We therefore submit that Policies STR/SS1 and STR/SS3 are unsound. These policies cannot be amended to be made sound, so long as the strategy of the proposed Plan is to achieve the required number of additional homes through large-scale development in just two locations, as opposed to a more proportionate expansion of existing sustainable settlements across the Borough. It is not that one or other of these two sites should not be brought forward for development, but that they must be balanced by the provision of more housing on smaller sites in other settlements.

Policy PSTR/LA 1 sets out a strategy for Lamberhurst parish. Point 2 of this policy proposes to build approximately 25-30 new dwellings on land at Spray Hill, which is expanded at Policy AL/LA 1. We have no objection to the allocation of this site for housing and agree that the provision of additional housing in Lamberhurst Down is a sensible approach to providing for housing need in a sustainable location. However, we consider PSTR/LA 1 to be unsound insofar as it follows Policy STR 1 and fails to deliver enough housing across the Borough, for the reasons set out above.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In order to deliver the homes required by the Local Plan consideration should be given to the allocation of Lamberhurst Winery (SHELAA site reference 423) for housing. This site is being brought forward by a SME developer and is proposed to be delivered as soon as possible following the grant of planning permission. Officers have confirmed that the development of part of this site for affordable housing for local people is considered acceptable in principle and a planning application for this element is to be submitted imminently. This could serve as a first phase for the wider development of the site.

Policy PSTR/LA 1 should be modified to include the allocation of around 125 dwellings at Lamberhurst Winery (SHELAA site reference 423) and an additional allocation policy should be included (AL/LA 2) for the allocation of this site.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to clearly set out the case for an appropriate approach to housing allocations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

STRATEGIC POLICIES

Policy STR1 The Development Strategy

We support the broad development strategy for Tunbridge Wells set out in the policy and in particular part 3b which promotes the creation of a new garden settlement at Tudeley Village. Further detail in support of this allocation is provided in Section 5 of this document.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: Report attached as Supplementary Information]

Question 4

Do you consider that the Local Plan:

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having reviewed the broad strategy contained in this policy, we note that the Council continues to be heavily reliant on delivery of housing around Paddock Wood, which includes an entire new settlement at Tudeley Village on the Hadlow Estate, between Tonbridge and Paddock Wood. Tunbridge Wells, the largest settlement in the district, is only allocated 1,416 to 1,536 new homes.

Meanwhile allocations in smaller sustainable settlements are restricted even more significantly. Benenden has received allocations for 87-95 (plus 23 which already have planning permission), which is decrease from the previously drafted allocated allowance of 119-129 new homes, due to the decision to drop one site from the allocations because it has already been delivered.

The Pre-submission Draft Local Plan policy STR1 identifies development allocations as follows:

- . **Paddock Wood and surrounding area** (around 4,000 new homes at Paddock Wood and an entire new settlement at Tudeley Village on the Hadlow Estate of 2,800 of which 2,100 are to come forward during the plan period).
- . **Tunbridge Wells**, the largest settlement in the district, is only allocated 1,416 to 1,536 new homes
- . **Other settlements** have been allocated sites at various levels in accordance with their sustainability credentials and opportunities. For example, Cranbrook and Sissinghurst have

received allocations for 415-429 new dwellings, whereas Bidborough has not received any allocations. Benenden has received allocations for 87-95 new homes (a reduction on the previous draft plan).

We are not persuaded that this strategy is likely to ensure delivery at the levels the NPPF requires. NPPF states at paragraph 59 that the government's objective is to 'significantly boost the supply of homes' and elsewhere the NPPF makes clear that it is not just the allocation of sites, but their delivery which is crucial. In this regard we have concerns that such a large proportion of the Borough's housing allocations have been concentrated in such a small part of the Borough and on large sites. Since large sites are known to be vulnerable and volatile to non-delivery in economic down turns, this approach seems to be flawed and likely to place the strategy at risk.

The NPPF (paragraph 68) states that '*small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly.*' In supporting small and medium sites to come forward, the NPPF requires LPAs to ensure that (a) at least 10% of their housing requirement is on sites no larger than one hectare; and (c) '*support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using sustainable sites within existing settlements for homes*'.

By relying on a few large sites for such a large proportion of the housing supply in the Paddock Wood market (over 50% of the Borough's 7,221 housing allocations required), we remain concerned that this strategy is likely to prove highly vulnerable to obstacles to delivery, should the market experience a downturn or volatility. This is not consistent with the aims of NPPF.

Whilst we do not object to the allocation of these larger sites, to guard against non-delivery the Council should consider allocating far more small and medium sized sites and scheduling to expect a slower rate of delivery on these large sites, in accordance with national planning policy. This will effectively allow for some dips in the market and downturns, in such a way that delivery of the overall housing target is not compromised. We also consider that the policy fails by not providing sufficient support to windfall development, as is required by paragraph 68 (c) of the NPPF, and is therefore in **conflict with the NPPF** on this point.

We consider that the Local Plan is comprised and at risk of being found to be unsound, without an increase in small and medium sized sites being allocated and less reliance on the large sites around Paddock Wood and without more support being provided for windfall development.

See attached report for a full explanation of these reasons.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Amendments

We object to point 2 of policy STR 1, which states that the Local Plan '*Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan.*' We consider that this clause could be improved to offer greater flexibility for the consideration of windfall development on brownfield sites in locations outside of the Built Development of settlements, if it were expanded to state:

*'Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan. **Where there is a***

housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development’.

In terms of the wording of the policy, we also object to point 9 of policy STR 1, which states that the Local Plan ‘normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary.’

We believe that, in the light of the Council’s heavy reliance on large sites in the Paddock Wood area for the vast majority of housing delivery, the overall soundness of the policy will be improved if the clause were expanded to state the following:

*‘normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary. **Where there is a housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development’.***

We consider that, given the undersupply in the Borough, the LPA should consider including circumstances in which windfall housing development would be supported outside of the existing development limits. Given the encouragement of brownfield development within the NPPF, we consider that the LPA should include a clause which supports such development, in circumstances where housing delivery falls below the required supply, as suggested above.

This would open up development options on brownfield sites in accordance with NPPF’s preference for brownfield delivery and would assist against concerns regarding the non-delivery of large allocated sites in an economic downturn.

Regarding paragraph 8 of policy STR1, we note that the Local Plan will aim to ‘*limit development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale, only promoting larger proposals where exceptional circumstances are demonstrated*’. We support this change from the previous draft of this policy. Given the scale of the housing crisis and the need to ensure delivery of housing across the Borough, we welcome that this clause has been amended to be more flexible and to be explicitly supportive of developments which are not ‘major’ developments. We consider that the paragraph could be further improved by stating that brownfield developments will be especially supported.

We suggest a revision as follows:

*‘limit development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale (**less than 20 homes**), only promoting larger proposals where exceptional circumstances are demonstrated **and/or where development is on brownfield land**’.*

We consider that these suggested revisions will bring the plan more into line with the NPPF which requires Local Plans to support brownfield development, ensure the delivery of housing (not simply allocated sufficient sites) and be ‘positively prepared’, ‘justified’, ‘effective’ and ‘consistent with national policy’ (paragraph 33). Such amendments will place the plan in a better position for its Examination.

Summary

We would also support policy STR1, if it were amended to include less reliance on the new settlement and Paddock Wood sites and a greater proportion of smaller sites across the Borough. However, in addition we have also recommended the following amendments, to ensure that the plan is positively prepared and effective, even if the Council continues to rely on such large sites to deliver its housing strategy:

*‘(2) Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan. **Where there is a housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development’.***

*‘(8) limit development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale (**less than 20 homes**), only promoting larger proposals where exceptional circumstances are demonstrated **and/or where development is on brownfield land**’.*

*'(9) Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary. **Where there is a housing need, or housing delivery is falling below the required housing supply, windfall development will be supported on brownfield sites outside of the Limits to Built Development**.'*

These amendments would help guard against non-delivery of the larger sites that the plan relies on, should there be a downturn in the housing market. These suggestions will improve the deliverability of the Council's housing targets. We also consider that these amendments will bring the policy more into line with the NPPF (particularly paragraph 68 (c)) and without this change the policy risks being in **conflict with the NPPF**.

Overall, we consider that the Local Plan is comprised and at risk of being found to be **unsound**, without an increase in small and medium sized sites being allocated and less reliance on the large sites around Paddock Wood and without more support being provided for windfall development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Hams Travel has an excellent site to be considered locally and since there is a legally challenge in place on their site in Flimwell, any updates on that site may add to the strength of the case for the allocation of the Benenden site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided into Policy STR/CRS1 (PSLP_2032), Vision and Strategic Objectives (PSLP_2034) and Policy STR1 (PSLP_2036)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Heyworth Properties Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Heyworth Properties Ltd have an option and "promotion agreement" on the land at Quaker Lane, which was allocated within the Reg 18 Draft Local Plan, but not carried forward within the Reg 19 Local Plan. This is a matter in which we return to. The land is owned by KCC and the County Authority are looking to replace the existing nursery building/facility and to generate a capital receipt for re-investment in other facilities locally.

1.1.3 In addition to this, Heyworth Properties are looking to deliver a high quality scheme that accords with the draft Policy in the Regulation 18 Plan, including the delivery of much needed affordable housing.

[TWBC: for Figure 1: Site Location (Courtesy of Kent Design Partnership) see full representation attached]

1.1.4 The 2.3hectare site is located some 630 metres to the north of the centre of Cranbrook, with residential development to the north and west, a school to the south and school sports fields to the east. The site appears as part of the somewhat "sub-urban" character of this part of Cranbrook and is a very natural extension to the settlement that can be achieved without material harm to the character and appearance of the AONB.

1.1.5 The surrounding area to the north contains the Cranbrook Rugby Club and beyond that open agricultural land. To the south lies the main built-up area of Cranbrook.

1.1.6 According to Tunbridge Wells Borough Council Policy Map, the site falls entirely within the High Weald Area of Outstanding Natural Beauty (AONB) and currently lies outside the Limits to Built Development.

1.1.7 Based on the current national and local planning context, we consider the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High

Weald Area of Outstanding Natural Beauty ('AONB'). Moreover we consider that deletion at Regulation 19 stage was without reason, and that the site was removed from the Local Plan, and other "replacement" sites, included without evidential base and justification. Such action has meant that sites have not been selected on a consistent basis and that the replacement sites have been added at Regulation 19 stage without due consideration.

1.1.8 We also take this opportunity to comment on wider aspects of the Local Plan, a plan which we consider fails the tests of "soundness".

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the Borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes. On the face of it we consider it unlikely that the plan should be able to be considered "sound".

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4 Development Strategy and Strategic Policies (Policy STR1)

1.4.1 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.2 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.3 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.4.4 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.5 At Regulation 18 stage the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version and as such

requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: PSLP Figure 5 Key Diagram has been duplicated here - see full representation attached]

1.4.6 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 wording has been duplicated here - see full representation attached]

1.4.7 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.8 Cranbrook is said to be an attractive, vibrant rural town located within the High Weald AONB in the eastern part of the borough. The local architecture and features, such as the Cranbrook Windmill and nearby Sissinghurst Castle, give it a distinctive character. Cranbrook also benefits from a good range of independent shops, a supermarket, secondary schools, a sports centre, and other local services and facilities.

1.4.9 Cranbrook and Hawkhurst both provide a range of services for their surrounding rural areas. They may grow in line with maintaining their roles, but this needs to be very sensitive to the high quality of their natural and built environments, as highlighted by their setting within the High Weald AONB and the conservation area designations of their historic cores.

1.4.10 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached]

Response

1.4.11 Our client agrees that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.12 In respect of the wider strategy, our client supports the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area.

1.5 AONB Release

1.5.1 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.5.2 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;

(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and (3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.5.3 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.5.4 With the above criteria in mind, our clients consider there to be clear evidence of an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the

previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.5.5 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.5.6 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

- Ancient Woodland (approximately 16% of the borough)- Circa 60 Local Wildlife Sites (approximately 11% of the borough)- Ten Sites of Special Scientific Interest (SSSI)- Five Local Nature Reserves (including one Community Woodland)- One Regionally Important Geological Site, at Scotney Castle Quarry.

1.5.7 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.5.8 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.5.9 Given the above constraints, planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.6 Housing Delivery

1.6.1 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.6.2 It is a fact that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about whether a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.6.3 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area. Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for Housing completion rates 2010 to 2015 see full representation attached]

1.6.4 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.6.5 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]

1.6.6 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.6.7 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents.

1.6.8 Taking Paragraph 68 of the NPPF into account, which is clear that small and medium sized sites make an important contribution to meeting the housing requirements of an area and are often built out quickly, we consider the site in discussion needs to be carefully considered, especially when noting the LPA's shortfall of housing delivery.

1.7 Case for the Site

1.7.1 The site was allocated within the Tunbridge Wells draft Local Plan (August 2019) for residential development (Policy AL/CRS 5), 'providing 35-45 dwellings, replacement children's nursery, and safeguarding of land for future primary school expansion'.

1.7.2 While we note that the site was recently removed at Regulation 19 stage, we understand that this was solely due to concerns in respect of an assessment that access arrangements could give rise to a harmful visual impact and erode the sylvan quality of Angley Road.

1.7.3 Planning application ref: 21/00519/FULL was submitted 25th February 2021 and notwithstanding the recent refusal we consider that the proposal as presented can be delivered without material harm to the AONB.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Heyworth Properties Ltd in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Comment

Consultee	Ms Claire Tester ([REDACTED])
Email Address	[REDACTED]
Company / Organisation	High Weald AONB Unit
Address	- - -
Event Name	Pre-Submission Local Plan
Comment by	High Weald AONB Unit (Ms Claire Tester [REDACTED])
Comment ID	PSLP_1434
Response Date	04/06/21 13:10
Consultation Point	Policy STR 1 The Development Strategy (View)
Status	Processed
Submission Type	Email
Version	0.9
Files	PSLP_1434_High Weald AONB_SI.pdf
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	High Weald AONB Unit
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, AL/HA 4, AL/PE 1, AL/PE 2 and AL/PE 3 – see Comment Numbers PSLP_1434, PSLP_1440, PSLP_1441, PSLP_1442 and PSLP_1443]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

HWAONB Unit Representation on STR1 – The Development Strategy

1.0 General Comments

1.1 The High Weald AONB Unit acknowledges that Tunbridge Wells Borough Council has sought to address the Unit's previous representations in its preparation of the Regulation 19 Local Plan. In particular we welcome the following:

- The assessment of whether potential allocation sites in the AONB constitute major development, and whether they meet the NPPF 172 tests;
- The reduction in the number of major development sites in the AONB and the reduction in the scale of some of the sites retained; and
- The amendments to a number of development management policies in response to the Unit's comments at Regulation 18 stage.

1.2 However, the Unit remains concerned about the overall level of development being proposed within the AONB and the impact of the retained major development sites. Whilst it appreciates the additional evidence the Borough Council has produced to justify these sites (such as the Landscape and Visual Impact Assessment, the AONB Setting Analysis Report and the Grassland Survey) it has significant issues with the assumptions and outcomes of these studies. The following statement sets out why the Unit believes that this approach is not justified and is contrary to national policy and guidance. It also explains why it believes that the proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated.

2.0 The High Weald AONB

2.1 The High Weald was designated in 1983 as an Area of Outstanding Natural Beauty. It is an exceptionally beautiful medieval landscape covering 564 square miles across the counties of East and West Sussex, Kent and Surrey.

2.2 The High Weald AONB Joint Advisory Committee was established in 1989 and is a partnership of 15 local authorities, Defra, Natural England and organisations representing farming, woodland, access and community interests. The JAC is responsible for publishing and monitoring the statutory AONB Management Plan. The JAC is supported by a small, dedicated staff team, the High Weald AONB Unit, which provides advice on how to conserve and enhance the AONB. The advice provided by the AONB Unit assists public bodies and statutory undertakers to meet their duty as set out in Section 85 of the Countryside and Rights of Way Act 2000 to have regard to the purpose of conserving and enhancing the natural beauty of AONBs in making decisions that affect it.

2.3 The High Weald AONB Unit is an advisory body not a local planning authority and it has no statutory powers. The AONB Unit is not a statutory consultee on planning matters, but offers advice based on the statutory High Weald AONB Management Plan, which has been adopted by all partner authorities, as 'their policy for the management of the area and for the carrying out of their functions in relation to it'.

3.0 National Policy and Guidance in Relation to AONBs

3.1 The National Planning Policy Framework (NPPF) paragraph 172 requires great weight to be given to conserving and enhancing landscape and scenic beauty in Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas. The scale and extent of development within these designated areas should be limited.

3.2 In the event that the decision-maker concludes that development is 'major' in terms of its impact on the AONB, paragraph 172 of the NPPF states that "Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated".

3.3 Footnote 55 says: "For the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined".

3.4 NPPF paragraph 11 explains the presumption in favour of sustainable development. It says that local planning authorities should provide for objectively assessed needs for housing and other uses, as well as any unmet needs from neighbouring areas, unless **"the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"**. The assets referred to are listed in footnote 6 and include Areas of Outstanding Natural Beauty. The most relevant policy in the Framework for AONBs is paragraph 172 as above.

3.5 Planning Practice Guidance, revised July 2019, states "The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. Effective joint working between planning authorities covering designated and adjoining areas, through the preparation and maintenance of statements of common ground, is particularly important in helping to identify how housing and other needs can best be accommodated..." Paragraph: 041 Reference ID: 8-041-20190721.

3.6 On 16 December 2020 the government announced how it would be responding to widespread concern about its proposals to amend the standard method for calculating housing need. This response confirmed that the Government would not be progressing these changes, but rather would be retaining the existing standard method for most local planning authorities and boosting supply by increasing the housing numbers of the 20 largest cities in England by 35%. The Government's response included the following statements:

"we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. **We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.** But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and green spaces communities most value".

"Many respondents to the consultation were concerned that the 'targets' provided by the standard method were not appropriate for individual local authority areas. **Within the current planning system**

the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity”. 3.7 The above statements do not change existing policy, but reaffirm the existing situation in the NPPF that the housing need numbers produced by the standard method are just a starting point and not a target. 70% of Tunbridge Wells borough is within the High Weald AONB, and yet, the Regulation 19 Local Plan is predicated on the Borough Council meeting its full housing need figure of 678 dwellings per year, or some 12,200 over the plan period of 2020 to 2038. This has severe repercussions for the AONB and prevents the Local Plan from conserving and enhancing its natural beauty.

5.0 Major Development in the High Weald AONB

The Major Development Sites

5.1 Appendix 2 and 3 of the Development Strategy Topic Paper provides the justification for why some of the proposed allocation sites have been considered ‘major development’ in the terms of paragraph 172 of the NPPF and some are not. This assessment has been carried out in a transparent way, and the NPPF makes it clear that whether a development is major or not is a matter for the decision-maker.

5.2 The sites identified as major are as follows:

AL/RTW16 Land at Spratsbrook Farm	120 dwellings (As the developable part of the site is outside the AONB it is considered that this should be treated as a site in the setting of the AONB rather than major development within it)
AL/RTW17 Longfield Road, Tunbridge Wells	80,000sqm employment
AL/CRS1&2 Brick Kiln Farm & Corn Valley	215-225 dwellings
AL/CRS3 Turnden, Cranbrook	200-204 dwellings
AL/HA1 The White House, Hawkhurst	43
AL/HA4 Copthall Avenue, Hawkhurst	70-79 dwellings
AL/BM1 Maidstone Road, Brenchley	210-220 dwellings
AL/PE1,2&3 Pembury	45 dwellings
903-936 dwellings	

5.3 Some of the above sites already have status in the planning system as follows:

- AL/CRS1&2 Brick Kiln Farm & Corn Valley: These sites were allocated in the 2016 DPD and 180 dwellings at Brick Kiln Farm has outline planning permission;
- AL/CRS3 Turnden, Cranbrook: 36 dwellings already granted full planning permission on the farmstead part of the site;
- AL/HA1 The White House, Hawkhurst: planning permission already granted for 43 retirement apartments;
- AL/BM1 Maidstone Road, Brenchley: outline and reserved matters permission already granted for 45 dwellings.

5.4 The dwellings proposed on major development sites in the AONB with no current planning status are:

- AL/CRS3 Turnden, Cranbrook 164-168 dwellings
- AL/HA4 Copthall Avenue, Hawkhurst 70-79 dwellings
- AL/PE1,2&3 Pembury 210-220 dwellings
- **Total 444-467 dwellings**

5.5 It should be noted that option GS2 in the Sustainability Appraisal assumes that reducing development below the housing need to one that does not involve any major development in the High Weald AONB would result in the scale of housing being reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526). It is not clear where this number comes from. It is the Unit's understanding that sites already allocated in an adopted Plan or granted outline or full planning permission would go ahead even if all major development sites in the AONB were removed from this Local Plan. Therefore the reduction in housing numbers would be 444-467 dwellings, or about 4% of 11,526.

The Major Development Tests

5.6 As quoted in paragraph 3.2 above, NPPF 172 says that “Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest” and provides a number of tests for the consideration of

such applications. Whilst the wording of this paragraph does not refer to allocations at the plan-making stage, if these tests are not applied at this stage there is a significant risk that allocations will not be deliverable, which would conflict with the test of soundness on effectiveness.

5.7 The Unit believes that the proposed major development allocations fail the NPPF 172 tests for the following reasons:

- **The need for the development:** the Borough Council argues that the high housing need for the area necessitates major development in the AONB. However, this argument is circular. If the conservation and enhancement of the AONB was given great weight as required by NPPF 172 then the housing requirement figure for the Borough would be adjusted downwards to reflect the fact that 70% of the area is AONB, and there would be no 'necessity' to locate large amounts of development within the AONB.

- **Developing outside the designated area, or meeting the need for it in some other way:** Even if it is necessary to allocate some development within the AONB that does not mean that such provision should be in the form of major development sites. As explained below, the High Weald landscape is small scale in character and can accommodate small scale development successfully without damaging its natural beauty.

- **Any detrimental effect on the environment:** this is explored in more detail below.

The Impact of Major Development on the AONB

5.8 National policy and legislation requires decision-makers to have regard and give great weight to conserving and enhancing the natural beauty of AONBs. In the High Weald this natural beauty is defined in the AONB Management Plan's Statement of Significance, which identifies five defining components of character that have made the High Weald a recognisably distinct and homogenous area for at least the last 700 years.

1. Geology, landform and water systems – a deeply incised, ridged and faulted landform of clays and sandstone with numerous gill streams. 2. Settlement – dispersed historic settlement including high densities of isolated farmsteads and late Medieval villages founded on trade and non-agricultural rural industries. 3. Routeways – a dense network of historic routeways (now roads, tracks and paths). 4. Woodland – abundance of ancient woodland, highly interconnected and in smallholdings. 5. Field and Heath – small, irregular and productive fields, bounded by hedgerows and woods, and typically used for livestock grazing; with distinctive zones of lowland heaths, and inned river valleys.

Other equally important characteristics are also identified in the Management Plan under sections on the land-based economy and related rural life and 'other qualities'.

5.9 The objectives for the settlement component are:

- Objective S1: To reconnect settlements, residents and their supporting economic activity with the surrounding countryside;
- Objective S2: To protect the historic pattern and character of settlement;
- and • Objective S3: To enhance the architectural quality of the High Weald and ensure development reflects the character of the High Weald in its scale, layout and design.

5.10 One of the actions for objective S2 is to "Seek to prioritise the delivery of new housing primarily through small-scale development and a mix of housing sizes that responds to local needs". Small scale carefully designed development can be accommodated successfully in this landscape whilst retaining its character, but large-scale developments are much more challenging to integrate successfully without detrimental effects. It is the view of the High Weald AONB Unit that major development cannot be accommodated within the AONB without damaging the essentially human scale character of the area or the purposes of the designation.

5.11 The 5 core components derive from the natural geology, topography and soils of the area and how people have used them over the centuries. Unlike the historically communally farmed landscapes of the Midlands which the national planning system is based on, the High Weald does not have nucleated towns and villages that are separated by open unoccupied countryside where any development would be 'isolated'. Instead it is based on a high density of medieval farmsteads most of which were farmed 'in severalty' – that is by individual families rather than as part of wider estates or communal systems. They were dispersed across the High Weald, surrounded by enough land to support a family and managed as mixed farms to suit the soil conditions and topography and to maximise self-sufficiency. Trees and hedges were an important component of the farming systems and fields were often carved out of woodland by hand (assarts) resulting in their characteristic small and irregular

shape. The challenging topography and soil conditions, which are suited to growing trees and grass rather than crops, mean that the High Weald has retained its Medieval character, with its small fields and woodland shaws, and its high density of historic routeways.

5.12 This history is important because it explains the human scale of the landscape components which comprise the natural beauty of the High Weald and the importance of the dispersed settlement pattern created by the farmsteads. Hamlets, villages and small towns evolved in the late Medieval period and onwards at the intersection of routeways and around commons to facilitate trading between farmsteads and the creation of small industries and crafts. Whilst these settlements are more consolidated, many have farmsteads on their outskirts and it is particularly important to maintain the separation between these two different settlement types so that the historic landscape remains legible for future generations. Continually adding to the larger villages and towns threatens this historic character, especially when it subsumes these adjacent farmsteads. Large-scale developments sit uncomfortably in this landscape because they overlap historic field systems and dominate the small scale historic settlement pattern. Whilst retaining field boundaries and historic features within new developments is important, it cannot overcome the basic incompatibility of locating large scale development within such a small scale landscape. It therefore inevitably fails to conserve and enhance the natural beauty of the AONB.

Landscape and Visual Impact Assessment

5.13 Following the Regulation 18 consultation the Borough Council commissioned Hankinson Duckett Associates to undertake a Landscape and Visual Impact Assessment of 21 potential allocation sites in the AONB. The AONB Unit was consulted on the brief to these consultants but not on the outcome of the work.

5.14 Appendix B to this submission identifies the detailed concerns with this work. Whilst it has a particular focus on the proposed site at Turnden, the concerns about the overall approach apply to all of the major development sites proposed in the AONB in the Regulation 19 Plan. These can be broadly summarised as follows:

- The Assessment consistently downgrades impact on the AONB;
- The imprecise method encourages operator bias and its opaque nature discourages scrutiny;
- The site assessments are inconsistent, partial, unsubstantiated and peppered with loaded phrases;
- There is a visual bias across the assessments with the impact on landscape as a resource being significantly underplayed;
- The cumulative effects of development under each site assessment section do not deal in specifics and when they do they focus almost entirely on visual effects – separation, viewpoints and planting – rather than landscape effects such as the loss of soils; field systems and their potential for biodiversity or food production; rurality, dark skies, tranquillity or other perceptual qualities.

5.15 For the reasons detailed above and in Appendix B it is considered that this LVIA should not be relied upon and it should be accepted that major development within the AONB will have a severe detrimental impact on the natural beauty of the High Weald.

6.0 Development in the Setting of the AONB

6.1 Even if Growth Strategy 2 was followed and the uncommitted major development sites in the AONB removed from the Local Plan, the remaining growth proposed would still have a significant impact on the designated area. This is because only 30% of the Borough is outside of the AONB so attempting to meet all or nearly all of the housing need figure puts tremendous pressure on this area, including where it abuts or is close to the AONB boundary. Developments outside but affecting the AONB include:

- Paddock Wood / land east of Capel Parish 3,490-3,590 dwellings
- Tudeley Garden Village 2,800 dwellings
- Horsmonden 240-320 dwellings
- Spratsbrook Farm, Tunbridge Wells 120 dwellings
- Benenden Hospital 47-50 dwellings

6.2 The Borough Council commissioned Hankinson Duckett Associates to produce an 'AONB Setting Analysis Report'. Whilst the work that has gone into this study is appreciated, the Unit was not consulted on its methodology or outcomes. The study focuses primarily on the inter-visibility of developments and direct impacts and does not address the wider impacts of accommodating this level of growth so close to the boundary of the AONB. These impacts include:

- Increased visitor numbers to the AONB placing pressure on its recreational facilities and infrastructure;
- Increased traffic travelling through the AONB to access the new developments and the highway 'improvements' required to accommodate this;
- Loss of tranquillity arising from the above;
- Increase

in air pollution arising from the above;• Light pollution from developments on the edge of the AONB and from highway improvements which require to be lit.

6.3 The above impacts would be reduced if the overall housing number was reduced to reflect the 70% of the Borough which lies within the AONB rather than trying to meet the full housing need by squeezing as much as possible into the remaining area. This statement focuses on the impact of this strategy on the AONB because that is the Unit's remit. However, this does not mean we are blind to the devastating impact of the planned level of growth on the area outside of the AONB, much of which is Green Belt and/or Low Weald countryside which is highly valued by its residents.

7.0 Conclusion

7.1 The High Weald AONB Unit believes that the overall level of development proposed and the major development sites allocated in the AONB are not justified and are contrary to national policy and guidance. The proposed development strategy of the Local Plan would have a severe detrimental impact on the purposes for which the AONB was designated and would fail to conserve and enhance this national asset. It is therefore recommended that there is a reduction in the overall housing figure and that all the major development sites in the AONB be deleted from the Local Plan.

[TWBC: see supporting document attached]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Reduction in overall housing figure to reflect the need to limit development due to the high proportion of the Borough in the AONB and the deletion of all major development sites in the AONB.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To advise the Inspector on matters relating to the High Weald AONB. The Partnership is the body with responsibility for advising those with a duty to have regard to conserving and enhancing the AONB under Section 85 of the Countryside and Rights of Way Act.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.0 The Sustainability Appraisal

4.1 The Sustainability Appraisal is the main tool by which the Borough Council assesses the options for the level of growth and its distribution, and selects its development strategy. NPPF paragraph 32 says that "Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements" and paragraph 35 says that Plans are 'sound' if they meet the tests, including "Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence".

4.2 The Sustainability Appraisal for the Regulation 19 Local Plan assesses a number of growth options against sustainability objectives. Appendix A to this statement shows the scores and commentary for two of these options:

- GS13 - The strategy reflected in the Regulation 19 Local Plan; and
- GS2 - A strategy which reduces development below the housing need to one that does not involve any major development in the High Weald AONB.

This exercise has been carried out to understand the reasoning behind the selection of the Local Plan strategy compared to the option that most closely aligns to the AONB Unit's position, albeit it doesn't address its concerns about the impact of overall levels of growth on the setting of the AONB.

4.3 Appendix 1 demonstrates the following:

- That the economic objectives are double-counted in the assessment by the application of two objectives on business growth and employment and no account is taken of the benefit the AONB brings to the tourism industry;
- That the perceived impact of strategies on areas of deprivation is double-counted in the assessment by the application of two objectives on health and deprivation and no account is taken of the need for such areas to have good access to the countryside which would be lost to major development under GS13;
- That the assessment of the impact of option GS2 on climate change is clearly incorrect and conflicts with the commentary. This option will be much more positive for the climate change objective than GS13, not just because of reductions in transport and carbon emissions from new dwellings but due to the carbon sequestration function of soils and natural habitats;
- The heritage score for GS2 should be positive to reflect the heritage value of the landscape itself (medieval field systems etc) which would be impacted less under GS2 than GS13. Heritage is not just about listed buildings and conservation areas;
- Whilst it is agreed that GS2 would have a less positive impact on housing than GS13, the suggestion that building more dwellings in the AONB would reduce house prices is unsubstantiated and goes against known evidence. To meet housing needs in the AONB requires more genuinely affordable housing not more £300k+ houses. It is also noted in paragraph 5.5 below that the reduction in housing numbers for this option appears to have been over-estimated, which would affect the relative scores for this objective;
- Landuse - this objective is supposed to be about protecting soils, and reusing previously developed land and buildings. Instead the scoring seems to focus on impacts on the greenbelt. Since most of the major development sites in the AONB are on greenfield land GS2 should score much more positively than GS13;
- The landscape score for GS2 should be much more positive because it significantly reduces the harm to the AONB, which has the highest planning status in respect of landscape and scenic beauty. This is the only objective which mentions the AONB, and does so alongside all other landscape impacts, diluting its importance in the overall assessment of sustainability whereas the NPPF requires that AONBs be given 'great weight';
- Travel - As the only difference between GS2 and GS13 is the omission of major development sites in the AONB, which as the commentary says will be in areas where alternative transport modes are not popular or viable, the score for GS2 should be more positive for the travel objective than GS13 rather than the opposite as shown.
- Water - If the score is not significantly affected by reduction in growth in the AONB as per the commentary then it should be the same for GS2 and GS13.

4.4 If the above inaccuracies and inconsistencies in the scoring were corrected then GS2 would score more positively overall than the strategy selected for the Regulation 19 Local Plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: Representations made against STR 1, STR 5, EN2, EN 3, EN 9, H 3, H 6 and H 8 - See PSLP_885, PSLP_892, PSLP_894, PSLP_896, PSLP_897, PSLP_898, PSLP_900 & PSLP_901]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

STR 1 – The Development Strategy

This policy is unsound as it is insufficiently flexible to ensure needs will be met in full.

The housing requirement

2. Using the standard method, Tunbridge Wells Borough Council (TMBC) consider their local housing needs assessment (LHNA) to be 678 dwellings per annum (dpa). The HBF would agree that this is the minimum number of homes that the Council should be planning for. However, as established in paragraph 60 of the NPPF this is a minimum and there will be circumstances where Councils will need to set a housing requirement above the assessment of need resulting from the standard method. The first such scenario is set out in paragraph 60 itself which states that in addition to the LHNA any needs that cannot be met in neighbouring areas should also be taken in to account.

3. Whilst the Council have noted the difficulties faced by Sevenoaks in meeting their needs the Council do not appear to have noted in the Duty to Co-operate Statement the fact that there are unmet needs in Rother nor the wider regional concern that London will not meet its own housing needs over the next ten years. With regard to Rother the Council note at paragraph 2.45 of the Housing Needs Assessment Topic Paper that there is no indication of unmet needs in Rother on the basis that they are yet to undertake substantive work on a new local plan.

However, Rother's local plan was adopted in September 2014 and as such those policies relating to housing delivery in that plan must be considered out of date as it is older than five years and has not been reviewed. In this situation paragraph 68-005 of PPG applies which states that in such circumstances:

“...the 5-year housing land supply will be measured against the area's local housing need calculated using the standard method.”

As such the annual housing requirement for Rother moving forward is the local housing needs assessment as calculated using the standard method. As we will set out below the increased requirement in Rother will mean a shortfall in delivery that must be addressed. Using the standard method with a base period 2020 to 2030, will require Rother to deliver 728 dpa. Whilst we recognise the delivery of new homes in Rother is expected to increase from 2024/25, resulting in the delivery of an additional 4,384 homes between 2020 and the end of their plan period, there would still be a shortfall of 1,440 homes against their local housing needs assessment. In particular we are concerned that it is over the next 5 years during which this shortfall will arise.

4. The housing requirement for Rother over the next 5 years using the standard method is 3,640 homes. However, between 2020 and 2025 Rother only expect to deliver 2,386 homes. This is a shortfall of 1,254 homes during this five-year period which as far as we are aware is not being addressed elsewhere in the region. Whilst a new local plan for Rother could deliver an increase in housing to address unmet needs it is unlikely to do so in the next 5 years given the lack of urgency with which Rother is undertaking its planned review it is necessary for neighbouring areas to consider how these needs can be addressed.

5. Secondly, there appears to be no consideration as to the level of unmet needs arising in the Capital. During the preparation of the London Plan the Mayor, London Boroughs and Council's across the wider South East were adamant that London would 'consume its own smoke' with regard to housing needs. However, even on publication this was not the case with the London Plan showing a shortfall of some 10,000 homes between 2018 and 2028. This situation has now worsened as the examination of the London Plan highlighting significant shortcomings in the Mayor's estimations as to the supply development lands within the Capital, and in particular the outer London Boroughs.

6. The examination report on new London Plan was published in October 2019 and outlines in paragraph 174 that the overestimation of the contribution of small sites reduces the supply of new homes from 65,000 to 52,000 homes per annum. This means that there is a shortfall of some 140,000 homes between 2018 and 2028 in the capital against its own assessment that the capital needs to deliver 66,000 homes each year across the plan period to meet future need and address the current backlog. We could not find any reference to these needs in the Council's evidence and given London borders the housing market area within which TMBC is located it is essential that these be taken into account when setting the Council's housing requirement.

Housing supply

7. Over the plan period the Council expect to deliver 13,250 homes to meet their minimum need of 12,204 homes. Whilst this provides an additional supply of around 1,000 homes the HBF do not consider this to be sufficient for two reasons. The first reason that this is not sufficient given the level of affordable housing needs identified by TWBC and the second being the reliance on strategic sites from 2025 onwards could place delivery at risk should these sites be delayed.

8. With regard to meeting affordable housing needs Planning Practice Guidance (PPG) notes at paragraph 2a-024 that:

"The total affordable housing need can then be considered in the context of its likely delivery as a proportion of mixed market and affordable housing developments, taking into account the probable percentage of affordable housing to be delivered by eligible market housing led developments. An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes."

As such it is important that Councils consider whether further allocations are possible to better meet their need for affordable housing. The Council's Housing Needs Study from 2018 establishes that 443 new affordable homes to be provided each year to meet the need for such homes in Tunbridge Wells in future and address current backlog within five years. Meeting the backlog over the plan period affordable housing needs are estimated to be 391 dpa. However, the Council will not meet this either assessment of affordable housing need. The Council estimates, as set out in table 10 of the Housing Supply Topic Paper, that it expects to deliver 224 affordable homes per annum – some 170 homes short of stated needs. Further allocations of sustainable and suitable sites should therefore be considered if these would enable more affordable housing to be provided in the Borough.

9. Moving to overall supply, consideration needs to be given to the degree to which the Council are reliant on strategic sites to meet needs and whether there is sufficient flexibility should there be delays in the delivery of these sites. The HBF is supportive of the strategic allocations that have been included in this local plan. Strategic sites such as these provide opportunities to meet development well into the future. However, their scale and complexity does mean that timescales for delivery can slip and as such there can be a risk of the housing requirement not being met without a more substantial buffer in supply being provided.

10. In considering the speed at which sites can come forward it is helpful to examine the Lichfield report Start to Finish¹. The latest edition of this report outlines not only the timescales it takes for larger sites to commence and the rate at which such sites deliver new homes but also the variability between sites. With regard to when the first home will be delivered figure 4 from the report shows that the

average planning approval period for those sites of 2,000 or more units in the study was 6.1 years with 2.3 years between approval and first delivery. However, this is an average with some sites delivering more quickly and some being considerable slower to move through the planning process. Similarly build out rates vary significantly. Table 4 and Figure 8 of Start to Finish show that sites of more than 2,000 homes deliver on average 160 units per annum with average delivery ranging from 50 dpa to around 300 dpa.

11. It is therefore important to recognise that there is potential for the larger sites allocated by the Council to deliver at the rates suggested but there is also the possibility that delivery will commence later than expected and at lower build out rates. As outlined above this local plan expects supply to be some 1,000 homes more than needs, around an 8% buffer. However, from 2025 supply from the two strategic sites at Tudeley Village and Paddock Wood are expected to provide 64% of total supply. As such any delays as to when development commences on these sites, or slower than expected delivery, will compromise the Council's ability to meet needs in full. The NPPF establishes in paragraph 11 that local plans should be sufficiently flexible to adapt to rapid change and at present we do not consider this to be the case with regard to this local plan.

12. In order to provide the necessary flexibility required by the NPPF the HBF considers a 20% buffer between the housing requirement and expected supply over the plan period. This level of additional planned supply above the requirement would ensure that there is sufficient scope within the plan to take account of any unexpected delays in delivery. In particular it is important to ensure supply in the early years of the plan remains flexible and can take account of any delays so we suggest more smaller sites are allocated that will come forward in the first five years of the plan. A 20% buffer would also increase the potential for the Council to improve the level of affordable housing delivered in the plan period and better meet the needs of its residents.

13. The need for such a buffer to provide flexibility and increase the supply of affordable homes can also be considered as exceptional circumstances to support further amendments to the Green Belt boundary. The Council set out in the Development Strategy Topic Paper the exceptional circumstances required to support amendments to the Green Belt boundary and we would agree with their assessment. However, there is an acute need for affordable housing in Tunbridge Wells alongside the poor affordability of accommodation that we would consider to be sufficient to promote further amendments to allocate sites that would provide sustainable development opportunities to provide both market and affordable housing. Indeed, the principle of amending Green Belt boundaries to deliver housing growth beyond minimum requirements has been considered recently in Compton Parish Council & Ors v Guildford Borough Council & Ors. [Case Number: CO/2173/2019]. In this case it was concluded at paragraph 105 that an excess of housing supply, and the advantages of such supply above the minimum requirement, could contribute to exceptional circumstances.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

14. Given the unmet needs in London and the benefits of further allocations to support affordable housing delivery, consideration should be given as to whether the Council should apply the cap in relation to the standard method. As set out in paragraph 2a-007 of PPG the cap reduces the number generated by the standard methods but does not reduce the need itself. We note that the Council have considered this level of delivery in the SA and there are clearly benefits in using and meeting the uncapped housing requirement resulting from the standard method. However, even if the requirement is not adjusted, we consider its necessary for the Council identify additional allocations in the local plan to improve flexibility and better address the need for affordable housing within Tunbridge Wells.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

STR 1 Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

STR 1 Development strategy

Exceptional Circumstances

Paragraph 11 of NPPF states 'it does not make meeting identified needs for housing and other uses a requirement: rather it advises that the protection of assets of particular importance, which include both AONBs and Green Belt may provide 'a strong reason for restricting the overall scale, type or distribution of development in the plan area'. AONB covers approximately 70% of the borough, 22% is Green Belt, and 7% of land is in Flood Zone 3 & unsuitable for development.

The Council have chosen not to use these 'exceptional circumstances' (PSLP 4.11) for not meeting housing needs within the borough.

For this reason the PSLP is unsound and not justifiable.

Local housing need assessment

NPPF states this should be 'conducted using the standard method in national planning guidance –**UNLESS exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals**'.

TWBC had the opportunity to reduce the housing numbers by following advice in the NPPF by taking into account the 'exceptional circumstances' ie the large proportion of AONB and Green Belt coverage.

The population projection of an overall borough increase of 6,155 (5%) for the plan period was calculated using out of date data from the Office for National Statistics.

TWBC are aiming to achieve 12,204 dwellings, but claim that the allocated sites in the PSLP along with existing allowances will yield up to 13,444 dwellings. This is way beyond that 'needed' to accommodate the predicted population growth in the borough.

This method of development will produce a 'false' demand for houses by encouraging movement of population to the south east away from the more expensive housing areas of London and its suburbs at the expense of green belt, AONB and quality agricultural land.

The Pandemic and Brexit are also 'exceptional circumstances' and 'justify' an 'alternative approach' to 'reflect current and future demographic trends and market signals'.

Housing requirements should be re-calculated using current population projections and this PSLP should therefore be re-considered.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Housing requirements should be re-calculated using current population projections to reflect any change brought about by The Pandemic and Brexit and consider the 'exceptional circumstances' of AONB, Green Belt & Flood Plain not to meet current housing need in the borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies

1.5.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.5.11 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_500 (Vision and Objectives), PSLP_501 (Section 4: Policy STR1 - the Development Strategy and PSLP_502 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr N Wickham in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation. Mr Wickham is a local landowner with various interests, including land at Gate Farm, Hartley which is within the control of Fernham Homes.

Development Strategy and Strategic Policies (Policy STR1)

1.3.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.3.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances trends and market signals.

1.3.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.3.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated

taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.3.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for copy of Local Plan Figure 5 Key Diagram see full representation attached].

1.3.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached]

1.3.18 By way of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.3.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.3.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.3.21 The full proposed distribution of development is set out below.

[TWBC: for copy of Local Plan Table 4 Distribution of housing allocations see full representation attached].

Response

1.3.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider the review process should cease and a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.3.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.3.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.3.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.3.26 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.3.27 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.3.28 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.3.29 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.3.30 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend beyond 2038.

1.3.31 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.3.32 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.3.33 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley.

1.3.34 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.3.35 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.3.36 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.3.37 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough that can deliver quickly and require limited intervention or major infrastructure.

Green Belt vs AONB Release

1.3.38 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.3.39 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.3.40 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.3.41 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.3.42 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.3.43 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.3.44 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than four times double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.3.45 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.3.46 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.3.47 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.3.48 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.3.49 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.3.50 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met.

1.3.51 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.3.52 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.3.53 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.3.54 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.3.55 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.3.56 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.3.57 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.3.58 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.3.59 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing

land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.3.60 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.3.61 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.3.62 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas so as to preserve the status quo in the more affluent villages.

Housing Delivery

1.3.63 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.3.64 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.3.65 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.3.66 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing housing completion rates 2010 to 2015 see full representation attached].

1.3.67 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times to ensure the new plan is sufficiently flexible.

1.3.68 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing housing completion rates 2015 to 2020 (statement of common ground) see full representation attached with table note as follows: 1 The completions data for 2019/20 is yet to be formally published until the next Authority Monitoring Report 2020 is complete. However, the number of confirmed housing completions has been provided by the LPA as 474 for this latest monitoring year].

1.3.69 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.3.70 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.3.71 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.3.72 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.3.73 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.3.74 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing information extracted from the LPA's published supply statements see full representation attached].

1.3.75 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.3.76 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery therefore the plan fails the test of being both positively prepared and effective. Affordable Housing Need 1.3.77 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs. 1.3.78 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.3.79 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.3.80 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.3.81 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.82 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Mr N Wickham in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.81 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.82 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Notwithstanding its position in respect of highways and transportation set out above, in principle, the County Council is generally supportive of strategic scale development where it is able to provide necessary infrastructure alongside housing growth to support both new and existing communities. KCC will welcome a continued role in the master-planning processes of the strategic sites to ensure that the necessary infrastructure is planned for, is of high quality design, funded and delivered in a timely manner, ahead of housing growth where necessary.

The County Council advises that full consideration is given to assess the cumulative impacts of the dispersed growth to be delivered outside of the strategic developments across the Borough and the cumulative impact of these proposed development sites in respect of ensuring that necessary infrastructure is available to support new and existing communities.

There is evidence that the proximity of schools in Tunbridge Wells to the East Sussex border in particular can have an impact on county infrastructure – with East Sussex residents crossing the border to access Kent schools, libraries, youth services, social care and waste facilities. The County Council appreciates that this is likely to occur, particularly because East Sussex schools are not in such close proximity to those of Kent. KCC would look to Tunbridge Wells Borough Council to support the County Council in

its engagement with East Sussex County Council to mitigate and monitor the impacts that this has on the provision of county services.

The County Council supports the continued commitment to section 106 agreements to secure development contributions in the Borough. The County Council considers that there is an opportunity through this Local Plan to support the collection of developer contributions for sites of less than 10 dwellings on sites of 0.5 ha or more. This would enable developer contributions to be sought towards local infrastructure to support all development in the Borough.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

APPENDICES

APPENDIX 1 – Extracts from Housing Supply and Trajectory Topic Paper

APPENDIX 2 - From Start to Finish' 2nd Edition (February 2020)

APPENDIX 3 - North Essex Authorities EIP

APPENDIX 4 - Uttlesford EIP

APPENDIX 5 - The Role of SMEs

APPENDIX 6 – Schedule of sites under 1ha

APPENDIX 7 – Schedule of sites under 60 dwellings

APPENDIX 8 - Draft Small Sites Policy

APPENDIX 9 – Effect of Rounding Up of Affordable Housing

1.0 INTRODUCTION

i) About the Kent SME Developers Network

1.1 These representations have been prepared by the Kent SME Developer Network (the Network) – a consortium of Small and Medium (SME) Developers who are located in or operate within Kent and Medway. The Group is currently chaired by Paul Henry, Managing Director of Esquire Developments, an SME Housebuilder based in Longfield near Dartford, Kent.

1.2 The Network was formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers (of varying size and scale) and Registered Providers. In addition, the Network includes representatives of Local Planning Authorities including Medway Council, Swale Borough Council, Tonbridge and Malling Borough Council, Tunbridge Wells Borough Council and Maidstone Borough Council. It is the intention that the Network grows over time to cover all of Kent including additional SME Developers and Local Planning Authorities throughout Kent.

1.3 The Network was set up to provide a platform for SMEs to discuss relevant planning and delivery issues associated with bringing forward smaller developments and to positively and proactively engage with Local Planning Authorities at the plan making and decision taking stages.

1.4 Central Government has recognised the need to support existing SMEs and encourage more into the market in order to diversify the housing market from the volume housebuilders and generate choice and improve quality of homes being built. The Government has described SMEs as being of ‘National Importance’. According to figures, 90% of all home constructed in the past decade have been delivered by large corporations

1.5 The Network meets on a quarterly basis to discuss and explore relevant SME related issues, including working through planning related matters. Notable attendees at past meetings including Steve Quartermain (prior to his retirement as Chief Planner at MHCLG), Homes England and the new Chief Planner at MHCLG Joanna Averly is due to attend a future meeting.

1.6 In addition to the meetings acting as a discussion platform, the SME Network is also designed to act as a support and mentoring network, where land opportunities can be shared, or knowledge/experiences drawn from in-house teams in order to help each other and strengthen the SMEs. The Network can also act as a collective voice in the preparation of Local Plans or other consultations - such as this.

1.7 The Network comprises the following:

SME Housebuilders and Developers

- . Esquire Developments
- . Fernham Homes
- . Wealden Homes
- . Fernfield Homes
- . Meridian Construction
- . McCulloch Homes
- . Aile Homes
- . King and Johnstone
- . Clarkmores
- . Clarendon Homes
- . Gillcrest Group
- . A&E Property Ltd
- . Country House Homes
- . Classicus Estates
- . Woodcroft Developments
- . Provectus Developments
- . Penenden Heath Developments
- . Grandera Homes
- . Windmill Construction
- . Jarvis Homes
- . Aspire Designer Homes
- . Kentish Projects
- . Woolbro Homes
- . Cooper and Cole
- . Hillstone Homes
- . RJC New Homes
- . Wedgewood Homes

- . TG Designer Homes
- . Endeavour Construction Limited
- . Unique Land

Registered Providers

- . Hyde Housing
- . MHS

Local Planning Authorities

- . Medway Council
- . Maidstone Borough Council
- . Swale Borough Council
- . Tunbridge Wells Borough Council
- . Tonbridge and Malling Borough Council
- . Dover District Council

Agents

- . Tetlow King Planning
- . David Hicken Associates
- . Barton Willmore

1.8 The Network welcomes ongoing engagement with TWBC and any other interested party.

1.9 For clarity, the representation contained in this response relate to the Members of the Network that are SME Housebuilders and Developers and not the Registered Providers, LPAs or Agents.

ii) Content of Representations

1.10 These representations have been prepared by the Network which seek to address strategic matters. Any site-specific matters will be addressed by individual SMEs within their own representations.

1.11 The representations are structured as follows:

Section 2.0: Response to the Spatial Strategy.

Section 3.0: Response to lack of SME Sites and Support.

Section 4.0 Summary.

1.12 In summary the headline points are as follows:

- . We are wholly disappointed that the Council is failing to recognise the role of SMEs in its Pre-Submission Plan. This is evident on the basis that the Local Plan is wholly silent with reference to SMEs.
- . The plan fails to allocate 10% of its housing numbers on sites of 1ha or less as required by NPPF Paragraph 68.
- . The plan fails to provide a sufficient evidence base, namely demonstrating a quantitative and qualitative approach to supporting SME sites.
- . The plan is over-reliant on the anticipated delivery of its strategic large-scale sites in which the largest comprises an oligopoly of National Volume Housebuilders and the other has no developer yet on board;
- . The Plan fails to provide for a robust housing trajectory and requires the identification of smaller sites to provide for a more effective plan.
- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.
- . Accordingly, the plan is considered **unsound** as it is:
 - o Not Positively Prepared as it does not fulfil paragraph 68 (a) of the NPPF regarding 10% provision of small sites ;
 - o Not justified as the appropriate evidence base is lacking, particularly relating to housing delivery and NPPF Paragraph 72 (d).
 - o Not effective as the reliance on larger sites reduces the opportunity to diversify the housing market and will not deliver the required housing within the plan period.
 - o Is not consistent with National Policy as it does not conform to Paragraph 68.

2.0 RESPONSE TO THE SPATIAL STRATEGY

i) Spatial Strategy

2.1 **Policy STR1: The Development Strategy** sets out the Council's broad development strategy. It indicates that between 2020 – 2038, a minimum of 12,204 dwellings and 14 hectares of employment land are developed.

2.2 This figure reflects the Standard Method for housing being 678 dwellings per annum (12,200 dwellings in 2020-2038). Table 3 of the Pre-Submission Local Plan identifies that taking into account the extant supply of planning permissions and taking into account windfall developments on small and large sites, there is a minimum requirement to identify 7,221 dwellings as new allocations.

2.3 Table 4 of the Local Plan sets out the proposed distribution of housing allocations and identifies a total of between 8,076 – 8,461 new allocations; suggesting a combined total (with the extant supply) of 13,059-13,444 dwellings. The Council considers that taking the mid-point of this estimate, this equates to an oversupply of 1,000 dwellings over and above the 12,200 housing needs requirement

2.4 Excluding planning permissions, Table 4 of the Local Plan identifies a sub total of 8,996 dwellings to be delivered in the plan period. Of this supply, the Urban Expansion of Paddock Wood and East Capel (3,490 – 3,590 dwellings) and the new settlement at Tudeley Village (2,100 dwellings in the plan period and 2,800 in total), equate to a total of **5,590 – 5,690 dwellings** to be delivered in the plan period. This represents approximately **62%** of the Council's total new allocations/supply that is reliant on just two strategic locations, which are also geographically located in close proximity to each other.

2.5 We consider that there is an over reliance on these 2 schemes, and a failure to deliver either one or both of these sites at the scale or trajectory envisaged undermines the robustness and effectiveness of the of the Local Plan and is **unsound** in this respect.

2.6 Notwithstanding their individual impacts on the AONB and Green Belt, a review of the Council's Evidence Base, namely the Strategic Sites Topic Paper (March 2021) identifies that:

- . For Paddock Wood and East Capel *'There are currently four housebuilders who are promoting four separate parcels of land within this allocation: Crest Nicholson and Dandara (the western parcel); and Redrow and Persimmon (the eastern parcel)* (para 2.11); and
- . And for, Tudeley *'The site falls into one single ownership: The Hadlow Estate'* (para 2.20) and *'The Hadlow Estate commissioned its own Masterplanning Study, as detailed in the Tudeley Village Delivery Strategy'* (para 3.13)

2.7 In respect of Paddock Wood and East Capel, whilst it is recognised that these developers are indeed experienced National Housebuilders, we do not consider that this automatically means success for the delivery of the urban extension as advocated within the Evidence Base (paras 7.19-7.22). It is noted that there is still a significant amount of development (in terms of volume) to take place and associated infrastructure impacts and upgrades to address as the site is 'scaled up'. Whilst collaboration and engagement with the developers is stated as being present, the Evidence Base still identifies significant issues to address and overcome, including crucially how each development will deliver and/or contribute in a holistic and coordinated manner re. upgrading services or delivering key items of infrastructure. These are complex matters and take time to resolve.

2.8 In addition, the Network does not consider that the 4 No. named developers reflect sufficient diversification/choice in the market, in both product and design to deliver 3,500 dwellings. Indeed, the 4No. developers represent an oligopoly market in Paddock Wood and East Capel, thus resulting in control over the timing, supply, market forces and delivery of infrastructure. It is further unclear how the Volume Housebuilders will deliver variation in design away from their standard house types, or how this aligns with the Government's agenda for Building Better Building Beautiful. Given the scale of development, the sensitivities in respect of its Green Belt and other environmental designations, it is unclear how 4No. Volume Housebuilders will deliver the quality of design expected from an Urban Extension of this nature.

2.9 In respect of Tudeley, it is noted that there is at present no developers partnered/identified to promote or deliver dwellings. Whilst this in itself is not an unacceptable position and there are clear commitments to delivery and quality (that favour SME partners), the lack of a development partner at this point does raise additional concerns over the ability for the Council to rely on the delivery rates and pace of delivery set out in the Evidence Base.

2.10 The Housing Supply and Trajectory Topic Paper confirms (see **Appendix 1** of this statement for extracts), that both Paddock Wood and Tudeley are estimated to begin delivering completed dwellings in 2025/26, at a rate of 300 dwellings and 150 dwellings respectively.

2.11 Based on the Council's own trajectory methodology, super—size sites (2,000 plus dwellings) are suggested as either delivering units within 3 years of an Outline permission, or, where they are an allocated site but with no planning permission, years 6 or 7 onwards.

2.12 To rely on **any** completions in 2025/26 (let alone at a rate of 300 dwellings and 150 dwellings), represents delivery in year 4 of the 5-year period. In order for this to be achievable, both strategic growth areas need to have obtained outline planning permission by 2022 i.e. approximately 1 year's time.

2.13 This is not a realistic assessment of likely delivery rates and fails to comply with Paragraph 72 part d.

2.14 Given that all of Tudeley and the western growth expansion of Paddock Wood lie within the Green Belt, and realistically planning consent will not be granted until such time that these areas are released from the Green Belt (upon the adoption of the Local Plan – late 2022 as a best-case scenario), it is wholly unrealistic to expect or rely on completed dwellings from the strategic sites (amounting to 450 dwellings combined) in 2025/26. Based on the methodology as it stands today, 'allocated sites with planning activity and no planning activity', should be considered as years 6 and 7 in the timeline i.e. 26/27 and 27/28 respectively.

2.15 On the basis the Local Plan will not be adopted until Autumn 2022 (assuming it is found sound) and assuming a planning application is submitted at that time - given the length of time a grant of planning permission may take; it is considered that the Council's own Evidence Base does not support the identified trajectory. The Evidence Base is therefore fundamentally flawed.

2.16 Indeed, up-to-date research prepared by Lichfield's titled 'From Start to Finish' 2nd Edition (February 2020) (**Appendix 2**), updates the document relied on in the Council's evidence within its Housing Trajectory Topic Paper which references an earlier report by Lichfield's (the 1st edition). The Lichfield's 2nd edition demonstrates that it takes on average **8.4yrs** from the validation of the first planning application to the first dwelling being completed on schemes of 2,000+ dwellings.

2.17 This means that even if applications were submitted now (June 2021), 2026 is an unrealistic date to be relying on completed dwellings – with an Autumn 2029 date being an average indicator. If an application was approved at the earliest in Autumn 2022, a Summer 2030 date is more realistic – as an average.

2.18 The report further identifies that on average, the completions per outlet drop to circa 145 dwellings per annum on sites with 3 outlets or more suggesting that a capacity of 145dpa (assuming 3 outlets) would only be achieved per strategic site. The Council's Evidence Base suggests Paddock Wood and Capel will deliver 300 dwellings from 4 No. Developers. We suggest this is an over optimistic delivery rate.

2.19 Furthermore, the trajectory also assumes the start on site at the time envisaged will deliver their anticipated maximum completions from Day 1 Year 1. This is simply unrealistic - especially in the light there are no developers or strategic promoters promoting Tudeley. The significant matter of viability and commerciality of the proposals has not yet been proven and therefore the delivery of up to 150dpa from year 1 of completions is highly unlikely. From experience within the Network, any new large scale site is likely to run on a single outlet for the first 12 months, which will realistically take 2-3 yrs to deliver up to 50 dwellings per annum. At its peak, Finberry Park, a Crest Nicholson Development in Ashford completed only 120dpa, which included 3 outlets including HA.

2.20 Given the over reliance on these strategic sites, it is critical that the Local Plan is confident of the number of dwellings anticipated to be delivered in the Local Plan. We have set out how we are concerned that these two sites represent a significant proportion of the total dwellings (62% of the total supply) and in the case of Paddock Wood, controlled by an oligopoly of National Housebuilders.

2.21 The Local Plan is reliant on these two strategic locations delivering at least 5,590 dwellings in the Local Plan time period, with completions beginning in 4 years time. The complications that arise with large scale growth of this nature and given the Council acknowledge that it has never delivered growth of this scale/type before (para 4.34 of the Housing Supply and Trajectory Evidence Base), we

do not consider that the strategic sites will deliver when the Council anticipate, nor to the level the Council anticipate.

2.22 Accordingly, we consider that an over reliance has been placed on the delivery rates of the strategic sites and that this figure should be revised to a more realistic figure of approximately **2,450 dwellings in the plan period**. This reflects the long lead in times for 2000+ settlements (as evidenced in the Lichfield Report) and reflects a more realistic 'gearing up' of the site delivery in respect of number of completions per annum as more outlets come online.

2.23 Taking a more realistic approach as required by NPPF Paragraph 72, it is likely that the following table is a more appropriate trajectory:

[TWBC: for table, please see full representation attached as a supporting document]

2.24 In addition to the above, there has been no commercial led involvement to date for procurement/delivery of Tudeley, let alone negotiations to purchase land. The Network has extensive experience in this field (a number of Members have worked at Volume PLC Housebuilders), and there could easily be at least 5 years of land negotiations and/or Compulsory Purchase Orders, due diligence and application preparation work (which would be extensive).

2.25 Even if the above land acquisition is achieved, local evidence within the County supports the likelihood that there will be delay. Mountfield Park, Canterbury - a development of 4,000 dwellings, was heard at Planning Committee in 2015 and is still no further forward with the issue of a Planning Permission.

2.26 Recent Examinations of the North Essex Authorities EIP (**Appendix 3**) and Uttlesford EIP (**Appendix 4**) both of which consider the deliverability of new settlements. Both Inspectors concluded that insufficient evidence had been submitted in respect of the deliverability of the garden settlements and the plans found unsound – highlighting the difficulties with regard to their delivery in particular in relation to ensuring the necessary infrastructure is in place to support new settlements. Such Evidence Base is presently lacking.

2.27 Accordingly, we consider that an over reliance has been placed on the delivery rates of the Strategic locations and that this figure should be revised to a more realistic figure of approximately 2,450 dwellings in the plan period, some 3,140 dwellings difference. Taking into account the over supply of 1,000 dwellings (as set out above), we consider **approximately 2,140 dwellings** need to be identified on smaller more deliverable sites in order to meet the identified needs within the plan period up to 2038.

3.0 RESPONSE TO LACK OF SME SITES AND SUPPORT

3.1 We are wholly disappointed that the Local Plan fails to support or indeed recognise the role of SMEs in the plan. This is evident by the simple fact that the term 'SME' is not even referenced within the document.

3.2 The importance of the role SME's play in the housing market has been fully recognised by Central Government. Most recently, the consultation on the proposed changes to the current planning system, referred to SMEs as being of 'National Importance'. **Appendix 5** sets out a timeline of the narrative surrounding SME housebuilders and the recognition of the issues facing SMEs, the dominance of volume Housebuilders and the attempts to reverse the decline in the number of SME housebuilders through the Plan-Led system.

3.3 It is recognised that SMEs deliver high quality homes and can diversify the housing market. SMEs tend to bring forward bespoke products that reflect the characteristics of a local area either through size, tenure and design. Importantly, SMEs deliver quickly, support local trade suppliers and local job growth and are flexible in their approach. Unlike Volume Housebuilders, SMEs do not tend to take long term strategic options on land. However, this means that SMEs are disadvantaged at the Plan Making stage, as they neither have the land itself to promote, cannot invest the time, risk or expense of promoting a site through the Local Plan process (which is lengthy and competitive) or the available land is at lower tier settlements due to Volume Housebuilders taking long term land options in higher tier settlements and thus SME site typology is marginalised.

3.4 SME site typology for the Kent SME Network tends to be located in rural fringe locations due to the availability of land, lack of brownfield opportunities and that Volume PLC housebuilders or Strategic Promoters have already secured long term land options in urban fringe locations.

3.5 As a consequence, SMEs are pushed to the margins in respect of land availability and suitability, and it is often found that SMEs need to work harder to justify a site's sustainability credentials. Whilst a rural fringe location may result in increased car trips, these car trips are short in length on uncongested roads. The automatic assumption is often therefore that the reliance on the car, results in increased emissions and an application is refused or a site promoted in the Local Plan is not progressed.

3.6 However, this is a one-dimensional approach and sustainability is more nuanced and holistic. By way of example, the emissions derived from short car trips (from a low number of dwellings) can actually be offset (in carbon footprint) by the environmental quality of the buildings themselves through the adoption of green technologies. Furthermore, coupled with the behavioural changes relating to online shopping and working from home (even pre COVID-19) reducing day to day trips, alongside the increasing uptake in electric vehicles (which do not release emissions), the notion of sustainable development or unsustainable development is changing fast.

3.7 This is a specific matter has been tested by members of the SME Network and are subject to separate representations demonstrating how a case study scheme of 50 dwellings in a rural fringe location can offset carbon emissions generated by additional vehicle trips and result in an overall net reduction in emissions than a standard volume housebuilder approach in an urban area. Furthermore, the report assesses behavioural changes including the take up of electric vehicles and decline in fossil fuel sales and increased on-line behaviour, home deliveries and home working.

3.8 We consider LPAs (including Tunbridge Wells) need to be forward thinking and not looking backwards on this issue, particularly if Climate Change is to be taken seriously. SMEs can really assist and can bring forward developments that are bespoke and respond to the Climate Change challenge more swiftly than Volume PLCs. At present, the Local Plan fails to achieve this.

3.9 Central Government recognises the problem of bringing SMEs into the market and has sought to 'level the playing field' in the context of supporting small and medium sized sites at the plan making stage. Crucially, the NPPF 2019 confirms in paragraph 68 that:

1 Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;

b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;

c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes; and

d) work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.

3.10 The NPPF provides for a clear direction to LPAs, that it must identify land to accommodate **at least** 10% of their housing requirement that are 1ha or less. For Tunbridge Wells, this means that 1,220 dwellings need to be identified on small sites.

3.11 Officers of TWBC met with the Network to discuss the emerging Local Plan and the approach taken to meeting the 10% target and a small sites policy.

3.12 In respect of the 10% target, **Appendix 6** contains a table which was issued to the network by TWBC confirming those sites which have been identified in the Local Plan and are below 1ha in size.

3.13 The Councils Evidence Base confirms that only 290 dwellings across 9 sites are identified in the Local Plan that are yet to obtain a Planning Permission. This represents less than 3% and some 930 dwellings short of the expected NPPF requirements. Even if the total No. of sites (including those with a Planning Permission) are taken into account, this still amounts to only 641 dwellings across 17 sites - representing only 5.2% of the 10% target.

3.14 There is no Evidence Base to justify why the 10% target has not been met and no clarity/explanation as to why paragraph 68 of the NPPF is not being met.

3.15 The Council is therefore clearly failing to meet NPPF Para 68 part a) and has not set out any evidence as to why this figure cannot be achieved. The Plan has not been positively prepared and is not consistent with national policy as a result. **It is therefore unsound.**

3.16 Furthermore, the 10% allocation requirement is simply more than a mathematical exercise or a quantitative 'tick box'. Indeed, the purpose of NPPF Para 68 is to assist SMEs in coming forward with development within the Plan Led system. Crucially, it is important to understand that when allocating sites of this nature, that these sites are first and foremost being promoted by an SME. This is the most efficient and best way to ensure that SMEs deliver sites and diversify the market. It is therefore necessary for TWBC to undertake a qualitative approach of available sites and factor this into its decision making when allocating sites.

3.17 By way of example (and linked to the small sites policy below), the Council has also identified sites which have a capacity of up to 60 dwellings to reflect that SME developers of the network can build out larger sites than 1ha (**Appendix 7**). The evidence further reinforces the lack of available opportunities for SMEs in the Local Plan, identifying a total of 785 dwellings - which reduces to 495 dwellings once sites of 1ha or less are removed from this schedule (i.e. **Appendix 6 sites**).

3.18 The Local Plan is therefore woefully falling short of supporting SME developers and encouraging diversification in the market as required by Paragraph 68.

3.19 It is noted that a number of SME sites may have been promoted in the SHLAA or identified in the Regulation 18 Local Plan consultation, but not brought through in the Plan for allocation or indeed discounted in the SHLAA as being unsuitable. It is considered these sites should be reviewed to ascertain the availability of sites being promoted by SME developers and to assess if the need to allocate sufficient sites would alter the conclusions of the SHLAA assessments.

3.20 If there are still insufficient small and medium sized sites identified, part d) of para 68 confirms that the LPA should work with developers to encourage the subdivision of large sites where this could help to speed up the delivery of homes.

3.21 Whilst the Network does not object to this approach in principle, it should be noted that this approach can be a very difficult to achieve on sites that are already being promoted by a volume housebuilder for a number of reasons, namely:

Legal complexities associated with:

- . land transfer including potential clauses within option agreements about sub-sales;
- . where best value is required to be achieved (noting an SME will always tend to be outbid by a volume housebuilder) ;

Commercial complexities associated with:

- . potentially competing products;
- . expectation of land values ;
- . competing financial models and potential price caps/ceilings placed on the SME by the parent developer to achieve sales rates;
- . dilution of identity/products for both parent housebuilder and SME either through contract requirements or wider design codes;
- . Finding an appropriate SME partner within the limited pool of SMEs available;
- . The timing/capacity of an available SME at any given time that meets their business objectives;
- . The need to deliver sales rates at a specific rate to address cash flows and therefore pricing ;

Practical complexities associated with:

- . accessing the site for construction;
- . ability to take deliveries;
- . health and safety responsibilities and separate sales outlets;
- . HA delivery and parcelling up on smaller sites and gaining interest/appetite ;
- . Location of the SME parcel, potentially being in a later phase 'at the back';
- . Differences in coordination of build programme and occupation strategies (relating to sales rates and build rates);
- . Responsibility of servicing sites in respect of all site infrastructure and certain capacity/S106 triggers.

3.22 It is highlighted that paragraph 68 part d) advises that LPAs should 'work with developers to encourage subdivision of large sites where this will speed up the delivery of homes'. The NPPF does not state that LPAs should impose, through Policy, that large allocations are sub-divided in order to

achieve a 10% target. The NPPF makes clear that part d) seeks only 'encouragement' in order to 'speed up delivery'. Part d) is not to be used to use large sites to be subdivided, but to speed up delivery by increasing the number of outlets. The two parts (part a and part d) are seeking to achieve different objectives and should not be linked.

3.23 It is therefore considered that if the Council is required to find additional parcels of land, then identifying smaller pockets on larger parcels should be considered as a matter of 'last resort' and, in that instance, should be directed in the first instance towards 'legacy land', i.e. public sector land or land which is yet to be put under option (which traditionally is easier to release to SMEs as there is less commercial and legal sensitivity in public sector land).

SME Small Sites Policy

3.24 We are concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB. This is especially in the light that 1,310 dwellings and 360 dwellings (14% of the housing requirement 2020-2038) are expected to derive from windfall small sites and large urban sites respectively.

3.25 This issue is further compounded by the fact that the rural locations are designated as Green Belt, particularly meaning that development of any scale can only be secured by reviewing Green Belt boundaries within the Local Plan.

3.26 As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

3.27 In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

3.28 Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in Tunbridge Wells in respect of Green Belt and AONB designation, and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

3.29 The policy extract is set out below and the full supporting text is contained in **Appendix 8**.

[TWBC: for the policy extract, please see full representation attached as a supporting document]

3.30 A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small **and** Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

3.31 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

3.32 Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

3.33 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

3.34 The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

3.35 In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

3.36 The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale (when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

3.37 This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter that may extend beyond Tunbridge Wells, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

3.38 The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

3.39 A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than TWBC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For TWBC, this means that any site that falls under a 50-dwelling threshold will likely struggle to gain interest in a registered provider (at 40% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

3.40 On a related point, it is also noted that TWBC adopt a rounding up approach to affordable housing. This again has a greater impact on smaller sites as the net effect/impact is more severe the fewer number of homes being delivered on any one site. This is best shown in **Appendix 9** of this statement which demonstrates how the increasing total number of affordable homes being delivered has a proportional improvement on the net effect of rounding up. In essence, the larger sites can both generate interest from an RP and can carry the rounding up approach. Smaller sites cannot and the Council should recognise this position and take a flexible approach in this respect.

4.0 SUMMARY

4.1 These representations have been prepared by the Kent SME Developer Network - a consortium of SME Developers who are located in or operate within Kent and Medway. The Network was recently formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers of varying size and scale and registered providers.

4.2 The Network welcomes ongoing engagement with TWBC and any other interested party.

4.3 In summary the headline points are as follows:

- . We are wholly disappointed that the Council is failing to recognise the role of SMEs in its Pre-Submission Plan. This is evident on the basis that the Local Plan is wholly silent with reference to support for SMEs.
- . The plan fails to allocate 10% of its housing numbers on sites of 1ha or less as required by NPPF Paragraph 68.
- . The plan fails to provide a sufficient evidence base, namely demonstrating a quantitative and qualitative approach to supporting SME sites.

- . The plan is over-reliant on the anticipated delivery of its strategic sites large scale sites which the largest comprises an oligopoly of National Volume Housebuilders;
- . The Plan fails to provide for a robust housing trajectory and requires the identification of smaller sites to provide for a more effective plan.
- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.
- . Accordingly, the plan is considered **unsound** as it is:
 - o Not Positively Prepared as it does not fulfil paragraph 68 of the NPPF regarding 10% provision of small sites;
 - o Not justified as the appropriate evidence base is lacking, particularly relating to housing delivery and Paragraph 72 part d.
 - o Not effective as the reliance on larger sites reduces the opportunity to diversify the housing market and will not deliver the required housing within the plan period.
 - o Is not consistent with National Policy as it does not conform to Paragraph 68.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

See attached representations

[TWBC: the paragraphs below are relevant extracts from the full representation, which is attached as a supporting document]

- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.

2.27 Accordingly, we consider that an over reliance has been placed on the delivery rates of the Strategic locations and that this figure should be revised to a more realistic figure of approximately 2,450 dwellings in the plan period, some 3,140 dwellings difference. Taking into account the over supply of 1,000 dwellings (as set out above), we consider **approximately 2,140 dwellings** need to be identified on smaller more deliverable sites in order to meet the identified needs within the plan period up to 2038.

3.23 It is therefore considered that if the Council is required to find additional parcels of land, then identifying smaller pockets on larger parcels should be considered as a matter of 'last resort' and, in that instance, should be directed in the first instance towards 'legacy land', i.e. public sector land or land which is yet to be put under option (which traditionally is easier to release to SMEs as there is less commercial and legal sensitivity in public sector land).

SME Small Sites Policy

3.24 We are concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB. This is especially in the light that 1,310 dwellings and 360 dwellings (14% of the housing requirement 2020-2038) are expected to derive from windfall small sites and large urban sites respectively.

3.25 This issue is further compounded by the fact that the rural locations are designated as Green Belt, particularly meaning that development of any scale can only be secured by reviewing Green Belt boundaries within the Local Plan.

3.26 As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

3.27 In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

3.28 Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in Tunbridge Wells in respect of Green Belt and AONB designation, and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

3.29 The policy extract is set out below and the full supporting text is contained in **Appendix 8**.

[TWBC: for policy extract, please see full representation attached as a supporting document]

3.30 A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small **and** Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

3.31 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

3.32 Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

3.33 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

3.34 The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

3.35 In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

3.36 The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale

(when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

3.37 This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter than may extend beyond Tunbridge Wells, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

3.38 The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

3.39 A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than TWBC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For TWBC, this means that any site that falls under a 50-dwelling threshold will likely struggle to gain interest in a registered provider (at 40% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

3.40 On a related point, it is also noted that TWBC adopt a rounding up approach to affordable housing. This again has a greater impact on smaller sites as the net effect/impact is more severe the fewer number of homes being delivered on any one site. This is best shown in **Appendix 9** of this statement which demonstrates how the increasing total number of affordable homes being delivered has a proportional improvement on the net effect of rounding up. In essence, the larger sites can both generate interest from an RP and can carry the rounding up approach. Smaller sites cannot and the Council should recognise this position and take a flexible approach in this respect.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Due to the number of SME developers this network presents and the content and extent of the representations require verbal exploration with the Inspector.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1793 Esquire Developments for Kent SME SI Representation with Appendices.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Mr and Mrs Leach

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR 9, STR/SS 1 and STR/SS 3 – see Comment Numbers PSLP_1894, PSLP_1900, PSLP_1906 and PSLP_1907]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: Pre-Submission Local Plan (Regulation 19 Consultation) – Comments

Further to our comments on the Draft Local Plan, during the previous Consultation (Regulation 18). We again write to you, to raise our concerns about the proposed garden settlements and to object to various policies, as we do not believe that our original concerns, and those raised by others, have been adequately addressed in the Pre-Submission Plan.

We wish to take this opportunity to reiterate and elaborate on some of our key concerns, as outlined in our previous letter (dated 25th October 2019). In an effort to be concise, we will not repeat all particulars and so the reader is referred to this letter for context and completeness. For ease of reference, we have enclosed a copy of our original letter (in Appendix A).

Following the publication of Pre-Submission version of the Local Plan, we also now wish to raise other concerns, such as the legal compliance in-terms of the Duty to Co-operate and consistency with national policies.

Our comments on the Pre-Submission Local Plan, related to several policies, are outlined under the headings stated below. We are specifically concerned about the deficiencies in the proposed strategic infrastructure and the questionable need to release Green Belt land.

1 Policy STR 1 – The Development Strategy

Object as we have concerns over the consultation Due Process that has informed this strategy, in addition we consider that this strategy fails to comply with the **Duty to Co-operate** (i.e. **legal compliance**) and is **unsound** (i.e. not justified & inconsistent with national policy).

Our concerns and comments, about the first and last requirements, are outlined as follows:

1.1 In view of the large number of local people (over 800, >97%) who objected to the proposed development at Tudeley, during the Regulation 18 consultation, and raised a host of issues (site selection, infrastructure), which have not been properly addressed (see below), and so we have concerns about the review process rigour. In our opinion, there appears to be scant regard given to the overwhelming majority of people who commented about this Strategic site or even to the major concerns raised by an adjoining Authority (Tonbridge & Malling Borough Council, TMBC), as discussed in 1.9.

1.2 Considering the above, we respectfully purport that the Inspectors should not assume that the Council has adopted a rigorous process during the review of the Regulation 18 comments, especially given the weight of these objections regarding the Tudeley site. We ask that the Inspectors satisfy themselves that due regard has been given to these concerns/objections, in taking forward this strategic site and the required infrastructure.

1.3 With regard to Paragraph 16 of the National Planning Policy Framework (NPPF, 2019), it states that “Plans should:

- 1 a) be prepared with the objective of contributing to the achievement of sustainable development; ... c) be shaped by ... effective engagement between plan-makers and communities, local organisations ... and statutory consultees;”

1.4 In our opinion, we do not believe that the Tudeley site contributes to achieving sustainable development, especially as it is a car reliant development with insufficient public transport options (see

Section 1 of our previous letter; Section 1.24 below), nor do the concerns discussed above (in 1.1) indicate the Plan being shaped by communities.

1.5 Also, as outlined in our previous letter (in 1.4, appended), we are concerned about the development within the Green Belt and that the proposals for this Tudeley strategic site fail to comply with Paragraph 138 (NPPF, 2019), which states: (our emphasis added)

*“... Where it has been concluded that it is necessary to release Green Belt land for development, plans should first give consideration to land which has been previously-developed and/or **is well served by public transport**. ...”*

1.6 We are of the opinion that the proposed Development Strategy fails to adequately meet either of these requirements. Due to there being alternative brownfield sites and given the inclusion of the Tudeley site, which has inadequate public transport options. Refer to our previous letter for a full discussion, which is summarised below (see 1.21).

1.7 Considering the points above (in 1.3-1.6), we also have significant concerns about the soundness of the proposed Strategy (STR 1), given the inclusion of the Tudeley site. Since the justification is questionable (see Section 2 in previous letter; Section 3.8-3.14 below) and as this strategic site is inconsistent with national policy (incl. Para. 16 & 138).

1.8 With regard to the consultation itself, we consider that the absence of public exhibitions may exclude many people from engaging in this consultation. Older people tend to have less confidence with technology and so a limited public consultation may disproportionately exclude this group. Hence, we have concerns about whether insufficient ‘due regard’ has been given to them. If insufficient ‘due regard’ has been given to people with protected characteristics, then this consultation process would be contrary to Section 149 of the Equality Act (2010) and so would not be in legal compliance. The Council chose to conduct this consultation during lockdown, but could have waited until national restrictions had been eased to permit such exhibitions.

Concerns over the **Duty to Co-operate**

1.9 We also take this opportunity to **object** to the Development Strategy (STR 1), due to the inclusion of the Tudeley Village, on the basis that at least one strategic matter, namely the significant negative impact on Tonbridge’s local highways network, has not been adequately addressed. As such, we contend that the Duty to Co-operate has not been complied with. Our views in this regard are further discussed below.

1.10 Section 33A of the Planning and Compulsory Purchase Act (2004) imposes a duty on a Local Planning Authority, in this case Tunbridge Wells Borough Council (TWBC), to co-operate with other local planning authorities, on strategic/cross-boundary matters. Our understanding of this is to ensure that sustainable development is achieved, when considering sites that may have a significant impact on other local authority areas.

1.11 We understand that TMBC, like ourselves and many other people, have raised concerns about a number of significant negative impacts that two of the strategic sites (now listed under Policy STR/SS 1 and STR/SS 3) would have on Tonbridge, including on the local highway network and at the train station.

1.12 For ease of reference, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/CA1 and AL/CA1 is included below:

“The potential significant impacts of the proposed development at Tudeley and Capel on the local highway network and on infrastructure and services in nearby Tonbridge are a major concern for TMBC, particularly in light of the existing infrastructure challenges in Tonbridge and surrounding villages ...”

1.13 Similarly, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/PW1 and AL/PW1 is included below:

“... future rail capacity ... extends not only to train services but to commuter parking and likely travel habits. The frequency of services at Tonbridge station makes this the more likely destination for commuters when compared to Paddock Wood.”

1.14 The significant concerns made by TMBC, are similar to those that we previously raised at the Regulation 18 consultation. Refer to Section 1 of our previous letter (incl. 1.9). We also support the previous objection comments made by TMBC.

1.15 Despite the above local highway concerns being raised and Sweco's highway modelling (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (for TWBC) showing that the proposed developments would cause a severe impact on many of our roads/junctions, some of which are over practical capacity, the up-dated Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) only includes a single improvement in Tonbridge. This relates to the Vauxhall Roundabout (A26/A2014, i.e. A21/Pembury Rd).

1.16 Furthermore, even with the proposed improvement, at this single junction, Sweco's modelling shows that proposed developments will still result in this junction becoming over practical capacity (i.e. >95%), when it would have been below this in the 2038 reference case. Refer to PDF page 154 of the Transport Evidence Modelling Report¹. As such, this highway improvement is therefore insufficient to mitigate the likely impact.

1.17 In addition, there are no highway improvements proposed at the roundabout linking the B2017, which is the only road from Tudeley to Tonbridge, with the previously discussed junction (A26/A2014). This is despite the junction traffic volume increasing from 81% currently (or 85% in the 2038 reference case), to over 96-99% (i.e. over practical capacity) in all the proposed development cases. Refer to PDF page 115 of the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]). Moreover, with reference to Figures 9.6 to 9.8 (in the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), the severe impact on local highway network around Tonbridge, can be starkly seen. For instance, most of the junctions modelled turn red (>95%) and a massive increase in the queue lengths are evident at these junctions, when comparing the reference and Local Plan cases.

1.18 This evidence, presented in Sweco's report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), clearly substantiates the concerns TWBC have and that we previously raised about the significant negative/severe impact that the Development Strategy would have on Tonbridge's local highway network. We strongly contest that the mitigation measures proposed in the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) are insufficient to mitigate these severe impacts and those on the wider network, so TWBC may have failed to fulfil their legal obligation under the Duty to Co-operate.

1.19 We also strongly believe that it is not right that TWBC should take forward plans to build over-half of TWBC's total housing allocation, at the edge of its Borough, knowing full well the severe impact it will have on a neighbouring authority and our town. This goes against the spirit of your legal Duty, to ensure that sustainable development is achieved, which may also actually fail this legal test. We ask TWBC to re-consider these inappropriate and unsustainable plans, particularly with the inadequate public transport proposed and without adequate highway improvements. We also trust that the Inspectors would consider recommending that the Plan to be withdrawn, if this Plan is submitted in its current guise, in view of the significant shortcomings noted.

1.20 Another consideration is that the congestion, from the severe Local Plan impact (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), is likely to result in air quality limits being exceeded in Tonbridge and is most likely to harm the sustainable economic growth of our town (see previous letter, incl. 1.11-13). This increase in congestion, in Tonbridge and along the B2017 - particularly during the morning peak/school times, also brings into question the adequacy of the proposed Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) and the soundness of the proposed Tudeley site.

1.21 In-terms of the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021)). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link:https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]), TWBC appear to be placing reliance on a single public transport mode – buses. This appears to mask the fundamental flaw of this poorly connected development site and the severe highway network impacts in the Local Plan scenario (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (in 1.15). In addition, the severe impact contradicts Policy EN1 2.2.

1.22 A concern of ours is about how the proposed bus service is being presented. This Plan proposes a 'rapid bus' link. However, we strongly contest the assertion that the proposed bus service would be a 'rapid' link, due to the congestion highlighted above. A rapid bus link would most likely require major road improvements along the entire route, including the provision of dedicated bus lanes/footways along the B2017 and through Tonbridge to the station, which is the mostly likely commuter destination (1.13).

1.23 Furthermore, without proper road improvements (i.e. dedicated lanes), it brings into doubt the effectiveness of any bus service in taking the huge number of extra cars off the road. The congestion along the route from Tudeley to Tonbridge, with commuters stuck on buses in traffic jams, will reduce the attractiveness of any new bus routes and so more people are likely to just opt for the comfort/convenience of their own cars. In our opinion, this Local Plan fails to address the significant shortcomings highlighted above and the validity of Sweco's highway modelling (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) may now be questionable, if an unrealistic number of commuters are assumed to be using the bus service. If the latter is the case, then the severe highways impact evidenced (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) and harm will all be amplified.

1.24 In addition, to the question marks over the compliance with the Duty to Co-operate, we have the view that this Strategy will create a massive car reliant commuter settlement, with the lack of public transport options and sufficient local jobs. This is discussed in our previous letter (1.9 & 1.10). As such, we contest that this Local Plan fails to comply with national policy (i.e. legal compliance). For instance, Para. 103 (NPPF, 2019) states: "... *Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes.*"

1.25 We note previous precedence's where Inspectors have rejected similar garden village proposals (incl. in the West of England Plan), due to these developments being too heavily reliant on private cars. Again, we ask the Inspectors to consider recommending that the Plan to be withdrawn, if it is submitted in its current disguise, in view of the significant shortcomings and potential non-legal compliance issues highlighted above.

In closing, as discussed above, the Infrastructure Delivery Plan² fails to adequately address the severe impact on the local highways network, particularly in Tonbridge, and the significant concerns raised by TMBC and many others previously. As such, there are questions over the consultation review rigour (e.g. Due Process) and compliance with the Duty to Co-operate (i.e. legal compliance). We have also reiterated a number of examples where this strategy has not been justified and where it is inconsistent with national policy (e.g. in 1.24).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 1

Respondent's Name and/or Organisation Leander Homes

Question 2

Agent's Name and Organisation (if applicable) Colin Smith Planning Ltd

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft policy STR1 sets out the development strategy for the Borough. In summary, in relation to housing, the policy sets out that a minimum of 12,204 dwellings will be developed over the plan period (2020-2038). This equates to 678 per year.

