Road, a barely navigable road at most times. Good visibility splays don't solve the problem.

### **Conclusion**

Whilst appreciating the decision for increased housing is one imposed by central government, the Borough's Local Plan should be sustainable, acceptable and realistic. Pembury has an allocation of significant numbers, but within the Local Plan no mention is made of the potential impact on Pembury

of the major allocations on its boundary with Paddock Wood and Capel. These neighbouring substantial allocations are likely to have an impact on infrastructure issues addressed above.

#### **Question 7**

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

Tunbridge Wells Borough Council Consultation on the Local Plan Pre Submission – Regulation 19 - Pembury

In November 2019 I submitted to the Borough Council my comments on the Local Plan; and as a result I have been advised of the option to file further comments on or before June 4 2021, which I now address. I have had sight of the response by Pembury Parish Council filed earlier this month which I fully support.

#### **The Local Plan consultation. 2019-2020**

Following the consultation a revised local Plan was submitted for further comment and consultation which included new designations for the land at Woodsgate Corner on the A 264 adjacent to Tesco's, and the removal of designation of commercial use at Downingbury Farm.

However the replacement proposal for the land at Woodsgate now proposes a care/nursing facility with between 80 and 120 residential units, certain of which are to be affordable. We are now also advised of the proposal to site a Medical School for the University of Kent at the Tunbridge Wells Hospital at Pembury for which student accommodation will be necessary, the number of eventual occupants is not identified.

#### **General comments on the Local Plan - Infrastructure**

Reading the original documents and now the revised Local Plan, it is clear that this area of West Kent is to be subject to the most substantial increase in housing provision in areas of Outstanding Natural Beauty, the High Weald and in the Green Belt. The current massive explosion of housing development at Paddock Wood is an indication of the absence of proper consideration of the potential issues raised in the current version of the plan. The plan does not include any overall guidance or proposals to address the issues of transport, medical care, infrastructure i.e. the provision of adequate water supply and waste water disposal, flooding mitigation, to name but the most apparent. The area to the Eastern boundary of Tunbridge Wells immediately appears as a dumping ground to provide the Borough Council's housing quota without any consideration of the impact on the existing communities and parishes. There seems to have been no joined-up thinking on the provision of infrastructure; rather that the designations/allocations will be subject to assessment when allocated!

#### **Transport**

The town centre of Tunbridge Wells is at risk of being strangled. The retail and hospitality sector has been decimated by the Covid pandemic lockdowns. Now the sectors are re-opening the transport problems which were clear in 2019 and before, have now become critical. For a journey between Pembury and the Town Centre on the A 264 to take 50 minutes by car as it did on May 28 mid -morning is ludicrous, when to that traffic problem it is now proposed to add the potential for thousands more road journeys, increased pollution and an inability to access local services.

The Green Belt is being ravaged to satisfy an allocation which cannot be justified. Pembury is on the main north/south route of the A21, with local lanes being the subject of destructive overspill when the A21 cannot deal with the level of traffic; the A264 is the main feeder route from the Medway towns. Neither have any effective projected improvements to cope with increased traffic movement, the problem will only get worse. Whilst the absence of a motor village at Woodsgate is welcomed, its

replacement will also have traffic consequences. However the proposed sites AL/PE/1 (50/60 dwellings), AL/PE/2 (80 dwellings) and AL/PE/3(80 dwellings) together with AL/PE/4 (25 dwellings) all have as part of the rationales for their use a reliance on walking and cycling.

With respect to the planners, the infrastructure documents make no mention of managing the increased households and their actual transport needs. Over 240 new dwellings without those for which permission has already been granted will result in increased traffic movements on Hastings Road, High Street, Lower Green Road/Maidstone Road and eventually A 21 and A 264. This is without the transport impact of the up to 9,000 dwellings in Paddock Wood, Capel and Tudeley and an indication on how traffic flow from these areas will be managed. The A 21 bypass completed in 1984 and the improvements to the A 228 again to by-pass the village were intended to alleviate traffic bottlenecks and congestion, the current proposed housing allocations could lead to these problems recurring.

### **Water, sewerage, waste water and flooding**

Having read the submissions of Southern Water on the 4 sites proposed for development in Pembury, it is clear that to serve the increased allocations, substantial improvements will be needed before the waste water and sewerage systems can effectively support the increased dwellings. The authority seeks to rely on the new infrastructure charge, although reference is made in the local plan infrastructure documents to s. 106 agreements.