The strategy for delivering this quantum of houses is to promote the effective use of previously developed land, look to focus new development within the identified Limits to Built Development of settlements, provide for growth of settlements having regard to their role and function, and the development of two strategic sites to the west of Paddock Wood and a new village at Tudeley.

Positively prepared The strategic policy has at its core the large scale development of land to the east of Paddock Wood, and a new settlement at Tudeley. Both of these options aim to deliver a large amount of new housing, and it is clear that the Council are reliant on them coming forward for development in order to meet the housing requirements. It is submitted that the plan is not positively prepared. Paragraphs 4.12, 4.13 and 4.18 refer to the need to consider unmet need from elsewhere. Table 3 of the draft Submission Plan Page 4 of 13 Tunbridge Wells Borough Council: Local Plan Pre-Submission Representation Form identifies the total number of houses to be delivered as 12,204. This figure is drawn from the Housing Supply and Trajectory document, which provides part of the evidence base. Paragraph 1 of the Executive Summary to the Housing Supply and Trajectory document identifies the figure of 12,204 homes, and states that "This is in addition to any unmet housing needs from neighbouring authorities, in relation to which the current Sevenoaks Local Plan, although not found sound, leaves an unmet need for 1,900 dwellings." The current position for the Sevenoaks Local Plan is that it has been found unsound and a legal challenge to that has failed. The main point at issue for the Sevenoaks Local Plan was that they failed in their duty to co-operate with adjoining authorities to consider unmet housing need. Sevenoaks will now need to review their duty to co-operate and reconsider the unmet need, together with that of adjoining authorities. There is potential therefore that the housing figure may increase from that currently identified, subject to the progress of Sevenoaks Local Plan. In this way the draft Submission Plan is not positively prepared.

In addition to the above, paragraphs 5.189 and 5.190 set out the background to the development of the strategic sites at Tudeley village and Paddock Wood. Both paragraphs refer to the requirement that to deliver the two large strategic sites in the Green Belt, road improvements will be required as

the modelling shows that there will be an increase in traffic through Five Oak Green. This is proposed to be dealt with by highway improvements to the A228 and a bypass around Five Oak Green. It is anticipated that these works will be paid for wholly by infrastructure contributions from the development at Tudeley. Paragraph 5.191 identifies that “the delivery of this infrastructure should be through ongoing discussions with relevant stakeholders. This includes, but is not limited to, Kent County Council, adjacent local planning authorities (Tonbridge & Malling and Maidstone Borough Councils) and other statutory consultees” This suggests that despite the identification of the route of the Five Oaks bypass on the proposals map, there needs to be ongoing discussions in order to deliver it. It is not clear at this stage whether this is deliverable.

It is therefore submitted that the plan is not positively prepared in relation to the development strategy as it does not appear to take account of unmet needs, and there appears to be uncertainty over the delivery of infrastructure.

Justified A significant proportion of the required development is focussed on two large strategic sites. Should these sites not be delivered, then there would be a significant shortfall in delivery. The delivery of the sites will be the subject of masterplans to be delivered as Supplementary Planning Documents. This will involve a further process of public engagement, consultation and adoption. As an alternative strategy, additional development could be proposed to support and enhance existing settlements, rather than create new ones. Rural centres, such as Five Oak Green have a range of services that support the local community, but needed to be supported by growth and development. The provision of a bypass around Five Oak Green will result in less traffic passing through the village, and reducing the opportunity for visitors to stop and take advantage of the services and facilities on offer, that would help to support them, and to improve their viability and vitality. Whilst there is a balance to be struck between enough passing traffic to support local services, and too much traffic resulting in congestion and a deterioration of the environment, a bypass is likely to tip the balance away from the support of local services and facilities. In addition, the development of the large strategic sites will result in a significant amount of Green Belt land being released. The development shown on the proposals maps will not support the reasons for including land within the Green Belt, as set out in paragraph 134 of the NPPF. In particular, the huge expansion of Paddock Wood to the east will not check the unrestricted sprawl of this large built-up area. The location of Tudeley, part way between Paddock Wood and Tonbridge, together with the expansion of Paddock Wood in this direction, will result in neighbouring towns merging towards each other. Neither proposal results in safeguarding the countryside from significant encroachment. It is acknowledged in the Development Strategy Topic Paper at paragraph 7.13 that the development of Tudeley village would weaken the extent to which the Green Belt purposes will be fulfilled, particularly between the proposed village and Five Oak Green. This is also acknowledged in paragraph 7.12. The provision of road improvements, in particular the currently “off line” Five Oak Green bypass, will also have an impact on the Green Belt. An alternative strategy would be, rather than significant large scale new settlements, provide for smaller scale developments surrounding and as extensions to existing settlements, such as Five Oak Green. Such an alternative would also result in a release of Green Belt land, but in a way that would allow for a review of the Green Belt boundaries around the settlements and the creation of more defensible and rational limits to the settlement boundaries. Limited, modest additional housing developments around rural settlements would also help to support local services and facilities, resulting in improving their vitality and viability, and creating a greater sense of community. The development strategy therefore has significant weaknesses, particular in relation to the impact on the Green Belt.

Effective Related to the above, it is submitted that the proposed strategy is likely to have weaknesses in its effectiveness for the reasons set out above. The deliverability of the strategic sites are dependant on a significant amount of masterplanning, and infrastructure provision, including highway improvements and a new bypass, and flooding at east of Paddock Wood, where part of the proposed site is within Flood Zones 2 and 3 and part of the upper Medway floodplain. The delivery of the housing numbers through smaller scale sites dispersed across the borough can avoid the need for major road improvements in the Green Belt, and can be planned to avoid the areas at greatest risk of flooding.

Consistent with national policy It is acknowledged that the NPPF does allow for the allocation of major strategic sites in the Green Belt on the basis that there are exceptional circumstances to justify it. However, as identified above, the identification of the strategic sites will weaken the purposes of the Green Belt, particularly around the Tudeley/Five Oak Green area. It is significant that the Council's Green Belt study does not include parcels of land to the north of the railway line around Five Oak Green. The Study does include a “broad area” to the north of the railway line, and the Council's own

assessment sets out that in relation to the purposes of preventing neighbouring towns merging into one another and assist in safeguarding the countryside from encroachment the rating is “Strong”. These purposes will be compromised should the development strategy chosen be implemented, and the strategy will not be consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The development strategy policy should be modified to remove the reference to the large strategic sites and an alternative strategy based on the modest expansion of existing settlements. The following amendments are suggested;

2. Looks to focus new development within and on the edge of the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

3. Provides for the growth of settlements, having regard to their role and function, constraints, and opportunities, ~~together with the development of two strategic sites, namely:~~a. major, transformational expansion of Paddock Wood (including land at east Capel), following garden settlement principles and providing flood risk solutions; andb. the creation of a new garden settlement: Tudeley Village between Paddock Wood and Tonbridge;

9. ~~Allows for the review of the Limits to Built Development to accomodate modest growth to existing settlements to support and sustain the local services and facilities within the settlements, and normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary.~~

Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy

Question 1

Respondent's Name and/or Organisation Peter Lovering

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph Numbers: 4.6, 4.8–4.11

Figure 5

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Borough Council's Local Plan is unsound because it is unjustified. It is unjustified because it is based on assumptions that are already out of date and it will cause unnecessary and disproportionate harm to the environment and the quality of life of residents.

It assumes that huge amounts of additional housing will be needed within the Borough. This assumption is no longer appropriate as the UK Government has committed itself to a policy of 'levelling up' the rest of the country with the more prosperous south-east. The effect of this policy will be to discourage people from migrating to the south-east in search of employment opportunities as the Government will be creating ample opportunities in the areas where people live already. The demand for housing that the Plan envisages will not materialise if the Government delivers on its promises.

In addition, the Government's hostile attitude towards citizens of the European Union has resulted in hundreds of thousands of people leaving the UK and returning to their countries of origin. This has already had the effect of reducing the demand for housing in the south-east.

Meanwhile the damage caused to the British economy by the Covid-19 pandemic, and in particular the impact on the hospitality sector, has had the effect of reducing the demand for labour. This will naturally reduce the demand for additional housing in the south-east.

Another effect of the pandemic has been the closure of many shops, as people have grown accustomed to making purchases online rather than in bricks-and-mortar stores. This has merely reinforced an existing change in consumer behaviour. Online retailers employ fewer staff, further reducing the demand for labour and reducing the demand for housing.

In addition, the closure of shops on our high streets, in shopping centres and on out-of-town retail parks means that many sites have become available for change of use and redevelopment. Similarly, the pandemic has seen many people working from home, another change that is likely to be permanent. Fewer people will be confined to offices full-time with the result that businesses will downsize, freeing up former office buildings for redevelopment as housing. Technological change is transforming our world, while TWBC and the Westminster Government continue to live in the 1970s.

There is no longer a need to build new housing estates on green-field sites on the fringes of our towns and villages. Nor is there any need for new settlements such as the proposed 'village' at Tudeley. There is ample 'brown-field' land to meet our (reduced) housing demand within the existing footprints of our towns.

The assumptions on which this Plan is based are no longer relevant, appropriate or applicable. The projected demand for housing, schools and leisure facilities is clearly not going to materialise. The 'identified level of development needs' is nonsense.

The Plan is also in breach of national planning policy since, as explained in paragraph 4.6, the need to safeguard 'protected areas and assets, such as AONBs and Green Belts' is potentially a valid reason

for a local plan to fail 'to meet the identified level of planning needs'. This Plan shows little regard for the Green Belt or local AONBs and endangers both. It must be totally rewritten before irreversible damage is done to our landscape and the quality of life enjoyed by the residents of the Borough. Green Belts and AONBs were created by Parliament and have legal protection. Tunbridge Wells Borough Council does not have the right to ignore and override the legal protections that have been put in place by Parliament in the national interest.

The Plan also fails to take into account national policy on air pollution. It is based on the assumption that people living in the new development zones, including the 'garden village', will use motor cars to reach the shops, schools, places of entertainment and other amenities on which they depend. This is contrary to the Government's legally binding commitments to improve air quality and reduce green-house gas emissions. The Climate Emergency will be worsened by this Plan and so will public health as a result of the deterioration in air quality that will result from it. The dependence on the motor car that it promotes is contrary to the law.

The destruction of open countryside envisaged by this Plan will also hamper efforts to reduce CO2 levels and is thus illegal.

I would further add that it seems obvious that the younger people who will be invited to buy properties in these newly created development zones do not actually want to live away from the traditional town centres with the amenities they offer; they do not want to be totally dependent on pollution-generating cars to reach the shops, their children's schools, restaurants and places of entertainment. They need appropriate, modern, affordable housing but would prefer to live within the existing footprints of our towns. The only reason they would opt to live in a newly created 'garden village' is because that is all they can afford in a housing market that has been grossly distorted by Government policy.

Endless sprawling development is a lazy, wasteful solution to the challenges we face. It is unjustified and illegal. There is ample scope to redevelop our towns at slightly greater density in order to meet demand. The people of this Borough want to see the Green Belt preserved and our Areas of Outstanding Natural Beauty protected for future generations to enjoy. This Plan is reckless, irresponsible folly and should be rejected for the reasons stated above.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For this Plan to become justified, it must reflect the wishes of local people, instead of the preoccupations of our masters in Whitehall. It needs to reject the development targets imposed by central government, on the grounds that they are out-dated and inconsistent with the Government's 'levelling up' policy. The Plan should be rewritten to reflect this Government's commitment to safeguard and improve the natural environment. It must be revised so that it reduces the pollution caused by motor vehicles rather than encouraging dependency on cars, commercial vehicles and buses, in line with Government policies intended to address the Climate Emergency. It should be amended to ensure complete preservation of the Green Belt and our AONBs, in accordance with the intentions of Parliament when they were created. This will have the effect of promoting mental and physical health and safeguarding air quality, all key objectives of Government policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: No, I do not wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Maidstone Borough Council

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation has been divided between comments on the whole Plan with regard to Duty to Cooperate (PSLP_2258), Policy STR1 (PSLP_2259) and Policy STR/SS1 (PSLP_2260).

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for consulting Maidstone Borough Council (MBC) on the draft Tunbridge Wells Borough Local Plan (TWBLP). Maidstone Borough Council's comments on the draft plan are detailed below.

Strategic issues

The following sections set out our comments on the Local Plan.

Housing

The standard methodology identifies a need for 12,204 new dwellings for the plan period from 2020 to 2038. MBC recognises that the draft TWLP proposes to fully meet this identified need over the plan period, and that TWBC are not expecting any other authorities, including MBC, to accommodate any unmet need. Additionally, we note that TWBC is seeking to meet its gypsy pitch need. This approach is fully supported. Similarly, MBC acknowledges the indication in the draft TWBLP that there is limited ability for TWBC to meet any unmet housing needs from other councils. MBC is planning to meet its own need without the need to seek to accommodate any unmet need from TWBC.

The proposed spatial strategy is one of a dispersed growth approach, with site allocations in the majority of the settlements across the borough. In addition, proposals are included for a new garden settlement in Tudeley and the expansion of Capel and Paddock Wood. This expansion is directly to the south of MBC's administrative boundary and therefore has the greatest potential effect on Maidstone Borough. The matter will be discussed further under the heading Policy STR/SS 1, below [TWBC: see PSLP_2260].

Employment

The strategy for employment growth and allocation of at least 14 hectares of land (approximately 120,000sqm) for employment use remains based on the Sevenoaks and Tunbridge Wells Economic Needs Study dated 2016. However, the strategy and quantum of land allocated to meet the borough's employment needs predominantly through extensions of the defined Key Employment Areas (KEAs) remains a logical and sensible approach which is supported by MBC. The expansion of the KEA around Maidstone Road and Paddock Wood may indeed offer opportunities for residents and businesses particularly in the south of Maidstone to utilise the planned employment offering.

MBC raises no further comments or objections in relation to the overall approach to employment.

Retail

The uncertainty surrounding the retail sector both nationally and more locally is recognised in the pre-submission Plan. MBC fully supports the flexible approach to uses in the town and other centres, including greater focus on the leisure and culture offer.

MBC is pleased to note that the 2017 Retail and Leisure Study has been updated for 2021 (RCLTCU Study 2021), recognising the current state of change within the wider retail market. This ensures that, as far as possible, the most accurate amount of floorspace is allocated for retail and leisure uses based on up-to-date evidence at the point of submission. In this particular case, the evidence does not identify a need for any allocation of land for convenience or comparison floorspace – with a focus instead on

reuse of vacant floorspace and bolstering of existing units. MBC supports this approach – particularly in the short term – but suggests that this is kept under regular review to ensure sufficient floorspace remains available to meet needs over the plan period.

MBC raises no further comments or objections in relation to the overall approach to retail.

Landscape and Green Belt.

We note that TWBC have undertaken a range of studies to consider the impact of the strategy on the AONB and the release of land in the Metropolitan Green Belt.

Flooding

The SFRA identifies that areas to the north of Paddock Wood are particularly prone to flooding. As before, MBC raises no issue with the principle of the expansion of Paddock Wood on the provision that the expansion can be suitably accommodated without further risk of flooding to the surrounding areas of Maidstone Borough, and that betterment can and will be provided in these locations where appropriate. MBC raises no further comments or objections in relation to the overall approach to flooding and flood risk mitigation.

Infrastructure and connectivity

As per the previous TWBC draft Plan consultation (Regulation 18), the growth strategy remains based on the premise of infrastructure-led development to ensure that essential infrastructure and connectivity is integral to all new development. MBC strongly supports this approach to delivering growth, particularly the emphasis on ensuring that sufficient infrastructure capacity is either available or can be provided in time to serve new development (criterion 5, policy STR5).

Transport

The strategy in relation to transport and parking intends to prioritise active and sustainable modes of transport, whilst recognising that private car ownership in the borough is currently very high and that sufficient levels of parking should be provided.

The draft Plan is supported by an Infrastructure Delivery Plan and a Transport Strategy. The following transport schemes are those which are considered necessary to support the growth identified in the plan which are relevant to Maidstone borough:

- Improved A228 Maidstone Road/Whetsted Road priority junction
- Improved A228/Whetsted Road/A228 Branbridges Road/B2160 Maidstone Road roundabout
- Improved B2160 Maidstone Road/Commercial Road priority junction

MBC recognises the need for and supports these highways improvements and will continue to engage with TWBC to assess their impacts as part of the duty to cooperate process.

In the interest of joined-up, cohesive planning, any opportunities to extend and/or join up active travel and public transport options beyond administrative boundaries, into Maidstone Borough – where sensible and feasible to do so – should be explored at all stages of the masterplanning process for the extension of Paddock Wood.

MBC raises no further comments or objections in relation to the overall approach to transport.

I hope these comments are helpful and look forward to continuing, constructive dialogue on strategic, cross boundary issues as part of the duty to cooperate as our respective Local Plans progress.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Mrs Judith Marks

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: representation on Policy STR1 (PSLP_1246) duplicated against PSTR/BE 1 (PSLP_1800, AL/BE 3 (PSLP_1801) and AL/BE 4 (PSLP_1802)]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not justified
.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4 Development Strategy Your council tax payers and the communities that make up Tunbridge Wells Borough want to protect the rural nature of the Borough, including the Green Belt and the AONB and its setting. By not challenging the national policy allocation of 12,200 dwellings (against a projected population increase of 6155 over the plan period – with average UK household size of 2.4, this amounts to 2565 households, around 20% of what has been allocated), the Borough Council is not properly representing its residents and communities. The Borough Council is elected to stand up for the communities it serves. The Council is already being asked to meet a higher need than its own population numbers indicate. They should not also be contributing towards unmet needs

4.52 Table 4 Distribution of Housing Allocations The allocation of 87-95 dwellings to Benenden is disproportionately high compared with villages of a similar size, such as Goudhurst which is allocated only 25 dwellings, or Frittenden. The NPPF Chapter 2 para 11b lays out that “strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses...” Therefore housing allocation should be objectively based on need from within the parish and not on the willingness of some landowners to profit. At the last Housing Needs Survey undertaken in Benenden a low level of requirement for additional dwellings was identified.

Benenden Parish

5.420-22 Benenden is the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published in February 2019. Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

Policy PSTR/BE1: The Limits to Built Development for Benenden village, as defined on Inset Map 17, appears to have been drawn after the proposed site allocation and specifically to accommodate those sites and exclude all others. If the policy is genuinely plan-led, the LBD should be set first and then sites within it identified. This LBD has been designed to “freeze” the village rather than allow for reasonable sustainable growth to meet local needs and support a healthy vibrant community.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for East End, yet the Friends of East End (FEE), were never asked to meet with the BNP steering group. The much trumpeted community involvement was largely restricted to the village and Iden Green. East End is on the border of the parish with Biddenden, and development there will affect Biddenden more than Benenden (see below).
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on 4 April 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB and Historic England. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before allocation*. See HE's comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. The current version of the PSLP states that the nearest stations to East End area are Staplehurst and Etchingham (5.411) when in fact the closest station is Headcorn.
- . Others may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) on behalf of Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate untrue information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to East End as a village, which it is not. East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Biddenden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would state Iden Green only.
- . In the same paragraph, the PSLP states that there is a small shop at Benenden Hospital. At one time there was a small shop for in-patients, which was available to the local community, but this closed many years ago.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden Social Services Hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week, the 24 on Tuesdays and the 299 on Wednesdays. East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent. The situation is exacerbated by increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads and continue to do so, but serious road accidents continue. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR.

Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland Farm. The AL/BE 3&4 policy fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet Inset Map 18 (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its car park. Neither chapel nor car park are in the area up for development. Incidentally, the car park shown was supposed to be temporary contractors' parking during the building of the new hospital wing and car parks, and an undertaking was made by BHS at its presentation to the local community to reinstate it to grass paddock. It can be seen that this never happened.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives, its strategies, KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden parish.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land." It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in

the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- . The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly previously developed. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to be asked provide the infrastructure at AL/BE 3&4 at some point in the future. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account. Further, we already see BHS reneging on or substantially modifying undertakings it made when planning permission was originally granted for AL/BE3 in 2013, and where no development has yet taken place.
- . Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, Transport Strategy Review Sept 2019 which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 Transport Review). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- . Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The implication is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is on the parish boundary and isolated from the village, their contribution to the local economy is negligible.
- . Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . Cycle routes: The PSLP’s standards on the public benefits of cycling and walking are based on the Cycle Strategy Supporting Document, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The Cycle Strategy states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribble Bridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see Planning Application 20/03267/FULL) will cause an increase in those factors, identified in TW Cycle Strategy, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: “The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to

TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This runs completely contrary to STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by Hankinson & Duckett (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, DLP_3458 High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has PSLP EN1 para 5. Biodiversity and geodiversity.
- . AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.
- . STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.
- . EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.
- . EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for a 3-mile active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. Ongoing maintenance costs are not included. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a Bronze Age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister Building stands a few yards to the west of AL/BE3 and Cleveland Farmhouse (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor development outside the Local Plan) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the crossroads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the

pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

1 Infrastructure Delivery Plan

I have carefully read the IDP March 2021, and there is no mention of any improvements to the rural infrastructure to support the proposed new growth area at East End, where there are currently no amenities and limited infrastructure. Transport and sewerage are of particular concern and impact strongly on the neighbouring parish and borough. It seems to be assumed that this is not a problem for Benenden, someone else will have to take care of it.

1 Process

As a general comment, I have found the representation process unnecessarily difficult. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'.

- . The interactive on-line site is difficult to navigate and freezes or logs itself out at regular intervals. Resetting passwords has required a telephone call as the automated process does not seem to work.
- . Inaccuracies in earlier consultation documents have been carried forward, despite being constructively pointed out in my response. This means that the local policies for Benenden are based on unsound information, and also makes me wonder why I bothered to respond because it seems no-one has read what I wrote.
- . Tables in the Infrastructure Delivery Plan published on the TWBC website are incomplete.
- . Also some of the jargon and wording used, particularly in the Sustainability Assessment, is almost incomprehensible to the lay reader. We wish to participate constructively in this process, but it almost seems designed to discourage this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should challenge the allocation of 12,200 dwellings (almost four times the borough's assessed housing need), and should not plan on that basis at least until after the Sevenoaks judicial review and appeal process is complete. It should not plan a "margin" to cover unmet allocations from neighbouring boroughs.

Policy PSTR/BE 1 should be amended:

- . The allocation for Benenden should be objectively reviewed and substantially reduced to the same level as similar-sized historic villages, such as Goudhurst or Frittenden.

- . Inset Map 17: The LBD for Benenden village should be redrawn to allow for a small amount of sustainable housing development within the village.

Development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a heritage building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. If further housing is required in Benenden, it should be allocated to sustainable sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal (SA) is misleading:

1. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee Almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. Tenterden Primary School is already fully subscribed for the coming academic year, and housebuilding in the town is ongoing, adding to pressure on places from within the immediate area. Benenden Primary School has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for

158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why was the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr D Masters in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr Masters owns Triggs Farm, Goudhurst, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/GO 2).

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it benefits from outline planning permission for the erection of 12 dwellings granted at appeal in January 2019.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons we set out within this representation.

1.4 Development Strategy and Strategic Policies (Policy STR1)

1.4.1 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.2 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.3 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.4.4 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.5 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for copy of Local Plan Figure 5 Key Diagram see full representation attached]

1.4.6 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 duplicated here - see full representation attached].

1.4.7 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.8 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.9 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.10 The full proposed distribution of development is set out below.

[TWBC: For copy of Local Plan Table 4 Distribution of housing allocations see full representation attached].

Response

1.4.11 Our client agrees that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.12 In respect of the wider strategy, our client supports the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area.

1.5 AONB Release

1.5.1 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.5.2 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.5.3 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.5.4 With above criteria in mind, our clients consider there to be clear evidence of an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous

difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.5.5 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.5.6 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.5.7 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.5.8 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.5.9 Given the above constraints, planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the AONB is patently met and with every development comes an opportunity to moderate the effects of development, buffers and the opportunity to increase public access to the land.

1.6 Housing Delivery

1.6.1 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.6.2 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.6.3 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area. Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing housing completion rates 2010 to 2015 see full representation attached].

1.6.4 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.6.5 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.6.6 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.6.7 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that sites like our client's land are needed.

1.8.1 This representation has been prepared on behalf of Mr D Masters in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Goudhurst, but the detailed policy requires modification if the site is to be deemed deliverable.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: DHA's representation on behalf of Mr D Masters has been split into three separate areas: PSLP_481 - Vision and Objectives, PSLP_482 - Section 4: The Development Strategy, and PSLP_483 - Section 5: Goudhurst Policy AL/GO 2]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1883, Policy STR9 (PSLP_1884), Policy PSTR/HA1 (PSLP_1885) and Policy STR/SS3 (PSLP_1886). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Chittenden Fields, north of High Street (A268), Hawkhurst. This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account of its credentials as a sustainable location for growth adjoining the acknowledged suitability of Hawkhurst, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Hawkhurst which include those relating to health, education, leisure, retail and employment and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's at Chittenden Fields, Hawkhurst. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for circa 70 dwellings, in a landscape setting, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Chittenden Fields, Hawkhurst due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Chittenden Fields site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This therefore contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the norm for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tunbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)

- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim

conclusions (11th December 2020) (appendix 8)• Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)• North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy STR/HA1: The Strategy for Hawkhurst Parish and the omission of land at Chittenden Fields as a housing allocation for 70 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Chittenden Fields, north of High Street (A268), Hawkhurst (SHLAA ref 2) – failure to include as an allocation in policy STR/HA1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Chittenden Fields, Hawkhurst should be allocated for residential development (SHLAA ref 2). This site can accommodate 70 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Chittenden Fields, Hawkhurst, can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Chittenden Fields site would be a logical addition to the existing development in Hawkhurst and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Hawkhurst as defined on the Local Plan Proposals Map (Inset Map 15).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocate changes to the extent of the defined settlement area of Hawkhurst together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Hawkhurst (Consistent with paragraph 77 of NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Chittenden Fields, north of Highs Street, Hawkhurst (SHLAA ref 2) should be included as an additional allocation within draft policy PSTR/HA1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area’s minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (page36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area’s housing need. It confirms that the area’s housing need

remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South East. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.3 The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority commits to delivery within policy STR1.

5.4 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.5 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3×1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the authority should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.6 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing Needs of other Authorities

5.7 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.8 In addition, paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.9 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach. For the reasons detailed in the representations, had the draft Submission Local Plan included the Chittenden Fields, Hawkhurst site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.10 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.11 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells' analysis.

5.12 The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.13 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.14 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take.

5.15 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.16 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.17 The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement

for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.18 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.19 Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.20 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.21 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore the Plan should be found not to be legally compliant and should not be examined further.

5.22 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of the Plan Period

5.23 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 (now 4th June 2021), followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.24 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.25 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.26 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months).

As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.27 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.28 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.29 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land at Chittenden Fields, north of High Street, Hawkhurst. For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.30 The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings. 5.31 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings. 5.32 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Chittenden Fields, north of High Street, Hawkhurst. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.33 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing.

5.34 This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.31 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.32 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Chittenden Fields, north of High Street, Hawkhurst. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.33 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing.

5.34 This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Chittenden Fields, north of High Street, Hawkhurst should be included as a housing allocation for approximately 70 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Chittenden Fields, Hawkhurst.

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.35 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed.

5.36 The Council has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose Plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.37 Irrespective of the failure to comply with the Duty to Co-operate, it is our opinion that the Policy cannot be said to be sound on the basis for the reasons summarised as follows:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated; b) It is not positively prepared as it fails to boost the supply of housing

by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); ande) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.38 In order to address these matters of soundness, several amendments are suggested:

1. That policy STR1 is amended to:A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.
2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1. Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area's minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2. The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an areas housing need. It confirms that the area's housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review.

5.3. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South East.

5.4. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.5. The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority commits to delivery within policy STR1.

5.6. The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.7. Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3×1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the Council should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.8. In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing needs of other authorities

5.9. As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.10. In addition, paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs.

5.11. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.12. A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach.

5.13. For the reasons detailed in the representations, had the draft Submission Local Plan included the land west of Iden Green Road, Benenden site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.14. The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.15. The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within

appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells's analysis.

5.16. The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.17. Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.18. Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take.

5.19. The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells).

5.20. The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.21. The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.22. The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.23. The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.24. Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.25. Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.26. As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore, the Plan should be found not to be legally compliant and should not be examined further.

5.27. If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of Plan period

5.28. Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.29. A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.30. The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.31. Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.32. As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.33. To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.34. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa.

5.35. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land west of Iden Green Road, Benenden. For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.36. The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.37. For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.38. In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings.

5.39. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients on land west of Iden Green Road, Benenden. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.40. The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing. This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.41. The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.42. Irrespective of the failure to comply with the Duty to Co-operate, the policy is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); and
e) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.43. To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR1 is amended to:

A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.

2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1839, Policy STR9 (PSLP_1848), Policy PSTR/RU1 (PSLP_1856) and Policy STR/SS3 (PSLP_1857). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60). This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Rusthall, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Rusthall which include those relating to health, education, leisure, retail and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with replacement with an allocation at Home Farm, Rusthall. For the reasons detailed in this submission, growth at Home Farm, Rusthall due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Home Farm site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes.

1.4 This contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (Appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (Appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (Appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (Appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (Appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (Appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (Appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (Appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (Appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (Appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Developments

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/RU1: The Strategy for Rusthall Parish and the omission of land at Home Farm, Lower Green Road (Site Ref: 60)

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) – failure to include as an allocation in policy PSTR/RU1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Home Farm, Lower Green Road, Rusthall should be allocated for residential development (SHLAA ref 60). This site can accommodate 25 dwellings (including a policy-compliant level of affordable housing) and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Home Farm, Rusthall can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Home Farm site would be a logical addition to the existing development in Rusthall and should consequently be included in the defined extent of the village, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Rusthall alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Rusthall in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) should be included as an additional allocation within draft policy PSTR/RU1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period - Robustness of Supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area’s minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area’s housing need. It confirms that the area’s housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas’ high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South-East.

5.3 The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.4 The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the Council commits to delivery within policy STR1.

5.5 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.6 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3 x 1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the Council should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.7 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing needs of Other Authorities

5.8 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.9 Paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs.

5.10 Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.11 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach. For the reasons detailed in the representations, had the draft Submission Local Plan included the Home Farm, Rusthall site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.12 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.13 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by

the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells's analysis.

5.14 The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.15 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.16 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the Council to take.

5.17 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.18 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

"6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings."

5.19 The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty.

5.20 As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.21 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.22 Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.23 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.24 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Accordingly, the Plan should be found not to be legally compliant and should not be examined further.

5.25 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of Plan period

5.26 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.27 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.28 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.29 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.30 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.31 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.32 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land at Home Farm, Lower Green Road, Rusthall.

5.33 For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.34 The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.35 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the Plan is consequently between 5,976 and 6,361 dwellings.

5.36 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings.

5.37 It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Home Farm, Lower Green Road, Rusthall. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.38 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing. This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

10. OVERALL CONCLUSIONS

10.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Home Farm, Lower Green Road, Rusthall (Site Ref: 60) should be included as an allocation.

10.4. These matters can consequently be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Home Farm, Rusthall (Site Ref: 60).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.39 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.40 Irrespective of the failure to comply with the Duty to Co-operate, the policy is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); and
e) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.41 To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR1 is amended to:

A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.

2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1876, Policy STR9 (PSLP_1879), Policy PSTR/BM1 (PSLP_1881) and Policy STR/SS3 (PSLP_1882). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) have a controlling interest in land at Ashes Plantation, Maidstone Road, Matfield (Site Ref: 353).

1.2 The site was allocated in the Regulation 18 Draft Local Plan (Sept 2019) as a suitable and sustainable location to provide for 30-60 dwellings under Policy AL/BM3.

1.3 The council's decision to deallocate the site is not supported by the evidence base including this site assessment set out in the sustainability appraisal. Accordingly, the site should be reinstated as a housing allocation on similar terms to the wording set out in former Policy AL/BM3.

1.4 For the reasons set out below, we are of the view that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Matfield. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations, which approach would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.5 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client at Ashes Plantation, Matfield. The site affords a logical opportunity in helping to meet identified housing needs and could provide for up to 60 dwellings, to include a policy-compliant level of affordable housing.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 1)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BM1: The Strategy for Brenchley and Matfield Parish and the omission of land at Ashes Plantation as a housing allocation for up to 60 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Ashes Plantation, Maidstone Road, Matfield (SHLAA Ref: 353)

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these polices, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Ashes Plantation, Maidstone Road, Matfield (SHELAA Ref: 353) should be allocated for housing development.

3.6 Our representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Site Ref: 353 (Reg 18 Local Plan allocation Ref: AL/BM3), can also supply homes to resolve this issue.

3.7 As detailed in the representations, the site represents a logical addition to the existing development in Matfield and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Matfield as defined on the Local Plan Proposals Map (Inset Map 21).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Matfield together with amendments to other policies of the plan.

4.8 These amendments would reflect the view taken by the Council in allocation the site at the Regulation 18 stage in preference to locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area's minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area's housing need. It confirms that the area's housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South East. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.3 The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority commits to delivery within policy STR1.

5.4 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.5 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3 x 1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the authority should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.6 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing Needs of other Authorities

5.7 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa.

5.8 We consider that the Council should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.9 In addition, paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities.

5.10 The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the Council incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.11 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach.

5.12 For the reasons detailed in the representations, had the draft Submission Local Plan included the Ashes Plantation site (SHELAA Ref: 353), this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.13 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the Council had failed to comply with the Duty to Co-operate.

5.14 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 2) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Well's analysis.

5.15 The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore, the Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach.

5.16 The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.17 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 3). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the Council had achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.18 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take.

5.19 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 1). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.20 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.21 The TMBC LP Inspector (appendix 1) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.22 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.23 Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.24 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.25 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore the Plan should be found not to be legally compliant and should not be examined further.

5.26 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of the Plan Period

5.27 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 (now 4th June 2021), followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.28 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.29 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.30 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.31 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.32 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.33 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land at Ashes Plantation, Matfield. For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.34 The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,221 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.35 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.36 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet

needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed.

5.37 One site which should be included as an allocation is the land controlled by our client at Ashes Plantation, Matfield.

Conclusions

5.38 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing.

5.39 This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Ashes Plantation, Maidstone Road, Matfield should be included as a housing allocation for up to 60 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Ashes Plantation, Matfield (Site Ref: 353).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.40 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed.

5.41 The Council has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose Plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.42 Irrespective of the failure to comply with the Duty to Co-operate, it is our opinion that the Policy cannot be said to be sound on the basis for the reasons summarised as follows:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); ande) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.43 In order to address these matters of soundness, several amendments are suggested:

1. That policy STR1 is amended to:

A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.

2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph Nos. 4.39, 4.40, 4.41, 4.48

[TWBC: see also PSLP_976 under Policy STR 3 Brownfield Land]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraphs 4.39, 4.40, 4.41, 4.48 of the Local Plan place great emphasis on maintaining the integrity of the Green Belt and High Weald Area of Outstanding Natural Beauty (AONB), confirming that these are critical considerations in the distribution of development, and that the effective use of brownfield and urban land across the borough can make a significant contribution to avoid unacceptable impacts on these protected areas, and in doing so deliver overall sustainability benefits.

As a result, the development strategy set out in Policy STR 1 has been refined from that of the Draft Local Plan to provide greater urban intensification/brownfield site development.

Given the importance that is placed on the effective use of brownfield and urban land in the NPPF1 and in the explanatory text that supports Policy STR1, it is strange that the Council is relying on a windfall allowance to deliver a considerable proportion of its development need from such a significant land use category, particularly when there are large previously developed sites such as HMP Blantyre House, Horden, Goudhurst located within the Borough that may become available for alternative development during the plan period. It should also be recognised that whilst HMP Blantyre House is located outside of the Goudhurst Limits to Built Development, it is not located within the Greenbelt or the High Weald AONB, which the Local Plan is seeking to protect.

HMP Blantyre House is in the ownership of the Ministry of Justice and is a substantial property that extends to 11.75 hectares. It has incrementally developed over time from its original use as a Fegan Home for Boys, through its conversion to a Detention Centre for young offenders, before its final conversion to a resettlement prison for long term prisoners, which was designed to prepare men for their eventual release through training, education and lifestyle skills. The Blantyre House estate is therefore much more than just the main residential accommodation; it has a range of subsidiary buildings and infrastructure that extend the developed footprint of the site comprising some 26 buildings, a swimming pool, farm area, and associated hardstanding and car parking, all of which is consistent with the definition of previously developed land contained within Annex 2 of the NPPF2.

Blantyre House officially closed as a resettlement prison in 2019 and had been vacant for more than 2 years prior to that. Substantial decommissioning of the site has also been undertaken. The Ministry of Justice is currently considering the property's appropriateness for alternative secure accommodation uses within the same use class (C2a), but the property may become surplus to requirements during the plan period, at which point it will be marketed and sold for alternative uses.

This substantial, previously developed site would, at this point in time enter a new chapter in its lifecycle, and a new future use would need to be found otherwise there is a significant risk that it will fall into dereliction, which would disbenefit local residents and harm the local environment. This would be contrary to the Council's policy direction that such land can make a significant contribution to the development needs of the Borough, thereby avoiding unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB, and in doing so deliver overall sustainability benefits.

Leaving the future of such a substantial previously developed land asset to be resolved through the windfall allowance of the Local Plan is not considered to represent positive planning, and is certainly not the most effective strategy for finding the right solution for the re-purposing/re-use/re-development of such an important previously developed site.

It is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement³, as well as a reasonable alternative development site for the settlement of Goudhurst⁴, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the site's accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outcome for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of their future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site-based solutions will be able to be found that will ensure that such an important previously developed property and land asset does not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Providing positive, effective, and clear policy guidance on the future of such substantial previously developed sites approach is clearly aligned and consistent with national policy and advice, specifically paragraph 118. and 79. of the National Planning Policy Framework (NPPF) where planning policies should:

118. (a) encourage multiple benefits from both urban and rural land, including through mixed use schemes and taking opportunities to achieve net environmental gains – such as developments that would enable new habitat creation or improve public access to the countryside; 118. (d) promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained, and available sites could be used more effectively; and 79. (c) re-use redundant or disused buildings and enhance their immediate setting.

Paragraph 119 of the NPPF further supports the case for specific policy guidance for substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB. This paragraph makes it clear that local planning authorities should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites held in public ownership where this can help to bring more land forward

for meeting development needs and/or secure better development outcomes. HMP Blantyre House is currently within public ownership (MoJ) and the landowner, MoJ, has previously made it clear to the Council that the property may become surplus to requirements during the plan period.

For the Local Plan to be positively prepared and justified, specific attention must be paid to substantial previously developed sites such as HMP Blantyre House that lie outside of Limits to Development but are not within the Green Belt or High Weald AONB.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

An additional policy criterion 10. should be added into policy STR1 that safeguards substantial previously developed sites that are located in the Countryside but not within the Green Belt or High Weald AONB for future development, where such development will make an important contribution to meeting the development needs of the Borough over the whole of the Plan period.

The following wording for the additional policy criterion 10. is suggested as follows:

10. Safeguard substantial previously developed sites that are located in the Countryside but outside of the Green Belt or High Weald AONB for future development, where such development will make an important contribution to meeting the development needs of the Borough over the whole of the Plan period and can demonstrate through a site wide masterplan that there will be no material or adverse effect on the character and amenities of the surrounding area, including an assessment against criteria 3. of Policy STR3 Brownfield Land.

Supporting explanatory text should be added in support of this additional criterion, which recognises the contribution that such sites can make to the future development needs of the Borough and assist in reducing unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB and in doing so deliver overall sustainability benefits. Without such safeguards there is a significant risk that these sites will fall into dereliction, resulting in disbenefits to local residents and harm to the local environment, particularly the Greenbelt and High Weald AONB.

A new table 6. should be added to clearly identify these substantial previously developed sites that are located in the Countryside but not within the Green Belt or High Weald AONB. HMP Blantyre House should be included within this table.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

On the basis that the property may become surplus to requirements during the plan period, and as a responsible public sector landowner⁵, MoJ considers it important that every opportunity is given to exploring all reasonable approaches to achieving the optimum planning outturn for such a large previously developed site in the countryside. Having the ability for MoJ's planning advisors Cushman & Wakefield to participate in the relevant hearing sessions represents positive planning to the MoJ, particularly in working with the Council and Inspector to achieve the most effective strategy and solution for the future re-purposing/re-use/re-development of such an important previously developed site.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Reiterating our representations made in question 5. above, it is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement⁶, as well as a reasonable alternative development site for the settlement of Goudhurst⁷, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the site's accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outturn for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of its future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside the concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site based solutions will be able to be found that will ensure that such important previously developed property and land assets do not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on **“It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.”** Objectives should be in place to achieve this not assumptions!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

While we consider the local plan to have been positively prepared, Natural England advises that we consider the local plan fails the test of soundness as its Development Strategy (STR 1) and the major development site allocations* within the High Weald Area of Outstanding Natural Beauty (AONB) **are not consistent with national policy** with regard to conserving and enhancing the landscape and scenic beauty within the AONB (NPPF Paragraphs 11 and 172).

Natural England also advises that the Development Strategy (STR 1) and the major development site allocations* within the AONB are not justified because we do not consider that it has been demonstrated that the allocation sites are deliverable without resulting in an adverse impact on the High Weald AONB, considered against reasonable alternatives.

*The major development site allocation policies that we consider to fail the test of soundness are:

- . AL/RTW 17 Land adjacent to Longfield Road
- . AL/CRS 1 Land at Brick Kiln Farm, Cranbrook
- . AL/CRS 2 Land south of Corn Hall, Crane Valley, Cranbrook
- . AL/CRS 3 Turnden Farm, Hartley Road, Cranbrook (**which is currently subject to a live Public Inquiry which Natural England is attending as a rule Six party**)
- . AL/HA 4 Land off Copthall Avenue and Highgate Hill
- . AL/BM 1 Land between Brenchley Road, Coppers Lane and Maidstone Road
- . AL/PE1 Land rear of High Street and west of Chalket Lane
- . AL/PE2 Land at Hubbles Farm and south of Hastings Road
- . AL/PE3 Land north of the A21, south and west of Hastings Road

Please see our full letter response, which we have emailed with this representation form, for detailed comments regarding our advice on soundness and improvements that could be made to the local plan.

[TWBC: response as follows]

Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation(Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations)

Thank you for your consultation on the above dated 26 March 2021 which was received by Natural England on the same date. We welcome the level of consideration that Tunbridge Wells Borough Council (TWBC) have taken to address some of the issues that we raised during the Regulation 18 consultation in our response dated 19th November 2019.

We recognise TWBC's commitment to working with us and their transparency regarding their methodology towards their updated Development Strategy (STR 1) and Site Allocations. We welcome the significant improvements that have been made such as dropping a number of major development allocations in favour of smaller developments that are more sensitive to the AONB. However, we cannot advise that the plan has met the NPPF tests; specifically due to the plan's assessment of the need for major development site allocations within the Protected Landscape and the determination of these allocations prior to them being tested through the plan-led approach, which need to be addressed before we can advise that a sound local plan can be secured.

The first section of this letter outlines a summary of our response including our comments on soundness. The following appendices provide more detailed comments to supplement our overarching response:

1. Development Strategy (STR 1)
2. Major development allocations within the High Weald AONB
3. Sustainability Appraisal
4. Strategic site allocations in the setting of the High Weald AONB
5. Habitats Regulations Assessment
6. Pre-submission local plan policies

Soundness

While we consider the local plan to have been positively prepared, Natural England advises that we consider the local plan fails the test of soundness as its Development Strategy (STR 1) and the major development site allocations* within the High Weald Area of Outstanding Natural Beauty (AONB) are **not consistent with national policy** with regard to conserving and enhancing the landscape and scenic beauty within the AONB (NPPF Paragraphs 11 and 172).

Natural England also advises that the Development Strategy (STR 1) and the major development site allocations* within the AONB are not justified because we do not consider that it has been demonstrated that the allocation sites are deliverable without resulting in an adverse impact on the High Weald AONB, considered against reasonable alternatives.

*The major development site allocation policies that we consider to fail the test of soundness are:

- AL/RTW 17 Land adjacent to Longfield Road
- AL/CRS 1 Land at Brick Kiln Farm, Cranbrook
- AL/CRS 2 Land south of Corn Hall, Crane Valley, Cranbrook
- AL/CRS 3 Turnden Farm, Hartley Road, Cranbrook **(which is currently subject to a live Public Inquiry which Natural England is attending as a rule Six party)**
- AL/HA 4 Land off Copthall Avenue and Highgate Hill
- AL/BM 1 Land between Brenchley Road, Coppers Lane and Maidstone Road
- AL/PE1 Land rear of High Street and west of Chalket Lane
- AL/PE2 Land at Hubbles Farm and south of Hastings Road
- AL/PE3 Land north of the A21, south and west of Hastings Road

Appendices 1, 2 and 3 of this letter provides more detailed comments regarding our advice on soundness and make suggestions for ways to address our concerns. Other policies referred to in this letter are not considered to be unsound and our advice regarding these is given to help the council improve the overall suitability of the local plan and to highlight policies that we support.

Exploring alternatives

We advise that the major development allocations within the AONB (listed above) should not be pursued and that alternative approaches should be further explored to avoid negative impacts on the AONB by reducing the size and scale of these allocations. This should be informed by engagement with Natural England and the High Weald AONB Unit. Policies should sensitively consider non-major development within the AONB and on any rural and edge of settlement sites in line with LVIA's, the High Weald Management Plan (2019-2024) and a landscape-led approach. This approach has been taken by Mid Sussex District Council's adopted local plan (2014-2031) which also contains a significant area that is within the High Weald AONB (see Appendix 3 for our comments regarding the Sustainability Appraisal and alternative options).

Summary of response

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Appendix 1: Development Strategy (STR 1)

Summary of Regulation 18 response

In response to the Tunbridge Wells Borough Council (TWBC) Draft Local Plan consultation (Regulation 18) in November 2019, Natural England expressed serious concern regarding the Development Strategy's allocation of numerous major development sites within the High Weald Area of Outstanding Natural Beauty (AONB). This is because we considered these allocations would cause direct, permanent and significant harm to a nationally important designated landscape, which cannot be mitigated to reduce adverse impacts to an acceptable level.

We strongly advised that the proposed Development Strategy was not justified or consistent with national policy as it did not meet the exceptional circumstances criteria set out in NPPF para 172, which states that:

"Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks and the Broads

The scale and extent of development within these designated areas should be limited' and that 'Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.' The NPPF then states that consideration of such applications should include an assessment of:

a) The need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) The cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) Any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated."

We advised that *'it is not possible to mitigate the significant adverse impacts arising from this level of development within and in the setting of the AONB. Major development should be located outside of the AONB, and designated landscapes should not be relied upon to meet housing needs within the Borough.'*

Overarching comments

We recognise and welcome the level of effort and consideration that TWBC has made to address our previous concerns by using LVIA evidence and drawing on Natural England's advice to reassess the allocation of major development within the AONB. As a result of this process, we recognise and support TWBC's decision to delete a number of major development site allocations in the AONB.

These deletions include Hawkhurst Golf Course, where a planning application at the site has recently gone to appeal due to non-determination. We fully support TWBC's decision that it would have refused planning permission for the proposed development, due, amongst other matters, to the significant adverse impact it would have on the AONB, and that the proposal failed to satisfy the exceptional circumstances tests set out within para 172 of the NPPF.

Whilst we support the positive changes that have been made to the allocations in the pre-submission local plan, we advise that the plan is unsound and not consistent with national planning policy due to

the major development allocations that are proposed to remain within the AONB. As we advised at the Regulation 18 stage of the local plan, we do not consider that AONBs are suitable locations for major development. Natural England has an in-principle objection to major development within the High Weald AONB as we consider it would result in significant harm to the purposes of designation of this nationally important landscape.

Evidence for managing impacts on the AONB

Natural England welcomes the use of Landscape and Visual Impact Assessments (LVIAs) to inform the design, extent and layout of non-major development within the AONB and in the setting, but it is our view that the LVIAs do not provide adequate assurance that the effects of the development on the landscape and scenic beauty of the nationally designated and sensitive landscape of the High Weald could be sufficiently mitigated. In particular, we do not support that developing within the AONB can be justified where sites are in poor condition, have fewer AONB components or where attempts will be made to enhance retained parts of the AONB on or near site.

Natural England's advice is that the AONB's designation purpose to conserve and enhance is very difficult to achieve if significant parts of it are permanently lost to major development built directly onto it. This is because it is likely to entirely alter the landscape character across the site and, potentially, the surrounding area, especially where its character is intrinsically linked to the absence of adjacent or nearby development. In contrast, very carefully designed, smaller scale housing schemes that reflect local vernacular and settlement morphology, may achieve genuine enhancement or at least keep the level of impact on the AONB below a significant threshold.

Addressing development within the AONB and its setting

Allocations within the AONB itself may be more acceptable if their size and scale are significantly reduced such that they no longer represent major development and are consistent with the objectives of the AONB management plan. Natural England's view is that any development within the AONB must be very sensitively designed and modestly scaled. Sensitive design can include reflecting the local vernacular in terms of built design and materials, respecting existing settlement morphology, and how that settlement relates to the wider landscape both visually and in terms of physical connectivity, and supported by appropriate green infrastructure.

Natural England's concern regarding the impacts of major development on the AONB are added to by the significant pressure of development in the setting of the AONB, particularly at Tudeley Village (STR/SS 3) and Paddock Wood/East Capel (STR/SS 1). We advise that development in the setting of the AONB needs to be sensitively considered using a landscape-led approach (see Appendix 4 for our comments and suggestions).

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these

allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'.

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('-' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/SS1 (PSLP_2076), Vision and Strategic Objectives (PSLP_2078), Policy STR1 (PSLP_2079), Policy STR4 (PSLP_2080) and Development Management Policies (PSLP_2081)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies

1.4.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.4.11 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on “**It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.**” Objectives should be in place to achieve this not assumptions!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Development Strategy

5.1. Policy STR1 (The Development Strategy) of the Local Plan is not positively prepared, not justified, not effective and inconsistent with national policy.

5.2. The proposed Development Strategy and the distribution of allocations bears no relationship to the Council's Settlement role and Function Study (February 2021). The policy is not justified in relation to the settlement study as evidenced below:

- . **Royal Tunbridge Wells** is the 'main settlement of the borough' with 42% of the borough's population (as of 2011) yet with proposed allocations of 1,536 dwellings this represents just 16% of the growth (9,381 dwellings) proposed in the borough.
- . **Southborough** scored the highest in the Council's settlement study and has the borough's second highest population yet only 42 dwellings are proposed in Southborough in the Local Plan which equates to 0.4% of the growth proposed in the borough.
- . **Cranbrook** scored second in the settlement study due to its excellent services and retail in the town centre and is proposed as Group B settlement yet just over 400 dwellings are proposed here. Very little development has taken place in Cranbrook in previous years, it is not affected by flooding, has capacity within the town boundaries and sites previously approved but have not been built out.
- . **Paddock Wood** was ranked third in the settlement study yet 43% of the borough's housing growth is proposed at Paddock Wood.
- . **Hawkhurst**, despite being ranked just below Paddock Wood in the settlement study only has 170 dwellings proposed representing just 2% of the housing growth planned in the borough.

5.3. The Council's Development Strategy Topic Paper (February 2021) fails to provide a clear and logical explanation as to how the Council decided on its preferred Development Strategy.

1 Settlement Role and Function

6.1. The Council's evidence and approach to determining the role and function of the borough's settlements is not justified, not effective and inconsistent with national policy.

6.2. The Settlement Role and Function Study (February 2021) does not include Royal Tunbridge Wells. It gives the reason for this as "*its status as the main settlement of the borough*". Surely the fact that it is the main settlement of the borough should have led to it being assessed as part of the study. After all the 'Purpose of the Study' in addition to "*providing an updated evidence base to help inform the settlement hierarch of the borough... is to also give an indication of each settlement's level of*

sustainability and potential to accommodate further growth” 21. How can it possibly be that the role of the main settlement of the borough hasn’t been assessed against the other settlements? Is the Council concerned that including such an analysis would clearly demonstrate the mismatch of the settlement hierarchy and its preferred development strategy whereby the main settlement of the borough is earmarked for very considerably less development than less sustainable settlements such as Paddock Wood?

6.3. To further confuse matters, Southborough is “jointly considered as the main urban area” for the borough however unlike Royal Tunbridge Wells was assessed as part of this study. The study concludes that Southborough is in the ‘Grouping B’ along with Cranbrook, Paddock Wood and Hawkhurst whilst Royal Tunbridge Wells is placed in ‘Grouping A’ on its own. This is extremely confusing.

6.4. The study’s method for creating settlement ‘groupings’ is not sufficiently explained and not really explained at all apart from a few lines in the ‘Conclusions’ section of the study. It states the following regarding the groupings:

- . *“rather than simply categorising the settlements in order of size, the settlements are identified by grouping them in terms of their characteristics, focusing on the range of services and facilities they currently provide”.*
- . *“The findings of this updated Study show that larger settlements also tend to score more highly across the range of sustainability indicators identified in terms of the level of provision of services and facilities”*
- . *“Based on the scores and evidence collected in this Study, a revised table of settlement groupings is set out in Table 6 below. These groupings give an indication of the level of sustainability and appropriateness of these settlements to accommodate further growth in terms of access they provide to services and facilities that their support their sustainability”²²*

[TWBC: for table, please see full representation attached as a supporting document]

6.5. This explanation given regarding the method for determining the groupings is wholly inadequate. It explains that it looks beyond just the ‘size of settlements’ however the study does not set out the size of each settlement either in population or in area. In order to understand population figures for the settlements one must refer to the superseded 2017 Settlement Role and Function Study (see below). However, the population assumptions provided are at the parish level and do not reflect the populations of the settlements themselves.

[TWBC: for table, please see full representation attached as a supporting document]

6.6. Referring to the population table, it is difficult to conclude that Southborough should be in the same grouping as Paddock Wood, Cranbrook and Hawkhurst. Southborough has a population of 12,459 whereas Paddock Wood has the next largest population at 8,253 some 4,206 less residents. Southborough is more than 2.5 times the size of Hawkhurst in population.

6.7. Turning to the assessment of the settlements in the 2021 study Southborough scores the highest here as well followed by Cranbrook with Paddock Wood in third and then Hawkhurst:

- . Southborough (presumably behind Royal Tunbridge Wells) received the highest score / ranking in the study at 100 using the ‘new weighted method’ and using all previous scoring systems as well.
- . Cranbrook trails Southborough in scoring coming in second place with 90 points.
- . Paddock Wood scores 82 points coming third.
- . Hawkhurst scores 71 points coming in fourth.
- . Rusthall scores 59 points coming in fifth.
- . Pembury scores 55 points coming in sixth.

[TWBC: for table, please see full representation attached as a supporting document]

6.8. We make a number of additional critical observations and shortcomings about this important piece of work which claimed to inform the Local Plan’s development strategy:

- . Royal Tunbridge Wells is not included in the Study despite it being the ‘Main Urban Settlement of the borough’ (see above).
- . The methodology is unclear as to how it has arrived at a number of the scores for the ‘new weighted method’ for the 2021 study including but not limited to the scores for bus services.
- . The study does not include population figures for the settlements and relate this back to the level of services and facilities that are present in each settlement. In other words, particular services could be more or less adequate dependent on the population they are serving however the study

provides no indication as to what services and facilities (and investment) are required to make them more sustainable.

- . There is no analysis of the level of public transportation serving the settlements. The study simply says whether there is a bus service at least once an hour Monday – Saturday and whether there is a train station.
- . The study is not locationally specific about any of the infrastructure or services and includes no mapping making it impossible to understand in spatial terms which areas of the borough are and are not well served by services and facilities.
- . The study does not consider cycling and walking which should be seen as the focal point of considering sustainability and planning for healthy places.

6.9. It is extremely difficult to follow the logic of how the Settlement Role and Function and Study has informed the Development Strategy and proposed Local Plan allocations. Our analysis of this is set out in the 'Development Strategy' section of our representations.

[TWBC: for table, please see full representation attached as a supporting document]

1 Housing Need

7.1. TWBC considers that the Housing Need assumptions will need to be carefully examined at the Local Plan Examination in Public and we wish to take part in those hearings, particularly given that the Council's evidence on housing used to support the Local Plan dates back to 2015 (SHMA) with a 2017 update to the SHMA and then a separate 2018 Housing Needs Study and then finally a 2020 Review of Local Housing Needs. These studies were undertaken by multiple consultants, so it is unclear whether the methodologies align and what informed the Council's housing needs assessment at each stage of preparing the Local Plan.

7.2. We note there could be several factors that could require TWBC to update its evidence and reconsider its housing needs assessment such as the impact of Brexit, the impact of the Covid pandemic and potential changes to MHCLG's method for determining housing needs which has changed a number of times in recent years. We also wanted to make TWBC and the Inspector(s) aware of the Office for Statistics Regulation (OSR) report²³ on the robustness of ONS' population projections which was initiated in response to concerns raised by campaigners regarding the accuracy of population projections and mid-year population estimates. It found that the sub-national accuracy of estimates is 'variable' depending on the size and mobility of the population in a given area. It will be important to closely monitor whether the findings of this report result in changes to the assumptions for TWBC and the wider housing market area.

7.3. Policy STR1 (The Development Strategy) sets its housing target at 12,204 dwellings yet the Housing Supply and Trajectory Topic Paper for the Pre-Submission Local Plan shows a delivery of 13,257. Whilst we do not consider this housing delivery figure to be credible as we set out elsewhere in these representations, the Council is effectively planning for an additional 8.6% dwellings more than is required. The only explanation provided is in the topic paper which states that *"this 8.6% buffer is considered helpful to allow for the potential delay/non-delivery of sites and, potentially for otherwise contributing further to meeting housing needs"* (paragraph 7.1). Presumably the reference to 'contributing further to meeting housing needs' is in reference to Sevenoaks however the Sevenoaks Local Plan has been found unsound so any assumptions about their potential housing shortfall cannot be relied upon for the Tunbridge Wells Local Plan.

1 Housing Trajectory and Housing Delivery Assumptions

8.1. The Council's evidence and approach to determining the housing trajectory and housing delivery assumptions is not justified and not effective and inconsistent with national policy.

8.2. Paragraph 73 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites"*.

8.3. Paragraph 75 of the Framework states: *"To maintain the supply of housing, local planning authorities should monitor progress in building out sites which have permission. Where the Housing Delivery Test indicates that delivery has fallen below 95% of the local planning authority's housing requirement over the previous three years, the authority should prepare an action plan in line with national planning guidance, to assess the causes of underdelivery and identify actions to increase delivery in future years"*.

8.4. TWBC has prepared a Housing Supply and Trajectory Topic Paper for Pre-submission Local Plan (February 2021) which informs the Council's spatial strategy. In 2018, TWBC had met 88% of its

housing need (monitored between 2015 and 2018), including the 5% buffer on its housing land supply position as required by the NPPF and the standard method.

8.5. According to the Lichfields Review of the new Standard Method (2020)²⁴, in Tunbridge Wells there has been no deviation from the delivery rates set out under the Standard Method in 2017, which remains at 678 dwellings per annum (an increase of 278 dwellings per annum from the adopted Local Plan requirement).

8.6. TWBC is seeking to deliver most of its housing need for the Plan period through a smaller selection of larger sites, focused primarily on Paddock Wood (and Capel) and a new garden settlement at Tudeley. The Council is particularly reliant on the cooperation of developers and landowners around Paddock Wood to meet its annual housing targets and therefore, the timeframe for the implementation of this development strategy must be supported by clear and convincing evidence.

[TWBC: for table, please see full representation attached as a supporting document]

8.7. Figure 7.1 above outlines the proposed delivery rate. For Tudeley STR/SS 3, TWBC sets a delivery rate of 150 units for the first 10 years of delivery from 2025/26, then rising to 200 per annum from 2035/36 (total of 2100 dwellings in 13 years). For Paddock Wood STR/SS 1, TWBC outlines a proposed delivery rate of 300 units per annum, reducing to 240 dwellings in 2036 (total of 3540 dwellings in 12 years). This phasing methodology is set at 299 dwellings per annum. Land at Mascalls Farm is projected to deliver 103 dwellings distributed between 2024 and 2027.

8.8. Within the Reg 19 Local Plan, TWBC recognises the higher degree of complexity associated with the delivery of larger sites, advising that *“Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites.”*

8.9. TWBC does not already have any sites that are allocated or have extant planning permission for more than 2000 dwellings, and therefore, relies on national and other local evidence to inform its phasing assumptions. The Council has based its buildout rates on an analysis of the gap between historic permissions granted and historic site buildout rates across the borough, and on discussions with developers, and evidence gathering as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA).

Nationally recognised evidence and studies on lead times in construction include:

- . the Letwin Report and Independent Review of Buildout Rates (Letwin, 2018)
- . Start to Finish: How Quickly do Large-Scale Housing Sites Deliver? (Lichfields, 2016)
- . Housing Supply Research (CPRE, 2014)
- . Permissions to Land: Busting the myths about house builders and land banking (HBF, 2014)
- . Urban Extensions Assessment of Delivery Rates (Savills, 2014)
- . MHCLG Independent Review of Build Out Rates (2018)

[TWBC: for table, please see full representation attached as a supporting document]

8.10. PWTC considers that TWBC has failed to appropriately outline how a housing figure of 3,540 (average) homes is deliverable within the Plan period and is concerned that there has been insufficient regard to the time taken for new developments to pass through both the planning and construction phases. Figure 2 demonstrates that, prior to the substantive construction phase, there is already a significant delay with the grant of permission for larger sites of between 3 and 7 years.

8.11. The Lichfields ‘From Start to Finish’ Review Second Edition (2020) and the Letwin Review (2018) also highlight the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of housing trajectory that are beyond the immediate control of a local planning authority.

8.12. For larger sites (2000+ homes), the Lichfields Review (2020) outlines an average lead time of 8.4 years for the average time from validation of the first planning application to the first dwelling being completed²⁵. This is based on an average build-out rate of 160 dwellings per annum. In the case of Paddock Wood, it would take 22.5 years to deliver the upper figure of 3590 dwellings. This corroborates the Town Council's position that the Plan period is short-sighted, and not supported by appropriate evidence to justify this rate of delivery within such a constrained timeframe.

[TWBC: for figure, please see full representation attached as a supporting document]

8.13. The Letwin Review (2018) is also helpful in outlining a median build-out rate for large sites at 15.5 years, which is 3.5 years longer than TWBC's proposed build-out rate for Paddock Wood sites.

8.14. TWBC makes the case that the delivery of the Paddock Wood urban expansion is set purposefully higher than identified in the Letwin Review, given the extent of masterplanning work carried out by David Lock Associates involving input from the four main housebuilders (Crest Nicholson, Dandara, Redrow and Persimmon).

8.15. However, there is a total of 8 developers with control of the land around Paddock Wood, and whilst 4 of these developers are working with the Council, the masterplan is still lacking on any prescriptive detail on how each site would be released with cooperation from each developer and landowner. A lack of transparency in this regard casts further doubt on TWBC's ability to monitor both the quality and deliverability of larger sites. If development phasing remains poorly structured at the Regulation 19 stage, this risks setting unrealistic expectations of developers and stakeholders for the rest of the Plan period.

8.16. PWTC also considers that it is impossible to enforce such an even distribution of housing each year (300 dwellings per annum for 11 years). TWBC's housing supply and trajectory figures fail to reflect the lead times associated with various stages of the planning process, including:

- . The preparation of relevant Supplementary Planning Documents which aid the delivery of larger sites;
- . The Pre-application process, including consultation and engagement with relevant consultees and stakeholders;
- . Potential delays in determining Outline planning permissions;
- . Approval of Reserved Matters and agreement of relevant phasing;
- . The discharge of conditions;
- . The preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement;
- . Securing of relevant funding (including S106 and CIL); and
- . Delivery of on-site and off-site infrastructure, (associated with larger sites and the creation of a new Garden Settlement).

8.17. TWBC has also failed to have sufficient regard to Green Belt and Flood risk constraints affecting land surrounding Paddock Wood to the north and the west. It is still not clear how the masterplan will tackle such an important issue of flood risk and the triggers for necessary flood engineering and SuDS, which do not appear to have been incorporated into the housing trajectory.

8.18. The Regulation 19 Local Plan highlights that the Green Belt surrounding the key settlement, including the western edge of Paddock Wood "*contributes significantly to the discrete identity of and setting of settlements*" (page 26), and yet, there is still very limited justification for the development of this scale. The TWBC Development Strategy Topic Paper (2021) highlights that STR/SS 1 Land at Capel and Paddock Wood and STR/SS 3 Tudeley Village are both classed as having an overall harm rating of 'High'.

8.19. Delivery will also rely on cooperation with adjoining authorities and liaison and negotiation with statutory consultees. Even the slightest delay in the start date will result in a slower performance, which is then likely to render the assumed delivery rates of a wider allocation unachievable.

8.20. Overall, the Town Council believes that a further review of housing trajectory is urgently needed, considering a more realistic and steadier rate of delivery. Given the broader concerns relating to the appropriate length of the Plan period - where there is a reliance on large-scale development and new settlements - the TWBC's housing trajectory must be reconsidered. Further evidence gathering should also assess whether TWBC should be considering a larger number of smaller sites to meet housing delivery across the Local Plan period.

8.21. Notwithstanding the technical evidence undertaken by TWBC, it remains the case that the Council is seeking to deliver a significant proportion of its overall housing need within a wholly unrealistic timeframe, against Green Belt and Flood Risk constraints.

8.22. The proposed delivery of up to 3,590 homes in one location will inevitably flood the housing market within one location, resulting in a negative impact on sustainable growth across the borough as a whole.

8.23. The Council's poorly thought-out assumptions regarding housing delivery and trajectory render the Local Plan unsound, as it fails the tests of being justified, effective and consistent with national

policy, contrary to the requirements of paragraph 35 of the NPPF. Further evidence gathering and analysis is required to determine the most appropriate spatial strategy for the delivery of housing across the borough.

1 Employment

9.1. PWTC considers the Local Plan's policies in relation to proposed employment need and allocation to be unsound.

9.2. The Local Plan (Policy STR1 – The Development Strategy) proposes 14 hectares of employment land (Use Classes B and E). This employment land figure is taken directly from the 2016 Sevenoaks and Tunbridge Wells Economic Needs Study²⁶ as confirmed in the Local Plan (see paragraphs 4.20-4.21). Not only is this study out of date prepared nearly five years ago, and obviously before the Covid pandemic, it also does not align with the plan period.

9.3. This point regarding the plan period is confirmed in the Local Plan (see paragraph 4.22) which states *"While the study considered needs up to 2035, rather than 2038, this is regarded as being an appropriate minimum target for the Local Plan period, as both the base date and the end of the plan period have been rolled forward"*. This is reason enough to bring into serious question the employment land figure proposed in the Local Plan. The 2016 study states (see paragraph 20) that *"it is imperative for the Council to monitor its employment land position to ensure the borough remains responsive to changes in the pattern of supply and demand..." and that the assessment of sites should be kept up-to-date as part of the Council's monitoring and updated annually..."*. It also states that *"a comprehensive assessment of economic needs is undertaken at least every five years. An early review to take account of changes in economic circumstances and forecasts arising from Britain's decision to leave the European Union may be appropriate"*. We have not been able to locate employment floorspace monitoring data on the Council's website that should be published at least annually. There was no 'comprehensive assessment of economic needs' undertaken within five years of the 2016 despite the clear recommendation that this would be even more important due to Brexit notwithstanding the Covid pandemic, the radical changes to the Use Class Order and the Sevenoaks Local Plan being found unsound.

9.4. There are many other additional fundamental issues to point out without even needing to delve further into the technical evidence which we set below:

- . The end date of the 2016 study is 2033/2035 which is different to that of the Local Plan which is 2038 (also see our points regarding the need for a longer plan-period of at least 30 years).
- . The start date of the 2016 study is 2013 opposed to the 2020 start date of the Local Plan so the baseline is some seven years different between the key evidence used for employment needs and the start of the plan period.
- . The 2016 study uses the 2015 SHMA to help determine and balance housing and employment needs – the SHMA is now clearly out of date.
- . The Local Plan proposes employment land as Use Classes B and E whilst these uses were not in existence in 2016 so cannot be assumed to be directly comparable.
- . The 2016 study was a joint study with Sevenoaks DC and its evidence base however the Sevenoaks Local Plan was found unsound at examination.

9.5. The Local Plan states (see paragraph 4.24) that *"converting a land target into a floorspace target is difficult...however based on the study's assessment of the mix of business uses, an approximate estimate of the floorspace associated with 14 hectares of land would be of the order of 80,000-120,000sqm. As the recommendation is a minimum, the higher level is preferred"*. It is unclear where this estimate even comes from and how TWBC arrived at this floorspace calculation let alone attempting to understand why the upper end of the range of floorspace is justified. Given that there is a difference of 40,000sqm between the upper and lower estimates this a critical assumption that has no explanation behind it apart from that creating a floorspace target "is difficult".

9.6. At paragraph 4.25 of the Local Plan attempts to explain what type of employment land will be delivered and it explains that *"a range of supply is envisaged: for offices, light manufacturing, general industry, and warehousing, as well as related use not in a specific use class"*. This is an insight into the lack of understanding and strategy TWBC has regarding economic and employment land.

9.7. Paragraph 4.26 of the Local Plan points out that *"It is notable that the recommendations assume that existing well-located employment land and premises be retained in that use"* which suggests that it is not RWBC's intention to take a serious up-to-date look at its employment land (as recommended

by the 2016 study) to positively assess its potential for release to alternative uses such as housing before it looked to meet its housing needs in Paddock Wood and Tudeley.

9.8. Policy STR1 itself is vague about employment land and simply says that 14 hectares of employment (Use Classes B and E) land are developed. It doesn't say where or what the breakdown of the uses. Table 5 of the Local Plan then shows 26.5 hectares of employment land being allocated including 11.2 hectares on two sites in Paddock Wood. This clearly doesn't tally with the 14 hectares across the borough stated in Policy SRT1 and does not explain why the Local Plan is allocating more than double what its stated need is and what the policy says. It then states at paragraph 4.57 that there will be additional floorspace at Tudeley Village and the sites will be proposed in the SPD. Surely any additional land / floorspace would be included in the assumptions.

9.9. Policy STR/SS1 (Paddock Wood), is unjustified as it states that 2,000sqm of commercial floorspace will be provided in three neighbourhood centres and that significant new land for a mix of employment uses on sites to the north and south of Lucks Lane, and to the east of Transfesa Road. The policy does not state the amount of land required for the commercial centres and the employment allocations do not state what type of employment or floorspace. It is impossible to determine how these figures tally against the Development Strategy policy and the 2016 study.

1 Key Diagram

10.1. The proposed Key Diagram in the Local Plan is difficult to read and interpret. The resolution of the proposals makes the accessibility of the Key Diagram very poor and the 'Map Legend' is difficult to interpret on the Key Diagram itself. The Diagram is missing important designations such as Flood Zone 2.

[TWBC: for diagram, please see full representation attached as a supporting document]

10.2. For instance, we make the following critical observations about the Key Diagram and how it is ineffective and is not positively planned:

- . The Map Legend shows three circles for 'existing settlement' and 'scale of growth' which appear to range from 100, 5,000 to 10,000 however it is not possible to understand how this correlates to the settlements on the diagram. Does this refer to the population or existing number of dwellings for instance?
- . The Map Legend includes asterisks next to the 'existing settlement' and 'scale of growth' with fine print below however it is not possible to read the fine print.
- . The Key Diagram only shows Flood Zone 3 whereas it should also show areas covered by Flood Zone 2 as a constraint. Given that Flood Zones do not stop at the administrative boundary the Key Diagram should also show Flood Zones 2 and 3 in neighbouring authorities to give a more realistic and strategic view of the extent of the flood risk facing the north of the borough and the locations where TWBC is proposing the majority of its strategic growth (see Environment Agency Flood Risk Map below showing Flood zones 2 and 3).

[TWBC: for map, please see full representation attached as a supporting document]

- . The Key Diagram should include the existing settlements and proposed growth for the areas in the neighbouring authorities given the extent of cross boundary strategic matters that TWBC has with its neighbours.
- . The Key Diagram includes a number of 'on-line' and 'off-line' road improvements. These are not terms used in the NPPF and are not included in the Local Plan's Glossary. The terms 'on-line' and 'off-line' should be explained in the Local Plan.
- . There are no railway stations shown on the Key Diagram.
- . There is no indication of the proposals for the regeneration of Paddock Wood Town Centre.
- . It does not identify Tudeley as a New Village, it simply shows growth and where the Green Belt is proposed for removal.

1 Policies Map

11.1. TWBC has failed to comply with its own Statement of Community Involvement (SCI) and the Local Plan Regulations in relation to its proposed Policies Map. The Policies Map consists of a series of 'inset' maps for a number of settlements and there is one 'Borough Overview' map provided. However the 'Overview Map' is not a 'Policies Map' as set out in the Local Plan Regulations²⁷ which requires the authority to set out what changes to the Policies Map would result from adoption of the Local Plan. There are entire sections of the borough missing and they have no designations whatsoever shown in the 'Borough Overview' map.

[TWBC: for map, please see full representation attached as a supporting document]

11.2. Even by the Council's own proposed definition the Local Plan maps fail to meet the Council's definition: "Shows on a map all the site-specific policies and proposals set out in Development Plan Documents"²⁸.

11.3. From what the Council has provided it is not possible to ascertain what changes are being proposed to the existing adopted Policies Map.

11.4. Given the points we have raised regarding the 'Policies Map' published for Regulation 19 consultation, we submit that TWBC has failed to clarify what changes are being proposed to the existing Policies Map and has failed to show what the resulting Policies Map and designations are for most of the borough.

11.5. This contravenes TWBC's own Statement of Community Involvement (October 2020) which states that at the Publication State of the Local Plan (Regulation 19) that the Policies Map will be published "showing any changes that would result from the adoption of the plan, are also published"²⁹

11.6. The SCI states that following the Regulation 19 stage that "The Council will consider any points raised during the publicity period and will make minor changes where required. If there are significant issues the Council may withdraw the plan and return to stage 3"³⁰. Unless TWBC can demonstrate that it has shown all the changes to the Policies that would result from the adoption of the plan, it has failed to comply with its SCI and it should run its Regulation 19 stage again to enable all residents and interested parties to respond to its proposed designations throughout the borough.

[TWBC: for table, please see full representation attached as a supporting document]

11.7. We also note that the Local Plan does not identify which current development policies will be replaced by new policies so it has not been possible to comment on the suitability of proposed 'replacement policies' in our representations.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/HA (PSLP_2053), Vision and Strategic Objectives (PSLP_2054), Policy STR1 (PSLP_2055), Policy AL/HA3 (PSLP_2056) and Development Management Policies (PSLP_2057)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

Regulation 18 Local Plan

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

Planning application and non-determination appeal

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.5.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.5.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.5.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.5.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.5.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: PSLP Figure 5 Key Diagram has been duplicated here - see full representation attached]

1.5.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached]

1.5.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.5.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.5.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.5.21 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached]

1.5.22 It should be noted that, as referred to below, TWBC has recently refused planning permission for a 71-unit development on PSLP allocation site AL/HA4 at Highgate Hill/Copthall Avenue, which is proposed for the allocation of 71-79 dwellings. The application was refused on points of principle relating to the impact on Highgate Crossroads and the AONB. Whilst the allocation remains in the draft Local Plan, since the Council appears to be opposed to the scheme in principle, it does call into question whether the site has sufficient political support to be retained in the plan.

Response

1.5.23 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.5.24 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.5.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.5.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large- Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.5.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.5.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.5.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.5.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has

only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.5.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend well beyond 2038.

1.5.32 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.5.33 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with NPPF paragraph 11 and lacks sufficient strategic flexibility.

1.5.34 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley. In particular, the previously proposed allocation at Hawkhurst Golf Club should be added back into the Plan.

1.5.35 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements.

Green Belt vs AONB Release

1.5.36 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.5.37 We acknowledge that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.5.38 *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land *prima facie* suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.5.39 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is possible to channel much of the development beyond this designated area.

1.5.40 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.5.41 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

Housing Delivery

1.5.42 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.5.43 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.5.44 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.5.45 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached]

1.5.46 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.5.47 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]

1.5.48 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.5.49 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.5.50 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.5.51 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.5.52 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.5.53 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing LPA published five year supply no of dwellings see full representation attached]

1.5.54 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The claimed justification for this is that the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.5.55 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

1.5.56 Cedardrive has not given an option to any major national housebuilder and is therefore able to ensure that the site is not land-banked, but rather will be delivered quickly.

Affordable Housing Need

1.5.57 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.5.58 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within subareas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual shortfall of 443 affordable dwellings across the Borough.

1.5.59 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.5.60 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.5.61 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.5.62 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, start.

1.5.63 Cedardrive Ltd has not given an option to any major national housebuilder and is therefore able to ensure that the site is not "land banked".

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Pickhill Developments Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Pickhill Developments Ltd control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft. The Pickhill land is site 70.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

1.3.2 It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.3 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.4 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.3.13 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.3.14 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.3.15 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.3.16 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.3.17 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: Figure 5 Key diagram duplicated here from PSLP - see full representation attached].

1.3.18 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: Policy STR1 duplicated here from PSLP - see full representation attached].

1.3.19 By way of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.3.20 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.3.21 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.3.22 The full proposed distribution of development is set out below.

[TWBC: Table 4 Distribution of housing allocations duplicated here from PSLP - see full representation attached].

Response

1.3.23 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent

Neighbours, we consider the review process should cease and a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.3.24 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.3.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.3.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, housing is unlikely to be delivered at Tudeley until circa 8 years after the first planning permission is approved.

1.3.27 After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.3.28 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council, with minimal units being delivered within the current plan period.

1.3.29 Taking the above into account, our view is that the Council has applied an overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.3.30 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.3.31 Kings Hill is an extremely prudent example to consider in the context of the Paddock Wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases we delivered at lower rates given the need to front load infrastructure.

1.3.32 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

1.3.33 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.3.34 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.3.35 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites such as our client's land should be added to offset the loss of the housing relied upon from Tudeley.

1.3.36 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.3.37 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.3.38 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.3.39 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

1.3.40 As explained, our client's land is suitable, available and achievable and was, in our view, removed as response to our client's planning appeal rather than as a result of and robust planning evidence.

Green Belt vs AONB Release

1.3.41 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.3.42 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.3.43 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.3.44 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.3.45 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.3.46 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.3.47 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and designated area.

1.3.48 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.3.49 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.3.50 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.3.51 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.3.52 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.3.53 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met. For example, on the sites like our clients that were wrongly omitted.

1.3.54 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has term with a deficit in five year supply.

1.3.55 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.3.56 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

- Ancient Woodland (approximately 16% of the borough)- Circa 60 Local Wildlife Sites (approximately 11% of the borough)- Ten Sites of Special Scientific Interest (SSSI)- Five Local Nature Reserves (including one Community Woodland)- One Regionally Important Geological Site, at Scotney Castle Quarry.

1.3.57 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.3.58 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.3.59 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.3.60 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.3.61 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.3.62 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.3.63 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.3.64 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.3.65 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas so as to preserve the status quo in the more affluent villages whilst not delivering housing of all tenures throughout the entire borough meeting the borough wide housing need.

Housing Delivery

1.3.66 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.3.67 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where

a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.3.68 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.3.69 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing housing completion rates 2010 to 2015 see full representation attached].

1.3.70 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times to ensure the new plan is sufficiently flexible.

1.3.71 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.3.72 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.3.73 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.3.74 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.3.75 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.3.76 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.3.77 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing information extracted from the LPA's published supply statements, see full representation attached].

1.3.78 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.3.79 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.3.80 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.3.81 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.3.82 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.3.83 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.3.84 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.85 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely immediately deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Place Shaping Policies

1.3.86 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

1.3.87 Policy STR/CR1 sets the proposed strategy for Cranbrook and Sissinghurst parish and states that Approximately 415 to 429 net new dwellings will be allocated. This represents a substantial reduction on the 718-803 new dwellings that were proposed as part of the Regulation 18 plan. Furthermore, the draft allocations for Hartley have been removed in their entirety.

[TWBC: for extract of proposed proposal map for Cranbrook see full representation attached].

1.3.88 Based on the above context, the place shaping aspects of the strategy are unsound and require modification, including the redistribution of housing proposed at Tudeley to genuinely deliverable sites like our client's land at Hartley that is not major development and is not requiring of an 'exceptional circumstances' case for the land to be released.

1.3.89 As outlined above, Hartley is a moderately sustainable location as found by the Inspector during the course of the recent appeal. Indeed, it is situated within the heart of the hamlet of Hartley and in close proximity to the range of services available in Cranbrook.

1.3.90 The site benefits from good access to public transport links. The bus stops in closest proximity to the site are located on the A229 Hartley Road, approximately 3 minutes' walk to the south of the site access. From these bus stops, Routes 5 and 349 are accessible providing links to Maidstone and Hastings. Further bus stops are located approximately 5 minutes' walk to the north of the site access, again on the A229 Hartley Road. In addition to Routes 5 and 349, Routes 267 and 268 can also be accessed providing links to Tonbridge and Tunbridge Wells. Accordingly, there are opportunities for access to services and facilities without reliance upon private vehicle.

1.3.91 Staplehurst Railway Station is located approximately 11km to the north of the site (via the A229 Hartley Road), equating to a 14-minute drive. From this station, Priory can be accessed, with trains departing to and from London up to six times per hour during weekday peak periods. Additionally, Etchingham Railway Station is located approximately 12km to the west of the site by road and provides access to regular train services between Hastings, Tunbridge Wells and London.

1.3.92 Within the vicinity of the site, there are a number of Public Rights of Way (PRoW) provided, as shown in Figure 2.2 of the supporting Transport Statement [CD6.10]. These routes provide safe, pleasant off-carriageway access to the surrounding countryside. National Cycle Route 18 routes along Park Lane and Water Lane, approximately 1.1km to the south of the site access. This route provides a link between Canterbury and Tunbridge Wells, via Ashford and Tenterden.

1.3.93 In addition to transport linkages, there is access to services by foot. Hartley Farm House and Coffee Shop are accessible from the site in under a five-minute walk. Additionally, a number of services and amenities can be accessed in nearby Cranbrook. These services include further public transport facilities, a supermarket, places of worship, primary and secondary schools, a doctors' surgery, dental practices, banks, a pharmacy, a post office and several public houses. Cranbrook can be accessed via a 25-minute walk, a 6-minute cycle, a 9-minute bus journey or a 4-minute drive.

1.3.94 From a wider perspective, achieving sustainable development means that the planning system has three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives). These being economic, social and environmental objectives.

1.3.95 In this respect, the site is suitable, sustainable, available and deliverable for development, and would help contribute to the borough's immediate housing need in a timely manner. We note that paragraph 68 of the Framework supports the development of small and medium sized developments as they can often be 'built out' quickly.

1.3.96 Household expenditure generated by future residents will help to support economic activity locally and help to sustain the jobs and services within the local area. The new dwellings will also contribute to the public purse in respect of Council Tax and the New Homes Bonus. The scheme will also be capable of contributing to local services and infrastructure.

1.3.97 The site has the opportunity to provide for a quality residential development to meet the needs of the local population. The proposed development can provide circa 8-10 additional homes to meet this supply. This includes a policy compliant mix of market and affordable units.

1.3.98 Having regard to these matters, we challenge the LPA's deletion of the site. Paragraph 103 of the NPPF is clear that the planning system should actively manage patterns of growth and development should be focused on locations which are or can be made sustainable through limiting the need to travel and offering a genuine choice of transport modes. The close proximity of the site to Cranbrook and the services offers residents far greater access to facilities than many of the smaller rural settlements that have defined LBD such as Benenden, Brenchley and other tier three settlements. Accordingly, in a boroughwide context, the appeal site is sustainable.

Development Management Policies

1.3.99 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.3.100 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.3.101 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. On this

basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.3.102 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.3.103 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to provide clear direction to the user.

1.3.104 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a supporting SPD not policy.

1.3.105 Turning to housing policies, policy H2 states that development should make efficient use of land, having full regard to the context of the site, including its character, landscape setting, topography, surrounding built form, and access to infrastructure and services.

1.3.106 In our view, this policy adds nothing beyond the advice contained in the NPPF and therefore adds little. It also goes against the principle of preparing succinct Local Plans.

1.3.107 The Council will be aware of wider country wide discussions regarding the viability of providing social rented accommodation as part of a wider offer. Such provision is becoming increasingly difficult and without robust policy in place that addresses this matter, this matter is likely to significantly slow delivery.

1.3.108 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.3.109 Finally, paragraph 6.335 has regard to development viability and places the onus on the Developer to demonstrate the 'price paid for land' when testing viability. It also requires applicants to factor in on site mitigation measures as well as measures to mitigate the impact of development. By way of response, viability assessments should be based upon Benchmark Land Value in accordance with the NPPF/NPPG guidance. Furthermore, the detailed constraints and infrastructure needs are not always known at the outset, nor is it possible to make informed decisions on mitigating matters such as biodiversity net gain until late in the development process. As such, viability cases must be assessed in an open manner based on the merits and unique circumstances of the sites on their own merits. Failure to recognise this means that the plan is neither positively prepared nor effective.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through

independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Pickhill Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village. 1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

[TWBC: for further representations on Policy STR/CRS 1 and Section 3 Vision and Objectives, please see PSLP_1956 and PSLP_1957 respectively].

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Respondent's Name and/or Organisation	Redrow Homes Ltd & Persimmon Homes South East
Question 2	
Agent's Name and Organisation (if applicable)	Judith Ashton Associates

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 5, STR/SS 1, STR/PW 1, EN1, EN2, EN3, EN9, EN13, H3, H6 and H9 – see Comment Numbers PSLP_2159, PSLP_2165, PSLP_2166, PSLP_2167, PSLP_2173, PSLP_2179, PSLP_2182, PSLP_2186, PSLP_2189, PSLP_2191, PSLP_2194, PSLP_2197 and PSLP_2198. See Supporting Information for representation in full]

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I write with reference to the above. As you will be aware, I act for both Redrow Homes Limited and Persimmon Homes South East who have various interests in Tunbridge Wells, including those east and south east of Paddock Wood (SHLAA sites '20', '374', '371', '344' and '376'), (LPA sites PW 1_7, 1_9, 1_11 and 1_12), (parcels 7, 9, 11 and 12).

Whilst, having regard to the above, Redrow and Persimmon both support the Reg 19 Plan in principle, especially the proposed allocation of the land at Paddock Wood (policies STR/SS1 and STR/PW1), they do have specific concerns about certain aspects of policies STR/SS1 and STR/PW1 and the evidence base underpinning the plan.

In saying this we acknowledge that the Strategic Sites Topic Paper (March 2021) provides a detailed critique of the rationale behind the proposed allocation of the land at Paddock Wood and Capel, with section 8 explaining how the development looks to address the requirements of para 72 of the NPPF; and the plan and its associated evidence as a whole looks to demonstrate why the proposed allocation is justified, is deliverable and will be effective in meeting the requirements of the plan and national government guidance.