The representations of the supplier of water, South East Water, also make it clear that to service the proposed allocated dwellings capacity will need to be increased. Water is a finite and precious resource, yet the Borough's housing plans are reliant on someone else finding a delivery strategy!

In both cases the issues need to be addressed before any form of construction can be permitted, otherwise Pembury will be faced with the same supply and drainage problems which occurred in the 1960/1970s and continue to this day in part of the village.

Both the sites AL/PE 2 and 3 are at a higher level than Hastings Road, AL/PE 3 significantly so, with potential increased problems of water penetration into the existing houses on Hastings Road. Nothing is proposed to alleviate this.

### **Education**

The list of primary schools in the Borough itself and in the surrounding towns and villages set out in the supporting documents does not identify the existing primary school in Pembury. The last period of development in Pembury caused the construction of temporary classrooms in the grounds of the school. No mention is made of this.

### **Health**

Since the publication of the revised site allocations including the change of policy for Woodsgate Corner, it has become clear that with the increase in beds in the care sector, Pembury is likely to have more than the projected 13% increase in population. It is not clear whether the Primary Care network has been consulted on and/or responded to the additional proposals generally and the specific belief that the Waterfield Surgery can simply be extended.

### **The Sites – AL/PE 3 and 4**

For many reasons, the increased number of dwellings causes great concern, the change in character of a community which has functioned reasonably well and the lack of any actual proposals to alleviate such increase. All result in a loss of Green Space, particularly precious as once lost it cannot be replaced.

AL/PE 3 if used for construction will completely change the character of the Bo Peep end of the village in Hastings Road, as even with A 21 buffers, the land, which is significantly higher, will be visible from both north and south.

AL/PE 4 will be to the rear of The Hospice in the Weald with access proposed via Church Road, a barely navigable road at most times. Good visibility splays don't solve the problem.

### **Conclusion**

Whilst appreciating the decision for increased housing is one imposed by central government, the Borough's Local Plan should be sustainable, acceptable and realistic. Pembury has an allocation of significant numbers, but within the Local Plan no mention is made of the potential impact on Pembury

of the major allocations on its boundary with Paddock Wood and Capel. These neighbouring substantial allocations are likely to have an impact on infrastructure issues addressed above.

**Do you consider that the Local Plan:**

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

### Question 4a

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

## Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

The suggestion of using this plot of land at 230 Upper Grosvenor Road for the development of 40 to 45 residences is highly inappropriate, and it lacks consideration of many of the fundamental aspects that impinge on such a development. The land area is actually unsuitable for such a large number of dwellings, as in reality the amount of usable space, the surrounding houses, and the access limitations make it untenable.

It seems that whoever thought of suggesting 40-45 residences did not understand the site's limitations, nor had a clear view on the number of planning applications that had been rejected, and that much lower densities had been considered inappropriate for the site. Although the site is around 0.47 hectares, the number of trees which have TPOs plus their root systems reduce the amount of usable land to around 0.29 hectares. In the past, planning was turned down on this site for a number of proposals. In particular, the council rejected 2 dwellings because it would result in a cramped form of development, and that there would be poor visibility to the existing road. Also rejected was a proposal for 14 properties and another proposal for 24 properties. The fundamentals of these rejections have not gone away.

The development proposal at 230 Upper Grosvenor Road is not a good fit for this plot of land and is an over intensification of the local neighbourhood. Its density would be far too high for this suburban style neighbourhood. It is clear that given the actual usable amount of land, it is not actually possible to fit that many dwellings and the required number of parking spaces into the space. There are a number of aspects that need to be adjusted downwards if anything is actually built.

It is important/crucial to reconsider this allocation in the development plan and revisit the site to fully understand the limitations of the site and reassess what sort of development would be both sustainable and feasible and an enhancement not a detriment to the local area.

Here we outline some of the major issues that make plan AL/RTW 6 unsuitable for going ahead.

### 1) Height and Scale of development

To fit in 40-45 dwellings, the development would have a height and scale that is significantly oversized for the plot. This would need to be a massive development in relation to the plot and as such will overwhelm anything else in the area in both height and surface area. It would be out of proportion to the area and the neighbourhood and would completely overwhelm any surrounding properties and dramatically change the character of the surrounding locale.

The current properties in the neighbourhood are 2 or 3 storey houses, with gable roofs. In order to fit 40-45 dwellings into the plot this would entail a multi-storey structure or structures that would be significantly taller and more substantial than anything nearby and will inherently present as a huge mass to the properties backing onto it. Furthermore, the inevitable height of the structures will allow anyone in those flats to overlook the gardens and into the windows of the existing properties thereby significantly intruding on the privacy of the existing dwellings.