1 The Housing Requirement, Supply and Trajectory.

a) The Requirement

1.1 Para 4.10 of the Reg 19 Plan indicates that the standard method housing need figure for the borough is 678 dwellings per year; and that over the full plan period 2020 to 2038, this equates to a need of some 12,204 dwellings. It also acknowledges that national policy clarifies that this would be a minimum target.

1.2 Para 3.3. of the Housing Land Supply and Trajectory Topic Paper indicates that this is based upon the standard methodology (2014 based household projections (published July 2016)), projected household growth in Tunbridge Wells for the period 2020-2030 and the affordability ratios for 2018 (See appendix 1 of the Housing Needs Assessment Topic Paper - Feb 2021).

1.3 Policy STR1 should in setting out the development strategy for the plan identify the local housing need figure. In addition, the housing trajectory contained within the Housing Land Supply and Trajectory Topic Paper should be set out in the plan itself – as an appendix so it is clear upon adoption what it is the authority are seeking to rely upon.

b) Whether the plan should provide for more than the minimum local housing need figure

1.4 As acknowledged in the Reg 19 Plan and its supporting evidence base, the plan should, given ID: 2a-010-20190220 of PPG, consider whether it might be appropriate to plan for a higher housing need figure than the standard method indicates given issues such as local affordability.

1.5 The Housing Needs Assessment Topic Paper summarises the findings of recent housing needs surveys; the 2015 SHMA identified a need for 341 affordable homes per annum, the 2018 HNS a need for 443dpa and the recent review of affordable housing needs in the context of first homes (2021) a need for around 323dpa. As acknowledged in the Housing Needs Topic Paper this demonstrates a substantial need for affordable housing in the borough. This is supported by the affordability ratios published in March 2021, which indicate that the ratio of lower quartile house price to lower quartile gross annual workplace-based earnings by local authority district, England and Wales, 1997 to 2020, had in Tunbridge Wells increased from 9.58 in 2010, to 10.51 in 2015 and 12.8 in 2020; the ratio of median house price to median gross annual workplace-based earnings by local authority district, England and Wales, 1997 to 2020 being 9.91 in 2010, 10.98 in 2015 and 13.27 in 2020.

1.6 Whilst policy H5 looks to deliver 40% affordable provision on all greenfield sites of 9 (+) dwellings, not all sites provide affordable housing, thus, in order to meet 100% of the affordable requirement of 443 dpa one would conservatively need to deliver circa 1,107 dpa over the plan period. Even if one takes the affordable requirement to be 323 dpa, the borough would need to be delivering 807dpa. In both instances this is significantly greater than the figure generated by the standard method, (678dpa).

1.8 To this end we note that whilst the Icen Review of Local Housing Needs (dec 2020) suggests at para 1.11 that the data underpinning trends and projections in Tunbridge Wells would not identify an exceptional circumstance that would justify moving away from the Standard Method, it also acknowledges in the preceding paragraph that: *'The PPG makes clear that one of the reasons why an affordability uplift is applied in the standard method is that past housing supply may have constrained the ability of people to move to an area. The influence of historical supply on the population and household projections justifies the inclusion of an uplift to the household projections. The extent to which this will improve affordability in Tunbridge Wells will be influenced by the extent to which housing supply and delivery is increased across the wider region as well as London. It seems unlikely that if Tunbridge Wells BC increased supply on its own that this would have a material effect on affordability given the clear inter-relationship in market terms between the Borough and surrounding areas and its broader relationship to London. There are also wider macro-economic factors that will influence overall housing affordability and demand including wider economic trends, interest rates and access to mortgage finance. A material change in the supply-demand dynamic across the wider South East is necessary; but Government policy requires each authority to play its part in this (whilst achieving sustainable development).'*

1.9 Having regard to the above we note that the Inspector at the Mid Sussex Local Plan examination sought to increase the OAHN to address the affordability issues in the district (See paras 19), and whilst that examination was predicated on the 2012 NPPF, not the standard methodology, it does demonstrate the need to consider affordability in areas such as this in detail when determining the local housing needs figure.

1.10 In the context of the above we also note that the figure of 678dpa is the minimum local housing need figure. It is capped at 40%. The uncapped figure is in fact 741dpa(See para 2.15 of the Housing Needs Topic Paper). This figure would better be described as the actual housing need, with 678dpa simply being the minimum Local Housing Need figure defined by the standard method. Whilst we note that the SA does test the effects of looking to meet the uncapped housing needs within growth strategies 10 and 11, and that the SA concluded that they were not pursued any further given their perceived environmental impacts; the Icini report accepts that the higher, uncapped need may be achievable from a market capacity perspective notwithstanding this would involve a further significant increase over recent building rates.

1.11 Whilst we will return to this point when commenting upon the SA, in terms of the overall housing requirement the evidence base has in our opinion to be more explicit as to why meeting the uncapped need was so readily dismissed. Table 12 (p51) of the SA appears to dismiss option 10 (uncapped need) on the basis that it was assumed that it would lead to further development across settlements, including in the AONB. At only 63dpa more than planned for (1,260 dwelling across the plan period) there are in our opinion options, given the findings of the SHLAA that could accommodate this level of additional growth without harm to the AONB. The Borough Council thus need to explain how this conclusion has been reached and the evidence base needs to address this to ensure the chosen option is justified.

1.12 Finally, there is, as acknowledged at para 4.12 of the Reg 19 Plan, the issue of the unmet housing needs from neighbouring areas, especially those within the same housing market area. As set out in the Duty to Cooperate (DTC) Statement (March 2021) these include Sevenoaks District Council (SDC) and Tonbridge and Malling Borough Council (TMBC) but extends to include Rother District Council (RDC) and Wealden District Council (WDC). The DTC statement indicates that SDC is the only neighbouring authority who have indicated they do not expect to meet their LHN. SDC, according to para 4.18 of the DTC statement made a request to TWBC and other neighbouring authorities as to whether they could assist in meeting any of its unmet need of 1,900 dwellings in April 2019. The DTC statement goes on to explain that whilst TWBC considered if it could meet some of SDCs unmet need (see para 4.19), it concluded for the reasons contained within the DTC statement (see para 4.20) that it could not.

1.13 Whilst noting the 2 reasons given, we also note that the Icini Review of Local Housing Needs has, as indicated above suggested that higher, uncapped need may also be achievable from a market capacity perspective. Furthermore, in considering a growth option that encompasses SDC's unmet need (option 11), table 12 (p52) of the SA appears to dismiss this option on the basis that it was assumed that the additional 1,900 dwellings would essentially result in further housing in the AONB as well as the loss of more Green Belt, including losses around RTW/Southborough. Whilst some may say this is self-evident it is not clear within the evidence base how this conclusion has been reached and the evidence base needs to address this to ensure its rational is clear and that the chosen option is justified.

c) Supply and Trajectory

1.14 Whilst not commenting upon the supply in detail, in reviewing the findings of the Housing Supply and Trajectory Topic Paper (Feb 2021) on housing delivery phasing and build out rates, we note that the supply sources the Council relies upon in the trajectory for the plan are summarised in Table 3 (p36) of the plan as:

1

Housing need 2020 – 2038

12,204

18 yrs. x 678

2

Extant Planning Consents as at 01 April 2020

3,313

See HS&T TP

3

276

See HS&T TP

6

New Housing Allocations proposed in the Plan

6,945

Row 1 minus rows 2 -5 -

7

Minimum Total allocations

7,221

1.15 Taking these in turn, we note that:

(i) Extant Planning Consents as at 01 April 2020

1.16 Whilst the Reg 18 Plan provided a 10% buffer for non delivery (See Para 13, bullet point three on P4 of 5-year Housing Land Supply 2018/19 – June 2019) of small sites (1-9 units) no such buffer is proposed in the Housing Supply and Trajectory Topic Paper (Feb 2021). To support a sound trajectory TWBC need to justify why a buffer is no longer considered necessary. Unless the council can demonstrate why a 10% buffer is no longer necessary we would recommend it is reinstated to ensure a robust evidence base.

1.17 In the context of the above, we note, having reviewed the Five-Year Housing Land Supply 2019/2020 (September 2020), Position as at 1 April 2020 it appears from appendix 1 that circa 630 of the extant consents are small site – which with a 10% discount would suggest the need to find land to deliver a shortfall of circa 60 dwellings.

1.18 We would also suggest that where large sites with full planning permission have not yet started, evidence is submitted to support their inclusion within the trajectory. Some sites such as the former ABC cinema (which has consent for 108 dwellings) have a long history of non delivery and in order to demonstrate a robust evidence base it is imperative that TWBC demonstrate this site can now deliver what is expected from it.

1.19 In addition to the above we note from the Five-Year Housing Land Supply 2019/2020 that 247 of the extant consents are in fact outline consents, whilst the Five-Year Housing Land Supply 2019/2020 seeks to justify the inclusion of these sites in the commitments table, we would question this, especially the land at Brick Kiln Farm as the reserved matters application has been withdrawn. Unless clear evidence can be provided to justify the inclusion of these outline consents within the commitments, and the 5 year HLS we would suggest they are all deleted. This would suggest the need to find land to deliver circa 250 dwellings.

1.20 Finally in reviewing this cohort we would question the 3,313 figure as the Five-Year Housing Land Supply 2019/2020 only suggests 3,213 in appendix 1, and table 9 of the Housing Supply and Trajectory Topic Paper only adds up to 3,161 (767+932+854+369+239 = 3161). To this end it would also be helpful if the trajectory placed those allocations that are now within its commitments within

the commitments part of their trajectory table/ annotated the table to show this was the case – rather than have a '0' against them as this is we have to say somewhat confusing.

(ii) Windfalls

1.21 Table 16 of the Housing Supply and Trajectory Topic Paper indicates that windfalls at 1,670 dwellings amount to 12.6% of the overall supply across the plan period, and more importantly over 16.7% of the supply when existing commitments are taken into consideration. We note the overall windfall figure is over double that set out in the evidence base to the Reg 18 Plan (which suggested 700 windfalls over the plan period) and that the annual windfall rate of 122dpa from 2023 is also over double that suggested at Reg 18 (50dpa). The Housing Supply and Trajectory Topic Paper suggests that 1,232 of these will be from small sites (1 – 9 units) with the remaining 336 from large sites.

1.22 Whilst we accept that changes to permitted development rights and the likes of office to resi conversions will help sustain windfall rates within the borough for the short term, we would question whether the increased reliance on this source is justified.

1.23 Not only does the Brownfield and Urban Land Topic Paper accept that this resource is finite, and recommends a small sites windfall allowance of 80% below the average supply for the first 7 years (from 2023/24) to avoid double counting with extant permissions, followed by another 80% below that for the remainder of the plan period i.e.: $122 \times 80\% = 98$ dwellings pa $\times 7$ years = 686 dwellings $98 \times 80\% = 78$ dwellings pa $\times 7$ years = 546 dwellings. It also recommends that the proposed allowance for large scale windfalls is set 80% below the average number of completions since adoption of the Core Strategy (i.e. from 2011 onwards) which results in an annual average of 24 dpa over 14 years of the plan period, or a total of 336 dwellings over the plan period (i.e. 24 dwellings pa $\times 14$ years = 336 dwellings).

1.24 Para 4.40 of the Brownfield and Urban Land Topic Paper acknowledges that: *'an allowance for larger brownfield/urban sites has not previously been provided for (in the Draft Local Plan) and that their delivery may still not be as regular or frequent as smaller sites'*

1.25 Given the above we would caution against assuming the average will continue long term and would question whether assuming an 80% allowance of the average is justified. Why 80%, why not 75% or 50% so as to be robust and provide a suitable buffer to non delivery of the strategic sites? As an authority with a 5 year HLS deficit at present TWBC should in our opinion be looking to ensure that they allocate enough and provide enough of a buffer to ensure a rolling 5 year HLS moving forward. Relying on windfalls, especially within the 5 year housing land supply is not in our opinion helping in this regard and, despite the Brownfield and Urban Land Topic Paper there is no compelling evidence, as required by para 70 of the NPPF to include windfalls in the 5 year HLS.

1.26 We would thus recommend windfalls are removed from the 5 year HLS and the overall level of provision is reduced to 102dpa max from 2025/26. This would reduce the figure to 1,326 dwellings – i.e... circa 10% of the total supply/ 13.3% of the supply after accounting for extant permissions – which is still in our opinion a significant figure. This would generate a need to find land to accommodate a further 344 dwellings.

(iii) Outstanding Site Allocations

1.27 Of the 276 dwellings identified in this cohort, we note that certain sites, such as the former gas works on Sandhurst Road (170 dwellings) have a long history, having been identified in the former TWBLP 1996 such that we would question whether they are truly deliverable. If TWBC are to rely on them then clear evidence of deliverability needs to be provided.

(iv) New Housing Allocations proposed in the Plan.

1.28 Turning to the trajectory for the new housing allocations proposed in the Reg 19 Plan, we are concerned that the majority of the evidence base concentrates on the period from the grant of planning permission to first completion's and both peak and average build out rates. The time taken to prepare and submit planning applications and the length of the determination period are also crucial to the councils proposed trajectory. To this end we welcome the council's commitment to the implementation of PPA's for the determination and delivery of strategic sites, and the discharge of planning conditions on small, medium, and major sites, all of which will, as para 4.18 of the Housing Supply and Trajectory Topic Paper says, help create an environment to accelerate housing delivery.

1.30 To whit we note that table 9 of the Housing Supply and Trajectory Topic Paper suggests that STR/SS1 (Paddock Wood and Capel) will be delivering 300dpa from 2025/26 i.e. 4 years from now.

1.31 As you will be aware, a PPA has been agreed with those promoting the land to the east of Paddock Wood, which lies outside the Green Belt, which looks to the developers of this site (Redrow and Persimmon) to submit 2 x hybrid planning application which combined will provide for approximately 1,200 dwellings and related amenities facilities with an overarching Masterplan and EIA in Autumn 2021. Work on this submission is already well underway with a scoping application due to be submitted imminently, an initial meeting held with Design South East and various other meetings taking place with statutory consultees and key stakeholders – including the Town Council.

1.32 On this basis, and as we are also looking to progress discussions with the Borough Council on Framework Masterplan (SPD) concurrently with the submission of the hybrid applications, and agree a PPA which looks to facilitate the determination of the applications with 12 months (including s106), and to agree discharge of pre commencement conditions in a timely fashion, our projected trajectory is:

[TWBC: See attached supporting information for table]

1.33 Whilst we acknowledge that the above, is ambitious, and less than the average time taken from gaining consent to first completions as set out in Lichfields Start to Finish (Second Edition (Feb 2020)), we believe, given the proposed PPA, and the commitment of both parties to the delivery of this site, that it is achievable.

1.34 Turning to the proposed build out rates, those cited above are comparable to those found in Figure 7: Lichfields Start to Finish (Second Edition (Feb 2020) which suggest build-out rates of 107dpa for sites of 1,000-1,499, and 120 dpa for sites of 1,500 -1,999 (NB Table 4: of Lichfields Start to Finish (Second Edition) indicates that mean delivery rates by site sizes, within their first edition were 117dpa for sites of 1000- 1449 dwellings).

1.35 Given the above, and having regard to discussions with those promoting the other parcels west of Paddock Wood we believe the strategic allocation at Paddock Wood could given the number of national housebuilders involved, deliver the following:

[TWBC: See attached supporting information for table]

1.36 Given the above, whilst the councils trajectory is we feel a tad overambitious, the reality is, with the lead in times and different timetables being adopted by the developers promoting the land that falls within the STR/SS1 factored in, the combined delivery rates will within the middle part of the plan period be delivering more than envisaged the Housing Supply and Trajectory Topic Paper, given the various outlets that will by then be delivering. Either side of this there will be a gradual increase from 60dpa in yr.3, to 120 in year 5, 213 in yr. 6 and 320 in year 7 and then 390dpa thereafter, until in year 12 delivery rates will begin to fall to 365, 315, 230 and then 162dpa in year 15. As a result of the above we would suggest that the trajectory in the Housing Supply and Trajectory Topic Paper is reviewed This will also have knock on implications for the 5 year housing land supply and should be factored into said assessment when the plan is submitted for examination.

1.37 As to whether the overall requirement for STR/SS1 will be met, we note that the policy suggests a range of 3,490 – 3,590 houses. The above suggests circa 3,305 – 3,405 which is circa 5% less than proposed within the policy. Whilst this may well be delivered longer term, we would suggest that provision is made to address this shortfall through a small allocation of circa 100 dwellings elsewhere within the borough.

1.38 Turning to the proposed new settlement in Tudeley we note that the Housing Supply and Trajectory Topic Paper suggests the delivery of 150dpa from 2025/26, rising to 200dpa in 2035/36.

1.39 Unlike the proposed expansion of Paddock Wood, Tudeley Village is an entirely new settlement wholly constrained by the Green Belt that is being promoted by Hadlow Estate. We are not aware that any national house builders are involved. None is mentioned in the site promoter's promotion material –Tudeley Village Delivery Strategy – December 2020

(<https://en.calameo.com/read/005138646e3c91ce5482a?authid=ofMfwz3z9AB7>). Furthermore, we note that whilst the front page of the web site suggests that should the Tudeley village proposal form part of the adopted local plan construction would follow with a first phase of 360 dwellings completed in 2024/25, the Tudeley Village Delivery Strategy indicates that the build out rates are as recommended by the Borough Council and recites those set out in the Housing Supply and Trajectory Topic Paper.

1.40 No evidence is proffered in the Housing Supply and Trajectory Topic Paper to support the delivery strategy, and we note that the Tudeley Village Delivery Strategy makes it clear at p64 that the Hadlow

Estate will control how land is released for development as part of its role as master developer, and that during the life of the development, the estate will deliver serviced land parcels that will be bought to the open market and offered to selected housebuilders for development. This and the design coding strategy set out in the Tudeley Village Delivery Strategy suggests that whilst an outline consent, together with detailed infrastructure provision will follow the adoption of the Local Plan, the actual design of the development parcels will follow a ridged serviced land sales strategy, which will inevitably delay housing delivery as each parcel is sold and developers advance an application for reserved matters. To this end we note that para 3.1.2 of the Local Plan Viability Assessment (Stage 2) indicates that the Tudeley development is expected to run on beyond that at Paddock Wood and is likely to continue after the end of the emerging Local Plan period (so to 2038 and beyond).

1.41 Given the above we are not convinced delivery will commence in 2025/26. With no evidence to the contrary we believe the council have no option but to revert to the empirical evidence set out by Lichfields in Start to Finish (Second Edition (Feb 2020), which at Figure 4: Average timeframes from validation of first application to completion of the first dwellings, suggests that on sites of 2,000(+) the average timeframes from validation of first application to completion of the first dwellings is 8.4 years, which assuming an application is submitted in the monitoring year 2022/23 would suggest first completions in 2030/31. Whilst we appreciate the fact the borough council are adopting the use of PPAs to help accelerate the planning process, which will help reduce the timescales set out by Lichfields in Start to Finish, there will, as set out above, still be a need to approve the Design Code and Masterplan following the hybrid infrastructure and outline application consent. Then when the land parcel sales have been marketed and agreed, those parcels will need individual RMs – this will not be a quick process. Furthermore, its highly unlikely the site would deliver 150dpa on yr. one – there will be a gradual build up as the site progresses with we would suggest circa 40 in year 1, 120 in year 2 and then 150 (+) a year thereafter – dependent upon the number of outlets running in parallel.

1.42 The above will clearly have an impact on the housing trajectory and the number of houses that are delivered from this site in the plan period. We believe the trajectory is more likely to be along the following lines, which suggests that it is likely that land will have to be found for circa 660 dwellings to address the shortfall.

[TWBC: See attached supporting information for table]

d) The need for a Buffer

1.43 The plan looks to deliver 13,250 dwellings over the plan period, some 8.6% above the requirement of 12,204. As, as indicated above we do not believe the trajectory will deliver as predicted, we believe a higher buffer needs to be introduced, to both address any delay in the delivery of sites/ non delivery of sites, and to try and help address the acute affordable housing needs within the borough.

1.44 Given the above, and as the plan should in our opinion test the trajectory on the basis of a 10% buffer to accord with para 73(b) of the NPPF if it wishes to fix its 5 year HLS upon adoption, we believe the buffer should as a minimum be 10%, but more realistically, given our comments above, and the constraints imposed by both the Green Belt and AONB across the borough, and the issues of unmet needs arising in both Sevenoaks and Rother, be circa 20%. Such a buffer would provide sufficient flexibility to enable the plan to adapt to rapid change as required by para 11 of the NPPF.

Table 4: Summary of Affect of 20% Buffer on Total Supply over the Plan Period

1,388

2,702

* 13,257 minus 1,314 (660 (Tudeley) +344 (windfalls) + 310 (non delivery of extant consents)) = 11,943

e) 5 year HLS

1.45 The Council's housing trajectory set out in the Housing Supply and Trajectory Topic Paper does not provide a rolling 5-year supply calculation so it is not possible to ascertain whether the Plan will deliver and maintain a 5-year supply as required by the NPPF.

1.46 The only 5-year supply calculation provided by the Council is set out in the Five-Year Housing Supply 2019/20 Position Statement. This indicates at Table 1 on P7 that the Council do not currently have a 5-year housing land supply, rather they have 4.83 years (a shortfall of -120 dwellings). Given our comments above, we consider this to be optimistic conclusion and that with adjustments is more likely to be circa 4.67 years.

[TWBC: See attached supporting information for table]

1.47 Whilst we note some of the smaller allocations are shown to deliver within the first five year of the plan, we have, given our own position on the housing trajectory no comments to make on this, other than to question the inclusion of AL/CRS 3 – land at Turned Farm as we note the associated application has been the subject of a call in, with a PI due to open on the 21 September 2021. This sites ability to deliver as planned is thus called into question, and the 5 year trajectory when published needs to take this into account.

1.48 Given the above we have to call into question whether, despite table 9 and figure 3 of the Housing Land Supply and Trajectory Topic Paper, there is a rolling 5 year HLS, and would recommend that the council undertake this assessment and submit it with the plan to help address this issue and demonstrate a sound plan that is planning positively for the area and will help significantly boost the supply of housing in accordance with para 59 of the NPPF.

2 Duty to Cooperate.

2.1 Having reviewed the DTC Statement of March 2021, we note that housing is seen as a cross boundary strategic issue and that para 4.15 indicates that: *'TWBC has been working closely with other authorities in discussions on meeting their objectively assessed housing need, including those identified through the Council's Strategic Housing Market Assessment (SHMA) as being within the same housing market area, namely the 'West Kent Housing Market Area' (HMA), which includes SDC, TMBC and TWBC and extends to include parts of WDC and RDC'.*

2.2 We also note that of TWBC's neighbouring LPAs only SDC has either not produced a local plan which looks to fully meet their own housing needs or has indicated that they do not expect to be able to meet their local housing needs.

2.3 In the context of the above we note that whilst SDC made a formal request to TWBC and other neighbouring LPAs as to whether they could meet any of its unmet need in April 2019, Para 4.18 of the DTC statement indicates that *'It does not have any arrangement in place to meet this unmet need at the present time, and the (SDC) strategy which resulted in the unmet need has not been subject to Examination.'*

2.4 Its clear from the evidence base that TWBC has considered if it could meet SDC's unmet need, both through its plan and with other LPA's (see para 4.23), and not only has TWBC own SA indicated the adverse impacts of assisting SDC, but SDC's plan has been found unsound, and the Inspector has directed SDC to look to address its HLS shortfall within the district before looking to others to assist.

2.5 Whilst an updated SoCG has been delayed because of ongoing legal action by SDC in connection with the LP Inspector's decision, (see p18) we note that the previous version (May 2019) (appendix A1), advises at paras 2.18. and 2.19 that:

2.1.8 *It is understood that, at present, TWBC is unable to assist SDC with unmet housing need, due to the constraints on both local authorities, and their inability to meet housing needs beyond their own, irrespective of unmet needs elsewhere.*

2.1.9 *Consequently, both councils will continue to work together and identify the position as both TWBC and SDC prepare to review their Local Plan every 5 years.*

Actions

. TWBC and SDC will engage through the wider Duty to Cooperate forum with other neighbouring authorities outside the West Kent housing market area in relation to housing related matters, including unmet need, five year housing land supply, best fit HMAs, affordability, London's growth, large scale developments and opportunities for meeting any unmet needs elsewhere.

. TWBC and SDC to each undertake a 5 year review of their respective Local Plans.

2.6 We trust that the updated SoCG will demonstrate constructive, active and on an ongoing engagement has continued and that some clarity is provided on how the unmet needs of the HMA are to be addressed.

2.7 Within this context we do however note that it appears that TWBC have sought, since SDC initial indicated a potential issue in their ability to meet their housing needs when consulting on their issues and options Reg 18 plan in 2017, to actively engage in resolving this matter. TWBC letter of the 21st Sept 2017 (app B1 (p271) being clear in that:

Given the level of Objectively Assessed Need (OAN) identified by our own SHMA, and having regard to the nature and extent of planning constraints impacting on Tunbridge Wells borough, there is a reasonable possibility that the issue of some development need to be accommodated within an adjoining authority area is likely to be raised in the case of our own new Local Plan.

Without prejudging the outcome of our local plan work there should be no presumption that there is capacity within Tunbridge Wells borough to accommodate unmet development need from another authority area. We would ask that you take account of this when considering the representations made to the Issues and Option consultation and in confirming your development strategy for the Sevenoaks district.

Tunbridge Wells Borough Council would suggest therefore that there is a need for, and merit in, more focussed discussions about the implications of delivery of full objectively assessed needs within the respective west Kent local authority areas having regard to the environmental and other constraints that exist across these areas and wider afield.

Given that each west Kent authority has now reached at least Issues and Options stage in the plan making process there is an opportunity to agree an approach and strategy to take forward Duty to Cooperate work that meets the requirements of the National Planning Policy Framework, the National Planning Practice Guidance and other best practice.

2.8 Given the above, and the substance of the DTC statement it would appear to us that there has been constructive, active and on an ongoing engagement with SDC, and that TWBC have tried to address SDC unmet needs but demonstrated through the SA why they are unable to do so.

2.9 With the exception of Rother DC, all remaining SoCG are relatively new, being signed in February 2021 and March 2021, and all indicate that the respective authorities are looking to meet their LHN in their entirety; and will continue to engage with each other and other relevant authorities in relation to strategic housing matters.

2.10 The SoCG with Rother DTC is dated Oct 2020 and indicates at para 2.10 that at the time of writing, RDC does not know if it will be able to plan to meet its own local housing need through development within its own administrative boundary as it is too early in the stage of undertaking its housing evidence base for the Local Plan. To this end we note that the Rother LP was adopted in 2014 and is thus now out of date. As a result, using the standard method we understand the shortfall over the next 5 years to be in excess of 1000 dwellings. Whilst no requests have we understand been made by RDC to TWBC for the latter to assist in meeting its LHN, this matter none the less needs to be addressed, and we note that para 2.17 of the SOCG between RDC and TWBC indicates that both RDC and TWBC will continually consider their positions on capacity to meet housing needs as they progress their respective Local Plans.

2.11 We also note that the strategic sites at Paddock Wood and Tudeley are identified as key cross boundary issue affecting both TMBC and MBC.

2.12 The SoCG with MBC (March 2021) indicates that TWBC has worked closely with MBC to develop its plans for Paddock Wood, with MBC being a stakeholder in the TWBC Strategic Sites Working Group; and that they agree to continue to work closely together on this matter going forward. Whilst the memorandum of understanding with TMBC is not as explicit, we note that para 4.29 of the DTC Statement makes it clear that given the proximity of the sites at Paddock Wood and Tudeley to Tonbridge & Malling Borough, there has been regular dialogue with TMBC, as articulated in the Appendix C of the DTC statement, as well as in the Strategic Sites Topic Paper; and that at para 4.4.2 the DTC highlights the fact that a Strategic Sites Working Group ('SSWG') was established in July 2019, following the finalisation of the Regulation 18 Draft Local Plan which set out the approach to growth around Paddock Wood and east Capel, and Tudeley Village; that the SSWG provides a forum that facilitates collaborative working in the delivery of the two strategic sites; and that a range of interested parties are members of this group, including representatives from Tonbridge & Malling BC (Policy Manager) and Maidstone BC (Principal Policy Officer) as the two boroughs are in close proximity to the strategic sites. Meetings are held monthly, providing a forum to update and discuss key items in progressing the strategic sites through the Local Plan and beyond.

2.13 In the context of the above we note that the penultimate paragraph of policy STR/SS 1 indicates that the delivery of the infrastructure for the strategic expansion of Paddock Wood should be through ongoing discussions with relevant stakeholders, including Tonbridge & Malling and Maidstone Borough Councils.

4 The Infrastructure Delivery Plan

4.1 The Infrastructure Delivery Plan (IDP) March 2021 has been drafted to support the Reg 19 Plan and sit alongside the Strategic Sites Masterplanning and Infrastructure Study and the Viability Study.

4.2 With this in mind we note that Table 8 in reviewing the summary of health needs for the settlements within the borough suggests that within Paddock Wood there is a need for one new medical centre to serve this area and land is allocated within Paddock Wood and east Capel for this; and an additional satellite medical centre within Tudeley Village to be considered. Conversely the Strategic Sites Masterplanning and Infrastructure Study at table 11 indicates that a medical facility is to be provided in Tudeley. Only if Paddock Wood and Capel were to proceed alone does the Strategic Sites Masterplanning and Infrastructure Study suggest that a new medical facility would be provided within Paddock Wood. This apparent discrepancy between the 2 reports needs to be resolved.

4.3 Similarly we note that Para 3.220 of the IDP suggests that the 10ha sports hub "could" incorporate a 25m pool, whilst the Strategic Sites Masterplanning and Infrastructure Study at para 4.8 and 4.101 and the Strategic Sites Topic Paper at para 6.26 make it clear the sports hub will include a swimming pool, and as set out below, the viability assessment appears to have assessed the provision of sports facility that includes a swimming pool given the values attributed to it reflect the Sport England Affordable Sport Centre model taken from Sport England 2nd Quarter 2020 Update which includes a swimming pool (This could we assume explain the difference in the costings set out in the IDP (£14,460,000 for "one new sports hall" and £3,207,611 for swimming pool) and the VS (£10,840,000 for an indoor sports hub)). This situation is complicated still further by table 14 (p98) of the IDP referring to the possibility of *'improvements to Putlands Leisure Centre as a new indoor sports hub with new public swimming pool'*! Again, this apparent discrepancy between the reports needs to be resolved.

4.4 Likewise, when addressing the issue of primary educational needs, the IDP in table 6 suggest the need for 6FE Primary provision (2 of which will be provided at St Andrew's Primary School), such that as per p130 in appendix 1 the need is said to be 2 new 2FE primary schools, which correlates with tables 11 and 13 of the Strategic Sites Masterplanning and Infrastructure Study; whilst the Viability Study refers to 8FE primary in the detailed appraisals of Paddock Wood. We assume the latter is incorrect and that the Viability Study needs to be updated accordingly. We would also question whether the IDP is correct as it is addressing Paddock Wood and Tudeley – unlike tables 11 and 13 of the Strategic Sites Masterplanning and Infrastructure Study. Again, this apparent discrepancy between the reports needs to be resolved.

4.5 Finally, in noting that appendix 1 of the IDP sets out the full extent of the infrastructure requirements that will be sought from the development in and around Paddock Wood/ Capel, some of which it acknowledges will also be connected to the development of the new settlement at Tudeley, we have to say that the indicative costs of some of these infrastructure works vary significantly; that it is not clear how the costs of these works will be divided between the various parts of the Paddock Wood/ Capel allocation; and that some of the costs attributed to various works in appendix 1 of the IDP are

hard to tally with the S106 costs identified in the Viability Study, such that clarity needs be provided that like for like information and assessments are being used/ undertaken.

4.6 We also believe it would be expedient if those assisting the Council on matters such as transport infrastructure could meet with those promoting the land at Paddock Wood/ Capel so that the practicalities of some of the proposed works could be discussed further. We say this as, by way of example, Table 3 of the IDP (Transport needs for the settlements within Tunbridge Wells borough) indicates on p39 that the masterplan for Paddock Wood and Capel plan should provide for 'Upgrade Hop Pickers Line to Horsmonden/Goudhurst. The route of the old Hop Pickers Line passes through land in my client's control and whilst they are more than happy to integrate this into their scheme, they clearly have no control over the council's ability to provide this through other third-party land. Thus, TWBC need to clarify how they see this being delivered in its totality so that people's expectations are managed accordingly.

4.7 Similarly, whilst the IDP highlights at para 3.14 that Junction improvements at B2017 Badsell Road / B2160 Maidstone Road / Mascalls Court Road and the A228 / B2017 roundabout are to be "...funded as part of approved residential developments at Church Farm, Mascalls Farm & Mascalls Court Farm" we note that the IDP suggests in appendix 1 (p130) that a further upgrade to the B2017 Badsell Road / B2160 Maidstone Road / Mascalls Court Road junction to traffic signals could cost up to £1m. Whilst my clients are happy to contribute to any such upgrades, they would ask whether any design work has been carried out on this junction to date and question the extent to which any additional highway land is available to facilitate further improvements. These may in our opinion require cooperation with Mascalls School, which we assume TWBC will liaise with KCC highways and education alike on, rather than look to initiate CPO powers?

4.8 We also note the IDP identifies additional future requirements for bus infrastructure including a 'Demand-responsive urban bus service' linking residential development to the town centre and rail station within Paddock Wood. Again, whilst I can confirm that my clients are happy to contribute to any such upgrades, they believe further liaison is required with KCC Public Transport officers and operating companies to agree the specification of any such service provision, especially as Church Road is the key sustainable transport corridor between their land and the town centre / rail station.

5 The Viability Appraisal

5.1 We note that the Viability Appraisal (VA) stage 2 of Feb 2021 is based upon the following assumptions:• Market revenues at £420 per sqft (£4500 per sqm)• Profit margins at 17.5%• Benchmark Land values of £100k per gross acre (250k per gross hectare)• Site specific infrastructure costs of £270k per acre (£665k per gross hectare)• A static 40% affordable housing level

5.2 As you will be aware we have concerns as to the robustness of these figures and the associated effects this then has on the infrastructure contributions being sought from the strategic sites at Paddock Wood and Capel

5.3 As is clear from table 17 of the Strategic Sites Masterplanning and Infrastructure Study changing these assumptions even slightly can impact upon the viability of the project such that we would ask that the council undertake further sensitivity testing to address our concerns and strengthen the evidence base.

5.4 In doing so we would also ask that the discrepancies between the figures used to assess the viability of the strategic sites in the Viability Appraisal and the IDP are resolved as the latter appears to have somewhat different figures on the costs of for example the proposed sports facility than the former, the former suggesting £10,840,000 (which equates to a Sports England benchmark figure) and the latter £6,015,611. The two should be aligned and based on a recognised cost comparable/ benchmark.

6 The Strategic Sites Masterplanning and Infrastructure Study Feb 2021

6.1 In noting the content of the proposed Structure Plan and the various other options considered, we have no detailed comments other than to reiterate the need for policy STR/SS1 to make it clear that the Structure Plan is intended to provide guidance as to how the sites are to be brought forward, and that future applications can, subject to reasoned justification, vary from this. We say this as detailed site investigations associated with site promotions will inevitably bring to light matters that were not known to DLA whilst doing their desk top work, and because as discussions with various statutory consultees evolve so will the future scheme. Thus, it would be counterproductive to suggest that the proposed Structure Plan is the only option that can be taken forward. As long as the principles enshrined

in the Strategic Sites Masterplanning and Infrastructure Study are adhered to / addressed then there should be scope for variations from the proposed Structure Plan and policy STR/SS 1 should be clear in this regard – as should the Strategic Sites Masterplanning and Infrastructure Study. We note that para 8.12 of the Strategic Sites Topic Paper appears to acknowledge this, advising that the Structure Plan prepared by DLA for Paddock Wood and east Capel, is not a fixed blueprint for the developments; rather it establishes the critical elements which should be secured through the delivery of these strategic settlements.

6.2 In the context of the above we note that the Strategic Sites Masterplanning and Infrastructure Study in chapter 6 identifies the infrastructure framework for the proposed strategic sites at Paddock Wood and Capel and Tudeley Village. This indicates that:

- The proposed Colts Hill Bypass is recommended for growth scenarios 1 and 2 (See para 6.32. Para 6.2 of the Strategic Sites Masterplanning and Infrastructure Study indicates that these are: i. Paddock Wood and east Capel, and Tudeley Village both going forward. ii. Paddock Wood and east Capel only. iii. Tudeley Village only).

It is not clear why this would not be required for growth scenarios 3 or whether the on line improvements would be sufficient to address the impact of the expansion of Paddock Wood and Capel in isolation. This is a matter we believe the study should address, should for any reason the Tudeley development be rejected/ set back (whilst para 6.17 of the Strategic Sites Topic Paper reiterates the fact that the provision of the Local Colts Hill Bypass would be required should Paddock Wood and east Capel scheme come forward, with or without the development at Tudeley Village, it does not explain why, or address the point made above). • The Five Oaks Green bypass is related to the Tudeley development only – see para 6.34. • The combined sports fields and sports facility are related to both the expansion of Paddock Wood and Capel and Tudeley village (see para 6.43). Again, the Strategic Sites Masterplanning and Infrastructure Study does not address the impact of just the Paddock Wood and Capel development and what would be required to address the effects of this alone. This is a matter we believe the study should address for completeness. • The infrastructure phasing categories in table 10 do not appear to relate to the infrastructure phasing assumptions in table 9 – clarity is required on what is required when and how this relates to the build out of sites.

6.3 Having regard to the above there appear to be inconsistencies between policy STR/SS1 and the Strategic Sites Masterplanning and Infrastructure Study as to what is required of the Paddock Wood and Capel development. Part 3, section 7 of policy STR/SS1 appears to require developer contributions to the Five Oak Green bypass which the Strategic Sites Masterplanning and Infrastructure Study clearly suggests is for the Tudeley development alone. The same is true of policy STR/SS1 part 15 (a) (ii). Likewise, criterion 2(d) of STR/SS1 needs to make it clear that the funding of the new sports and leisure hub is not to come solely from the Paddock Wood and Capel development but that at Tudeley/ needs to indicate what is required on the Paddock Wood and Capel development in isolation. See comments below on policy STR/SS1.

6.4 Turning to viability testing, whilst noting paras 6.89 – 6.92 and table 17 of the Strategic Sites Masterplanning and Infrastructure Study, we have, as indicated above, a number of concerns about the assumptions made in the viability assessment and the need for further sensitivity testing. To this end we note that table 17 of the Strategic Sites Masterplanning and Infrastructure Study highlights the effects any changes in the assumptions made has on the viability of the project, and that para 6.94 acknowledges that a small change in one assumption can have a relatively large impact on the outcome / result (This is reiterated in para 7.4 of the Strategic Sites Topic Paper).

6.5 Finally in noting the delivery strategy set out in section 7 of the Strategic Sites Masterplanning and Infrastructure Study, we agree with the principles set out on para 7.16, especially that each development must be able to proceed independently at its own speed and that where possible, shared infrastructure should be monetized to enable equalisation/equitable contributions. To this end we also agree that in order to address any short-term infrastructure funding gaps it may be sensible, as suggested in para 7.14 to seek funding from central Government, for example through the Housing Infrastructure Fund, to ensure new homes can be delivered alongside necessary infrastructure. Overall, we fear there are mixed messages arising from the IDP, VA and Strategic Sites Masterplanning and Infrastructure Study such that it is not clear what is needed, where and when, how much it is expected to cost, who is contributing towards it, and when is it to be provided. A simple table of priorities showing what is to come forward first when would we believe be more user friendly for all concerned. This could we are sure be resolved by way of a detailed review of all three as its imperative for all concerned to know and understand this and for the implications to be assessed accordingly. To this end we would suggest

that in addition to reviewing/ updating all three reports, the council liaise with those promoting the strategic sites at Paddock Wood (including land at east Capel) and Tudeley Village and look to produce Statements of Common Ground in advance of the Local Plan examination to address this point.

Overall, we fear there are mixed messages arising from the IDP, VA and Strategic Sites Masterplanning and Infrastructure Study such that it is not clear what is needed, where and when, how much it is expected to cost, who is contributing towards it, and when is it to be provided. A simple table of priorities showing what is to come forward first when would we believe be more user friendly for all concerned. This could we are sure be resolved by way of a detailed review of all three as its imperative for all concerned to know and understand this and for the implications to be assessed accordingly. To this end we would suggest that in addition to reviewing/ updating all three reports, the council liaise with those promoting the strategic sites at Paddock Wood (including land at east Capel) and Tudeley Village and look to produce Statements of Common Ground in advance of the Local Plan examination to address this point.

7 Local Plan Transport Assessment

7.1 The Transport Assessment Report Update (TARU) (March 2021) provides traffic simulation modelling for Paddock Wood and the surrounding highway network and has identified specific highway mitigation schemes for delivery. Subject to detailed modelling and liaison with the Highway Authority our client is agreeable to addressing and mitigating highway impacts, through the identified schemes (or otherwise), where this is directly related to the scale of development proposed.

7.2 The TARU references the provision of the Hop Pickers heritage route. The provision of this route is wholly supported by our client, the first phase of which could be facilitated through their land. We support the sustainable principles of the TARU and Local Cycle and Walking Infrastructure Plan (LCWIP) where we have the ability to deliver pedestrian / cycle infrastructure within our site to deliver and make linkages to the key routes identified by PJA. Our client could also help to deliver the Paddock Wood circulate cycle route as identified in the Tunbridge Wells Borough Cycle Strategy 2016-2020.

7.3 Our client fully embraces the Local Plan and its Evidence Base aims to reduce highway network congestion through the delivery and integration of sustainable travel infrastructure in existing and proposed settlements to drive modal shift away from private car travel.

8 Strategic Policies

Policy STR1

8.1 Whilst supporting the proposed growth strategy we believe policy STR1 should, for the reasons set out above, identify the local housing need figure. In addition, given our concerns over the scale of development being promoted over the plan period, we would suggest that policy STR1 should refer to an overall housing requirement of 14,645 dwellings. This would ensure a positively prepared and effective plan, consistent with national government guidance.

Whilst many of our comments on the strategic and development management policies are, we believe, capable of resolution by simple rewording/ a review of the evidence base so as to justify the position being advocated, we are concerned that the extent of repetition between policies is leading to misrepresentation; and would recommend that the policy approach is reviewed with a view to being more succinct and direct in what it is seeking to achieve. This will we believe assist everyone concerned in the development process, and is something we, as inducted above, would be happy to talk to the borough council about, especially in terms of compiling a Statement of Common Ground to address the policy requirements for the land east of Paddock Wood.

To conclude, whilst we support the Reg 19 Plan and the proposed allocation of the land at Paddock Wood for strategic scale expansion, we do have a number of concerns about the overall housing supply and trajectory, the rationale behind the assessment of the reasonable alternatives assessed in the Sustainability Appraisal, and alternatives assessed; the consistency in the infrastructure requirements being sought from the development of the land at Paddock Wood in the IDP, VA and Strategic Sites Masterplanning and Infrastructure Study; the actual requirements for the land east of Paddock Wood – in terms of what, when and how much; some of the assumptions used in the VA; the wording of policies STR/SS1, STR/PW1 and justification for some of the criteria contained therein; and the wording of policies EN1, EN2, EN3, EN9, EN13, H3, H6, and H9 and justification for some of the criteria contained therein.

We look forward to talking to you further about the above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Redrow and Persimmon have an interest in land east of Paddock Wood – part of STR/SS1, one of the main strategic allocations in the Plan. They are also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. They therefore wish me to participate in the examination

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

3 The Sustainability Appraisal (SA)

3.1 Chapter 6 of the February 2021 SA reviews the spatial development strategy. It looks to summarise the options considered and their associated impacts in table 12. This demonstrates the significant impact that would occur on the AONB, the sustainable pattern of growth and the existing employment allocations if TWBC looked to meet their capped local housing needs and not progress with the strategic allocations at Paddock Wood – see options 5, 6, 7, 8 and 9. Whilst the SA thus supports the strategic allocations at Paddock Wood as providing the most sustainable reasonable alternative to the growth strategy when looking at the capped need, we do not believe that the scoring of options 10 and 11 necessarily represent the only reasonable alternative when looking to meet the uncapped need/ the uncapped need and unmet need. Indeed, proffering only 1 option each when considering these 2 alternatives, when there are 7 that look at the options for the capped need seems somewhat dismissive of the potential merits of meeting the uncapped need/ the uncapped need and unmet needs.

3.2 As set out above the evidence base has in our opinion to be more explicit as to why meeting the uncapped need was so readily dismissed. Table 12 (p51) of the SA appears to dismiss option 10 (Uncapped need) on the basis that it was assumed that it would lead to further development across settlements, including in the AONB. At only 63dpa more than planned for (1,260 dwelling across the plan period) there would surely given the findings of the SHLAA be options available to the council to consider that could accommodate this level of additional growth without harm to the AONB. The Borough Council thus need to justify their conclusions in this regard. We would in addition invite them to consider a further option, that which provides for a 20% buffer on the LHN – i.e. 814 dpa as set out above (an additional 136dpa), which would also fall part way between the scale of development proposed in options 10 and 11, and could in our opinion given the finding of the SHLAA be accommodated through an adaptation to the proposed strategy, with additional growth in more sustainable settlements, including Tunbridge Wells and Southborough so that the additional growth is not all directed to the larger settlements within the AONB.

3.3 Having reviewed the scoring on options 3 – 11 (as set out in comparison terms in table 26 of the SA), it is clear that whilst option 3 (the reg 18 LP option), clearly scores the post positives, and least negatives, the uncapped growth option does not generate a significantly poorer result, despite what

is said at para 6.2.6 of the SA. Whilst para 6.2.16 explains how the growth strategy evolved as a result of the SA process and the effects of the different distribution strategies on social, economic and environmental factors (as set out in paras 6.2.8 – 6.2.15) resulting in option 13, the Reg 19 strategy, we note that as far as the options 10 and 11 were concerned, para 6.2.7 indicates that; 'it is not appropriate to conclude that positive effects cancel out negative effects as the importance of each objective needs considering in its own right. Instead, the sustainability appraisal process recognises the interdependence of the three strands of sustainable development and the weight given nationally to the most highly affected environmental objectives and recommended that Growth Strategies 10, 11 and 12 were not pursued further.'

3.4 Notwithstanding the above it is in our opinion clear that the difference between options 10 and 13 are not so substantial as to dismiss them without further consideration given the significant benefits option 10 would bring about in terms of social and economic advantages. Thus, the means by which the council weighted these against the environmental impacts needs greater clarity so as to justify the chosen option (13).

3.5 Turning to the options for the garden settlement and urban extension, of the options put forward, and set out in figure 5 and table 27, its clear why, given the accessibility and landscape impacts of the other sites, the land at Capel and Paddock Wood was deemed to be the most appropriate option to take forward for further consideration.

3.6 As to the options for the expansion of Paddock Wood, as set out on figures 7 and 8, these ranged from 1,500 to 4500 dwellings (plus the 1000 dwellings from the existing SALP). Whilst option 2 (3,500 dwellings (plus the 1000 dwellings from the existing SALP)) was deemed the most appropriate option to take forward the difference in scores between this and other options such as option 5 was not we note significant and could in our opinion have been overcome if required. Which given figure 13 and the reasonable alternative sites assessment around Paddock Wood, highlights the fact the only reasonable alternatives were situated further to the east than the chosen strategy for the expansion of Paddock Wood. Thus, if the housing requirement is revised, it would appear from the SA that there are further options available within Paddock Wood – if required.

3.7 Finally, we note that the SA at table 112 in assessing the options considered for gypsy and traveller accommodation identify the chosen option as one that looks to focus on intensification / extension of existing sites, rather than new allocations, which given the provisions of Policy H9 and STR/SS1 is somewhat confusing. Indeed, the accompanying text makes no reference to provision on the proposed strategic allocations at Paddock Wood, such that the SA does in our opinion need to be revisited in this regard/ the need for the proposed pitches on STR/SS1 justified.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Noreen O'Meara on behalf of Residents Against Ramslye Development
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	Policy STR 1 The Development Strategy

[TWBC: see also further comments on individual sections and policies - PSLP_914, 925, 926, 928, 929, 930, 931, 932, 933, 938. The whole representation form (personal details redacted has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

The broad development strategy "...is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services."

In January 2021 the Times of Tunbridge Wells reported that "17 per cent of retail space in and around Tunbridge Wells is currently lying vacant". It has been well documented that the impact of the Covid lockdowns on the retail sector is that many shops will be lost from the high street forever (e.g. Arcadia Group shops) and others will consolidate (e.g. John Lewis which is closing its RTW store). Last year the Courier reported that nearly a third of the Royal Victoria Place units were empty. As set out above there are still numerous empty shops so there is little point planning to build more until the current supply is exhausted. TWBC needs to think more carefully about what the future of retail and office work will be in an increasingly digitalised and flexible world rather than catering for the turn of the century's shopping and working patterns.

Policy STR 1 – The Development Strategy – Table 4 Distribution of housing allocations

As set out in our Regulation 18 representations to the draft local plan we challenge the need for such a large number of new dwellings in the Borough. Office for National Statistics data predicts the population of Tunbridge Wells will grow from 118,848 in 2020 to 123,003,092 in 2038 (Table 1 section 2.16 of the draft pre-submission plan); that is growth in the population of 6,155. TWBC reports that housing stock in 2016 was 49,880. If the occupancy rate of dwellings remains at the 2016 level (i.e. 2.35 people per dwelling) then the need by 2038 will be a further 2,620 dwellings to the stock. Even if one were to allow for a decrease in the occupancy rate to say 2 people per dwelling, the need would still only be c.3,000 dwellings, i.e. about a quarter of the number of dwellings the plan allows for. Instead, there is an absurd situation where the plan appears to be proposing more than 2 new dwellings per person.

The Housing Supply and Trajectory Topic paper (February 2021) states there are 3,313 dwellings with extant planning permission which by any reasonable calculation will meet the need of the borough's projected population to 2038.

While we appreciate the housing requirement is set by national policy, we do not consider TWBC has appropriately represented the interests of its residents. The policy is eminently challengeable because it is fundamentally flawed. It effectively only considers supply side solutions to housing affordability. Much of the house price inflation experienced in the last 10 years is a consequence of the macro-economic environment (principally interest rates at an historic low for over 10 years driving a search for yield in assets) and other policy decisions such as 'help to buy' and the stamp duty holiday. It is clear there are external demand side issues that do not relate to population growth. By accepting the allocation, TWBC has not acted to protect the rural nature and the associated landscape of the borough that is valued by its residents and is protected under law. We remain of the view the approach to date has been supine and cavalier with our environment and interests. Indeed it is at odds with the Vision and Strategic Objectives by surrendering so much green space and the plan in its current form is not one that "respects the distinctive qualities of the borough". TWBC must take steps to challenge the allocation on our behalf so as to protect our interests.

We welcome the policy wording in respect of the Limits to Built Development (LBD) (section 2, 8 and 9).

While commenting on this section we note that RTW is presented as a whole. There appears to be no analysis or consideration of the distribution of sites within RTW itself. In the Broadwater ward the plan currently proposes c.500 new dwellings on six separate sites (RTW11, 12, 13, 14, 15 and 16). If this approach is adopted then the Broadwater ward will account for c.35% of the overall allocation to RTW. We consider this is unsustainable in terms of the available infrastructure, road network and the appropriate use of land in the case of site RTW16. The total allocation to the Broadwater ward is disproportionate (some wards are hardly affected at all) and inappropriate.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

Appendix: Submitted sites not included in the Pre-Submission Local Plan

Rusthall

146 Tunbridge Wells Golf Club, Langton Road, Tunbridge Wells TN4 8XH

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

In addition, we consider the Green Belt assessment of this site is incorrect. The score of "Strong" contribution to "preserving the special character of historic towns" is too high given the land is not visually prominent and is only adjacent to the common. The score should therefore be adjusted to "relatively strong".

RTW

73 Land at Pembury Road (south), Tunbridge Wells

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent.

99 Land at Pembury Road, Tunbridge Wells TN2

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

We note the site is assessed as being in the setting of the AONB whereas in Regulation 18 it was incorrectly assessed as being in the AONB – we would further challenge the setting point. We consider this land to be separate and distinct from the AONB as the A264 creates a barrier and it is not visually in the setting of the AONB.

114 Land at Sandown Park, west of A21, Royal Tunbridge Wells TN2 4RT

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

We note the site is assessed as being in the setting of the AONB whereas in Regulation 18 it was incorrectly assessed as being in the AONB – we would further challenge the setting point. We consider this land to be separate and distinct from the AONB as Blackhurst Lane creates a barrier and it is not visually in the setting of the AONB. The land is further split and separated by Sandown Park so that parcel is not even adjacent to the AONB.

116 Land south of Pembury Road, Tunbridge Wells

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent.

280 Land at The Midway, Nevill Court, Tunbridge Wells, Kent

We wish to challenge why this site was omitted from the sustainability appraisal – the purpose of the appraisal process is to fully consider the positives and negatives, in a structured and documented way. This site appears to have been rejected because it is "within the AONB and landscape impacts were considered too severe to warrant consideration". Other sites within the AONB with equally adverse landscape impacts have been taken forward and without a full suite of sustainability assessments it is not possible to make properly evidenced based policy. As such this omission renders the sustainability appraisal unsound as a whole.

Our response to Regulation 18 identified this site had been inaccurately assessed, for example, it is listed as being in the High Weald AONB when it is not. The site assessment sheet no longer lists the AONB as an issue to consider but the site is considered unsuitable as there is concern over the impact on the Green Belt. This site needs reassessment (sustainability objective scores and site assessment/SHELAA) and the assessment documented and published.

384 Land at Great Bayhall, Tunbridge Wells, Kent

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent.

411 Land at Sandown Park between Pembury Grange and A21, Royal Tunbridge Wells, Kent

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

434 Tutty's Farm, Hawkenbury, Royal Tunbridge Wells, Kent

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

Our response to Regulation 18 identified this site has also been inaccurately assessed, for example, it is listed as having an AONB component part when this is not the case. As such the sustainability assessment is unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction and Background

Our client owns land at Stone Court Farm (from hereon in referred to as "the Site") which is positioned on the north-eastern side of Pembury, in one of the only areas around Pembury that is **not** located in an Area of Outstanding Natural Beauty. It adjoins the Limits to Built development and is well related to the village core area. It is considered entirely suitable for residential development. Furthermore, it is available now and it is deliverable. The purpose of this submission therefore is to request the release of the site from the Green Belt (like Tunbridge Wells Borough Council have done for other 6 other sites in Pembury) and to allocate the land for housing. Submissions are therefore being made in relation to:

- . Policy STR1: The Development Strategy;
- . Policy STR9: The Green Belt;
- . Policy PSTR/PE1: The Strategy for Pembury Parish

Policy STR1: The Development Strategy

One of the tests of soundness is that the Plan must be effective. This means that it should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities. It is our assertion that Policy STR1 is not effective because there are not enough housing allocations to meet the housing needs in adjoining authority areas. We are also of the view that additional smaller housing sites should be required to ensure a sustainable delivery from early in the Plan Period.

The Development Strategy depends on the large strategic sites which will inevitably take a long time to deliver. When they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell.

It is important therefore that additional smaller housing sites are allocated in the Plan, especially Site 354 (Land at Stone Court Farm) which is available now and can importantly be delivered within the 5 years.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In order for Policy STR1 to be effective, housing numbers need to increase, and additional smaller sites need to be identified for allocation – specifically Site 354 Land at Stone Court Farm.

We welcome the fact that point 7 of Policy STR1 provides for some reductions in the area of the Green Belt around Pembury where exceptional circumstances warrant this and where an effective long-term Green Belt is maintained. Site 354 Land at Stone Court Farm is another site that should be identified for release from the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to ensure the Plan is found sound.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objectively Assessed Need

- 1 I **object** to the approach used in the Pre-submission Local Plan (PSLP) to determine the Borough's housing needs. This is reliant on an over-zealous application of the standard method set out in the NPPF and fails to apply the relaxations available through policy.
- 2 Planning policy requires:
 - a. *"The preparation and review of all policies should be underpinned by relevant and up-to-date evidence . . . and take into account relevant market signals"* (NPPF 31)
 - b. *"strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals"* (NPPF 60)
 - c. *"Is the use of the standard method for strategic policy making purposes mandatory?"*

No, if it is felt that circumstances warrant an alternative approach but authorities can expect this to be scrutinised more closely at examination. There is an expectation that the standard method will be used and that any other method will be used only in exceptional circumstances" (PPG 2a-003-20190220)
 - d. *Within the current planning system the standard method does not present a 'target' in plan-making, but instead provides a starting point for determining the level of need for the area, . . . It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located.* (Government response to the local housing need proposals, Apr 2021: see web link)

1 Whereas:

- a. The threshold of an "exceptional" need has already been applied in the PSLP to the destruction of Green Belt land, and therefore presumably should be applied to the planning policy associated with determining housing need. It therefore follows that exceptional circumstances **do indeed** apply and that alternatives to the Standard Method are allowable. To do otherwise would be inconsistent.
- b. Para 2.30 of the Housing Needs Assessment Topic Paper demonstrates that deliverability of the housing need is challenging and therefore potentially unachievable. It identifies that the new capped Standard Method figure of 678 dwellings per year represents more than double the 2010 Core Strategy requirement and a 37% increase in recent house-building rates. By any measure, this is not deliverable and is therefore planning to fail – it is therefore **unsound**.
- c. The PSLP should have examined the latest demographic data to determine if any adjustments to the Standard Method were appropriate. This would have identified that:

1. Population growth is slowing: “*The UK population growth rate is slower than in the 2014-based projections; the projected population is 0.6 million less in mid-2026 and 2.0 million less in mid-2041*” (Office of national Statistics (ONS), Source – Subnational population projections for England: 2016-based[1]. This showed a 10 year population growth for Tunbridge Wells Borough of 3758 over the period 2016-2026 – see below:

(TWBC Comment - see attached document for maps included within comment - Figure 2 : Population change for local authorities in England between mid 2016 and mid 2026)

2. Household growth is also slowing, having reduced from 210,000 per year for England in 2014 to 159,000 per year in 2016. The ONS identifies an increase in households for TWBC over the period 2016 – 2041 of 8085 (16.6%). = 323/yr vs the 484 from the standard method (Source – ONS Household projections in England: 2016-based)[2]

(TWBC Comment - see attached document for maps included within comment - Figure 3: Projected percentage change in number of households for local authorities in England 2016 to 2041)

3. And updated projections based on 2018 data shows a further slowdown in population growth “*The UK population growth rate is slower than in the 2016-based projections; the projected population is 0.4 million less in mid 2028 and 0.9 million less in mid 2043*” (Source – ONS National population projections: 2018-based)[3]

4. Overall, the 2016-based data suggests that TWBC will need around 4.5% less housing than projected using the 2014 figures.

d. The assertion in para 4.10 of the PSLP that “*national policy clarifies that this would be a minimum target*” is inaccurate. The concept of the OAN being a ‘target’ is not supported by the NPPF nor by the most recent Government guidance (see 2d above).

1 On this basis, TWBC have failed to underpin their analysis using “*relevant and up-to-date evidence*”, and the PSLP is therefore **unsound**.

[1]

(see web link)

[2]

(see web link)

[3]

(see web link)

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC needs to re-assess its demand projections to reflect more up-to-date figures produced by the ONS, resulting in a lower OAN.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Policy EN 25 Flood Risk

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Flood risk – Paddock Wood

- 1 I believe the Pre-submission Local Plan (PSLP) has failed to address adequately the risk of flooding, both now and in the future. Policy on this is clear:
 - 1 The NPPF states that:
 - . *“Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere”.*
 - 2 And the PPG provides further clarification:

“What is considered to be the lifetime of development in terms of flood risk and coastal change?

 - . *Residential development should be considered for a minimum of 100 years . . .*” (Paragraph: 026 Reference ID: 7-026-20140306”
 - 1 The PSLP correctly identifies flooding as a key issue/challenge in a number of places such as para 2.33, the Development Strategy (STR 1), and against the strategy for Paddock Wood (STR/SS1) in particular. The Level 2 SFRA (para 5.1.4) concludes that *“the assessment generally shows that the principle of development can be supported. . . . An exception to this general conclusion is the eastern development area considered at parcel 1 [in Paddock Wood]”.*
 - 2 However, it is not clear that the analysis is sufficiently complete to make such statements. For instance, flood risk modelling was undertaken by *“raising developed areas completely above the flood level”* with the unsurprising result of removing flood risk to the affected parcel and increasing downstream risk. The SFRA acknowledges that *“the representation of development in the model has been simplistic”* and identifies a range of measures (unmodelled) that could be adopted to improve flood resilience, but then surprisingly concludes *“the outputs show that the principle of development can be supported”*. I disagree and regard this statement as **unsound**.
 - 3 For those sites facing more pronounced flood risks (parcels 1, 2, 3, 5 & 6) the SFRA states that *“more substantive interventions are needed to manage the change in flood risk”*. In particular, for parcel 1 (part of the Paddock Wood site), *“strategic storage of flood water was the approach with the potential to mitigate the increased risk . . (although other flood risk management measures considered could contribute)”*. This is both vague and likely to be expensive, so the SFRA unsurprisingly concludes *“it is important to investigate the potential for this measure to be realised”*. Such incomplete analysis is no basis on which to state that the principle of development on such a strategic site as Paddock Wood can be supported, so again this assertion is **unsound**.
 - 4 There is also a not unreasonable presumption that developers will pay for the flood mitigation measures. For instance, para 4.91 specifies that *“it is expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver*

'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms".

- 5 However, the level of flood risk mitigation set out in the SFRA for Paddock Wood and some other parcels is acknowledged to require the raising of land, storage of water, and potentially further measures, and then additional analysis (see para 4 above). The costs associated with these measures are not consistent with the aspiration in para 4.91 to seek development funding. Indeed, this logic of seeking developer funding for such significant interventions is particularly flawed given the acknowledgement in the SFRA Appendix I (Parcel 1) that raised ground floors (for individual properties) *"was not implemented as it was agreed with the council that it would be unlikely to be deliverable given the scale and type of development being proposed"*. If developers cannot be expected to pay for raising ground floors then it is **unsound** for the PSLP to assume they will pay for the larger scale interventions illustrated in the SFRA.
- 6 In passing, it is worth noting (anecdotally) that housing currently being built in Paddock Wood is not popular with prospective purchasers, who are put off both by the area's reputation for flooding and by the cost associated with flood mitigation measures.
- 7 There is then the issue of climate change to consider, and the impact of the 2080 forecasts on flood risk. The NPPF para 155 requires the PSLP to demonstrate that each development will be *"safe for its lifetime"*, defined as 100 years. The developments at Paddock Wood (hand-drawn outline in red) have been overlaid against the maps in SFRA Appendix D and the results are shown below.

(TWBC Comment - map included within comment has been appended to this comment)

9. This shows (in orange and green) the expansion to be expected in the extent of flood zone 3a arising from climate change in 60 years time, which increases the already considerable risk facing Paddock Wood. These developments would not be safe for their lifetime, so the PSLP in this respect is not compliant with national policy.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The policy for Paddock Wood needs to be re-appraised. It is a known flood risk area that will get worse with climate change. Proposals to seek developer funding for the significant flood mitigation measures required are not credible (at levels that would be economically attractive for purchasers) and need to be re-thought.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mrs Carol Richards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 1 The Development Strategy	
Question 4	
Do you consider that the Local Plan:	
Is sound	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.24The central aim of the NPPF is to achieve a significant boost to housing delivery, unless it is unsustainable to do so. TWBC have not pushed back on the delivery of a large number of homes to be built between 2020-2038 and have not used the exceptional circumstances (ANOB and Green Belt) to do so.

The threshold of an "exceptional" need has however been applied in the Local Plan to the destruction of Green Belt land, and therefore presumably should have been applied to the planning policy associated with determining housing' need.' TWBC have also failed to take into account, the ONS projections based on 2018 data showing a slowdown in population growth. 2016 data suggests that TWBC will need 4.5% less housing than projected in 2014. They have failed to justify the destruction of the Green Belt at Tudeley and the failure to use OPNS data makes this plan unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should have taken an opportunity to reduce the total 'need' of housing 2020-2038 and have failed to challenge the standard method for determining the housing need. Thus, putting unnecessary pressure on the requirement to build homes- in totally inappropriate sites. Especially with the most recent government advice in April 2020- Changes to the current planning system.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1

Respondent's Name and/or Organisation Mrs Carol Richards

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Policy STR/SS3 The Strategy for Tudeley Village

[TWBC: this representation has been input against Policies STR 1 and STR/SS 3 – see Comment Numbers PSLP_1890 and PSLP_1893]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none">It is not positively preparedIt is not effectiveIt is not justifiedIt is not consistent with national policy
---	---

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Strategy for Tudeley Village

Site Reference : Sustainability Appraisal: Capel Reasonable Alternative Option 1 Land at Tudeley site 446 and 448

In the Parish of Capel, Tudeley, is a very small little **Hamlet**. The site overlooks the Medway Floodplain. The 'Masterplan' is to basically build a **Town** on the edge of Tonbridge-1.2 miles away. **This is no garden village**. The whole Tudeley site is bisected by a railway line- one of the busiest in the county. This is not ideal for the potential occupants- who wants to live near a railway line? The original plan was to have a railway station and Tudeley. The cost of this proposal it would cost millions and the bridge over the railway line would need to be widened, Apart from the fact that British Rail have not said yes to this proposal- bearing in mind that there is a very short distance to Tonbridge by train- there seems little point in them doing so. Tonbridge which is not in the borough of T.Wells is small compared to T.Wells itself. Tonbridge suffers from being prone to flooding and has two pinch points at either end of the High street the River Medway and Tonbridge Rail Station, (which from a rail point of view runs North /South and East/ West and has Eurostar zooming through it too.) It only takes one small set of road work to bring the town to a standstill. All arteries to the town are gridlocked. The belief that the potential town at Tudeley (which could for all intense and purposes be a commuter town) will not add to the chaos at the station in the morning and afternoon is laughable- and that is without TMBC adding more homes in Tonbridge. There is just no available space to accommodate this increase in Traffic. The use of bikes and walking in the winter will only be used by the hardest of individuals. There is the added problem that currently, there was at Reg18, 5,206 (probably more in the next academic year) pupils attending schools between the Woodgate Roundabout and Brook Street. There is also a private school Somerhill near the Woodgate roundabout with a further 750 plus pupils. There is just not the capacity to accommodate another town so close to Tonbridge. Tonbridge is creaking under the strain as it is.

In suitability p7 of 17 TWBC state this site is considered a suitable location and sights NPPF 72 to support this claim. This statement is not true and unjustified . Tudeley is not a suitable location and is unsound

NPPF 72 and TWBC state such,” an approach is acknowledged in the NPPF, which states (at paragraph 72) that “the supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements...”

This is the justification for building on Green Belt Land. The release of which is against NPPF guidelines and recent 1 April 2021 government guidelines- counters these arguments..

The government response to the local housing need proposals in, 'Changes to current planning system update 1/4/21 states :-More broadly, we heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places. But harm or homes is not a binary choice. We can plan for well designed, beautiful homes, with access to the right infrastructure in the places where people need and want to live while also protecting the environment and greenspaces communities most value. If we do this well, we can achieve all this whilst giving a new generation the chance to access the homes they deserve. The same chances generations before them were given. This is a matter of social justice and inter-generational fairness. It would be wrong for our built environment to respond only to the needs of older, wealthier people. We can and must strive to build more homes, but to do so with sensitivity and care for the environment, heritage and the character of existing communities.

Tudeley also happens to be owned by one individual, so makes life very easy for the planners to deal with one person and not multiple landowners. Taking the easy option and creating harm as a result should not be a Local Plan.

This site will provide substantial housing- which will be a commuter TOWN – Village is an incorrect and inaccurate – misleading term..5.220 The site is on the small minor road B2017 between Tonbridge and Paddock Wood The distance from Tonbridge is 1.2 miles (I have measured it) to Paddock Wood 2 miles (I have used TWBC measurements) The scale of these homes between these distances is 6,800 homes this is not a development it is a concentration and a sprawl. The proposed Tudeley site is not a vision it is a nightmare to those Living in Tonbridge. This urban sprawl is unjustified

The Tudeley site provides 38.9 % of TWBC 's need' and Paddock Wood 58.9% numbers making a total of 6800, make up 945% of the minimum allocation of 7221 dwellings. I do not call this a 'vision'. I call it the 'easy option' facilitated by an offer- in the case of Tudeley to use prime agricultural Green Belt land. The only 'vision' I see at Paddock Wood is yet more problems with sewage and flooding. I would like to also point out that your Map on page 35 of the Local Plan is very misleading in terms of scale of growth. At first glance it would appear that Tunbridge Wells will grow massively, but what it really shows is small growth around established towns coloured grey and small dwelling growth in pink around these centres. Where the real growth is, - are the much larger pink rings at Tudeley and Paddock Wood. Maybe a Map showing the number of dwelling increases in the borough by towns would be more honest? This map is not effective in helping to understand the numbers TWBC have proposed elsewhere.

TWBC state that a new settlement can be an extension to existing villages / towns . Well, Tudeley is a hamlet on Green Belt Land and the town it will effect -is Tonbridge. For all the above reasons a location near Tonbridge is not well located. It is not an appropriate site for a garden/new town and the infrastructure will not support the community at this site. Journeys will be made to shops in both Tonbridge first and secondly to Tunbridge Wells.

a) There will be no environmental gain because:1. The land is grade 1 farmland above a wetland landscape on Greenbelt Land. No environmental gains.2. The infrastructure here is poor and the railway station is not going to be built for reasons explained above . Argument unsound.b) The expectations of employment are unrealistic, especially as TWBC are proposing a **major employment allocation site** on the other side of the A21. One begs the question why not put a garden settlement there, as this will facilitate low carbon commuter-walking . There is also as a result of the constraints in Tonbridge there is no good access this side of the A21 and road improvements from Five Oak Green/ Tudeley/ Tonbridge are 'offline.' Therefore, poor access - apart from some roundabouts improvements which will not help throughflow -because of the sheer volume of traffic. Other employment is likely to be in London – i.e. a journey to Tonbridge Rail Station.c)the building of this site will cause major traffic gridlock into Tonbridge -again not a headache for T. Wells but local Tonbridge Residents.d) This proposal is already on a Greenbelt site

This proposal will have far reaching effects on the Medway floodplain below. **This point e) assumes that the site for a garden/town settlement is not on Greenbelt land.** The NPPF pt143 Proposals

affecting the Green Belt states- inappropriate development, is by definition, harmful to the Greenbelt and should not be approved except in very special circumstances. (TWBC trying to fill its housing quota is not good enough especially when the consideration below are taken into consideration). Pt145 of the NPPF states a local planning should regard the construction of new buildings as inappropriate in the Green Belt. None of the exceptions apply. The above comments make para 72 considerations unsound. This site will not provide opportunities to create strong links to the key nearby settlement i.e. Tonbridge -it will however cause big headaches for every resident in the town of Tonbridge.

This site is not suitable and not sustainable. It is totally and unequivocally unsound and unjustifiable. The vision of this site was enabled by the offer of one landowner and then TWBC have leaped at the chance to build thousands of homes on an inappropriate site. The inhabitants of this site will mix with the surrounding towns – it is not going to be a 'perfect bubble' and stand alone.

(TWBC Comment: Map included within comments has been appended to this comment)

Appendix D shows by 2080 the flooding will cross the Sherneden Road and flood the lower of the garden settlement. The winter of 2019/20 was a taste of what is to come with global warming and the Appendices of 2016 could prove to be a bit optimistic. In my response to Reg 18 in 2019 I said the Hartlake Road would need to be raised and a few months later in early 2020 you could swim along the road. My prediction was correct. I have to ask is this why there is a proposal to close the Hartlake Road -to solve the problem of flooding by closing access across the floodplain -totally- and as a result instead create gridlock in Tonbridge and Five Oak Green for locals in Hadlow and Golden Green- which are in TMBC? Is this how TWBC cooperate with TMBC- by railroading the inhabitants of Tonbridge/Hadlow/Golden Green/East Peckham and riding roughshod over them? Duty to cooperate missing here.

In the winter of 2019/20 all the dykes were full and there was surface water on all the fields. When I use the word biblical -it was. The whole of the Tudeley site is totally inappropriate and unsound. This site should not be used for a new town. The ramifications for houses downstream in East Peckham and Yalding from runoff are real and the potential for the houses lower down the slope at the new town are as well.

I would like to note that should this site have been within TMBC boundaries -barely metres away- I do not believe they would ever have considered Tudeley as a viable site because at the TMBC Planning and Transportation Advisory Meeting on 2/10/19 no one in the room was happy- because they are fully aware of the fact that flooding will occur beyond Sherneden Road from the Medway River and by 2020 it almost did! The site at the Hamlet of Tudeley is totally unsuitable and unsustainable. Locals know this area is more like a wetland area, home to many species of birds and the pollution from 2800 homes on the horizon will do damage to this environment. It would be unsound to build here. In the winter of 2019/20 all the dykes were full to capacity and there was surface water on the fields. When I use the word biblical -it was. The whole of Tudeley site is totally unsound. This site should not be used for a new town. The ramifications for houses downstream in East Peckham and Yalding from runoff are real and the potential for houses lower down the slope are as well.

The exception tests NPPF would fail here as a) the development will cause harm downstream and b) The development- only parts- of would be safe for a life time (deemed 100 years). As both elements should be satisfied to allow development NPPF 161- this development should not be allowed.

Tudeley lies on a ridge above the Medway Flood Plain and this means the precipitation on hard -standing areas, of 2,800-5000 homes- will cause faster run-off during a large event- into the flood plain below, it is also on a site on Wadhurst clay that is normally found in rural outcrops – as here- and is not normally built on. Where it has been this soil is prone to slippage- which could cause problems for a large housing development especially with large run off.

In the Transport Strategy Review: context and way forward page 28 it states: "Enabling growth without gridlock has been highlighted as a key challenge for Kent & Medway and one that will only be achieved through a combination of measures that influence behaviour and improve infrastructure." Bearing in mind that although TWBC still believe that British Rail have not said yes or no to building a new station- how can TWBC have a 'masterplan' for Tudeley which assumes a new station **will** be built. The time issue (there will be no time for the train to gather speed between Paddock Wood and Tonbridge) apart from the cost it is totally impractical for British Rail to build a new station when the current stations are already close enough? The railway bridge on the Hartlake Road will need to be widened too. There are also plans to close the Hartlake Road- which is the only crossing point across the Medway floodplain. This is the only road that shortens the distance from T. Wells to Hadlow and Golden Green, without

either going around the Industrial Estate in Tonbridge along the A26 or travelling through Five Oak Green and East Capel where TWBC are also planning more housing . All I can envisage is sitting in my car and pumping out more fumes while I wait in Gridlocked Traffic. How can this be classified as sustainable development? **The Hartlake must not be shut!!!!!!** This document talks of ideals -it does not concentrate on the biggest changes in population and hence traffic conditions in the TWB area i.e. Paddock Wood and Tudeley. There is no explanation as to how this is to be **practically tackled** . In fact Fig 5 shows the route between Paddock Wood and Tudeley as 'Off-line' whatever that means? Pt 7 in the Transport Strategy States, '.... road transport contributes to a third of Kent's CO2 emissions and pollutants have negative effects on air quality in addition to noise and consequently on human health and the natural environment.' So how can a proposal to build 6390 homes between Paddock wood and Tudeley bringing a minimum of 6400 probably more like 8000 to 9000 extra cars on the B228 between Wetsted to Seven Mile Lane/ the B2017 from Five Oak Green to Tonbridge and the B2015 from East Peckham to Watlingbury. This scenario is so unsustainable, so undeliverable it is laughable and this is called a plan? Point 109 of the NPPF states, 'Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. I think these proposals are so severe point 109 should be upheld and planning refused on these grounds.

The report drawn by SWECO for TWBC is very illuminating – basically the work was undertaken to understand what mitigation levels can be achieved to reduce congestion-. and has been written in cooperation with the team working on the Garden Settlement plan. Can I ask if TMBC were involved in these talks ? The minutes of the meeting with KCC Dtc Appendix H4 dates 16/9/20 , 11/11/20 and 19/1/21 , 8/2/21/23/2/21 Also Appendix H2 Highways England 7/2/2020 and 3/2/2021 are unavailable be electronic copy. I cannot see how this report is not biased towards a positive outcome for TWBC.

The main thrust of mitigation, so I understand , is to have a hugely improved bus service and cycle routes. This for a country where people like driving cars (comfortable) and it rains a lot and only hardened individuals use their bikes. Most congestion occurs at peaks times as the report says and this is because individuals are either going to school or work. Bus services will solve school traffic but I cannot see cycle routes being used for long distance in the autumn/winter/spring for commuters. Cycle routes will be used as a recreational asset. I live in Hadlow and am really cross that because TWBC are so hell bent on building a new town at Tudeley and don't even humour me by calling it a garden settlement that I will no longer be able to drive along the Hartlake Road / B2017. There are nearly 6000 residents in Hadlow and Golden Green and we shall be unable to cross from T. Wells to Hadlow via this route. It is the **only** road across the Medway Flood Plain. Instead we shall have to sit in extra traffic trying to go through the Tonbridge Industrial Estate off the A21 now even more congested or travel through Southborough and Tonbridge Town centre sitting in traffic causing CO2 emissions as I shall be stationary for so long or travel the very long way round and go via Five Oak Green and turn off the A228 at East Peckham and follow that route to Three Elm Lane. Taking as a starting point the A264/A21/A228 junction my 14..5 k short cut that takes about 15/20 minutes will now take an extra 10 minutes and add 4k on to my journey through another small village of I could go down 7 mile lane and travel an extra 7k and add an extra 15 minutes to my journey as the roundabout at Alders Wood will be chronic. **The Hartlake Road must not be shut.**

This all because TWBC want to build homes at Tudeley and Paddock Wood/Capel (94%) of their allocation and cause chaos for anyone else but not their residents, as these areas are right on the edge of their boundaries and won't affect their residents- in their more leafy boroughs. I do not believe causing me, along with other residents on the North and Eastern side of Tonbridge so much inconvenience and extra cost and time can be sustainable in terms of emissions just because TWBC believe they can justify building a new town right next to Tonbridge. This is unsound and the extra amount of traffic will cause so much extra traffic on roads that are difficult to improve and **ALREADY CONGESTED**. The only way to 'improve' through traffic is to dual the B2017 from the Badsell/ Capel Grange roundabout all the way to the roundabout near Somerhil School and dual from there to the A26 the Woodgate Roundabout near the A21 and Vauxhall pub. There is no way to 'improve' the A2014 from the Vauxhall pub to the Tonbridge Train Station for cars or bikes and the footpaths are overcrowded with school pupils.

The mitigation schemes are not viable because of the limited available space and topography constraints. The roads around this area are not capable of taking the 'load' of extra traffic. Page 89 10.3.2 Highways England say there is a need to demonstrate how proposals will reduce car trips and improve accessibility for all modes and only then consider appropriate and proportional mitigation ,

measures that assess the likely impact of residual car trips. HE goes on to advise local planning authorities to “refuse or place conditions on developments only where the residual cumulative impacts of development on the capacity of the SRN (once proposed mitigations are taken into account) are still assessed to be severe.” In Paragraph 41, HE also states that the promoter should take all reasonable steps to minimise the level of physical mitigation required, through the use of measures such as Travel Plans and travel demand management measures. Consequently, a key aim of the Local Plan work outlined here is to minimise the residual new car trips on the highway network that would need further physical highway mitigation measures.

TWBC have shown that there is a need to mitigate new car trips but realistically who is going to use a bike who will make regular use of a bus service. Individuals for the most part will use their car whenever possible and that is what will happen here. This report presumes too much on the alteration of human behaviour at peak traffictime.

It took over 40 years to improve the A21 just from Tonbridge to Pembury – hardly a great distance, How long before these other so called ‘mitigation measures’ are implemented.-which will not alleviate the traffic congestion! It seems ridiculous to me why you would want to build on the Tonbridge side of the A21 anyway -when as I said after 40 years waiting for the A21 --,TWBC have build bicycle routes on the other side -all the infrastructure IS ALREADY on that side of the A21. THIS is where you need to make use of the infrastructure that is already in position. **Why waste more public money ?** Also with houses on that side of the road – some homeowners will use High Brooms Rail station which would alleviate the pressure on the access to Tonbridge Rail station. The Medway and its floodplain too -are miles away-. on the other side of the A21.

The KCC West Kent ‘Map of Transport Priorities for Tunbridge Wells shows NO improvement of roads between Paddock Wood and Tonbridge- only the a228 Colt’s Hill Relief Scheme and junction improvements. No plans to improve the infrastructure any time soon for Tonbridge Residents then. Unsound!

This report does not persuade me that the traffic congestion in Tonbridge – that the Tudeley development will cause- will be solved and is therefore not viable/workable/ and is unsound. It also has the **gall** to for the ‘convenience of implementing this development -to close the Hartlake Road which is totally **unacceptable** as not only will this cause even more congestion in Tonbridge, It will add more CO2 into the atmosphere as Tonbridge residents queue around the Tonbridge Industrial Estate- THAT is not so EFFECTIVE then is it ?. Does TWBC have any consideration for others, so intent .are they to build at Tudeley- residents of North Tonbridge , Hadlow and Golden Green can have their lives disrupted and go hang. MP Tom Tugendhat and TMBC are all of the view this development is not justified and unworkable and unsound. The Tudeley development will add 25% to the population of Tonbridge and that is before TMBC look to accommodate their own ‘need’

5.218 TWBC state that this development provides an opportunity for a new rail station at Tudeley- if this can be realized in the future after 2038.. This is a ridiculous statement to make. This station will never be built as Tudeley is too close to Tonbridge rail station- so why put it in this local plan-it is a disingenuous statement to make.5.224 The infrastructure will not be able to support a minimum of 2,800 cars. The by pass at Five Oak Green will not be used by Tudeley residents, so this will not alleviate highway issues caused by development at Tudeley New Town- (not garden city – this is just a posh term) as they will all be travelling in the other direction to the A21 and Tonbridge Station and improving the roundabout near Somerhill school will not enable the traffic to flow.

Policy STR 2 p45 states all new development must use the following principle relevant to its location, scale and use.

Point 1 Fails here as it does not enhance the quality of existing communities and their environs and creating a town at Tudeley is not appropriate.

Point 3 Conserve and enhance assets of historic, landscape or biodiversity.TWBC Fail to save the listed church at Tudeley from being surrounded by 2,800 homes and fails to save Green Belt land and the wetland floodplain below and the biodiversity value- which they have not even bothered to assess.

Point 9 TWBC will protect the future residents and users with regard to noise, vibration (difficult with the number of trains bisecting the site),smell, loss of light, privacy and overbearing impact. I am sure the existing residents of Tonbridge would like to be treated with such consideration themselves.

Policy STR 9 Green Belt States an effective Green belt will be maintained through the application of national planning policy and believe the removal of Green belt land in this plan is fully justified there

are NO exceptional circumstances and the objections above show how much harm this development will produce to the surrounding countryside and existing residents. THIS DEVELOPMENT IS INAPPROPRIATE -NPPF 145 AND THERE ARE NO EXCEPTIONAL CIRCUMSTANCES. This plan regarding Tudeley should not be allowed it is unsound does not have any backing from TMBC or the MP for this constituency, has been poorly prepared with regard to its surroundings, constraints and existing residents, not legally compliant as it fails NPPF guidelines 133, 134 a)-e) 136, 137, 143, 144, 145, 155, 157. 160. 161. 163. Totally unjustifiable.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The development of Tudeley was only considered when a single landowner offered the site at Tudeley. TWBC have made every effort to make this Development work in a totally inappropriate site and are determined to push this so called 'Masterplan' through. I consider this proposal a disgrace to the planning process on so many levels. I should be stopped altogether.

I think TWBC should look to spread a reduced need throughout the borough, concentrating on towns and villages that have existing good bus routes into T. Wells. I believe there should be a mix of bungalows and affordable housing throughout the borough. I would look to build a little more old peoples residential housing in the Benenden area to make use of a hospital there-, which would reduce the pressure on Pembury Hospital and could if planned well reduce the pressure on Social Services. I would look to have greater amounts of affordable housing for younger generations in some of the largest towns- Tunbridge Wells, Southborough and Pembury – as well as in some of the smaller towns and villages as I said above.

I believe the concentration of development along the northern fringes of the borough to be nothing but urban sprawl. I also strongly disapprove of a 'plan' to build on land known to flood and all these proposed homes have the river Medway behind them- and will either flood themselves or cause harm further downstream.

This local plan is fundamentally flawed because TWBC have not pushed back on their 'need' and have relied on only three inappropriate sites to fulfil this 'need' and have chosen to deal with very few landowners -making life easy.

The borough of T.Wells planning should not be easy with the amount of ANOB and GREENBELT land. JBA consulting did a comprehensive assessment of the flooding or lack of potential for all the first call for sites. I would have only looked at flood Zones 1 and 2 and only then slit those into good/ bad bus routes -then visited them all. TWBC seem to have concentrated on nearly all the sites prone to Flood/or cause harm elsewhere as their starting point. A flawed plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Rosconn Strategic Land
Question 2	
Agent's Name and Organisation (if applicable)	Bloomfields
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Rosconn Strategic Land (RSL) is promoting land south of Brenchley Road, Horsmonden for residential development. It is welcome that the Pre-Submission Local Plan ("the Plan") proposes to allocate this site for development and it is in this context that RSL wishes to express its general support for the development strategy as set out in Draft Policy STR 1.

The development strategy is based upon meeting, in full, the assessed local housing need for the area along with a "buffer" for flexibility. This is welcome, in principle, since the Plan's evidence base indicates very limited scope to apportion unmet housing need to neighbouring authorities, since neighbouring authorities experience many of the same constraints as Tunbridge Wells. As a result of this, the development strategy must respond pragmatically but sensitively to the Borough's principal constraints, namely the High Weald Area of Outstanding Natural Beauty (AONB) and the Metropolitan Green Belt. The need to safeguard these areas must be carefully balanced against the need to achieve a sustainable pattern of growth and, in general terms, undertaking this balancing act has been found by Inspectors to be justified through local plan examinations elsewhere in the country (e.g. Guildford and Central Bedfordshire). That said, the contribution to development needs from the non-constrained area of the Borough must, within reason, be maximised to limit the extent of Green Belt release and encroachment by new development within the AONB. In Green Belt release terms, this is essential to making the case for "exceptional circumstances" as per paragraphs 136 and 137 of the National Planning Policy Framework (NPPF), and, in AONB terms, to demonstrating that great weight has been provided to

conserving and enhancing the AONB and limiting the scale and extent of development within the AONB (NPPF, paragraph 172). Implicitly, the need to maximise areas beyond the Green Belt and AONB has already been acknowledged by the Plan's proposed transformational expansion of Paddock Wood, which apart from being a sustainable location, also has the advantage of avoiding the AONB and would entail only some Green Belt release. This "avoidance" strategy should run through the Plan's as a whole in order for it to be sound in its conformity with national policy.