## **2) Density of development**

The density of the proposed development plan would be too high for this plot, which is on back land behind a number of existing houses. The majority of the properties backing onto the proposed development are mostly single family dwellings, which is an attractive aspect of the locale.

Out of 24 properties between 228 and 180 UGR, which all back onto the land of 230 UGR, only 4 of them are flats. Out of those 4, only one is a purpose built block, of 3 stories at 192 UGR, and this replaced an old property that was used as a retirement home. Historically that block was repurposed as flats in the 1990's, so the footprint in size, density, and height was not significantly altered from the previous building on the site.

Therefore, out of the 24 properties, only 3 that were originally single family dwellings have been converted to flats. The rest remain family houses. In fact, the percentage of properties that have been converted to flats is less than 12%.

The plan for AL/RTW 6 is proposing to turn a single family dwelling with TPO trees (thus limiting the build area to 0.29 hectares) into 40-45 properties to accommodate new residents. This density is drastically higher than any current dwelling in the area and would create a high density development on green backland.

To build to that density would result in a very high number of occupants. Even if all the 45 dwellings were 1 bed units that alone is a potential for 90 occupants. If a mix were of 2 and 3 bed units, the number rises dramatically and a realistic estimate is around 166 occupants as the following estimation of 2 people per 1 bed unit, 3/4 per 2 bed unit, and 4/6 persons per 3 bed unit is a plausible occupancy level.

In the past planning was turned down because it was deemed that even 2 dwellings would result in a cramped form of development on this site. A change of planning policy does not overcome this fundamental issue. Cramped is still cramped.

## **3) Road safety**

The demolition of 202 UGR will create a new road, not a driveway, which will directly connect to UGR. At this point in the road the visibility is poor due to the curve in the road and the dip down the hill. The line of sight is highly limited, and the properties on both sides have hedges which restrict how much a driver can see. There are no guarantees that this can be resolved on a permanent basis.

There is a bus stop nearly opposite (10 metres away) from the proposed exit, creating an additional hazard. Cars turning out of this new road would be stopped by buses at the bus stop.

Due to the location where the new road will meet UGR, it will be more-or-less directly opposite Silverdale Lane. Their centres are offset by just 4 meters. In essence, a new crossroads will be created on a bend with poor visibility. Silverdale Lane is a busy route, which has 2 directional traffic and many pedestrians, even though it is a single lane. Sending more vehicles down there will be a danger to all and any vehicles exiting from Silverdale Lane onto UGR will be met with not only the current UGR traffic and the bus stop but also competing traffic into and out of the new road into the proposed development.

Upper Grosvenor Road is a major route for ambulances, buses, and other emergency vehicles. Furthermore, the section of UGR from 202, down towards Silverdale Road is relatively narrow and bendy for a main road and is effectively a 1 1/2 lane road due to permitted on street parking on the opposite side. There is always a problem if a large vehicle (such as a bus or a truck) is going up the hill or down the hill and often the cars swerve onto the pedestrian pavement. In addition, this is a major pedestrian school route with school children walking both to/ from home and to High Brooms train station. Their safety should be a key factor in any decision that will have a further negative impact on the safety of their school route.

Policy AL/RTW6, point 2, says: "Provision of sustainable and active transport mitigation measures". How is this ever possible with this site and the suggested level of development.

The introduction of vehicles from 40-45 flats would add an excessive volume of vehicles and the line of site from the new road is ineffective for the volume of vehicles that would use it. Another matter that the Council are aware of is that the cars are travelling quite fast on this stretch of UGR.

In the past planning was turned down due to poor visibility to the existing road. This "poor visibility" still exists.

#### **4) Insufficient parking and excessive traffic**

With between 40 to 45 dwellings on the site, we can estimate that there would be 2-3 cars per unit, with the number of cars likely to be between 80 - 115 cars.

However, the site is highly space limited and there can only be less planned car park spaces than needed, so there will be a guaranteed overflow of vehicles going into the surrounding area. Currently there is no space on Upper Grosvenor Road. There is only on street parking on UGR on the opposite side of the proposed development, which is already fully utilised parking primarily by residents on the opposite side w/o driveway, and is already under capacity for the needs of the local area. In addition there is a Disabled bay in that parking area. Where will all these new cars go?