Given the above, welcome the decision (described at paragraph 4.48 of the Plan's supporting text) to reduce the level of growth previously proposed in the AONB as being beneficial to the overall soundness of the Plan. In part compensation, the Plan has seen a greater focus on urban intensification and brownfield which has been identified as a lynchpin of the development strategy in Draft Policy STR 1. It must be recognised, however, that urban intensification and brownfield redevelopment have limits and those sites that are available may not be quick to come forward given the myriad of issues that typically affect the deliverability of urban and brownfield land. By way of using urban land to its fullest potential in order to avoid directing growth to the Borough's more sensitive areas, the Brownfield and Urban Land Topic Paper (January 2021) details a very exhaustive approach to ensuring that these opportunities are maximised whilst ensuring that the level of growth planned through these means is deliverable and realistic.

Combined with the two strategic proposals in the Plan, Tudeley Village and the expansion of Paddock Wood, both of which exist within close proximity to each other and have complex infrastructure and phasing requirements, over-reliance on urban intensification and brownfield sites coming forward could result in a "top-heavy" development strategy unless it is accompanied by a wider dispersal of small to medium sized sites that are capable of yielding housing completions quickly as well as contributing to the viability and vitality of rural areas. It is welcome that the Plan provides for these opportunities as they will diversify the sources of housing supply and ensure that the Plan retains flexibility to respond to changing circumstances. We would note from Figure 3 of the Housing Supply and Trajectory Topic Paper (February 2021) that expected housing completions within the plan period will ensure a consistent and steady supply to meet ongoing need, particularly in the earlier years, which is important given the Plan's reliance on strategic sites.

As set out above, opportunities for dispersing growth to the rural area generally will be limited by the AONB and the Green Belt which is why Horsmonden, as a sustainable settlement outside both of these areas, plays such a crucial role in the overall development strategy. We note from paragraph 6.66 of the Development Strategy Topic Paper (February 2021), for instance, that the lack of major constraints around Horsmonden has been fundamental to proposed allocation of suitable sites around the settlement. To this we would add that Horsmonden sets itself apart from other non-AONB rural settlements for its relative sustainability with the Settlement Role and Function Study (February 2021) identifying it as one of the best performing rural settlements in terms of the availability of services and facilities. With both of these factors in mind, the Sustainability Appraisal (SA) has highlighted Horsmonden's ability to make a "material contribution to meeting housing needs." Growth in Horsmonden can also enable the expansion of services and facilities to improve the sustainability credentials of the settlement which, in addition to being in the spirit of the Planning Practice Guidance and the National Planning Policy Framework, can facilitate delivery of the Plan's strategic objective of improving infrastructure, local services and amenities in line with community needs.

In general terms, we consider allocating a material level of growth at Horsmonden to be sound and fully supported by the Plan's evidence base. However, the contribution made by Horsmonden and the non-AONB/Green Belt rural settlements generally to the development strategy should be expressly recognised in Draft Policy STR 1 as it is an issue of strategic importance to reasonably maximise the contribution of areas outside the Green Belt and AONB toward meeting development needs. In so doing, drawing upon the evidence base, the development strategy should clearly set out the role and function of each higher order rural settlement, including Horsmonden, in order to explain more clearly in broad, strategic terms the role each one plays its part in delivering the Plan's overall strategy. For Horsmonden, we would request express recognition for the important role the settlement will play in meeting housing needs over the plan period in a sustainable location that is not affected by fundamental landscape or Green Belt constraints.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Draft Policy STR 1 or a further policy should identify a clear hierarchy of settlements and growth areas to guide the apportionment of housing and explain how each one will play a part in delivering the Plan's development strategy. We note that Limb 3 of Draft Policy STR 1 already does this in respect of strategic allocations but this should be extended to the Borough's rural settlements alongside an express recognition that development outside the Green Belt and AONB should be maximised in order to safeguard these important designations to the extent consistent with broader sustainability objectives.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Rosconn Strategic Land is promoting Land South of Brenchley Road, Horsmonden for development and is seeking changes to Draft Policy STR 1. Rosconn Strategic Land requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

RSL supports the general thrust of the Sustainability Appraisal (SA) insofar as it substantiates the preferred development strategy as being preferable against the reasonable alternatives. The SA examines a number of scenarios for the distribution of growth across the Borough including, critically, a scenario which would meet full housing need but does not involve Green Belt release. This scenario (Growth Strategy 6) demonstrates that no Green Belt release would involve major strategic growth at a number of the Borough's rural settlements including those within the AONB thus demonstrating that some Green Belt release is necessary in order to deliver a sustainable pattern of development. We note that no scenario has been tested that would see full housing need met in areas completely outside the AONB. However, this would clearly involve similar major strategic growth in rural settlements

by obviating the contribution of Royal Tunbridge Wells and Southborough to meeting housing needs or else by generating excessive reliance on strategic expansions to Paddock Wood and Tudeley Village, which would most likely need to be enlarged. The SA therefore substantiates the need to deliver some growth within Green Belt and AONB.

We note that failure to meet standard housing need by avoiding the AONB or the Green Belt were accompanied by significant negative scores in relation to the delivery of new housing and economic development, as would be expected. We also noted scenarios that would see significant concentrations of growth within the AONB associated with significantly negative environmental effects particularly as regard to landscape, once more as expected. As a result, the SA supports the key limbs of the preferred development strategy of meeting full housing need and reducing the scale of development within the AONB from the Draft Local Plan as against the reasonable alternatives. However, the preferred spatial strategy (i.e. Growth Strategy 13) would still result in the concentration of significant development within the AONB alongside significant Green Belt release to accommodate a new settlement and the transformational expansion of Paddock Wood. The contribution by urban and brownfield land has also been maximised to the reasonable extent possible. As a result, the preferred development strategy is finely balanced and whilst noting since the Regulation 18 consultation the quantum of development has been decreased in some smaller rural settlements beyond the Green Belt and AONB, it is not practical to do so further without resulting in negative environmental effects and/or compromising the deliverability of the development strategy.

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We generally support paragraphs 1,2,5,6,8 and 9 of Policy STR 1.

We are unable to judge whether paragraphs 3, 4 and 7 are sound and in particular whether proposed loss of Green Belt land around Royal Tunbridge Wells for residential purposes is actually justified by exceptional circumstances when so much scope seems to exist for densification of certain allocations and redevelopment within the LBD of the existing town and in other settlements. The Brownfield and Urban Topic Paper (January 2021) makes reference to use of an indicative density of 45dph (compared to the 30dph in the SHELAA), which is little more than a poor suburban density in a large conurbation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

So that we can illustrate for the inspector the scope for increases in density of allocations within RTW and for redevelopment of areas of the town to yield higher housing numbers.

[TWBC: see supporting documents attached, including composite of all representations].

The Development Strategy

The development strategy is flawed in that:-

- . the housing target of 12204 dwellings is too low. See the attached Technical Note prepared by Neame Sutton Ltd. (Rydon 4).
- . the strategy should include strategic growth at the main locations of Pembury, Hawkhurst and Cranbrook on a scale that is not “transformational” but constitutes expansion consistent with their scale and character and with their role as important service centres. The opportunity should be taken to enhance local facilities, infrastructure and services through controlled growth to the benefit of the existing and expanded communities.
- . the strategy should consider the potential for the provision of a new settlement outside of the Green Belt but should, at least, look to minimise the amount of land that needs to be taken out of the Green Belt.
- . the strategy of limiting development in the HWAONB to that which can be accommodated whilst still conserving its key characteristics is supported but this should not be limited to small scale development or at the expense of requiring more land to be taken out of the Green Belt. Exceptional circumstances exist to justify some major development in the AONB in terms of the large proportion of the District that is covered by the AONB designation and the need for housing, particularly affordable housing. This need is in evidence across the District but also in areas within the AONB that are remote from Tunbridge Wells and the Paddock Wood development focus. The strategy needs to focus more on those main towns in terms of:-
 - their local housing need.
 - to reduce the risk of the non-delivery of housing, particularly in the early part of the plan period by providing a range of smaller sites in different locations and making more effective use of existing infrastructure.
 - to assist in maintaining and enhancing the provision of social housing, local services, facilities and infrastructure at rural settlements.
 - improving the geographical balance of housing provision which is overwhelmingly focussed on the western part of the Borough.
 - to improve the choice of location for purchasers of new homes and reduce the risk of market saturation in the western part of the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.0 Instructions and Introduction

1.1 Neame Sutton Limited, Chartered Town Planners, is instructed by Rydon Homes Limited (“Rydon”) to prepare and submit representations in relation to the Regulation 19 consultation version of the Tunbridge Wells Borough Local Plan (“the Plan”) published in March 2021.

1.2 This document sets out Rydon’s Representations on the Plan and deals with the following specific matters:

- . Matters of Legal Compliance
- . Consideration of the correct Housing Need and Housing Requirement within the Plan in the context of the Housing Supply identified by the Council; and,
- . Site-specific representations in relation to Rydon’s promotion site at Finches Farm, Five Oak Green

1.3 The relevant sections of the Plan, including paragraph and policy references, are cited throughout these representations along with the soundness tests that it is considered the Plan fails to comply with.

1.4 These representations are supported by a series of technical reports and appraisals prepared by Rydon’s professional project team, which comprise:

3.0 Housing Need, Housing Requirement/Target and, Supply

Policy STR1, SA, Paragraphs 4.1 – 4.18

OBJECT – UNSOUND – Not positively prepared, justified, effective or consistent with national policy

3.1 The importance of significantly boosting the supply of housing nationally cannot be under estimated as a core Government objective running to the heart of the planning system. In fact the Government's recent announcements through the Queen's Speech further reinforce its commitment to the delivery of more housing to meet the needs of the country allied to achieving a swift and sustained economic recovery as the country emerges from the global pandemic.

3.2 Set within this context the delivery of the right level of new housing across the Borough within the Plan is key to its Soundness, particularly in terms of planning positively, being consistent with national policy and being effective.

Setting the Correct Housing Requirement for the Plan period:

3.3 Rydon considers that the LHN figure of 678 dpa comprises the right starting point for the Plan. This figure is however only the starting point and does not necessarily represent the housing requirement figure.

3.4 The PPG confirms that the Standard Method comprises the minimum starting point. There can be circumstances where the LHN should be set higher than that calculated via the Standard Method, which may include meeting unmet need arising from a neighbouring authority⁷.

3.5 In the case of Tunbridge Wells, Rydon considers that there are two key reasons for why the Council should be planning for a higher figure than the minimum LHN calculated via the Standard Method:

3.5.1 Reason 1 – Unmet Need: It is clear that there is an increasing level of unmet need arising from Sevenoaks, which the Council has paid insufficient regard to in terms of determining whether any of that need can be met within the Borough as part of the Plan.

3.5.2 Further work is required in the context of the changing position in Sevenoaks to determine exactly how much of the unmet need can be accommodated in the Borough through the Plan. As set out in Section 2 of these Representations it is clear the Council has failed the DtC in relation to Sevenoaks and therefore further work will be required. In Rydon's view there is sufficient supply on suitable and sustainable sites across the Borough that could accommodate further housing to help meet the need arising from Sevenoaks.

3.5.3 Reason 2 – Worsening Affordability: Tunbridge Wells is one of the least affordable places to live in the country outside of London. The most recent median work place based affordability ratios published by ONS in March 2021 confirm a ratio of 13.27 for the Borough. This compares with a national average of only 7.84, which is itself a figure that the Government considers to be too high and one that urgent action is required to address through the delivery of more housing nationally.

3.5.4 When past trends are analysed it is evident the position in Tunbridge Wells has been worsening. Over the last 10 year period the ratio has increased from 9.91 to 13.27. In the last 12 month period the position has increased from 12.49 to 13.27.

3.5.5 A worsening affordability ratio in turn leads to an exponential increase in affordable housing need, which is reflect by the Council's current stated annual need of at least 323 dpa over the Plan

period⁸. This is an unsustainable level of need that is set to increase over the Plan period unless the worsening affordability trend is addressed now.

3.6 In simple terms the only way to address the above two points is to plan for more housing at a level above the LHN calculated using the Standard Method.

3.7 The answer as to how much additional housing to plan for is one that the Council needs to explore particularly in the light of the Sevenoaks situation. However, as a starting point Rydon considers the minimum housing requirement should be set at the uncapped Standard Method figure of 749 dpa. That would deliver a further 1,278 dwellings over the Plan period, which would go some way to addressing Sevenoaks unmet need of circa 2,000 dwellings as well as making a meaningful contribution to improving affordability beyond that already provided for within the Standard Method calculation.

3.8 A modest increase of 71 dpa would also assist the Council in meeting its growing affordable housing need over the Plan period.

3.9 Rydon therefore considers the minimum housing requirement for the Plan period should be set at **749 dpa** or **13,482 dwellings** over the 18 year Plan period.

3.10 It is perhaps of no surprise that the reasonable alternatives (10 and 11) set out in Table 12 of the SA i.e. uncapped 749 dpa and uncapped plus unmet need of 853 dpa are both considered to be 'reasonable alternatives' and score considerably better in terms of meeting the core national policy objective of delivering new housing to meet identified needs.⁹

Housing Trajectory and Supply:

3.11 Neame Sutton has undertaken a separate detailed analysis of the Housing Trajectory set out for the Plan period and the consequent ability of the Plan to maintain a rolling 5-year housing land supply. The detailed analysis is attached at **Appendix 3** of these Representations.

3.12 It is evident from the attached analysis that the Council has placed too much reliance on overly optimistic estimates of supply from the two strategic development locations at Paddock Wood and Tudeley Village, which are unsupported by robust or clear evidence. Furthermore the Council's supply across the first (current) 5-year period is reliant on supply sources that fail the Annex 2 test of deliverability. Finally, the Council expects a delivery rate from windfalls that is simply unsupported by robust evidence and certainly goes nowhere near to comprising the compelling evidence required by Paragraph 70 of the Framework 2019.

3.13 As a consequence the Plan fails to deliver a sound housing delivery trajectory and cannot demonstrate a 5-year supply at any point during the Plan period.

3.14 The simple solution here is to allocate further sites that are readily deliverable during the early years of the Plan period in order to support the slower lead in time of the two strategic development locations.

3.15 As set out in the Technical Paper attached at **Appendix 3** there is a need to allocate between **1,300 – 2,400 additional dwellings** in order to deliver a rolling 5-year housing land supply and provide an adequate buffer against potential future non-delivery from the identified supply sources. This additional dwelling allocation is necessary before giving consideration to the uplift to the minimum housing requirement as set out above.

10 See also Table 49 on Page 142 of the SA that identifies the Promotion Site as a reasonable alternative site within Capel Parish

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

5.0 Areas Where Changes are Required for Plan to be Legally Compliant and Sound

5.1 In order for the Plan to be found Sound and Legally Compliant there are a number of fundamental changes required:

5.1.1 **Change 1 – Legal Compliance:** The Council MUST revisit the DtC specifically (but not only) in relation to Sevenoaks and explore the opportunity for meeting at least some of the unmet need arising within the Plan. Once complete the evidence of active and ongoing engagement MUST be published alongside a fresh Regulation 19 consultation version of the Plan.

5.1.2 **Change 2 - Soundness:** There is a need to revisit the minimum housing requirement in the Plan in line with the evidence base and in particular dealing with unmet need and the worsening affordability in the Borough.

5.1.3 **Change 3 - Soundness:** The Council must revisit its housing delivery strategy and address the clear shortfall in supply across the whole Plan period and particularly within the first 5-years through the allocation of more sites that are ready and able to deliver in the early part of the Plan period.

5.1.4 **Change 4 - Soundness:** The Council must revisit its Green Belt Study and Landscape Sensitivity Assessment specifically in the context of Five Oak Green because the current approach taken in the Plan does not reflect that evidence base i.e. Rydon's Promotion Site comprises a suitable location for release from the Green Belt as part of a coordinated strategy for creating robust boundaries that will endure in the long term.

5.1.5 **Change 5 – Soundness:** The Council must revisit the Plan Strategy and its Key Evidence Base in relation to Tudeley given the lack of evidence to support the delivery rate relied upon by the Council combined with the lack of support in the current evidence base for the release of this site from the Green Belt and the fact that the immediate neighbouring authority Tonbridge and Malling Borough Council is raising objection to the unacceptable pressure the proposed development would have on infrastructure, services and, facilities located outside of the Plan area. In short terms there are significant concerns in relation to the capability of Tudeley to deliver a sustainable form of development in the timeframe required by the Council. As currently prepared the Tudeley allocation is Unsound.

5.1.6 **Change 6 – Soundness:** Rydon's Promotion Site should be allocated for approximately 140 no. dwellings capable of delivery in the first 5-years of the Plan period alongside a package of wider material planning benefits.

5.2 Unless the above changes are made the Plan will fail the Legal Compliance Test and will not be found Sound at Examination.

5.3 Rydon will take an active part in any future Examination to progress the matters raised in these Representations in the context of the issues raised by the Inspector in due course. In the meantime Rydon would welcome the opportunity to discuss its Promotion Site with the Council.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The matters raised in these Representations cover a number of fundamental issues that go to the heart of the Plan's soundness and in particular its legal compliance. These matters will need to be explored in the relevant hearing sessions at the Examination in order to assist the Inspector in understanding the nature and extent of the concerns raised by Rydon Homes Limited.

In addition, there are a number of matters raised that are of a technical nature and relate to the Council's evidence base. These matters will also need to be explored in the relevant hearing sessions at the Examination.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See attached Representation Documents

Question 2	
Agent's Name and Organisation (if applicable)	Knights Solicitors

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph No(s) 4.1-4.87

[TWBC: for further comments by Save Capel, please see Comment Numbers PSLP_1964 and PSLP_1973-1987]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

3. The Development Strategy and Strategic Policies

STR1 The Development Strategy

Housing needs

3.1. The NPPF (at Section 5) prescribes a standard method of how to calculate the number of houses required throughout the plan period. However, it is the responsibility of the Council to determine the actual housing requirement using the latest information on local demographic and migratory trends.

3.2. Recent studies of housing need consistently demonstrate that the expected population growth 2020-2038 in the borough is slowing significantly – projections have decreased from 18,830 (2015 SHMA) to 13,859 (2017 SHMA) to only 6,155 (2018 ONS).

3.3. Despite this clear local trend, TWBC has interpreted the Standard Method as a target, with no regard to market or demographic indicators or the constraints of the Borough and propose to build around 12,200 houses for the (predicted) 6,155 residents.

3.4. Despite all the evidence to the contrary, TWBC has not entertained the very real possibility that “exceptional circumstances” exist which would have enabled them to propose an alternative and more realistic ‘objectively assessed’ housing need. Given that this Regulation 19 submission comes during a transitional period from the old Standard Method and the newly proposed methodology, it seems entirely reasonable to incorporate additional, supportive data to localise the output from the baseline calculation, rather than simply accepting it as a target.

3.5. We recognise that the Government confirmed that updated household projections should not be used as a reason for justifying lower housing need. However, they did not indicate that this data should not be considered to support planning forecasts if TWBC chose to propose an alternative calculation based on ‘exceptional circumstances’.

3.6. Tunbridge Wells borough includes 22% green belt land and has 70% AONB. In addition, the spatial strategy is proposing to deliver the majority of its housing in or adjacent to the borough’s largest area subject to flood risk (EA flood zone 3).

3.7. The threshold for claiming ‘exceptional circumstances’ must surely have been reached when the Council proposes to use Green Belt designated land for the vast majority of development in the Local Plan!

3.8. The Local Plan should serve the requirements of both current and future residents of the borough. Analysis of all demographic and market trends leads us to believe that the proposed Garden Village Growth Strategy does little to support the current or future needs of the increasingly elderly population of the borough.

3.9. On the contrary, the Plan seems designed to provide significantly more houses than residents or their families will require in an attempt to depress local house prices in order to encourage net migration from parts of the country with even higher affordability ratios (e.g. the London boroughs).

3.10. As such, the Plan is unsound as it is not “positively prepared” in assessing its ‘objectively assessed need’ and does not deliver against the most fundamental objective of serving the best interests of the residents of the borough. This policy also fails the test of soundness as it is “not consistent with the NPPF” and TWBC is wrong to have determined that ‘exceptional circumstances’ do not exist in the Borough which would allow a departure from the ‘standard method’.

3.11. On a side note: On the one hand, TWBC claims ‘exceptional circumstances’ to justify releasing and concreting over 100s of acres of Green Belt. On the other and despite clear evidence to the contrary, TWBC refuses to claim ‘exceptional circumstances’ to propose alternative calculations of housing need. This seems wholly inconsistent.

3.12. For further details, please refer to Save Capel’s topic paper on Housing Need – Appendix 9.

Sources of supply

3.13. Given the challenges faced by TWBC to meet housing needs, it is very surprising that other less constrained LPAs were not asked to meet some of the housing need themselves, e.g. Maidstone and Ashford.

3.14. There are several weaknesses in the development strategy followed by TWBC in establishing its spatial strategy:

- The plan has included an allowance for ‘windfall’ (i.e. non-allocated) sites which is understated and has not reflected the recent changes in legislation that promotes the change of use of urban sites to residential.

- . There is a significant opportunity from the amount of vacant commercial space (offices, shops, etc.) which has become apparent with the changing environment following the pandemic. This has not been reflected in the calculation of overall need for strategic allocations.
 - . TWBC has identified the need for a review of town centre regeneration (scheduled for around 2025) but this should be reflected in the strategy now. Young people need affordable housing close to employment and social amenities. The development of our towns into mixed retail/residential could provide the vibrancy that is so often lacking.
 - . The strategy ignored sites with less than 10 units which should have been considered for allocation. These would cumulatively make a notable contribution.
 - . With a focus on a growing older generation in the projected housing need, surely it is better to develop the fringes of existing settlements with access to local amenities rather than destroy the countryside in a remote location such as Tudeley.
- 3.15. TWBC has failed to adequately consider all these alternative options ahead of creating a garden settlement on Capel's beautiful, productive green belt, and extensive development on the floodplain.
- 3.16. In addition, the NPPF requires local plans to maximise density of housing in its allocations and this does not appear to have been the case.
- 3.17. Save Capel therefore submits that this Policy is not 'justified' and has not been prepared in accordance with the NPPF.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability

3.18. The National Planning Policy Framework states (Feb 2019) that "Achieving sustainable development means that the planning system has three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives)". These three objectives comprise an economic, a social and an environmental objective.

3.19. In their Non-Technical Note (SA p.5), TWBC explain that they conducted SA assessments for individual sites which were then grouped to allow a cumulative impact assessment at parish level and ultimately for the borough. It goes on to state that the "the key findings of this process were that significant beneficial effects were expected for most economic and social sustainability objectives. The

environmental objectives were found to produce either highly mixed, neutral or negative scores essentially reflecting the increased pressures that employment sites and a significant number of new dwellings would put upon sensitive environmental features such as landscape and heritage.”

3.20. This seems to indicate that even by their own assessment, the TWBC Local Plan falls short of the NPPF’s sustainability objectives.

3.21. As Tudeley Village and East Capel are such a critical part of the overall Local Plan – contributing over half of total housing need – any SA assessment for these two sites must be heavily weighted and strongly impact the sustainability of the overall Local Plan.

3.22. Given the flawed and unsustainable scoring for Tudeley Village and East Capel, this implies that TWBC are NOT following the NPPF requirement for a balance between economic, social and environmental aspects. please refer to our comments on the Sustainability Appraisal in Section 2 and the ‘Alternative Sites Report’ in Appendix 8.

3.23. This development strategy is therefore NOT SUSTAINABLE

Respondent's Name and/or Organisation Julie Schippers

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We object to the TWBC Local Plan for the following reasons:

1 Economic

Much of our area is Green Belt and AONB. The plan fails to respect that. Limits to build are being moved. In the case of Capel 'Garden Village', the council has seized on the easy option of dealing with one landowner (Hadlow Estate) to proposed a huge estate of houses that is on flood land (wrong type of land), puts development before infrastructure so small rural roads and larger trunk road (A228) and Tonbridge will be clogged by traffic for years to come.

At a time when need to produce more food to mitigate the effects of Brexit, we are effectively ploughing under valuable farmland in East Paddock Wood and Horsmonden to create more homes. In effect doubling the size of these villages, again providing a wish list of infrastructure improvements (schools, gp surgeries and leisure facilities) that we know from experience (example Ryewood development in Sevenoaks) never see the light of day.

We challenge how this long-hatched plan fulfils the current government economic policy of levelling up and Brexit-based immigration policies to limit numbers of migrants. Do we need so many houses in Kent if this is the aim? The Local Plan has taken so long to forment, it has not taken these factors into account nor does it address the effects of the pandemic with many brownfield, urban sites being made available as commercial businesses close down or office space is reduced as companies adapt to workers working from home and less office space is required. The economic effect of this must be taken into account. Send this Local Plan back for reconsideration.

1 Social

The NPPF says a Local Plan should provide "by fostering a well-designed and safe built environment, with accessible services and open spaces that reflect current and future needs and support communities' health, social and cultural well-being"

This plan does not do this. Again, it focusses on development with little detail and just vague ideas on how to make these new communities or add-on estates integrate, nor does it provide adequate planning for social facilities, job creation, shops, roads, GP surgeries, play/sport facilities and so on. There's little detail on creating routes for non- motorised traffic.

1 Environmental

There is no clear detail in the Local Plan to deal with the increased flood risk to new estates proposed in Capel and East Paddock Wood.

The plan will result in loss of species and destruction of habitats as land is converted to housing that does not respect the environment.

There is no air quality plan within the Local Plan.

We don't believe The Local plan is sustainable, deliverable or good for the economy. There should be a more holistic approach with housing sensitively added to all our communities rather than large swathes of housing being attached to particular villages/green areas, mostly based in the east of our council area.

Please send this Plan back to TWBC to rethink.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

SDC is supportive of joint working with TWBC and other development partners to address strategic, cross boundary matters. You will be aware of the evidence which demonstrates on-going and constructive engagement between our authorities since 2015, on matters such as housing, infrastructure and employment needs. Much of the discussion has taken place as part of the wider West Kent group with Tonbridge & Malling Borough Council.

In May 2019, a Statement of Common Ground was signed between SDC and TWBC. This document sets out the issues and actions raised during duty to co-operate engagement, which include how both local authorities were seeking to meet a variety of development needs. We have discussed the preparation of an updated Statement of Common Ground and the latest version is with you for comment. The updated document will reflect the extent to which our respective strategic development needs can be met and a range of other cross boundary policy matters, including those related to employment, retail and strategic infrastructure.

All legal challenges associated with SDC's Local Plan have now concluded and the Council is working with stakeholders to ensure that an updated document can be put in place as soon as possible. We will keep you updated on this process as part of duty to co-operate discussions.

SDC is of the view that TWBC's approach to the pre-submission Local Plan is positive, proactive and reflects the requirements of the duty to co-operate. We will continue to engage with TWBC as both authorities progress their Local Plans. This will include further discussion on the extent to which our respective housing needs can be met.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

At this stage, SDC is content to rely on written submissions to express its views on TWBC's emerging Local Plan. Officers will inform you as soon as possible should this position change.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr Kevin Spencer
Question 2	
Agent's Name and Organisation (if applicable)	Kember Loudon Williams
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant

No

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Summary

Policy STR1 is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy.

Furthermore, the distribution of development as currently set out in Policy STR1 is not balanced, and in particular Langton Green should be required to grow.

Background

The purpose of these representations is to examine closely the housing need and Green Belt policies in order to put forward for allocation a housing site. The site is known as land at High View, Langton Road Langton Green and was considered under site reference 42 of the Site Assessment Sheets for Speldhurst Parish - Strategic Housing & Economic Land Availability Assessment SHELAA– Regulation 19 Consultation January 2021.

Housing Need

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in Sevenoaks District Council was unclear. However, following the failure of their High Court challenge, Sevenoaks District Council is now required

to begin the preparation of their Local Plan again. Since NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within Sevenoaks District. Not to do so would be contrary to NPPF policy and in our view this suggests that additional housing sites must be identified.

Given the stage reached in the Tunbridge Wells Local Plan process, it would be unreasonable for this Council to not assist Sevenoaks District in meeting part of its housing need. Paragraph 4.16 of the draft Local Plan postulates that Sevenoaks may have an unmet need of 1900 dwellings. Paragraph 4.18 also notes that sites may need to be greater in size to enable delivery of the numbers predicted. Paragraph 4.53-4.54 then explains that sites and other supply with sufficient capacity for 13,059 to 13,444 dwellings has been found. The mid point gives a buffer of 1,000 dwellings above the 12,200 requirement.

Notwithstanding the buffer and the situation in Sevenoaks, it is the case that Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan. It is a neighbouring authority and subject to constraints relating to Ashdown Forest and the Habitat Regulations. Since it is within the same housing market area, it may be necessary for Tunbridge Wells to consider meeting some of its unmet housing need. In fact, following the rejection by the Local Plan Inspector of Wealden's Submission Plan, Wealden have re-wound their Plan preparation process and started from the beginning with an issues and options consultation. It is likely that this Plan is several years from fruition.

There is also sufficient uncertainty with Tonbridge and Malling's Local Plan and this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. A shock to the local housing market seems likely with supply side constraint pushing up house prices and hindering access to homes. In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer currently identified.

Delivery of Homes

In relation to delivery of new homes, we are of the view that additional smaller housing sites are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional smaller housing sites should be allocated in different locations. Since NPPF seeks to boost the supply of housing and there is nothing in the guidance preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. If over provision occurs, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve.

Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines, which is why more smaller sites are needed.

The Settlement Hierarchy

No new sites are proposed in Langton Green which is surprising given its size and role in the settlement hierarchy. The Settlement Role and Function Study (February 2021) ranks 21 different settlements in a hierarchy according to the level of services and facilities available. Langton Green is number 8 on the list. The Study also groups settlements in terms of their characteristics, focusing on the range of services and facilities they provide (Table 6, page 24)

[TWBC: to view Table 6: Revised settlement groupings see full representation attached]

It seems unreasonable that Langton Green is not proposed to grow at all whilst other settlements in the same settlement category as Langton Green are due to grow significantly. Take for example, Horsmonden, which is expected to deliver 240 – 320 units. A more balanced approach should be adopted, and growth should be shared amongst settlements in order for the plan to be sustainable and in line with the National Planning Policy Framework.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is necessary to Modify STR1 to increase housing numbers to meet the unmet needs of Sevenoaks DC and other adjoining authorities. It is likely that this will require an addition 2000-3,000 more dwellings.

Langton Green should be required to accommodate some level of growth. 20 dwellings should come forward at Land at High View in Langton Green.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order for the Plan to be found sound.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Proposed Limit to Build Development (Policy STR10)

Inset Map 01 - RTW and Southborough

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of Standard Life Investments UK Real Estate Fund, Tetra Tech Planning **object** to the current alignment of the Limit to Built Development identified on the proposed Policies Map in respect of land at Knights Park. The definitive boundary to the Limit to Built Development which runs along the Parks' eastern extent is presently difficult to establish on the Policies Map due to thickness of red line. Moreover, the proposed Limit to Built Development appears to be too close to the rear elevations of the main leisure terrace and omits areas of the existing service yard and emergency escape routes. It is felt that the Limit to Built Development should follow route identified below on the former Draft Local Plan Policy AL/RTW 15 Land at Knights Park allocation, to allow appropriate servicing space to the rear of the leisure development. On the basis of the current alignment, the Policies Map is neither considered to be 'justified' or 'effective' and therefore remains 'unsound'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modification is:

- . Amend Limits to Built Development on Policies Map - It is recommended that the Policies Map should be amended to reflect the eastern boundary of the former Draft Local Plan Policy AL/RTW 15 Land at Knights Park allocation seen below. [TWBC: See supporting document for map]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is deemed that the consideration of Limits to Built Development matters relating to Knights Park requires our attendance at the public examination of the Tunbridge Wells Borough Local Plan up to 2038.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR1 – The Development Strategy

Housing Requirement

National guidance [Paragraph: 010 Reference ID: 2a-010-20201216 (NPPG, 2020)] confirms that:

'The standard method for assessing local housing need provides a minimum starting point in determining the number of homes needed in an area. It does not attempt to predict the impact that future government policies, changing economic circumstances or other factors might have on demographic behaviour. Therefore, there will be circumstances where it is appropriate to consider whether actual housing need is higher than the standard method indicates. (Our emphasis).

The same guidance confirms that such 'factors' could include, 'but are not limited to', various situations.

Unmet Needs from Adjoining Authorities

PPG confirms one such factor is where an authority agrees to assist an adjoining authority with their unmet housing needs. This flows from the NPPF Paragraph 35 requirement to ensure plans are '*Positively Prepared*'.

For brevity we refer to our previous comments in relation to legal compliance and Duty to Cooperate matters. Whilst TWBC acknowledge their neighbours request to assist with the unmet needs of Sevenoaks district (1900 homes), insufficient evidence is provided to justify why TWBC cannot assist in any way.

Table 12 of the SA (TWBC, February 2021) summarises the reasonable alternative options TWBC have tested through the SA process to arrive at, '*an appropriate strategy.....based on proportionate evidence*;' (Paragraph 35, NPPF). Option 11 seeks to assess the implications for accommodating uncapped need and the unmet needs from Sevenoaks District. The latter is acknowledged to be in the order of 1900 homes. However, rather than exploring the most sustainable options to distribute this additional growth, including to the main towns and large villages, TWBC assess a distribution consistent only with Option 9 (Dispersed Countryside). This understandably leads to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan.

At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss this option. The same evidence is then used to justify why TWBC are unable to assist meeting acknowledged unmet needs for housing in the area. Our client contends distributing unmet needs solely in line with Option 9 is not a reasonable alternative. It appears only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the '*appropriate strategy*'.

We contend the Council ought to have explored distribution options for unmet needs more objectively, including an assessment of the contribution more sustainable settlements could make to this. For example at Cranbrook, which is ranked second only after Southborough in the Councils '*Settlement Role and Function Study*' (TWBC, Feb 2021). The outcome of the SA process therefore cannot be relied upon to conclude Option 13 is an appropriate strategy, as it has not taken '*into account the reasonable alternatives*', contrary to paragraph 35 of NPPF and the corresponding SEA Regulations requiring such alternatives to be '*reasonable*'. In its current form therefore the Local Plan is not in our view legally compliant or positively prepared. The SA and Local Plan should be updated to address such matters, with an additional round of consultation held prior to its formal submission.

In addition, TWBC will be aware of the significant unmet needs arising from the London Plan. A strategy for which the Secretary of State for Housing, Communities and Local Government has requested be agreed with adjoining authorities as a matter of urgency, and within the next five year transition period. This merits further consideration in our opinion to accord with paragraph 60 of the NPPF, as no mention is made of such needs in the Duty to Cooperate Statement (TWBC, 2021). At the very least this serves to highlight the importance of testing sufficiently robust reasonable alternative housing requirements.

Further justification for such an approach is evident if one examines the context emerging with the adjoining authorities. In March 2020, Sevenoaks DC received the Inspectors Report into their submitted Local Plan. The Inspector concluded the Council had not discharged its statutory duty to cooperate and that the plan was not consequently Legally Compliant. SDC have been unsuccessful in challenging that decision, so the delivery of much needed homes for households in acute need will be delayed yet further.

In 2020, Wealden District Council also withdrew its emerging Local Plan following the Inspectors concerns the Council had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters.

In March 2021, Tonbridge and Malling BC received a letter from the Planning Inspector also confirming the plan as submitted had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters. TMBC requested the Inspectors issue their final report before confirming next steps, but since that request, SDC have received confirmation their own challenge had failed. We therefore wait to hear whether TMBC follow the same path, but either way, the plans housing strategy will be delayed.

As a consequence, three of the adjoining authorities are delayed in their plan preparation and housing delivery strategies; and the SoS has confirmed there are significant unmet and mounting housing needs requiring collaborative action in London within the next five years. As we elaborate on below,

affordable housing need and affordability ratios continue to rise. The aforementioned delays to adjoining LPA plan production do nothing to assist those unable to gain access to housing, serving to highlight how important it is for the emerging TWBC Local Plan to be 'positively prepared' (Paragraph 35 NPPF). Further evidence should be commissioned to test a 'reasonable alternative' option to contribute to meeting unmet needs, ensuring the plan is positively prepared and effective over the plan period, particularly in the first five years.

Housing Need

Paragraph 4.12 of the 'Review of Local Housing Needs' (Iceni, Dec 2020) recommends, in line with PPG paragraph 2a-007-20190220, that TWBC test the uncapped housing need figure of 741pa through the SA process. As we outline in our comments on adjustments for unmet needs above, TWBC sought to assess this local need figure and the unmet needs of SDC in a single alternative option (Option 11), rather than disaggregate them. TWBC then sought to distribute this need to the rural areas consistent only with Option 9 (Dispersed Countryside). This understandably led to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan.

At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss both elements. Our client contends distributing such needs solely in line with Option 9 is not a reasonable alternative. It appears only to support a predetermined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'. Indeed, given the recommendations of Iceni in their report, it would have been reasonable to see the uncapped option tested in its own right, as the local need figure, and another option adding in unmet needs from adjoining LPAs. The TWBC approach does not therefore support a conclusion the plan is 'positively prepared'.

Moving on to adjustments required for *affordable housing need*. Paragraph 3.18 of the 'Housing Needs Assessment Topic Paper' (TWBC, 2021) confirms that some 323 affordable homes per annum are likely to be needed over the plan period. Table 9 of the 'Housing Supply and Trajectory Topic Paper' (TWBC, Feb 2021) confirms total projected housing completions of 13,257 over the plan period. Table 10 of this paper also confirms that crudely applying the Policy H3 thresholds of the TWBC PSLP to this figure, the Council are likely to fall well short of this requirement (224pa). Net additions from sites 6-9 units within the AoNB under this policy are not listed, but seem unlikely by their nature to contribute significantly to addressing this deficit. For avoidance of doubt the Council should therefore confirm the number of units anticipated from this source.

Paragraph 2.18 of the TWBC PSLP confirms, *'that in 2019, entry level house prices were approximately 12 times the (workplace based) earnings of households in the borough, representing around a 38% increase since 2009, from around eight times the earnings.'* (Our emphasis).

In addition, at paragraph 4.17 of the 'Review of affordable housing needs in the context of 'First Homes'' (jg consulting, Feb 2021) the consultant concludes:

'It does seem that there are many households in Tunbridge Wells who are being excluded from the owner-occupied sector. This can be seen by analysis of tenure change, which saw the number of households living in private rented accommodation increasing by 76% from 2001 to 2011 (with the likelihood that there have been further increases since). Over the same period, the number of owners with a mortgage dropped by 7%.' (Our emphasis).

The underlined sections serve to highlight the acute affordability issues in the borough, which seem likely to continue to worsen under a policy approach that seeks to undershoot need by some margin. It is unclear why therefore TWBC have not sought to adjust their housing requirement to help meet more of such needs. For all the above reasons, we feel there are strong grounds to make an upward adjustment to the baselinerequirement to improve the delivery and affordability of homes across the area. As drafted, the housing requirement is neither justified, effective nor positively prepared.

Housing Land Supply, Distribution and Delivery

National guidance [Paragraph: 010 Reference ID: 2a-010-20201216 (NPPG, 2020)] goes on to state, that the housing requirement *'....will need to be assessed prior to, and separate from, considering how much of the overall need can be accommodated (and then translated into a housing requirement figure for the strategic policies in the plan).'*

As outlined in the preceding sections, we are concerned that the housing requirement deduced as the base for the Local Plan has not been positively prepared, or informed by a robust SA process that

aligns with the SEA Regulations. Taking this our as position, we have nevertheless sought to examine the housing land supply and spatial distribution of homes proposed in the PSLP.

As set out in Policy STR1 and Table 9 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021), the Council are seeking to deliver around 67- 69% of total new site allocations at Tudeley Village and Paddock Wood (inc. East Capel). This places a significant onus on two sites to deliver the bulk of the boroughs housing needs for the next 15 years. As a result, one would expect to see a high degree of contingency built into the plans housing supply and trajectory assumptions to ensure a continuous five year supply of land for housing is maintained.

On closer examination, we contend that the lead in times for delivery of both sites, and the expected annual yield from Paddock Wood (inc. East Capel) are overly optimistic and insufficiently justified by evidence. Paragraph 4.6 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021) references an evidence source as '*Start to Finish: How Quickly do Large-Scale Housing Sites Deliver?*' (Lichfields, 2016). This report was updated in 2020, and is now entitled '*Start to Finish What factors affect the build-out rates of large scale housing sites? SECOND EDITION*' (Lichfields, 2020).

Table 9 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021) assumes that the Paddock Wood (inc. East Capel) site will have commenced development within three years of anticipated adoption of the PSLP, and will deliver 300 homes in its first year of production in year four. As the latest referenced Lichfield Report concludes in its summary 'Key Figures', sites over 2000 homes are more likely on average to take 8.4 years from a valid planning application to the first dwelling being completed on site.

Given the PSLP development strategy relies so heavily on the delivery of these two strategic sites (67-69% of total allocations) in one particular geography of the borough (north west), it is essential in our view the Council take a realistic, if not cautious approach to such lead in times. We therefore request TWBC provide further information on the lead-in times for planning applications for this site, as this is not evident from paragraph 5.29 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021). This rate is just short of double the rate evidenced in the latest Lichfields Report (160pa). TWBC have sought to justify the 300pa figure by taking an average of just 14 national case studies over 2000 units listed in Annex AX26 of the older Letwin Review (2018). This is not only an excessively small sample, it includes sites of a scale five times that of Paddock Wood, with a far greater number of outlets and wholly within the London HMA. The more recent Lichfields study we argue is a more comprehensive and up to date study, and is more reasonable as a basis to deduce such national baselines. TWBC have not presented evidence of comparable sites either locally or regionally to support such a significant departure. Given these two sites make up nearly 70% of proposed allocations relied upon for the entire plan period, we suggest this is a significant omission. Both the lead in time and delivery rates assumed therefore appear overly optimistic. These are not justified and are unlikely to be effective in delivering the proposed development strategy.

As a consequence, it seems likely a sizeable proportion of the two strategic sites will need to be delivered beyond the current plan period. Additional allocations should accordingly be made to compensate for this, with an opportunity to balance growth in the eastern parts of the borough in the process. Our clients site (Site 25) is respectfully recommended as a suitable opportunity to contribute to reducing this shortfall, one that is wholly deliverable in the first five years of the plan period.

Further clarification is also sought over the overall capacity of the Paddock Wood option. Paragraph 7.14- 7.16 of the Strategic Sites Topic Paper (TWBC, 2021) suggests '*discussions with the Environment Agency remain ongoing*' with respect to the sites capacity. As a result, the same paragraphs suggest an option for 2840 homes has been tested through the Councils viability assessments. At this level, the Council's viability consultants Dixon Searle raised potential issues with delivering the proposed 40% plan requirement for affordable housing. This needs clarification and assurance. If there is any doubt over this, additional suitable and readily deliverable allocations should be made to compensate for this. In this respect, our clients site (Site 25) at Cranbrook we contend should be allocated to contribute to this. This is suitable and wholly deliverable within the first five years of the plan period.

In respect of Tudeley Village, whilst we have no particular issue with the annual delivery rate, we have the same concerns on lead in time for this site. Particularly as this is a new garden village, as opposed to an urban extension, where significant new infrastructure will be critical to phasing and delivery. This includes, amongst many other items, on and off-line improvements to the A228 around Colts Hill, and the provision of a new highway which bypasses Five Oak Green. We elaborate further on this in our

comments to Policy STR/SS3, with specific reference to the Lichfield report '*Start to Finish What factors affect the build-out rates of large scale housing sites? SECOND EDITION*' (Lichfields, 2020).

It is evident from this, that the lead in time proposed for Tudeley Village in Table 9 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021) is therefore unjustified and likely to lead in an ineffective development strategy.

In addition, very little if any evidence is presented on the implications for absorption rates for two strategic sites of this scale so close together. As Table 9 of the Housing Supply and Trajectory Topic Paper illustrates, both sites are envisaged to be up to full production within the fourth year post anticipated adopted. A significant amount of infrastructure disruption is likely given the scale of the projects and their proximity to each other. Existing local housing market delivery, coupled with two large strategic sites being delivered at the same time will inevitably influence market absorption rates. Further work is advised on this given how critical the delivery path and rates for these two sites are to the Council's Development Strategy.

Given the proportion of supply these two strategic sites contribute to total housing land supply, it is essential delivery rates are realistic and justified by evidence. It is equally important that sufficient contingency is built into the housing land supply to account for slower delivery rates and yields, particularly in the first five years of the plan period.

The Council's latest five year housing land supply statement was published in September 2020, with a base date of 1st April 2020. This confirmed TWBC could only demonstrate a 4.83 years supply. Delivery rates for the three previous years in question were at or about 500pa. Indeed, Figure 1 of the Housing Supply and Trajectory Topic Paper (paragraph 4.12) illustrates completion levels over the last 20 years have never exceeded 575pa. Whilst we agree and accept future completion levels will rise with the allocation of two large strategic sites, which have multiple outlets, these will take time to come on line. We fear that this will take much longer than the Council anticipate, as outlined above. It therefore seems a significant leap of faith to expect such significant step changes in supply in the first phase of the plan period. As is evident at Figure 3 (page 33) of the Housing Supply and Trajectory Topic Paper, TWBC envisage a significant step change rising to 932 pa even before the Local Plan's anticipated adoption. We are not the only ones to question the justification for this.

The Council's own consultants Icenl concluded similarly in December 2020 when commenting on the proposed housing trajectory in their 'Review of Local Housing Needs' (Icenl, Dec 2020).

At paragraph 7.35, the consultant concludes that the:

'particularly high completions envisaged in Year 2 look to be potentially overly optimistic, particularly given the wider economic backdrop which could arise,...'

At paragraph 7.37 of the same report, the consultant comments:

'The particular question which arises is whether the very high delivery rates in Years 1-5 can be achieved given the potential for housing market conditions to weaken in the short-term as unemployment rises as a result of the Covid-19 pandemic and Government support, such as through the Stamp Duty holiday, finishes. It is important to make a distinction here between potentially "deliverable supply" in terms of what could be delivered, which is influenced by planning, and what the market may in fact achieve, which is influenced by wider market conditions.

We share concerns with the delivery rates proposed being overly optimistic, particularly in advance of adoption of the Local Plan and bringing on stream the strategic sites.

Conclusion

In light of the evidence cited above, we contend the housing requirement requires an upward adjustment to account for more of the areas local needs, and to reduce the shortfall in affordable housing provision. This is particularly important when three of the adjoining LPAs have had their emerging plans found to be legally non-compliant, and have been withdrawn or delayed as a consequence.

There is equally evidence to suggest an upward adjustment is required to account for known and mounting unmet housing needs in the relevant functional housing market areas for TWBC. As we outline, the evidence presented in the SA to conclude no contribution could be made is in our view flawed, and based on an unreasonable alternative option destined to fail.

In housing land supply terms, we have shown the Council's housing land supply trajectory to be overly optimistic both in the critical first five years of the plan, and with respect to the lead in and delivery

rates for the two strategic site options that make up 67-69% of total new allocations proposed within the plan period. We contend this is likely to result in the delivery of these sites beyond the plan period, and there is a consequential need to allocate additional sites to compensate for this within the plan period.

We have also asked a question of the capacity of the Paddock Wood strategic site, to deduce if the Environment Agency require reduced net developable areas to address flooding issues. If so, any deficit should be compensated for by new allocations. Our client's site at Cranbrook (Site 25) is put forward as a suitable site to contribute to addressing some of this deficit, a site that is wholly deliverable within the first five years of the plan.

The Council provide a contingency of 8.6% in their land supply assumptions (inc. windfall) over the 15 year plan period. TWBC anticipate the cumulative completion of 13257 homes, versus a current target of 12204 homes (Table 9 of Housing Supply and Trajectory Topic Paper, TWBC, 2021). This buffer obviously reduces if, as we contend, the baseline housing requirement rises and/ or a proportion of the strategic sites delivery extends beyond the plan period. We would urge the Council and / or Inspector to accordingly increase this buffer, through the allocation of additional deliverable sites in sustainable locations, thereby ensuring the Development Strategy is positively prepared, effective and justified. In its current form, we contend the Development Strategy is unable to satisfy any of these tests.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Is sound

Don't know

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

REPRESENTATIONS ON BEHALF OF TESCO STORES LIMITED TOWN AND COUNTRY PLANNING (LOCAL PLANNING) REGULATIONS 2012 TUNBRIDGE WELLS (REGULATION 19) LOCAL PLAN CONSULTATION

As you know, we act on behalf of Tesco Stores Ltd, in respect of their various interests in Tunbridge Wells Borough and respond on their behalf to the Regulation 19 Tunbridge Wells Local Plan consultation, under the following headings.

Background

MRPP has extensive knowledge of both Tesco's activities in the Borough and the present (and historic) formalisation of planning policy in the Borough. We welcome the opportunity to engage with the emerging Local Plan and do so positively both in terms of representing our client's interests, and in terms of helping the Council to formulate effective policies which support development for the benefit of the Borough's businesses and residents.

Tesco Stores Ltd engaged with various components of the adopted Local Plan, both in terms of the development needs identified in the existing Core Strategy (primarily in relation to retail capacity) and the treatment of its various interests in the Borough in the subsequent Site Allocations DPD. We have, on their behalf, thoroughly reviewed the Reg 19 Local Plan and have sought to respond only to those policies and issues which directly or indirectly affect their property interests. We trust that this targeted approach assists officers, who will find our comments generally supportive, subject to several clarifications regarding evidence and the justification for designations, allocations and policies.

For ease, we set out our representations in a single letter and have, for each relevant policy or supporting text, used the Council's recommended responses (i.e. objection, support, support with conditions, or general observation). We have also set out some basic background to our client's presence in the Borough.

Tesco in Royal Tunbridge Wells

Tesco has been represented in Royal Tunbridge Wells since 1969 when its store at 29 Grosvenor Road first opened. Tesco has continued to serve the community, uninterrupted, since then and has subsequently enhanced its presence to now include:

- Supermarket Format – Woodsgate Corner (Pembury)
- Metro Format – Grosvenor Road, Tunbridge Wells
- Rye Road, Hawkhurst
- Express Format - St. Johns Road (Tunbridge Wells), London Road (Southborough) and Commercial Road (Paddock Wood)
- One Stop Format – Badsell Road (Five Oak Green), Forest Road (Hawkenbury)

It is well documented that Tesco, having secured planning permission for a substantial replacement superstore at Pembury, took the difficult decision not to implement this, arising from significant changes in the convenience shopping sector and other local factors. However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy STR1 - The Development Strategy (support with conditions)

Tesco broadly supports the Council's development strategy, particularly the intention to make provision for all development needs inside the Borough boundary (i.e., without the assistance of neighbouring authorities). Tesco also supports the proposed growth of Paddock Wood (see later) but questions, in terms of the scale of new development to be directed there, and to Capel/Tudeley, whether the full potential of existing settlements to accommodate growth has been explored, and in so doing, enhancing their sustainability. Indeed, there appears to be an imbalance between the scale of development directed to certain settlements relative to their scale and sustainability. Such distribution must be fully justified and, if maintained as currently proposed, accompanied by proposals for commensurate improvements in local infrastructure, and services.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We reserve the right to attend any hearing sessions on the topic matters we have commented on accompanying written representations should the Inspector need to raise any questions during the Local Plan Examination.

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph Nos. 2.16, 2.18, 4.10

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Evidence in the plan proposes an ONS figure of 5% population growth over the plan period, equating to an increase of 6155 people. The plan submitted clearly follows the national guidelines and standard methods mandated. But the consequence is to deliver a housing unit demand of 678 per annum to a total of 12,200 units, eg double required for the projected population.

This is unsound as currently the population is falling due to Brexit European departures, COVID deaths of over 500 people in Tonbridge and Tunbridge Wells health areas alone (and sadly this is not over yet) and ironically housing and rent costs locally.

The above paragraphs also describe housing costs locally at 12 x average earnings. It is intrinsic to the plan that adding supply will alleviate this bubble. It has never done in the past and it won't in this plan either. House pricing is not as a result of medium term supply constraints, but is Government policy delivered through financial measures eg supporting buyers and builders to buy what people cannot afford. "Sub prime" definitions of mortgage debt is not something that happened in 2008. It now applies to most first time mortgage applications.

The plan cites Conservative manifesto commitments to build at a rate of 300,000 units by mid term in the plan. Are we really setting development plans on political party manifestos? This is not sound, as anyone with a memory or common sense can attest to. Manifestos do not always turn into Government policy, especially when the states finances have been ravaged by pandemic spending.

The basis of the overall strategy is therefore unsound and not justified by the supporting evidence.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A. Base the strategic plan on real projected demographic population increases, plus a reasonable margin and not twice that number.

B. Insert in the plan actions to mitigate and release underused housing stock eg big houses with low occupancy. Incentivise conversions to multiple occupancy, not currently considered.

C. Repurpose large areas of retail usage to central town living accommodation, as the current retail closures will accelerate due to e-commerce activity and changed consumer behaviour.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The structure of the plan at 592 pages plus hundreds more attachments coupled with the restrictive response forms successfully stifle big objections to fundamental aspects of this plan.

It is not through challenging hedgehog counts, or identifying individual trees for retention that real change or influence can be brought to bear.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability is a word which no longer has meaning, because of the definitions used by planning. At the current rate of concrete pouring, carbon emissions and habitat destruction, this plan is not in any true meaning sustainable for life on this planet. It is not compliance with wordsmiths or political manifesto definitions that really matters, but whether in reality the projected plan really changes our current trajectory for better or worse.

This plan proposes building on Green Belt land, areas of outstanding natural beauty and flood plains. Our water courses are being depleted locally, and we have the most polluted rivers in Europe. It removes areas of ancient woodland and is proposing new roads, when reducing travel is required. The word "Sustainability" is used thousands of times in this plan.

We need to get real and act now. As this plan comes into effect in 2022. COP 26 takes place in UK this year. Is this a good time to "set in concrete" a "sustainable" plan before the outcome is known?

Future Notifications

Question 1

Respondent's Name and/or Organisation Ian Bailey, Tonbridge & Malling Borough Council

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 4.12 and 4.13

[TWBC: see also representations PSLP_1495 (covering letter whole Plan), PSLP_1496 (Policy STR/SS1), PSLP_1497-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 4.12 refers to the situation with respect to unmet housing need in neighbouring Sevenoaks District as being 'unclear' although it recognises that a potential shortfall of 1,900 dwellings may be further tested in the event the Local Plan Examination is allowed to continue.

Since the Tunbridge Wells Local Plan was published for consultation on 26th March the request by Sevenoaks District Council to appeal the Judicial Review decision in respect of their Local Plan has been declined. Therefore, this contextual paragraph should now be updated.

Paragraph 4.13 recognises that there may be some unmet housing need and that it is therefore appropriate to assess the potential for also contributing to unmet needs. If this exercise has already been carried out, then there should be signposting to the relevant part of the evidence base. However, in light of the events described in paragraph 4.12, it may be more appropriate to update both paragraphs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 4.13 recognises that there may be some unmet housing need and that it is therefore appropriate to assess the potential for also contributing to unmet needs. If this exercise has already been carried out, then there should be signposting to the relevant part of the evidence base. However, in light of the events described in paragraph 4.12, it may be more appropriate to update both paragraphs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Whilst Tunbridge Wells Labour Party supports the development at Tudeley, we are of the view that the planned expansion of Paddock Wood is unjustified, excessive and poorly thought out.

STR1 also does not contain a commitment to provide the much needed genuinely affordable social housing which the Borough needs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Tunbridge Wells Green Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	Policy STR 1 The Development Strategy
Question 4	

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not positively prepared
	<input type="checkbox"/> It is not effective
	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Summary

The PSLP has not been properly prepared because:

1. Despite being asked to build far more houses than a constrained Borough like Tunbridge Wells can responsibly accommodate, the Council failed to try and influence the Government to change the calculation method. As the Green Party highlighted in their 2019 DLP submission, adoption of the ONS's revised 2016 methodology would result in a 35% reduction in the number of houses to be built, and thereby enable use of the Green Belt to be avoided altogether.
2. The Council was misled in the documentation for its 3 Feb 2021 Full Council meeting by a statement that the Housing Minister's Dec 2020 reform of the standard method applies "mostly to cities", meaning Councillors were not briefed on the Secretary of State's reformed standard method, and hence their decision to approve the PSLP going to Regulation 19 consultation was invalid.

The PSLP is unsound because:

3. The PSLP ignores the Secretary of State's Dec 2020 clarification of his reformed standard method, which he said should use the housing numbers derived from the standard method as a "starting point" for planning around constraints, and instead places some 50% of the ca 8,500 new dwellings in the Green Belt; it also puts many in sensitive AONB locations.
4. The PSLP contains an additional 1,050 dwellings above the number derived from use of the standard method, resulting in particularly damaging developments being included in the PSLP, which further contributes to its being unsound.

[TWBC: For PSLP Figures Table, please see supporting documents]

Discussion

1. Not rejecting the excessive Government housing target for Tunbridge Wells

In round figures, the PSLP proposes placing some 50% of its 8,500 new houses in Green Belt areas, which is so serious, it means this valuable planning constraint has effectively been ignored.

The spreadsheet calculation of this percentage, based on the figures available to the public in January 2021 is attached, and while the PSLP's final figures are slightly different, it is valid for this submission's purposes.

When this gross intrusion into the Green Belt had become clear, the Council should have fed back to the Government the implications of the excessive housing numbers, and pressed for a reduction, preferably via a revised standard method, such as the "2016" version proposed by the Office for National Statistics.

The interactive map in this website demonstrates the impact the use of the 2016 methodology would have on Tunbridge Wells' numbers – a reduction of 35%:

(see web link)

It is noted that the Council DID push back on the "mutant algorithm" proposed by the Ministry for Housing, Communities and Local Government (MHCLG) in Q3 2020, and after many other Councils and MPs joined in, the proposed algorithm was dropped by MHCLG; Tunbridge Wells Borough Council should have done the same for the 2014 standard method, rather than continue to simply implement its damaging repercussions.

The PSLP has thus not been properly prepared.

2. Tunbridge Wells Borough Council was misled by the statement that the Dec 2020 reform of the standard method applies "mostly to cities"

On 26 January 2021, in the run-up to the Full Council meeting of 3 February 2021, TWBC issued a version of the PSLP for Councillors to review and approve, along with a preceding 23-page Summary document.

In paragraph 3.19 on page 10 of that Summary document, there is a statement that *"MHCLG confirmed, on 16th December 2020 that the changes to the standard method would essentially only apply to city areas."*

The crucial clarification of the reform of the standard method by MHCLG quoted in 3. below was not included in this guidance to Councillors, and together with the statement in paragraph 3.19, left the Councillors inadequately informed on the basis for the numbers in the PSLP, and the obligation on LPAs to make plans that take account of the Green Belt and other similar constraints.

This procedural error renders the 3 Feb 2021 Full Council decision to approve and progress the PSLP invalid, and means the PSLP itself has not been properly prepared.

3. Ignoring the Secretary of State's Dec 2020 statement clarifying the application of his reformed standard method

On 16th December 2020 the Minister of Housing, Communities and Local Government (MHCLG) Robert Jenrick stated on the Gov.uk website (where it remains) in relation to his reform of the standard method for assessing local housing need that:

"Within the current planning system the standard method does not present a 'target' in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity".

TWBC ignored this Ministerial statement, and continued to propose a Pre-Submission Local Plan (PSLP) that took no account of the Green Belt constraints, and it has put forward a PSLP that places some 50% of its new dwellings in the Green Belt, and also contains some developments in the High Weald Area of Outstanding Natural Beauty (AONB) that conflict with the intent of the NPPF.

The PSLP is thus unsound.

4. Including 1,050 additional houses above the standard method's numbers in the PSLP

Compounding the error caused by taking the outcome of the standard method as a "target" rather than a "starting point", TWBC retained 1,050 dwellings in its average target above the standard method's calculated numbers, with no robust rationale other than referring to it as a "buffer".

Examination of the PSLP at a high level reveals that this has resulted in some particularly damaging developments being left in, when they could have been omitted to the benefit of the environment, the local communities impacted, and the Borough as a whole.

Examples of this include, but are not limited to:

AL/RTW16 Land to the west of Eridge Road at Spratsbrook Farm (known locally as Ramslye Field); Green Belt - 120 dwellings

AL/RTW14 Land at Wyevale Garden Centre; Green Belt - 25 to 30 dwellings

AL/RTW5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenbrook Farm; Green Belt - 100 dwellings

STR/SS1 The Strategy for Paddock Wood's most flood-prone areas, including Site numbers 20, 79, 141, 142 and 309; Green Belt - some 600+ dwellings

AL/BE3 & BE4 Land at Benenden Hospital, East End; AONB - 75+ dwellings

The arbitrary addition of these 1,050 dwellings renders the PSLP unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Full reassessment of the Local Plan on the basis of a number of houses that can be developed without impacting the Green Belt or involving destructive developments in the High Weald AONB.

In any case, removal of the arbitrary additional 1,050 houses from the total, and deletion of the developments listed in paragraph 4 of our representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The representation made above describes some fundamental shortfalls in the PSLP and how it has been developed and approved, and I believe it would assist the Inspector if I could explain them in person.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

No additional comments, thanks.

If you would like to attach a file in support of your comments, please upload it here.

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph No(s) 4.35 – 4.60

Policies Map (Inset Map No(s)) 1

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not justified

. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Whilst U+I and RSB support the allocation of Land adjacent to Longfield Road (Policy AL/RTW 17) for employment use and Land at the former North Farm landfill site (Policy AL/RTW18) for recreational use, they have significant reservations about the overall development strategy for realistically meeting the required housing need of 12,204 dwellings over the plan period, and therefore formally object to the Plan. Please see letter of representations for further detail.

[TWBC: the following text is from the Letter of Representation - for the full representation, including Annex 1, please see supporting documents]

Tunbridge Wells Borough Council Pre-Submission Local Plan – Representations relating to Land South of Appletree and Devils Wood

On behalf of U+I Group PLC (U+I) and Robert Sheridan Bowie ('RSB'), we submit below representations in response to the Regulation 19 Tunbridge Wells Borough Council ('TWBC') Pre-Submission Local Plan issued for public consultation until 4 June 2021.

By way of background we have proactively engaged with the Council through the Local Plan preparation stages, including the submission of two sites at Land adjacent to Longfield Road and Land South of Appletree and Devils Wood in July 2016, in response to the Call for Sites for the Strategic Housing

and Economic Land Availability Assessment. We subsequently responded to the Issues and Options consultation and Call for Sites in June 2017, promoting these sites for development as a natural extension to the existing industrial area to the north of the city. In November 2019 we submitted further representations in response to the Regulation 18 Draft Local Plan public consultation, promoting Land South of Appletree and Devils Wood for future housing development.

Employment Land

U+I and RSB welcome the allocation of Land adjacent to Longfield Road for a new business park under Policy AL/RTW 17. U+I is committed to the delivery of this site to assist in meeting the Council's employment needs in the short to medium term. An application for outline planning permission for development was permitted on 12 March 2021 (ref. 19/02267/OUT).

Housing Land

U+I and RSB are aware of the wider development pressures and the need to accommodate considerable amounts of new housing development over the plan period to meet the needs of the Borough. The standard method housing need figure for the Borough is 678 dwellings per year; over the full plan period 2020-2038, this equates to a need of some 12,200 dwellings.

The proposed strategy for meeting this housing need is consolidated by Policy STR1, which sets out the quantum of development that will be allocated within or around settlements to meet the identified needs of the borough over the plan period. This strategy seeks to meet the majority of the Council's need via the delivery of a new Garden Village at Tudeley and through the strategic extension of Paddock Wood/East Capel, plus smaller sites distributed across the borough and limited Green Belt release.

It is noted that Land South of Appletree and Devils Wood has not been allocated in the Pre-Submission Local Plan. The site has previously been promoted by U+I and RSB as a sustainable option for future housing development and we consider that it can make a valuable contribution to meeting housing need. The site constitutes a parcel of land, under single ownership, to the north of Tunbridge Wells with an area of 53.95 ha. The site would form a natural extension to the existing residential development to the south west, with connections to Kingstanding business park, including new infrastructure and services to be delivered under outline permission 19/02267/OUT and has the potential to deliver circa 600 residential units.

Representations

U+I and RSB welcome the opportunity to comment on the Pre-Submission Local Plan and the Council's commitment to meeting the needs of the area. Whilst they support the allocation of Land adjacent to Longfield Road (Policy AL/RTW 17) for employment use and Land at the former North Farm landfill site (Policy AL/RTW18) for recreational use, they have significant reservations about the overall development strategy for realistically meeting the required housing need of 12,204 dwellings over the plan period, and therefore write to formally object to the Plan.

Development Strategy and Strategic Policy STR1

U+I and RSB's objections largely relate to the balance between strategic and non-strategic site allocations and the anticipated delivery trajectory. Of the new housing allocations (set out in Table 4 of the Pre-Submission Local Plan), 67% are to be delivered as part of the strategic extension to Paddock Wood (3,590 homes) and the new Garden Community at Tudeley (2,100 homes within the plan period). U+I and RSB have concerns that such a large proportion of the Borough's housing is concentrated in a small part of the Borough and on strategic sites. The development of both of these sites will require a fully master-planned approach, and the preparation of SPDs (see paras 5.193 and 5.229 of the Plan). These will need to be adopted before any planning permissions for substantial new development are granted and will therefore be a time-consuming process.

In relation to build-out rates, we would draw the Council's attention to Lichfields' 2020 research document – 'Start to Finish', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on 180 assessed sites. It identifies that the average time taken from outline decision notice to first dwelling completion is 3 years on sites of 500+ homes. For larger scale sites (2,000+ homes) it estimates an average 8.4 years from validation of the first planning application to the first dwelling being completed.

The Housing Supply and Trajectory Topic Paper (HS&T) (2019) forecasts that the Tudeley Garden Community will begin to deliver homes from 2025/26 onward, with an initial build out rate of 150 dpa, rising to 200 dpa from year 6 onwards. Delivery of the site is expected to extend beyond the Plan

period (2036+). For the Paddock Wood extension, homes will start to be delivered in 2024/25 at an average build out rate of 333 dpa – which is over double the average rate for larger schemes identified in Lichfields' research (estimated 160 dpa for a scheme of 2,000+ dwellings). The higher build out trajectory is based on the fact that numerous house builders would be involved in the construction of different phases – although it is stated within the HS&T that TWBC cannot confirm how many housebuilders will deliver this site.

The Council appear to have underestimated the delivery/build-out rates of large strategic sites and Garden Communities. We refer to recent case law which comments on this matter - Inspector Roger Clews letter to the North Essex Authorities (15 May 2020) (IED/022) on the Examination of the Shared Strategic Section 1 Plan. The Inspector concludes that:

"I find there is no evidence to support the view that the proposed GC sites are capable of delivering at that level consistently (300 dpa)...over that timescale, the best evidence on likely delivery rates at the proposed GCs remains 'Start to Finish's' annual average figure of under 200dpa for greenfield sites of more than 2,000 dwellings." (para. 174 IED/022).

In relation to lead-in times, the Inspector states:

"In general terms, it is reasonable to assume that the planning approval process would allow housing delivery at any GC to start within four or five years from the adoption date of the plan (or plan revision) which establishes the GC in principle." (Para 176 of IED/022).

It is U+I and RSB's view the Council have applied an overly optimistic development trajectory for the delivery of these strategic sites, both in terms of the start date for completions and expected build out rates, disregarding the conclusions of the Lichfields' Start to Finish Report and the time it would take to masterplan and deliver the strategic sites. This fails to accord with para. 72 of the NPPF which requires strategic policy-making authorities to make a realistic assessment of likely rates of deliver, given the lead-in times for large scale sites.

TWBC's latest Five Year Housing Land Supply Statement (2019/20) identifies that the Council can currently demonstrate a housing land supply of 4.83 years. U+I and RSB are concerned that if the housing delivery slips beyond the trajectory identified in the HS&T, this result in less dwellings in the 5 year period, resulting in a fragile 5 year HLS. It is therefore considered that the Council should allocate more small-medium sized sites that could deliver homes in the short-medium term and help to bolster the 5 year HLS until Tudeley Village and Paddock Wood begin to delivery housing.

In addition, being overly reliant on a Garden Community, which does not benefit from existing infrastructure, to deliver the majority of the planned supply within the Plan period is not an appropriate strategy. The proposed infrastructure improvements to deliver Tudeley Village are significant and include:

- . On and off-line improvements to the A228 around Colts Hill;
- . The provision of a new highway which bypasses Five Oak Green;
- . Significant improvements to various local junctions;
- . Six-form entry secondary school, a three-form entry primary school; and
- . Cycling linkages to Paddock Wood.

Having reviewed the Infrastructure Delivery Schedule (Appendix 1 of the TWBC Infrastructure Delivery Plan, March 2021), the funding and delivery timetable of the above infrastructure is still relatively vague. It is also considered that the delivery of this significant infrastructure may prove highly vulnerable to obstacles to delivery, particularly given the Borough's environmental constraints. A greater proportion of development should therefore be directed towards the Borough's main settlement at Royal Tunbridge Wells, which is only allocated 18% of the total allocations (1,536 homes). This is a sustainable location for growth, already benefitting from significant infrastructure, which is to be further improved via the new plans under outline consent ref: 19/02267/OUT, and being the main settlement in the Borough, is a hub for employment, retail, education and public transport for the wider region.

Exceptional Circumstances for Green Belt Release

The Council has already identified that exceptional circumstances exist, in relation to meeting the Borough's housing need, to alter the boundaries of the Green Belt and to remove land from the designation for proposed development (para. 4.125). In essence, the Council have determined that there are no other reasonable alternatives other than releasing Green Belt land to meet the housing needs of TWBC. The NPPF (para. 138) indicates that when drawing up Green Belt Boundaries, the

Council should consider the need to promote a sustainable pattern of development, channelling development towards the urban area.

The Borough is heavily constrained with 74.5% of designated Green Belt land also within the AONB. Virtually any growth of the more sustainable parts of the Borough e.g. Royal Tunbridge Wells, would impact on the Green Belt and/or the AONB. Neighbouring local authorities have confirmed they are unable to meet any of TWBC's and therefore the release of Green Belt land is necessary to meet the identified development needs of the borough.

In addition to housing need, the following are considered to constitute exceptional circumstances that would justify releasing Land South of Appletree and Devils Wood from the Green Belt:

- . The allocation of the site would assist in the delivery of economic, social and environmental gains in accordance with the NPPF;
- . The site benefits from a sustainable location close to the Borough's main settlement, Royal Tunbridge Wells and in close proximity to local shops, services and employment opportunities within the Kingstanding Business Park;
- . There are sustainable modes of travel within close proximity to the site and there is also the opportunity to improve east to west pedestrian and cyclist connectivity;
- . The site can be delivered in the short to medium term; and
- . The entire site is under single ownership and is available for development.

For these reasons, it is considered that Land South of Appletree and Devils Wood could provide a natural extension to the existing urban area of Royal Tunbridge Wells and meets the exceptional circumstances test to be released from the Green Belt.

Site Suitability

Sustainable Location

Whilst the site falls outside of the boundary to Tunbridge Wells, it is considered suitable for residential development due to its close proximity to shops, other local services and employment opportunities located within the Kingstanding Business Park (allocated under Policy AL/RTW 17) and the existing employment area of North Farm.

There is a good level of sustainable modes of travel (bus and rail – High Brooms station is within close proximity) which connect the site to London, as well as other nearby facilities in Royal Tunbridge Wells centre. Significant improvements to cycling infrastructure and other sustainable and active modes are being provided through the development on the adjacent site (ref. 19/02267/OUT) and the site will benefit from this increased connectivity. The site also supports TWBC's aspirations to improve east to west pedestrian and cyclist connectivity, which could be achieved by utilising the existing bridleway/public right of way to the north of Land adjacent to Longfield Road, promoting routes through the site and providing a continuation of the development.

The site would integrate with the allocated adjacent site at North Farm (under Policy AL/RTW18), which is allocated for renewable or sustainable energy, sport, recreation, or leisure uses, and could provide an extension to this allocation. The proposed development would be led by a masterplan approach to ensure that the design is appropriate to its context and it is considered that through this approach supported by robust technical assessments site constraints can be responded to and mitigated as necessary.

Deliverability

The proposed allocation and development of the site will make a valuable contribution towards meeting the quantitative and qualitative needs of the community through delivering c. 600 residential dwellings. An illustrative masterplan for the site has been prepared and is included at Annex 1 of this letter.

The entire site is under single ownership and is available for development. It offers an opportunity for U+I to lend its significant technical knowledge and draw upon its longstanding track record of sensitive and successful delivery of development sites to help TWBC to meet their local housing needs. As is demonstrated by U+I's ongoing work to deliver employment land at Kingstanding, it is committed to high-quality design that responds to the sensitive site context.

The NPPF states that for a site to be both deliverable and developable, there should be a reasonable prospect that housing will be delivered on the land within five years. It is considered that the site presents a viable development opportunity with no abnormal site constraints on development anticipated at the site.

Accordingly, the site will be readily available and deliverable over the plan period and can make a substantial contribution to meeting housing need in TWBC as part of an appropriate strategy in the Local Plan. Given the TWBC's reliance on strategic sites to provide the majority of its housing requirement, this site could make an important contribution in the short-medium term and meet unmet need.

Whilst the site is located within the High Weald AONB, it is considered that its sustainability and early deliverability, as demonstrated above, provide the exceptional circumstances to justify its release from the Green Belt.

Concluding Remarks

These representations have been prepared by U+I and RSB in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. U+I and RSB has previously promoted Land South of Appletree and Devils Wood for residential redevelopment as part of the previous stages of the Local Plan review via the 'Call for Sites' process.

The purpose of these representations is to provide comment on the Council's proposed development strategy and specific proposals for allocated sites within the plan. In this respect, we consider the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. In addition, the Council have applied optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village and as a result, will mean housing is delivered much later in the plan period.

We would therefore reiterate the importance of making efficient use of addition site available within the borough that are suitable for development. We consider that Land South of Appletree and Devils Wood meets the exceptional circumstances test to be released from the Green Belt and is suitable for residential development for the following reasons:

- . The entire site is under single ownership and is available for development.
- . It presents a natural, high quality extension to the north of Royal Tunbridge Wells in a sustainable location.
- . It presents a viable development opportunity with no abnormal site constraints on development anticipated at the site.
- . It could be delivered in the short to medium term.

It is U+I and RSB's view therefore that the site should be allocated. This will help to ensure that sufficient housing is brought forward early in the plan period avoiding the need to rely solely on the strategic sites.

We trust the contents of this representation are clear and we would welcome the opportunity to discuss further the real development potential of the site with TWBC.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We consider that Land South of Appletree and Devils Wood meets the exceptional circumstances test to be released from the Green Belt and should be allocated for residential development. Please see letter of representations for further detail.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is important the TWBC are able to meet their housing targets over the plan period. There will be important matters to discuss at the hearing sessions to ensure that the plan is sound in this regard.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 2134 Lichfields for U+I & RSB Representation & Annex 1](#)

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS LOCAL PLAN PRE-SUBMISSION VERSION – REGULATION 19 CONSULTATION – REPRESENTATIONS ON BEHALF OF WAITROSE & PARTNERS

On behalf of our clients Waitrose & Partners, we wish to submit representations to the Pre-Submission (reg.19) consultation draft of the Tunbridge Wells Borough Local Plan. Our representations specifically relate to the robustness of the Council's proposed policy approach to accommodating the identified quantitative convenience (food) goods retail needs which the supporting evidence base to the new Local Plan has identified.

The Pre-Submission Draft Local Plan is supported by an up-to-date retail needs assessment, the 'Tunbridge Wells Retail, Commercial Leisure and Town Centre Uses Study Update 2021' ('the retail study'), which was prepared by Nexus Planning and published in February 2021. This study identifies a positive residual convenience goods spend in the Borough throughout the period of the new Local Plan, including a current (2021) surplus of £39.0m of convenience goods spend, which is available to support the development of new convenience goods floorspace. This surplus convenience spend will increase to £68.2m by the end of the new Local Plan period in 2038, a growth of £29.2m. It is considered that this represents a significant level of expenditure growth to leave unaccounted for from a spatial planning perspective.

The retail study identifies that the above levels of surplus convenience spend translates into a positive requirement for new convenience goods floorspace (i.e., new foodstore floorspace) At the retail study and Local Plan base year, 2021, this requirement for new convenience floorspace is identified by the retail study as being between 3,100 sq.m and 5,400 sq.m net of additional floorspace which is required in the Borough. It is important to emphasise that this represents a current requirement to serve the existing residential population of Tunbridge Wells Borough, before any increases in population and expenditure growth are factored in. Therefore, the capacity identified is not long-term, strategic needs predicated on potential levels of population growth - it is capacity which is required to serve the current population of the Borough. As set out above, this is a significant level of capacity which is, under the current proposed policy approach, not accounted for in a spatial planning perspective.

Convenience goods floorspace capacity will increase further in the future as population and expenditure growth comes forward, and the retail study identifies a floorspace capacity of between 5,300 and 9,300 sq.m net additional convenience goods floorspace by 2038 in Tunbridge Wells. This is a significant quantitative requirement which will need to be met through the provision of several new foodstores

across the Borough, both in existing urban areas such as Royal Tunbridge Wells, and to serve both new communities/growth areas and existing residents.

In the case of the Royal Tunbridge Wells urban area alone there is a growth in convenience goods spend of £8.4m over the Local Plan period. The Council's retail study identifies that the majority of convenience goods floorspace in the Borough, and particularly larger format 'supermarket' floorspace (i.e. stores which meet main/ weekly shopping trips e.g. Sainsbury's at Linden Park Road and Tesco at Pembury) is already trading at significantly above average levels, and this will become further pronounced as population growth (and thus additional retail spend) comes forward. It is well-established that overtrading of floorspace is an important qualitative consideration when considering the 'need' for new retail floorspace.

Notwithstanding this clear identified 'need', Para 4.30 of the Reg.19 Local Plan confirms the Council does not intend to allocate any sites to meet the requirements identified by up-to-date evidence. Referencing the findings of the retail study, para 4.30 of the Reg.19 Local Plan states that:

'Although it [the retail study] does identify a quantitative capacity for new convenience floorspace, it is not recommended that specific allocations should be made to meet this need, but rather this floorspace capacity should be achieved through the bolstering of existing or proposed stores within existing centres in the adopted retail hierarchy, given the substantial amount of vacant retail floorspace currently available, particularly in Royal Tunbridge Wells Town Centre.'

Given the significant levels of population and expenditure growth identified, coupled with the substantial over-trading of existing larger foodstores in the Royal Tunbridge Wells area, it is therefore not considered robust that the Local Plan does not seek to positively plan for accommodating the identified needs by up-to-date evidence.

Furthermore, the proposed policy approach of strengthening existing/proposed stores (as set out above) will not accommodate the needs identified. For example, in Royal Tunbridge Wells, existing town centre foodstores are small-scale and on sites which do not readily lend themselves to expansion. Similarly, whilst we do not dispute the fact that there is vacant floorspace in Royal Tunbridge Wells town centre, for the Local Plan to infer that this floorspace can accommodate the identified convenience goods capacity is considered to be inaccurate. The floorspace currently vacant in Royal Tunbridge Wells town centre is split across a large number of units, most of which are small-scale in nature and unsuitable for foodstore operations. It is imperative that any site allocated should be capable of accommodating a foodstore that can compete effectively with the existing larger-format supermarkets in terms of its size, range of goods sold and car parking facilities.

In instances where town centres cannot meet the levels of need identified, the Planning Practice Guidance 'Town Centres and Retail' (Online - Paragraph: 005 Reference ID: 2b-005-20190722) makes it clear that ***'planning authorities should plan positively to identify the most appropriate alternative strategy for meeting the identified need for these main town centre uses, having regard to the sequential and impact tests (our emphasis).*** Accordingly, in line with this guidance, the Council should consider alternative sites outside of the Town Centre to meet the identified need for convenience goods floorspace where they satisfy the sequential approach and impact tests. In tandem, this approach could also ensure that new convenience goods floorspace can be provided on sites well related to the proposed housing growth locations, particularly in the southern part of Royal Tunbridge Wells.

It is important to note there continues to be active retail operator demand for store representation from foodstore operators such as Waitrose & Partners in Royal Tunbridge Wells and the Local Plan should provide clear guidance on where new convenience retail can be accommodated in order to meet residents' needs in a sustainable manner. We therefore disagree with the assertion at para 5.23 of the Reg.19 Local Plan that *'In terms of convenience retail, although there is some need identified, it is not considered necessary to allocate sites to meet this need.'*

On the basis of the above, it is requested that the Council's current policy approach of not allocating sites to meet the significant convenience (food) goods needs which have been identified by up-to-date evidence is reconsidered.

Waitrose & Partners would welcome discussions with officers on the points made in these representations once they have had an opportunity to review. In the meantime we look forward to receiving confirmation of receipt and that the representations have been duly made

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

TUNBRIDGE WELLS BOROUGH - LOCAL PLAN

REGULATION 19 PRE-SUBMISSION CONSULTATION

LAND AT STREATLEY, HAWKHURST

REPRESENTATIONS SUBMITTED ON BEHALF OF WEALDEN HOMES

June 2021

1.0 INTRODUCTION

1.1 These representations are submitted on behalf of Wealden Homes in response to the Tunbridge Wells Borough Local Plan - Regulation 19 Consultation. The Consultation (26 March – 04 June 2021) comprises a "Pre-Submission" consultation document as part of the Local Plan process. It follows the earlier Reg 18 "Issues and Options" (May – June 2017) and Reg 18 "Draft Local Plan" (Sept – Nov 2019) stages of the Local Plan to which Wealden Homes has previously made representations to.

1.2 Wealden Homes is a local and SME housebuilder and has interests at land at the Streatley property on Horns Road, Hawkhurst (the “site”) which forms an omission site in the Local Plan. The site is assessed under site reference no. 52 as part of the Sustainability Appraisal (SA) and SHELAA processes.

1.3 Notwithstanding our client’s interests, these representations have been prepared in objective terms and assesses the Local Plan against the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). In this regard, we set out below the main aspects of these representations as follows:

a) Local Plan Strategy – Meeting Housing Need

- The Local Plan seeks to meet the Government’s Standard Method for new homes (678dpa) over an 18-year Plan period (2020 – 2038);
- This entails a need for 12,204 units over 18 years;
- The Local Plan seeks to provide 13,069 – 13,444 dwellings during the Plan period;
- Taking the mid-point of the above, this provides a buffer of 8.6%;
- We consider that a buffer closer to 20% would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks;
- We consider that the range of dwellings proposed provides uncertainty as to the extent of housing need being met.

b) Land at Streatley, Horns Road, Hawkhurst

- Our client’s site provides a “suitable”, “achievable”, “available” and “deliverable” site for development up to 40 dwellings;
- These representations object to assessments of the site set out in the SA and SHELAA;
- The proposals would respond positively towards meeting housing need in the Borough area;
- The proposals would make a meaningful contribution towards achieving a 20% buffer in the Local Plan;
- Development of the Site would secure a sensitive design response in the AONB in which the site is located. We note that the AONB washes over Hawkhurst and other settlements in the Borough and the Local Plan includes site allocations in other parts of the AONB. Our client’s site can be considered positively in this context.

1.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be “Sound” in accordance with the NPPF. Our client’s site can make a meaningful contribution towards achieving a 20% buffer.

2.0 LOCAL PLAN STRATEGY – “MEETING HOUSING NEEDS”

2.1 This section sets out our representations on the Local Plan spatial strategy with regard to meeting housing need. This has particular reference to **Policy STR1 (The Development Strategy)** and its supporting paragraphs.

a) Housing Need

2.2 In line with the Government’s Standard Method for housing need, the Local Plan needs to plan for the delivery of 12,204 new homes during the Plan period 2020 – 2038. This amounts to 678 dwellings per annum.

2.3 The emerging Local Plan is seeking to provide for a “lower” and “upper” range in the quantum of development, as extending from 13,059 – 13,444 dwellings. This is made up of existing committed sites and proposed allocations as follows:

Table 1: Local Plan housing strategy

Housing Strategy

13,059

13,444

Requirement

12,204

12,204

Buffer

855 (7%)

1,240 (10%)

2.4 We support the ability of the Plan to seek to meet its own needs in full. However, the use of “lower” and “upper” ranges, as above, provides uncertainty in terms of the quantum of development to be achieved by the Local Plan. In this context, we note that the Local Plan seeks to achieve a 7 – 10% buffer and this range entails a difference 385 dwellings.

2.5 We consider that the Plan should be seeking to achieve a greater buffer of up to 20%. There are a number of factors underpinning this objective as set below.

i. Delivering a sufficient supply of homes

2.6 Tunbridge Wells Borough Council has not been able to demonstrate a 5-year supply of housing land for a number of years (c. 5 years+). TWBC’s stated supply currently stands at 4.83 years.

2.7 Equally, the Housing Delivery Test Measurement (2020) amounts to 85% delivery in Tunbridge Wells in the previous three measurement years as follows:

Table 2: Housing Delivery Test Measurement 2020 (as at Feb 2021)

2017-18

2018-19

2019-20

1,807

No. of homes delivered

519

553

474

1,540

Shortfall/Surplus

85%

Action required

Action Plan

2.8 It is evident from the above that there has been recent and continued under delivery of homes in TWBC. The NPPF (footnote 39) is clear in-so-far as a 20% buffer should be applied whereby the HDT falls below 85%. The objective of this is to redress previous shortages in supply and in this light, we consider that up to/in the region of a 20% buffer should be applied for the Local Plan. This will ensure that flexibility in supply is provided as well as securing choice and competition in the market for new homes.

ii. Addressing Affordability

2.9 The ability to afford a home is a problematic issue in TWBC. This is the result of many socioeconomic factors; one of which relates to housing demand and the shortfall in supply. Delivery over the past 10 years (2010/11 – 2019/20) has averaged 330dpa in TWBC. This is **half** the housing need determined by the Council's Objective Assessment of Housing Need (OAN) determined under the policies of the 2012 NPPF (648dpa). The 2019 NPPF introduced the 'Standard Method' for calculating **minimum** local housing need, replacing the OAN. The **minimum** need calculated by this method is higher than the OAN at 678dpa for Tunbridge Wells. However, it is important to note how this figure is 'capped' due to the acute affordability problems in the Borough. If the Standard Method were uncapped, it shows need of 764dpa in Tunbridge Wells. As the PPG (ID2a-007) states, "*The cap is applied to help ensure that the minimum local housing need figure calculated using the standard method is as deliverable as possible*" however it also states that "*The cap reduces the minimum number generated by the standard method, but **does not reduce housing need itself***" (our emphasis). The minimum that should be targeted by the Council is delivery of 678dpa, as **actual** housing need in Tunbridge Wells is higher at 764dpa.

2.10 To put the affordability issues in context, the median affordability ratio is used for the purposes of calculating the Standard Method minimum. The ratio in Tunbridge Wells is currently 13.27. This means a household earning a median salary would require 13.27 times that salary to afford a median priced home in the Borough. A median priced home costs £390,000 as of 2020. The median ratio compares to an average of only 7.84 nationally, 9.92 in the south-east, and 10.06 across Kent. This means the ratio in Tunbridge Wells is 69% higher than the national average, 34% higher than the regional average, and 32% higher than the Kent average. The ratio also increased most from the previous 2019 ratio in Kent, and is the 12th highest in the country outside of London.

2.11 It is clear that additional housing is required in the Borough to address the acute affordability problems inherent there, which have only been exacerbated by the lack of delivery over the past decade. This is needed to address both supply and demand, thereby driving down price. A 20% buffer is therefore considered appropriate having regard to the above market signals and the need to address affordability concerns. Such a buffer has been accepted at Examinations for other nearby local authority areas (with similar/lower affordability ratios) including Canterbury (2017), Mid Sussex (2017/18) and Guildford (2018). It is thereby recommended that the planned supply of homes is increased in the Plan in order to secure a 20% buffer.

iii Responding to potential unmet needs from Sevenoaks

2.12 TWBC shares a number of functional relationships with adjacent local authority areas. This includes migratory patterns for school, work, etc. with other authorities including Sevenoaks, Tonbridge and Malling, Maidstone, Ashford, Rother and Wealden.

2.13 Tunbridge Wells shares the “West Kent Housing Market Area” with Sevenoaks and Tonbridge and Malling. Para 4.12 of the Local Plan refers to potential/“unknown” unmet needs (c. 1,900 dwellings) arising from Sevenoaks. TWBC’s Duty-to-Cooperate Statement (March 2021) goes on to refer to a formal request from Sevenoaks (April 2019) in terms of assisting with unmet need. The issue of Sevenoaks unmet needs was also the subject of lengthy discussions at the recent (Oct 2020) Examination of the Tonbridge and Malling Local Plan.

2.14 The DtC Statement recognises the current uncertainty regarding the progress of the emerging SDC and TMBC Local Plans. It is therefore considered that the Tunbridge Wells Local Plan should provide the appropriate flexibility in seeking to positively grapple with the unmet needs arising from Sevenoaks.

2.15 This can be achieved through an uplifted buffer to 20% and it is considered that the uplift in need can be addressed across Tunbridge Wells Borough, as including Hawkhurst. In this context, we note that TWBC has direct functional relationships to Sevenoaks, including the shared mainline train services to London. It is therefore a good location for unmet needs arising from Sevenoaks to be met.

iv Summary

2.16 The Local Plan currently seeks to provide a buffer of 7 – 10% above the identified need for new homes. A buffer in the Plan is welcomed, however, the current proposals provide uncertainty as to what can be achieved. This is important given the context set out above (items *i – iii*) and it is considered that the Plan should be seeking to secure a definitive buffer of up to 20%. This can be achieved by identifying and allocating further sites in the Local Plan.

2.17 In the next section, we address our client’s site at Streatley in the context of the ability of the site to make a meaningful contribution towards achieving an uplifted 20% buffer in the Local Plan.

b) Small to Medium sized sites

2.18 Wealden Homes is a member of the Kent SME Developers Network and as referred in separate representations submitted by the Network, Wealden Homes is disappointed that the Local Plan fails to support or recognise the role of SME developers/housebuilders in the Plan.

2.19 In this regard, the NPPF sets out that small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should identify land to accommodate at least 10% of their housing requirement on small – medium sites (para 68). This amounts to 1,460 dwellings to be identified on small sites (having regard to a 20% buffer).

2.20 As referred in the Kent SME representations, TWBC’s evidence base confirms that only 290 dwellings across 9 sites are identified in the Local Plan that are yet to obtain a Planning Permission. Equally, even if the total number of small – medium sites (including those with a Planning Permission) are taken into account, this still amounts to only 641 dwellings across 17 sites – a shortfall of c. 800 small – medium sized sites. The Local Plan is thus considered unjustified in failing to meet its 10% target for small – medium sites.

i SME Small Sites Policy

2.21 Wealden Homes is concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB.

2.22 Through its work with the Kent SME Network, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments, where there are limited opportunities through allocations in which the Council has made (i.e. on larger sites).

2.23 This recommended policy is set out below:

Table 3: Kent SME Network – Small Sites Policy

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small sites, the council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- I. The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;
- II. The site is being brought forward by a recognised SME Developer and is not part of a larger site;
- III. The proposed development delivers;
 - a. A bespoke design approach;
 - b. A high quality design that is locally distinctive;
 - c. Is sympathetic to the character of its location;
- IV. All dwellings meet National Design Standards and endeavor to deliver a range of Carbon reduction build techniques;
- V. The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.
- VI. A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. When on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

2.24 A Small Sites policy can allow for SMEs to operate within the Plan Led system and will allow both small and medium sites to come forward (i.e. for sites up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation, etc and a flexible approach to the delivery of Affordable Housing.

2.25 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The policy would also secure development that meets the “building better, building beautiful” objectives and potentially addressing Climate Change issues.

2.26 The policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe.

2.27 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. As volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

2.28 The Network recognises that other Kent LPAs are seeking to introduce a Small sites policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME. The above recommendations enable to Local Plan to be “sound” and the land at Streatley is able to make a meaningful contribution (40 dwellings) towards the small-medium sites quantum for the Local Plan.

[TWBC: Section 3 has been inputted against Policy STR/HA 1 (The Strategy for Hawkhurst Parish), please see Comment Number PSLP_1862]

4.0 CONCLUSION

4.1 These representations, as prepared on behalf of Wealden Homes, support the aspiration of the Local Plan to meet its housing needs in full. This should however be supplemented by a buffer closer to 20% rather than the current 7 – 10% buffer proposed in the Local Plan. This would address previous

shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks.

4.2 Our client's site provides a viable option for meeting uplifted housing needs in the Borough. Contrary to the SA and SHELAA assessments, development of the site would secure a sensitive design response in the AONB in which the site is located. We note that the AONB washes over Hawkhurst and other settlements in the Borough and the Local Plan includes site allocations in other parts of the AONB. Our client's site can be considered positively in this context.

4.3 The site is "suitable", "available", "achievable" and thus "deliverable" for development in the short-term and it is capable of delivering the following benefits:

- Up to 40no. dwellings (providing a range and mix of homes);
- The site could deliver a lesser extent of development in line with the objectives of the Hawkhurst Neighbourhood Plan;
- All units would be built to lifetimes homes standards and including provision for bungalows for older people;
- The site can offer a valuable contribution to the growth of Hawkhurst without expensive and challenging improvements to the infrastructure of the settlement. Equally the development of the site would lead to limited impacts upon the Hawkhurst crossroad as Horns Road offers an alternative route to the main A21 route to the west;
- Open space provision;
- New access road;
- Appropriate parking provision;
- On-site drainage/treatment facility placing no pressure on existing drainage system in Hawkhurst;
- Provision of 40% affordable housing; and
- Other obligations towards infrastructure provision (Incl. Community Hall).

4.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be "Sound" in accordance with the NPPF. Our client's site can make a meaningful contribution towards achieving a 20% buffer in addition to the 10% requirement for small – medium sites.

1 Swale BC included such a policy in its Regulation 19 Local Plan Consultation.

2 Refer to Draft Local Plan (Reg 18 Consultation), Sept – Nov 2019

APPENDICES

APPENDIX 1 - Wealden Homes representations to Reg 18 Draft Local Plan (Sept - Nov 2019)

APPENDIX 2 - Wealden Homes – Landscape and Visual Impact Assessment

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to supporting submitted representations.

[TWBC: the below text is from the submitted representation, which has also been attached as a supporting document]

b) Small to Medium sized sites

2.18 Wealden Homes is a member of the Kent SME Developers Network and as referred in separate representations submitted by the Network, Wealden Homes is disappointed that the Local Plan fails to support or recognise the role of SME developers/housebuilders in the Plan.

2.19 In this regard, the NPPF sets out that small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should identify land to accommodate at least 10% of their housing requirement on small – medium sites (para 68). This amounts to 1,460 dwellings to be identified on small sites (having regard to a 20% buffer).

2.20 As referred in the Kent SME representations, TWBC's evidence base confirms that only 290 dwellings across 9 sites are identified in the Local Plan that are yet to obtain a Planning Permission. Equally, even if the total number of small – medium sites (including those with a Planning Permission) are taken into account, this still amounts to only 641 dwellings across 17 sites – a shortfall of c. 800 small – medium sized sites. The Local Plan is thus considered unjustified in failing to meet its 10% target for small – medium sites.

i SME Small Sites Policy

2.21 Wealden Homes is concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB.

2.22 Through its work with the Kent SME Network, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments, where there are limited opportunities through allocations in which the Council has made (i.e. on larger sites).

2.23 This recommended policy is set out below:

Table 3: Kent SME Network – Small Sites Policy

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small sites, the council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- I. The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;
- II. The site is being brought forward by a recognised SME Developer and is not part of a larger site;
- III. The proposed development delivers;
 - a. A bespoke design approach;
 - b. A high quality design that is locally distinctive;
 - c. Is sympathetic to the character of its location;
- IV. All dwellings meet National Design Standards and endeavor to deliver a range of Carbon reduction build techniques;
- V. The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.
- VI. A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. When on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

2.24 A Small Sites policy can allow for SMEs to operate within the Plan Led system and will allow both small and medium sites to come forward (i.e. for sites up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation, etc and a flexible approach to the delivery of Affordable Housing.

2.25 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The policy would also secure development that meets the “building better, building beautiful” objectives and potentially addressing Climate Change issues.

2.26 The policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe.

2.27 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. As volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

2.28 The Network recognises that other Kent LPAs are seeking to introduce a Small sites policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME. The above recommendations enable to Local Plan to be “sound” and the land at Streatley is able to make a meaningful contribution (40 dwellings) towards the small-medium sites quantum for the Local Plan.

4.0 CONCLUSION

4.1 These representations, as prepared on behalf of Wealden Homes, support the aspiration of the Local Plan to meet its housing needs in full. This should however be supplemented by a buffer closer to 20% rather than the current 7 – 10% buffer proposed in the Local Plan. This would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks.

4.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be “Sound” in accordance with the NPPF. Our client's site can make a meaningful contribution towards achieving a 20% buffer in addition to the 10% requirement for small – medium sites.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Wealden Homes considers that the Local Plan housing supply should be uplifted by c. 1,500 homes. Accordingly, it considers that its site at Streatley, Hawkhurst can make a meaningful contribution to the supply and should thus be allocated. The site can also positively address the shortfall in small-medium sites. Wealden Homes would accordingly seek to present its planning arguments at the relevant examination hearing sessions.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please refer to supporting submitted representations.

If you would like to attach a file in support of your comments, please upload it here.

Agent's Name and Organisation (if applicable)	Kember Loudon Williams
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy STR1. The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. In addition, the reliance on large strategic sites is going to result in the trajectory not being able to deliver sufficient housing early in the Plan period and so additional smaller sites are necessary to ensure delivery and so make the Plan effective.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be positively prepared, justified, effective or consistent with National Policy.

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in Sevenoaks District Council was unclear. However, following the failure of their High Court challenge, Sevenoaks District Council is now required to begin the preparation of their Local Plan again. Since NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within Sevenoaks District. Not to do so would be contrary to NPPF policy and in our view this suggests that additional sites must be identified.

Given the stage reached in the Tunbridge Wells Local Plan process, it would be unreasonable for this Council to not assist Sevenoaks District in meeting part of its housing need. Paragraph 4.16 of the draft Local Plan postulates that Sevenoaks may have an unmet need of 1900 dwellings. Paragraph 4.18 also notes that sites may need to be greater in size to enable delivery of the numbers predicted.

Paragraph 4.53-4.54 then explains that sites and other supply with sufficient capacity for 13,059 to 13,444 dwellings has been found. The mid point gives a buffer of 1,000 dwellings above the 12,200 requirement.

Notwithstanding the buffer and the situation in Sevenoaks, it is also the case that Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan – having withdrawn its draft document. It is a neighbouring authority and subject to constraints relating to Ashdown Forest and the Habitat Regulations. Since it is within the same housing market area, it may be necessary for Tunbridge Wells to consider meeting some of its unmet housing need. In fact, following the rejection by the Local Plan Inspector of Wealden's Submission Plan, Wealden have re-wound their Plan preparation process and started from the beginning with an issues and options consultation. It is likely that this Plan is several years from fruition.

There is also sufficient uncertainty with Tonbridge and Malling's Local Plan and this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. A shock to the local housing market seems likely with supply side constraint pushing up house prices. In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer. Tunbridge Wells Borough Council cannot legitimately argue against this strategy having removed housing allocations from the Regulation 18 draft Local Plan that were perfectly acceptable.

In relation to delivery of new homes, we are of the view that additional medium sized housing sites are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional smaller housing sites should be allocated in different locations – particularly focused on sustainable settlements, including villages, outside the AONB. Since NPPF seeks to boost the supply of housing and there is nothing preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. This would mitigate risks of delays to delivery on the larger sites and/or lower overall yields should constraints emerge during the detailed planning process. If over provision were to occur, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve. Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (Reg 18) (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify STR1 to increase housing numbers to meet the unmet needs of Sevenoaks DC and other adjoining authorities. Alter the Policy to identify a need for additional smaller and medium sized sites (under 70 units in size). The policy may need to increase by a further 2-3,000 dwellings.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To be present to test/witness the Council's strategy regarding housing numbers, the trajectory and the delivery of sites.

1.0 INTRODUCTION

1.1 These representations are made to the Regulation 19 Pre-Submission consultation for the Emerging Tunbridge Wells Borough Council Local Plan. These representations are made on behalf of Wrenbridge Land Ltd (hereafter 'Wrenbridge') by Barton Willmore LLP. Wrenbridge has a number of land interests across the borough and has successfully delivered a number of high-quality commercial redevelopments within the wider south east region. Wrenbridge specialise in providing high quality commercial developments on brownfield under-utilised land where the existing units are dated, and no longer fit for modern day business purposes.

1.2 These representations are made in relation to the pre-submission consultation outlined by the Council, in particular in regard to the employment uses across the borough and the location of such land uses.

2.0 RESPONSES TO THE REGULATION 19 CONSULTATION

2.1 This section sets out our responses on behalf of Wrenbridge to the current consultation. For brevity relevant sections and policy numbers are referenced accordingly.

Policy STR 1: The Development Strategy

2.2 Section 1 of Policy STR 1 states that, to achieve 14ha of additional employment land over the Plan period, the Local Plan “*Promotes the effective use of urban and previously developed (brownfield) land.*”

2.3 Wrenbridge supports the re-use of brownfield land and the long-term benefits it can bring which is consistent with the sustainable development objectives set out in Local and National planning policy. However, it should be stated in the emerging Local Plan that the intensification of brownfield land is encouraged, subject to where it accords with the wider development management policies within the Plan. We believe a greater emphasis on the optimisation of previously developed land, clarified within STR3 below, would contribute to the borough's objectively assessed employment needs.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan's emphasis on developing brownfield land to meet the borough's employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the 'Southborough High Broom Industrial Area'. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

2.3 Wrenbridge supports the re-use of brownfield land and the long-term benefits it can bring which is consistent with the sustainable development objectives set out in Local and National planning policy. However, it should be stated in the emerging Local Plan that the intensification of brownfield land is encouraged, subject to where it accords with the wider development management policies within the Plan. We believe a greater emphasis on the optimisation of previously developed land, clarified within STR3 below, would contribute to the borough's objectively assessed employment needs.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We do not consider that the employment land policies are sufficiently flexible to meet with potential future market demand, as outlined in our cover letter.

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1

Respondent's Name and/or Organisation Jacqui Avery

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 2 Place Shaping and Design

[TWBC: see also further comments on individual sections and policies - PSLP_2269 and 2272-2279. The whole representation form (personal details redacted) has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none">. It is not positively prepared. It is not effective. It is not justified. It is not consistent with national policy
--	---

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We support the broad thrust of this policy. We are encouraged by the form of words used in "setting requirements" rather than "having regard to". In particular we support point 3 of the requirements to "Conserve and enhance assets of historic, landscape, or biodiversity value". With this in mind we consider any development of site RTW 16 which has significant value in terms of historic, landscape and biodiversity (including the eastern side) would breach this requirement.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

Charterhouse comments on specific Pre-submission Local Plan Policies

Policy STR 2 – Place Shaping and Design

Charterhouse supports ST R2 and ensuring that high quality urban and architectural design is met.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	CPRE Kent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR2 Place Shaping and Design	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

The National Design Codes consultation (January 2021) states that density is an essential component of an effective design code. Building at 20-40dph is noted as representing development in outer suburbs; suburban development is pegged at 40-60dph and urban neighbourhoods at 50-120dph.

The highest density possible should be used to reflect the nature of local character areas and local housing need requirements.

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Cranbrook & Sissinghurst Neighbourhood Development Plan

Response to Tunbridge Wells Borough Council Pre-Submission Draft Local Plan – 4th June 2021

Section 4: The Development Strategy and Strategic Policies

Policy STR 2: Place Shaping and Design

No mention of the Neighbourhood Plan Design Guides or High Weald AONB Design Guide or Colour Guide. Otherwise, some worthy points here, but completely contradicted by the locations of developments, types and mix of housing put there and disregard for local voices and knowledge.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Cranbrook Conservation Area Advisory Committee
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 2 Place Shaping and Design

Question 4

Do you consider that the Local Plan:

Is sound

Don't know

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction

Whilst the main thrust of the Cranbrook Conservation Area Advisory Committee's comments relate to the conservation and heritage of Cranbrook and Sissinghurst, there are some wider issues which are also of concern. In this response we will use the Headings used in the Local Plan document with page or paragraph numbers for extra clarity.

Place Shaping and Design (P 45 -46)

We support Policy STR 2. In the case of Sissinghurst and Cranbrook we would expect the emerging Neighbourhood Plan to be a key participant in ensuring high quality and original design in and around Cranbrook, Wilsley and Sissinghurst. Also the High Weald Design guide is a useful reference for this part of the borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

No, but other members of the CCAAC may wish to do so.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 2

Agent's Name and Organisation (if applicable) Barton Willmore

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 2 Place Shaping and Design

[TWBC: this comment has also been inputted against Policy STR 4, please see Comment Number PSLP_2067. For further comments by Crest Nicholson, please see Comment Numbers PSLP_2064, PSLP_2066-2074, and 2077]

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

Policy STR2: Place Shaping and Design

Policy STR4: Ensuring Comprehensive Development

“Not positively prepared” or “justified”

4.14 Crest commends TWBC for the amendments made to the Reg 18 version of the Plan to formulate this Reg 19 Plan, particularly in respect to the policies regarding development at Paddock Wood, as it significantly improves the ability to understand the Plan and policies. That said, however, the Local Plan is still long, as are many of the policies, and could be further simplified and edited to make it easier to read, navigate and comprehend.

4.15 Crest supports the overall principles of these policies, but considers them to be unsound, as the policy wording could be more positively prepared and justified.

4.16 The Plan should be read as a whole; therefore, it should be as concise as possible with a minimal amount of repetition. This will also remove any discrepancies between slight deviations in wording of different policies.

4.17 As an example, the second sentence of the first paragraph of **Policy STR2** states,

“...the Council will expect applicants to engage in early and effective discussions with the community and other relevant stakeholders.”

4.18 **Policy STR 4** Ensuring Comprehensive Development states at paragraph 5,

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents”.

4.19 Paragraph 9 of **Policy EN1** Sustainable Development states,

“New development should be informed by effective engagement between applicants, local communities, neighbours of sites, local planning authorities, infrastructure providers, and other interested parties throughout the planning process. Applications that demonstrate early, proactive, and effective engagement, and that the views expressed in that engagement have been properly considered, will be looked on more favourably than those that cannot”.

4.20 These three statements fundamentally say the same thing but in slightly different ways. There are also other repetitions and overlaps in these policies and in others.

4.21 In this regard, Policies STR2, STR4 and EN1 should be reviewed, and merged if necessary, resulting in a single overarching comprehensive policy that looks like Policy EN1.

4.22 It is further suggested that a general review of the Plan is undertaken to minimise repetition, simplify it further and make it consistent throughout. This will significantly reduce its size and make it easier to read, comprehend and utilise for Development Management purposes.

4.23 As shown above, the Council is keen to encourage developers to engage well as they progress the allocations to applications. Crest acknowledges and accepts engagement as good planning practice and as a fundamental tenet of garden settlement principles. However, this element of good planning practice has to start early and be undertaken throughout the planning process, including plan-making. This way, successful new communities are planned and delivered.

4.24 Any policy addressing the issue of engagement should, therefore, also apply to the Council itself for consistency, transparency and to provide certainty and to ensure deliverability. For example, to date, the Council has not engaged in 'early and effective discussions' with the developers of the Paddock Wood strategic urban expansion in the preparation of the masterplan/framework document. Consultation is not the same as engagement. These documents should be co-produced with the developers, alongside engagement with the other relevant stakeholders. By doing this a more practical approach could be taken, whereby for example, landownership is taken into account to provide certainty and to ensure deliverability.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Modification

4.25 **Policies STR2, STR4 and EN1** should be reviewed, and merged if necessary, resulting in a single overarching comprehensive policy that looks like **Policy EN1**.

4.26 Any policy Modification addressing the issue of engagement should also apply to the Council itself for consistency, transparency and to provide certainty and to ensure deliverability.

4.27 It is further suggested that a general review of the Plan is undertaken to minimise repetition, simplify it further and make it consistent throughout. This will significantly reduce its size and make it easier to read, comprehend and utilise for Development Management purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council's housing delivery. As such, it is important that Crest is represented in all the relevant EIP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Environment Agency
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
	Policy STR 2 Place Shaping and Design
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Biodiversity

Place Shaping and Design covers – ecology; flooding; water supply; wastewater.

We welcome the reference to Kent Design Guide, as there are dedicated sections around the riverine environment and sensitivities. We would suggest to ensure a clear definition of “adaptation measures against the future impacts of climate change” is included, as referenced within Place shaping chapter. The elements aimed sustainability are appropriate and valid for ensuring careful decisions are made, but it would be an enhancement to the objectives if the design principles also stated to foster better resilience for wildlife corridors and incorporation of green/blue corridors.

[TWBC: For general response please see Comment Number PSLP_462]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council welcomes reference to the Kent Design Guide in this section.

Public Health

In respect of its responsibilities concerning public health, the County Council is supportive of Policy STR 2, Policy STR 6 and Policy STR 7 which include considerations around active travel, air quality, climate change and a number of references to improving promoting healthy lifestyles. The County Council suggests that aligning the priorities and objectives from the Borough Council's Five Year Plan (2017-2022) could help strengthen the ability to address health inequalities in the Borough.

To ensure the robustness of any policies supporting improvements in population health, a greater use of the evidence base is recommended using data from the Kent Joint Strategic Needs Assessment (JSNA) and/or other sources of public health data from the Public Health Outcomes Framework (PHOF), including ward level data, in addition to referencing how these policies support the Kent Health and Wellbeing Strategy. Providing evidence of the health needs of the population is in line with the National Planning Policy Framework and will further justify planning policies regarding health and wellbeing.

Biodiversity

The County Council welcomes consideration that the biodiversity value of an area will be 'conserved and enhanced'. This fits in with national biodiversity policy (Natural Environment and Rural Communities Act 2006 and section 15 of the National Planning Policy Framework).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We support the broad thrust of this policy. We are encouraged by the form of words used in "setting requirements" rather than "having regard to". In particular we support point 3 of the requirements to "Conserve and enhance assets of historic, landscape, or biodiversity value". With this in mind we consider any development of site RTW 16 which has significant value in terms of historic, landscape and biodiversity (including the eastern side) would breach this requirement.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

STR 2 Place Shaping and Design

3.24. This policy is not consistent with Policy STR 1 in that the development at Tudeley and East Capel will not respond positively to the local character and preserve and enhance the quality of the existing community and its environs.

3.25. The TWBC's Local Plan seeks low levels of car use, yet Tudeley Village is an isolated location, which relies on the private car.

3.26. The Tudeley Village Proposals do not demonstrate how the scheme has been informed by landscape character and context. An early understanding of character and context is a basic requirement of good design as set out in the Kent Design Guide (Kent County Council 2000) and the more recent MHCLG 2019 policies and guidance relating to AONB and its setting.

3.27. The design principles that have been presented do not follow established best practice 'placemaking principles. Features such as straight roads, extensive use of rear parking courtyards; and limited opportunities to integrate green infrastructure do not reflect best practice principles, such as those set out in the National and County Design Guide, 'Manual for Streets and Parking what works where'. Overall, the vignette appears to lack cohesion and clear strategy for public realm streets and open space.

3.28. The policy states that "all new development must respond positively to local character and context to preserve and enhance the quality of existing communities..." The existing community in Capel is characteristically rural, centred around an agricultural landscape. How does creating an urban residential development complete with all associated infrastructure enhance the quality of this community?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Question 1	
Respondent's Name and/or Organisation	Gabriella Atkinson
Question 2	
Agent's Name and Organisation (if applicable)	Rok Planning
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Given national policy emphasis on focusing new developments within brownfield and previously developed land, Part 3 of Policy STR 3 restrictive is considered restrictive in its position on the redevelopment of brownfield land outside established settlement boundaries.

[TWBC: the following paragraph is from the cover letter - for the full cover letter, please see supporting documents]

Conclusion

As detailed above, specific policy stipulations within the emerging Local Plan are considered unjustified and unsound against relevant NPPF guidance. The LPA is urged to take into account the proposed amendments to policy wording to accord with national policy, enabling greater flexibility to:-

- . the redevelopment of brownfield land outside established settlement boundaries;
- . development within rural areas and the High Weald AONB; and
- . the conversion of rural buildings for business, recreational, tourism and housing purposes.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The following amended wording is proposed to encourage redevelopment of brownfield land beyond established settlement boundaries:-

3. Such proposals in the countryside (i.e. brownfield sites outside defined Limits to Built Development) will be supported where:

a. first sufficient consideration is given to the re-use of existing buildings, including any suitable extensions;b. they are compatible with and, where possible, enhance, the landscape setting and local amenities;c. for residential developments, the site is well related and accessible to a defined settlement and there is, or the development will provide, safe access by foot, cycling, or public transport for a high proportion of trips;d. for all proposals relating to existing brownfield sites in employment use, the criteria in Policy ED 2: Retention of Existing Employment Sites and Buildings are met;e. if relevant, they represent an appropriate use of a heritage asset or, in respect of enabling development, this is necessary to secure its future, in accordance with Policy EN 5: Heritage Assets;f. there is no unacceptable highway impact and the nature and volume of traffic is otherwise compatible with the local road network;g. they are in accordance with other relevant development plan policies.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4	

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We support the inclusion of a policy on Brownfield development. We consider the policy should be further strengthened to ensure that development of Brownfield land should be completed and built out before Green field sites and certainly before any land is released from the Green Belt.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 3 Brownfield Land

[TWBC: the full representation attached has been divided between Policy STR/RTW1 (PSLP_2099), Vision and Strategic Objectives (PSLP_2104), Policies STR3 (PSLP_2106), STR9 (PSLP_2107), and AL/RTW17 (PSLP_2108).

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Axiom Developments Limited (hereafter referred to as Axiom) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Colebrooke Park, which Axiom is promoting for employment-generating development as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The Site

1.2.1 Our client has been promoting land at Colebrooke House for a business park within an attractive parkland campus setting. The site was promoted via the original Call for Sites process in 2016 (site 101) and representations were made at the previous Reg 18 consultation. The site boundary is shown in Figure 1.

1.2.2 The site lies outside of the current settlement boundary for Royal Tunbridge Wells and within both the High Weald Area of Outstanding Natural Beauty (AONB) and the Green Belt.

1.2.3 As a result of the recent A21 dualling project, the site benefits from direct access onto the A21 via the Fairthorne junction. This now provides the site with excellent access to the national road network, whilst also being well-located in relation to the existing employment areas along Longfield Road. The A21 improvements present an excellent opportunity for the site to make a substantial contribution to the local economy through development of the site.

1.2.4 The 8.5ha site comprises a large 19th century residential property set in parkland grounds. Whilst being habitable, the property is currently in need of repairs following a period of under-investment. Its value as a residential property has been substantially affected as a result of the A21 dualling works.

[TWBC: see full representation attached for Figure 1: Proposed allocation site boundary].

1.2.5 There is a unique opportunity to provide employment-generating development which makes the most of the existing characteristics of the site. For example, this could take the form of a high-quality business park, or other employment-generating use set within an established parkland setting and based around the existing 19th century Colebrooke House.

1.2.6 The site provides an opportunity to provide an attractive business location, accessible to the A21 as well as local businesses and services. A Vision Document has been prepared and was submitted with our Regulation 18 representations previously which shows that the site would be capable of delivering around 11,750 sqm of employment-generating floorspace, which would be capable of supporting between 885 and 1,437 jobs if in office use.

1.2.7 The Council's Economic Needs Study (ENS) demonstrates the need for good quality economic development land locally. This was also backed up by responses from stakeholders identifying Tunbridge Wells as a good office and industrial location. ENS paragraph 9.66 in particular identifies demand for offices, and especially higher quality Grade A accommodation in accessible locations, which is the type of development proposed at Colebrooke House. It would score well against all of the bullet points set out in ENS paragraph 10.29, i.e. excellent accessibility; public transport and parking availability; and it being an area with a critical mass of employment use and amenities which would be attractive to investors.

1.2.8 The development would have excellent strategic transport links to the newly upgraded A21 as well as providing opportunities to create and improve existing pedestrian, cycle and public transport links to North Farm, Tunbridge Wells and Tonbridge. Pedestrian, cycle and emergency access links could also be provided into the land to the west, which is also proposed for development as part of the Local Plan proposals.

1.2.9 In respect of deliverability, the site has no planning history of relevance nor a history of unimplemented permissions, and there are no known impediments to the sites being phased for potential development. There is an excellent opportunity to deliver a high-quality employment development scheme during the plan period.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Policy STR 3: Brownfield Land

1.5.14 We **SUPPORT** this policy which provides in principle support for the effective use of redundant, disused or under-utilised brownfield land and buildings in sustainable locations.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Axiom Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We generally support the Council's overall strategy and do not object to the proposal for the site to be removed from the Green Belt and safeguarded for future employment uses. However, for the reasons set out in these representations, we believe there are strong arguments in favour of allocating the land for development now.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough.

1.5.9 However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.10 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet borough-wide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.11 With the above modification, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 3 Brownfield Land

[TWBC: the full representation attached has been divided into Policies STR/SS1 (PSLP_2019), STR/SS2 (PSLP_2020), Policy ED2 (PSLP_2021), Vision and Strategic Objectives (PSLP_2022), Policies STR1 (PSLP_2023), STR3 (PSLP_2024) and STR4 (PSLP_2025)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Barth-Haas UK Ltd (herein 'BarthHaas') in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to BarthHaas' existing site at Hop Pocket Lane, Paddock Wood.

1.2 The site

1.2.1 The site comprises the Barth Haas UK headquarters and production facility, which is located east of Hop Pocket Lane in Paddock Wood.

1.2.2 Barth Haas UK forms part of the Barth Haas Group – who are the world's largest supplier of hop products and services. It operates across all continents and provides support to its customers and partners throughout the production and sale cycle. This includes research and development, breeding /growing and marketing. As is recognised in PSLP paragraph 5.236, Paddock Wood evolved around the production of hops, and so as a company who continue to trade in hop products, BarthHaas provides an important link with the history of the town, as well as being an important local employer in its own right.

1.2.3 Our client is currently considering options to expand their facilities. This is likely to require relocation, with an alternative location in or close to Paddock Wood preferred, which will then free up the site. The existing premises are dated and no longer suit the needs of modern businesses – especially being an imposing five storey building – it is likely that the site would need to be redeveloped in order to be attractive to future occupiers.

1.2.4 The extent of the site is shown in Figure 1 overleaf.

[TWBC: for Figure 1: Site Location Plan see full representation attached]

1.2.5 The site was promoted for development through a response to the Regulation 18 consultation draft Local Plan.

1.2.6 The site is very close to both the town centre and the railway station, the latter being accessible via a pedestrian access point immediately south of the site.

1.2.7 The site was assessed by the Council as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA). This concluded that the site could be suitable to be redeveloped to accommodate between 40 and 140 dwellings. The SHELAA concludes that the site is suitable, available and deliverable for such a use, and is in a sustainable location. It is therefore suitable to be allocated for this form of development.

1.2.8 Strategic Sites Masterplanning and Infrastructure Main Report paragraph 4.152 also recognises that some other town centre uses (e.g. retail and leisure) may also be appropriate in this location.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;• Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies

1.5.8 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 3: Brownfield Land

1.5.10 We **SUPPORT** this policy which provides in principle support for the effective use of redundant, disused or under-utilised brownfield land and buildings in sustainable locations. The existing BarthHaas site clearly falls into this category.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of BarthHaas in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, and especially the identification of the existing BarthHaas site as being suitable for residential-led development.

1.6.3 However, we object to the wording of Policy ED2 for the reasons set out above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified
It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

CPRE Kent supports the development of previously used land in urban/sustainable locations.

As set out in our comments at STR1 and STR2, use of brownfield land – in sustainable locations – should be optimised.

All development should be built at higher than low suburban development densities of 30dph, so that green field land take is kept to an absolute minimum.

The Brownfield and Urban Topic Paper (January 2021) makes reference to use of an indicative density of 45dph (compared to the 30dph in the SHELAA), which is little more than suburban density levels. If the density of brownfield and urban land is being optimised to what amounts to very low levels of development, the question arises about what happens in the case of green field allocations – and the implications for resultant yields and the provision of affordable housing and support to active travel and public transport.

Research undertaken by CPRE and Place Alliance (A housing design audit for England, 2020) https://www.cpre.org.uk/wp-content/uploads/2020/03/Place-Alliance-A-Housing-Design-Audit-for-England_2020.pdf concludes that housing schemes performed more poorly with distance from the urban core and with reduced density. The additional constraints imposed by stronger pre-existing urban context, were considered to encourage a more sensitive design response. Building at low density is not being done well in terms of design quality. The most successful schemes (as audited in the study of 142 developments) were those at 56dph – which is almost double the national average of 31dph.

The National Design Codes consultation (January 2021) states that density is an essential component of an effective design code. Building at 20-40dph is noted as representing development in outer suburbs; suburban development is pegged at 40-60dph and urban neighbourhoods at 50-120dph.

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 3 Brownfield Land

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies

1.5.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 3: Brownfield Land

1.5.12 We **SUPPORT** this policy which provides in principle support for the effective use of redundant, disused or under-utilised brownfield land and buildings in sustainable locations. The under-utilised parts of the Paddock Wood Garden Centre site clearly fall into this category.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not positively prepared
.	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

MoJ are supportive of the principles of paragraphs 4.68, 4.69, 4.70, 4.71 of the Local Plan, which seek to make as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land that serve to protect the Borough's important heritage, landscape qualities and designations (AONB), and Green Belt.

MoJ welcomes the Council's recognition at paragraph 4.71 that brownfield/PDL sites outside of Limits to Built Development will come forward for development but within the context of land in its ownership at HMP Blantyre House, Horden, Goudhurst does not agree that the future of substantial brownfield/PDL sites located within the countryside but outside of the Greenbelt and High Weald AONB should be left to consideration as part of the Local Plan's windfall allowance.

To reiterate MoJ's response to Policy STR1, and given the importance that is placed on the effective use of brownfield and urban land in the NPPF1, Policy STR1, and Policy STR3, it is strange that the Council is relying on a windfall allowance to deliver a considerable proportion of its development need from such a significant land use category, particularly when there are large previously developed sites such as HMP Blantyre House, Horden, Goudhurst located within the Borough that may become available for alternative development during the plan period.

HMP Blantyre House is in the ownership of the Ministry of Justice and is a substantial property that extends to 11.75 hectares. It has incrementally developed over time from its original use as a Fegan Home for Boys, through its conversion to a Detention Centre for young offenders, before its final conversion to a resettlement prison for long term prisoners, which was designed to prepare men for their eventual release through training, education and lifestyle skills. The Blantyre House estate is therefore much more than just the main residential accommodation; it has a range of subsidiary buildings and infrastructure that extend the developed footprint of the site comprising some 26 buildings, a swimming pool, farm area, and associated hardstanding and car parking, all of which is consistent with the definition of previously developed land contained within Annex 2 of the NPPF2.

Blantyre House officially closed as a resettlement prison in 2019 and had been vacant more than 2 years prior to that. Substantial decommissioning of the site has also been undertaken. The Ministry of Justice is currently considering the property's appropriateness for alternative secure accommodation uses within the same use class (C2a) but the property may become surplus to requirements during the plan period, at which point it will be marketed and sold for alternative uses.

This substantial, previously developed site would, at this point in time enter a new chapter and a new future use would need to be found, otherwise there is a significant risk that it will fall into dereliction, which would disbenefit local residents and harm the local environment. This would be contrary to the Council's policy direction that such land can make a significant contribution to the development needs of the Borough, thereby avoiding unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB, and in doing so deliver overall sustainability benefits.

Leaving the future of such a substantial previously developed land asset to be resolved through the windfall allowance of the Local Plan is not considered to represent positive planning, and is certainly not the most effective strategy for finding the right solution for the re-purposing/re-use/re-development of such an important previously developed site.

It is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement³, as well as a reasonable alternative development site for the settlement of Goudhurst⁴, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the sites accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outcome for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of its future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site-based solutions will be able to be found that will ensure that such an important previously developed property and land asset does not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Providing positive, effective, and clear policy guidance on the future of such substantial previously developed sites approach is clearly aligned and consistent with national policy and advice, specifically paragraph 118. and 79. of the National Planning Policy Framework (NPPF) where planning policies should:

118. (a) encourage multiple benefits from both urban and rural land, including through mixed use schemes and taking opportunities to achieve net environmental gains – such as developments that would enable new habitat creation or improve public access to the countryside; 118. (d) promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained, and available sites could be used more effectively; and 79. (c) re-use redundant or disused buildings and enhance their immediate setting.

Paragraph 119 of the NPPF further supports the case for specific policy guidance for substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB. This paragraph makes it clear that local planning authorities should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites held in public ownership where this can help to bring more land forward

for meeting development needs and/or secure better development outcomes. HMP Blantyre House is currently within public ownership (MoJ) and the landowner, MoJ, has previously made it clear to the Council that the property may become surplus to requirements during the plan period.

For the Local Plan to be positively prepared and justified, specific attention must be paid to substantial previously developed sites such as HMP Blantyre House that lie outside of Limits to Development but are not within the Green Belt or High Weald AONB.

2 land which is or was occupied by a permanent structure, including the curtilage of the developed land and any associated fixed surface infrastructure.³ Table 27 Sustainability Appraisal of the Pre-Submission Local Plan February 2021.⁴ Table 62 and Appendix O Sustainability Appraisal of the Pre-Submission Local Plan February 2021.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

MoJ does not consider that Policy STR3 requires any amendments because it believes that its suggested amendment to Policy STR1 addresses the current Local Plan shortcomings in relation to being positively prepared and justified (as set out in MoJ's response to Policy STR1).

MoJ does however consider that a new paragraph is added to the explanatory text that precedes Policy STR3. This text should make clear the positive contribution that substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB can make to the future development needs of the Borough, which will assist in reducing unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB, and in doing so deliver overall sustainability benefits.

This explanatory text should be linked back to the suggested new criterion 10. of Policy STR1, which for the purposes of comprehensiveness is repeated here:

10. Safeguard substantial previously developed sites that are located in the Countryside but outside of the Green Belt or High Weald AONB for future development, where such development will make an important contribution to meeting the development needs of the Borough over the whole of the Plan period and can demonstrate through a site wide masterplan that there will be no material or adverse effect on the character and amenities of the surrounding area, including an assessment against criteria 3. of Policy STR3 Brownfield Land.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

On the basis that the property may become surplus to requirements during the plan period, and as a responsible public sector landowner⁵, MoJ considers it important that every opportunity is given to exploring all reasonable approaches to achieving the optimum planning outturn for such a large previously developed site in the countryside. Having the ability for MoJ's planning advisors Cushman & Wakefield to participate in the relevant hearing sessions represents positive planning to the MoJ, particularly in working with the Council and Inspector to achieve the most effective strategy and solution for the future re-purposing/re-use/re-development of such an important previously developed site.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Reiterating our representations made in question 5. above, it is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement⁶, as well as a reasonable alternative development site for the settlement of Goudhurst⁷, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the site's accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outturn for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of its future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside the concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site based solutions will be able to be found that will ensure that such important previously developed property and land assets do not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 3 Brownfield Land

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 3

Brownfield Land (Statement)

Where is the real evidence that Brownfield land is being considered across the Borough rather than Greenfield build in PW and Capel?

a-g. These list all the reasons why Brownfield development could be unacceptable but logically they should also apply to the proposed new dwellings in PW. Within the plan they seem not to apply. Why the mismatch in policy in the DLP?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We support the inclusion of a policy on Brownfield development. We consider the policy should be further strengthened to ensure that development of Brownfield land should be completed and built out before Green field sites and certainly before any land is released from the Green Belt.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ No, I do not wish to participate in examination hearing session(s)

We strongly support the provisions of this policy. Together with intensification when Brownfield land is redeveloped, this should be capable of eliminating the loss of Green Belt around RTW both now and in the future and allow the creation of an ever more sustainable community to combat climate change.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

STR 3 Brownfield Land

3.29. TWBC has not exhaustively analysed the availability of Brownfield sites (BFS) in the borough and has ignored potential sites for strategic development in those areas outside GB and AONB.

3.30. The register was reviewed in 2020 but we believe there are more sites that could be utilised. TWBC passively "requested" new BFS but did not proactively seek new BFS, in order to state that its register is up to date – to meet the legal not more than 1 year old basis. No new sites came forward

but Save Capel has sought potential BFS and found the potential for a great deal of housing on sites not on the TWBC BFS register.

3.31. TWBC's latest Brownfield Register contains 38 sites with a total of 805 proposed dwellings.

3.32. Of these, 30 sites have been permissioned. This would yield a total of only 500 housing units from brownfield sites – failing to make a meaningful contribution to the Plan.

3.33. While the brownfield potential in the borough is constrained, the existing Register is far from complete and there is a MUCH larger brownfield potential that needs to be identified and evaluated as a priority BEFORE resorting to building on Green Belt / AONB land.

3.34. TWBC has not proactively undertaken this effort to date.

3.35. Through our own efforts we have identified c. 50 brownfield sites with an incremental housing potential of c. 1,800 dwellings (at 30 dph). This is incremental to the Alternative Sites numbers.

3.36. Increasing housing density from 30 dph to 50 dph which we believe should be the norm – especially for brownfield sites would increase the housing yield for these new brownfield sites from 1,800 to 2,900 dwellings (in addition to the existing 500 dwellings on the register).

3.37. Save Capel's assessment of Brownfield potential is included in 'Alternative sites' - Appendix 8.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

1.0 INTRODUCTION

1.1 These representations are made to the Regulation 19 Pre-Submission consultation for the Emerging Tunbridge Wells Borough Council Local Plan. These representations are made on behalf of Wrenbridge Land Ltd (hereafter 'Wrenbridge') by Barton Willmore LLP. Wrenbridge has a number of land interests across the borough and has successfully delivered a number of high-quality commercial redevelopments within the wider south east region. Wrenbridge specialise in providing high quality commercial developments on brownfield under-utilised land where the existing units are dated, and no longer fit for modern day business purposes.

1.2 These representations are made in relation to the pre-submission consultation outlined by the Council, in particular in regard to the employment uses across the borough and the location of such land uses.

2.0 RESPONSES TO THE REGULATION 19 CONSULTATION

2.1 This section sets out our responses on behalf of Wrenbridge to the current consultation. For brevity relevant sections and policy numbers are referenced accordingly.

Policy STR 3: Brownfield Development

2.4 Section 1 of Policy STR 3 states that brownfield development within the limits of existing settlements shall have “*proper regard to their detailed impacts, notably design*.” Section 2 of Policy STR1 states that brownfield proposals either within, or a short walking distance away from ‘Defined Town and Rural Service Centres’ “*will be expected to make optimal use of land and buildings*.”

2.5 Wrenbridge are supportive of Section 1 of this policy and agree that modern commercial units within existing settlements should be commensurate with the surrounding environment. However, we believe that Section 2 is reductive in only emphasising the optimal use of brownfield land within close proximity to the ‘Defined Town and Rural Service Centres’. The NPPF sets out in paragraph 117 that planning policies should make “*as much use as possible of previously-developed or ‘brownfield’ land*.” To achieve this, it is considered that the principle for the optimisation of brownfield land should instead be supported holistically, subject to all other technical matters being satisfied. The appropriateness of any intensification at a specific brownfield site can then be a matter for the decision taker at planning application stage.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the ‘Southborough High Broom Industrial Area’. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the 'Southborough High Broom Industrial Area'. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We do not consider that the employment land policies are sufficiently flexible to meet with potential future market demand, as outlined in our cover letter.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Local Plan Regulation 19 representations in document order

Policy STR 4 Ensuring Comprehensive Development

[TWBC: the full representation attached has been divided into Policies STR/SS1 (PSLP_2019), STR/SS2 (PSLP_2020), Policy ED2 (PSLP_2021), Vision and Strategic Objectives (PSLP_2022), Policies STR1 (PSLP_2023), STR3 (PSLP_2024) and STR4 (PSLP_2025)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Barth-Haas UK Ltd (herein 'BarthHaas') in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to BarthHaas' existing site at Hop Pocket Lane, Paddock Wood.

1.2 The site

1.2.1 The site comprises the Barth Haas UK headquarters and production facility, which is located east of Hop Pocket Lane in Paddock Wood.

1.2.2 Barth Haas UK forms part of the Barth Haas Group – who are the world's largest supplier of hop products and services. It operates across all continents and provides support to its customers and partners throughout the production and sale cycle. This includes research and development, breeding /growing and marketing. As is recognised in PSLP paragraph 5.236, Paddock Wood evolved around the production of hops, and so as a company who continue to trade in hop products, BarthHaas provides an important link with the history of the town, as well as being an important local employer in its own right.

1.2.3 Our client is currently considering options to expand their facilities. This is likely to require relocation, with an alternative location in or close to Paddock Wood preferred, which will then free up the site. The existing premises are dated and no longer suit the needs of modern businesses – especially being an imposing five storey building – it is likely that the site would need to be redeveloped in order to be attractive to future occupiers.

1.2.4 The extent of the site is shown in Figure 1 overleaf.

[TWBC: for Figure 1: Site Location Plan see full representation attached]

1.2.5 The site was promoted for development through a response to the Regulation 18 consultation draft Local Plan.

1.2.6 The site is very close to both the town centre and the railway station, the latter being accessible via a pedestrian access point immediately south of the site.

1.2.7 The site was assessed by the Council as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA). This concluded that the site could be suitable to be redeveloped to accommodate between 40 and 140 dwellings. The SHELAA concludes that the site is suitable, available and deliverable for such a use, and is in a sustainable location. It is therefore suitable to be allocated for this form of development.

1.2.8 Strategic Sites Masterplanning and Infrastructure Main Report paragraph 4.152 also recognises that some other town centre uses (e.g. retail and leisure) may also be appropriate in this location.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;• Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies

1.5.8 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.5.11 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.5.12 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that whilst initial masterplanning work has already been undertaken by David Lock Associates, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.5.13 The existing BarthHaas site is, in the context of the wider plans for Paddock Wood, a relatively small site, which is identified in the Strategic Sites Masterplanning and Infrastructure Main Report as being suitable for residential, retail and leisure uses.

Given that BarthHaas would not vacate the site until replacement premises have been secured and built, and that the redevelopment of the site may be necessary to help fund any such relocation, it is important that there are no unnecessary planning barriers to securing permission for redevelopment in the short term.

1.5.14 So long as the proposed development remains broadly in line with that set out in the initial Strategic Sites Masterplanning and Infrastructure Main Report, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these;• the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that “the key requirement should be to ensure that a coordinated approach to new developments which have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of BarthHaas in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council’s proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, and especially the identification of the existing BarthHaas site as being suitable for residential-led development.

1.6.3 However, we object to the wording of Policy ED2 for the reasons set out above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 4 Ensuring Comprehensive Development

[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP_2003), Vision and Objectives (PSLP_2005), Policies STR1 (PSLP_2006), STR4 (PSLP_2008), STR9 (PSLP_2015) and Section 6 Development Management Policies (PSLP_2016)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this this land to be suitable for development.

1.2 The site

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The

site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Policy STR 4: Ensuring Comprehensive Development

1.5.37 This policy notes that where development sites are in multiple ownerships, development should be secured by an appropriate means of masterplanning.

1.5.38 Caenwood Estates supports a proportionate approach along these lines. It confirms that a joined-up approach to planning will be pursued at the AL/RTW 5 Caenwood Farm allocation, where Caenwood Estates represents a larger parcel of land, with a smaller 1.18ha (2.9 acre) parcel controlled by Dandara. The land which Caenwood Estates represents enjoys at least two potential access points onto Speldhurst Road. Both parties have been in discussions for some time in relation to these allocations, and indeed a joint submission was made at the Regulation 18 stage.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

Charterhouse comments on specific Pre-submission Local Plan Policies

Policy STR 4 – Ensuring Comprehensive Development

Charterhouse acknowledges and agrees with the councils aim to ensure the development of strategic sites and to ensure the delivery of sites in a comprehensive manner with place making as the overarching aim. We further acknowledge and accept that the multi-developer delivery is a necessity on sites such as Paddock Wood. We would however comment that in order for comprehensive development to be achieved the council must ensure suitable mechanisms are put in place to facilitate collaboration between developer. High quality placemaking is only possible when all landholdings come together, work effectively and cooperatively to deliver the required homes and infrastructure. Charterhouse controls a crucial parcel of land within the proposed [northern] parcel of the strategic allocation and whilst the council's masterplanning work undertaken by David Lock Associates shows the land as being required for green and blue landscaping, the land will be integral to any flood compensation works required to deliver the allocation. Accordingly, the draft policy should be appropriate provision. Further, the Council's work developing the Paddock Wood Town Centre Masterplan shows the Charterhouse land as a key link between the town centre and the proposed homes. Accordingly, it is clear to us that our land is fundamental to achieving sustainable development at Paddock Wood.

Charterhouse supports and is cooperating with the councils masterplanning exercise for Paddock Wood.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	CPRE Kent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR4 Ensuring Comprehensive Development	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

CPRE Kent supports the use of masterplans, provided they are agreed in advance of the relevant planning permissions being sought and are subject to public consultation.

The Council will need to ensure they cover the entirety of the sites that make up the proposed strategic allocations.

In order to optimise the use of land, densities should be specifically referred to in the proposed master plans.

See comments STR1 and STR2.

All development should be built at higher than low suburban development densities of 30dph, so that green field land take is kept to an absolute minimum.

The Brownfield and Urban Topic Paper (January 2021) makes reference to use of an indicative density of 45dph (compared to the 30dph in the SHELAA), which is little more than suburban density levels. If the density of brownfield and urban land is being optimised to what amounts to very low levels of development, the question arises about what happens in the case of green field allocations – and the implications for resultant yields and the provision of affordable housing and support to active travel and public transport.

The CPRE report Space to Breathe see web link (October 2019) demonstrates that where green belt is being developed its providing executive housing, without affordable homes and is failing to make the best use of land – with densities at just 14dph, which is far below that needed to support sustainable communities.

Further research undertaken by CPRE and Place Alliance (A housing design audit for England, 2020) see web link concludes that housing schemes performed more poorly with distance from the urban core and with reduced density. The additional constraints imposed by stronger pre-existing urban context, were considered to encourage a more sensitive design response. Building at low density and on green fields is not being done well in terms of design quality. The most successful schemes (as audited in the study of 142 developments) were those at 56dph – which is almost double the national average of 31dph.

The National Design Codes consultation (January 2021) states that density is an essential component of an effective design code. Building at 20-40dph is noted as representing development in outer suburbs; suburban development is pegged at 40-60dph and urban neighbourhoods at 50-120dph.

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Future Notifications

[TWBC: this comment has also been inputted against Policy STR 2, please see Comment Number PSLP_2066. For further comments by Crest Nicholson, please see Comment Numbers PSLP_2064, PSLP_2066-2074, and PSLP_2077]

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

Policy STR2: Place Shaping and Design

Policy STR4: Ensuring Comprehensive Development

“Not positively prepared” or “justified”

4.14 Crest commends TWBC for the amendments made to the Reg 18 version of the Plan to formulate this Reg 19 Plan, particularly in respect to the policies regarding development at Paddock Wood, as it significantly improves the ability to understand the Plan and policies. That said, however, the Local Plan is still long, as are many of the policies, and could be further simplified and edited to make it easier to read, navigate and comprehend.

4.15 Crest supports the overall principles of these policies, but considers them to be unsound, as the policy wording could be more positively prepared and justified.

4.16 The Plan should be read as a whole; therefore, it should be as concise as possible with a minimal amount of repetition. This will also remove any discrepancies between slight deviations in wording of different policies.

4.17 As an example, the second sentence of the first paragraph of **Policy STR2** states,

“...the Council will expect applicants to engage in early and effective discussions with the community and other relevant stakeholders.”

4.18 **Policy STR 4** Ensuring Comprehensive Development states at paragraph 5,

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents”.

4.19 Paragraph 9 of **Policy EN1** Sustainable Development states,

“New development should be informed by effective engagement between applicants, local communities, neighbours of sites, local planning authorities, infrastructure providers, and other interested parties throughout the planning process. Applications that demonstrate early, proactive, and effective engagement, and that the views expressed in that engagement have been properly considered, will be looked on more favourably than those that cannot”.

4.20 These three statements fundamentally say the same thing but in slightly different ways. There are also other repetitions and overlaps in these policies and in others.

4.21 In this regard, Policies STR2, STR4 and EN1 should be reviewed, and merged if necessary, resulting in a single overarching comprehensive policy that looks like Policy EN1.

4.22 It is further suggested that a general review of the Plan is undertaken to minimise repetition, simplify it further and make it consistent throughout. This will significantly reduce its size and make it easier to read, comprehend and utilise for Development Management purposes.

4.23 As shown above, the Council is keen to encourage developers to engage well as they progress the allocations to applications. Crest acknowledges and accepts engagement as good planning practice and as a fundamental tenet of garden settlement principles. However, this element of good planning practice has to start early and be undertaken throughout the planning process, including plan-making. This way, successful new communities are planned and delivered.

4.24 Any policy addressing the issue of engagement should, therefore, also apply to the Council itself for consistency, transparency and to provide certainty and to ensure deliverability. For example, to date, the Council has not engaged in 'early and effective discussions' with the developers of the Paddock Wood strategic urban expansion in the preparation of the masterplan/framework document. Consultation is not the same as engagement. These documents should be co-produced with the developers, alongside engagement with the other relevant stakeholders. By doing this a more practical approach could be taken, whereby for example, landownership is taken into account to provide certainty and to ensure deliverability.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Modification

4.25 **Policies STR2, STR4 and EN1** should be reviewed, and merged if necessary, resulting in a single overarching comprehensive policy that looks like **Policy EN1**.

4.26 Any policy Modification addressing the issue of engagement should also apply to the Council itself for consistency, transparency and to provide certainty and to ensure deliverability.

4.27 It is further suggested that a general review of the Plan is undertaken to minimise repetition, simplify it further and make it consistent throughout. This will significantly reduce its size and make it easier to read, comprehend and utilise for Development Management purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council's housing delivery. As such, it is important that Crest is represented in all the relevant EIP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 4 Ensuring Comprehensive Development

[TWBC: the full representation attached has been divided into Policy STR/SS1 (PSLP_2061), Vision and Strategic Objectives (PSLP_2062), Policy STR1 (PSLP_2063), Policy STR4 (PSLP_2065) and Development Management Policies (PSLP_2075)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies

1.5.9 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.5.11 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.5.12 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that the initial masterplanning work already undertaken by David Lock Associates, to which we have also contributed, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.5.13 The proposed employment development at Swatlands Farm is in line with the masterplanning work which has been carried out to date. Given the importance of ensuring that employment proposals come forward at an early stage, to increase the prospects of expanded employment opportunities being available to existing and future residents as soon as possible, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these;• the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that “the key requirement should be to ensure that a coordinated approach to new developments which have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Agent's Name and Organisation (if applicable) Turnberry

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 4 Ensuring Comprehensive Development

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR4 Ensuring Comprehensive Development

We support the principle of this policy, which requires masterplans for the urban expansion of Paddock Wood and Tudeley Village. Despite this in principle support for masterplans, we would question the need for a detailed SPD for Tudeley Village given that the land is entirely within the ownership of the Hadlow Estate, ensuring that development will come forward comprehensively and following significant public consultation in accordance with a masterplan.

There is an ability to bring forward and adopt a masterplan for the site without the requirement to undertake the full SPD process. This would be consistent with paragraph 126 of the NPPF which states, in relation to design guides and SPDs, that their level of detail and degree of prescription should be tailored to the circumstances in each place and should allow a suitable degree of variety where this would be justified.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 3 Brownfield Land

[TWBC: the full representation attached has been divided between Policy STR/PW1 (PSLP_1988), Policy STR/SS1 (PSLP_1989), Vision and Objectives ((PSLP_1990), Policies STR1 (PSLP_1991), STR3 (PSLP_1992), STR4 (PSLP_1993), EN1 (PSLP_1994), EN3 (PSLP_1995) and ED2 (PSLP_1996)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies

1.5.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.5.13 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.5.14 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that the initial masterplanning work already undertaken by David Lock Associates, to which we have also contributed, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.5.15 The Paddock Wood Garden Centre site is a relatively small site, which is proposed in the Strategic Sites Masterplanning and Infrastructure Main Report for additional retail and/or employment uses. Given that the site is already in garden centre retail use, and that the proposals for the site are effectively to make best use of existing brownfield but open land within the site, there is no planning reason why such development should be prevented from coming forward in the short term.

1.5.16 So long as the proposed development remains broadly in line with that set out in the initial Strategic Sites Masterplanning and Infrastructure Main Report, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these; • the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that “the key requirement should be to ensure that a coordinated approach to new developments which have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Provision and Delivery of County Council Community Services and Facilities

Paragraph 4.85

On large sites with multiple developers (perhaps where land may be in more than one ownership), the County Council would support the use of land equalisation agreements to avoid dispute and delays on the development of land for education or other community infrastructure requirements which could affect the delivery of sustainable residential growth. With the use of equalisation agreements, community infrastructure can be apportioned fairly and agreed early on in the process.

The County Council as key infrastructure provider would welcome continued engagement from the early stages of master-planning to ensure that infrastructure requirements are integrated within the design of new developments from the outset.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships, this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must **make** proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery **must be** secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” “The council strongly encourages” is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies

1.4.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.4.12 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.4.13 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that the initial masterplanning work already undertaken by David Lock Associates, to which we have also contributed, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.4.14 The proposed employment development at Land East of Transfesa is in line with the masterplanning work which has been carried out to date. Given the importance of ensuring that employment proposals come forward at an early stage, to increase the prospects of expanded employment opportunities being available to existing and future residents as soon as possible, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these;
- the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that "the key requirement should be to ensure that a coordinated approach to new developments which

have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 4 Ensuring Comprehensive Development

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships, this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must make proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery must be secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” “The council strongly encourages” is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the

preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I write with reference to the above. As you will be aware, I act for both Redrow Homes Limited and Persimmon Homes South East who have various interests in Tunbridge Wells, including those east and south east of Paddock Wood (SHLAA sites '20', '374', '371', '344' and '376'), (LPA sites PW 1_7, 1_9, 1_11 and 1_12), (parcels 7, 9, 11 and 12).

Whilst, having regard to the above, Redrow and Persimmon both support the Reg 19 Plan in principle, especially the proposed allocation of the land at Paddock Wood (policies STR/SS1 and STR/PW1), they do have specific concerns about certain aspects of policies STR/SS1 and STR/PW1 and the evidence base underpinning the plan.

In saying this we acknowledge that the Strategic Sites Topic Paper (March 2021) provides a detailed critique of the rationale behind the proposed allocation of the land at Paddock Wood and Capel, with section 8 explaining how the development looks to address the requirements of para 72 of the NPPF;

and the plan and its associated evidence as a whole looks to demonstrate why the proposed allocation is justified, is deliverable and will be effective in meeting the requirements of the plan and national government guidance.

8 Strategic Policies

Policy STR4

8.2 Whilst not objecting in principle to policy STR4, we believe, for the reason set out in our response to policy STR/SS 1 that any SPD has, in the context of the development at Paddock Wood and Tudeley, to be agreed concurrently with any future applications so as to ensure there are no unnecessary delays in the delivery of these sites. This is, as set out below, implicit within para 5.93 of the Reg 19 Plan and para 8.19 of the Strategic Sites Topic Paper, and should we believe be acknowledged within policy STR4/ the preamble to this policy. This would ensure a positively prepared and effective plan, consistent with national government guidance.

Whilst many of our comments on the strategic and development management policies are, we believe, capable of resolution by simple rewording/ a review of the evidence base so as to justify the position being advocated, we are concerned that the extent of repetition between policies is leading to misrepresentation; and would recommend that the policy approach is reviewed with a view to being more succinct and direct in what it is seeking to achieve. This will we believe assist everyone concerned in the development process, and is something we, as inducted above, would be happy to talk to the borough council about, especially in terms of compiling a Statement of Common Ground to address the policy requirements for the land east of Paddock Wood.

To conclude, whilst we support the Reg 19 Plan and the proposed allocation of the land at Paddock Wood for strategic scale expansion, we do have a number of concerns about the overall housing supply and trajectory, the rationale behind the assessment of the reasonable alternatives assessed in the Sustainability Appraisal, and alternatives assessed; the consistency in the infrastructure requirements being sought from the development of the land at Paddock Wood in the IDP, VA and Strategic Sites Masterplanning and Infrastructure Study; the actual requirements for the land east of Paddock Wood – in terms of what, when and how much; some of the assumptions used in the VA; the wording of policies STR/SS1, STR/PW1 and justification for some of the criteria contained therein; and the wording of policies EN1, EN2, EN3, EN9, EN13, H3, H6, and H9 and justification for some of the criteria contained therein.

We look forward to talking to you further about the above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Redrow and Persimmon have an interest in land east of Paddock Wood – part of STR/SS1, one of the main strategic allocations in the Plan. They are also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. They therefore wish me to participate in the examination

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We strongly support the masterplanning approach in this policy as against the unfortunately failed policy of "Areas of Change" under the present Local Plan. We also strongly support the use of Supplementary Planning Documents in relation to sites of any importance in Royal Tunbridge Wells and in the Borough as a whole. We also welcome the opportunity for greater participation as stakeholders, for example in the development of the proposed Town Centre Area Plan.

The greater use of compulsory purchase powers, where appropriate, is also supported in the context of a masterplanning approach to major developments in RTW and elsewhere in the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: see supporting documents attached, including composite of all representations].

Ensuring Comprehensive Development

This policy is generally supported but there are concerns that the production of Supplementary Planning Documents, although essential to the proper planning of those major new development areas, will inevitably delay the process of bringing the sites forward and delivering housing from them. Similarly, the prospect of the need for Compulsory Purchase Orders and the associated administrative and legal processes give rise to significant concerns about potential delay. This puts the Council's housing trajectory at serious risk and it must properly reflect the potential delays associated with the lawful preparation, consultation and adoption of SPDs and the drawing up and execution of CPOs. These potential delays need to be realistically factored into any housing delivery trajectory and this heightens the need for a wider range of housing sites to be identified to provide a different type, scale and location of sites, suitable for development by small and medium builders rather than national housebuilders and capable of early delivery to maintain a five year supply of housing, particularly in the early part of the plan period where the "transformational" sites will be within a protracted lead in period.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

STR 4 Ensuring Comprehensive Development

3.38. The garden settlement at Tudeley can never be one settlement as it is divided by a railway line that has very narrow, weak crossings. Putting in larger crossings at frequent points across the railway may be possible but it will not tie the two halves of the settlement together enough to make it one settlement, so it will not satisfy garden settlement principles.

3.39. A key strategic item underpinning the comprehensive development and therefore sustainability of the development is the proposed station at Tudeley, however this has been dismissed by Network Rail as unviable both financially and operationally.

3.40. Tudeley garden settlement constitutes a very large portion of the apparent housing need and the delivery of this undertaking is an extremely complex development transforming a rural farming area with no real infrastructure, into an urban settlement. TWBC are entrusting control and development of this pivotal part of their Local Plan to the inexperienced landowner to deliver who is relying on a collective of experts with no common goal to deliver this vanity project. For the landowner to claim alignment and parity with The Prince's Trust housing developments at locations such as Poundbury in Dorset (still not completed after some 28 years) is arrogant in the extreme.

3.41. Masterplanning of Tudeley is lacking in any detail and what is shown only relates to the proposed settlement and does not dovetail with the overall Capel scheme, with disconnected masterplanning by David Lock Associates ("DLA").

3.42. Sites need to make economic sense for housing developers to consider optioning. For any major housing developer who is capable of delivering Tudeley as proposed, the sheer amount of cost that will be consumed by the infrastructure requirements means they will struggle to breakeven or make a profit on what is, for them, a relatively small number of overall units. Securing developers who are willing to risk this maybe a challenge in itself.

3.43. TWBC has not considered the cumulative impact with the local plans of neighbouring LPAs, where development is proposed at Laddingford, adjacent to East Capel (MBC) and the effect of cumulative development in the Tonbridge area (TMBC). This has huge implications on transport & infrastructure, in particular, and demonstrates that this plan is not "positively prepared".

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 4 Ensuring Comprehensive Development

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The guiding principles of Policy STR4, setting out the importance of adopting a comprehensive approach to the delivery of all development and that the allocated sites are delivered in complete accordance with policy provisions are sound: these are, after all, some of the founding principles of the planning system. However, as currently drafted, the policy wording is vague, imprecise and lacks the level of commitment from Tunbridge Wells Borough Council (TWBC) that is required to ensure that sites are brought forward in their entirety. This is completely envisaged by TWBC and, in the case of the large strategic sites, the Council's appointed/integrated master-planning/professional/technical consultant team. In this regard, Policy STR4 requires amendment to ensure compliance.

The National Planning Policy Framework (NPPF) establishes in Part d of Paragraph 16 that policies must be clearly written and unambiguous. Part f of the same paragraph requires that policies should serve a clear purpose. The policy as presently drafted does not fully meet these tests.

The draft wording of the policy states that where sites have several land use elements or are in multiple ownerships, comprehensive development will be secured by "an appropriate means of master planning". In broad terms this is supported, but the policy must go further to ensure that the masterplan vision is delivered in its entirety as envisaged/planned for particularly in circumstances where there are multiple or fractured land-owning interests.

Whilst a masterplan will generate the vision and guiding principles for the development of the site, the 'nuts and bolts' of its practical delivery must be supported and underpinned by a clear policy requirement that states:

- 1) TWBC will not support fractured or piecemeal forms of development aligned with land ownership;
- 2) That allocated sites must come forward in their entirety in fulfilment of the masterplan; and
- 3) That TWBC will require equalisation agreements between the various landowning/developer interests to ensure that the masterplan vision(s) are delivered comprehensively.

As currently drafted, these elements are lacking in the draft policy – it is considered ambiguous and therefore unsound.

The supporting text to the policy explains at Paragraph 4.80 that “*Different means of ensuring a comprehensive approach exist and will be case specific*”. Hence, the policy sets out the guiding principles to determine what would be most appropriate. We accept the sentiment but are concerned that the wording is not sufficiently clear and robust to ensure and support comprehensive project delivery.

The Strategic Sites Masterplanning and Infrastructure Study (February 2021), prepared by independent consultants David Lock Associates (DLA), supported by a wide ranging body of appointed professionals covering, inter alia, highway assessment, landscape and visual impact requirements, ecology, flooding and water management, has quite rightly an entire chapter dedicated solely to delivery (Chapter 7). After all, delivery is the fundamental premise of realising the development/housing/infrastructure needs of the Borough. Chapter 7 highlights that “*instances may arise where one developer is meeting the full cost of infrastructure shared by all, or one is disproportionately contributing in a different way such as by providing land*”. It then goes on to say that “*Developers should be invited to form their own collaboration agreement or alternative mechanism for the equal sharing of costs. Should this not occur, **TWBC should facilitate this process***”. The latter is key, as only with the direct and meaningful involvement of the Planning Authority can true parity and fairness occur to support the realisation of TWBC’s land-use vision.

TWBC’s own professional advisors have, therefore, clearly and correctly recommended that the TWBC must step in if it is becoming clear that an equalisation agreement is unachievable. Furthermore, they point out that this should be actioned in a timely fashion so that the delivery of the development is not delayed unnecessarily. Without the comprehensive realisation of the strategic sites as planned through collaborative working, we would question the validity and public benefit of adopting a master planning approach. This is, in our view, the correct approach, but it is reliant on being met in full.

It is therefore important that this land equalisation agreement be enshrined into the policy wording now to avoid unnecessary project suspension. The present wording contained within the draft policy (*It is highly likely the delivery of the development will require land equalisation agreements*) is weak and lacks clarity. The correct vehicle to drive through the development of Paddock Wood is through an equalisation agreement and it is critical that TWBC take charge of this process absent of private interests/agreements between the affected stakeholders. Moreover, the policy should include a clear statement that the Council will not support applications/schemes that do not meet and provide the full and comprehensive realisation of the strategic master planned sites.

It is inappropriate to defer this issue to a later stage in the development process (i.e. in a Supplementary Planning Document “SPD”). SPDs fall outside the examination process and are not, therefore, subject to full public scrutiny and the rigours of the examination. In view of this there is a real danger that in the absence of a policy requirement to fully address the land equalisation agreements and comprehensive delivery, this fundamental issue will be overlooked. Within this there is the potential and opportunity for the larger landowning and developer communities to work to their own agendas to the detriment of the wider comprehensive master planning approach.

We would respectfully ask TWBC to note that we have approached Crest Nicholson historically, and again very recently to explore collaborative working possibilities: linking in with Site DPC19. Regrettably, given the emphasis and need for comprehensiveness, these approaches have been rejected. So, despite our endeavours, at present there is no collaboration or agreement between landowners. Without TWBC’s support, there are concerns that our client’s land (and other smaller land holding interests) that form a legitimate and important part of the integrated masterplan vision will be marginalised to the detriment of the overall planned vision and interests of acknowledged importance including, amenity provision and open space, blue/green infrastructure, connectivity, ecology, bio diversity: all key and central planks of the masterplan/policy vision of the Paddock Wood expansion. Delivery is central to the soundness of the plan and it is clear that land equalisation is fundamental to this.

Put simply, this is a strategic matter which must be addressed now at the front end of the Local Plan and master planning processes. This will ensure that the planning objectives of collaboration and a comprehensive approach to development, elements that help contribute to place shaping and a good quality environment, are met in full. Failure to attend to this important component now will render the plan undeliverable and therefore unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should adhere to their own independent consultant's advice (DLA) and commit to facilitating the process of land equalisation agreements in the absence of agreement between the affected stakeholders. The second paragraph to Policy STR4 should be replaced with the following:

"Where sites have several land use elements or are in multiple ownerships, Developers should be invited to form their own collaboration agreement or alternative mechanism for the equal sharing of costs. Should this not occur, TWBC will facilitate this process". And,

"The Council will not support piecemeal proposals that fall outside of or contradict the provisions of the policy and adopted masterplans and/or the principles of comprehensive development".

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to ensure that the Plan is found sound.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1125, 1129, 1132 KLV for Mr and Mrs Whetstone SI Representations redacted.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Yalding Parish Council
Question 2	

Agent's Name and Organisation (if applicable) Graham Simpkin Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 4 Ensuring Comprehensive Development

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 6, STR/SS 1, STR/PW 1 - see Comment Numbers PSLP_616, PSLP_622, PSLP_623, PSLP_624, PSLP_625]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Jacqui Avery
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: see also further comments on individual sections and policies - PSLP_2269 and 2272-2279. The whole representation form (personal details redacted) has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We welcome the inclusion of plans to allocate land to provide a new medical centre at Showfields Road. The surgery at Rowan Tree closed in January 2020. The policy seeks to "ensure adequate healthcare infrastructure is provided as part of new development". In view of the closure of the Rowan Tree surgery this appears to be no more than aspiration. We do not consider the policy is likely to be effective or meet residents' reasonable expectations, nor are there any clear, objective measures that would enable residents to hold TWBC to account. This policy should be revised to explain what "adequate" means by reference to availability of services within a distance that would also meet the active travel policy objective (i.e. walking distance).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR1, STR5, STR6, STR, STR8, STR10, PSTR/BM1, AL/BM1, AL/BM2, EN1, EN19, OSSR1, OSSR2.

[TWBC: relevant parts of this representation have been duplicated against the above policies: see PSLP_1775-1786 inclusive]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The language is not sufficiently robust in some of the policies and introduces ambiguity. Small rural parishes have very different requirements to the larger settlements, having less housing allocations, limited facilities and poor public transport. Consequently some policies have no relevance in rural areas and include no provision of additional facilities. Although the parish has a small housing allocation, the quality of life will be significantly affected by development in Paddock Wood/Capel/Horsmonden/Pembury. There should be some provision for the mitigation of the effects within other parts of the borough of increased traffic on safety, noise and air quality.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Pre-submission Comments from Brenchley and Matfield Parish C council

TWBC Pre-Submission Local Plan

STR5: Infrastructure and Connectivity

It is felt there are insufficient plans on infrastructure in the parish and surrounding area. This matter has not been addressed and the language used is ambiguous. There is a lack of information about the funding of infrastructure and its timing in relation to development.

The borough is in a high stress water area and there is concern about the adequacy of the water supply for additional housing and whether planning policies reduce consumption and conserve grey water sufficiently.

The OSSR policies do not meet the needs of small rural communities like Brenchley and Matfield Parish where the size of developments falls below the threshold for the provision of facilities or funding contributions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Parish Council supports the overall negative scores of the sites in Brenchley and Matfield that were put forward in the Call for Sites. There are very few positive scores for any of the sites and a significant number of high negative scores. Many of the sites involve the loss of high-grade agricultural land and would have a negative impact on biodiversity, landscape and heritage. Sustainability is also a factor for many of the sites, which lack a proximity to facilities and public transport.

The villages of Brenchley and Matfield have limited sustainability, with poor facilities in Matfield but a reasonable bus service to Paddock Wood and Tunbridge Wells. Brenchley has more facilities but three bus services to Paddock Wood on only two days during the week. There are no bus services in the evenings that would allow commuters to use public transport.

If you would like to attach a file in support of your comments, please upload it here. [B&M comments Local Plan.docx](#)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity
Paragraph Number: 6.585

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Open Space, Sport and Recreation Study referred to completely fails to consider the facilities available to or the needs of equestrians

The Sport and Recreation section of the policy does not in fact meet the needs of all communities across the borough since it fails to consider the needs of, or make any provision for, equestrians, either within expanding existing communities or within the new communities to be created.

As the majority of horse riders are women and girls, this arguably fails to comply with the Equality duty.

Please see also our general comments.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The policies OSSR1 and OSSR2 referred to in this policy should be amended to include equestrian facilities, i.e. riding schools, livery stables, public bridleways, restricted byways and open spaces with equestrian access.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the Plan's failure to provide for equestrian sport and recreation

Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

Charterhouse comments on specific Pre-submission Local Plan Policies

Policy STR 5 – Infrastructure and Connectivity

Charterhouse supports policy STR 5.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	

Respondent's Name and/or Organisation	Mr Adrian Cory
---------------------------------------	----------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity
Paragraphs 4.88-4.96

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Plan continues to fail to address the need to ensure that developments are only allowed to proceed when the planning authority is satisfied that associated services and utilities are adequate to support them. For example, there is reference to the need for additional capacity at water waste treatment works (page 53 and STR5) and a claim that regulatory bodies "have been consulted" (page 55) but developers are merely required to collaborate with service providers without sanction for non-delivery. Our experience with Southern Water gives no confidence that the statutory providers will either co-operate effectively, or comply with any undertaking once given.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It should be made clear that planning permission will not be given in the absence of effective and binding undertakings relating to the provision of the necessary services and utilities, and that occupation of buildings will not be permitted until those services and utilities are in place.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Cranbrook & Sissinghurst Neighbourhood Development Plan

Response to Tunbridge Wells Borough Council Pre-Submission Draft Local Plan – 4th June 2021

Section 4: The Development Strategy and Strategic Policies

Policy STR 5: Infrastructure and Connectivity

Would benefit from a better understanding and articulation of Social Infrastructure, both tangible and intangible, its value and the contribution it makes to social, environmental and economic sustainability.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you would like to attach a file in support of your comments, please upload it here. [PSLP_1571-1623\(not inclusive\)_CRS NDP Steering Group_Representation.pdf](#)

Question 1

Respondent's Name and/or Organisation

Crest Nicholson

Question 2

Agent's Name and Organisation (if applicable)

Barton Willmore

Question 3

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: For further comments by Crest Nicholson, please see Comment Numbers PSLP_2064, PSLP_2066-2074, and PSLP_2077]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

Policy STR5: Infrastructure and Connectivity

“Not justified”

4.28 Crest supports the overall principles of this policy, but considers the policy to be unsound, as the policy wording needs to be justified.

4.29 In order to simplify and minimise repetition, the supporting text of Policy STR5 should set out which authority is responsible for securing which infrastructure contribution. For example, it should state that Kent County Council is responsible for securing contributions for towards primary and secondary education, highways and transportation, adult social care, sustainable urban drainage, strategic waste services, libraries, adult education and youth and community facilities, and then what TWBC will seek to secure, subject to viability. The supporting text should also set out the relevant policies that need to be considered and complied with. Policy STR5 could then be heavily edited to minimise repetition and make the Plan easier to read, navigate and comprehend.

4.30 The Plan should be read as a whole; therefore, it should be as concise as possible with a minimal amount of repetition. This will also remove any discrepancies between slight deviations in wording of different policies.

4.31 Paragraph 6 of Policy STR5 states,

“For the identified strategic sites where the provision of a range of significant infrastructure projects are required to mitigate the impact of development to particular areas, the delivery of this will be agreed through a masterplanning process; ”

4.32 There are numerous other references to the provision of infrastructure in the Plan, but these references are not consistent. For example, Policy EN3 Climate Change Mitigation and Adaption (paragraph at the top of page 335) deals with the issue of viability stating,

“There may be exceptional circumstances where compliance with this policy would make the development not viable. In each case these circumstances would need to be fully demonstrated to warrant a departure from compliance with this policy”

4.33 Similar to the representations made to Policies STR2 and STR4, these references need to be reviewed to minimise repetition and make it consistent throughout.

4.34 If required to be repeated within different contexts, however, any reference to the provision of infrastructure that is as a result of development needs to be consistent and should be subject to viability and fairly and reasonably related in scale and kind to the development. As such, a similar paragraph to that in Policy EN3 should be added at the end of Policy STR5 with the addition that any infrastructure should be fairly and reasonably related in scale and kind to the development.

4.35 Paragraph 34 of the NPPF on ‘Development contributions’ makes it clear that:

“Plans should set out the contributions expected from development. This should include setting out the levels and types of affordable housing provision required, along with other infrastructure (such as that needed for education, health, transport, flood and water management, green and digital infrastructure). Such policies should not undermine the deliverability of the plan.”

4.36 The Council's position on CIL/future Infrastructure Levy needs to be set out in the Local Plan to make it clear what developers will be expected to pay within the local plan period, to give certainty and

to set out how the Council will avoid 'double-dipping'. This is particularly important for the strategic sites. The messaging in the Council's evidence is not particularly consistent or clear. For example, The LDS (February 2021) states:

"No decision has been made on this matter, with the focus being on taking the Local Plan through to its next stage...CIL would not replace S106 contributions entirely, but these would need to be related to the specific circumstances of the development site. The Council would be responsible for setting the charge, collecting the levy, and distributing a proportion to other organisations that provide community infrastructure, such as Kent County Council and town and parish councils or other appropriate bodies.

If a decision is made not to adopt, and in the intervening period, funding for infrastructure will continue to be secured through the use of Section 106 Agreements."

4.37 But in regard to the strategic sites, paragraph 2.4.19 of the Stage 2 Viability Assessment Report (February 2021) states,

"In the case of the specific approach taken to the Paddock Wood and Tudeley appraisals, no CIL / planning obligations contingency / tariff charge has been assumed as specific cost allowances (current stage estimates as per the DLA master planning work) for infrastructure and s.106 works / contributions costs are included in the development appraisal modelling."

4.38 The Local Plan must make it clear that if the Council decides to introduce CIL within the Plan period, it will not be applied to the strategic sites/they will be zero-rated. If alternative methods of infrastructure delivery are introduced in the Planning Reform Bill and TWBC implements any new method, this zero-rated approach must be protected and reflected within the new methodology to ensure deliverability of development.

4.39 In regard to the paragraph entitled 'Health', developer funding for new healthcare facilities can be requested where they are evidenced as being required to support population growth arising from new developments. TWBC therefore needs to evidence the need. As such, the paragraph entitled 'Health' should refer to the evidence of need and be modified to read, "Subject to evidence of need, ensure that essential healthcare infrastructure is provided as part of new development..."

4.40 The paragraph entitled 'Water' of Policy STR5 does not contain policy but is merely a statement that the water authorities have been consulted, water will be provided, and close liaison is required regarding flood, but as the paragraph says, this is covered by Policies EN25 and EN26. As a result, this paragraph should be deleted from Policy STR5 and inserted as supporting text, if considered necessary.

4.41 The paragraph entitled 'Utilities and digital infrastructure utilities' should recognise that provision of digital infrastructure and other utilities is subject to utility providers providing the requisite infrastructure up to the site boundary; hence, that paragraph should read,

*"Ensure that the provision of digital infrastructure and other utilities is supported, including that provided strategically, and for developers **and providers** to ensure that infrastructure is provided..."*

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Modification

4.42 Paragraph 6 of Policy STR5 should be modified to read,

*“For the identified strategic sites where the provision of a range **of fairly and reasonably related** significant infrastructure projects are required to mitigate the impact of development to particular areas, the delivery of this will be agreed through a masterplanning process;”*

4.43 At the end of modified STR5,

*“**There may be exceptional circumstances where compliance with this policy would make the development not viable. In each case these circumstances would need to be fully demonstrated to warrant a departure from compliance with this policy.**”*

4.44 The Local Plan should include a statement in regard to the Council's position on CIL. It must make it clear that if the Council decides to introduce CIL within the Plan period, it will not be applied to the strategic sites/they will be zero-rated. If alternative methods of infrastructure delivery are introduced in the Planning Reform Bill and TWBC implements any new method, this zero-rated approach must be protected and reflected within the new methodology to ensure deliverability of development.

4.45 The paragraph entitled 'Health' should refer to the evidence of need and be modified to read, *“**Subject to evidence of need**, ensure that essential healthcare infrastructure is provided as part of new development ...”*

4.46 The paragraph entitled 'Water' should be deleted from Policy STR5 and inserted as supporting text, if considered necessary.

4.47 The paragraph entitled 'Utilities and digital infrastructure utilities' should recognise that provision of digital infrastructure and other utilities is subject to utility providers providing the requisite infrastructure up to the site boundary; hence, that paragraph should read,

*“Ensure that the provision of digital infrastructure and other utilities is supported, including that provided strategically, and for developers **and providers** to ensure that infrastructure is provided...”*

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council's housing delivery. As such, it is important that Crest is represented in all the relevant EIP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.

2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
	Policy STR 5 Infrastructure and Connectivity
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Infrastructure and Connectivity

We suggest to enhance wording for examples within “**Green:** network of natural and semi-natural features, including, for example, street trees, green roofs, parks, ponds, rivers, woodlands.” There are wet woodlands within the Tunbridge Wells district, suggest to add ‘all types of woodland’.

[TWBC: For general response please see Comment Number PSLP_462]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 5 Infrastructure and Connectivity	
Page 54 Policy STR 5 (5.)	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 5 clearly states "New residential and commercial development will be supported if sufficient infrastructure capacity is **either available, or can be provided in time to serve the development**," The PSLP fails to support this policy as most of the infrastructure necessary to support the proposed developments will not be started until a number of years after significant numbers of dwellings have been occupied. No up front funding is being made available either and so the PSLP is Unsound.

Similarly, as the infrastructure relies upon two major developments being constructed in tandem to release funding for the infrastructure, there is no guarantee that such funding will be available as planning application delays on one site alone can seriously impact ALL infrastructure. This has not been considered in the PSLP.

Therefore the PSLP is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

One solution is to use the public purse to allocate funding for ALL major highways infrastructure prior to any developments commencing, but this has a critical point of failure in that it will only require a single developer to delay start of works or withdraw their application and the whole plan is liable to fail or only be partly built. This is a serious risk that is not considered in the PSLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted. It is important that proper debate takes place.

Future Notifications

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Tunbridge Wells MP, Greg Clark, has said "Infrastructure First"; it therefore seemed reasonable to expect the draft Plan to contain a coherent timeline on the creation of infrastructure that will assure us that houses will be built only after the necessary infrastructure is in place. In fact, it contains no evidence of a deliverable infrastructure plan for the proposed Tudeley Village. The foundations and assumptions on which the approach to infrastructure is laid out in the Local Plan are fragile and in some cases farcical.

The speed at which the proposal for the Tudeley Village has been prepared means that sound infrastructure delivery planning cannot be demonstrated. The means of delivery, and timescale for delivery of important infrastructure items has not been carefully identified. A wide range of infrastructure is essential to the delivery of sustainable development, and habitat network (green infrastructure) improvements and community facilities must be carefully included in the delivery plans. It is essential that the timing of infrastructure provision must complement the delivery of policies and this does not appear to be the case. The plan is not effective.

A detailed description of the inadequacy of TWBC's approach to infrastructure is in section 4.6 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR5 Infrastructure and Connectivity

We support this policy as proposed, however request for clarity that the text or supporting text be amended to clearly state that Capel/ Paddock Wood will be exempt from CIL.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response by the Home Builders Federation to the consultation on the Tunbridge Wells Local Plan

1. Thank you for consulting the Home Builders Federation (HBF) on the Pre-Submission Local Plan. The HBF is the principal representative body of the housebuilding industry in England and Wales and our representations reflect the views of discussions with our membership of national and multinational corporations through to regional developers and small local housebuilders. Our members account for over 80% of all new housing built in England and Wales in any one year.

STR 5 – Infrastructure and connectivity

This policy is unsound as it is not consistent with national policy.

15. In addressing the impact of development on infrastructure it is important to ensure that all contributions are, as set out in the NPPF and paragraph 122 of the CIL Regulations 2010, necessary, directly related to the development and fairly and reasonably related in scale and kind to the development. However, regardless of the impact it would appear from part 1 of this policy that a significant contribution will be required. Such a statement is not consistent to the more proportionate approach set out in both legislation and policy.

Conclusion

35. At present we do not consider the plan to be sound, as measured against the tests of soundness set out in paragraph 35 of the NPPF, in the following key areas:

- Insufficient housing supply to ensure the necessary flexibility and improvements in the delivery of affordable housing;
- Requirement for all homes to be built to the higher option technical standard on accessibility have not been sufficiently justified;
- Sustainable design standards are not consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendation

16. That the word “significant” is removed from part 1 of this policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

36. As such I can confirm that I wish to participate in the relevant hearing sessions in order to full represent our concerns which reflect the views of discussions with our membership who account of 80% of the market housing built in England and Wales.

Policy STR 5 Infrastructure and Connectivity

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Provision and Delivery of County Council Community Services and Facilities

There is need to ensure that all growth is delivered with an appropriate range of community facilities, including Early Years provision, Youth Services, Adult Social Care, Community Facilities and Social Services. As set out within the Kent County Council Education Commissioning Plan, assessing the childcare market and ensuring sufficiency and long-term viability of provision for early years is complex and presents a significant challenge for local authorities. The County Council (commissioned through The Education People) is required to work with providers in making available a sufficient range of flexible provision, in the right geographical areas, at the right times and offering the right sessions to fit with both standard and atypical working patterns. The County Council would welcome engagement with the Borough Council to ensure adequate early years provision is provided to support growth.