Also some of the houses are unable to make a driveway, due to the drop of the land, so they rely on the on street parking and would be in competition for parking near their homes from the overflow of the proposed development.

All of these vehicles combined with the layout of the proposed new crossroad and the bus stop location will cause congestion, danger, and more accidents. It will inevitably lead to further traffic jams, which in turn leads to increased poor air quality and pollution, thus impacting the existing residents.

#### **5) Land environment**

The site of the proposed plan is currently back land, which is green and contains many shrubs and trees (some with protected status and a large number of TPOs) and provides homes to a lot of local wildlife such as birds, foxes, bats and insects. The TPO trees have a substantial root system which needs to be assessed and protected. This root system will limit the usable build area and to fit 40-45 dwellings into it would result in just 0.29 hectares of usable build space.

Policy AL/RTW6, point 4 says "Proposals to be informed by a detailed arboricultural survey, taking into consideration existing mature trees on-site and on the boundary of the site, with the layout and design of the development protecting those of most amenity value. Particular regard shall be had to the retention and reinforcement of the trees along the eastern and southern boundaries to retain an appropriate level of screening". It is difficult to see how considering this and maintaining all the TPO trees can allow so many flats to be built.

Bats are frequently seen in this area and are a key feature in the back gardens that back on to 230 UGR. This bat activity was even observed during a recent bat survey of the area. In terms of the bat survey, which was done over one evening, for 2 hours, Date: 31/08/2020, Start and End Times: 19:30 - 21:30, the surveyors did observe that: "Commuting passes by common and soprano pipistrelles were heard from 20:01 for the duration of the survey. The bats could occasionally be seen passing west to east over B1 and into the treeline that borders the east side of the site. Foraging behaviour by common pipistrelles was heard in the garden area ...". They also say "In addition, brown long-eared calls were heard at 21:28...".

If so much bat activity was seen in just 2 hours of 1 night, imagine how much of an environment this is for bats, where the surveyors say "... during the active bat season (May – September)".

If this plan goes ahead, the environment in 230 UGR for these bats will be completely undermined and could destroy their livelihood.

40-45 units would eliminate most of this green environment, and the associated car parking with inadequate green space and landscaping will just render the plot a concrete jungle. Reports suggesting biodiversity net-gain when combined with this level of development should not be taken seriously. Overall, losing this green space would be a loss of a valuable environment in this part of Tunbridge Wells.

## **6) Infringement on right to privacy**

Given the limited land space, this suggested plan would need to be of considerable height, perhaps 12 meters and 4 stories, to fit in over 40 flats, and will thus directly overlook the backs of a number of houses and into the gardens and into people's windows which will be a drastic invasion of privacy. These houses have been very quiet and private at the back, and this is one of the appeals of them. Although there is a busy road at the front, the backs are relatively tranquil.

Any build would need to be so close to the boundary, and there are no guarantees that any of the greenery and hedges will be kept, except for a few trees with TPOs and even these would be under threat, as the fines for chopping down TPO trees for developers are very low or non-existent.

## **7) Noise and light pollution**

As this is currently back land, with 1 house of modest proportions and height , there is currently very little noise and light overspill. A change to over 40 flats, and over 150 people and permeant parking for around 100 cars will change the level of noise emanating from that plot, as well as creating a light nuisance for all of the houses that back onto that land. Currently at night it is completely dark and that is a fundamental environmental aspect that should be a priority for both the well being of the environment, local ecology and sustainability.

## **8) Security**

Again, this is currently back land, with 1 house with little concern of the members of that household creating a security problem for the houses that back onto it. By creating over 40 flats with over 150 people, this aspect of security will be dramatically changed.

## **9) Sustainability**

This development is not a brownfield site that needs to be repurposed, nor does it replace an existing large building. This is an oversized plan on a very green, back land plot, and the number of suggested flats, and its consequential bulk, will be a detriment on all fronts. For any development in this site there needs to be a consideration of

- . sustainable development
- . effective use of land
- . improving the environment

To reference the Tunbridge Wells Local Plan and particularly EN1. EN1 says “All proposals for development within the borough will be required to satisfy the following criteria ...” and lists 9 main criteria, and a large number of sub-criteria.

Having presented some of the big issues this plan has, we can consider if the plan AL/RTW 6 can possibly satisfy these criteria:

1. Design, character, and site context - It starts with: Proposals should retain and, where appropriate, enhance buildings that contribute positively to the locality and street scene, heritage assets, open spaces, trees/vegetation, features of biodiversity/geodiversity, or other features important to the built or landscape character of the area, ....

NO

2. Highway safety and access - Vehicular access, parking provision, and pedestrian movement should be safely accommodated; Traffic from new development should not result in severe residual cumulative impacts on the road network; Car parking and/or servicing should be appropriate to site context ....

NO

3. Water/flooding issues

Possibly

4. Landscape, trees, and amenity - Proposals should be accompanied by an integral landscaping (both hard and soft) scheme, which contributes to, and enhances, the natural and local environment, including sympathetic boundary treatments and green infrastructure; Any proposed new landscaping, and any existing landscape feature to be retained, shall include adequate provision for future tree and hedgerow growth, and management practices.

NO

5. Biodiversity and geodiversity - Proposals should maximise opportunities for increasing biodiversity potential, Proposals that affect existing biodiversity, geodiversity, and blue/green infrastructure must be designed to avoid, mitigate, or compensate for any potential harm, resulting in a net gain; Proposals should identify and not undermine the value of ecosystem services that the site provides

NO

6. Residential amenity - Proposals should not cause significant harm to the amenities of occupiers of neighbouring properties and uses, and should provide adequate residential amenities for future occupiers of the development by ensuring That development does not result in, or is exposed to, excessive noise, vibration, odour, air pollution, activity, vehicular movements, or overlooking; That the built form does not create an unacceptable loss of privacy and overbearing impact, outlook, or daylight and sunlight enjoyed by the occupiers of adjacent/nearby properties; Provision of sufficient public and private outdoor and recreational space.

NO

7. Crime reduction - Proposals should create a safe and secure environment and incorporate adequate security measures and features to deter crime, fear of crime, disorder, and anti-social behaviour.

Highly unlikely

8. Design and construction guidance

Hard to say

9. Community engagement - New development should be informed by effective engagement between applicants, local communities, neighbours of sites, local planning authorities, infrastructure providers, and other interested parties throughout the planning process. Applications that demonstrate early, proactive, and effective engagement, and that the views expressed in that engagement have been properly considered, will be looked on more favourably than those that cannot.

Who can say

So overall, it is hard to convince ourselves that allowing 40-45 units matches the development criteria. And, as previously stated, a development of that scale will create further air, light ,and noise pollution for the current residents backing onto the site from which they will have no respite.

## **10) Change essence of the neighbourhood**

The proposal plan would be, in general, an over development in a residential area and out of proportion to the local character. The proposed plan wants to change a single 2 story 4/5 bedroom family dwelling with garden into over 40 flats, comprised of potentially multi storey buildings and car parks with potential for 166 people, and convert another detached house into a small road.

If allowed, it would set a height precedent that would cause future high-rise over-developments in neighbourhoods. Increasingly raising the density and the skyline would be detrimental to the town as a whole.

There are a number of aspects in the National Planning Policy Framework regarding the current neighbourhood that seem conflicting with proposal AL/RTW6. NPPF 122 highlights the desirability of maintaining an area's prevailing character and setting (including residential gardens) and the importance of securing well-designed, attractive and healthy places. Proposal AL/RTW6 can never match this. NPPF 125 suggests: Design policies should be developed with local communities so they reflect local aspirations, and are grounded in an understanding and evaluation of each areas's defining characteristics, again AL/RTW6 is not a match to this as it can only be opposite the to the main characteristics of our neighbourhood.

NPPF 127 says that Planning decisions should ensure that: a) developments will function well and add to overall quality of the area - not just short term, but over the lifetime fo the development; b) are visually attractive as a result of good architecture, layout and appropriate and effective landscaping; c) are sympathetic to local character and history, including the surrounding but environment and landscape setting; d) establish and maintain a strong sense of place; ..... It is clear AL/RTW6 cannot meet these criteria.

Building over 40 dwellings will have a negative impact on the existing householders in this local area. Making new flats, which upsets the existing neighbours, either those who back onto it, or those on the other side of the road, who will also be affected, does not seem to be the benefit of planning. The well being of the existing neighbours should also be strongly considered.

## **Conclusions**

The AL/RTW6 proposal, as presented in the Pre-Submission Local Plan, is highly unsuitable for this site. The current suggestion of over 40 flats:

- . will destroy the green area
- . will be disproportionate in scale, density, and mass for this area
- . will destroy the local neighbourhood
- . will create a traffic hazard on Upper Grosvenor Road
- . will create a pollution zone where one does not exist
- . will create excessive light pollution that will affect both wildlife and local residents
- . will directly overlook and infringe on the privacy of the surrounding homes
- . will be detrimental to existing wildlife

If the site is to be developed, a more effective use of the land will be to create a relatively small number of family houses with consideration to genuine quality of living of both future occupants of the new dwellings and the existing neighbours

Once again, It is important/crucial to reconsider this allocation in the development plan and revisit the site to fully understand the limitations of the site and reassess what sort of development would be both sustainable and feasible and an enhancement not a detriment to the local area.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am happy to participate and clarify / highlight the issues that make this Policy untenable.