The County Council recommends that the Local Plan includes policy wording that requires community buildings to be designed and built to be inclusive to all users – this should include:

- Design that is dementia friendly with dementia friendly decoration and signage
- A catering area which is compliant with the Government's Access to and use of buildings: Approved Document M, including

adjustable height work surfaces, wash areas and cupboards• Toilets and changing facilities for the severely disabled in accordance with the Changing Places specification:
http://www.changing-places.org/the_campaign/what_are_changing_places_toilets_.aspx

KCC recommends that the Local Plan supports the delivery of specialist care accommodation through developer contributions secured through section 106 agreements. The Local Plan should ensure the delivery of specialised homes that support the diverse and evolving range of needs of the local community, including those with learning and physical disabilities and other vulnerable groups. KCC would welcome continued engagement with the Borough Council in ensuring that the necessary homes to support a sustainable community are delivered.

Waste Management

The County Council welcomes the additional detail provided within this Regulation 19 consultation in respect of waste management, following the comments provided within the KCC Regulation 18 consultation response. Pressures on the County Council waste disposal service continue to grow and KCC would recommend a number of amendments within the Local Plan to ensure that waste management needs are fully captured and considered.

The County Council, as Waste Disposal Authority, and the Borough Council, as Waste Collection Authority, have received feedback regarding delays to collection rounds which are caused by limited capacity - there is currently no capacity for contingency or resilience to change in the Borough. KCC is committed to close working with the Borough Council to ensure a sustainable future in respect of waste management. As set out in the Local Plan Regulation 19 consultation, KCC will require a new facility to be delivered in order to support the planned growth. The timescale for the delivery of the proposed new facility was set at five to ten years within the Infrastructure Delivery Plan, however, issues are beginning to arise with capacity now and so KCC has revised this timescale down to five years. KCC therefore requests that the Local Plan and evidence base are updated accordingly and will welcome further engagement to take this forward.

Libraries

The County Council is keen to continue the partnership working within the Borough including bringing more services under one roof at new or improved premises, for example at the Southborough Civic Centre, The Amelia and the planned new community centre at Cranbrook. Working in partnership is a way for library services to remain at the heart of communities and provide fit for purpose buildings to accommodate existing and new residents in the future.

Public Rights of Way

The Public Rights of Way network (PRoW) has an integral role in the delivery of sustainable growth. Growth in the Borough should seek to maintain and enhance the PRoW network to provide opportunities for active travel and outdoor recreation, improve connectivity to local services and boost the health and wellbeing of new and existing communities. To ensure that this consideration is factored into planning for growth at early stages of developments, the County Council would recommend that PRoW is included in the relevant place-shaping and development management policies throughout the Local Plan (including the following policies: Policy STR 2 - Place Shaping and Design, Policy STR 4 - Ensuring Comprehensive Development and STR 6 - Transport and Parking).

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Infrastructure

General

13.1. TWBC has failed to comply with paragraph 20b) of the NPPF, as the Local Plan's Development Strategy (Policy STR1) fails to set out the key infrastructure projects to be delivered over the Plan period. This is a fundamental oversight, which, contrary to paragraph 20 of the NPPF, fails to provide details on how *"strategic policies [...] make sufficient provision for [...] infrastructure"*. It is therefore evident that the Development Strategy is underpinned on an unsustainable development pattern as it solely focuses on the delivery of homes.

13.2. In the absence of details regarding infrastructure needs and delivery in Policy STR1, it is expected that Policy STR5 (Infrastructure and Connectivity) of the Local Plan sets out the strategy for development, including how the Plan makes "sufficient provision" for infrastructure, as per paragraph 20 of the NPPF. However, this is not the case. Policy STR5 merely confirms that infrastructure will be delivered during the Plan period yet fails to address what the specific needs are and how they will be met. For example, in terms of healthcare, Policy STR5 states that *"ensure that essential healthcare infrastructure is provided as part of new development in the form of new or expanded healthcare facilities"*. The above statement is grossly inadequate as it indicates a clear level of ambiguity from TWBC which could result in an undersupply of healthcare facilities. As such, this is a clear dereliction of duty from TWBC whereby the Local Plan strategic policies fail to comply with paragraph 22 of the NPPF, which stipulates that *"strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure"*.

INFRASTRUCTURE REQUIREMENTS

Education

13.3. PWTC is concerned that the IDP and Local Plan's strategy for Tudeley Village will result in an unsustainable pattern of development, where infrastructure projects deemed 'essential priority' in the IDP will not be phased in alignment with the timeframes set out in the IDP.

13.4. Within Kent County Council's Regulation 18 representation, they stated that *"the policy referring to Land to east of Tonbridge/west of site for Tudeley Village (Policy AL/CA 2) relates to land proposed for the establishment of a new six form entry secondary school. The establishment of a new school is wholly required to support the proposed level of growth."* The IDP infrastructure schedule includes an

entry for the aforementioned 6 form-entry as “essential priority, timing dependent on a number of factors (2024-2028), indicative cost £31,931,850, funding position KCC/developer funding”. Local Plan Policy STR/SS3 (The Strategy for Tudeley Village, 2a) states that “approximately 2,800 dwellings (2,100 by 2038)” will be delivered. As part of the proposal for this site, the developer has produced a Delivery Strategy⁴⁴ which states that the six form-entry secondary school will be delivered in the fourth phase (of six) of the scheme. Whilst no indicative dates are provided within this document, it does state that “580 new homes will be delivered during this phase, increasing the total number of dwellings at Tudeley to 1900”. Based on the wording of Policy STR/SS3, it is therefore reasonable that Phase 4 of Tudeley Village will be delivered in the latter years of the Local Plan period, as Phase 4 housing delivery falls just 200 homes short of the 2100 home Local Plan target delivery by 2038. This is extremely concerning as, based on the developer’s own delivery strategy, the secondary school will likely not be delivered until the mid-2030s. This is an approximate 7-year delay based on the timeframes set out in the IDP. This oversight illustrates TWBC’s haphazard approach to infrastructure delivery, which, if delivered upon, would result in a considerable borough-wide undersupply in secondary school places. As such, this example demonstrates TWBC’s non-compliance with paragraph 22 of the NPPF, as the longterm education requirements for the borough (based on the level of growth proposed at Paddock Wood, East Capel and Tudeley Village) will not be sufficiently met.

13.5. Further to the above, the funding position of the new Tudeley Village secondary school (six form-entry) is uncertain, as Kent County Council’s earlier Regulation 18 representation stated that “the school will need to be wholly funded by development and therefore the financial contributions from contributing developments would need to be increased to cover the additional costs derived from both the site’s abnormalities and the likely need to deviate from the Department of Education’s baseline design.” Despite this, the IDP stipulates that the project will be funded by “KCC/developer contributions”. Therefore, it is unclear as to whether the abnormal site constraints have been overcome and whether Kent County Council has since agreed to part-fund the site. If this is not the case, the proposal is unviable as there is no clarity as to whether the site will be wholly funded by the developer.

13.6. The current round of development at Paddock Wood planned to pay for a primary school (2 Form entry) on the Persimmon site. This was supposed to open this year. KCC is yet to take ownership of the land to enable the Tenax Academy Trust to begin and have not submitted a planning application yet.

Wastewater

13.7. Wastewater requirements have not been adequately detailed within the TWBC Local Plan. It is acknowledged that issues relating to wastewater infrastructure requirements were raised by Greg Clarke MP in a House of Commons debate in October 2019. Greg Clarke MP⁴⁵ stated that “Plans to upgrade the sewerage network in Paddock Wood, despite repeated discussions with Paddock Wood Town Council, have come to nothing. Residents of Paddock Wood now see development happening that they were assured would take place only when the sewerage system had been upgraded to deal with the current overuse and problems and to remove the worsening of that situation, let alone cope with the planned development”. Furthermore, the SFRA (Levels 1 and 2 combined, July 2019)⁴⁶ also states that “Paddock Wood has been identified as an area which has experienced a number of surface water flood events associated with small watercourses, sewerage and private drainage systems. The Paddock Wood Stage 1 Surface Water Management Plan (SWMP), undertaken in 2011 identified that reported instances of flooding have occurred due to surface water and minor watercourses, often occurring relatively rapidly from the onset of heavy rainfall.”

13.8. With the above in mind, it is entirely inappropriate for the IDP infrastructure schedule to state that in Paddock Wood “additional wastewater treatment capacity required over the Plan Period [is] to be determined” and “safeguarding of land around the existing wastewater treatment works at Paddock Wood for future expansion works” are both to be delivered over a “short, medium and long” timeframe. No details on wastewater infrastructure are provided in Policy STR/SS1 (the Strategy for Paddock Wood, including land at east Capel). Given the above, it is evident that TWBC have failed to address concerns relating to previous deficits and issues with the existing sewerage system, and this is likely to accentuate the potential flood risk within Paddock Wood. As such, it is clear that the growth proposed in Policy STR/SS1 (the Strategy for Paddock Wood, including land at east Capel) is entirely unsustainable, as supporting infrastructure is unable to meet the needs of the present and future local community. Therefore, Policy STR/SS1 (the Strategy for Paddock Wood, including land at east Capel) does not comply with paragraph 22 of the NPPF, which clarifies that infrastructure requirements and opportunities over a minimum 15-year period should be addressed in strategic policies.

13.9. Given that the IDP states that “*additional wastewater treatment capacity required over the Plan Period [is] to be determined*” it also unclear as to how the Local Plan’s Viability Study (Stage 2, Appendix 2a47) has established an approximate construction cost of £450,000 (Paddock Wood Shared Costs, Appraisal 1) for sewerage work upgrades and foul water new connections and diversions. Due to the omission of specific wastewater infrastructure requirements within the IDP, it is not possible to cross-reference the viability testing outputs with infrastructure that is proposed within either the Local Plan or IDP. This could therefore result in several inaccuracies, which, in turn, could have implications for the overall viability of the scheme.

13.10. There is no land available for expanding the existing wastewater treatment works and PWTC has confirmation from Southern Water even before the current proposals that that treatment works were already at capacity.

13.11. PWTC has, for at least six years, been requesting that Southern Water deal with surcharged sewer network in town based on the current growth. PWTC has argued that their proposals for dealing with additional waste from the three current developments are not adequate and will result in even more sewer flooding. There has been no engagement by Southern Water to assess infrastructure needs for the development proposed in this Local Plan. Southern Water refuse to work up plans unless there is ‘planning certainty’ – and it has turned out that even then they do not plan anything under the site are under construction and do not enable the developers to design in areas needed for pipework and kit such as pumping stations.

Health

13.12. The IDP states that one new GP practice will be required to support the level of growth proposed in Paddock Wood and East Capel. The Strategic Sites Masterplanning and Infrastructure Study highlights that, under scenario 1 (both sites come forward), there are three potential sites for the new GP practice, as shown below (potential GP sites circled in orange). It is noted that all potential site options lie in the western area of Paddock Wood and two of three site options are situated within the East Capel Site Allocation. This does not constitute sustainable development, as, if developed, those residing in the Paddock Wood Eastern Extension would have inadequate access to healthcare, as they would have to travel approximately over 1km with no direct active travel means such as walking and cycling infrastructure. As such, TWBC have failed to comply with paragraph 8b) of the NPPF as “*communities’ health, social and cultural well-being*” would not be supported (our emphasis added).

13.13. It is important to note that with the current three developments in Paddock Wood, they relied on the Howell Surgery In Brenchley (four miles away) taking the excess demand. Howell Surgery is now closed to new patients from Paddock Wood as rolls are full. Woodlands Surgery in Paddock Wood does not have capacity either. East Peckham Surgery located nearby in Maidstone Borough lost its surgery last year.

[TWBC: for map, please see full representation attached as a supporting document]

Cemeteries

13.14. PWTC has calculated a potential requirement for an additional 3 acres of land suitable for cemetery space to provide for the additional population in Paddock Wood and has sought a discussion and confirmation of this with TWBC but has never had a reply. This is a particularly important issue given that cemeteries cannot be located on land susceptible flooding. The Local Plan does not address this issue.

Transport – A228/Colts Hill bypass

13.15. The Colts Hill/A228 bypass is classified as ‘*critical priority, medium timing, £30 million scheme funded solely by developer funding*’ in the IDP. The costs of this scheme align with the Stage 2 Local Plan Viability Study (Appendix 11a)48, as appraisal one for Paddock Wood (with shared costs) and Tudeley (with shared costs) amount to £20 million (£11,040,000 and £8,960,000 respectively). It is worth noting that the Paddock Wood assumptions are based on all strategic allocations coming forward within Paddock Wood. This in itself presents a significant level of risk, as if one development proposal was to be refused planning permission, funding for the A228 Colts Hill bypass would not be secured. This concern is also reflected in the Stage 2 Viability Study, which states that “*the results of any viability process at this stage can only indicate a likelihood of delivery rather than anything more specific. As discussed above, a small change in one assumption can have a relatively large impact on the outcome / result*”. Given that both policies (and allocations) STR/SS1 (The Strategy for Paddock Wood and East Capel) and STR/SS3 (The Strategy for Tudeley Village) are due to be built-out from 2025/2026

onwards (as based on evidence within the Housing Supply and Topic Paper for Pre-Submission Local Plan)⁴⁹ and the Tudeley Village site has an expected completion date after the Plan period (i.e., post-2038), it is unclear as to how funding for the A228 bypass will be fully secured by the 'medium' project timeframe set out in the IDP. The IDP provides no definition for a 'medium' timeframe, however, it is assumed that 'medium' would be within the middle years of the Local Plan period i.e., from 2026-2032. PWTC therefore question the assumptions stated within the IDP, as the proposed phasing/timeframe is unrealistic as developer contributions are likely to be staggered at certain trigger points throughout the development timeline and will therefore not all be available throughout the 'medium' timeframe stated.

13.16. The above issue is exceptionally concerning, as evidence provided the Local Plan's supporting Transport Assessment confirms that baseline and 2038 scenario testing found that the A228 Maidstone Road/B2017 Badsell Road Paddock Wood roundabout would remain at >95% capacity. This assessment also found that, despite the provision of the new Colts Hill/A228 bypass, further mitigation will be required to reduce congestion on the proposed bypass. With this in mind, the Local Plan has adopted an unsatisfactory approach to highway infrastructure planning, as delivery timescales (as stipulated in the IDP) are unrealistic and unlikely to be met. This would result in unsustainable travel routes and non-compliance with paragraph 102a) of the NPPF on the grounds that the potential impacts of development on the transport network have not been addressed (our emphasis added).

13.17. The signalised junction at Badsell /Maidstone Rd was to be funded by the current three developments in Paddock Wood. This is not on the KCC list of works for this financial/council year and Berkley Homes (a corner of whose site was required for the works) are at odds with KCC whose inaction is delaying the finalisation of design and construction of that section of their site.

Transport –congestion in Paddock Wood

13.18. Concerns regarding congestion within Paddock Town Centre have not be adequately addressed within the Local Plan. It is acknowledged that the IDP details three improvements to the B2160 (Maidstone Road). These include:

- . *Improved B2017 Badsell Road/B2160 Maidstone Road signalised junction*
- . *Improved A228 Maidstone Road/Whetsted Road priority junction*
- . *Improved A228 Whetsted Road/A228 Bransbridges Road/B2160 Maidstone Road roundabout*
- . *Improved B2160 Maidstone Road/Commercial Road priority junction*
- . *Widening at junction of B2160 and Lucks Lane*

13.19. It is clear that the above infrastructure projects will not alleviate congestion on the B2160, as the above measures focus on allowing those using private vehicles residing in the proposed urban extensions to access the centre of Paddock Wood. Maidstone Road is a narrow B-road which narrows into a single carriageway in places. Access in and out of the town centre to the north at the A228 Whetsted Road/A228 Bransbridges Road/B2160 Maidstone Road junction is particularly concerning, as the Local Plan's Transport Assessment indicates that this junction will be overcapacity at 104% (volume over capacity) under the Local Plan scenario, equating to an increase of 12% volume compared to the 2018 baseline. It should also be noted that both the 'highways mitigation' and 'sustainable mitigation' scenarios (whereby additional transport improvements are modelled) also lead to congested roads, equating to 102% and 101% volume over capacity figures respectively. This confirms that planned highways infrastructure is not capable of supporting the level of growth earmarked for the proposed strategic allocations within Paddock Wood and Capel Parish. This oversight does not accord with paragraph 108c) of the NPPF, as significant impacts from the development on the transport network (in terms of capacity and congestion) cannot be cost effectively mitigated to an acceptable degree (our emphasis added).

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 2	
Agent's Name and Organisation (if applicable)	Judith Ashton Associates

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 5, STR/SS 1, STR/PW 1, EN1, EN2, EN3, EN9, EN13, H3, H6 and H9 – see Comment Numbers PSLP_2159, PSLP_2165, PSLP_2166, PSLP_2167, PSLP_2173, PSLP_2179, PSLP_2182, PSLP_2186, PSLP_2189, PSLP_2191, PSLP_2194, PSLP_2197 and PSLP_2198. See Supporting Information for representation in full]

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I write with reference to the above. As you will be aware, I act for both Redrow Homes Limited and Persimmon Homes South East who have various interests in Tunbridge Wells, including those east and south east of Paddock Wood (SHLAA sites '20', '374', '371', '344' and '376'), (LPA sites PW 1_7, 1_9, 1_11 and 1_12), (parcels 7, 9, 11 and 12).

Whilst, having regard to the above, Redrow and Persimmon both support the Reg 19 Plan in principle, especially the proposed allocation of the land at Paddock Wood (policies STR/SS1 and STR/PW1), they do have specific concerns about certain aspects of policies STR/SS1 and STR/PW1 and the evidence base underpinning the plan.

In saying this we acknowledge that the Strategic Sites Topic Paper (March 2021) provides a detailed critique of the rationale behind the proposed allocation of the land at Paddock Wood and Capel, with section 8 explaining how the development looks to address the requirements of para 72 of the NPPF; and the plan and its associated evidence as a whole looks to demonstrate why the proposed allocation is justified, is deliverable and will be effective in meeting the requirements of the plan and national government guidance.

8 Strategic Policies

Policy STR5

8.3 Whilst agreeing in principle to the need for all new development to be supported by the provision of the necessary infrastructure, services, and facilities that have been identified to serve the needs arising from new development in a timely way, we are concerned as to how the requirements set out in policy STR5 are being arrived at. This policy appears, given paras 4.94 – 4.95 to be based upon the Infrastructure Delivery Plan (IDP), yet as set out above the IDP appears to be at odds with the infrastructure requirements identified in the Strategic Sites Masterplanning and Infrastructure Study and the Viability Appraisal Stage 2 assessment, such that the necessary infrastructure, services, and facilities required to meet the needs of the proposed developments needs to be clarified and policy STR5 and its preamble clarified so there is no ambiguity, and the plan requirements are both justified and effective.

Whilst many of our comments on the strategic and development management policies are, we believe, capable of resolution by simple rewording/ a review of the evidence base so as to justify the position being advocated, we are concerned that the extent of repetition between policies is leading to misrepresentation; and would recommend that the policy approach is reviewed with a view to being more succinct and direct in what it is seeking to achieve. This will we believe assist everyone concerned in the development process, and is something we, as inducted above, would be happy to talk to the borough council about, especially in terms of compiling a Statement of Common Ground to address the policy requirements for the land east of Paddock Wood.

To conclude, whilst we support the Reg 19 Plan and the proposed allocation of the land at Paddock Wood for strategic scale expansion, we do have a number of concerns about the overall housing supply and trajectory, the rationale behind the assessment of the reasonable alternatives assessed in the Sustainability Appraisal, and alternatives assessed; the consistency in the infrastructure requirements being sought from the development of the land at Paddock Wood in the IDP, VA and Strategic Sites Masterplanning and Infrastructure Study; the actual requirements for the land east of Paddock Wood – in terms of what, when and how much; some of the assumptions used in the VA; the wording of policies STR/SS1, STR/PW1 and justification for some of the criteria contained therein; and the wording of policies EN1, EN2, EN3, EN9, EN13, H3, H6, and H9 and justification for some of the criteria contained therein.

We look forward to talking to you further about the above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Redrow and Persimmon have an interest in land east of Paddock Wood – part of STR/SS1, one of the main strategic allocations in the Plan. They are also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. They therefore wish me to participate in the examination

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We welcome the inclusion of plans to allocate land to provide a new medical centre at Showfields Road. The surgery at Rowan Tree closed in January 2020. The policy seeks to "ensure adequate healthcare infrastructure is provided as part of new development". In view of the closure of the Rowan Tree surgery this appears to be no more than aspiration. We do not consider the policy is likely to be effective or meet residents' reasonable expectations, nor are there any clear, objective measures that would enable residents to hold TWBC to account. This policy should be revised to explain what "adequate" means by reference to availability of services within a distance that would also meet the active travel policy objective (i.e. walking distance).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

[TWBC: the following extract is from the representation submitted by KeepKent.Green and the Golden Green Residents Association - for the full representation, please see supporting documents]

KKG Objects to Policies STR/SS1 and STR/ SS3 as well as providing additional commentary on other policies, that lead to conclude the Local Draft Plan is not legally compliant, is not positively prepared, is not justified or effective or consistent with NPPF.

Infrastructure- STR5

Significant concerns were raised within regulation 18 responses regarding infrastructure -

- a) The overall costs and viability at Tudeley and East Capel
- b) Schedule and timings of implementation of key infrastructure
- c) Lack of detail
- d) Key infrastructure funding
- e) Majority of infrastructure would not be constructed until almost maturity of the LP even though rated critical within IDP.
- f) Local community, no consultation, Non Disclosure Agreements with various stakeholders to ensure proposed land allocations were not disclosed, even today, parcels of land have been included within infrastructure Compulsory Purchase Act but land owners have not had any communication from TWBC.
- g) Tudeley late submission to the LP , strong opposition and concerns from the local community as well as neighbouring LPA TMBC who held exclusive EGM prior to responding to Reg 18.

h) Confusion regarding CIL and section 106 policy- “The final IDP will also form an important part of the evidence base for a Community Infrastructure Levy (CIL) charging schedule, should the Council wish to pursue the implementation of CIL in the future – a decision will be made on this by the Council by the end of 2019”.

i) Some of the transport measures for Paddock Wood will also serve and connect the proposed garden settlement - Tudeley Village on land within Capel parish, therefore some of the larger infrastructure funding costs appear to be reliant on implementation of both sites.

The delivery of successful strategic sites requires new infrastructure to mitigate the impact of planned development. Further, this infrastructure needs to be planned comprehensively, delivered in a timely manner, funded through the development and seek to contribute to a step change in transport modal shift to align with garden settlement principles.

The full cost of a bypass at Colts Hill could not be funded through development alone, as the viability assessment confirmed that inclusion of the full £50million scheme would undermine viability and deliverability of the allocations.

Safety concerns regarding the A228 at Colts Hill will be further exacerbated through the development, and as such, options to mitigate the impact should be considered and funding for improvement secured.

The 2 key items of identified infrastructure to mitigate the growth proposed at Paddock Wood and east Capel, and Tudeley Village are Colts Hill and Five Oak Green Link Bypass.

Recent funding application for the offline Colts Hill Bypass has not been successful and funding has been unsuccessfully pursued for the last 40 years. The recommended phase 1 Colts Hill improvement scheme appears to be a temporary fix and will not mitigate the safety concerns that are already a major issue and will only increase as more traffic comes on line from these developments.

Due to the scale of these village settlements critical infrastructure should be prioritised and brought forward before any housing.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

KeepKent.green would like to attend and participate in any Inspectors Hearing regarding the TWBC Local Plan.

Policy STR 5 Infrastructure and Connectivity	
Policy STR 6 Transport and Parking	
Question 4	
Do you consider that the Local Plan:	
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Duty to Cooperate and broader engagement

1. I believe TWBC has failed in its Duty to Cooperate and engage with neighbouring communities, infrastructure providers and relevant LPAs, notably those in TMBC. The NPPF states that:

a. 16. "Plans should:

c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees"

b. "27. In order to demonstrate effective and on-going joint working, strategic policymaking authorities should prepare and maintain one or more statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be . . . made publicly available throughout the plan-making process to provide transparency"

c. " 35 . . . Plans are 'sound' if they are:

c) Effective - . . . based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground"

2. These policy requirements are of particular importance in the context of the Pre-submission Local Plan (PSLP), given the location of the Tudeley and Paddock Wood proposals on the boundary with TMBC. These proposals will have a significant impact on Tonbridge, Golden Green, East Peckham and other communities that lie close to the proposed garden settlements. As a result, TWBC should have engaged early, both with the local communities and with TMBC as the LPA. However:

a. Community engagement has been very limited (a copy of the Draft Local Plan was not automatically lodged at the Tonbridge library).

b. 202 responses were received by TWBC in response to questions regarding Settlement Groupings (which introduced the concept of garden settlements), and of those that expressed an opinion (around 92%) the majority (around 70%) disagreed with the suggested groupings. Despite this, the plan process ignored these responses and in the DLP proposed a garden settlement at Tudeley. This undermines the effectiveness of and confidence in the public consultation process run by TWBC.

c. Further to the above point, TWBC jumped straight from a broad identification of Strategic Option 5 in its Issues and Options paper, which was to consider the principle of garden settlements, to the selection of that as an adopted policy and then to the actual selection of specific sites (notably Tudeley (2,800 dwellings) and Paddock Wood (4,000 dwellings)) in the DLP. To announce, without public notice, allocations representing 50% of the OAN with such a significant impact on a neighbouring borough does not represent the "early, proportionate and effective engagement" required by policy.

d. The PSLP (STR 5) asserts that TWBC has “*fully consulted*” with Southern Water regarding the supply of fresh water and removal of foul, yet Greg Clark (the MP for Tunbridge Wells) is on record in advising that:

(1) “*Plans to upgrade the sewerage network in Paddock Wood, despite repeated discussions with Paddock Wood Town Council, have come to nothing. Residents of Paddock Wood now see development happening that they were assured would take place only when the sewerage system had been upgraded to deal with the current overuse and problems and to remove the worsening of that situation, let alone to cope with the planned development*” (House of Commons, 28 Oct 2019)

(2) This demonstrates the ineffectiveness of infrastructure planning, where this fails to provide the up-front investment needed to put in place the infrastructure needed in advance of development taking place. Without addressing such past poor performance the PSLP is unsound.

e. The PSLP (but not the preceding DLP) sets out proposals to close the Hartlake Road at its junction with Tudeley Road, and to close Maidstone Road in Paddock Wood. Both of these routes are well-used by communities in Tonbridge and Malling and their closure would add significantly to journey times, traffic congestion and pollution. Yet the absence of any effective dialogue from TWBC means that these proposals are only now being made visible.

f. A Statement of Common Ground has yet to be agreed between TWBC and TMBC. Yet the PSLP is at Reg 19 stage, far too late for constructive engagement with TMBC.

3. TMBC is on record in objecting to the DLP, noting that (letter of 16 Oct 19 from TMBC):

a. “*this is the first opportunity to comment on the detailed development strategy set out in the draft Local Plan*”.

b. “*the proximity of some of the major development proposals to the borough boundary . . . is a matter of serious concern due to the potential impacts on the local highway network, rail services and other community infrastructure including health care and education*”.

c. “*appropriate access across the railway will be an important consideration for master planning and viability*”.

These is hardly the response to be expected from an adjoining Borough that has had effective cross-boundary consultation on strategic matters.

4. As noted in another representation, this lack of engagement has also meant that any discussion with other LPAs about “*whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground (NPPF para 137c)*” has not been possible.

5. I therefore conclude that TWBC has failed in its Duty to Cooperate and that the PSLP is therefore **unsound**.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This is not capable of resolution at this stage. A Duty to Cooperate is a policy requirement during plan preparation that TWBC has failed to address.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am a regular user of the Hartlake Road and would want to contribute to any discussion regarding its closure or curtailment

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We generally support the provisions of this policy but are unable to judge (and have a certain scepticism as to) how effective they may be in practice in delivering required infrastructure in a timely manner or at all, given that so much lies outside the Council's direct control.

The requirement that developers should contribute sums satisfactory to the Council when their development creates a need for new or improved infrastructure is strongly supported though we have doubts as to how adequate contributions will be in practice. The policy provision for effective monitoring paid for by the developer seems a considerable improvement over current practice.

Provisions on education, health and water appear imprecise. Although it is recognised that TWBC is not the lead authority in respect of any of these services, we believe that it should draw attention to the lack of joined up thinking by some responsible Authorities such as KCC, which continues to follow school siting policies that substantially increase traffic congestion in RTW with resulting damage to public health and the urban environment. KCC must in future pay more attention to the climate emergency across all its policies.

The provisions on green, grey and blue infrastructure are supported but It will be essential for adequate funds to be secured from all available sources, including from developers, to make these provisions a reality.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Brian Lippard, Vice Chairman, RTW Civic Society
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 5 Infrastructure and Connectivity	
Paragraph Nos. 4.90, 4.91, 4.94	
Question 4	
Do you consider that the Local Plan:	

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Infrastructure and Connectivity (paras 4.90-4.91, 4.94)

Existing infrastructure needs more than 'protecting'. It is unrealistic to expect all the required infrastructure improvements to be obtained by negotiation on new development. Infrastructure betterment needs exist in addition to those mentioned (flooding at Paddock Wood), for example to promote active travel.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Re-word para 4.90 – As set out previously in Sections 2 and 3, **reviewing** existing infrastructure and securing investment from all sources in new infrastructure is key **to meeting the objectives of the Plan for sustainability and enhancement of the environment**.

Re-word 4.94: Alongside this Local Plan, the Council has developed an Infrastructure Delivery Plan (IDP), which seeks to identify the key elements of infrastructure that will be required to support the level and distribution of development being proposed **and the other objectives of the Local Plan** and how it will be delivered and phased. It also sets out what mechanisms will be used to ensure the timely delivery of infrastructure. It is critical that the necessary infrastructure (whether physical or social) is delivered in a timely way, to ensure that the development programme **and the objectives of the Plan for sustainability and environmental improvement are** not delayed and that built development and infrastructure is brought forward in a comprehensive approach.

Reason: Sustainability and enhancing the built and natural environment require reducing road traffic and providing infrastructure for walking and cycling, including in areas not affected by new development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

In relation to education and health infrastructure, SDC recognises that many pupils and patients travel between our respective authorities to access these services. We are committed to working with TWBC, Kent County Council and the Kent and Medway Clinical Commissioning Group to deliver the services that are necessary for sustainable growth.

In relation to highway and rail infrastructure, SDC recognises the importance of the A21 and rail service to London in particular. We are committed to working with TWBC, Kent County Council and Network Rail to ensure any necessary improvements to support sustainable growth are delivered in a timely manner.

SDC will continue to work with infrastructure providers and partners on cross boundary matters, including through mechanisms such as the production of Infrastructure Delivery Plans.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

At this stage, SDC is content to rely on written submissions to express its views on TWBC's emerging Local Plan. Officers will inform you as soon as possible should this position change.

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Standard Life Investments UK Real Estate Fund stand by representations made in respect of the Draft Local Plan (Regulation 18) consultation document in respect of Policy STR 5 Essential Infrastructure & Connectivity (please refer to **Attachment A**) and maintain that the current wording of is not deemed to be 'positively prepared', 'justified', 'effective' or 'consistent with national policy' as required by the NPPF for the given reasons. As such, the Pre-Submission policy approach is deemed to remain 'unsound'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to **Attachment A** relating to Policy STR 5 Essential Infrastructure & Connectivity.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Strategic Objectives

- a. There are 11 points raised, yet the majority are found relating to development,
 - 1 Transport is limited to a policy of giving priority to active travel and public transport,
 - 2 There is but reference to “ensuring the borough is vibrant, culturally rich, and economically buoyant”, and
 - 3 “conserving and enhancing the valued historic, built and natural environments, including Green Belt”, however
- b. The majority of the Plan relates to “sustainable development”, sites and their uses, and there is nothing specific or being envisioned about the matters raised in “Vision and Objectives” above.

Infrastructure and Connectivity

- a. 4.91 states “It is expected that future infrastructure to mitigate the impact of development....funded by....”, “to ensure that the development is acceptable in planning terms”.
- b. However, there is little infrastructure proposed that mitigates the likely increase in traffic movements by the up to 15000 cars that will be generated by the proposed developments in the vicinity of Pembury, Capel and Paddock Wood.
- c. Indeed there is little being proposed to alleviate the existing and declared congestions on the roads surrounding Tunbridge Wells. It may meet the “planning terms” but is distinctly unlikely to meet the aspirations of those who reside in the borough, who are already frustrated by the congestion and use of “rat runs” for their necessary travel needs.
- d. The only mitigation involving additional or new roads is the Colts Hill bypass. While the dualling of the A21 from Kippings Cross to Lamberhurst is noted it is unlikely to be aspirational for many years if the Tonbridge Kipping Cross section is anything to go by.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, ‘Northern Powerhouse’, it is possible that the housing needs in the south-east may need to be re-assessed downwards.
- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.

- 4 While it promotes the use of “active travel”, the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 6 Transport and Parking	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We are residents of East Capel, having lived in our house for 28 years. We consider certain aspects of the Tunbridge Wells local plan to be unsound, ill thought through and not justified.

We believe this policy of the local plan to be unsound. We object to the proposal to close the bridge over the railway line in Paddock Wood B2160 Maidstone Road except for buses, pedestrians and cycles. We strongly dispute statements made in the supporting documentation "Local Cycling and Walking Infrastructure Plan Phase 2 – Final Report". This report states, in regard to the proposal "This is likely to reduce the number of vehicle trips in the town". Where is the proof for this assumption? This road restriction will simply push traffic from East Peckham, Yalding, and sites North of Paddock Wood via other unsuitable routes into the town and create more problems for traffic along the A228, B2017, and B2160 south of the town. For example, residents from these neighbourhoods doing their weekly heavy shopping in the town will simply not consider cycling as an option. If the road restriction over the bridge does reduce traffic then it may hinder the vibrancy and commercial success of the shops in Paddock Wood.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove this bridge closure from the local plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN – REPRESENTATIONS ON BEHALF OF BELLWAY

We write on behalf of our client, Bellway Homes Strategic, in relation to the Pre-Submission draft Local Plan for Tunbridge Wells Borough which is currently subject to public consultation. This letter provides the background to Bellway's interest in the Borough and sets out representations on their behalf.

BACKGROUND

Bellway has a legal interest in the land to the north and south of High Woods Lane (Mouseden Farm) on the eastern edge of the built up area of Tunbridge Wells/Hawkenbury which it is promoting for residential led development. The site is separated by High Woods Lane. The area south of High Woods Lane is currently in agricultural use and bordered to the east by woodland, to the south by existing sports uses and to the west by existing residential development. The area north of High Woods Lane is also within agricultural use, with further agricultural uses/woodland to the east and an indoor bowls club and allotments to the west.

The adopted Proposals Map indicates that both parts of the site are within the Green Belt and AONB.

On the basis of the Proposals Map published as part of this consultation indicates that the southern part of the land (south of High Woods Lane) is to be designated under Policy RTW1923 with that area to adjoin the 'Proposed Limited to Built Development'. The northern part of the land promoted by Bellway is not subject to any other proposed allocations. The draft Proposals Map appears to indicate that both parts of the site will continue to be located within the Green Belt and AONB.

Policy STR6: Transport and Parking

We note that this Policy explains how the "transport and parking strategy is to: ... Deliver future development in accessible locations, normally within, or in close proximity to, existing towns and villages

across the borough, where it is a scale which supports the necessary infrastructure and services to allow the community to function self sufficiently on a day to day basis.”

We set out concerns elsewhere in these representations as to the extent to which the draft Local Plan fulfils that strategy.

SUMMARY

These representations set out **significant concerns** regarding the draft Local Plan for Tunbridge Wells Borough. In summary, the level of housing required to address issues of affordability and does not provide any realistic opportunities to make a meaningful contribution to meeting affordable housing needs. Whilst the Council claims that the housing supply represents a buffer over the planned requirement, this is based on extremely optimistic assumptions and short lead in times before the key sites deliver. In the case of Paddock Wood the Plan then relies upon very high delivery rates.

A more diverse and greater range of sites are required to address affordability, provide affordable housing and to help ensure that the housing requirement is achievable.

The Plan also provides a disproportionately low level of new housing at Tunbridge Wells despite the sustainability of this settlement, in comparison to other, less sustainable locations. This is borne out by the selection of the Tudeley Village site as a location for a new garden village in a remote location where the extent of measures to support sustainable travel is extremely unclear. Alternative options are available which would direct development to the most sustainable settlement (i.e. Tunbridge Wells) and which are in sustainable locations.

This conclusion is supported by the Council's own evidence which demonstrates the availability and suitability, sustainability and logic of alternative sites on the edge of Tunbridge Wells (including the land promoted by Bellway which is subject to these representations).

The Council's own evidence has overstated the contribution that certain sites, including the land promoted by Bellway which is subject to these representations) makes to the Green Belt. When the land is assessed in a more robust manner (and when assessed independently rather than as part of wider Broad Areas), the contribution is significantly reduced.

The southern part of the land promoted by Bellway (i.e. the land south of High Woods Lane) is subject to a planning permission for recreational uses. That application was submitted by the Borough Council, despite it having no interest in the land. In contrast, Bellway has a legal interest in the land and is promoting this area, as part of a wider site, for residential development. Bellway would be willing to work with the Borough Council to explore opportunities for bringing forward the approved recreational facilities in the area, which residential development on the site could help deliver.

Whilst the Council is pursuing (by allocating and seeking planning permission) land outside of its control for sports and recreation uses, it is concurrently planning to release a number of sites which are already within those uses for residential development which the Council does own. As a matter of general principle this approach appears unjustified.

As it is currently drafted the Local Plan is unsound. It relies on unsustainable and undeliverable solutions to housing needs and is partly premised on releasing the Council's own land for housing whilst proposing land it does not own for compensatory sports and recreation purposes. These fundamental issues of unsoundness are compounded by a lack of documentary evidence to explain why the Council has selected the approaches and proposed allocations in the emerging Local Plan.

Bellway would be willing to enter in to dialogue regarding the land north and south of High Wood Lane and the extent to which this site could deliver housing (delivering the greater range and diversity of sites) in a sustainable location. Bellway would be willing to discuss the manner in which such housing could assist in delivering additional recreational facilities in the area.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

Question 1	
Respondent's Name and/or Organisation	Brenchley & Matfield Parish Council
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR1, STR5, STR6, STR, STR8, STR10, PSTR/BM1, AL/BM1, AL/BM2, EN1, EN19, OSSR1, OSSR2.

[TWBC: relevant parts of this representation have been duplicated against the above policies: see PSLP_1775-1786 inclusive]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The language is not sufficiently robust in some of the policies and introduces ambiguity. Small rural parishes have very different requirements to the larger settlements, having less housing allocations, limited facilities and poor public transport. Consequently some policies have no relevance in rural areas and include no provision of additional facilities. Although the parish has a small housing allocation, the quality of life will be significantly affected by development in Paddock Wood/Capel/Horsmonden/Pembury. There should be some provision for the mitigation of the effects within other parts of the borough of increased traffic on safety, noise and air quality.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Pre-submission Comments from Brenchley and Matfield Parish C council

TWBC Pre-Submission Local Plan

STR6: Transport and Parking

The proposals are inadequate to prevent further major deterioration of the quality of life in the parish from traffic and rat running through rural lanes whenever there are problems on the A21 or other main roads. The current problems will be exacerbated by the major developments planned for Paddock Wood and East Capel, unless the A228 improvements have already been made.

There is no provision for highways improvements within the parish to mitigate against the effects of increased traffic from the developments planned for the north and east of the parish. The situation is already hazardous for pedestrians and cyclists, with no safe crossing points on Maidstone Road or Brenchley Road. While the Borough Council appears to be encouraging active travel there appears to be no real and effective action included in the plan to provide safe cycle routes within our parish or connections to nearby settlements. A safe off-road travel route for schoolchildren in the parish to reach Mascalls Secondary School and Brenchley and Matfield Primary School would be desirable. The provision of cycle parking spaces in developments is welcome but people will not be able to cycle unless there are safe routes to use them.

The strategy of active travel and public transport within STR6 is ambitious and encouraging but to date the PC sees little evidence of TWBC being proactive to provide any improved measures in the parish to date. The PC finds this disappointing and is of the opinion single occupancy car-based trips within the Borough will prevail.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Parish Council supports the overall negative scores of the sites in Brenchley and Matfield that were put forward in the Call for Sites. There are very few positive scores for any of the sites and a significant number of high negative scores. Many of the sites involve the loss of high-grade agricultural land and would have a negative impact on biodiversity, landscape and heritage. Sustainability is also a factor for many of the sites, which lack a proximity to facilities and public transport.

The villages of Brenchley and Matfield have limited sustainability, with poor facilities in Matfield but a reasonable bus service to Paddock Wood and Tunbridge Wells. Brenchley has more facilities but three bus services to Paddock Wood on only two days during the week. There are no bus services in the evenings that would allow commuters to use public transport.

If you would like to attach a file in support of your comments, please upload it here. [B&M comments Local Plan.docx](#)

Question 4	
Do you consider that the Local Plan:	

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The emphasis on active travel is supported.

However,

Para 4.99 and Policy a) Active travel, opening sentence: Horse riding should also be listed as active travel, since the alternative to riding a horse to a venue is to transport it in a horsebox.

Active travel 3: This paragraph as currently drafted discriminates against horse riders, the majority of whom are women and girls (and thus it may fail to comply with Equality legislation), since it implies that bridleways and byways will be enhanced for other types of user, without any enhancement being planned for horse riders. Indeed it is likely to lead to bridleways being tarmacked for the benefit of cyclists, without any compensatory improvement for horse riders. Specific mention of different types of non-motorised user and the different types of public rights of way is in any case unnecessary, since both are terms that include all types.

There should also be a commitment that where possible public rights of way will be upgraded to bridleway or restricted byway, in order to accommodate the maximum number of non-motorised users.

Please see also our general comments on the Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Para 4.99 and Policy a) Active travel, opening sentence: Horse riding should also be listed as active travel, since the alternative to riding a horse to a venue is to transport it in a horsebox.

Active travel 3, revise to read:

“The provision of inter-settlement routes into the centres or into key destinations within settlements, including through enhancing routes such as public rights of way, for users of non-motorised transport. This will include links to destinations outside the borough, including Tonbridge. Where a non-motorised route is to be provided or upgraded, it will wherever possible be of bridleway or restricted byway status, or will include a margin for ridden horses, in order to accommodate the maximum number of non-motorised users.”

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To ensure that horse riders will not be discriminated against.

Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

Charterhouse comments on specific Pre-submission Local Plan Policies

Policy STR 6 – Transport and Parking

Charterhouse supports STR 6, it is imperative that the location of new development is sustainable and the provision of active travel. This must be held in high regard within policy STR/SS 1 in the delivery of appropriate cycle and pathways into the town centre in particular within the masterplans for Paddock Wood which include pedestrian and cycle routes within Charterhouse's landholding which could ensure a sustainable and well connected Paddock Wood.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR6 Transport and Parking	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Very little information has been provided about the environmental effects of the proposed highway improvements - including loss of green belt, light pollution and impact on the setting of the AONB - set out at section (c) of this policy. On this point the policy maps should be updated to clearly show the full extent of the proposed works/safeguarded land and at a comparable scale if the works are divided across a number of inset maps.

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

Policy STR6: Transport and Parking

“Not justified”

4.48 Crest supports the overall principles of this policy, but considers the policy to be unsound, as the policy wording needs to be justified.

4.49 Paragraph 2 of Policy STR6 states,

“The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services;”

4.50 It is unclear, at this stage, when the masterplan has not been considered in detail whether active travel routes/links to routes through existing areas of settlements is possible, practical, or appropriate. As such, paragraph 2 should be modified to add, “where possible, practical and appropriate ” at end of paragraph.

a) Active Travel

4.51 Policy STR 6 (a) (2) requires the strategic sites at Paddock Wood and east Capel to adopt active travel as fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bicycle. Within the NW Paddock Wood development, this will be taken forward through more detailed masterplanning to ensure that the internal routes meet the necessary desire lines, prioritising the needs of pedestrians, cyclists, and public transport services. This is in line with Policy STR 2 - Place Shaping and Design and Policy TP 2 - Transport Design and Accessibility.

4.52 One of the improvements being sought by TWBC is an enhancement to north-south connectivity. At present, in addition to the B2160 Maidstone Road, such active travel movements are facilitated by a footbridge along Footpath WT253, while Footpath WT175 currently crosses the railway line at grade. Conversely, there is no existing pedestrian infrastructure on the A228.

4.53 Indeed, Para 5.169 of the Pre-Submission Local Plan states that:

“The railway line cuts through the land in Capel, forming a significant point of severance. An unprotected pedestrian level crossing is present to the east of Whetsted Wood, connecting a Public Right of Way.”

4.54 As a result, Appendix 4 - Access and Movement Report (December 2020) shows a requirements for two new crossings of the railway line to the west of the town centre. These are listed in Table 6.8 as Item (8) which is close to existing Footpath WT175 crossing and Item (9) which indicates a new pedestrian/cycle crossing alongside the existing A228 Maidstone Road vehicular bridge.

4.55 While improved crossing points are supported in principle, Para 4.50 of Strategic Sites Masterplanning and Infrastructure Study (March 2021) signalled some potential uncertainty around delivery, when it stated that:

“The use of a pedestrian footbridge over the railway would be a safer option but would need to be agreed between Network Rail and adjacent landowners”.

4.56 As such, while the focus of Policy STR 6 (b) (2) focuses on engagement with Network Rail in relation to improvements to railway stations, the same high-level commitment should be more explicitly included in respect of facilities across National Rail infrastructure when considering active travel.

4.57 The strategic nature of such connections was highlighted in the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 Evidence Base for Pre-Submission Local Plan (March 2021) where it was stated that:

“The extent of routes to the north were limited by the lack of crossing points across the railway line which is an overarching issue for the town and further enhancing connectivity with the north of Paddock Wood” (Page 41).

4.58 The Local Plan, therefore, should set out the requirements for these crossings as being a strategic requirements of Paddock Wood town as a whole, rather than associated with particular development(s) as this would secure appropriate stakeholder participation at the planning application stage. As such, paragraph STR6 a) 2 should be modified to read, ***“This will require the Council working with National Rail to cross the rail line to facilitate an enhancement to north-south connectivity ;”***

b) Public Transport

4.59 Policy STR 6 seeks to maximise the use of public transport (rail, bus, car club, car share, and taxi), as an alternative mode to the private car. The vision is to establish new bus and rail links with nearby settlements as well as ensuring that the layout of strategic sites provides for attractive bus services with convenient access to the highway network.

4.60 Para 5.173 of the Pre-submission Local Plan states that *“all sites are within walking or cycling distance of Paddock Wood railway station ”*. In this respect, it is noted that Policy STR 6 (b) (2) states that the council is committed to:

“Working with Network Rail and the train operating company to provide station infrastructure improvements where necessary, and working strategically to retain and improve the rail network by increasing the attractiveness of travelling by rail, including to multiple destinations;”

4.61 This type of engagement is welcomed and will enable strategic development to make the most of the relatively high rail mode share of 12% that was reported in Para 5.4.29. of the Transport Assessment Report (September 2019).

4.62 The proximity of the proposed NW development to Paddock Wood railway station, combined with the accessibility improvement and promotion of active modes, will therefore go a long way to maximising walking and cycling as part of multi-modal journeys, thereby minimising the need for additional car parking at the station.

c) Highway Network

4.63 Policy STR 6 (c) – Highway Network proposes a number of strategic highway schemes in support of the Pre-submission Local Plan, including:

- i. Part off-line, part on-line improvements to the A228;
- ii. The provision of a highway link bypassing Five Oak Green;
- iii. Measures along the A228/A264, including junction capacity improvements at Woodsgate Corner and a roundabout at the Pembury Road/Halls Hole Road/Blackhurst Lane.

4.64 It is also understood that routes for major off-line road improvements, such as the A228 Colts Hill bypass are to be ‘safeguarded’ in accordance with Policy TP 6: Safeguarding Roads. In this respect, the approach complies with the NPPF (2019) Policy 104 (c) which requires Local Plans to *“identify and protect, where there is robust evidence, sites and routes which could be critical in developing infrastructure to widen transport choice and realise opportunities for large scale development ”*. The key aspect of this will be the strength of the evidence base supporting the schemes.

Highway Modelling

4.65 The Transport Modelling Report (March 2021) outlines a number of scenarios which have been modelled. These are as follows:

RC: Reference Case without Local Plan

LPS: Local Plan Scenario – with committed infrastructure schemes

LPSHM: Local Plan Scenario with Highway Mitigation only – same assumption as Local Plan

Scenario but with additional network improvements applied to mitigate wider Local Plan impacts; and
LPSMS: Local Plan Scenario with Highway Mitigation and Sustainable Transport – same assumption as Local Plan Scenario but with network mitigation and sustainable transport demand management applied to mitigate wider Local Plan impacts.

4.66 The above presents a sequence of assessment, whereby the effect of the Local Plan is first assessed against a baseline position (RC and LPS) before progressing with the assessment of mitigation (LPSHM, LPSMS).

4.67 Crest Nicholson seeks some clarification as to why the Colts Hill improvements have been included as a committed scheme in the LPS scenario, according to Table 9-1 '2038 LPS Network Assumptions'. Its inclusion is also then carried forward in the other modelling scenarios under consideration (i.e. LPSHM, LPSMS).

4.68 The LPSMS scenario is described as being based on evidence gathered in support of the Government's Sustainable Travel Towns (STT) demonstration project. The purpose of this scenario is to show how significant modal shift is possible through the implementation of sustainable transport measures, reducing the highway trips generated by the Local Plan sites.

4.69 It may be arguable therefore that the sustainable transport measures under the LPSMS scenarios should have been applied first, prior to determining the rationale for major infrastructure intervention. This would have better reflected the sequencing advocated in the NPPF (2019) by establishing the 'residual' impacts of traffic after the effects had been taken of sustainable transport measures.

4.70 It is also not clear what Colts Hill improvements were tested in the Transport Modelling Report (March 2021) to determine if this refers to the original scheme by KCC or one of the alternatives, outlined below.

A228 Colts Hill Improvements

4.71 The proposed A228 Colts Hill route improvement is a package of infrastructure which has been considered for a number of years. The original plan by KCC was to provide a bypass to Colts Hill, passing under Alder Road and progressing in a cutting south to re-join the existing A228 north at Lower Green.

4.72 A funding bid was submitted to the Major Roads Network (MRN) programme in 2019 to deliver the larger Colts Hill Bypass scheme. The estimated cost of the KCC off-line scheme was £46 million.

4.73 Given the strategic nature of the scheme, Crest Nicholson agrees that the necessary funding avenues should continue to be explored by the council as a means of comprehensively dealing with the priorities it has identified, particularly where the rationale for the scheme will deliver greater benefits that would be required specifically by the individual developments in mitigating their own impacts.

4.74 Indeed, Para 6.16 of the Tunbridge Wells Strategic Sites Masterplanning and Infrastructure Study (February 2021) suggests that:

"The Transport Assessment underpinning the Regulation 18 Draft Local Plan assesses the need for improvements at Colts Hill to be attributable to pre-existing safety concerns, as well as a wider set of changes to the transport network in this part of Kent, including the proposed Lower Thames Crossing."

4.75 Para 6.8.7 of the Tunbridge Wells Local Plan: Paddock Wood and East Capel & Tudeley Village Access and Movement Report (December 2020) confirms the same in respect of the strategic nature of the scheme, stating that:

"The KCC scheme mentioned, isn't considered necessary to mitigate the impacts of the development in accordance with the NPPF and the CIL regulations".

4.76 However, it is understood that a reduced scheme has been put forward by TWBC, comprising a mixture of on-line and off-line improvements. This alternative scheme is said to support the strategic developments at Paddock Wood and east Capel as well as Tudeley Village.

4.77 The Tunbridge Wells Strategic Sites Masterplanning and Infrastructure Study (February 2021), the Colts Hill Improvements are categorised as 'E' (a shared off-site scheme) under Scenario 1 and 'D' (off-site scheme intended to serve a single allocation) under Scenario 2.

4.78 It is acknowledged that Para 7.9.4 of Tunbridge Wells Local Plan: Paddock Wood and East Capel & Tudeley Village Access and Movement Report states:

"A228 Colts Hill route improvements – The A228 Colts Hill improvements are beneficial for both Paddock Wood and east Capel and Tudeley Village".

4.79 However, the term 'beneficial' does not necessarily justify causality. And, as a result, Crest Nicholson would seek further clarification for the inclusion within STR 6 (c) of the A228 Colts Hill Improvement Scheme. Even in its alternative form, more evidence would be required to establish the strength of any linkages that exist between this infrastructure and the strategic developments at NW Paddock Wood.

4.80 In this respect, it is noted that the recommendations of the Paddock Wood and East Capel & Tudeley Village Access and Movement Report (December 2020) are as follows:

"Should TWBC wish to proceed with promotion of Paddock Wood and east Capel and Tudeley Village for allocation, it is strongly recommended that a more detailed evaluation of the transport impacts is conducted."

4.81 Without robust evidence of linkages, there is a risk of undermining the effectiveness of the policy if the A228 Colts Hill improvements are not justified or the evidence base on which this policy was worded was not effective in its preparation.

4.82 This would allow the council to comply with Policy STR 5 (1) which requires that infrastructure should only be required to support growth in the Local Plan "... where development creates a requirement for new or improved infrastructure beyond existing provision".

4.83 The expectation is that, through the Local Plan process, a means apportioning the costs of this intervention should be set out, in order to recognise the proportionate impact of developments towards the delivery of this infrastructure, either in its full or alternative / reduced format.

4.84 In this respect, reference is made to Para 7.5 of Strategic Sites Masterplanning and Infrastructure Study (February 2021), which states that,

"... it will be necessary to adopt reasonable and appropriate mechanisms which can be included in S106 Agreements. This may include approaches to equalisation and financial contributions arising from the monetisation of infrastructure items."

Five Oaks Green Bypass

4.85 The rationale for the Five Oaks Green Bypass is described Para 6.33 of the Strategic Sites Masterplanning and Infrastructure Study (February 2021) as being related to constraints in the following location:

"In the centre of the village for traffic flows and the growth at Tudeley Village (and to a more limited extent that at Paddock Wood and east Capel) [which] would increase traffic along the B2160 through the village."

4.86 The above suggests that the impact of the Tudeley Village development trigger the requirement for this infrastructure. The paragraph continues:

"The Transport Assessment (SWECO) underpinning the Regulation 18 Draft Local Plan pinpoints the need for a bypass of the village to alleviate issues caused by strategic development at Tudeley Village." (Para 6.33).

4.87 Conversely, the increases in traffic along the B2160 resulting from the developments identified for Paddock Wood and east Capel would not be significant. Therefore, the conclusion supports the identification of the 'Link by passing Five Oak Green+R'bout with A228' as Category D (i.e. an off-site scheme required by a single allocation) in Table 11, associated with development at Tudeley Village.

4.88 Further paragraph 5.190 of the Reg 19 Local Plan states, *"The Five Oak Green bypass is largely required to alleviate issues caused by strategic development at Tudeley Village and the viability assessment shows that this can be delivered wholly by the Tudeley Village Garden Settlement."* As

such, the Local Plan should make it clear that the Five Oaks Green Bypass relates only to Tudeley Village and not new development at Paddock Wood.

Car Parking

4.89 Policy STR 6 commits the council to work with partners on an integrated approach to parking, transport, and land use planning, in line with Policy TP 3 – Parking Standards.

4.90 The Pre-submission Local Plan states in Para 6.563 that:

“With all vehicle parking standards in both residential and non-residential proposals, it is important to allow for flexibility in their application in order to allow for site-specific issues to be taken into account”.

4.91 Crest Nicholson agrees that an appropriate balance needs to be achieved by allowing car ownership aspirations to be met, while balancing this with the need to reduce daily car use through the promotion of alternative modes of transport.

4.92 With regard to setting residential car parking standards, the indication is that TWBC would move from using ‘maximum’ to ‘minimum’ standards. The supporting Residential Parking Standards Topic Paper (February 2021) states in Para 6.10 that:

“These proposed minimum standards differ from the maximum parking standards previously adopted by Tunbridge Wells Borough Council in accordance with Kent County Council’s SPG4 (2006) document as per TP5 of the 2006 Local Plan, which many have considered to provide less than a suitable level of parking provision .”

4.93 This is consistent with NPPF (2019) Para 105 and 106 which outlines the parameters that should be taken into account in setting parking standards, reflective of local conditions and in a proportionate manner.

4.94 Crest Nicholson also supports the suggestion made in Para 6.18 that the master-planned areas of Paddock Wood and east Capel “... will be developed through a masterplanning exercise (with the parking standards to be determined as part of an SPD) ”.

4.95 It is considered that this would provide the necessary flexibility to reflect the design of the proposed development in way that supports sustainability.

4.96 It is also noted that cycle parking for both residential and non-residential development would follow the minimum standards set out by Kent County Council.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Modifications

4.97 Paragraph 2 of Policy STR6 should be modified to add, “where possible, practical and appropriate” at end of paragraph.

4.98 Paragraph STR6 a) 2 should be modified by adding the following to the end of the paragraph, **“This will require the Council working with National Rail to cross the rail line to facilitate an enhancement to north-south connectivity;”**

4.99 The Council needs to evidence and further clarify the inclusion within STR 6 (c) of the A228 Colts Hill Improvement Scheme. Even in its alternative form, more evidence would be required to establish

the strength of any linkages that exist between this infrastructure and the strategic developments at NW Paddock Wood.

4.100 Further, a means apportioning the costs of this intervention should be set out in the Local Plan in order to recognise the proportionate impact of developments towards the delivery of this infrastructure, either in its full or alternative / reduced format. This representation is also relevant also to Policy STR/SS1.

4.101 The Local Plan should make it clear that the Five Oaks Green Bypass relates only to Tudeley Village. This representation is particularly relevant also to Policy STR/SS1.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council's housing delivery. As such, it is important that Crest is represented in all the relevant EiP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation	Gillian Douglass
---------------------------------------	------------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 6 Transport and Parking

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Don't know
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

STR6 does not refer at all to the 20 mph speed limit set up in the town centre. While several areas were completed in a hurry in order to take advantage of a grant, mistakes have been made. In St. James, for example, the speed between Camden Road and Quarry Road changes to 30 mph immediately before a church hall where a nursery takes place and a primary school in a congested area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 6 Transport and Parking	
Paragraph Number 4.99	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

How does building an isolated new village at Tudeley fit with this policy when the majority of residents will not work in Tudeley? New residents will mostly already be employed elsewhere with a good salary and changing jobs could create mortgage problems for most potential property buyers. It is also questionable when the proposed new "industrial" workspace will be created at Tudeley as we have no timetable for the development except this broad figure of 2022-2038.

This policy is poorly thought through and is Unsound with regard to Tudeley Garden Village.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A far better alternative to TGV is to build a new village adjacent to the Kingstanding Business Park on the A21 at Castle Hill which has just been approved by TWBC for 85 hectares of warehousing and B1 industrial. This is also just 1 mile from the Tunbridge Wells new hospital where staff are desperately looking for property and there are cycleways and footpaths already linking these sites which also link to the railway in Tonbridge.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted. It is important that proper debate takes place.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The KCC & TWBC approach to road building in west Kent has for decades been an “after current budget period” item and nothing has changed here. TWBC in 2003 announced a “park and ride scheme” to solve all the issues in the Tunbridge Wells town but this has never been implemented and all sorts of other tricks have been announced and then dropped, wasting our time and money.

Colts Hill was first designed in the 1970s and changes to the plans made through to 2000 but always the excuse of “no current budget” was the KCC stance as they are the budget holders and NOT TWBC.

Jam tomorrow but in reality it is traffic jams today!

The latest proposals are to build half the bypass and join it to a new Five Oak Green bypass but only if Tudeley Garden Village is built.

If we consider the disruption in the area, particularly along A228/B2017/B2160 and various country lanes in Capel and Paddock Wood used as rat runs to avoid congestion whilst all these proposed works are ongoing; then add the 3 current estates being completed now in Paddock Wood (approx. 1500 homes) to the traffic nightmare, we soon discover that the PSLP will bring 25 yrs of total disruption to the area and actually drive business away instead of attracting it.

STR 6 states that FUNDING will be via development. Unfortunately, this cannot work as the development will only occur or be attractive to developers if the infrastructure is already in place. STR 6 is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Do not build houses where there is no infrastructure already in place and avoid areas that will suffer immense and long term disruption. If you need to build new garden villages then do so where major new highways already exist or are already close to the Highways England major roads network.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It appears that KCC & TWBC have reached no agreement at all regarding the potential Colts Hill bypass and the Five Oak Green bypass. The 2 companies used to examine the potential routes, David Lock Associates (main PSLP) and Stantec (Infrastructure Delivery Plan) do not even agree where the Five Oak Green bypass terminates on the existing B2017 or even the route it takes.

The PSLP approach is misleading, unclear and therefore unsound & unacceptable.

Map 29, Page 150 shows "improvements" to the whole of A228 Colts Hill plus the line of the proposed all off-line Colts Hill bypass, but then only to be developed for the northern section.

Maps 33 & 34 Page 164 & 165 the Five Oak Green bypass joins B2017 outside the school, whereas the Stantec plan shows the FOG bypass joining at the Alders Road/B2017 junction.

The funding situation is even more misleading. Policy STR 6 Page 59/60 c) states the new road will be "funded by development, although other funding opportunities will be investigated". What does this mean? TWBC state that if Tudeley Garden Village is approved then the FOG bypass will go ahead; yet it is clear that this has to be funded from somewhere and currently KCC & TWBC simply do not know or have not declared it.

The issue to then consider is that if Tudeley Garden Village is delayed or reduced in size, what happens to the potential funding of the FOG bypass? Again, it is unclear.

Now turn to page 469 of the PSLP. 6.577 – *The whole scheme (Colts Hill bypass) is not necessary to mitigate the impact.* This is utter nonsense. There is no actual evidence to support this. However, it is surely reasonable to consider that if you currently have both KCC & TWBC trying unsuccessfully for 43 yrs to fund a complete Colts Hill bypass, then one MUST assume they both consider it an absolute necessity (or it could be due to complete incompetence but we are not here to test that one!). If we then add the traffic from 1,600 homes currently being built in Paddock Wood to an already overloaded Colts Hill (the ONLY "A" class road in Capel Parish), plus the expansion to Paddock Wood industrial area that has been taking place for the past 40yrs, it is quite clear that a complete Colts Hill bypass is now an overdue project. The safety record alone is clear.

Now let's consider the B2017 through Five Oak Green. In 2016/17 local residents and Capel parish council (total at the time around 1,500 population) submitted a petition to both KCC & TWBC with 1,127 signatures demanding action regarding road safety and traffic calming measures on B2017 through Five Oak Green. (children were hit by cars, a dog being walked along a pavement by a lady with a pushchair was killed by a lorry etc etc). Capel Parish Council also undertook a £6,000 highways study to demonstrate the need for traffic calming and promote ideas to KCC.

The result is ZERO. We currently have zero traffic calming measures in Five Oak Green. No pelican or zebra crossings, no traffic islands, no roundels, no red tarmac, very narrow road and in some instances no pavements, blind bend and a 205 pupil primary school where lorries drive with wheels on the pavement to pass the parked cars. It took 8 yrs to get the speed limit reduced from 40mph to 30mph outside the school and despite TWBC now having 20mph in all of Tunbridge Wells town, we have nothing.

TWBC refused to register our properly informed petition and KCC wanted 10,000 signatures before they would accept it. We still have NO traffic calming at all and another child was knocked down earlier this year.

All these words about bypasses and yet it is obvious that the funding is not there and KCC (who run all of Kent Highways NOT TWBC) do not have any idea of when any new roads will be started, (let alone completed!) except it will be years AFTER the houses are built and our roads are clogged with developer's HGVs and others from the newly opened quarries in Capel.

If standard safety evaluation applications are applied to the data, children will have been killed in Five Oak Green on the back of this PSLP. The case against the PSLP is far too strong for it to be promoted any further.

DO NOT LET THIS CARNAGE TAKE PLACE. REJECT THE PSLP.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I think the above comments are sufficient. If TWBC would like to pay me the same daily rate as their consultants then I would be quite happy to help.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am the co-ordinator of the Kent Police Five Oak Green Community Speedwatch team, I am responsible for the Capel Road Safety Campaign (stalled due to PSLP) and have lived in Capel and Paddock Wood for 38yrs. (27 in Five Oak Green). I believe I have the ability to assist.

Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 6 Transport and Parking	
Paragraph Number 4.98	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paddock Wood is mainly a distribution centre and many salaries are unlikely to be high enough to afford mortgages on a good proportion of available properties within the plan. It is unsound to assume residents will take local jobs and many will be commuting to London or elsewhere. Currently, many of the employees at the vast Transfesa distribution/warehousing area of Paddock Wood commute from other areas of Kent & East Sussex where property prices are much lower than in the TWBC area.

There are too many assumptions and therefore this policy is Unsound.

It is also worthy of note that the current Foal Hurst Wood development in Paddock Wood is being advertised in the Hong Kong press for those seeking UK homes.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Build new housing where the need is greatest and mortgages are within reach of local salaries, NOT in areas such as Tudeley where the estate will likely become elitist and unaffordable to many unless they commute and add to the already overloaded roads and railways.

At Tudeley in particular TWBC has, for ease of management, wrapped its arms around a single developer without considering the actual needs of the community.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted. It is important that proper debate takes place.

Friends of Tudeley has been advised by an expert transport consultant, Connect. Their detailed and comprehensive report is attached. A brief summary of the main points is as follows:

The Tudeley Village site cannot offer sustainable transport. There is no rail station and never will be. TWBC's evidence refers to a "4 buses an hour" bus service and has assumed that it would capture a 7.4% market share, but that has been assessed by a specialist public transport consultancy and shown to be a wholly unrealistic market share (and the service to be financially unviable).

Because of the lack of other options the new settlement will inevitably pour thousands of cars on to local roads, especially at peak hours. The local infrastructure will be swamped, even with road widening and physical junction changes. TWBC's own consultants have accepted that even the programme of road improvements put forward will not be enough to prevent overload.

Perhaps the most striking aspect of Connect's report is that on analysing the TWBC traffic evidence, Connect have discovered that for the roads to function around this new settlement TWBC are entirely reliant on a drop in car usage of about 62%. Without that drop, TWBC's consultants accept that the local road network will be overwhelmed. It is extraordinary for TWBC's plans to be based on a 62% drop in car usage. It is contrary to decades of UK travel behaviour trends, even in places with excellent public transport (which Tudeley Village will never have). The TWBC modelling is unrealistic and obviously unachievable, rendering the Plan unsound.

Without sustainable transport, the site is not sustainable. Residents will travel outside the development to shop, to take children to school (as a certainty for most of the plan period, and very likely thereafter), to receive medical care and to go to work. The primary school is not included in the first phases of development and the secondary school will not be built until the very end of the development phasing (beyond the Local Plan period) leading residents to seek access to places at schools that are already over capacity. Even once the new schools are built many residents will choose other schools (particularly given the number of established high quality schools in Tonbridge, including grammar schools) and will travel outside the settlement anyway. The settlement is too small to attract a major supermarket and so food shopping on site will be very limited. Shopping deliveries will add yet further traffic. The costings and timelines outlined in the Infrastructure Delivery Plan are fragmented and unconvincing, with many items essential for the settlement's operation marked only as 'desirable'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR6 Transport and Parking

Part b1 of this policy commits to the establishment of rapid bus/transport links, including from Paddock Wood to Tonbridge (via Tudeley Village). While we support the establishment of such transport links, we request that the policy wording is amended to refer to "regular" or "frequent" links rather than "rapid", as this is what is no doubt intended and can be justified in policy terms.

The policy also proposed the incorporation of electric car charging points (or any new technology requirements) into new developments. While this is supported in principle, and indeed encouraged by paragraphs 105 and 110 of the NPPF, the policy should reference the practicality of universal electric charging points in new development and factor in the constraints of grid capacity where applicable. Wording should be inserted into the policy acknowledging that limitations on grid capacity may restrict developers' ability to provide universal ECV infrastructure.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Raymond Moon
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 6 Transport and Parking	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 6

Transport and Parking (statement).

- 1 a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:
- 2 The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge , restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Towns residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities' will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 Public transport.
- 3 "Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is “Pie in the Sky” as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where’s the evidence?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

[TWBC: the following extract is from the representation submitted by KeepKent.Green and the Golden Green Residents Association - for the full representation, please see supporting documents]

KKG Objects to Policies STR/SS1 and STR/ SS3 as well as providing additional commentary on other policies, that lead to conclude the Local Draft Plan is not legally compliant, is not positively prepared, is not justified or effective or consistent with NPPF.

Transport STR6

TWBC Transport Strategy Review Context and way forward September 2019 document; provides an overview of the main transportation issues and plans going forward. This report provides a vision of integrated, forward looking and accessible transport options that support economic prosperity for residents within the borough, as well as promoting the promotion of public transport, walking and cycling so that the settlements are easy to navigate , and facilitate simple and sustainable access to jobs, education and services.

East Capel & Tudeley

The current road infrastructure is already at capacity often exceeding capacity at peak travelling times leading to disruptive journey times. These proposals will further increase already congested Tonbridge and Paddock Wood Town Centres.

The sheer size and scale of these developments will only add to the congestion infrastructure problems, adding further to a substantial deterioration of air quality, increase in motor vehicle emissions, of which is already a serious concern within the borough. (TWB 8th worst district in Kent for poor air quality).

B2017 Tudeley Road, already overloaded, will experience significant increased demand from LP in Tudeley and East Capel.

A228 Branbridges Road / B2160 Maidstone Road / A228 Whetsted Road

Additional demand with a high level of underlying demand is causing queueing on approach to junction.

A26 Hadlow Road East/ Three Elm Lane

The junction is already overloaded and will increase substantially, on Hadlow Road and Three Elm Lane due to extra demand from TWBC and TMBC's LP proposals.

Limited ability to add additional highway capacity is limited by third party ownership and topography.

The SWECO Local Plan Transport evidence base indicates that most households within the area have access to 2 or more cars. This could equate to nearly 10,000 additional vehicles accessing the road network from Tudeley and East Capel.

The LP promotes prosperity and well being for residents and highlights that it will encourage greater use of public transport, walking and cycling, with the intention to provide all the necessary infrastructure to achieve this.

One of the key principles for Garden Village settlements is that they are closely situated to all major transport hubs, however in reality:

- . **Nearest railway station** from Tudeley is Tonbridge located approximately 4 miles from the centre of Tudeley village.
- . **Nearest railway station** from East Capel is Paddock Wood located approximately 4.5 miles from East Capel.

Both proposed sites are too far from the Railway stations for cycling or walking on a daily basis to capture any significant regular journeys to work or school.

The proposed express commuter bus services running every 15 minutes with dedicated bus lanes running from Tudeley to Tonbridge and Paddock Wood are not deliverable into the towns themselves due to existing housing and infrastructure.

The financial viability of providing regular express commuter/ school services will require large developer contributions throughout and beyond the build out of the development. Kings Hill Development West Malling has experienced severe issues with the reduction in regular bus services as soon as the main phases of the development were completed, as the developers withdrew their financial support, the local bus companies reduced their services.

Cycling and Cycle paths would be used for leisure rather than daily commuting especially within winter months, people cycling 8-9 miles a day to access nearest railway station will only gain a minority of cyclists.

Dedicated cycle lanes in Tonbridge and Paddock Wood, this has already been trialled by TMBC in Tonbridge in 2020.

TMBC abandoned a cycle path scheme in 2020 after 2 weeks , QUARRY HILL leading onto Pembury Road.

KCC Councillors told the Tonbridge Forum on 7 September that they had failed to be convinced by plans to introduce two lanes for cyclists to use on the west side of Quarry Hill against the advice of Tonbridge Bicycle Users Group and Green Party Councillors.

KCC REG 18 Comments

"There is currently no reference to a new rail station at Tudeley Village in the Draft Local Plan or IDP. The inclusion of an additional stop on this line in the heart of the new Tudeley settlement would make a considerable difference to the road traffic generated by these developments and exploration into the feasibility for a station should be pursued in conjunction with the master planning exercise, prior to the Regulation 19 consultation. **Without this station, the 11% modal shift would be even more difficult for the very limited remaining public transport options to deliver.** Consideration should also be given to trips heading north on the A228 into Maidstone/Tonbridge and Malling to understand the impact on the wider road network and whether mitigation is required.

Summary The County Council as the Local Highway Authority has fundamental concerns that the impact of the additional vehicular traffic brought about by the preferred growth strategy has not yet been effectively addressed in the Draft Local Plan by clearly defined mitigation measures. KCC would welcome continued dialogue to address these matters as the Local Plan progresses

Ministry of Housing, Communities and Local Government National Planning Policy Framework (NPPF)
An overarching objective in the Local Plan is to follow Ministry of Housing, Communities and Local Government National Planning Policy Framework (NPPF) guidance including Chapter 9 'Promoting sustainable transport', in particular paragraph

102: "Transport issues should be considered from the earliest stages of plan-making and development proposals, so that opportunities to promote walking, cycling and public transport use are identified and pursued"

And paragraph 108 "In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that appropriate opportunities to promote sustainable transport modes can be – or have been – taken up, given the type of development and its location"

And paragraph 110 which states that amongst others: "applications for development should give priority first to pedestrian and cycle movements, both within the scheme and with neighbouring areas; and second – so far as possible – to facilitating access to high quality public transport, with layouts that maximise the catchment area for bus or other public transport services, and appropriate facilities that encourage public transport use".

Tudeley and East Capel will both be car-dominated settlements and the predicted shift to other modes of transport will not happen as forecast, due to their locations and infrastructure restrictions. The Kings Hill Village Settlement, West Malling has demonstrated that the anticipated shift to other modes of transport do not happen.

A majority of the necessary major road improvements required will involve further removal of ANOB and Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

KeepKent.green would like to attend and participate in any Inspectors Hearing regarding the TWBC Local Plan.

Question 1

Respondent's Name and/or Organisation Mr Andrew Richards

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

Policy STR 6 Transport and Parking

[TWBC: this representation has been input against Policies STR 5 and STR 6 – see Comment Numbers PSLP_2105 and PSLP_2111]

Question 4

Do you consider that the Local Plan:

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Duty to Cooperate and broader engagement

1. I believe TWBC has failed in its Duty to Cooperate and engage with neighbouring communities, infrastructure providers and relevant LPAs, notably those in TMBC. The NPPF states that:

a. 16. "Plans should:

c) be shaped by early, proportionate and effective engagement between planmakers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees"

b. "27. In order to demonstrate effective and on-going joint working, strategic policymaking authorities should prepare and maintain one or more statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be . . . made publicly available throughout the plan-making process to provide transparency"

c. " 35 . . . Plans are 'sound' if they are:

c) Effective - . . . based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground"

2. These policy requirements are of particular importance in the context of the Pre-submission Local Plan (PSLP), given the location of the Tudeley and Paddock Wood proposals on the boundary with TMBC. These proposals will have a significant impact on Tonbridge, Golden Green, East Peckham and other communities that lie close to the proposed garden settlements. As a result, TWBC should have engaged early, both with the local communities and with TMBC as the LPA. However:

a. Community engagement has been very limited (a copy of the Draft Local Plan was not automatically lodged at the Tonbridge library).

b. 202 responses were received by TWBC in response to questions regarding Settlement Groupings (which introduced the concept of garden settlements), and of those that expressed an opinion (around 92%) the majority (around 70%) disagreed with the suggested groupings. Despite this, the plan process ignored these responses and in the DLP proposed a garden settlement at Tudeley. This undermines the effectiveness of and confidence in the public consultation process run by TWBC.

c. Further to the above point, TWBC jumped straight from a broad identification of Strategic Option 5 in its Issues and Options paper, which was to consider the principle of garden settlements, to the selection of that as an adopted policy and then to the actual selection of specific sites (notably Tudeley (2,800 dwellings) and Paddock Wood (4,000 dwellings)) in the DLP. To announce, without public

notice, allocations representing 50% of the OAN with such a significant impact on a neighbouring borough does not represent the “*early, proportionate and effective engagement*” required by policy.

d. The PSLP (STR 5) asserts that TWBC has “*fully consulted*” with Southern Water regarding the supply of fresh water and removal of foul, yet Greg Clark (the MP for Tunbridge Wells) is on record in advising that:

(1) “*Plans to upgrade the sewerage network in Paddock Wood, despite repeated discussions with Paddock Wood Town Council, have come to nothing. Residents of Paddock Wood now see development happening that they were assured would take place only when the sewerage system had been upgraded to deal with the current overuse and problems and to remove the worsening of that situation, let alone to cope with the planned development*” (House of Commons, 28 Oct 2019)

(2) This demonstrates the ineffectiveness of infrastructure planning, where this fails to provide the up-front investment needed to put in place the infrastructure needed in advance of development taking place. Without addressing such past poor performance the PSLP is unsound.

e. The PSLP (but not the preceding DLP) sets out proposals to close the Hartlake Road at its junction with Tudeley Road, and to close Maidstone Road in Paddock Wood. Both of these routes are well-used by communities in Tonbridge and Malling and their closure would add significantly to journey times, traffic congestion and pollution. Yet the absence of any effective dialogue from TWBC means that these proposals are only now being made visible.

f. A Statement of Common Ground has yet to be agreed between TWBC and TMBC. Yet the PSLP is at Reg 19 stage, far too late for constructive engagement with TMBC.

3. TMBC is on record in objecting to the DLP, noting that (letter of 16 Oct 19 from TMBC):

a. “*this is the first opportunity to comment on the detailed development strategy set out in the draft Local Plan*”.

b. “*the proximity of some of the major development proposals to the borough boundary . . . is a matter of serious concern due to the potential impacts on the local highway network, rail services and other community infrastructure including health care and education*”.

c. “*appropriate access across the railway will be an important consideration for master planning and viability*”.

These is hardly the response to be expected from an adjoining Borough that has had effective cross-boundary consultation on strategic matters.

4. As noted in another representation, this lack of engagement has also meant that any discussion with other LPAs about “*whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground (NPPF para 137c)*” has not been possible.

5. I therefore conclude that TWBC has failed in its Duty to Cooperate and that the PSLP is therefore **unsound**.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This is not capable of resolution at this stage. A Duty to Cooperate is a policy requirement during plan preparation that TWBC has failed to address.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am a regular user of the Hartlake Road and would want to contribute to any discussion regarding its closure or curtailment

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR 6 Transport and Parking

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: The following comment is copied from the email dated 24 May 2021 which contained the RHA's response]

The RHA would like to reiterate our response comments of the original consultation in 2019.

It appears our views have not been taken into account. There is still no reference to Road Freight, despite all Kent residents and businesses being reliant on this industry.

Response of the Road Haulage Association to Tunbridge Wells Borough Council.

“Tunbridge Wells Borough Council Draft Local Plan consultation”.

22nd October 2019

Summary of the Consultation

1 Tunbridge Wells Borough Council are consulting on their Draft Local Plan.

Background about the RHA

- 1 The RHA is the leading trade association representing road haulage and distribution companies, which operate HGVs as profit centres. Our 7,200 members, operating near to 250,000 HGVs out of 10,000 Operating Centres, these range from single-truck firms to those with thousands of vehicles. These companies provide essential services on which the people and businesses of the UK depend.
- 2 We proactively encourage a spirit of entrepreneurship, compliance, profitability, safety and social responsibility. We do so through a range of advice, representation and services, including training.
- 3 We would like to thank Tunbridge Wells Borough Council for the consultation and the opportunity to comment on the issues raised.

General Comments

- 1 The RHA will confine our consultation response to road haulage related matters.
- 2 We are very disappointed that Road Freight is not mentioned in the draft plan.
- 3 All food, medicine, and other essential commodities are delivered by road freight at some point in it's journey.
- 4 Logistics is the 5th largest industry in the UK.
- 5 Logistics employs 2.54 Million people.
- 6 Logistics contributes £1.24 Billion to the UK economy.
- 7 Roads are the workplace of our members.
- 8 We would like to highlight the lack of lorry parking facilities and places for drivers to take breaks in Tunbridge Wells.
- 9 Whilst Transport is referred to, Road Freight is not.
- 10 All businesses rely on Road Freight to collect or deliver their goods and products. Without Road Freight Tunbridge Wells would not be able to operate.
- 11 There are many challenges to Road Freight and local authorities must realise the importance of this sector.
- 12 The Tunbridge Wells Borough Development Plan - Transport Strategy 2015 – 2016 makes no reference in making provision for Road Freight, or many of the issues, including lorry parking that need urgent attention.

13 The RHA wish to help local authorities understand the challenges and the needs of our members in Kent.

Final Comments.

The RHA is willing to meet policy and decision makers at any time to enable road freight issues to be resolved.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Royal Tunbridge Wells Town Forum
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 6 Transport and Parking	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Data about the scale of the opportunity for active travel is lacking in the policy. For example, around 2/3 of journeys are under 5 miles and significant numbers of these could be completed by active travel, if the conditions were right. The policy needs to go further to analyse the scale of opportunity and to introduce additional incentives and choice for residents to use active travel modes, **before** considering expensive, climate unfriendly road engineering schemes.

We broadly support paragraph 1 of the policy.

We strongly support the more specific objectives set out under **points (a) and (b) of paragraph 2** in relation to Active Travel and Public Transport.

However we consider that some of paragraph 2(c) is unsound.

Paragraph 2(c) Highway network

We believe that the proposal in paragraph 2(c)(iii) to build a **new roundabout on the A264** at the junction with Halls Hole Road and Blackhurst Lane is unsound, is not justified or consistent with national policy and would be ineffective in reducing the motor traffic congestion which is put forward as a reason to build it. It would significantly increase traffic along neighbouring Halls Hole Road and Cornford Lane to an unacceptable level.

Cornford Lane and Halls Hole Road are two historic Rural Lanes lying within and overlooking the High Weald Area of Outstanding Natural Beauty. Cornford Lane ranks 3rd highest value out of 167 local lanes in TWBC's Rural Lanes Planning Guidance document and both roads provide rich biodiverse habitat. They also offer unique potential less than 2 miles from Tunbridge Wells for 'Active Travel' through an area of high landscape and amenity value which connects Tunbridge Wells, Pembury, Hawkenbury, Sherwood and Dunorlan Park, and links to High Woods Lane and the Tonbridge Cycle Route via Blackhurst Lane extend this potential further. Loss of this amenity would **not be justified**.

A similar roundabout scheme was proposed some time past for Southborough on the A26 at the junction with Speldhurst Road and Yew Tree Road. On proper professional analysis of traffic patterns, it was found to be a proposal which could worsen the existing congestion and was not implemented, a modified traffic light scheme being substituted. We believe the A264 roundabout scheme would also be proved **ineffective** upon closer scrutiny.

A number of similar issues as at Southborough arise with the proposal for an additional A264 roundabout. Such a roundabout would encourage greater rat-running along the unsuitable Halls Hole Road which is actually a narrow lane on most of its length with some high retaining walls/banks in parts which are hazardous to motor traffic. In doing so it would also encourage additional traffic on

Forest Road, which is a residential road for local traffic. This is one reason why the roundabout proposal is **not justified**.

The proposal would be **ineffective** in encouraging active travel in the vicinity because it would worsen the environment and road safety for walkers and cyclists who could otherwise advantageously use Halls Hole Road and Blackhurst Lane for active travel across the eastern side of RTW, including to the Skinners Kent Academy, to Dunorlan Park, to the proposed sports hub at Hawkenbury and to and from Pembury. In this, the proposal would also be **contrary to national policy and to paragraph 8 of STR/RTW 1** which seek to encourage active travel.

Furthermore, account must also be taken of Policy AL/RTW 19, the proposed development of a sports hub with sports pitches, stadium and car parking at Hawkenbury. It would be accessed from High Woods Lane which adjoins Halls Hole Road which would inevitably increase traffic using this highly unsuitable road and Cornford Lane which are already heavily used rat runs. A roundabout on Pembury Road at the junction with Halls Hole Road would drive unsustainable levels of traffic to these new facilities along what are country lanes past residential properties, the town's largest and well-used public park and allotments. This is **not justified**.

The point at which the roundabout would be situated is on an Arcadian section of the Pembury Road A264 and would have a detrimental effect on the local environment. It would seriously change the leafy and Arcadian character of Pembury Road, which is an important historic landscape approach to RTW with many large 19thC mansions discreetly hidden behind leafy frontages. It maintains part of the overall charm of a town which still manages to avoid intrusive road infrastructure within its heart. Loss of this feature would **not be justified**, particularly as the proposal would not prove effective in reducing motor traffic and congestion.

Finally the very substantial cost of the roundabout proposal would **not be justified** in the context of other transport needs in RTW of a much more urgent order, such as improvements to active travel corridors and Low Traffic Neighbourhoods which also figure in Policy STR 6 and which we strongly support.

Remaining parts of paragraph (c)

We cannot judge how justified or effective the remaining proposals concerning the highway network may be but we express doubts as to whether they are consistent with national policy to reduce and minimise motor traffic inter alia in the context of climate change reduction.

Whilst the Town Forum recognises the ambition of this Plan to integrate the transport approaches to development, we find that paragraph 2c fails to ensure mitigation of the impact of the several developments within the plan on the urban centre of Tunbridge Wells. It only ensures mitigating the impact to an 'acceptable degree' without defining what is 'acceptable' (by % increase in traffic flows, parking pressures, HGVs cross town traffic, etc.) and to whom it is 'acceptable'. The urban centre of Tunbridge Wells already suffers from traffic issues, and more traffic will heighten these issues, and detract from successful implementation of active travel proposals for cycling and pedestrian, and hinder the uptake of public transport services, particularly buses.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In the opening part of paragraph 2 there is a point (c) which reads "there are necessary improvements to the existing highway network and infrastructure to mitigate and address the impact of development

to an acceptable degree and ensure highway safety". These words should be replaced by the words: "there are necessary improvements to the existing highway network and infrastructure to mitigate **and minimise** the impact of development on existing communities and **to ensure safety for all road users, particularly those that are more vulnerable**".

Section 2(b)(3)

This should specifically include measures to reduce pollution from public transport, particularly buses. Whilst uptake of bus travel is low in Tunbridge Wells, there is a large school bus operation feeding the secondary schools in Tunbridge Wells which, because of the poor quality of the bus fleets, is a source of pollution particularly along the A26 corridor which is already an AQMA, and the surrounding streets. There is the need to urgently work with bus operators to only use alternatives to diesel that are much less polluting such as electric or hydrogen, as well as look at new technologies and services.

Amend the text as follows:

b Public Transport

3. Working with Kent County Council and bus operators to retain and enhance existing bus services and infrastructure, minimising pollution by changing the bus fleet from diesel fuel to less polluting sources of energy, and exploring options for innovation in vehicle types and in demand responsive services;

Section 2(c)(iii) A264

The Local Plan could be made sound by **abandoning the A264 roundabout proposal**. Instead, further refinement of the traffic light system might be contemplated, preferably including filtered permeability on Halls Hole Road in order to encourage active travel, probably by closing the road at the junction with the A264 to through motor traffic. The very high cost of the proposed scheme should be re-allocated as funding for active travel routes which would produce a much higher long term cost benefit, including improvements in health within RTW.