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:** Yes, I wish to be notified of future stages of the Local Plan

Policy PSTR/PE 1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

##### **Strategy for Pembury parish – Policy PSTR/PE1**

I do not agree with the excessive target of 389-417 new dwellings for Pembury, the majority of which are in the MGB and High Weald AONB. There are no proposals to replace lost MGB land elsewhere and land lost to development within the AONB is irreplaceable.

Genuine 'exceptional circumstances' do not exist to permit the loss of irrecoverable countryside for housing, including nearly 6% of MGB borough-wide. 'Exceptional circumstances' is just a surrogate phrase for diktat by central government.

If the proposed scale of development is accepted there will be concomitant demands on the local infrastructure. Minimal developer contributions barely address the increased demands for road improvements, health facilities, educational services and recreational amenities. It will create huge problems and bills for local authorities and residents that are not acceptable.

#### Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Development should be strictly limited to brownfield sites and sites outside the perimeter of the High Weald AONB. Infrastructure improvements should be fully funded by developers and completed concurrently with developments.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

**Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

My name is David Cobell and I have lived in Five Oak Green since 1979 ( 42 years ). I am a general builder. My customers tend to be within a ten mile radius and like me to begin my days work at about 9.00 am. This means that I travel along the B 2017 towards Tonbridge between 8.00 and 9.00 am. With Capel Primary School and Somerhill School on my route it can take up to half an hour just to get to Tonbridge, so if the proposed plan goes ahead a secondary school will be dumped next to the primary school and make the traffic chaos much worse.

I have two dogs and regularly enjoy a walk with them to either Tonbridge or Paddock Wood along public footpaths through open fields. This is why I have loved living in a village surrounded by green belt. If the plan goes ahead I will be walking through soleless housing estates whichever way I turn.

During the time that I have lived here we have suffered at least four floods, resulting in considerable damage to goods and property, due to drainage systems being totally overwhelmed. How can the dumping of another 500 acres of concrete on a flood plain in this area be considered viable?

Trains from Paddock Wood and Tonbridge, during rush hour are standing room only and car parks are full so how will a further additional 2100 dwellings in the Tudeley area alone not withstanding the similar ammount of dwellings in East Capel, with a probable high percentage of London commuters, be catered for?

Why do brownfield sites seem to be ignored. Is it because it is so much easier for the council planners to deal with one landowner and to hell with those who will suffer because of it. Simply lazy planning.

So many dwellings bulit in such a localised area cannot be serving the local community so what will happen is they will be bought up by UK and foreign investors to be sub-let to people who can only afford to rent or, as has happened locally already, batches of unsold properties have, in fact, been sold to other councils, namely Lewisham and Croydon so that they can ship out council tennants in bulk so that their old dilapidated houses can be pulled down and redeveloped to a much higher standard so that they can be sold on for huge profits. The majority of rehoused council tennants will probably then need to commute to remain in employment and hence increase the strain on the railways

#### Question 7

My name is Jackie Cobell and I am 66 years old. I am a retired foster carer for Kent County Council and I have lived in Capel for 42 years. I strongly object to this preposterous plan that has been born out of lazy planning by Tunbridge Wells Planning Department.

Our home has been flooded several times, the last time being February 2020. Many homes in the village were also flooded. It is not very nice having raw sewage in your home. My home is in a flood zone so building thousands of extra homes in a flood zone is ludicrous!!

We live on a B road, a country lane and the traffic is horrendous at rush hour, which on entering Tonbridge it is gridlocked already!

The trains will not cope with all the extra commuters, or the traffic with what will be essentially a commuter zone.

At first we were told this huge development would provide homes for local folk. This is just not true. These homes will be aimed at investors. Youtube have adverts, in China in Chinese, of the developments in the next village and other areas in the South-East.

We are heartbroken at the thought of our beautiful villages and Greenbelt countryside being ruined forever, along with our wildlife which is already in terrible decline. The next generation will suffer at the loss of our green open spaces which have proved to have been a life saver in these awful times of Covid 19.