Amend paragraph 2(c)(iii) by deleting the words "and a roundabout at the Pembury Road/Halls Hole Road/Blackhurst Lane".

Omitted from the Regulation 18 Draft

The Regulation 18 Draft contained a paragraph which stated "Provision of increased ability to travel by rail to Gatwick will be encouraged, as will additional/better services to London". This should be reinstated.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We believe that the full arguments against the A264 roundabout proposal need to be heard by the Inspector.

Question 1	
Respondent's Name and/or Organisation	Mrs Elisabeth Searle
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Page 27 2.39 promote non motorised travel.

Page 32 strategic objective 6 To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology

Page 46 Item 7. Prioritise the needs of pedestrians, cyclists, and public transport services;

Page 57 4.101 Cycling, and the use of electric bicycles (or e-bikes), is considered to have a particularly important role in active travel, and it is recognised that the infrastructure for safe cycling needs to be in place first to bring about increased use of this mode of transport.

Page 59 Active Travel. The provision of inter-settlement walking, cycling, electrical personal vehicle, and non-motorised user routes into the centres or key destinations within settlements, including through enhancing routes such as Public Rights of Way (including footpaths, bridleways, and byways) for users of non-motorised transport. This will include links to destinations outside the borough, including Tonbridge; 4. The provision of improved cycle parking and e-bike charging points and bike share opportunities.

Page 375 Rural Lanes. Rural lanes6.225 There is a rich heritage of attractive lanes throughout the borough that contributesignificantly to the distinctive character of the countryside, while also providing wildlifehabitats. Reference should be made to the Council's adopted Supplementary PlanningGuidance: Rural Lanes and the High Weald AONB Joint Advisory Committee data setfor historic routeways (and any subsequent revisions): it is recognised that the RuralLanes SPG is now of considerable age, and will be reviewed in due course.

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The focus of the specific active travel improvements mentioned seems to be far too heavily centred around new development which is within or adjacent to existing towns, who already benefit from pavements and 20 mph zones.

My issue is there is a complete absence of proposals to address how active travel can be implemented in more rural areas where the need is greatest. The plan spans too long a time period for this to be ignored. You cannot discriminate against the rural communities in this way. It's not prioritisation, although I understand the need for that, it's neglect and in this respect I do not feel the draft plan as it stands is fit for purpose. It's a failure to develop a plan to address a well know and long standing problem situation that was accurately described over 25 years ago.

The rural lanes special planning guidance has brought about no discernable change in the last 25 years with the last approach, and the next report you commission will tell you what it did last time. That the rural lanes are a hostile environment for walkers, families with push chairs, wheel chair or mobility scooter users, cyclists and horse riders. This forces most rural families to run not just one but multiple vehicles. At one point when our children learned to drive we were a seven car family and we are most certainly not alone in this.

The key difference now though is that it's now critical that these lanes can be used for active travel that are not just recreational, but also for access to shops, schools and transport which makes it even more vital that they are made safer.

Waiting until the next special guidance report is just kicking the can down the road and is basically a failure to plan to resolve the hostile environment you are already very well aware of. I have no doubt

that you are also aware that housing developments are adding to the heavy usage of country lanes. for example cars cutting through the back lanes from new developments at Paddock Wood and Horsemonden rather than using main roads to reach the A21.

It was also well documented within the Highways England plan that the relatively recent dual carriageway which ends at Kippings Cross would result in endless traffic jams during the rush hour and any sunny weekend that force A21 users to take the the rural lanes making life intolerable and even more dangerous for the local residents between Pembury and Lamberhurst. This is a known problem which has been exacerbated by the councils own decisions and must be addressed and not ignored.

If we exclude A or B roads the vast majority of rural lanes are narrow meaning it's virtually impossible for any vehicle to pass a vulnerable road user safely by allowing for a 2m gap.

With no verges, high hedges and banks and the winding nature of the lanes there are many blind bends.

The vast majority will be national speed limit which is unacceptably high for the above mentioned road conditions and places all vulnerable road users at risk. While we cannot change the nature of the lanes we can reduce this speed limit and this should be done as a blanket change.

TWBC have made no meaningful progress in resolving this in the last 25 years and need to find a different and bolder approach to drive change. My recommendation is that you adopt the same strategy as places like the New Forest and introduce a High Weald AONB zone where as you turn off the A or B roads you see a sign indicating you are now entering the High Weald AONB zone, where a 30 mph speed limit applies to all lanes within the zone and unless you see a sign saying you are leaving the zone, everything is a 30 mph limit. The signage should warn drivers they should expect to see walkers, cyclists and horse riders and should clearly show that vulnerable road users should be passed wide (2m) and slow (less than 15 mph). This would allow for the removal of a vast amount of signage related to speed limits and save the costs of upkeep on these signs. It would also make it easier for the police to prosecute dangerous driving where it is obviously in excess of 30 mph. Visually it would massively reduce clutter and improve the visual appearance of the AONB.

This could be combined with all villages as home zones at 20 mph and the introduction of a network of quiet lanes within each parish linking key equestrian establishments to bridle paths, TROT rides or other permissive rides.

To drive change at a faster pace there should be a presumption that all new rights of way WILL BE multi user paths accessible to pedestrians, families with push chairs, wheel chair or mobility scooter users and horse riders as this offers the best value for tax payer investment given it can be used by the largest number of people.

The work done for the Brenchley and Matfield neighbourhood plan has indicated that equestrianism is second only to agriculture in providing employment. Most other rural villages will be exactly the same and yet there is no evidence of support for this industry which provides employment and could thrive by providing much needed recreational and tourist income if some effort were actually invested in resolving the deficit of bridle paths within the area. The same is probably also true of off road cycling where a better network would significantly increase the income of cafes, pubs and tourist accommodation.

The old rural lanes special guidance report identified that Kent is poorly provided with bridleways, 10 percent of PROW network compared with 20 percent nationally. Even with the inclusion of toll rides and permissive rides many rural lanes are regularly used by riders either for linking the off road network or because there is no off road resource at all in their locality. The reality is that while other areas have worked hard to increase their bridle or multi user path network often getting close to 30%, within TWBC this percentage is actually significantly less than 10 percent in many areas with just 2% within my local parish of Brenchley and Matfield. There must be a plan to upgrade the foot path network of PROW's in all rural villages to ensure that we at least achieve 20 percent of paths being upgraded to multi user or bridle paths by the end of the plan as a bare minimum.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The focus of the specific active travel improvements mentioned seems to be far too heavily centred around new development which is within or adjacent to existing towns, who already benefit from pavements and 20 mph zones.

My issue is there is a complete absence of proposals to address how active travel can be implemented in more rural areas where the need is greatest. The plan spans too long a time period for this to be ignored. You cannot discriminate against the rural communities in this way. It's not prioritisation, although I understand the need for that, it's neglect and in this respect I do not feel the draft plan as it stands is fit for purpose. It's a failure to develop a plan to address a well know and long standing problem situation that was accurately described over 25 years ago.

The rural lanes special planning guidance has brought about no discernable change in the last 25 years with the last approach, and the next report you commission will tell you what it did last time. That the rural lanes are a hostile environment for walkers, families with push chairs, wheel chair or mobility scooter users, cyclists and horse riders. This forces most rural families to run not just one but multiple vehicles. At one point when our children learned to drive we were a seven car family and we are most certainly not alone in this.

The key difference now though is that it's now critical that these lanes can be used for active travel that are not just recreational, but also for access to shops, schools and transport which makes it even more vital that they are made safer.

Waiting until the next special guidance report is just kicking the can down the road and is basically a failure to plan to resolve the hostile environment you are already very well aware of. I have no doubt that you are also aware that housing developments are adding to the heavy usage of country lanes. for example cars cutting through the back lanes from new developments at Paddock Wood and Horsemonden rather than using main roads to reach the A21.

It was also well documented within the Highways England plan that the relatively recent dual carriageway which ends at Kippings Cross would result in endless traffic jams during the rush hour and any sunny weekend that force A21 users to take the the rural lanes making life intolerable and even more dangerous for the local residents between Pembury and Lamberhurst. This is a known problem which has been exacerbated by the councils own decisions and must be addressed and not ignored.

If we exclude A or B roads the vast majority of rural lanes are narrow meaning it's virtually impossible for any vehicle to pass a vulnerable road user safely by allowing for a 2m gap.

Question 1

Respondent's Name and/or Organisation	James Singleton
---------------------------------------	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 6 (Transport and Parking)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

While the objectives in the plan around transport (and also climate change) look good, I believe the plan does not provide the actions necessary to meet the objectives laid out in it. For example, there are no plans to build a new railway station at Tudeley Village, which is essential for development to meet objectives at this site. Otherwise there will simply be many more private cars driving into Tonbridge, Paddock Wood or elsewhere. This will have a negative impact on road safety, local air quality and climate change. There are also no detailed plans for public footpaths or segregated cycleways across the proposed Tudeley Village site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A legally binding commitment to build a new railway station at Tudeley Village before development begins. Detailed plans for public footpaths (perhaps building on existing routes such as the Tunbridge Wells Circular) and segregated cycleways across the proposed Tudeley Village site, linking Tonbridge and Paddock Wood.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

While active travel and public transport are the most important there will inevitably be some private vehicle use and electrification is inevitable. The plans around electric car charging points are light on detail but it is important that they are high-powered and smart so that they can be both fast and flexible to grid demands or generation carbon intensity. A good example is Parc Eirin in Wales (<https://www.parceirin.co.uk/>). Top notch insulation, 3-phase electricity supplies, 22kW+ EV chargers, ground-source heat-pumps, solar panels and not a gas boiler, flue or chimney anywhere on the brownfield site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Stephen Paul Spedding

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 6 Transport and Parking

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My name is Stephen Paul Spedding and I am a resident of Matfield. (xxxx, Matfield, Tonbridge, xxxx)
[TWBC: Full address redacted for data protection purposes]

I would like to comment on policy STR6

I appreciate the intent of the enhancement of public footpaths but I would like to make some comments specific to Matfield.

1) Although there is a large network of footpaths and bridleways in the parish, the interconnectivity is poor. This policy should reference improved interconnectivity by minimising the need to use roads without pavements.

2) Several of the sites mentioned in the call for sites in the parish have no footpaths (or no safe footpaths). To encourage foot traffic, sites should be encourage to install new all weather paths within their boundaries. Installing new hard surface pavements is an alternative but would detract from the rural qualities of the parish. A good example would be the site that adjoins Maycotts Lane/Chestnut Lane. This site was in the call for sites and has put forward for planning permission but is not in the Local Plan. (Call for sites reference: Reference: 18 Matfield House orchards and land, The Green, Matfield TN12 7JT.). I mention it as an example only.

Chestnut Lane and especially Maycotts Lane are used by residents to get to the village shop and by walkers to transit from WT268 to 284. An all weather path inside the boundary of this site along Maycotts Lane (and Chestnut Lane) would enhance its safety and encourage its use.

I think STR6 should be strengthened to emphasise improved connectivity wherever feasible. I think all site specific policies should encourage new pedestrian paths wherever feasible to improve safety and encourage foot traffic (sustainability)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

REPRESENTATIONS ON BEHALF OF TESCO STORES LIMITED TOWN AND COUNTRY PLANNING (LOCAL PLANNING) REGULATIONS 2012 TUNBRIDGE WELLS (REGULATION 19) LOCAL PLAN CONSULTATION

As you know, we act on behalf of Tesco Stores Ltd, in respect of their various interests in Tunbridge Wells Borough and respond on their behalf to the Regulation 19 Tunbridge Wells Local Plan consultation, under the following headings.

Background

MRPP has extensive knowledge of both Tesco's activities in the Borough and the present (and historic) formalisation of planning policy in the Borough. We welcome the opportunity to engage with the emerging Local Plan and do so positively both in terms of representing our client's interests, and in terms of helping the Council to formulate effective policies which support development for the benefit of the Borough's businesses and residents.

Tesco Stores Ltd engaged with various components of the adopted Local Plan, both in terms of the development needs identified in the existing Core Strategy (primarily in relation to retail capacity) and the treatment of its various interests in the Borough in the subsequent Site Allocations DPD. We have, on their behalf, thoroughly reviewed the Reg 19 Local Plan and have sought to respond only to those policies and issues which directly or indirectly affect their property interests. We trust that this targeted approach assists officers, who will find our comments generally supportive, subject to several clarifications regarding evidence and the justification for designations, allocations and policies.

For ease, we set out our representations in a single letter and have, for each relevant policy or supporting text, used the Council's recommended responses (i.e. objection, support, support with conditions, or general observation). We have also set out some basic background to our client's presence in the Borough.

Tesco in Royal Tunbridge Wells

Tesco has been represented in Royal Tunbridge Wells since 1969 when its store at 29 Grosvenor Road first opened. Tesco has continued to serve the community, uninterrupted, since then and has subsequently enhanced its presence to now include:

- Supermarket Format – Woodgate Corner (Pembury)
- Metro Format – Grosvenor Road, Tunbridge Wells
- Rye Road, Hawkhurst
- Express Format - St. Johns Road (Tunbridge Wells), London Road (Southborough) and Commercial Road (Paddock Wood)
- One Stop Format – Badsell Road (Five Oak Green), Forest Road (Hawkenbury)

It is well documented that Tesco, having secured planning permission for a substantial replacement superstore at Pembury, took the difficult decision not to implement this, arising from significant changes in the convenience shopping sector and other local factors. However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy STR6 - Transport and Parking (support)

The entirety of this policy is supported (in terms of encouraging sustainable behaviour), and it is welcomed that the Council have considered the rural character of the Borough by promoting the development of the strategic sites (Paddock Wood and east Capel and Tudeley Village), that are surrounded by rural settings by requiring integrated active travel, together with improvements to inter-settlement travel. It is satisfying that the Council will work alongside Kent County Council, Highways England, Network Rail and other train operating companies to maximise the provision of public transport infrastructure which will reduce travel demand through the securing of such infrastructure, which will meet the day-to-day needs of residents and businesses.

The proposed local highway improvements to mitigate and address the impacts on the highway network are welcomed and the measures together with the A228/A264 including junction capacity improvement at Woodgate Corner and a roundabout at the Pembury Road/Halls Hole Road/Blackhurst Lane. These improvements will directly benefit the existing Tesco Superstore in Pembury and the proposed allocated site AL/PE 6.

We also observe that despite the policy heading including 'parking', the policy does not contain explicit objectives for parking in the Borough (albeit we note the provisions of Policy TP3). In this regard, we would point out that where opportunities for reduced parking provision exist, care should be taken not to rely on a formulaic approach, but to take account of the actual operational characteristics of the existing and/or proposed development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We reserve the right to attend any hearing sessions on the topic matters we have commented on accompanying written representations should the Inspector need to raise any questions during the Local Plan Examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Strategic Objectives

a. There are 11 points raised, yet the majority are found relating to development,

- 1 Transport is limited to a policy of giving priority to active travel and public transport,
- 2 There is but reference to “ensuring the borough is vibrant, culturally rich, and economically buoyant”, and
- 3 “conserving and enhancing the valued historic, built and natural environments, including Green Belt”, however

b. The majority of the Plan relates to “sustainable development”, sites and their uses, and there is nothing specific or being envisioned about the matters raised in “Vision and Objectives” above.

Policy STR 6

Transport and Parking

a) Active travel

b) We note that “Active travel” is inclusive of walking, cycling and emerging electrical personal vehicles. If the definition of “emerging electrical personal vehicles” is an electric powered cycle, then please say so. If it is a car with electrical power, while it is government policy to change to electric, this will have no effect on the congestion issues.

c) A cycling policy is one which works in the flat and densely populated Netherlands but, apart from a minority of dedicated cyclist who cycle largely for pleasure, has little practical capacity in the hilly Weald of Kent for daily activities such as shopping, taking children to school, the elderly, infirm, and indeed use for job related travel.

d) In short this policy is likely to have limited impact on the use of roads by either petrol or electric cars, even with enhanced public transport.

e) It is a policy that does not differentiate between leisure active travel, daily essential travel and business use. It would impact on employers having to provide changing and showering facilities, and would be a questionable all-year-round means of essential travel.

c) Highway network

a) We are disappointed that there are only mitigating actions in relation to the highway problems (funded by S106) rather than positive improvement and a strategy for the future.

b) There is no strategic road plan for the future, and in the knowledge that major road improvement takes years to bring into fruition, such a highway strategic plan needs to be included in this Local Plan.

c) The Document “Draft Consultation Response on behalf of the Tunbridge Wells Town Forum” – March 2013 – sets out approaches to the transport issues of Tunbridge Wells and notes that there would be an estimated 10% increase in vehicles from 2013 to 2026, not a decline as appears to be

the underlying presumption from all the Local Plan statements. It also includes the map of the Civic Association by-pass scheme of 1945, produced at the request of TWBC, when the then congestion around Tunbridge Wells was considered to become extreme. Such a scheme, with the noted relief roads, needs to be considered as part of the Local Plan.

d) Such a ring road would enhance Tunbridge Wells from many perspectives:

- 1 Through access from North/South and East/West without going through TW centre,
- 2 Access to/from areas of TW without travelling through the centre,
- 3 Reduce journey times, encouraging more leisure visits, enhanced shopping experience, and tourism.
- 4 Reduced congestion times, with more favourable air quality and lower carbon impact.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, 'Northern Powerhouse', it is possible that the housing needs in the south-east may need to be re-assessed downwards.
- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.
- 4 While it promotes the use of "active travel", the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Jacqui Avery
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
<p>Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.</p> <p>Policy STR 7 Climate Change</p> <p>[TWBC: see also further comments on individual sections and policies - PSLP_2269 and 2272-2279. The whole representation form (personal details redacted) has also been attached as it contains plans and images]</p>	
Question 4	

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none">. It is not positively prepared. It is not effective. It is not justified. It is not consistent with national policy
--	---

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We strongly support the inclusion of a strategic policy addressing climate change. However, we are concerned that the policy will ultimately fail in its objective because of a lack of specific targets and the inevitable tension with the content of the rest of the plan. We set out below some observations and suggestions in support of our position.

Paragraph 4.109 of the Pre-Submission Local Plan quotes the NPPF as "requiring contributions to a radical reduction in greenhouse gas emissions, minimising vulnerability and improving resilience; encouraging the reuse of existing resources". However, we note there are no requirements in the plan for radical greenhouse gas emissions, or any discussion of measuring those emissions to allow reductions to take place. STR7 gives some attention to emissions from travel and the energy requirements of any new housing, but it gives no attention to the emissions caused by the building of the houses themselves, which will be considerable and result in a rise in the borough's carbon output over the term of the plan - precisely when the town is required to reduce its carbon output.

Vulnerability will largely be increased by the loss of biodiversity and local ecology, and new drainage issues - a large portion of the plan calls for building on one of the most vulnerable flood plains in the area. We believe that developers will be at liberty to interpret these phrases resulting in a plan which fails to satisfy the NPPF.

In addition, we consider section 4 of STR7 should be amended to allow for 'partner engagement' with residents, or members of the environmental community - both of whom will have important local knowledge.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Brenchley & Matfield Parish Council
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR1, STR5, STR6, STR, STR8, STR10, PSTR/BM1, AL/BM1, AL/BM2, EN1, EN19, OSSR1, OSSR2.

[TWBC: relevant parts of this representation have been duplicated against the above policies: see PSLP_1775-1786 inclusive]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The language is not sufficiently robust in some of the policies and introduces ambiguity. Small rural parishes have very different requirements to the larger settlements, having less housing allocations, limited facilities and poor public transport. Consequently some policies have no relevance in rural areas and include no provision of additional facilities. Although the parish has a small housing allocation, the quality of life will be significantly affected by development in Paddock Wood/Capel/Horsmonden/Pembury. There should be some provision for the mitigation of the effects within other parts of the borough of increased traffic on safety, noise and air quality.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Pre-submission Comments from Brenchley and Matfield Parish C council

TWBC Pre-Submission Local Plan

STR7: Climate Change

The PC supports this policy but it will only be effective if TWBC is 100% committed to implementing it. In the IDP section 3.178 it is stated that "Borough -wide new developments will require new gas supply". This is in direct conflict with the stated aim that the entire Borough will be carbon neutral by 2030.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Parish Council supports the overall negative scores of the sites in Brenchley and Matfield that were put forward in the Call for Sites. There are very few positive scores for any of the sites and a significant number of high negative scores. Many of the sites involve the loss of high-grade agricultural land and would have a negative impact on biodiversity, landscape and heritage. Sustainability is also a factor for many of the sites, which lack a proximity to facilities and public transport.

The villages of Brenchley and Matfield have limited sustainability, with poor facilities in Matfield but a reasonable bus service to Paddock Wood and Tunbridge Wells. Brenchley has more facilities but three bus services to Paddock Wood on only two days during the week. There are no bus services in the evenings that would allow commuters to use public transport.

If you would like to attach a file in support of your comments, please upload it here. [B&M comments Local Plan.docx](#)

Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

Charterhouse comments on specific Pre-submission Local Plan Policies

Policy STR 7 – Climate Change

Charterhouse is in support of policy STR 7 and the councils efforts towards combating the Climate Emergency.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Submission Type	Web
Version	0.4
Question 1	
Respondent's Name and/or Organisation	CPRE Kent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR7 Climate Change	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

However, at paragraph 6.574 of the plan it says that where sections of the former Hop Pickers Line route are no longer available for walking and cycling, suitable alternatives and new links may need to be found, and these will be provided through negotiation with individual landowners as necessary.

It fails to say what will happen if individual landowners refuse, but the clear implication is that if individual landowners refuse, the scheme will not progress. This clearly shows that the Council is not yet giving real priority to active and sustainable travel, but instead it is still prioritising travel by car. The Council has statutory powers to create footpaths, bridleways and restricted byways compulsorily under Section 26 of the Highways Act 1980 and it must be prepared to use them.

Transport for New Homes and other signatories (including CPRE) has written to the Secretary of State in a similar vein – as part of the Homes Without Jams campaign - stating: “new housing is being sited in places that are not and, worse, cannot be served well by public transport, are inaccessible on foot or cycle and often have few or no local facilities and amenities. In addition, the design and layout of the developments themselves inhibit walking and cycling and bus service provision ”
[joint-letter-may-2021-final.pdf (transportfornewhomes.org.uk)]

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

[TWBC: for further comments by Cranbrook & Sissinghurst Neighbourhood Development Plan Steering Group, please see Comment Numbers PSLP_1574-1580, PSLP_1582-1586, PSLP_1588, PSLP_1590, PSLP_1592-1623]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Cranbrook & Sissinghurst Neighbourhood Development Plan

Response to Tunbridge Wells Borough Council Pre-Submission Draft Local Plan – 4th June 2021

Section 4: The Development Strategy and Strategic Policies

Policy STR 7: Climate Change

All good ambitions, but doesn't go far enough.

Failure to think at an ecological systems level. No mention of the importance of the river systems and the need to protect uplands to maximise their performance function in water catchment and infiltration, thereby reducing the risk of water wastage and flooding downstream.

Shoddy and minimum build quality by developers needs to be stopped.

All new developments should be required to build to net carbon zero as an absolute minimum.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you would like to attach a file in support of your comments, please upload it here. [PSLP_1571-1623\(not inclusive\)_CRS NDP Steering Group_Representation.pdf](#)

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Friends of Tudeley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 7 Climate Change	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This Local Plan does not make sufficient effort to encourage mitigation of and adaptation to climate change. The Policy STR7 titled 'climate change' is startling in its lack of urgency and bears no relationship at all to the Government's nearly zero targets.

The failings of the largest strategic sites, including Tudeley Village, to contribute adequately to the Government's 'nearly zero' 2030 targets means that the plan does not secure development and use of land which will contribute to the mitigation of, and adaptation to, climate change consistent s19 (1A) of the Planning and Compulsory Purchase Act 2004.

A description of these failings is in Section 3.3 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 1

Respondent's Name and/or Organisation Hadlow Estate

Question 2

Agent's Name and Organisation (if applicable) Turnberry

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 7 Climate Change

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

[TWBC: for full representation, please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR7 Climate Change

We support this policy, however we would suggest additional wording to part 2 where the policy states that decentralised heating and cooling networks will be given particular consideration in the largest strategic development locations. While we support this in principle, additional text should be added to the policy to make clear that this will only be considered where initial feasibility studies have concluded it is a workable solution.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's

understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Sustainable Business and Communities

The County Council supports the embedding of climate change, the environment and net zero throughout the Local Plan, and the sustainability policies within it. The County Council welcomes the requirement for developments to support Net Zero targets and for this to be stated as a strategic objective. Reference to the Kent and Medway Energy and Low Emissions Strategy, as well as the Borough Council's own targets, is also welcomed.

Rural Economy

The County Council recommends that there is reference within the Local Plan to address how climate change will impact farming and the need to adapt to new crops and farm practices. This could have an impact on the land characteristics of the area and the introduction of more reliant crops. Consideration should also be had to water irrigation/bore holes and reservoirs which may be required to support sustainable farm practices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 3. Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Flood Risk

12.1. We consider that the Local Plan, its overall development strategy, evidence and policies in relation to Flood Risk to fail the NPPF tests of soundness as it has not been positively prepared, is not justified, not effective and not consistent with national policy. These Local Plan policies include STR1, SRT7, STR5, STR/SS1, EN25, EN26

12.2. PWTC raised its strong concerns and objections with TWBC at the Regulation 18 Local Plan stage (Draft Local Plan) regarding the inadequate evidence and assessment of flood risk matters due to the extensive flood risk existing at Paddock Wood. However, these concerns were never addressed despite the SFRA prepared for the Draft Local Plan being entirely inadequate. We attach PWTC's representations to the Regulation 18 Local Plan consultation which should be included as part of our submission to the Secretary of State.

12.3. Apart from the factual errors and therefore doubt of accuracy of the SFRA's modelling (which is covered in PWTC's Regulation 18 representations), the flooding at Paddock Wood is from surface water and not fluvial, primarily from down hill flows from High Weald farmland to the South of Town adding to nitrate pollution entering the common water courses that flow into the Medway. High flood levels in Paddock Wood are usually several hours after rainfall for this reason. The only fluvial contribution is when the Medway is in surge and all the common watercourses that drain north into it from the area back up and spread out sideways over their banks adding to the surface water. No detail is provided of specific build flood mitigation measures that might be employed, other than standard local level SUDs, so it is entirely unclear how mitigation costs have been calculated or factored.

12.4. The NPPF³¹ is very clear about the approach that local planning authorities must take regarding climate change and flood risk when preparing local plans and strategic policies. However, TWBC has unfortunately failed to comply with the NPPF in respect of its approach to preparing its development strategy. The Council's approach to its Local Plan is particularly incongruous given that TWBC declared Climate Emergency³² so one would expect or at least hope the Council would have paid particular attention to the NPPF in relation to Climate Change and Flood Risk given it's declared 'emergency' however this has not been the case as we explain below.

[TWBC: for figure, please see full representation attached as a supporting document]

12.5. The current NPPF has a great deal to say about climate change and flood risk and the role of planning / plan-making to support the transition to a low carbon future in a changing climate and the

need to take full account of flood risk and coastal change including minimising vulnerability and improving resilience of places, converting existing buildings and supporting renewable and low carbon energy and associated infrastructure³³. Instead of following the NPPF's policy on climate change the Local Plan instead 1) fails to take into the full account of flood risk in the borough by not preparing suitable evidence base and ignoring its evidence base regarding flood risk in Paddock Wood and the north of the borough; 2) seeks to maximise the vulnerability of the areas of the borough already vulnerable to flood risk and future climate change such as Paddock Wood; 3) making the borough less resilient to climate change and flooding and more prone to the risks of climate change by proposing to put development in the highest risk area of the borough in terms of climate change.

12.6. In terms of planning for climate change the NPPF states³⁴ the following, however the Local Plan and its evidence fail to take into account the long-term implications of flood risk and instead of relocating vulnerable development and infrastructure the Local Plan proposes to deliver new development in the most vulnerable locations:

- . *"Plans should take a proactive approach to mitigating and adapting to climate change, taking into account the long-term implications for flood risk";*
- . *"Policies should support appropriate measures to ensure the future resilience of communities and infrastructure to climate change impacts, such as providing space for physical protection measures, or making provision for the possible future relocation of vulnerable development and infrastructure"*

12.7. The NPPF explains that *"inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere"*³⁵. Inappropriate development includes housing and the NPPF is clear that housing development should be directed away from areas at highest risk. Simply put, why did TWBC select a development strategy that clearly contravenes the fundamentals of national policy? The Council was clearly aware of the significance of the high risk of flooding at Paddock Wood as it states this as one of the Local Plan's key Issues or Challenges, where it states that *"the areas to the north and west of Paddock Wood are particularly prone to flooding"* and that a key issue is *"therefore ensuring that the proposed growth strategy can be accommodated without further harm and risk to areas that are vulnerable to flooding, provide betterment"*. This statement misunderstands national policy which is to avoid directing development to areas at highest risk (whether existing or future) in the first place.

[TWBC: for figure, please see full representation attached as a supporting document]

12.8. The NPPF explains³⁶ that *"all plans should apply a sequential, risk-based approach to the location of development – taking into account the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by:*

- 1 *a) applying the sequential test and then, if necessary, the exception test as set out below;*
- 2 *b) safeguarding land from development that is required, or likely to be required, for current or future flood management;*
- 3 *c) using opportunities provided by new development to reduce the causes and impacts of flooding (where appropriate through the use of natural flood management techniques); and*
- 4 *d) where climate change is expected to increase flood risk so that some existing development may not be sustainable in the long-term, seeking opportunities to relocate development, including housing, to more sustainable locations*

12.9. However, TWBC and its consultants appear to have avoided applying a 'sequential test' in respect of the whole borough. This is despite the Strategic Flood Risk Assessment (SFRA – Level 1 & Level 2 combined) (Juley 2019) stating as its first recommendation: *"The NPPF supports a risk-based and sequential approach to development and flood risk in England, so that development is located in the lowest flood risk areas where possible; it is recommended that this approach is adopted for all future developments within the borough"*³⁷.

12.10. Despite the SFRA consultants recommending that a sequential approach to development and flood risk is utilised for all future developments within the borough, the same SFRA consultants explain that the SFRA has not performed the Sequential Test of potential development sites but that it provides a summary at Table 13.1 summarising the flood risk to the potential development sites which can assist with completion of the Sequential Test (see figure below). As it explains at Paragraph 13.1 the SFRA does assess all 472 sites within the borough identified through the SHELAA and Call for Sites

process though. The SFRA does not explain why it does not undertake the Sequential Test – were the consultants asked not to undertake it as TWBC may not like the conclusions? It is entirely unclear from the evidence but it explains that the assessments will “assist the Council when they undertake the Sequential Test”.

12.11. The SFRA states that (see below) “The majority of sites are located within Flood Zone 1”.

[TWBC: for figure, please see full representation attached as a supporting document]

12.12. As the SFRA concluded that the majority of sites in the SHELAA and Call for Sites process are located within Flood Zone 1, how is that the most strategic growth was directed towards Paddock Wood which has the highest level of flood risk in the borough? As PPG sets out in its guidance for the application of the Sequential Test for Local Plan preparation (and as stated in the NPPF) if development can be steered towards areas in Flood Zone 1 then the sequential test is passed and it does not need to be examined further and an exceptions test is not required.

12.13. Nowhere in TWBC's evidence can we find a statement confirming that a Sequential Test was undertaken by the Council. The Local Plan itself makes no mention of a Sequential Test being undertaken as required by the NPPF. This is a fundamental flaw in the Local Plan process and evidence base and the Local Plan can clearly not continue until such a study is undertaken and consulted on.

12.14. Despite no Sequential Test being undertaken, the SFRA undertakes a Level 2 Assessment of strategic parcels as “potential development locations have been provided by the council to be assessed in the SFRA”. Twelve strategic parcels were assessed which presumably means that regardless of what a Sequential Test may have concluded, that the twelve parcels had been pre-determined as potentially preferred sites by TWBC. There is no summary map indicating where the development parcels are located or how they were selected. The evidence simply jumps from the recommendation that a Sequential Test be undertaken by TWBC to an assessment of twelve strategic development parcels.

[TWBC: for figures, please see full representation attached as a supporting document]

12.15. The Council's Development Strategy Topic Paper explains that, in relation to Sequential Testing, “the aim is to steer development to Flood Zone 1. Where there are no reasonable available sites in Flood Zone 1, guidance states that LPAs should take into account the flood risk vulnerability of land uses and consider reasonable available sites in Flood Zone 2”³⁸. It goes on to state that the Level 1 SFRA considers how the sequential test should be carried out by TWBC in preparing its Local Plan. However this Sequential Test was never undertaken.

12.16. The Topic Paper states that “It is accepted that it is often the case that it is not possible for all new development to be allocated that is not at risk from flooding”³⁹. However, this is precisely the role of the Sequential Test as stated in the NPPF to direct development to Flood Zone 1 which TWBC has blatantly ignored at arriving at its conclusion that it should locate its strategic growth in the area of the borough with the highest flood risk.

12.17. It does not take an expert to conclude from looking at the Environment Agency's ‘Flood map for planning’⁴⁰ that Paddock Wood is located within Flood Zones 2 and 3 and is an inappropriate location for strategic development. The yellow marker on the map has been dropped at Paddock Wood Railway Station which we have clarified as one cannot read the text map showing the name ‘Paddock Wood’ due to the extent of the flood risk covering the town.

[TWBC: for figure, please see full representation attached as a supporting document]

12.18. When one compares the EA flood map with that of the inset Policies Map for Paddock Wood (which one must do himself as TWBC has not overlaid the flood risk mapping with the proposed site allocations) it is striking to visualise the correlation of Flood Zone 2 and 3 covering the proposed strategic site allocations at Paddock Wood. With this very simple visualisation it is baffling for one to attempt to comprehend how the Council could have settled on the development strategy it did, selecting Paddock Wood for the location of its strategic growth.

[TWBC: for map, please see full representation attached as a supporting document]

12.19. Turning to the Local Plan policies which concern Flood Risk, it is considered that these are entirely inadequate to meet the NPPF tests of soundness. We make the following critical observations demonstrating how the Local Plan policies are unsound:

- . **Policy STR1 (The Development Strategy):** No mention of flood risk or infrastructure required to attempt to address flood risk in the borough.
 - . **Policy STR5 (Infrastructure and Connectivity):** The policy does not specify any measures or specific flood risk attenuation infrastructure. It simply states that *“Close liaison is required with Kent County Council as the lead local flood authority and the Environment Agency to ensure that adequate consideration is given to any development in flood prone areas and that appropriate mitigation and compensatory measures are put in place where necessary in accordance with Policies EN25 (Flood Risk) and EN26 (Sustainable Drainage)”*. The policy should provide far more certainty about what flood related infrastructure is going to be provided, when, and by whom rather than just liaising with the flood authorities. It talks about ‘adequate consideration’ being given to any development in flood prone areas – what does the Council even mean by this?
 - . **Policy STR7 (Climate Change):** It is rather shocking to read that the Local Plan’s policy on Climate Change does not mention flooding or how it plans to address its significant flood risks in the borough over the life of the plan. The only mention that comes close is its stated aim of not increasing and reducing surface water runoff: *“not increasing, and wherever possible reducing, surface water runoff through the use of permeable surfaces and Sustainable Drainage Systems”*. This is an inadequate policy to deal with the climate change risks facing the borough particularly in relation to flood risk.
 - . **Policy STR/SS1 (The Strategy for Paddock Wood, including land at east Capel):** This policy mentions flooding in two places.
 - o At (j) it states that *“a Paddock Wood ‘Wetland Park’ to the north of the western parcel (land edged in blue on Map 27), to deliver flood water attenuation and new wetland habitat, and allowing for informal recreation via a network of footpaths and boardwalks”*.
 - o At paragraph 13 it states the need to *“Ensure a drainage strategy is in place in consultation with the LPA, Kent County Council, the Drainage Authority, and Southern Water prior to the grant of planning permission for any substantial development on the site”*. Having a drainage strategy in place is standard practice for any proposed development site so this policy is effectively meaningless.
 - . **Policy EN3 (Climate Change Mitigation and Adaptation):** This policy takes the plan no further in respect of specifying how flood risk is addressed. It states under *“Climate change adaptation that development must incorporate measures that adapt to the impacts of climate change”* and that *“these could include” (2) Reduction in flood risk and provision of infrastructure to protect vulnerable communities and habitats and minimisation of water consumption”*. This policy is ineffective.
 - . **Policy EN25 (Flood Risk):** Policy EN25 is the Council’s proposed development management policy regarding flood risk. It contains within it text which seems to be taken for the most part directly from the NPPF so one should question whether it has any place in the Local Plan. In any case, the policy states that *“The sequential test and exception tests established by the NPPF will be strictly adhered to across the borough”*. Given that TWBC has not undertaken an Exception Test to support the Local Plan it has failed against its own policy.
- 12.20. It is important to note MHCLG’s proposed changes to the NPPF in relation to flood risk of which there are numerous. The Local Plan does not refer to these proposed changes and whilst they are still only proposed changes to the NPPF there is a clear direction of travel emerging from MHCLG in relation to flood risk which further strengthens and tightens the policies in the NPPF in relation to flood risk. As we have already set out, the Council’s approach to flood risk is clearly at odds with the NPPF in its existing and likely future form. MHCLG explains its reasoning behind the proposed changes to the NPPF which are as follows⁴¹:
- . The changes proposed are in part, an initial response to the emergent findings of our joint review with the Department for Environment, Food and Rural Affairs (Defra) of planning policy for flood risk. The government’s Policy Statement on flood and coastal erosion risk management sets out a number of actions to maintain and enhance the existing safeguards concerning flood risk in the planning system. Informed by this, we will consider what further measures may be required in the longer term to strengthen planning policy and guidance for proposed development in areas at risk of flooding from all sources when our review concludes. The Policy Statement is informed by a number of key consultations and advice:
 - o Environment Agency’s consultation exercise on the updated National Flood and Coastal Erosion Risk Management Strategy
 - o results of the government’s flood and coastal erosion: call for evidence in 2019

- o an evidence review of the concept of flood resilience
- o advice from the National Infrastructure Commission and the Committee on Climate Change
- o The Secretary of State for the Environment has written to Sir John Armitt, Chair of the National Infrastructure Commission, about the government's policies to create a nation that is more resilient to future flood and coastal erosion risk.
- . On planning and flood risk, new paragraphs 160 and 161 have been amended to clarify that the policy applies to all sources of flood risk.
- . New paragraph 160(c) has been amended to clarify that plans should manage any residual flood risk by using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management).
- . The Flood Risk Vulnerability Classification has been moved from planning guidance into national planning policy (set out in Annex 3 and referred to in paragraph 162). It is considered that this classification is a key tool and should be contained in national policy.
- . New paragraph 163 has been amended to clarify the criteria that need to be demonstrated to pass the exception test.
- . New paragraph 166(b) has been expanded to define what is meant by "resilient".

12.21. We note that the Council's SFRA identifies a number of Nitrate Vulnerable Zones (NZVs) covering considerable areas of the borough including Paddock Wood and its surrounding area (within and outside the borough). The SFRA states that these areas are "*at risk from agricultural nitrate pollution...nitrate levels in waterbodies are affected by surface water runoff from surrounding agricultural land entering receiving waterbodies*". Yet, despite identifying these NZVs the SFRA seems to almost dismiss the seriousness of the NZV designation by saying that the level of contamination will potentially influence the SuDS and should be assessed as part of the design process. We consider this matter of NZVs needs much more careful research and analysis. It is well known from other parts of the country such as Hampshire whereby nitrate mitigation has become perhaps the defining topic for planning and development due to the need to protect the water environment and conserve habitats and species. One of the ways to mitigate the likely significant effects of development is through ensuring development is 'nutrient neutral' which is part of the strategy being employed by local authorities and the Partnership for South Hampshire as it needs to be addressed at a cross-boundary level. More details about the approach being taken in Hampshire can be found on PfSH's website⁴² along with Natural England's 'nutrient calculator' and updated guidance on achieving nutrient neutral housing development⁴³.

12.22. We note that there is no mention of nitrates in the Local Plan despite this NZVs having been identified and designated in considerable parts of the borough including at Paddock Wood where strategic development is planned.

[TWBC: for figures, please see full representation attached as a supporting document]

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Respondent's Name and/or Organisation	Noreen O'Meara on behalf of Residents Against Ramslye Development
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	Policy STR 7 Climate Change

[TWBC: see also further comments on individual sections and policies - PSLP_914, 925, 926, 928, 929, 930, 931, 932, 933, 938. The whole representation form (personal details redacted has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We strongly support the inclusion of a strategic policy addressing climate change. However, we are concerned that the policy will ultimately fail in its objective because of a lack of specific targets and the inevitable tension with the content of the rest of the plan. We set out below some observations and suggestions in support of our position.

Paragraph 4.109 of the Pre-Submission Local Plan quotes the NPPF as "requiring contributions to a radical reduction in greenhouse gas emissions, minimising vulnerability and improving resilience; encouraging the reuse of existing resources". However, we note there are no requirements in the plan for radical greenhouse gas emissions, or any discussion of measuring those emissions to allow reductions to take place. STR7 gives some attention to emissions from travel and the energy requirements of any new housing, but it gives no attention to the emissions caused by the building of the houses themselves, which will be considerable and result in a rise in the borough's carbon output over the term of the plan - precisely when the town is required to reduce its carbon output.

Vulnerability will largely be increased by the loss of biodiversity and local ecology, and new drainage issues - a large portion of the plan calls for building on one of the most vulnerable flood plains in the

area. We believe that developers will be at liberty to interpret these phrases resulting in a plan which fails to satisfy the NPPF.

In addition, we consider section 4 of STR7 should be amended to allow for 'partner engagement' with residents, or members of the environmental community - both of whom will have important local knowledge.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

[TWBC: the following extract is from the representation submitted by KeepKent.Green and the Golden Green Residents Association - for the full representation, please see supporting documents]

KKG Objects to Policies STR/SS1 and STR/ SS3 as well as providing additional commentary on other policies, that lead to conclude the Local Draft Plan is not legally compliant, is not positively prepared, is not justified or effective or consistent with NPPF.

Climate Change STR-7

1) Effective spatial planning

“Reducing the need to travel, especially by private car,”

Both Tudeley and East Capel Developments will continue to rely on private car use as the main mode of transport to access Tonbridge and Paddock Wood. As they are too distant to walk or cycle on a daily basis.

Tudeley does not have frequent bus services, the PSLP mentions that a regular walk on service could be provided but lacks any detail regarding implementation and will the service be provided at an early stage of development.

Current car share schemes are in their infancy and are expensive starting with 1 hour hire from £5.00 with limited free parking within Tonbridge and Paddock Wood further costs will be incurred for parking.

Currently there are not any pedestrian footpaths that provide safe access from the sites either into Paddock Wood from East Capel or Tudeley to Tonbridge.

b) Securing the maximum possible journeys made by active sustainable transport both for people and freight.

These developments will encourage further freight use for many years with construction machinery and deliveries as well as the neighbouring quarry workings, which will be operating diesel generators and up to 88 HGV's 6 days per week. The long term cumulative effect of construction, quarry HGV's, buses and additional private cars will be significantly increased.

There is not any evidence within this policy that actively demonstrates the radical reduction in Greenhouse gas emissions, creating these substantial urban developments within this rural setting of Capel will for the next 20 years or so see a significant increase in greenhouse gas emissions and deteriorating air quality.

- . Air Quality- No air quality action plans and low emission strategies, designed to offset the impact on air quality arising from new development". While air quality is only one of many considerations that are relevant to planning, the NPPG states that where sustained compliance with EU Limit Values is prevented, a local authority is to "consider whether planning permission should be refused". With such significant cumulative developments within the Parish of Capel air quality will become a issue. No evidence of engagement, no emission mitigation assessment or cost calculation as specified in its air quality policies, Limited data, mitigation regarding the potential deterioration in local air quality and potential adverse impacts on nearby sensitive receptors.
- . Urban sprawl is the biggest threat to climate change. Sprawl is low density. It is resource-hungry and an inefficient use of land."

These developments will create substantial heat island effects which the policy indicates should be avoided.

Light pollution will be a significant issue within the site and surrounding villages as defined within the NPPF, it requires planning policies to limit the impact of light pollution within dark sky landscapes .

The permanent removal of 1,000 + acres of prime, productive agricultural land that currently produces many variety of crops, loss of important productive orchards, soft fruit, ancient woodlands, mature trees, shrubs, hedgerows, open grassland and partial removal of a natural floodplain will remove areas that provide carbon capture / absorption, will not aid in reducing greenhouse gas emissions and climate change.

Out of town employment and secondary retail space will not attract the support of large retailers and stakeholders unless commercial rents are substantially lower than Tonbridge and Paddock Wood, even then prospective tenants will wait until they have a clear understanding of the size, footfall and infrastructure / transport connectivity of the developments, which could leave the commercial areas vacant until maturity or beyond the PSLP.

This policy lacks sufficient detail, especially regarding the large strategic sites and how carbon footprint will be reduced in line with the governments 'nearly zero' 2030 target.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

KeepKent.green would like to attend and participate in any Inspectors Hearing regarding the TWBC Local Plan.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

STR 7 Climate Change

3.44. This policy is unsound because it is not deliverable. TWBC declared a Climate Emergency in July 2019 and, whilst it has set a commitment to become carbon neutral by 2030, the PSLP represents the worst of two evils.

3.45. The destruction of 600 acres of prime fertile farmland, orchards, berry growing fields, ancient woodlands, hedges and open grassland, will reduce the natural carbon absorption process.

3.46. The huge developments within Capel can only contribute to the inevitable heat island effect, and the emissions from such a vast growth in transport, especially during 20 years of construction, will increase air pollution in the borough, Tonbridge and the wider area.

3.47. Policy EN3 uses Energy Calculations as the Indicator for achieving its Climate Change target. However, energy calculations alone do not take account of the additional CO2 burden contributed by the construction of all the houses, roads and parking spaces in the proposed developments, commercial buildings, sports hub, schools, clinics etc.

3.48. There is little evidence of any partner engagement, particularly with respect to the community, to fully analyse the impact of a very large and disproportionate development at Tudeley, which will be an isolated settlement poorly connected to any transport infrastructure other than proposed footpaths and cycle ways. This will mean more use of private cars, which even if electric, still cause pollution with tyre and brake dust amongst other hydrocarbon pollutants such as oil etc.

3.49. The Tudeley Village Masterplan does not state the carbon-based fuels are prohibited from use in the dwellings. If not prohibited, the CO2 burden could increase still further.

3.50. To give some perspective, TWBC claims that its carbon emissions have been reduced from 6,046 tonne equivalents of CO2 in 2013/14 to 3,473 tonne equivalents in 2018/19. However, construction of 4,900 houses generating 17,000 metric tonnes of CO2 vastly outweighs the current claimed amount of CO2 emissions. This is explained in our topic paper on pollution – Appendix 10.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Respondent's Name and/or Organisation	James Singleton
---------------------------------------	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 7 (Climate Change)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

While the objectives in the plan around climate change (and transport) look good, I believe the plan does not provide the actions necessary to meet the objectives laid out in it. For example, there are no plans to build a new railway station at Tudeley Village, which is essential for development to meet objectives at this site. Otherwise there will simply be many more private cars driving into Tonbridge, Paddock Wood or elsewhere. This will have a negative impact on road safety, local air quality and climate change. There are also no detailed plans for public footpaths or segregated cycleways across the proposed Tudeley Village site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A legally binding commitment to build a new railway station at Tudeley Village before development begins. Detailed plans for off-road public footpaths (perhaps building on existing routes such as the Tunbridge Wells Circular) and segregated cycleways across the proposed Tudeley Village site, linking Tonbridge and Paddock Wood.

Details of the legally binding requirements to be imposed on developers to make the sites carbon negative (generating more clean energy than they consume). Details of smart EVSE (EV charger) requirements to be installed on sites at every parking space.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Society questions achievability of the Borough's objective of carbon neutrality by 2030, given that in 2018 35% of CO2 emissions were from roads and 34% from domestic gas/electricity. Such elements will require enormous and rapid change, beyond the Borough's powers of action/influence.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Respondent's Name and/or Organisation Marguerita Morton

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 1 and 2 Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Para 10

To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

It is not positively prepared
It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

In the specific cases of AL/RTW5 and AL/RTW17 and proposed development at Benenden East End How will the Council fulfil its goal by building on the Green Belt or AONB to help mitigate the effects of greenhouse gas if more and more housing is built on green open countryside. The Council should ensure that its plans and strategies including the Local Plan do not contribute to the degradation of the environment and/or increase CO2 emissions.

It should take into consideration a Tunbridge Wells Town Centre Action Plan before we know what opportunities there would be for building on previously developed land (PDL). Instead the Council have only now commissioned a Report from Nexus to provide an update on the current work in relation to town centres and retailing.

This is in response to the continuing work on the emerging Pre-Submission Local Plan, the comments received through the Draft Local Plan Regulation 18 consultation at the end of last year and in recognition of the need to formulate a new corporate strategy for Royal Tunbridge Wells town centre following the demise of the Calverley Square project.

This research is taking place to help the work of a Cross-Party group on Town Centre Development in connection with an Economic Development Strategy and the Five Year Plan. It will also help to understand the longer term consequences of the Covid-19 pandemic on the economic health and welfare of Tunbridge Wells. The consequent loss of office accommodation and retail could bring advantages if we use this space wisely. We should build affordable and environmentally sound new housing units for the young and the elderly who are locked out of decent, affordable homes. By concentrating on the urban town centre, we could find enough residential provision that would negate the need to build on Green Belt land.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The purpose of the planning system is to achieve sustainable development. CPRE believes that the NPPF tilts our Local Authorities towards development and *"they find it harder and harder to refuse planning permission even if they know that they should not."* A spokesman said *"We recognise the need to address the affordability gap...and to deliver it in a way that is consistent with our commitment to tackling the climate emergency"*.

An Appeal Court Decision on 29 January 2021 backed the disapplication of the NPPF sustainable development presumption when refusing a proposed housing scheme in an AONB area in the Monkhill Limited Case No. C1/2019/1955/QBACF

I believe that by abandoning the aforementioned development on the sites mentioned in Question 5, we would be able to meet our climate emergency objectives.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

EN9 BIODIVERSITY NET GAIN

The policy states that development will only be permitted where it can be demonstrated that there will be a measurable long term net gain for biodiversity

We think that by building on these Green Belt sites it would result in a net loss of biodiversity contrary to Paragraph 170 of the Framework which says that planning decisions should minimise impacts on and provide net gains for biodiversity, which requires that opportunities and locations for biodiversity enhancements will be identified.

EN 11- Net Gains for Nature: biodiversity

There is an abundance of wildlife, flora and fauna as evidenced in photos from residents. They would be at risk if the north east corner of the open field were to be built on that piece of land forming part of the larger habitat and providing a buffer from urban sprawl or encroachment.

EN14: Trees, Woodlands, Hedges and Development

Policies EN1 and EN14 will not allow development if it would damage or destroy one or more trees protected by a TPO. Furthermore, Para 170 NPPF states that planning decisions and policies should contribute to and enhance the natural and local environment. There will be a presumption in favour of the retention and enhancement of existing trees, woodland and hedgerow cover on site.

AIR QUALITY AT THE AL/RTW5 SITE

The Assessment says nothing about air quality due to its proximity to the A26 which is an AQMA zone and suffers moderate to severe air pollution during certain parts of the day, especially during morning and afternoon commuter travel hours. A new development is likely to add to this existing poor air quality and to traffic congestion at the Speldhurst Road access point as stated above.

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR 7 – Climate Change

1. Effective Spatial Planning

Tudeley Village

The proposed garden village of Tudeley is of insufficient scale to be self - sustainable, and will as a consequence rely heavily on Paddock Wood, Tonbridge and other locations. The absence of a rail station as part of the proposal is a significant negative for a location such as this, and will inevitably increase the need to travel by car. Reliance in this respect is placed on the delivery of significant strategic road infrastructure / junction improvements to service this alongside the strategic site proposed at Paddock Wood. It is not clear therefore how this serves to reduce the need to travel by car, a key

sustainability and climate change objective under this policy. The strategic site policy STR/SS3 therefore contradicts Policy STR 7, as this is not effective spatial planning in our view. As a consequence we would question the justification for Policy STR/SS3 as an effective policy that aligns with STR 7 and the Council's stated climate change emergency plans.

Alternative distributions without STR/SS3 should be explored again to deduce the contribution more sustainable settlements, such as Cranbrook, could make to redress the deficit and provide a more balanced spatial strategy west to east.

Horsmonden

Table 5 of the Settlement Role and Function Study (TWBC, 2021) confirms this settlement ranks 12th out of 21 settlements assessed to deduce their sustainability and appropriateness to accommodate further growth. This is in recognition of the fact it is a small rural settlement with very few local services and facilities. Yet the level of growth (320 homes) proposed to this rural settlement rivals that proposed at Cranbrook (429 homes), which is ranked second only after Southborough. The level of growth proposed at Horsmonden is therefore out of kilter with the conclusions of the TWBC study. The paucity of local services and facilities is therefore likely to increase the need to travel by car, leading to unsustainable travel patterns that run contrary to Policy STR 7. We would suggest growth at this settlement is reduced to address local needs only, commensurate with local services and facilities.

Any deficit should be directed to more sustainable settlements, such as Cranbrook. Growth at the latter was reduced from the Regulation 18 document to the Regulation 19 publication. Mainly by omitting proposed allocations that TWBC subsequently agreed were more peripheral and contrary to the sustainability objectives of the plan. However, there are sites adjacent to the centre of Cranbrook, such as our clients site (Site 25) that could make a modest contribution (circa 70 units) to meeting such needs, in a more sustainable manner. The growth proposed at present to Horsmonden is not in our view effective or consistent with Policy STR 7.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 7 Climate Change	
Paragraph Nos. 1....to...7	
And para 4.112	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

LegalCompliance. This strategy has no direct quantifiable linkage to The Paris Agreement and UK Climate Act which are both referred in the plan. Both of these legal acts demand quantifiable immediate actions to reduce carbon emissions and to taking other related steps. The UK has signed these acts and treaties.

There are volumes of well meaning words, but no quantifiable targets or steps or measurements. Therefore this plan is legally playing lip service to these acts. If implemented as it stands we will be breaking these laws.

Paragraph 4.112 of the plan states; "climate adaptation must be understood as the main priority for long term planning to secure climate resilience, and must be accepted as equally as important as meeting household needs."

If that were true in this plan we would see a target commitment to total carbon emission reductions. We would see the carbon impact of building over the detailed pieces of land planned for roads, and houses which the plan describes. We would see the calculated carbon impact of farmland, flood plain and woodland destruction. But we see none of this. We do see copious numeric detail on the building plans, but nothing on the "equally as important meeting of household needs", the climate. Why is this?

We have the science base and methodology to do the work. We have the tools, and specialists to do the work. But despite the "equivalent importance" the work has not been done. The plan is at variance to its stated objectives, and has no means to achieve them. It is therefore planning to be in breach of these legal acts.

The plan is unsound. Effectiveness and justification. For any strategic plan to be effective it must have targets, measurements and way points to review the actions taken and progress made. If we consider for a moment that we took the same approach in the plan for housing, we might end up with a plan that states "we intend to build enough housing to meet our needs, somewhere, at some point, and enough roads and schools to meet the target of 12000." This, you might think would be ridiculous. You would be right. But that is where this plan is with its "equally important climate strategy." This strategy is therefore not effective, and cannot be so.

And neither can it be justifiable. Climate change is stated as the World's and the UK's greatest strategic threat. (Despite the COVID pandemic) It cannot be justifiable to deliver a 592 page plan and a further huge sustainability report without showing a numeric linkage between the building, transport and other plans and its climate and net zero impacts. It is easily possible to do this. Can anyone justify why it would not be done? It is our most immediate existential threat.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Additions to policy STR7.

New paragraph 1. The current emissions output from the Tunbridge Wells planning area is currently X. For those topics addressed by this plan eg housing, transport, energy etc the discrete emissions are currently Y.

The additional emissions impact of building housing, roads etc contained in this plan will be Z for each category.

The impact on the total emissions of this plan will be xxxxx.

New Paragraph 2. The following strategies to hit net zero will be the following, with targets and dates.....please draft when work completed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because I have a horrible feeling that this Proposed plan is not a strategic plan that treats climate objectives equally, as it states with household needs, but a building plan with lots of details and quantifiable information and plans for development, and plenty of warm words about sustainability, and no detailed quantifiable or measurable steps to hit net zero.

It is really a building plan, not a strategic plan. And this is really serious, and must be heard, and acted upon urgently. If not now, within this planning cycle to 2038 then when? We all know we are late on this and behind the curve. We cannot allow the legal and stated net zero end targets in the plan to be kicked down the road with warm words and no data or detailed plans. We have no excuse not to act now.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See above.

Policy STR 7 Climate Change

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan is not ambitious enough on Climate Change and fails to fully embrace the extent of change needed to ensure that new development is fully compliant with the policy set by the council to be carbon neutral by 2030.

It does not contain the range of comprehensive measures needed that reflect the reality of the climate emergency that we are facing.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For an example of a Local Plan which is more ambitious on climate change see this link

<https://www.salford.gov.uk/planning-building-and-regeneration/planning-policies/local-planning-policy/salfords-development-plan/salford-local-plan/revised-draft-local-plan-chapters/6-climate-change/>

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation	Amanda Wells
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 7

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

“Policy STR 7 Climate Change

All development within the borough will recognise the Climate Emergency and be supportive of the Council’s ultimate target to achieve net zero emissions across the borough by 2030.”

The Council has failed to produce a plan which demonstrates how it will contribute significantly to achieving net zero emissions across the borough by 2030. As an example, on page 79 section 3.178 states that Borough-wide, “New development will require new gas supply connections”. Given that the provision of gas boilers in new builds is to be banned by the Government from 2025 and the Local Plan covers the period to 2038 this is a crucial inconsistency.

Restoration and reuse of existing buildings is recognised as less climate damaging in terms of resources and emissions than new building yet the Council is proposing to meet its exaggerated housing need by new developments mainly on good quality agricultural land with very little input from repurposing empty or underused buildings.

There is no qualitative analysis to demonstrate how the harm for all this new development is going to mitigate the impact on emissions and the environment.

The Plan is unsound as it fails to meet the Council's own commitment to achieving net zero emissions by 2030.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Hilary and Nick Andrews
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 8 Conserving and enhancing the Natural, Built and Historic Environment	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We are residents of East Capel, having lived in our house for 28 years. We consider certain aspects of the Tunbridge Wells local plan to be unsound, ill thought through and not justified. We wish to specifically comment on the unsoundness of this policy in light of the proposed developments at STR/SS1 and STR/SS3.

The TWBC local plan states "Development is expected to make a positive contribution to the natural, built, and historic environment of the borough." Development to the scale planned will in no way make a positive contribution to the natural, built, and historic environment of the borough especially in regards to STR/SS 1 and STR/SS 3 .

In regard to STR/SS 3 , TWBC have not fully comprehended the very close proximity of the boundary of the AONB and the proposed new development of Tudeley Village.

TWBC's approach to apply "A hierarchical approach to nature conservation and the protection of biodiversity across the sites and habitats of national, regional, and local importance within the borough" with "The objective to achieve net gains for nature and protect and enhance sites of geological interest across the whole borough and where possible to secure the long-term management of sites, areas, and features important for biodiversity and geodiversity" is simple madness in light of their proposal to remove 407 hectares of Greenbelt land.

As an example, STR/SS1 and STR/SS3 both contain bluebell woods of indigenous English bluebells. These wooded areas with the bluebells are widely considered to take 200 years to develop. TWBC seem to believe that such areas can be replaced with other planting not indigenous to the area. Wild flowers are of course protected by law.

Part of the area of STR/SS1 alongside the footpath from the A228 to Baxalls includes a long row of old oak trees with an ancient sunken road alongside. This has been partially covered at one end by the farm track but remains clearly visible underneath the oak trees. This is an area that will be destroyed by the planned building works and yet its history and archaeological significance is not mentioned. It may well be an old route from the medieval iron works that are renowned by the ancient Tudeley Charter (circa 1380) in the British Museum and if so are the last visible remains of that very important site

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We request that sites STR/SS1 and STR SS3 are removed from the local plan and that alternative sites for a reduced housing supply are considered as we dispute that the development is expected to make a positive contribution to the natural, built and historic environment of the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would appreciate our voice as long standing residents being heard. Comments made at Reg 18 were largely ignored by TWBC.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

[TWBC: see also further comments on individual sections and policies - PSLP_2269 and 2272-2279. The whole representation form (personal details redacted) has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none">. It is not positively prepared. It is not effective. It is not justified. It is not consistent with national policy
--	---

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We support this policy – and as a result are mystified as to why the plan includes site AL/RTW 16 as a potential site for development given its setting adjacent to the AONB, its Greenbelt status and its sensitivity and contribution to the landscape. As things stand in this plan, it is not clear TWBC has any realistic chance of meeting this policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR1, STR5, STR6, STR, STR8, STR10, PSTR/BM1, AL/BM1, AL/BM2, EN1, EN19, OSSR1, OSSR2.

[TWBC: relevant parts of this representation have been duplicated against the above policies: see PSLP_1775-1786 inclusive]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The language is not sufficiently robust in some of the policies and introduces ambiguity. Small rural parishes have very different requirements to the larger settlements, having less housing allocations, limited facilities and poor public transport. Consequently some policies have no relevance in rural areas and include no provision of additional facilities. Although the parish has a small housing allocation, the quality of life will be significantly affected by development in Paddock Wood/Capel/Horsmonden/Pembury. There should be some provision for the mitigation of the effects within other parts of the borough of increased traffic on safety, noise and air quality.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Pre-submission Comments from Brenchley and Matfield Parish C council

TWBC Pre-Submission Local Plan

STR8: Conserving and Enhancing the Natural, Built and Historic Environment

Residents' contributions to the Parish Plan Survey and the Neighbourhood Development Plan have shown the great importance they attach to conserving and enhancing these assets.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Parish Council supports the overall negative scores of the sites in Brenchley and Matfield that were put forward in the Call for Sites. There are very few positive scores for any of the sites and a significant number of high negative scores. Many of the sites involve the loss of high-grade agricultural land and would have a negative impact on biodiversity, landscape and heritage. Sustainability is also a factor for many of the sites, which lack a proximity to facilities and public transport.

The villages of Brenchley and Matfield have limited sustainability, with poor facilities in Matfield but a reasonable bus service to Paddock Wood and Tunbridge Wells. Brenchley has more facilities but three bus services to Paddock Wood on only two days during the week. There are no bus services in the evenings that would allow commuters to use public transport.

If you would like to attach a file in support of your comments, please upload it here. [B&M comments Local Plan.docx](#)

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP_1912), STR8 (PSLP_1922), STR9 (PSLP_1925), STR/RTW1 (PSLP_1929) and STR/SS3 (PSLP_1932). See also appendices attached]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

6. POLICY STR8: CONSERVING AND ENHANCING THE NATURAL, BUILT, AND HISTORIC ENVIRONMENT

Representations

6.1 Policy STR8 indicates how the authority will protect important features in the borough, included the High Weald AONB. As indicated in the representation to policy STR1, the authority has allowed major development in the AONB north of Longfield Road, Tunbridge Wells notwithstanding there were clear opportunities to deliver this outside of the designation at Paddock Wood. Paddock Wood like Tunbridge Wells are both key employment areas with demand for additional floorspace.

6.2 As indicated in the omission site section which emphasises that Castle Hill is a suitable and sustainable location for growth, a reason why this was discounted for housing growth was the extensive opportunities outside of the AONB within the Borough (Row 14 in Table 27 of the Sustainability Appraisal).

6.3 However, the authority has been inconsistent in its approach to employment which; as indicated in the representation to policy STR1; has confirmed development in the AONB even though there were sufficient suitable alternatives outside of this designation available. Therefore, it is clear that the Council

allows major development in the AONB notwithstanding the availability of alternatives. This should therefore be recognised in the policy alongside the allocation of land at Castle Hill.

Conclusions

6.4 The approach of the policy should consequently allow development in the AONB where it is allocated for development within the Local Plan.

11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of policy STR8.

6.5 The Plan therefore as currently prepared in not sound with respect of:

- a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and
- b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

STR8	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 5 of the policy should make reference to veteran trees (they are mentioned at paragraph 4.117) and soil biodiversity.

CPRE Kent believes the planning system should help tackle the biodiversity crisis. This means better protecting species and our most important habitats and ensuring that there are green corridors between them.

The UK's wildlife continues to decline. Since the 1970s, there has been a 13% decline in average abundance across wildlife studied and the declines continue unabated. While the biodiversity crisis also has other causes, climate change is a significant contributor, so the two crises are two sides of the same coin, and we must address them together.

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . Yes, I wish to participate in hearing session(s)

Introduction

Whilst the main thrust of the Cranbrook Conservation Area Advisory Committee's comments relate to the conservation and heritage of Cranbrook and Sissinghurst, there are some wider issues which are also of concern. In this response we will use the Headings used in the Local Plan document with page or paragraph numbers for extra clarity.

Conserving and Enhancing the Natural, Built and Historic Environment (P64-66)

We support the general principles set out in Policy STR 8.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

No, but other members of the CCAAC may wish to do so.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Conserving and Enhancing the Natural, Built and Historical Environment

It is recommended to add a reference to the opening paragraph about the Priority River Habitats that also widely occur in the district, and that conserving and enhancing those watercourses which are also identified as Priority River Habitats (map data available through data.gov.uk). The definition of a Priority River is that they consist of rivers and streams that exhibit a high degree of naturalness (i.e. show very little modification over time). The naturalness classification used to map priority river habitat is based on recent work to review the river SSSI series.

We suggest reference to green-blue infrastructure is included in Point 6. There is an emphasis on Green types, whereas Blue includes wetlands and rivers – and often the two coincide, we would want to emphasise that the two can be the same in some locations. Also, highlighting an emphasis on Blue infrastructure delivery can also create support for delivering enhancement contributions towards achieving Water Framework Directive Status Objectives, Actions and Mitigation Measures.

[TWBC: For general response please see Comment Number PSLP_462]

Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Neil Williamson (Landscape Consultant and former President of the Landscape Institute) has prepared a Landscape Report for Friends of Tudeley to look at the setting of the proposed Tudeley Village. The report is attached.

Jillian Barr, Senior Planner at Graham Simpkin Planning, has prepared a report for Friends of Tudeley to look at planning issues relating to the proposed Tudeley Village. This report is also attached.

Both of these reports have strong arguments laid out that relate to this policy. A brief summary of the key points raised in the reports is as follows.

TWBC has failed to carry out any detailed landscape sensitivity analysis or a Landscape and Visual Impact Assessment (LVIA) for the Tudeley Village site. The landowner states that he has done so, but has declined to make it available. The result is that there is no publicly available evidence of the landscape and visual impact which the development of the Tudeley Village site would have. TWBC's Landscape Character Assessment from 2017 stated (specifically in relation to slopes such as the one on which the site lies) that "New developments can be highly visible on these slopes and detract from the essential countryside character". The reasonable requirement for proportionate evidence has not been met. It is a reasonable expectation that a full LVIA should be undertaken for a proposed development of 2,800 houses on a sensitive Green Belt site immediately adjoining the AONB. (Note that by contrast, a neighbouring planning authority (TMBC) commissioned full LVIA's for five new strategic housing allocation sites, all for fewer homes and some for less sensitive sites.)

The Tudeley Village site is a 'valued landscape' within NPPF terms. It should be categorised as being of "Very High" value in landscape assessment terms and its protection and enhancement should be afforded commensurate weight.

The landscape sensitivity of the Tudeley Village site (i.e. its vulnerability to being adversely affected by the proposed development) is also "Very High". TWBC has not carried out any adequate landscape sensitivity analysis. This is a very serious omission in terms of the soundness of the Plan.

TWBC has failed to make any adequate assessment of the overall impact on tranquility or the more specific impact on light pollution, despite the fact that this proposal involves the creation of a new settlement in a sensitive rural landscape (with a dramatically greater impact on tranquility than extending an existing urban area). Neither landscape nor ecological significance have been addressed by TWBC in any meaningful way. The proposed masterplan includes features that TWBC's own AONB setting report has identified as being particularly harmful.

Development of this site will inevitably have significant adverse effects both on the setting of the AONB and directly on the AONB itself.

The harm to All Saints' Church in Tudeley (home to the only complete set of Marc Chagall stained glass windows in the world) and numerous other heritage assets has not been justified. The density of listed rural buildings is notable and together they sit in the open agricultural setting. The public benefits of development are unlikely to outweigh the harm to All Saints' Church and other heritage assets in Tudeley. A heritage impact assessment must be completed.

The development of Tudeley Village and other sites in this Local Plan may harm the integrity of Ashdown Forest SAC through nitrogen deposition. There is no evidence that Natural England and neighbouring Councils (including Wealden Forest District Council) concur with TWBC's assessment of the levels of nitrogen deposition resulting from their development.

TWBC's evidence contains material inconsistencies about the importance of the AONB setting as between this site (where that is discounted) and a Horsmonden site (where proximity to AONB is cited as the reason for not taking the site forward, even though that site was less contiguous to AONB than Tudeley and was not Green Belt).

No site should be allocated for a substantial new settlement in advance of detailed assessment work being undertaken (and made available for public scrutiny) on the existing landscape, ecological and heritage resources and assets, how the development will affect them, and how they are to be protected and enhanced. To date, TWBC has failed to do this work. The proposed development is therefore not consistent with national and local guidance and the Plan is not sound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

If you would like to attach a file in support of your comments, please upload it here. [Landscape FoT Final.pdf \(1\)](#)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages of the planning process. This includes formulation of local development policy and plans, supplementary planning documents, area and site proposals, and the on-going review of policies and plans.

There are many issues and matters in the consultation document that are beyond the remit and concern of Historic England and our comments are, as required, limited to matters relating to the historic environment and heritage assets. In our previous comments (by letter dated 15 November 2019), Historic England focused on the objective of the National Planning Policy Framework to set out a positive strategy for the conservation, enjoyment and enhancement of the historic environment (NPPF, Paragraph 28); and contain policies to deliver the conservation and enhancement of the historic environment (NPPF, Paragraph 185).

Further to our comments on the Regulation 18 draft Local Plan, and the Council's response set out in a letter dated 23 April 2020, we entered a period of engagement to address the concerns and issues raised in that our representations. This included an exchange of correspondence and two meetings on 3 June 2020 and 4 May 2021. You shared with us also informal comments by a Planning Inspector on the wording of the heritage policies of the plan, which we discussed by email and at the latter meeting. In view of the changes made to the draft Local Plan we consider that our comments on the Regulation 18 stage draft Local Plan largely have been addressed in the current Pre-submission version or are, in our view, not now likely to affect the soundness of the Local Plan.

We welcome the inclusion of policies for the historic environment in the local plan that meet the obligation for preparing the positive strategy required by the NPPF. The key test of the soundness of the plan and the achievement of sustainable development as defined in the NPPF in respect of the elements that relate to the historic environment, in our view, have been met.

We note also the intention to prepare a separate development plan document for the Royal Tunbridge Wells town centre area, which we expect to address some of the issues relating to sites allocations and policy wording raised in our earlier Regulation 18 representations. We look forward to discussing this document with you in due course.

We should like to stress that this opinion is based on the information provided by the Council in its consultation. To avoid any doubt, this does not affect our obligation to provide further advice and, potentially, object to specific proposals which may subsequently arise where we consider that these would have an adverse effect upon the historic environment.

We hope that these comments are useful.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Biodiversity

The County Council is supportive of references to net gains for nature and green corridors within this policy. The objective to achieve net gains for nature and to protect and enhance sites of geological interest across the whole borough, and where possible, to secure the long-term management of sites, areas and features important for biodiversity and geodiversity is welcomed.

Public Rights of Way

The County Council recommends that the PRoW network is considered an asset within the Borough. Consideration should also be given to ensure that the character and value of rural views in wider environments of development sites should not be changed to a state that they become unattractive or out of context for users.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- It is not justified
- It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

STR 8: Conserving and Enhancing the Natural, Built, and Historic Environment

Natural England welcome the policy in point 4 which requires development within the AONB to be managed in a way that conserves and enhances the natural beauty of the area. We also welcome the landscape-led approach outlined in point 3.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones

as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

We support this policy – and as a result are mystified as to why the plan includes site AL/RTW 16 as a potential site for development given its setting adjacent to the AONB, its Greenbelt status and its sensitivity and contribution to the landscape. As things stand in this plan, it is not clear TWBC has any realistic chance of meeting this policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Town Forum strongly support this policy and the enhancements which have been incorporated since the Regulation 18 Draft. This is a key policy to ensure that the character of both the natural environment and heritage built environment in and around Royal Tunbridge Wells will receive proper stewardship and protection during the Plan period. This fairly unique combination of an extremely fine natural environment and built heritage is fundamental to the charm of the town and has a tangible economic value in terms of leisure and tourism, both of which are likely to grow in future years.

We strongly support the policy concerning designated and non-designated heritage assets and will be pleased to work with TWBC in identifying, conserving and enhancing further non-designated heritage assets within the unparished area.

We also strongly support the reference to green corridors and green infrastructure networks, which play an important role within Royal Tunbridge Wells.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Conserving and Enhancing the Natural, Built and Historic Environment (Policy STR 8)

This Policy fails to make it clear how it applies to the existing built environment, including smaller urban sites, by using the term 'landscape' ambiguously.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposal: Reword as follows: Development is expected to make a positive contribution to the **whole** natural, built, and historic environment of the borough. This includes landscape assets, biodiversity, geodiversity, priority habitats and species, designated sites and areas, archaeological assets **and the general built environment**. This will be achieved by the following approach:

- 1 Development should contribute to, and enhance, the urban and rural **environment** of the borough, with particular regard to the designated High Weald Area of Outstanding Natural Beauty;
- 2 The landscape character of the borough will be protected through retention and enhancement of the key characteristics or valued landscape features and qualities, as well as through the restoration of landscape character, in accordance with the objectives of the Borough Landscape Character Assessment SPD;
- 3 Development proposals must be informed by a clear understanding of the **setting** (on- and off-site) and demonstrate how it has incorporated and enhanced site characteristics and landscape features, avoiding and minimising harm wherever possible. Landscape mitigation, where required, should be identified at the outset of the scheme design process to ensure that proposals are truly landscape-led and should be used to reinforce and restore **local** character. All new landscaping should make a positive contribution to landscape character;

Reason: Besides some ambiguity in the wording of the Policy it refers to the Council's Historic Environment Review, which however does not take account of the history of Royal Tunbridge Wells as a nineteenth century residential town which shaped so much of its environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

This is related to our objection about local heritage assets. We are particularly concerned that consideration of the built environment within the town of Tunbridge Wells is not sufficiently recognised. The architectural history of our town is important.

[TWBC: see PSLP_1539 for objection to Local Heritage Assets under Policy EN5]

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Save Capel
Question 2	

Agent's Name and Organisation (if applicable) Knights Solicitors

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

[TWBC: for further comments by Save Capel, please see Comment Numbers PSLP_1964 and PSLP_1973-1987]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

- 1 Development proposals must be informed by a clear understanding of the landscape context (on- and off-site) and demonstrate how it has incorporated and enhanced site characteristics and landscape features, avoiding and minimising harm wherever possible. Landscape mitigation,

where required, should be identified at the outset of the scheme design process to ensure that proposals are truly landscape-led and should be used to reinforce and restore landscape character.

3.51. An SER and EVI will be undertaken at planning application stage should the Inspector approve the plan. The SER scope is contained within the LP Sustainability Appraisal but there is no in-depth assessment of individual heritage assets as supporting documentation nor mitigation identified at the outset. No evidence is offered as to how the three key areas will be conserved and enhanced. The Policy is contradictory – if mitigation of harm is required neither conserving nor enhancing is possible.

3.52. Landscape mitigation is stated as being required “at the outset of the scheme design process”. It is therefore assumed that this basic scheme mitigation design has been completed at the Pre-Submission Plan stage yet no basic details of how this is envisaged to be achieved in Tudeley and East Capel have been provided.

3.53. There is no detail of how, as stated in paras 6 & 7, biodiversity, green corridors, green infrastructure, historic field patterns, listed buildings and their setting are going to be enhanced in Tudeley and East Capel with a planned nearly 5000 houses being dumped in current rural setting.

3.54. Many promises are made regarding the preservation and enhancement of biodiversity, heritage, landscape, sites of geological interest etc. but very little if any detail on how this will be achieved both physically and financially in the evidence documentation.

3.55. TWBC is one of only four councils who have adopted Bio- Net gain policies ahead of mandatory national adoption. The assessment by the Durrell Institute into these councils’ performance during 2020 indicates that in reality net gains translate into considerable loss of habitat and an expectation of non-urban habitat decreasing by 21%.

3.56. The PSLP does not indicate any effective robust measures to counter this and thus is not positively prepared, is inconsistent with Government strategy and the plan unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound

Yes

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy and recommend further strengthening it with reference to the emerging requirement for Local Nature Recovery Strategies.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We propose amending para 6 to read:

6. Opportunities and locations for biodiversity enhancements will be identified and pursued by the creation, protection, enhancement, extension, and long-term management of green corridors and through the development of green infrastructure networks in urban and rural areas to improve connectivity between habitats **in line with the Local Nature Recovery Strategy;**

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy STR 9 Greenbelt	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We are residents of East Capel, having lived in our house for 28 years. We consider certain aspects of the Tunbridge Wells local plan to be unsound, ill thought through and not justified.

We do not consider that TWBC have demonstrated "exceptional circumstances" to alter the boundaries of Greenbelt and remove large areas of land from that designation nor do we think that this is fully justified; especially the large areas at East Capel (148ha) and Tudeley Village (183ha) which will destroy the original concept of green belt to prevent urban sprawl.

TWBC's approach to apply "A hierarchical approach to nature conservation and the protection of biodiversity across the sites and habitats of national, regional, and local importance within the borough" with "The objective to achieve net gains for nature and protect and enhance sites of geological interest across the whole borough and where possible to secure the long-term management of sites, areas, and features important for biodiversity and geodiversity" is simple madness in light of their proposal to remove 407 hectares of Greenbelt land.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should argue AGAINST the release of land from greenbelt, preserve its' precious green belt land, should reduce its' housing development targets in light of the constraints of greenbelt land and further consider use of brown field sites to meet more appropriate housing targets.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because we consider our voice was not fully heard and comments considered at the Reg 18 process.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

"The release of Green Belt land has been undertaken through this Local Plan, and is detailed where relevant in the place shaping policies in Section 5.

In order to protect the remaining Green Belt, as defined on the draft Policies Map, the Council will consider the proposal against the relevant policy in the National Planning Policy Framework, or the national planning policy at the time a planning application is being determined."

TWBC's policy simply doesn't adequately protect the Green Belt. The plan dedesignates 5.35% of the borough's Green Belt, with only a small area South West of Paddock Wood being added. If this pattern of dedesignation is repeated each time the plan is updated/replaced, the Green Belt will disappear. The South East of England is already more densely populated than other parts of the country. The borough cannot build and build, and maintain what is special to this area. The policy should be more explicit about protecting those areas of Green Belt that are either more sensitive or contribute more to the Green Belt policy objectives.

In addition, given the number of local plans around the country that propose the development of Green Belt land, we find it very difficult to believe that each district or borough can be exceptional – we think you must agree that would be an exceptional number of exceptional circumstances.

Individual site planning applications should address the removal of land from the Green Belt. This should not be done by the Local Plan as the time period covered is lengthy and changes might negate the need.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy STR 9 Green Belt

[TWBC: the full representation attached has been divided between Policy STR/RTW1 (PSLP_2099), Vision and Strategic Objectives (PSLP_2104), Policies STR3 (PSLP_2106), STR9 (PSLP_2107), and AL/RTW17 (PSLP_2108).

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Axiom Developments Limited (hereafter referred to as Axiom) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Colebrooke Park, which Axiom is promoting for employment-generating development as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The Site

1.2.1 Our client has been promoting land at Colebrooke House for a business park within an attractive parkland campus setting. The site was promoted via the original Call for Sites process in 2016 (site 101) and representations were made at the previous Reg 18 consultation. The site boundary is shown in Figure 1.

1.2.2 The site lies outside of the current settlement boundary for Royal Tunbridge Wells and within both the High Weald Area of Outstanding Natural Beauty (AONB) and the Green Belt.

1.2.3 As a result of the recent A21 dualling project, the site benefits from direct access onto the A21 via the Fairthorne junction. This now provides the site with excellent access to the national road network, whilst also being well-located in relation to the existing employment areas along Longfield Road. The A21 improvements present an excellent opportunity for the site to make a substantial contribution to the local economy through development of the site.

1.2.4 The 8.5ha site comprises a large 19th century residential property set in parkland grounds. Whilst being habitable, the property is currently in need of repairs following a period of under-investment. Its value as a residential property has been substantially affected as a result of the A21 dualling works.

[TWBC: see full representation attached for Figure 1: Proposed allocation site boundary].

1.2.5 There is a unique opportunity to provide employment-generating development which makes the most of the existing characteristics of the site. For example, this could take the form of a high-quality business park, or other employment-generating use set within an established parkland setting and based around the existing 19th century Colebrooke House.

1.2.6 The site provides an opportunity to provide an attractive business location, accessible to the A21 as well as local businesses and services. A Vision Document has been prepared and was submitted with our Regulation 18 representations previously which shows that the site would be capable of delivering around 11,750 sqm of employment-generating floorspace, which would be capable of supporting between 885 and 1,437 jobs if in office use.

1.2.7 The Council's Economic Needs Study (ENS) demonstrates the need for good quality economic development land locally. This was also backed up by responses from stakeholders identifying Tunbridge Wells as a good office and industrial location. ENS paragraph 9.66 in particular identifies demand for offices, and especially higher quality Grade A accommodation in accessible locations, which is the type of development proposed at Colebrooke House. It would score well against all of the bullet points set out in ENS paragraph 10.29, i.e. excellent accessibility; public transport and parking availability; and it being an area with a critical mass of employment use and amenities which would be attractive to investors.

1.2.8 The development would have excellent strategic transport links to the newly upgraded A21 as well as providing opportunities to create and improve existing pedestrian, cycle and public transport links to North Farm, Tunbridge Wells and Tonbridge. Pedestrian, cycle and emergency access links could also be provided into the land to the west, which is also proposed for development as part of the Local Plan proposals.

1.2.9 In respect of deliverability, the site has no planning history of relevance nor a history of unimplemented permissions, and there are no known impediments to the sites being phased for potential development. There is an excellent opportunity to deliver a high-quality employment development scheme during the plan period.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Policy STR 9: Green Belt

1.5.15 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.5.16 We **SUPPORT** this conclusion and agree that some Green Belt release is needed to meet housing and employment need in the areas of the borough affected by that designation.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Axiom Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We generally support the Council's overall strategy and do not object to the proposal for the site to be removed from the Green Belt and safeguarded for future employment uses. However, for the reasons set out in these representations, we believe there are strong arguments in favour of allocating the land for development now.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough.

1.5.9 However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.10 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet borough-wide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.11 With the above modification, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN – REPRESENTATIONS ON BEHALF OF BELLWAY

We write on behalf of our client, Bellway Homes Strategic, in relation to the Pre-Submission draft Local Plan for Tunbridge Wells Borough which is currently subject to public consultation. This letter provides the background to Bellway's interest in the Borough and sets out representations on their behalf.

BACKGROUND

Bellway has a legal interest in the land to the north and south of High Woods Lane (Mouseden Farm) on the eastern edge of the built up area of Tunbridge Wells/Hawkenbury which it is promoting for residential led development. The site is separated by High Woods Lane. The area south of High Woods Lane is currently in agricultural use and bordered to the east by woodland, to the south by existing sports uses and to the west by existing residential development. The area north of High Woods Lane is also within agricultural use, with further agricultural uses/woodland to the east and an indoor bowls club and allotments to the west.

The adopted Proposals Map indicates that both parts of the site are within the Green Belt and AONB.

On the basis of the Proposals Map published as part of this consultation indicates that the southern part of the land (south of High Woods Lane) is to be designated under Policy RTW1923 with that area to adjoin the 'Proposed Limited to Built Development'. The northern part of the land promoted by Bellway is not subject to any other proposed allocations. The draft Proposals Map appears to indicate that both parts of the site will continue to be located within the Green Belt and AONB.

Comments on Other Documents

Green Belt Assessment

In the LUC Green Belt Strategic Study of November 2016, the southern part of the site promoted by Bellway is located in Parcel TW6 and the remainder in Broad Are BA7, as shown below:

[TWBC: for map, please see full representation attached as a supporting document]

Parcel TW6 is identified as an area for further assessment, with Table 6.2 of the 2016 document identifying 'Potential Stage Two parcels and broad areas'. In relation to TW6, Table 6.2 identifies the 'Key Stage 2 Considerations' as being the "Relationship between settlement and countryside, with reference to role of High Wood in forming barrier to encroachment/sprawl."

The Key Stage 2 Considerations for Parcel BA6 are referred to as being "Contribution to preventing countryside encroachment and role in historic setting of Tunbridge Wells".

As an initial comment, Bellway note that the assessment of BA6 cannot be relied upon as an indication that all the land within the Broad Area fulfils Green Belt purposes to the same extent. For example, while the 2016 document may have concluded that BA6 makes a contribution to preventing countryside encroachment and plays a role in the historic setting of Tunbridge Wells, that is not to say that the land promoted by Bellway to the north of High Woods Lane performs these functions.

The LUC Tunbridge Wells Green Belt Study Stage Two report was published in July 2017. In relation to the Broad Areas, this report found that "All 10 broad areas were considered to rate very high for harm to Green Belt resulting from release of land for strategic development. It should however that there might be opportunities for small-scale

– i.e. non-strategic – development that would result in less harm to Green Belt purposes." This overall conclusion accords with Bellway's own interpretation as articulated in the previous paragraph of these representations.

Table 1.1 of the July 2017 LUC report identifies all of the specific parcels with moderate or lower harm rating. Only seven specific parcels are found to have a low or very low level of harm on the Green Belt. Parcel TW6 was split in two for the purposes of this assessment: TW6a (including the southern part of the land promoted by Bellway) and TW6b. TW6a is identified as having a 'moderate' level of harm on the Green Belt. However we note that Table 6.1 of the July 2017 report found that Parcel TW6a would have: makes a moderate contribution to GB purpose 1; makes a weak or no contribution to purpose 2; makes a moderate contribution to GB purpose 3; and makes a moderate contribution to GB purpose 4.