We are most upset that Tunbridge Wells Borough Council have not listened to us at all, dumping 65% of their housing quota on only 6% of the Councils population.

There is no infrastructure, the local doctors are stretched and so is our hospital at Pembury.

TWBC have not looked at brownfield sites, even though we were told there were 109 brownfield sites, one of them being a 5 acre site opposite Tunbridge Wells town hall, laid bare for over 20 years! Developers would rather bulldoze Greenbelt and make more profit. It doesn't make any sense!

There is a more appropriate site at Castle Hill that has much better access to an A road which Tunbridge Wells Planners have totally ignored. One thinks that the deal was done and dusted with the landowner offering around 500 acres of the Medway Valley years ago with villagers having no say at all. We feel something dodgy has gone on, especially since the lead councillor at a meeting was heard to say slyly "you'll never win"!! Where is the democracy?

The planning department have no empathy to our plight of being flooded again... the water has to go somewhere! Adding that to pollution, and living in a dust bowl caused by all the construction traffic. Our children will suffer. The homes being built are not affordable, nor are they for our younger generation. Indeed foreign investors are buying up houses especially in the South-East.

Boris Johnson and his mantra of "Build, Build, Build" is prepared to sacrifice our greenbelt countryside to prop up the economy. The Bank of England has even said that homes are the best assets now with the greatest profit yield.

In years to come there will be an enquiry into why so much green belt was eaten up but once it's gone it will be gone forever!!

Tudeley village is not the right area for a housing estate of this magnitude especially when another site was recognised as being a better alternative with better links to railway stations.

I hope you take all my concerns into consideration. We do need more affordable homes but for OUR youngsters and not for greedy buy-to-rent landlords and investors,

Work and Housing should be more balanced to include other areas of the U.K. otherwise the South East of England will just slide into the English Channel !!!

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

##### **1. The plan is unsound because of inadequacies in the consultation process.**

##### **(i) Poor consultation between TWBC and other Borough Councils**

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

**(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

**(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
  - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
  - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
  - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
  - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
  - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

**AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### **4. Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

##### 4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a

Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

## Comment

Consultee	Mr John Collingwood ( [REDACTED] )
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr John Collingwood ( [REDACTED] )
Comment ID	PSLP_2122
Response Date	03/06/21 11:49
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.10
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	John Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

*[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP\_2120 and PSLP\_2122]*

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

##### **1. The plan is unsound because of inadequacies in the consultation process.**

##### **(i) Poor consultation between TWBC and other Borough Councils**

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

**(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

**(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
  - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
  - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
  - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
  - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
  - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

**AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### **4. Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?** . Yes, I wish to participate in hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

##### 4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a

Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

## Comment

Consultee	Mr Reuben Collingwood ( [REDACTED] )
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Reuben Collingwood ( [REDACTED] )
Comment ID	PSLP_2117
Response Date	03/06/21 11:50
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.8
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Reuben Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

*[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP\_2117 and PSLP\_2119]*

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

##### **1. The plan is unsound because of inadequacies in the consultation process.**

##### **(i) Poor consultation between TWBC and other Borough Councils**

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

**(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

**(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
  - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
  - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
  - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
  - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
  - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

**AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### **4. Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

##### 4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a

Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mr Reuben Collingwood ( [REDACTED] )
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Reuben Collingwood ( [REDACTED] )
Comment ID	PSLP_2119
Response Date	03/06/21 11:50
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Reuben Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

*[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP\_2117 and PSLP\_2119]*

**Question 4**

**Do you consider that the Local Plan:**

**Is legally compliant** No

**Is sound** No

**Complies with the Duty to Cooperate** No

#### **Question 4a**

**If you consider that the Local Plan is not sound, please answer this question.**

**Do you consider that the Local Plan is not sound because:**

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### **Question 5**

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.**

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

##### **1. The plan is unsound because of inadequacies in the consultation process.**

##### **(i) Poor consultation between TWBC and other Borough Councils**

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

##### **(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

**(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectarage:
  - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
  - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
  - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

**(iv) Poor consultation with stakeholders, the local community and the neighbouring parish**

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
  - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
  - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

**AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### **4. Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close

to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the

less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

## Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

## Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

## Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

### 4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
<input type="checkbox"/>	No, I do not wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mr Sebastian Collingwood ( [REDACTED] )
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Sebastian Collingwood ( [REDACTED] )
Comment ID	PSLP_2112
Response Date	03/06/21 11:52
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.6
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Sebastian Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 2, AL/BE 3, AL/BE 4 and EN1 please see Comment Numbers PSLP\_2142, PSLP\_2112, PSLP\_2114 and PSLP\_2143]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

##### **1. The plan is unsound because of inadequacies in the consultation process.**

##### **(i) Poor consultation between TWBC and other Borough Councils**

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

**(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

**(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
  - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
  - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)
- The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.
- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
  - For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
  - For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End** (FEE) are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
  - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
  - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
  - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
  - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
  - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### **4. Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not

adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic

value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

##### 4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has

demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan
---

## Comment

Consultee	Mr Sebastian Collingwood ( [REDACTED] )
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Sebastian Collingwood ( [REDACTED] )
Comment ID	PSLP_2114
Response Date	03/06/21 11:52
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.6
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Sebastian Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 2, AL/BE 3, AL/BE 4 and EN1 please see Comment Numbers PSLP\_2142, PSLP\_2112, PSLP\_2114 and PSLP\_2143]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

##### **1. The plan is unsound because of inadequacies in the consultation process.**

##### **(i) Poor consultation between TWBC and other Borough Councils**

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

**(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

**(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
  - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
  - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)
- The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.
- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
  - For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
  - For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
  - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
  - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
  - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
  - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
  - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### **4. Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not

adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic

value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

##### 4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has

demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

### **Future Notifications**

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

Consultee	Mrs Dorota Collingwood ([REDACTED])
Address	[REDACTED] [REDACTED] Cranbrook TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Dorota Collingwood ([REDACTED])
Comment ID	PSLP_2009
Response Date	30/05/21 11:52
Consultation Point	Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.8
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Dorota Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP\_2009, PSLP\_2010, PSLP\_2011, PSLP\_2012 and PSLP\_2013]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

- according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
  - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).

- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

- **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
  - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
  - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
  - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
  - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### 4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question**

**5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### **Question 7**

***Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.***

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### **Question 7a**

***Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.***

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings,

the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new

primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mrs Dorota Collingwood ( [REDACTED] )
Address	[REDACTED] [REDACTED] Cranbrook TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Dorota Collingwood ( [REDACTED] )
Comment ID	PSLP_2010
Response Date	30/05/21 11:52
Consultation Point	Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Dorota Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP\_2009, PSLP\_2010, PSLP\_2011, PSLP\_2012 and PSLP\_2013]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

- according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
  - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).

- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

- **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
  - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
  - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
  - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
  - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### 4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question**

**5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

### Question 7

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

### Question 7a

**Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

### Question 8

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings,

the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new

primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mrs Dorota Collingwood ( [REDACTED] )
Address	[REDACTED] [REDACTED] Cranbrook TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Dorota Collingwood ( [REDACTED] )
Comment ID	PSLP_2011
Response Date	30/05/21 11:52
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Dorota Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP\_2009, PSLP\_2010, PSLP\_2011, PSLP\_2012 and PSLP\_2013]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

- according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
  - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).

- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

- **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
  - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
  - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
  - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
  - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### 4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and

other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

### **Question 7**

***Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.***

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

### **Question 7a**

***Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.***

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of

concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the

less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Future Notifications

**Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:**

Yes, I wish to be notified of future stages of the Local Plan

## Comment

Consultee	Mrs Dorota Collingwood ([REDACTED])
Address	[REDACTED] [REDACTED] Cranbrook TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Dorota Collingwood ([REDACTED])
Comment ID	PSLP_2012
Response Date	30/05/21 11:52
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End ( <a href="#">View</a> )
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Dorota Collingwood
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

**Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.**

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP\_2009, PSLP\_2010, PSLP\_2011, PSLP\_2012 and PSLP\_2013]

#### Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

#### Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

#### Question 5

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

**A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC)** is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

- according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP\_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP\_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP\_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP\_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
  - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
  - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).

- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

## **2. The plan is unsound because of the untimely publication of site allocations**

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP\_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

## **3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

### **Supporting Documents**

- **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
  - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
  - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
  - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
  - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
  - . There is no "pre-school/nursery" as stated in the Overview
  - . There is no "Small shop at hospital" as stated in the Overview
  - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP\_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

#### 4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

**An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.**

**Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

**Biodiversity:** AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP\_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

**Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

**Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

**Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

**Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

## Question 6

**Please note:** In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

**Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question**

**5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

#### **Question 7**

***Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.***

**If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**

No, I do not wish to participate in examination hearing session(s)

#### **Question 7a**

***Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.***

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

#### **Question 8**

**If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.**

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings,

the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).