Appendix A of the 2017 report considered the Broad Areas. However it does not appear as though there was any analysis over the contribution that smaller parts of the Broad Areas makes to the Green Belt purposes and therefore no analysis as to the extent to which these could accommodate development. This approach appears at odds with the conclusions elsewhere in the 2017 report that "there might be opportunities for small-scale

– i.e. non-strategic – development that would result in less harm to Green Belt purposes." The Turley Outline Landscape, Visual and Green Belt Advice Note considers the contribution that the northern part of the site promoted by Bellway (which falls within BA6) makes to the Green Belt purposes as follows:

- . Whereas LUC conclude that BA6 makes a strong contribution to GB purpose 1, the Turley Outline Landscape, Visual and Green Belt Advice Note demonstrates that the land northern part of the land promoted by Bellway (within BA6) should only be considered to make a moderate contribution.
- . In relation to GB purpose 2, LUC conclude that BA6 makes a strong contribution. The Turley Outline Landscape, Visual and Green Belt Advice Note demonstrates the edge of Pembury is over 2km away from the Appraisal Site and on account of intervening topography and woodland has no perceivable relationship with this settlement area. Development of the northern parcel of the Site would result in little or no perception of the narrowing of the gap between towns and it is therefore considered to make 'Weak/No' contribution to Purpose 2.
- . LUC conclude that BA6 makes a strong contribution GB purpose 3. The Turley Outline Landscape, Visual and Green Belt Advice Note demonstrates that due to the relationship of the northern part of the area promoted by Bellway to the wider countryside it is considered to make a 'Moderate' contribution to Purpose 3.
- . LUC conclude that BA6 makes a strong contribution to purpose 4. The Turley Outline Landscape, Visual and Green Belt Advice Note explains that the contribution to this purpose is made most strongly by Dunorlan Park which is a key feature on the edge of the historic town. However, the parcel does form part of the setting to the edge of both the Tunbridge Wells Conservation Area and Dunorlan Park and is glimpsed in some key views from the latter. For this reason it is considered to make a 'Moderate' contribution to Purpose 4.

On the basis of the Turley Outline Landscape, Visual and Green Belt Advice Note, it is considered that the July 2017 LUC report overstates the contribution that the part of Broad Area BA6 promoted by Bellway has been overstated. When this part of BA6 is considered independently, it makes a moderate contribution to Green Belt purposes.

Appendix A of the 2017 report also provided an analysis of the specific parcels against the Green Belt purposes. Bellway consider that the assessment in relation to Parcel TW6a is flawed. The table below sets out the assessment of this parcel in the LUC 2017 report and provides our response and reason why the conclusions are flawed:

[TWBC: for table, please see full representation attached as a supporting document]

The Turley Outline Landscape, Visual and Green Belt Advice Note demonstrates that the contribution of Parcel TW6a has been overstated, particularly when the land promoted by Bellway is considered independent.

On the basis of the summary set out above, and supported by the Turley Outline Landscape, Visual and Green Belt Advice Note, it is clear that the LUC reports which have informed the Local Plan in relation to the land currently designated as Green Belt have overstated the role and function of the land promoted by Bellway.

Bellway therefore consider that it is essential that the Council undertakes an updated and more robust analysis of the extent to which particular areas (including the land promoted by Bellway) contribute to the Green Belt purposes. Without this updated evidence, Bellway contend that the Council cannot have certainty that the distribution strategy which it has chosen (including the Tudeley Village concept) is justified and that alternative options should not have been pursued.

Strategic Housing and Economic Land Availability Assessment (SHELAA)

In the January 2021 SHELAA the land promoted by Bellway is considered under site reference 53.

However we note that in the July 2019 document, the assessment found that the "Site is suitable in part as a potential Local Plan allocation subject to further consideration". The reason for this conclusion was stated as being *"The southern parcel of this site lies adjacent to the LBD and is likely to be sustainable in this context. This would form a logical extension to LBD. The remaining area, the first parcel whilst in proximity to the LBD would not form a logical extension to the LBD and is considered to adversely affect the landscape setting of the town and is part of a Green Belt parcel the release of which is considered to result in very high harm, and setting of an Historic Park and Garden."*

The 2019 SHELAA conclusion was that the southern part of the site promoted by Bellway (i.e. the land south of High Woods Lane) would be a **logical extension to the LBD**.

In our previous representations, we noted that the SHELAA is an assessment of sites for housing and economic land purposes and so the conclusions of that document must be read in that regard. The analysis of site 53 and the conclusions in relation to the suitability, sustainability and logic of the site must therefore refer to housing or economic land uses. There is no suggestion in the SHELAA that the conclusions in relation to site 53 relate to any other form of land use or that they would not apply in relation to housing or economic uses.

However TWBC's January 2021 SHELAA now suggests that the assessment in relation to the southern parcel of land relates to a potential allocation for sport and recreation uses. We do not consider that conclusion is justified and reiterate that the SHELAA is intended to address housing and economic land matters. The conclusion in the 2021 SHELAA appears to be a consequence of the decision to allocate the site for sports and recreation uses.

SUMMARY

These representations set out **significant concerns** regarding the draft Local Plan for Tunbridge Wells Borough. In summary, the level of housing required to address issues of affordability and does not provide any realistic opportunities to make a meaningful contribution to meeting affordable housing needs. Whilst the Council claims that the housing supply represents a buffer over the planned requirement, this is based on extremely optimistic assumptions and short lead in times before the key sites deliver. In the case of Paddock Wood the Plan then relies upon very high delivery rates.

A more diverse and greater range of sites are required to address affordability, provide affordable housing and to help ensure that the housing requirement is achievable.

The Plan also provides a disproportionately low level of new housing at Tunbridge Wells despite the sustainability of this settlement, in comparison to other, less sustainable locations. This is borne out by the selection of the Tudeley Village site as a location for a new garden village in a remote location where the extent of measures to support sustainable travel is extremely unclear. Alternative options are available which would direct development to the most sustainable settlement (i.e. Tunbridge Wells) and which are in sustainable locations.

This conclusion is supported by the Council's own evidence which demonstrates the availability and suitability, sustainability and logic of alternative sites on the edge of Tunbridge Wells (including the land promoted by Bellway which is subject to these representations).

The Council's own evidence has overstated the contribution that certain sites, including the land promoted by Bellway which is subject to these representations) makes to the Green Belt. When the land is assessed in a more robust manner (and when assessed independently rather than as part of wider Broad Areas), the contribution is significantly reduced.

The southern part of the land promoted by Bellway (i.e. the land south of High Woods Lane) is subject to a planning permission for recreational uses. That application was submitted by the Borough Council, despite it having no interest in the land. In contrast, Bellway has a legal interest in the land and is promoting this area, as part of a wider site, for residential development. Bellway would be willing to work with the Borough Council to explore opportunities for bringing forward the approved recreational facilities in the area, which residential development on the site could help deliver.

Whilst the Council is pursuing (by allocating and seeking planning permission) land outside of its control for sports and recreation uses, it is concurrently planning to release a number of sites which are already within those uses for residential development which the Council does own. As a matter of general principle this approach appears unjustified.

As it is currently drafted the Local Plan is unsound. It relies on unsustainable and undeliverable solutions to housing needs and is partly premised on releasing the Council's own land for housing whilst proposing land it does not own for compensatory sports and recreation purposes. These fundamental issues of unsoundness are compounded by a lack of documentary evidence to explain why the Council has selected the approaches and proposed allocations in the emerging Local Plan.

Bellway would be willing to enter in to dialogue regarding the land north and south of High Wood Lane and the extent to which this site could deliver housing (delivering the greater range and diversity of sites) in a sustainable location. Bellway would be willing to discuss the manner in which such housing could assist in delivering additional recreational facilities in the area.

[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP_2003), Vision and Objectives (PSLP_2005), Policies STR1 (PSLP_2006), STR4 (PSLP_2008), STR9 (PSLP_2015) and Section 6 Development Management Policies (PSLP_2016)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this this land to be suitable for development.

1.2 The site

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Policy STR9

1.5.85 Caenwood Estates also agrees with Policy STR9 insofar as it confirms that the removal of this land from the Green Belt has been fully justified through the consideration of reasonable alternatives and is supported by exceptional circumstances.

1.5.86 The proposed RTW/AL5 allocation site was assessed in the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) which concluded that it was suitable for the development of around 100 houses, and would form a sustainable extension to the built-up area of Royal Tunbridge Wells.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 9 Green Belt

[TWBC: see full representation attached. Parts have been input into Policy STR1 (PSLP_1912), STR8 (PSLP_1922), STR9 (PSLP_1925), STR/RTW1 (PSLP_1929) and STR/SS3 (PSLP_1932). See also appendices attached]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

7. POLICY STR9: GREEN BELT

3.1 Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley whereas it does not propose the exclusion of the Castle Hill site, adjoining north Royal Tunbridge Wells.

3.2 For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council’s Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Castle Hill is viable at property values expected elsewhere in the Borough.

3.3 The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions

are envisaged the consequences for the achievement of sustainable development must be examined. The paragraph is clear that:

“Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which is previously development and/or is well served by public transport.”

3.4 The Council's choice of Tudeley village does not accord with either of these criteria, whereas Castle Hill, with its relationship to existing services and facilities in north Tunbridge Wells, does accord with this advice. Furthermore, as indicated in other representations, although Castle Hill lies within an AONB, the authority has accepted major employment growth north of Longfield Road which is within both the AONB and Green Belt although there were clear opportunities for development in attractive areas for commercial development outside of both designations (at Paddock Wood). Therefore, it is clear that the need for development, be this either employment or housing can justify major development in both designations. This therefore confirms the preference for Castle Hill in contrast with the unsuitability of Tudeley Village.

3.5 Additionally, the Stage 2 Viability Assessment (appendix 11a) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the latter it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

3.6 The Council in advancing revisions to its Green Belt is under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

3.7 Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

3.8 At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

3.9 In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

3.10 In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected

housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor”.

3.11 The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However, whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

3.12 As outlined within this statement and appendix 21, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with Castle Hill where sustainable development will be achieved and therefore exceptional circumstances can be demonstrated.

3.13 The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

“In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

3.14 Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

3.15 Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However, matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

3.16 The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

3.17 The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms

that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

3.18 The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

3.19 Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

3.20 This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

3.21 Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

3.22 By contrast, the Castle Hill Masterplan highlights the very limited harm to the borough's Green Belt given the well contained nature and definition of the site (by the A21 to the east, railway line to the west and mature Ancient Woodland to the north) which would arise from this site's omission from the Green Belt. This matter is addressed further below.

11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039. B) That the housing requirement is increased to 14,364 dwellings; C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and D) That reference to a new garden settlement at Tudeley Village is removed from the plan. E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

3.23 The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

3.24 To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR 9 Green Belt

[TWBC: the full representation attached has been divided between Vision and Strategic Objectives (PSLP_2263), Policies STR1 (PSLP_2264), PSTR/PE1 (PSLP_2265), AL/PE3 (PSLP_2266), STR9 (PSLP_2267) and Development Management Policies (PSLP_2268)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Pembury, which Countryside is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the

reasonable alternatives, and based on proportionate evidence;• Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;• the sustainability appraisal (including consultation with the statutory environment consultation bodies);• identifying significant cross boundary and inter-authority issues; and• ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;• Place Shaping Policies; and• Development Management Policies.

Policy STR9

1.4.70 Countryside also agrees with Policy STR9 insofar as it confirms that the removal of this land from the Green Belt has been fully justified through the consideration of reasonable alternatives and is supported by exceptional circumstances.

1.4.71 The site was assessed in the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) which concluded that it was suitable for the development of 80 houses, and would form a logical extension to the built-up area of Pembury. The SHELAA assessment noted that it is not well connected with other agricultural land and is suitable, available and deliverable for development. Its release from the Green Belt was assessed as resulting only in a low level of Green Belt harm. Countryside agrees with these conclusions.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	CPRE Kent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR9 Green Belt	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

The plan is therefore considered to be unsound because it is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It should be made clear on allocations on sites to be released from the green belt what specific compensatory improvements to environmental quality and accessibility of the remaining green belt will be required, over and above normal development management criteria.

Confirm that on sites washed over by green belt that permitted development rights will be removed in the interests of safeguarding the green belt from inappropriate development.

The policy should be amended to set out how planning applications for the re-use of buildings, replacement buildings, extension to buildings, infilling or redevelopment of previously developed sites, changes of use, agricultural land equine development and development for outdoor sport and recreation will be assessed in relation to green belt interests.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: For further comments by Crest Nicholson, please see Comment Numbers PSLP_2064, PSLP_2066-2074, and PSLP_2077]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

Policy STR9: Green Belt

“Support”

4.102 We support TWBC’s approach as set out in its Green Belt Assessment (LUC, 2016, 2017 & 2020) and Development Strategy Topic Paper (TWBC, February 2021). In addition to these two documents, and to support these representations by Crest, Crest has also commissioned a supplementary LVIA and Green Belt Review (BW Landscape, May 2021) in respect of land to the north and west of Paddock Wood. A copy of this is attached at Appendix 3.

4.103 We consider that Policy STR4 is “consistent” with National policy; it states clearly that proposals will be considered against the relevant policy in the NPPF. We note that in accordance with the NPPF (para 137) the Development Strategy Topic Paper makes clear that the strategy for the distribution of development has sought to make optimal use of suitable brownfield sites and underutilised sites, particularly within the Limits to Built Development of settlements, before considering the release of Green Belt land. We therefore consider this policy to be **justified** and **positively prepared**, in that it is based on a proportionate, relevant, and up-to-date evidence base comprising the Stage 1, Stage 2 and stage 3 Green Belt Studies (2016,2017 & 2020) and the Development Strategy Topic Paper (TWBC, February 2021).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council’s housing delivery. As such, it is important that Crest is represented in all the relevant EIP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Fernham Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Bloomfields Ltd

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., with interest to the site submitted under the previous Call for Sites and considered under the Pre Submission Local Plan SHELAA as Site 143. This logical Site on the edge of Five Oak Green remains deliverable and available under the stewardship of this local housebuilder and as an organic and sustainable addition to the village, this site could be brought forward in a manner consistent with the Council's overarching delivery objectives.

[TWBC: Above comment from covering email]

Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to smaller areas of land which do not make any noteworthy contribution towards the purposes of the Green Belt, including locations on the edge of existing settlements, like the land at Tolhurst Road, Five Oak Green, The Street Sissinghurst and Hartley. Growth at such a settlement would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

Additional development at other existing settlements would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the villages of Five Oak Green, Hartley and Sissinghurst.

It is understood from the Council's Viability Assessment that development of Tudeley is only viable where property values exceed that expected elsewhere in the Borough. However, FHL has carried out its own positive viability appraisals of others sites known to be viable and available for development at property values expected elsewhere in the Borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For the reasons detailed above, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification given that there are other more appropriate and available sites for development across the Borough, including those at Hartley, Five Oak Green and Sissinghurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land at Tolhurst Road, Five Oak Green, The Street Sissinghurst, and Hartley, for development and is seeking changes to Draft Policy STR9. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Neil Williamson (Landscape Consultant and former President of the Landscape Institute) has prepared a Landscape Report for Friends of Tudeley. The report is attached (see Section 5: Green Belt).

Graham Simpkin Planning have prepared a report for Friends of Tudeley. This report is also attached (see Section 4.7: Policy STR9 Green Belt).

Both reports contain detailed arguments against releasing Green Belt for the proposed development of Tudeley Village which are briefly summarised as follows.

In 2017 TWBC concluded that development of land including the Tudeley site would cause "Very High" harm to the Green Belt. In 2020, however, once the development had been proposed, TWBC commissioned a new study focusing on a smaller area which downgraded the harm to "High". The methodology used to justify this downgrading cannot be justified. There is a high degree of certainty that there would be adverse landscape and visual impacts on the Green Belt. This site represents the very best landscape of this whole area of Green Belt. It is landscape of very high value, in very good condition. Harm to it would be irreparable.

The release of Green Belt land for a new settlement at Tudeley is not justified, nor is it consistent with national policy which states that Green Belt boundaries should only be altered where 'exceptional circumstances' are fully evidenced and explained. The fact that a large proportion of land in Tunbridge Wells Borough is constrained (designated Green Belt or AONB) is not itself 'exceptional circumstances' for releasing Green Belt land. The Green Belt asset does not become less important because there is more of it.

TWBC have not demonstrated Exceptional Circumstances that justify the release of Green Belt land at Tudeley for a new settlement because the land is not needed to meet housing needs. TWBC should revisit reasonable alternatives (strategic options 7 and 8) as well as a range of sources of small sites supply. Neighbouring councils at Maidstone and Ashford should have been approached to meet some of this housing need.

If Green Belt release is required, then settlement edge sites should be considered in detail to determine if parts of proposed sites make a weaker contribution to Green Belt purposes. Land that is already strongly related to built development will often make a weaker contribution to the first three Green Belt purposes, being less likely to be perceived as sprawl (purpose 1), narrowing the gap between towns (purpose 2) or encroachment into the countryside (purpose 3).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 1	

Respondent's Name and/or Organisation Gleeson Strategic Land

Question 2

Agent's Name and Organisation (if applicable) Town & Country Planning Solutions

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. These representations are prepared and submitted on behalf of Gleeson Strategic Land (Gleeson) in relation to the Council's 'Tunbridge Wells Green Belt Study' Final Report dated July 2017 that has been prepared to inform the Development Strategy currently set out in draft Policy STR1 (Development Strategy) of the Pre-Submission draft of the Local Plan published in March 2021. Gleeson considers this study to be seriously flawed in failing to properly assess the housing potential of Green Belt land release adjoining Royal Tunbridge Wells (RTW) at Sandown Park, to the north of Pembury Road.
2. In response to the Council's 2017 Stage 2 Study, Gleeson commissioned its own Green Belt Assessment (dated February 2019) and this was previously submitted to the Council for its consideration on 10th May 2019. This is being resubmitted again as part of this current Regulation 19 representation (see Appendix 1 attached).
3. This Assessment by Gleeson relates to the part of the Council's Green Belt study associated with assessing potential harm if the land parcel 'TW5' (which extends between the Tunbridge Wells built

up area boundary to the west and the A21 Pembury by-pass to the east – see Appendix 2) were to be removed from the Green Belt judged against the five purposes of such Green Belt designation as set out in paragraph 134 of the National Planning Policy Framework (NPPF) February 2019.

4. The Gleeson proposal **does not** however, seek the release of the whole of the land parcel 'TW5' from the Green Belt. As shown on the illustrative Master Plan drawing reproduced in Appendix 3 attached, the Gleeson proposal seeks the release of approximately 3 hectares of land from the Green Belt to provide circa 70 – 80 dwellings on land immediately adjacent to the existing built up confines of Tunbridge Wells, thereby 'rounding off' existing development within this part of town. The adjoining 3.3 hectares of land immediately to the east of the proposed housing site would however, be retained within the Green Belt. The landscaped character of this 'retained land' would be enhanced by new structural planting and its proposed future maintenance as an area of publically accessible informal open recreational space, would strengthen the current contribution it makes to its Green Belt function.

5. The Green Belt Assessment undertaken by the Gleeson appointed consultants' 'The Environmental Dimension Partnership Ltd. (EDP) looks instead at how the Gleeson proposed Green Belt housing release and open space proposal performs when tested against the NPPF Green Belt functions. Based upon this assessment, the land proposed for housing use by Gleeson provides a 'low contribution to the Green Belt purposes' for the reasons set out in the EDP report. The EDP report concludes that the limited properties of the Green Belt land that the Gleeson site represents, together with the distinct relationship between the site and Tunbridge Wells; limited inter-visibility between the site and Pembury to the east and the comparatively effective defensible edge that the site would provide, would all combine to ensure that the removal of this land from the Green Belt would not cause unacceptable harm to the wider Green Belt function.

6. Indeed, the Gleeson proposal first presented to the Council over 3 years ago, would be similar and directly comparable to the Council's proposed housing allocations elsewhere at the edge of RTW as part of draft Policies AL/RTW5, AL/RTW14 and AL/RTW16. As with the Gleeson proposal, these three allocations would require the removal of Green Belt land for housing development and the retention of adjoining Green Belt land as associated open and recreational space.

7. For the reasons set out in the EDP Assessment (Appendix 2 attached), previously submitted to the Council as part of the submissions made at the Consultation draft Local Plan stage, Gleeson urged the Council to review its 2017 Green Belt study to properly assess the housing potential of the Gleeson land in order to fairly, reasonably and objectively assess this potential against other proposed Green Belt housing land release elsewhere in the Borough beyond RTW. The Council has failed to do so and therefore, Gleeson are seeking such a fair and reasonable formal review as part of the Examination of Pre-Submission Draft version of the Local Plan.

List of Appendices [TWBC: Please see supporting documents]

1. Extract from the TWBC Green Belt Study Stage 2 – Appendix A Royal Tunbridge Wells (Site no. TW5).
2. Land at Sandown Park, north of Pembury Road, Tunbridge Wells; Green Belt Assessment by The Environmental Dimension Partnership Ltd. (May 2019).
3. Illustrative Masterplan drawing no. 1232/02.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Include the omission site for housing within the RTW Limit to Built Development for the reasons set out in the representations attached

[TWBC: Please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To present the case on behalf of Gleeson Strategic Land

Question 1

Respondent's Name and/or Organisation Hadlow Estate

Question 2

Agent's Name and Organisation (if applicable) Turnberry

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR9 Green Belt

The policy notes that the Council will seek improvements to the environmental quality and accessibility of the surrounding Green Belt from all relevant development within the Green Belt, including if appropriate in the form of financial contributions. This approach is compliant with paragraph 138 of the NPPF which states that Plans should set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land.

While we do not object to the principle of this policy, it will be crucial to define what this means in relation to Tudeley Village and the type and scale of compensatory measures required, particularly in relation to financial contributions.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Re: Pre-Submission Local Plan (Regulation 19 Consultation) – Comments

Further to our comments on the Draft Local Plan, during the previous Consultation (Regulation 18). We again write to you, to raise our concerns about the proposed garden settlements and to object to various policies, as we do not believe that our original concerns, and those raised by others, have been adequately addressed in the Pre-Submission Plan.

We wish to take this opportunity to reiterate and elaborate on some of our key concerns, as outlined in our previous letter (dated 25th October 2019). In an effort to be concise, we will not repeat all particulars and so the reader is referred to this letter for context and completeness. For ease of reference, we have enclosed a copy of our original letter (in Appendix A).

Following the publication of Pre-Submission version of the Local Plan, we also now wish to raise other concerns, such as the legal compliance in-terms of the Duty to Co-operate and consistency with national policies.

Our comments on the Pre-Submission Local Plan, related to several policies, are outlined under the headings stated below. We are specifically concerned about the deficiencies in the proposed strategic infrastructure and the questionable need to release Green Belt land.

1 Policy STR 1 – The Development Strategy

Object as we have concerns over the consultation Due Process that has informed this strategy, in addition we consider that this strategy fails to comply with the **Duty to Co-operate** (i.e. **legal compliance**) and is **unsound** (i.e. not justified & inconsistent with national policy).

Our concerns and comments, about the first and last requirements, are outlined as follows:

1.1 In view of the large number of local people (over 800, >97%) who objected to the proposed development at Tudeley, during the Regulation 18 consultation, and raised a host of issues (site selection, infrastructure), which have not been properly addressed (see below), and so we have concerns about the review process rigour. In our opinion, there appears to be scant regard given to the overwhelming majority of people who commented about this Strategic site or even to the major concerns raised by an adjoining Authority (Tonbridge & Malling Borough Council, TMBC), as discussed in 1.9.

1.2 Considering the above, we respectfully purport that the Inspectors should not assume that the Council has adopted a rigorous process during the review of the Regulation 18 comments, especially given the weight of these objections regarding the Tudeley site. We ask that the Inspectors satisfy themselves that due regard has been given to these concerns/objections, in taking forward this strategic site and the required infrastructure.

1.3 With regard to Paragraph 16 of the National Planning Policy Framework (NPPF, 2019), it states that “Plans should:

- 1 a) be prepared with the objective of contributing to the achievement of sustainable development; ... c) be shaped by ... effective engagement between plan-makers and communities, local organisations ... and statutory consultees;”

1.4 In our opinion, we do not believe that the Tudeley site contributes to achieving sustainable development, especially as it is a car reliant development with insufficient public transport options (see

Section 1 of our previous letter; Section 1.24 below), nor do the concerns discussed above (in 1.1) indicate the Plan being shaped by communities.

1.5 Also, as outlined in our previous letter (in 1.4, appended), we are concerned about the development within the Green Belt and that the proposals for this Tudeley strategic site fail to comply with Paragraph 138 (NPPF, 2019), which states: (our emphasis added)

*“... Where it has been concluded that it is necessary to release Green Belt land for development, plans should first give consideration to land which has been previously-developed and/or **is well served by public transport**. ...”*

1.6 We are of the opinion that the proposed Development Strategy fails to adequately meet either of these requirements. Due to there being alternative brownfield sites and given the inclusion of the Tudeley site, which has inadequate public transport options. Refer to our previous letter for a full discussion, which is summarised below (see 1.21).

1.7 Considering the points above (in 1.3-1.6), we also have significant concerns about the soundness of the proposed Strategy (STR 1), given the inclusion of the Tudeley site. Since the justification is questionable (see Section 2 in previous letter; Section 3.8-3.14 below) and as this strategic site is inconsistent with national policy (incl. Para. 16 & 138).

1.8 With regard to the consultation itself, we consider that the absence of public exhibitions may exclude many people from engaging in this consultation. Older people tend to have less confidence with technology and so a limited public consultation may disproportionately exclude this group. Hence, we have concerns about whether insufficient ‘due regard’ has been given to them. If insufficient ‘due regard’ has been given to people with protected characteristics, then this consultation process would be contrary to Section 149 of the Equality Act (2010) and so would not be in legal compliance. The Council chose to conduct this consultation during lockdown, but could have waited until national restrictions had been eased to permit such exhibitions.

Concerns over the **Duty to Co-operate**

1.9 We also take this opportunity to **object** to the Development Strategy (STR 1), due to the inclusion of the Tudeley Village, on the basis that at least one strategic matter, namely the significant negative impact on Tonbridge’s local highways network, has not been adequately addressed. As such, we contend that the Duty to Co-operate has not been complied with. Our views in this regard are further discussed below.

1.10 Section 33A of the Planning and Compulsory Purchase Act (2004) imposes a duty on a Local Planning Authority, in this case Tunbridge Wells Borough Council (TWBC), to co-operate with other local planning authorities, on strategic/cross-boundary matters. Our understanding of this is to ensure that sustainable development is achieved, when considering sites that may have a significant impact on other local authority areas.

1.11 We understand that TMBC, like ourselves and many other people, have raised concerns about a number of significant negative impacts that two of the strategic sites (now listed under Policy STR/SS 1 and STR/SS 3) would have on Tonbridge, including on the local highway network and at the train station.

1.12 For ease of reference, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/CA1 and AL/CA1 is included below:

“The potential significant impacts of the proposed development at Tudeley and Capel on the local highway network and on infrastructure and services in nearby Tonbridge are a major concern for TMBC, particularly in light of the existing infrastructure challenges in Tonbridge and surrounding villages ...”

1.13 Similarly, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/PW1 and AL/PW1 is included below:

“... future rail capacity ... extends not only to train services but to commuter parking and likely travel habits. The frequency of services at Tonbridge station makes this the more likely destination for commuters when compared to Paddock Wood.”

1.14 The significant concerns made by TMBC, are similar to those that we previously raised at the Regulation 18 consultation. Refer to Section 1 of our previous letter (incl. 1.9). We also support the previous objection comments made by TMBC.

1.15 Despite the above local highway concerns being raised and Sweco's highway modelling (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (for TWBC) showing that the proposed developments would cause a severe impact on many of our roads/junctions, some of which are over practical capacity, the up-dated Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) only includes a single improvement in Tonbridge. This relates to the Vauxhall Roundabout (A26/A2014, i.e. A21/Pembury Rd).

1.16 Furthermore, even with the proposed improvement, at this single junction, Sweco's modelling shows that proposed developments will still result in this junction becoming over practical capacity (i.e. >95%), when it would have been below this in the 2038 reference case. Refer to PDF page 154 of the Transport Evidence Modelling Report¹. As such, this highway improvement is therefore insufficient to mitigate the likely impact.

1.17 In addition, there are no highway improvements proposed at the roundabout linking the B2017, which is the only road from Tudeley to Tonbridge, with the previously discussed junction (A26/A2014). This is despite the junction traffic volume increasing from 81% currently (or 85% in the 2038 reference case), to over 96-99% (i.e. over practical capacity) in all the proposed development cases. Refer to PDF page 115 of the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]). Moreover, with reference to Figures 9.6 to 9.8 (in the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), the severe impact on local highway network around Tonbridge, can be starkly seen. For instance, most of the junctions modelled turn red (>95%) and a massive increase in the queue lengths are evident at these junctions, when comparing the reference and Local Plan cases.

1.18 This evidence, presented in Sweco's report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), clearly substantiates the concerns TWBC have and that we previously raised about the significant negative/severe impact that the Development Strategy would have on Tonbridge's local highway network. We strongly contest that the mitigation measures proposed in the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) are insufficient to mitigate these severe impacts and those on the wider network, so TWBC may have failed to fulfil their legal obligation under the Duty to Co-operate.

1.19 We also strongly believe that it is not right that TWBC should take forward plans to build over-half of TWBC's total housing allocation, at the edge of its Borough, knowing full well the severe impact it will have on a neighbouring authority and our town. This goes against the spirit of your legal Duty, to ensure that sustainable development is achieved, which may also actually fail this legal test. We ask TWBC to re-consider these inappropriate and unsustainable plans, particularly with the inadequate public transport proposed and without adequate highway improvements. We also trust that the Inspectors would consider recommending that the Plan to be withdrawn, if this Plan is submitted in its current guise, in view of the significant shortcomings noted.

1.20 Another consideration is that the congestion, from the severe Local Plan impact (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), is likely to result in air quality limits being exceeded in Tonbridge and is most likely to harm the sustainable economic growth of our town (see previous letter, incl. 1.11-13). This increase in congestion, in Tonbridge and along the B2017 - particularly during the morning peak/school times, also brings into question the adequacy of the proposed Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) and the soundness of the proposed Tudeley site.

1.21 In-terms of the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021)). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link:https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]), TWBC appear to be placing reliance on a single public transport mode – buses. This appears to mask the fundamental flaw of this poorly connected development site and the severe highway network impacts in the Local Plan scenario (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (in 1.15). In addition, the severe impact contradicts Policy EN1 2.2.

1.22 A concern of ours is about how the proposed bus service is being presented. This Plan proposes a 'rapid bus' link. However, we strongly contest the assertion that the proposed bus service would be a 'rapid' link, due to the congestion highlighted above. A rapid bus link would most likely require major road improvements along the entire route, including the provision of dedicated bus lanes/footways along the B2017 and through Tonbridge to the station, which is the mostly likely commuter destination (1.13).

1.23 Furthermore, without proper road improvements (i.e. dedicated lanes), it brings into doubt the effectiveness of any bus service in taking the huge number of extra cars off the road. The congestion along the route from Tudeley to Tonbridge, with commuters stuck on buses in traffic jams, will reduce the attractiveness of any new bus routes and so more people are likely to just opt for the comfort/convenience of their own cars. In our opinion, this Local Plan fails to address the significant shortcomings highlighted above and the validity of Sweco's highway modelling (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) may now be questionable, if an unrealistic number of commuters are assumed to be using the bus service. If the latter is the case, then the severe highways impact evidenced (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) and harm will all be amplified.

1.24 In addition, to the question marks over the compliance with the Duty to Co-operate, we have the view that this Strategy will create a massive car reliant commuter settlement, with the lack of public transport options and sufficient local jobs. This is discussed in our previous letter (1.9 & 1.10). As such, we contest that this Local Plan fails to comply with national policy (i.e. legal compliance). For instance, Para. 103 (NPPF, 2019) states: "... *Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes.*"

1.25 We note previous precedence's where Inspectors have rejected similar garden village proposals (incl. in the West of England Plan), due to these developments being too heavily reliant on private cars. Again, we ask the Inspectors to consider recommending that the Plan to be withdrawn, if it is submitted in its current disguise, in view of the significant shortcomings and potential non-legal compliance issues highlighted above.

In closing, as discussed above, the Infrastructure Delivery Plan² fails to adequately address the severe impact on the local highways network, particularly in Tonbridge, and the significant concerns raised by TMBC and many others previously. As such, there are questions over the consultation review rigour (e.g. Due Process) and compliance with the Duty to Co-operate (i.e. legal compliance). We have also reiterated a number of examples where this strategy has not been justified and where it is inconsistent with national policy (e.g. in 1.24).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Leander Homes
Question 2	
Agent's Name and Organisation (if applicable)	Colin Smith Planning Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 9 sets out that “this Plan removes land from the Green Belt, which has been fully justified through the consideration of reasonable alternatives and it is supported by ‘exceptional circumstances’”.

Positively prepared This policy is related to the development strategy set out in draft policy STR 1, which identifies large strategic sites that will involve the release of significant areas of Green Belt. The combined area of land to be removed from the Green Belt as a result of including the land east of Paddock Wood and Tudeley village amounts to 331.188 ha, which equates to 4.6% of the total amount of the Green Belt within the Borough. The total net change in the amount of the Green Belt to be lost is 5.7%. Approximately 80% of the total amount of Green Belt to be lost is attributed to the two large strategic sites. An alternative strategy, of directing development towards the edge of existing settlements in order to support and enhance the existing services and facilities would comply with the social and economic objectives of the NPPF as set out in paragraph 8, and would result in a reduced impact on the Green Belt in the area around Five Oak Green by affording greater protection to the natural environment, particularly the Green Belt. In this regard, an alternative strategy would be unlikely to require highway improvements which would have further adverse impacts on the Green Belt and the purposes of including land within it. The environmental impact of the draft strategic allocations would not have a positive impact on the environmental objective of the three sustainability objectives of the NPPF, and the plan is not therefore positively prepared.

Justified Again, related to the development strategy set out in draft policy STR 1, it is accepted that in order to meet the needs of the evidence base, some release of Green Belt land would be necessary. The Council rely on their Green Belt Study to justify the release of Green Belt land. However, the land around Five Oak Green to the north of the railway line (parcel BA4) fulfils two of the purposes for including land within the Green Belt (prevent neighbouring towns merging into one another and assisting

in safeguarding the countryside from encroachment) which is assessed as “Strong”. These purposes will be compromised should the development strategy chosen be implemented, and the strategy will not be consistent with national policy. The location of the proposed strategic site of Tudeley village falls within parcel BA4. The environmental impact of the removal of the large areas of Green Belt is not justified.

EffectiveIn Green Belt terms, the policy reference to the “reasonable alternatives” is challenged in other representations submitted. The strategy chosen will result in significant harm to the Green Belt, and the purposes for including land within the Green Belt, as identified in the NPPF. In particular, the potential development of land east of Paddock Wood and Tudeley village, together with the proximity of Tonbridge to the west and Five Oak Green will start to expand the built form in the countryside across a wide area, and will result in significant compromising of the purposes of the Green Belt. In this regard, in relation to the stated aim in the draft policy of maintaining an effective Green Belt, will not be achieved. The draft policy is therefore not effective.

Consistent with national policyThe above submissions indicate that the proposed policy, being related to the overall development strategy set out in draft policy STR 1, would not be consistent with national policy, specifically in meeting the environmental objective of paragraph 8 of the NPPF, and that it would also not fulfil all of the purposes of including land within the Green Belt. On the basis of the Council’s own assessment of land parcel BA4, the strength of the Green Belt in fulfilling the purposes of including land within the Green Belt will be severely compromised.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The second paragraph of the policy should be modified to read;

“This Plan removes land from the Green Belt *surrounding existing settlements*, which has been fully justified through the consideration of reasonable alternatives and it is supported by ‘exceptional circumstances’, *and will enable modest sustainable extensions to existing settlements in order to improve and enhance the local services and facilities provided.* The areas of Green Belt released are set out in the relevant place shaping policies and include requirements to secure improvements to the environmental quality and accessibility of the surrounding Green Belt.”

Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1876, Policy STR9 (PSLP_1879), Policy PSTR/BM1 (PSLP_1881) and Policy STR/SS3 (PSLP_1882). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) have a controlling interest in land at Ashes Plantation, Maidstone Road, Matfield (Site Ref: 353).

1.2 The site was allocated in the Regulation 18 Draft Local Plan (Sept 2019) as a suitable and sustainable location to provide for 30-60 dwellings under Policy AL/BM3.

1.3 The council's decision to deallocate the site is not supported by the evidence base including this site assessment set out in the sustainability appraisal. Accordingly, the site should be reinstated as a housing allocation on similar terms to the wording set out in former Policy AL/BM3.

1.4 For the reasons set out below, we are of the view that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Matfield. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations, which approach would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.5 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client at Ashes Plantation, Matfield. The site affords a logical opportunity in helping to meet identified housing needs and could provide for up to 60 dwellings, to include a policy-compliant level of affordable housing.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 1)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 2)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 3)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 4)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 5)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 6)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 7)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 8)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 9)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BM1: The Strategy for Brenchley and Matfield Parish and the omission of land at Ashes Plantation as a housing allocation for up to 60 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Ashes Plantation, Maidstone Road, Matfield (SHLAA Ref: 353)

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these polices, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Ashes Plantation, Maidstone Road, Matfield (SHELAA Ref: 353) should be allocated for housing development.

3.6 Our representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Site Ref: 353 (Reg 18 Local Plan allocation Ref: AL/BM3), can also supply homes to resolve this issue.

3.7 As detailed in the representations, the site represents a logical addition to the existing development in Matfield and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Matfield as defined on the Local Plan Proposals Map (Inset Map 21).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Matfield together with amendments to other policies of the plan.

4.8 These amendments would reflect the view taken by the Council in allocation the site at the Regulation 18 stage in preference to locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1. Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to locations beyond the Green Belt like Matfield. Growth at Matfield would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

6.2. Additional development at Matfield would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the village of Matfield.

6.3. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council's Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Ashes Plantation, Matfield, is viable at property values expected elsewhere in the Borough.

6.4. The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined, including with respect of villages beyond the Green Belt. As noted, paragraph 77 of the NPPF supports growth of villages as this would help maintain their services.

6.5. The Council's choice of Tudeley village does not accord with the preference detailed in the NPPF, whereas growth at Matfield would.

6.6. Additionally, the Stage 2 Viability Assessment is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.7. The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 4 paragraph 10)).

6.8. Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 5) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.9. At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.10. In the Calverton case (Appendix 4) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.11. In the Hundal case (Appendix 6) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor".

6.12. The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.13. As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with the land at Ashes Plantation, Matfield, where development will help support the existing services of the village consistent with paragraph 77 of the NPPF.

6.14. The Calverton case (Appendix 4) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

"In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to

which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

6.15. Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.16. Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.17. The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF. This includes consideration of growth in villages beyond the Green Belt which is sustainable as it supports services as envisaged by paragraph 77 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.18. The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.19. The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.20. Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.21. This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.22. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

6.23. In contrast, land beyond the Green Belt adjoining the village of Matfield would be a sustainable and appropriate location for growth consistent with paragraph 77 of the NPPF. In such instance, exceptional circumstances do not need to be demonstrated as the site at Matfield lies beyond the Green Belt.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Ashes Plantation, Maidstone Road, Matfield should be included as a housing allocation for up to 60 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Ashes Plantation, Matfield (Site Ref: 353).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

6.24. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.25. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider . Yes, I wish to participate in hearing session(s)

it necessary to participate
in examination hearing
session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1839, Policy STR9 (PSLP_1848), Policy PSTR/RU1 (PSLP_1856) and Policy STR/SS3 (PSLP_1857). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60). This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Rusthall, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Rusthall which include those relating to health, education, leisure, retail and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with replacement with an allocation at Home Farm, Rusthall. For the reasons detailed in this submission, growth at Home Farm, Rusthall due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Home Farm site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes.

1.4 This contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (Appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (Appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (Appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (Appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (Appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (Appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (Appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (Appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (Appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (Appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Developments

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/RU1: The Strategy for Rusthall Parish and the omission of land at Home Farm, Lower Green Road (Site Ref: 60)

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) – failure to include as an allocation in policy PSTR/RU1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Home Farm, Lower Green Road, Rusthall should be allocated for residential development (SHLAA ref 60). This site can accommodate 25 dwellings (including a policy-compliant level of affordable housing) and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Home Farm, Rusthall can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Home Farm site would be a logical addition to the existing development in Rusthall and should consequently be included in the defined extent of the village, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Rusthall alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Rusthall in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) should be included as an additional allocation within draft policy PSTR/RU1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1. Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley whereas it does not propose the exclusion of the Home Farm, Lower Green Road, Rusthall.

6.2. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council’s Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Home Farm is viable at property values expected elsewhere in the Borough.

6.3. The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined. The paragraph is clear that:

“Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which is previously development and/or is well served by public transport.”

6.4. The Council's choice of Tudeley village does not accord with either of these criteria, whereas Home Farm, Rusthall with its relationship to existing services and facilities in the village, and its containment from the wider countryside beyond, does accord with this advice.

6.5. Additionally, whilst not directly relevant to the Home Farm, Rusthall site. It is recognised that the authority has accepted major employment growth north of Longfield Road, Royal Tunbridge Wells which is within both the AONB and Green Belt although there were clear opportunities for development in attractive areas for commercial development outside of both designations (at Paddock Wood).

6.6. This is therefore an illustration that given the need for development in the Borough, be this either employment or housing can justify major development in both designations.

6.7. Although the Home Farm site does not represent major development, the Council's acceptance of major growth within both the AONB and Green Belt is nevertheless an illustration that development is acceptable, especially where, in the case of the Home Farm site, it would have limited impact upon the Green Belt. This therefore confirms the preference for sites in sustainable locations like Home Farm, Rusthall in contrast with the unsuitability of Tudeley Village.

6.8. Additionally, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley.

6.9. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes).

6.10. As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.11. The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

6.12. Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.13. At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.14. In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44: "The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.15. In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future

for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor”.

6.16. The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.17. As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with Home Farm, Lower Green Road, Rusthall where sustainable development will be achieved and therefore exceptional circumstances can be demonstrated.

6.18. The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

“In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

6.19. Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.20. Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need can be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.21. The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.22. The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal.

6.23. The Stage 3 Report (page 70) confirms that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

6.24. In contrast the Council's Stage 2 Green Belt appraisal for the parcel containing our client's Home Farm site (assessed parcel ref RU2a) indicates that it only has a moderate contribution towards the Green Belt. This is therefore a lower rating than that contended to apply to the Site in the Council's Site Assessments (page 6 of Rusthall parishes appraisals). It is therefore clear that the Home Farm site can be removed from the Green Belt with limited harm.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.25. The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.26. Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.27. This reinforces our view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.28. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF.

6.29. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village. In contrast, the Home Farm, Rusthall site can readily be removed from the Green Belt as exceptional circumstances can be demonstrated.

10. OVERALL CONCLUSIONS

10.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Home Farm, Lower Green Road, Rusthall (Site Ref: 60) should be included as an allocation.

10.4. These matters can consequently be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Home Farm, Rusthall (Site Ref: 60).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

6.30. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.31. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1883, Policy STR9 (PSLP_1884), Policy PSTR/HA1 (PSLP_1885) and Policy STR/SS3 (PSLP_1886). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Chittenden Fields, north of High Street (A268), Hawkhurst. This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account of its credentials as a sustainable location for growth adjoining the acknowledged suitability of Hawkhurst, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Hawkhurst which include those relating to health, education, leisure, retail and employment and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's at Chittenden Fields, Hawkhurst. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for circa 70 dwellings, in a landscape setting, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Chittenden Fields, Hawkhurst due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Chittenden Fields site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This therefore contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the norm for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tunbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim

conclusions (11th December 2020) (appendix 8)• Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)• North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy STR/HA1: The Strategy for Hawkhurst Parish and the omission of land at Chittenden Fields as a housing allocation for 70 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Chittenden Fields, north of High Street (A268), Hawkhurst (SHLAA ref 2) – failure to include as an allocation in policy STR/HA1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Chittenden Fields, Hawkhurst should be allocated for residential development (SHLAA ref 2). This site can accommodate 70 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Chittenden Fields, Hawkhurst, can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Chittenden Fields site would be a logical addition to the existing development in Hawkhurst and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Hawkhurst as defined on the Local Plan Proposals Map (Inset Map 15).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocate changes to the extent of the defined settlement area of Hawkhurst together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Hawkhurst (Consistent with paragraph 77 of NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Chittenden Fields, north of Highs Street, Hawkhurst (SHLAA ref 2) should be included as an additional allocation within draft policy PSTR/HA1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1 Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to locations beyond the Green Belt like Hawkhurst. Growth of Hawkhurst would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

6.2 Additional development at Hawkhurst would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the village of Hawkhurst.

6.3 For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the

scale of housing and other development envisaged. Furthermore, as indicated in the Council's Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Chittenden Fields is viable at property values expected elsewhere in the Borough.

6.4 The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined, including with respect of villages beyond the Green Belt. As noted, paragraph 77 of the NPPF supports growth of villages as this would help maintain their services.

6.5 The Council's choice of Tudeley village does not accord with the preference detailed in the NPPF, whereas growth at Hawkhurst would.

6.6 Additionally, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the latter it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.7 The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

6.8 Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.9 At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.10 In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.11 In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the

purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor”.

6.12 The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.13 As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with the land at Chittenden Fields, Hawkhurst where development will help support the existing services of the village consistent with paragraph 77 of the NPPF.

6.14 The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

“In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

6.15 Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.16 Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.17 The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF. This includes consideration of growth in villages beyond the Green Belt which is sustainable as it supports services as envisaged by paragraph 77 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.18 The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms

that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.19 The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.20 Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.21 This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.22 Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

6.23 In contrast, land beyond the Green Belt adjoining the village of Hawkhurst would be a sustainable and appropriate location for growth consistent with paragraph 77 of the NPPF. In such instance, exceptional circumstances do not need to be demonstrated as the site at Hawkhurst lies beyond the Green Belt.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Chittenden Fields, north of High Street, Hawkhurst should be included as a housing allocation for approximately 70 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Chittenden Fields, Hawkhurst.

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

6.24 The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.25 To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1. Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to locations beyond the Green Belt like Benenden. Growth of Benenden would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

6.2. Additional development at Benenden would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the village of Benenden.

6.3. Therefore, for the reasons detailed below, we object to the Tudeley proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council's Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at on land west of Iden Green Road is viable at property values expected elsewhere in the Borough.

6.4. The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined, including with respect of villages beyond the Green Belt. As noted, paragraph 77 of the NPPF supports growth of villages as this would help maintain their services.

6.5. Therefore, the Council's choice of Tudeley village does not accord with the preference detailed in the NPPF, whereas growth at Benenden would.

6.6. Furthermore, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.7. The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

6.8. Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.9. At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.10. In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.11. In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor".

6.12. The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist.

6.13. However, whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.14. As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with the land west of Iden Green Road, Benenden where development will help support the existing services of the village consistent with paragraph 77 of the NPPF.

6.15. The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

"In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent".

6.16. Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.17. Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.18. The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF. This includes consideration of growth in villages beyond the Green Belt which is sustainable as it supports services as envisaged by paragraph 77 of the NPPF

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.19. The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.20. The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.21. Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designed to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.22. This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.23. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

6.24. In contrast, land beyond the Green Belt adjoining the village of Benenden would be a sustainable and appropriate location for growth consistent with paragraph 77 of the NPPF. In such instance, exceptional circumstances do not need to be demonstrated as the site at Benenden lies beyond the Green Belt.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8.

6.25. The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.26. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Raymond Moon
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 9 Green Belt	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and I object to its inclusion in the DLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Hadlow Estate

Question 2

Agent's Name and Organisation (if applicable) Turnberry

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: for further comments by Hadlow Estate, please see Comment Numbers PSLP_1630-1645]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR9 Green Belt

The policy notes that the Council will seek improvements to the environmental quality and accessibility of the surrounding Green Belt from all relevant development within the Green Belt, including if appropriate in the form of financial contributions. This approach is compliant with paragraph 138 of the NPPF which states that Plans should set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land.

While we do not object to the principle of this policy, it will be crucial to define what this means in relation to Tudeley Village and the type and scale of compensatory measures required, particularly in relation to financial contributions.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-PSLP_1456, PSLP 1461, PSLP_1471]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Green Belt

Land at Capel and Paddock Wood

16.1. The NPPF affords great weight to Green Belts. Chapter 13 of the NPPF sets out policies which relate to the protection of the Green Belt. Paragraph 133 of the NPPF states that *"the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."*

16.2. It is acknowledged that the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) concludes that the harm of removing strategic allocation ALP/PW1 would be 'high' as *"AL/PW1 makes a Strong contribution to the prevention of encroachment on the countryside and a Relatively Weak contribution to preventing neighbouring towns merging into one another; and the impact of its release on the adjacent Green Belt will be Moderate. Harm resulting from the release of AL/PW1 will be High"*. The above highlights that the proposed strategic allocation does not comply with the NPPF, as it is evident that its removal for the Green Belt would result in significant encroachment on the countryside.

16.3. Furthermore, it is evident that the justification of removing the Green Belt to fulfil identified local housing need does not constitute 'exceptional circumstances' (as per paragraph 136 of the NPPF). Indeed, in 2015, Brandon Lewis MP (former Minister for State for Housing and Planning) stated that *"the National Planning Policy Framework makes clear that most development in the Green Belt is inappropriate and should be approved only in very special circumstances. Consistent with this, this Statement confirms the Government's policy that [...] unmet need are unlikely to clearly outweigh harm to the Green belt and any other harm as to establish very special circumstances"*. For reasons set out in our 'Sustainability Appraisal' section, it is evident that TWBC (the strategic policy-making authority) have not demonstrated that it has examined fully all other reasonable options for meeting its identified need for development. As such, the proposed removal of the Green Belt is entirely unwarranted as it is based on unsound evidence and does not align with paragraph 136 and 137 of the NPPF.

16.4. We are unconvinced from TWBC's evidence that it has demonstrated that it has examined fully all other reasonable options for meeting its identified need for development⁵⁵ before concluding it has exceptional circumstances. The NPPF requires that strategic policies are informed through this examination of other reasonable options and the Council's strategy much do the following:

a) **Makes as much use as possible of suitable brownfield sites and underutilised land.** TWBC's brownfield land potential has not been fully explored or evidenced. The brownfield land it includes for development in the Local Plan is mainly in Tunbridge Wells and this settlement along with the rest of the borough needs much further investigation for development opportunities including the opportunity for releasing more of its employment land for housing.

b) **Optimises the density of development in line with policies in chapter 11 of the NPPF including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport.** This work has not been undertaken by TWBC with any rigor. For instance there are only 30 dwellings identified within Paddock Wood Town Centre despite it being well served by public transport. There are likely many other opportunities to increase development and densities in centres across the borough.

c) **Has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground.** As we set out in the Duty to Cooperate section of these representations the Council has failed to discharge the duty which is evidenced by a lack of SOCGs with most of its neighbouring authorities.

16.5. Furthermore, the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) adds that *"the masterplan indicates that built development would be located to the north-west of the allocation site in close proximity to Whetsted Road (A228) which would bring the new inset edge close to washed over development in Whetsted"*. This evidence highlights that the removal of this Green Belt parcel would result in the non-compliance of Purpose 2 (paragraph 134, clause b) of the NPPF on the grounds that the westward movement of the inset edge of Paddock Wood would lead to the coalescence of Paddock Wood with Whetsted.

Tudeley Village

16.6. The Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) concludes that the harm of removing strategic allocation AL/CAL1 from the Green Belt would be 'high' as *"AL/CA1 makes a strong contribution to the prevention of encroachment on the countryside and a relatively weak contribution to preventing neighbouring towns merging into one another; and the impact of its release on the adjacent Green Belt will be Moderate. Harm resulting from the release of AL/CA1 will be High."* Whilst PWTC agree that the risk of removing the land from the Green Belt would be high, it is also abundantly clear that the strategic allocation would also result in 'high' harm to Purpose two (paragraph 134b of the NPPF) as the development would result in the merging of neighbouring of Tudeley Village and Five Oak Green. In relation to Purpose 2 of the NPPF (preventing neighbouring towns merging), the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) establishes that *"it has a strong distinction from existing inset settlements, meaning that development will be more intrusive on the settlement gap than would be the case if the allocation area related more strongly to an existing inset settlement, but the size of the gap means that it makes a Relatively Weak contribution to preventing neighbouring towns merging". The Study adds that "this will, without mitigation, weaken the strength of separation between the inset edge of Tudeley Village and existing inset development at Five Oak Green, although will still provide a level of distinction between the two settlements"*.

16.7. PWTC strongly dispute the above statement, as the eastern boundary of the proposed Tudeley Village consists of a tree line which includes a significant gap for east-west access. As highlighted below, this treeline is not uniform and varies in width. The aforementioned gap is highlighted in red. This Google Streetview imagery was taken looking north-west and north-east off Five Oak Green Road from the field gate that is approximately 150m west of Capel Primary School. As shown, it is evident that there will be limited distinction between the two settlements due to the significant reduction in gap between settlements, the topographic gradient sloping down eastwards and the presence of weak field boundaries. As such, there is very little visual separation between the two settlements. It should also be acknowledged that the lack of visual separation will be significantly worse in winter months when tree cover is limited. In conclusion, it is clear that the above statement made within the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) is inaccurate as it does not reflect the true level of Green Belt harm resulting from the proposed development.

[TWBC: for images, please see full representation attached as a supporting document]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

"The release of Green Belt land has been undertaken through this Local Plan, and is detailed where relevant in the place shaping policies in Section 5.

In order to protect the remaining Green Belt, as defined on the draft Policies Map, the Council will consider the proposal against the relevant policy in the National Planning Policy Framework, or the national planning policy at the time a planning application is being determined."

TWBC's policy simply doesn't adequately protect the Green Belt. The plan dedesignates 5.35% of the borough's Green Belt, with only a small area South West of Paddock Wood being added. If this pattern of dedesignation is repeated each time the plan is updated/replaced, the Green Belt will disappear. The South East of England is already more densely populated than other parts of the country. The borough cannot build and build, and maintain what is special to this area. The policy should be more explicit about protecting those areas of Green Belt that are either more sensitive or contribute more to the Green Belt policy objectives.

In addition, given the number of local plans around the country that propose the development of Green Belt land, we find it very difficult to believe that each district or borough can be exceptional – we think you must agree that would be an exceptional number of exceptional circumstances.

Individual site planning applications should address the removal of land from the Green Belt. This should not be done by the Local Plan as the time period covered is lengthy and changes might negate the need.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

[TWBC: the following extract is from the representation submitted by KeepKent.Green and the Golden Green Residents Association - for the full representation, please see supporting documents]

KKG Objects to Policies STR/SS1 and STR/ SS3 as well as providing additional commentary on other policies, that lead to conclude the Local Draft Plan is not legally compliant, is not positively prepared, is not justified or effective or consistent with NPPF.

STR 9 Green Belt

The importance is attached to the nationally important landscape of the High Weald AONB, as well as the Green Belt, which extends from the western part of the borough around Royal Tunbridge Wells and up to the western edge of Paddock Wood.

Maintaining the integrity of the Green Belt and High Weald AONB are critical considerations

The borough could meet only a fraction of its housing need without the provision for strategic sites, namely the substantial expansion of Paddock Wood (including land at east Capel) and the creation of a new garden settlement at 'Tudeley Village'.

Tudeley Village and East Capel would involve the loss of a large area of Green Belt belt. (332ha)

The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open to maintain the character of the Green Belt. Once established, Green Belt boundaries should only be altered in exceptional circumstances and should be fully evidenced and justified. Even if such exceptional circumstances are demonstrated to exist, consideration must also be given to the nature and extent of the harm to the Green Belt (or those parts that will be lost) and the effect on Green Belt objectives.

With further neighbouring areas of Green Belt which have already been lost to previous developments of a Solar Farm (50 ha) in 2015 and mineral extractions (120ha) the area has already lost designated MGB.

Large parcels of land within the area have already been safeguarded by KCC for future Mineral extraction.

Further development will impinge on visual impact on the openness of the land and will be viewed by many surrounding villages and towns.

Overall, some 5.71% of the Green Belt within the borough has been de-designated within this plan.

- **Paddock Wood/ East Capel** -148.194ha or 2.077% Greenbelt allocation of the overall 5.71% removed

- **Tudeley Village Removed** -182.994ha or 2.565% MGB removed

- This equals an overall **4.642% (81%)** removal of MGB within the Parish of Capel.

Considering a majority of the borough 70% is within ANOB, reducing its MBG allocation is a large proportion of the MGB within the Borough.

The PSLP does not designate other land as 'replacement' Green Belt to replace that to be removed.

The solar farm development received local community support as at the time the community was assured that no further development would occur within MGB within the area, 5 years later the largest development proposals within the history of the Parish have evolved which requires further loss of MGB land.

At the time of planning was granted it was understood that the solar farm was inappropriate development within MGB but the duration of the development would be 25 years and then would be returned to productive farmland within MGB designation.

With the historic development and future development proposals this surely can be considered

Unrestricted Urban Sprawl as well as merging towns into one another as there will be small strips of MGB remaining between Paddock and Tonbridge.

The removal of this MGB will effectively merge Tudeley to Tonbridge in the west as well as Five Oak Green and Paddock wood in the East.

Urban sprawl is the biggest threat to climate change. Sprawl is low density. It is resource-hungry and an inefficient use of land."

The loss of this MGB designation will be irreversible; it currently provides a haven for ecology, many heritage assets, additional flood storage capacity that has protected our towns and villages from flooding for 100's of years, protects and produces via aquifers the current water supply to Tunbridge Wells.

Environmentally it aids with carbon capture from acres of mature trees, hedgerows and historic woodlands, furthermore most of the area is currently commercially farmed , producing many varieties of crops and soft fruits, and grazing, to lose this MGB destination would end the farming community that has farmed this area for many generations as well as a valuable supplier to the food chain and local community.

There are a number of public access points within these sites, providing greenspace connectivity between Tonbridge and Paddock wood as well as many surrounding villages. The ANOB boundary was drawn up as a boundary of convenience as it is defined by a road the B2017 but the character of the landscape defined within the ANOB continues across the road into the landscape features of the Metropolitan Green Belt that is being proposed to be removed.

The TWBC Green Belt Study highlights "The gap between Five Oak Green and Paddock Wood represents a fairly small proportion of the overall gap between towns, but coalescence or near-coalescence of these separate settlements would have a disproportionate impact in this respect, being more likely to be perceived as sprawl."

No evidence within these studies that examine the intrinsic quality of the land.

TWBC has not considered the Brownfield sites availability sufficiently, it has dismissed many potential strategic sites, it has not fully examined all other reasonable options for meeting its development need

as defined within NPPF therefore has not met any of the requirements to demonstrate exceptional circumstances.

The removal of MGB at Tudeley will remove substantial parcels of productive agricultural land, creating a permanent adverse landscape impact upon the proposed village settlement as well as the Medway Valley and High Weald ANOB.

A majority of the necessary major road improvements required will involve further removal of ANOB and Green Belt.

Kent County Council's Countryside Access Improvement Plan (2007). "Although the parts of the Low Weald within the Borough are not designated as an Area of Outstanding Natural Beauty, the landscape is still of high value and should be protected".

This proposal fails to adequately safeguard the intrinsic beauty and openness of the countryside of the Green Belt and the setting of adjacent ANOB.

TWBC has not demonstrated any special circumstances why the permanent removal of this MBG would benefit the borough and the community, especially as the land serves as a fully functional flood plain (one of the largest natural flood storage areas within the UK) .

The TWBC Green Belt Studies 1& 2 assessments were very clear with their conclusions regarding the potential Harm of the removal of Green Belt within Tudeley and East Capel with a VERY HIGH scoring. The recent stage 3 assessment has been revised to HIGH Impact upon the Green Belt Release.

The Green Belt is good, positive planning. It stops urban sprawl and encourages the vital regeneration of our largest cities. It provides the countryside next door to 30 million people and protects the setting of many of our historic settlements. And, though not the principal purpose, it protects the attractive landscapes so important to our environment, heritage and wellbeing.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

KeepKent.green would like to attend and participate in any Inspectors Hearing regarding the TWBC Local Plan.

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Table 6

Policies Map (Inset Map No(s)) 29

[TWBC: for further comments, please see Comment Numbers PSLP_1809, 1811 and 1812]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction and Background

Our client owns land at Stone Court Farm (from hereon in referred to as "the Site") which is positioned on the north-eastern side of Pembury, in one of the only areas around Pembury that is **not** located in an Area of Outstanding Natural Beauty. It adjoins the Limits to Built development and is well related to the village core area. It is considered entirely suitable for residential development. Furthermore, it is available now and it is deliverable. The purpose of this submission therefore is to request the release of the site from the Green Belt (like Tunbridge Wells Borough Council have done for other 6 other sites in Pembury) and to allocate the land for housing. Submissions are therefore being made in relation to:

- . Policy STR1: The Development Strategy;
- . Policy STR9: The Green Belt;
- . Policy PSTR/PE1: The Strategy for Pembury Parish

Policy STR9: Green Belt

Policy STR9 removes land from the Green Belt and explains that this move is justified through the consideration of reasonable alternatives and is supported by 'exceptional circumstances'.

It is noted that a large proportion of land being released from the Green Belt is in Pembury - Table 6 on page 68 of the Pre-Submission version of the Plan shows that there are 6 sites in Pembury being released from the Green Belt (AL/PE 1, AL/PE 2, AL/PE 3, AL/PE 4, AL/PE 5, and AL/PE 7) equating to an overall total of 22.447 hectares of land.

The evidence and justification to release land from the Green Belt are explained in the Development Strategy Topic Paper (February 2021). One of the 'exceptional circumstances' given in Paragraph 6.201 on page 65 of the Topic Paper is "Individual site allocations located on the edge of settlements". Under this heading the text reads:

"Individual (mainly smaller scale) sites have been identified as logical extensions to the existing LBD of a settlement, or as a 'rounding off' small local adjustment to the Green Belt boundary (and in some cases providing a stronger Green Belt boundary), and where all other planning considerations support the allocation, facilitating development in a sustainable location. For example, the release of Green Belt land at a number of locations at Pembury will provide a range of development opportunities, including housing and community facilities, in a sustainable location".

It is considered that the subject Site meets the criteria above. It represents a logical extension to the existing Limits to Built Development of Pembury and is in a sustainable location.

Furthermore, it is important to note that the consents given to converting the former fruit farm buildings on the boundary edge of the Site (LPA Ref: 19/01696/FULL & 19/01430/PNQCLA) have now all been implemented. An image of this development is provided below.

[TWBC: for image, please see full representation attached as a supporting document]

This new residential development along with the road providing access to it (Stone Court Lane) are clear strong defensible boundaries to any settlement expansion, thus protecting from future incursion into the Green Belt. Any development on this site would therefore effectively act as infill development up to these boundaries.

In addition, it should be noted that directly to the northeast of Pembury there are no settlements for several miles so there would be no future merger of settlements.

[TWBC: for site plan, please see full representation attached as a supporting document]

Policy ST1 provides for some reductions in the area of the Green Belt around Pembury "where an effective long-term Green Belt is maintained". In this instance, it is clear that an effective long-term Green Belt can be maintained and as such we ask that this site is reconsidered for Green Belt release.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In order for Policy STR9 to be found sound, Table 6 on page 68 of the Plan should be modified to include Stone Court Farm (1.62 hectares) as a site that should be released from the Green Belt. Insert Map 29 should be amended to release this site from the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order for the Plan to be found sound.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Statement was wrong not to consider this site as a “reasonable alternative” to and not to have attributed greater weight to the site’s status outside of the AONB.

If you would like to attach a file in support of your comments, please upload it here.

Question 1

Respondent's Name and/or Organisation Mr Andrew Richards

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: this representation has been input against Policies STR 9, STR/SS 1 and STR/SS3 – see Comment Numbers PSLP_2096, PSLP_2101 and PSLP_2102]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Green Belt

- 1 The Pre-submission Local Plan (PSLP) proposes to remove over 330ha of land from the Green Belt to satisfy the Tudeley and Paddock Wood garden settlements (PSLP table 6). However, this use of Green Belt land runs counter to the NPPF and more recent clarifications provided by Government. Specifically:
 - a. The Government first set out its position in 2014 when posing the question “Do local planning authorities have to meet in full housing needs identified in needs assessments?” (<https://www.gov.uk/government/news/councils-must-protect-our-precious-green-belt-land>). The answer provided was as follows:
 - (1) Local authorities should prepare a Strategic Housing Market Assessment to assess their full housing needs.
 - (2) However, assessing need is just the first stage in developing a Local Plan. Once need has been assessed, the local planning authority should prepare a strategic housing land availability assessment to establish realistic assumptions about the availability, suitability and the likely economic viability of land to meet the identified need for housing over the plan period, and in so doing take account of any constraints such as green belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need. (my emphasis)
 - b. This was amplified in 2016 when the Minister for Housing and Planning stated:

“The Government are committed to the strong protection and enhancement of green-belt land. Within the green belt, most new building is inappropriate and should be refused planning permission except in very special circumstances”. (Hansard, 18 Jul 16)
 - c. This is reinforced by the NPPF para 11b which states:

“Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless

 - (1) the application of policies in this Framework that protect areas or assets of particular importance [footnote refers to Green Belt] provides a strong reason for restricting the overall scale, type or distribution of development in the plan area, or
 - (2) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole”.

d. This is further supported by the NPPF para 145: “A local planning authority should regard the construction of new buildings as inappropriate in the Green Belt”, with a list of exceptions, none of which apply to proposals of the magnitude proposed for Tudeley or Paddock Wood.

e. The Government has recently (April 2021) clarified its position on the use of Green Belt. (see web link). Specifically:

(1) “We heard suggestions in the consultation that in some places the numbers produced by the standard method pose a risk to protected landscapes and Green Belt. We should be clear that meeting housing need is never a reason to cause unacceptable harm to such places.”

(2) “Within the current planning system the standard method does not present a ‘target’ in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints.”

f. This is reinforced by other guidance, for instance

<https://www.gov.uk/guidance/housing-and-economic-land-availability-assessment>:

(1) Should plan-makers override constraints, such as Green Belt, when carrying out the assessment to meet identified needs?

“Plan-making bodies should consider constraints when assessing the suitability, availability and achievability of sites and broad locations. For example, assessments should reflect the policies in footnote 6 of the National Planning Policy Framework, which sets out the areas where the Framework would provide strong reasons for restricting the overall scale, type or distribution of development in the plan area (such as the Green Belt and other protected areas).” (Paragraph: 002 Reference ID: 3-002-20190722)

g. The above policy and guidance is summarised concisely in the following terms

(https://www.designingbuildings.co.uk/wiki/Green_belt_planning_practice_guidance):

“The government's policy position is broadly that the green belt be protected almost at all costs, but consequently that development needs (in particular for new housing) will have to be accommodated in sustainable locations in other areas (including open countryside) outside the specific designations where planning policy imposes specific constraints”

1 It is worth noting, consistent with the above guidance, that TWBC rejected a planning application ref 18/01767 from the Poacher pub on Hartlake Road (immediately adjacent to the proposed garden settlement at Tudeley) on the grounds it would intrude on Green Belt, noting as a reason for the refusal:

a. “The proposal would constitute inappropriate development within the Metropolitan Green Belt, which by definition is harmful to its openness. There is insufficient evidence of the necessary ‘very special circumstances’ to overcome this harm. The proposal is thus contrary to . . . and the National Planning Policy Framework 2018” (rejection letter dated 31 Jul 18)

3.. Supporting documents to the PSLP recognise the harm that would be caused to the Green Belt by the two proposed settlements at Tudeley and Paddock Wood. Specifically,

a. The Development Strategy Topic Paper identifies that there would be a ‘high’ level of harm to the Green Belt from the two settlements, which would remove more than 330ha from Green Belt (https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/388016/Development-Strategy-Topic-Paper.pdf) – table 4

b. The Stage 3 Green Belt Study identifies the risk of the Tudeley and Paddock Wood settlements merging into each other when it states

(https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/385317/Green-Belt-Study-Stage-Three_Rev1.pdf):

(1) “The fundamental purpose of the Metropolitan Green Belt is to prevent the sprawl of London and, as part of that, preventing other settlements growing towards London. Therefore, it makes sense to prevent Tunbridge Wells, Paddock Wood and Tonbridge from merging into one another” (para 5.32).

(2) “To the east, the release of AL/CA1 along with the expanded Paddock Wood (AL/PW1) will create a gap of approximately 1.8km between Tudeley Village and Paddock Wood. However, existing intervening

urban development at Five Oak Green, washed over development on Badsell Road, rail and road connections, and a lack of significant separating features will reduce the perceived gap. This will, without mitigation, weaken the strength of separation between the inset edge of Tudeley Village and existing inset development at Five Oak Green, although will still provide a level of distinction between the two settlements" (para 4.114).

4. The NPPF (para 137) requires LPA's to engage with others through statements of common ground to address any remaining unmet need before any encroachment on Green Belt:

Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. This will be assessed through the examination of its strategic policies, which will take into account the preceding paragraph, and whether the strategy:

(c) has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground.

However, there is limited evidence of TWBC having engaged with other LPAs to address any unmet need that would arise from removal of the Tudeley and Paddock Wood proposals. For instance, there is no agreed Statement of Common Ground between TWBC and TMBC. Similarly, the engagement record between TWBC and TMBC shows only limited discussion of unmet needs and what seems to be a belated realisation by TWBC that it needed assistance (Duty to Cooperate Statement, Appendix C5 - https://tunbridgewells.gov.uk/__data/assets/pdf_file/0003/388020/Duty-to-Cooperate-Statement_2021.pdf)

- . 14 Dec 18 meeting stated "TWBC indicated could meet their own OAN"
- . 18 May 20 "discussion about unmet need"
- . 6 Oct 20 "TWBC formal request to TMBC to meet unmet TWBC housing/employment need"
- . 14 Oct 20: "TMBC response"

I am therefore of the view that TWBC has failed to meet its duty under the NPPF to engage meaningfully with neighbouring LPAs to seek their assistance to meet the TWBC identified need for development (see also separate representation on the wider failure to meet the Duty to Cooperate).

5. The Development Strategy Topic Paper adopts a circular argument when it states (para 6.200) "*The assessments undertaken to determine the most appropriate locations for a garden settlement were unable to identify sufficient suitable and deliverable land in areas wholly outside of the Green Belt*". This presumes a need to establish a garden settlement, whereas other options (such as urban infill) have not been fully explored.

6. I therefore conclude that TWBC has failed to meet the policy requirements placed on it regarding Green Belt land, and that its proposals in respect of Tudeley and Paddock Wood are therefore **unsound** and should be withdrawn from the PSLP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 I acknowledge the challenge TWBC faces in balancing the competing demands for housing with the need to protect the Green Belt. However, the NPPF and other guidelines are clear about the need to preserve the Green Belt. The council therefore needs to investigate alternative sites, engage more pro-actively with neighbouring boroughs that do not face similar constraints on Green Belt,

and if necessary declare that the OAN is not achievable. Government guidance on this is set out in a range of ways:

a. Recent guidance (April 2021) encouraged greater scrutiny of urban areas: (see web link). Specifically:

(1) "In relation to the cities and urban centres uplift, we have heard representations that we can do more to increase home-building in existing urban areas to make the most of previously developed brownfield land over and above that in the existing standard method. There are three strong reasons for doing so. First, building in existing cities and urban centres ensures that new homes can maximise existing infrastructure such as public transport, schools, medical facilities and shops. Second, there is potentially a profound structural change working through the retail and commercial sector, and we should expect more opportunities for creative use of land in urban areas to emerge. Utilising this land allows us to give priority to the development of brownfield land, and thereby protect our green spaces. And third, our climate aspirations demand that we aim for a spatial pattern of development that reduces the need for unnecessary high-carbon travel."

b. TWBC has examined only settlement options presented to it through its Call for Sites, a reactive approach, and has not adopted a more pro-active approach of searching out sites suitable for garden settlements outside the Green Belt that could be acquired through compulsory purchase or other means.

(1) The planning guidance on this clearly encourages a pro-active approach (see <https://www.gov.uk/guidance/housing-and-economic-land-availability-assessment>):

How can sites/broad locations be identified?

"When carrying out a desktop review, plan-makers need to be proactive in identifying as wide a range of sites and broad locations for development as possible (including those existing sites that could be improved, intensified or changed)"

"It is important that plan-makers do not simply rely on sites that they have been informed about, but actively identify sites through the desktop review process that may assist in meeting the development needs of an area" (Paragraph: 010 Reference ID: 3-010-20190722)

2. Given this policy context, I believe TWBC needs to take a second look at some areas it has currently discounted from consideration. For instance, Frittenden lies outside the Green Belt, is in a very rural area (similar to the proposed development at Tudeley), benefits from a railway station at Headcorn and (a little further away) a separate railway line at Ashford, and would yield around 1,500 dwellings, yet is declared in the SHELLA as unsuitable in the following terms (see web link):

"Matters relating to the very rural setting and remoteness of the settlement, highway infrastructure, and distance from access to high level services and employment, heritage and land ownership mean that this site is unsuitable"

I appreciate that the fragmented nature of the land parcels would require more effort from TWBC, including a more active role in masterplanning, and that investment would be required in the road and gas network. However, a level of infrastructure investment will already be required for the proposed Tudeley settlement, so at a superficial level the two options are comparable. More fundamentally, exploring options such as Frittenden could ease pressure on Green Belt whilst allowing the vision of self-contained garden settlements to endure.

3. Similarly given the policy context, even at this late stage, TWBC should establish a dialogue with neighbouring LPAs that do not face similar Green Belt or AONB constraints (notably TMBC and Maidstone) to explore the scope for them to address some of the identified need from TWBC.

4. If these various avenues do not allow TWBC to achieve its identified needs, then per the planning guidance the PSLP will need to declare this.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I feel strongly that Green Belt land should be maintained for that purpose and would wish to contribute to any discussion on this topic.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 9 Green Belt	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

STR9 Sound policies

The release of Green Belt land around RTW should only occur in exceptional circumstances. If exceptional circumstances should ever be proven, The Town Forum favours an approach that results in the release of the least damaging parcels of land in landscape, heritage and nature/wildlife conservation terms, taking full account of the evidence base. In that context we strongly support the Council's decisions against allocation of the sites we have listed in our response to policies STR/RTW 1&2.

STR 9 Unsound policies

The Town Forum disputes the statement that "*This Plan removes land from the Green Belt, which has been fully justified through the consideration of reasonable alternatives and it is supported by 'exceptional circumstances'*", insofar as this has been used to justify draft allocations **AL/RTW5 Caenwood** and **AL/RTW16 Spratsbrook**.

It is a rather overlooked fifth purpose of the Green Belt "*to assist in urban regeneration by encouraging the recycling of derelict and other urban land*". We do not believe that sufficient attention has been given to this as a factor which would justify the maintenance of the land at sites AL/RTW5 and AL/RTW16 within the Green Belt. Consequently, the proposed removals are **not consistent with national policy** and **unjustified**.

We contend in other parts of our response to this consultation, notably under policies **STR/RTW 1&2**, that densities of redevelopments in Royal Tunbridge Wells should be significantly increased, in line with the incentive given by purpose number 5 of the Green Belt and to avoid unrestricted urban sprawl, which is purpose number 1. We also contend that reasonable alternatives exist within the LBD in the next 5 years to find sufficient other sites to make up the numbers proposed to be allocated for housing at sites AL/RTW5 and AL/RTW16. At present, we consider the Draft to be **ineffective** in its consideration of alternatives.

We also contend that the drafting of the following part of policy STR9 is unclear in relation to land which is claimed to have been *already* removed from the Green Belt. It states; "*The Council will seek improvements to the environmental quality and accessibility of the surrounding Green Belt from all relevant development within the Green Belt*". In a policy which is intended to apply for the whole of the plan period, it is not clear whether this is intended to apply only to future removals from the Green Belt or also to apply to the land which is purported to have been already removed before current allocations have been made under the Plan. This, and the general ambit of this part of the policy, needs to be clarified as it could be inconsistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

If the Inspector should be satisfied with our arguments, we would request that sites AL/RTW5 and AL/RTW16 should be maintained in the Green Belt. Alternatively, as we argue in more detail under policy AL/RTW2, the Inspector might choose to safeguard both sites for potential future development outside the Plan period, if all reasonable alternatives within the LBD have been exhausted by then.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because we believe that the full arguments against the soundness of removal from the Green Belt to make allocations RTW5 Caenwood and RTW 16 Spratsbrook should be heard by the Inspector.

Question 1

Respondent's Name and/or Organisation Rydon Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Sigma Planning Services

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: see also representation numbers PLSP_1629, 1702, 1705, 1707, 1708, 1709, 1710, 1713, 1714, 1715, 1717, 1721, 1729, 1732, 1733, 1734, 1737, 1739, 1741, 1743, 1744, 1745 & 1746]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: see supporting documents attached, including composite of all representations].

Green Belt

It is not considered that there has been adequate consideration and reasonable alternatives for the release of land from the Green Belt on the scale proposed. There are potential development locations outside the Green Belt and AONB which have not been fully assessed and development opportunities within other parts of the Borough, including within the AONB, where greater housing numbers can be accommodated without unacceptable harm to the AONB or local character. This could reduce the extent of the land proposed to be released from the Green Belt.

There is no need for this policy to mention the removal of land from the Green Belt if its main purpose is to retain controls over the remainder of the Green Belt once the deletions have been made.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

STR 9 Green Belt

3.57. This policy is **unsound** as it does not meet the 'exceptional circumstance' test (NPPF para 136) where the proposed removal of Green Belt in Capel is not fully evidenced and justified.

3.58. TWBC has failed to consider the Conservative 2019 manifesto which promised to protect the Green Belt. Recent statements by ministers have reinforced this position:

- . On 3rd March PM Johnson said “we will protect our green belt, our vital green belt, and which constitutes, I think, 12.4% of our land, but we can build our homes, as my Right Honourable friend rightly suggests, 300,000 of them on brownfield sites across the country”
 - . On 29th April HCLG Minister Pincher said “This Government is committed to protecting and enhancing the Green Belt and there are strong protections for Green Belt land provided in the National Planning Policy Framework. A local authority can alter the boundary of Green Belt land only in exceptional circumstances and where it can demonstrate that it has fully examined all other reasonable options for meeting its development need. This means that the authority should show that it has used as much brownfield land as possible, optimised development densities, and discussed with neighbouring authorities whether they could accommodate some of the development needed. The Framework also makes clear that most new building is inappropriate in the Green Belt and should be refused planning permission unless there are very special circumstances”.
- 3.59. TWBC has not exhaustively analysed the availability of Brownfield sites in the Borough and have ignored potential sites for strategic development in those areas outside GB and AONB.
- 3.60. In addition to the effect these Strategic Sites will have on the contribution of this part of the Green belt, there is a strong adverse impact of the proposed Tudeley Village on the landscape of the whole Medway Valley. TWBC should consider the fact that the Tudeley site (STR/SS 3) lies on the North slope of the Medway Valley, and is visible from all points along the North slope, from up to twelve miles away, and appears against the backdrop of the High Weald AONB.
- 3.61. Before TWBC can release these two sites they not only have to show that the benefits outweigh the adverse impacts, but that these are truly Exceptional Circumstances. Many LPAs have used the combination of a failure to otherwise meet housing need and the relatively poor performance of parcels of green belt land to release the poor performing parcels. But these allocations perform strongly against the purposes of the Green Belt, even by TWBC’s much diluted assessment.
- 3.62. Compensatory re-designation has not been included in the PSLP and the ‘very special circumstances’ referred to above are not demonstrated and justified.
- 3.63. The opportunities for mitigation appear to be very limited and the Policy is unclear as to what and how adequate measures will be provided.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Although we consider the Plan that the Plan is sound generally, we consider that certain details of the policies identified in our representations require amendment. These amendments are set out in our submitted representation and supporting technical evidence.

1 Comments on the Draft Plan

We have reviewed the Proposed Submission Plan and its supporting material to ensure the proposed spatial strategy for the Plan is both robust and justified in its identification of Tudeley for 2,800 homes. This section first reviews the Tudeley Village allocation and offers minor amendments to the detailed wording of the policy, before moving on to our observations on strategic and other supporting policies in the Plan. We set out our broad in principle support for the majority of the Plan's policies, however we make certain representations regarding amendments below.

Policy STR9 Green Belt

The policy notes that the Council will seek improvements to the environmental quality and accessibility of the surrounding Green Belt from all relevant development within the Green Belt, including if appropriate in the form of financial contributions. This approach is compliant with paragraph 138 of the NPPF which states that Plans should set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land.

While we do not object to the principle of this policy, it will be crucial to define what this means in relation to Tudeley Village and the type and scale of compensatory measures required, particularly in relation to financial contributions.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We would refer to paragraph 3.14 of the Procedure Guide for Local Plan Examinations which sets out the circumstances in which representors may be invited to appear at examination stage. It would be helpful to the LPA as well as the Inspector if we were invited to participate to assist the Inspector's understanding of a soundness or legal compliance issue. Moreover, as we are suggesting helpful modifications it would be appropriate for us to participate in hearing sessions related to those areas within which we have suggested modifications.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Summary

The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas and delivering sufficient small sites to ensure the housing trajectory can be delivered. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy. Further housing allocations in the Green Belt are required in order for the Plan to be justified.

Background

The purpose of these representations is to put forward for allocation a housing site which is currently in the Green Belt. The site is known as land at High View, Langton Road Langton Green and was considered under site reference 42 of the Site Assessment Sheets for Speldhurst Parish - Strategic Housing and Economic Land Availability Assessment – Regulation 19 Consultation January 2021.

Green Belt and Landscape

The individual SHELAA assessment for site 42, notes that the site included two structures and that existing housing adjoins the site to the north and west. Field boundaries were acknowledged to comprise

hedgerows to the south. In some respects this description doesn't fully express the context of the site since to the south is a wooded area spanning the entire southern boundary of the site. There is also built development to the east, north and west as noted on the aerial image of the site below together with a wide footway running alongside the northern boundary.. As a consequence, the landscape setting and effect on Green Belt are not as clear cut as the Council suggest.

TWBC: see full representation attached to view aerial image of site]

The Council rejected the site on Green Belt and Landscape grounds connected with the AONB. However, the site is visually contained by existing built development and the wooded setting of the site to the south.

In the NPPF great weight is attached to AONB's but the advice is that the scale and extent of development within designated areas should be limited. It is only major development which is guided against and given the scale of the site and the way in which the Council has defined other AONB sites, it is considered that the land would not constitute a major site.

Major developments will need to comply with three tests. Consequently, if the site is not defined as 'major' then its suitability is one of effect on the AONB. As noted the site is visually very well contained with strong woodland copses providing limited wider views from the south. The southern side of Langton Road comprises various houses and large gardens and would be typically described as suburban in character. The site has a greater association with the settlement of Langton Green than it does with the open landscape setting of the AONB and so its release for housing would not undermine the objectives of this landscape.

Green Belts are designed to serve 5 purposes – the check the unrestricted sprawl of large settlements, prevent the merging of settlements, safeguarding the countryside from encroachment, preserving the setting and character of historic towns and to assist with urban regeneration.

Given the position of the site and its shape – hugging the Langton Road, it would not result in the same level of encroachment as Hither Chantlers to the west or The Midway and Nevill Court to the east. The allocation of this site would be so visually contained and seen against the back cloth of existing buildings not to contribute towards unrestricted sprawl.

Directly to the south are no settlements for several miles and so there can be no conflict with the merging of towns or villages criteria. The small character of the site would have no material effect upon Tunbridge Wells and its historic character, particularly as Langton Green is considered a separate village settlement.

Where a housing need is confirmed, removal of a site from the Green Belt through a Local Plan Review is entirely reasonable.

In considering this Green Belt site, the Inspector would need to consider paragraph 139 of the NPPF which sets the parameters for identifying Green belts. Importantly, the policy guidance is that boundaries can be defined according to the development plan's strategy for sustainable development. If more housing sites are needed then site's can be identified even if they are within the Green Belt. Similarly it is important to consider whether this site needs to be kept permanently open given the surrounding built characteristics and the wooded enclosure afforded by the landscape to the south. Green belt boundaries are likely to be necessary in the longer term and so carefully considering where the boundary should be is important for addressing future development needs. Given the above characteristics of the site and the limited way in which it complies with the purposes for including land in the Green belt, the release of this land from Green Belt and allocation for housing is considered reasonable. Policy STR9 and the Proposals Map (Inset Map 33) should be altered accordingly.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify Policy STR9, inset map 33, paragraph 4.128 and Table 6 to include the site as a housing allocation for 20 dwellings and to remove the site from the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order for the Plan to be found sound.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR1, STR5, STR6, STR, STR8, STR10, PSTR/BM1, AL/BM1, AL/BM2, EN1, EN19, OSSR1, OSSR2.	
<i>[TWBC: relevant parts of this representation have been duplicated against the above policies: see PSLP_1775-1786 inclusive]</i>	
Question 4	
Do you consider that the Local Plan:	

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The language is not sufficiently robust in some of the policies and introduces ambiguity. Small rural parishes have very different requirements to the larger settlements, having less housing allocations, limited facilities and poor public transport. Consequently some policies have no relevance in rural areas and include no provision of additional facilities. Although the parish has a small housing allocation, the quality of life will be significantly affected by development in Paddock Wood/Capel/Horsmonden/Pembury. There should be some provision for the mitigation of the effects within other parts of the borough of increased traffic on safety, noise and air quality.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Pre-submission Comments from Brenchley and Matfield Parish C council

TWBC Pre-Submission Local Plan

STR10: Neighbourhood Plans

The Parish Council is currently conducting its Regulation 14 consultation on a Neighbourhood Plan for the parish and trusts that TWBC will make every effort to avoid any delay in the later stages for which TWBC will be responsible. It is hoped that the Neighbourhood Plan will have been made (adopted) before this new Local Plan reaches adoption

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Parish Council supports the overall negative scores of the sites in Brenchley and Matfield that were put forward in the Call for Sites. There are very few positive scores for any of the sites and a significant number of high negative scores. Many of the sites involve the loss of high-grade agricultural land and would have a negative impact on biodiversity, landscape and heritage. Sustainability is also a factor for many of the sites, which lack a proximity to facilities and public transport. The villages of Brenchley and Matfield have limited sustainability, with poor facilities in Matfield but a reasonable bus service to Paddock Wood and Tunbridge Wells. Brenchley has more facilities but three bus services to Paddock Wood on only two days during the week. There are no bus services in the evenings that would allow commuters to use public transport.

Respondent's Name and/or Organisation	CPRE Kent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR10 Neighbourhood Plans	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

CPRE Kent supports this policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18)

[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated

and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that:[\[https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf\]](https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf)

"2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale."

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

"Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable"

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *"the residential aspect is not a sustainable location."* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior to* the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *"Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle."* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

"4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough's town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable

development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)"

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be “remote” and “isolated” and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *“Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard’s Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an ‘active travel link’ between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard's Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic

policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (St Albans City Council v Hunston Properties [2013] EWCA Civ 1610; Solihull Metropolitan B.C. v Gallagher Estates Ltd [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in Hunston and Gallagher in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially

unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Royal Tunbridge Wells Town Forum
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 10 Neighbourhood Plans	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound

Yes

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this concept within the Borough although its application to the unparished area raises many issues which have so far been impractical to resolve.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation Alex Simcox

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 10 Neighbourhood Plans

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1724, PSLP_1735, PSLP_1736 and PSLP_1738]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18 [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).
6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:
"The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14

hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that: [https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf]

“2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale.”

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

“Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable”

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *“the residential aspect is not a sustainable location.”* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *“Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle.”* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

“4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough’s town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)”

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported

in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be “remote” and “isolated” and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *“Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard’s Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an ‘active travel link’ between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard’s Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more

investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (*St Albans City Council v Hunston Properties* [2013] EWCA Civ 1610; *Solihull Metropolitan B.C. v Gallagher Estates Ltd* [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in *Hunston* and *Gallagher* in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4

need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan
