Question 1	
Respondent's Name and/or Organisation	Hilary and Nick Andrews
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Overall comments	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We are residents of East Capel, having lived in our house for 28 years. We consider certain aspects of the Tunbridge Wells local plan to be unsound, ill thought through and not justified. We have commented on various policies and paragraphs but also wish to make the following additional observations.

TWBC has deliberately made it very difficult for the ordinary person to be able to consider these plans as:

Borough Councillors were put under NDAs so they could not communicate with the electors;

We understand that planners were originally considering other sites as preferred but a sudden change of heart put all the housing in these two co-joined areas in Capel Parish. The rationale for that change of plan from their two preferred sites, has never been made public;

The plans and details have changed with important information hidden in hundreds if not thousands of pages of documents;

Documents integral to the plan have been hidden within odd areas of the TWBC website;

TWBC have provided misinformation all along the route;

The leader of the Council for TWBC (now ex-leader of the Council) publicly stated that the plans will go through for the two sites in Capel Parish a long time prior to the Reg 18 closure with the suggestion that it was already agreed. This smacks of dubious practice at best and corruption at worst. As TWBC is well aware, their obligation in respect of maintaining zero bribery & corruption is significant and any suspicions in the Planning Dept should be investigated thoroughly.

Stephen Baughen the TWBC Planning officer has given an explicit public guarantee (at a public meeting in Five Oak Green prior to Reg 18) on behalf of TWBC that the East Capel site will not flood – as he knows and TWBC has ignored, this will be an expensive guarantee that as local taxpayers we will be required to fund.

East Capel is well known for regularly flooding – any house purchaser will have to declare to their mortgage lender and insurer that it is built in areas that flood. To not do so will be fraudulent. The developers will have to advise any potential house purchaser that their houses are liable to flood, likewise to not do so will be fraudulent. These two factors alone mean that the likelihood of actually selling these houses will be very difficult and insurance every expensive. TWBC should be very clear that this is a major risk to the entire East Capel site and be very open that the houses may not be saleable.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend that TWBC removes STR/SS1 and STR/SS3 from the local plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because we believe that the views and comments relating to the draft local plan at Reg 18 were not considered by TWBC in preparing the pre submission local plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Previous History

Tunbridge Wells is an historic town surrounded by green countryside. It has developed from the original Pantiles as a high-class tourist resort, with elite landowners following. The town was expanded during the Victorian period largely by the inspired work of Decimus Burton. The railway was also introduced during this period. Several villages were established outside the town but have since been swallowed up by Tunbridge Wells natural expansion. Since that time and the evolving planning process very little inspirational work to the town has been carried out, apart from small pocket developments and individual buildings. People have now become more affluent and cars more affordable.

Tunbridge Wells West Railway Station and a section of the original track was taken over by a private company, when underpaying lines were being curtailed, and has since become a major tourist attraction; complementing other attractions in the area.

Within recent years the town and outlying villages have been expanded by zones, creating an extensive use of the motorcar. It now forms a linear town from Ramslye housing estate in the south to Tunbridge Wells Hospital in the north, with the very real possibility that other villages will soon become part of the town. Industrial areas were formed outside the town, which have since become major shopping zones and are largely to blame for the decreasing use and general decay of the town centre.

Future Planning according to the Tunbridge Wells Town Plan

The town is still evolving but no consideration is given to reducing car use and consequently will be unable to be sustainable or to come anywhere near to zero carbon emissions in the near future. Street parking has now reached a peak, but as local authorities produce revenue from parking and fines there is no incentive to reduce car use and subsequent emissions.

The town plan will remain the same, with surveys and projections of the current situation is and methods to ease the known problems. Reliance on future technologies appears to pervade.

The existing town centre is decaying and it is proposed to make it a more commercial and health area by repurposing shops.

Under the Town Plan the outlying villages are necessarily being expanded to provide more housing using the Garden City principles.

Changing Tunbridge Wells for a Sustainable Future

General

Any successful town relies on inspiration upon inspiration, which is sadly lacking in the current Town Plan, resulting in a jewel on an unworthy backdrop. More drastic measures than proposed in the Town Plan are needed for a sustainable future. Past mistakes, such as promoting out-of-town shopping which encourages car use and weekly shopping, should be better placed for walking and public transport.

Neighbours have reached out to each other during the pandemic, much as in previous eras, and has shown how the recently evolved community movements have fared better.

Car ownership should be replaced with all-day use non-emission vehicles, now becoming viable, in the form of car-sharing, clubs, and public transport. Walking and cycling are now commonplace.

Housing

The expansion of outlying villages could have used more modern concepts such as seen in the rapidly expanding Transition Towns movement and examples as in Copenhagen.

Much of the original housing emits considerable quantities of CO2 to comply with current life styles and it is imperative to rectify this. The major method would be to insulate walls, floor and roof of all

existing buildings, and seal them, with controlled ventilation for condensation control; but this will only happen if constructive financial help is available from Central or Local Authorities.

Local Communities

Copenhagen has been developing 'People-first' areas within the city and the pandemic has made them realise the distinct relation between where people live, where they work, open spaces, and shopping areas. The combination in close proximity has certainly proved to be better than ad hoc development. Prime objectives are to decrease the need for transport by promoting relatively small self-contained local communities where everything they need on a day-to-day basis is within walking distance, and to promote small businesses and a reliable public transport. This type of community makes it possible for microfactories, promote garden produce and use otherwise derelict land such as railway embankments for fruit trees. One community even produces its own solar electricity.

The pandemic has divided opinions about housing accommodation. As many people do not like working at home and become bored, others see it, or are forced to see it, as an opportunity requiring an additional room within the property as an office. Yet other people will now require a small home workshop. These are all trends that should be encouraged.

Linear Town

Tunbridge Wells has developed from its beginnings as a Health Resort into a thriving town which has been expanding mainly northwards to create a linear town and established a Town Centre that catered for the growing population. Super stores, in the 1950's, were initially within the existing town centres, resulting in weekly shopping and small local shops having to close down because they could not compete. Planning controls added segregated industrial areas, isolated from the residential communities, which have evolved into mainly shopping areas due to the greater space and car parking available. To a large extent this has resulted in increased car use due to the remote shopping, and a decaying town centre. The car now reigns supreme, with the Local Authority having a considerable income from parking and fines, which does not provide an incentive to reduce car use.

To this scenario has been added specialised hospitals catering for wide areas, which has added to the already heavy car traffic. There were originally two hospitals serving Tunbridge Wells, one close to the town centre, and another at Pembury. Very few people use the public transport system, run by private companies; and prefer to use their own cars. Doctor's surgeries have had to take more responsibility for peoples health, but should take even more for non-specialist applications.

Out-of-town shopping.

When a car is necessary to collect shopping it creates undesirable emissions and pollution. It is difficult to move superstores back to the town centre where they should be but making them responsible for deliveries would allow a weekly shop to be delivered to a persons door - it would also make it possible for one person to go to the store without a car, shop for what they want and return home. Delivery could then follow and the store location become less of a problem. The delivery trucks would be in use all day.

Although the existing town centre is decaying it is in the right position for access from all parts, whether by walking or public transport. The northern industrial zone has evolved into a shopping centre serviced by cars and is largely to blame for the decreasing use of the town centre and general decay in this area. It is now time to revitalise the town centre by bringing back the larger food shops and also providing a mix of commerce housing and the arts in a more concentrated form. To this can be added concentrated food growing such as hydroponics, and similar intense food growing facilities.

Out of town shopping areas could well become community areas with specialisation.

Sustainable Transport.

Most people consider it essential to have their own car because the alternatives are not there or are inadequate for them. Most cars are parked for the majority of the day, taking up a considerable amount of space and a source of annoyance for walking and cycling. An alternative that is more convenient than a car is essential. In the near future when the initial teething problems are overcome guided cars can take people door to door. Meanwhile more reliable public transport and hire cars, would help to reduce car use.

Cars still have considerable CO2 emissions in their construction and disposal, whether they have internal combustion or electric engines, which indicate manufacturers should change to more ecologically

friendly materials, such as plant based plastics, or manufacture less of them. Cars have to be manufactured, and then disposed of after use; which generates a considerable amount of emissions. Expensive rare earths are used in electric car manufacture. Electric cars can only claim a reduction of emissions in use if the electricity for charging is sustainably sourced.

Railways have always been more sustainable than other transport, but the stations are not always in a very good location, mainly because in the early days the noise and smoke was considered to be obnoxious.

Trams have proved to be successful in some larger towns, but the hills in Tunbridge Wells may prohibit their use.

Walking and Cycling Routes.

The Local Plan takes this seriously. Previous experience suggests walking and cycling should be separate to vehicles because of the proximity dangers, and should be continuous as previous cycle ways have not always been so.

Electric bicycles are becoming commonplace, and some towns are testing rental electric scooters, but the results will not be known for some time - eanwhile more people are being fined for riding them in towns.

Main Roads

For travel between communities or commuting. It is better to isolate fast moving traffic from local roads. Public transport is more efficient than private cars, which are only used for a small part of the day.

Green spaces.

The pandemic has shown how open green spaces and open areas have been used to a greater extent, making them essential for communities. Back roads modified for pedestrian use, but still allowing essential ambulance or fire-fighting appliance to be able to reach a property, can provide more green spaces close to housing..

Climate Change

Could mean either this country becomes warmer or colder. In either case insulated buildings whether existing or new should be essential. Much higher wind speeds could affect how roofs are finished, as traditional tiles or slates are now proving to be inadequately fixed. Sheet materials seem to have fared better.

Passive ventilation is better than air conditioning.

Flooding in many areas is becoming more commonplace and all buildings should have more effective defense. There are flood panels available for doors and closeable airbricks.

Recycling

The work of Veena Sahajwalla in Australia shows how she has considered rubbish as an asset and is working on ways to make use of it. She is also working on microfactories that mimic large-scale production and can be used locally for small-scale production. Local reduction in the use of non-degradable materials is possible, and would do much to reduce excessive emissions and road debris.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Ashford Borough Council is grateful for the opportunity to comment on the Draft Local Plan that continues the on going dialogue between TWBC and ABC during the preparation of the Plan.

The Borough Council has no comments to make and would refer to the agreed SOCG that was signed and agreed on the 18th March 2021 that sets out the Council's respective positions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

General comments on whole Plan

[TWBC: see also further comments on individual sections and policies - PSLP_2269 and 2272-2279. The whole representation form (personal details redacted) has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

Forward

We appreciate the effort and thought that has gone into preparing the Pre-Submission Local Plan. We note and welcome a number of areas where our representations in respect of the Regulation 18 draft local plan consultation have been taken into account and the plan amended.

The task of developing a local plan over such a long term is very challenging especially in the context of a significant and society changing event such as the Covid pandemic. We agree with the statement set out at paragraph 2.41 of the Pre-Submission Local Plan that acknowledges the challenges of planning when faced with structural societal changes. We agree that a flexible approach should be taken when attempting to assess and balance the needs of retail, office, housing and culture.

To that end we make the following observations:

Retail

We note the plan identifies a need for increased retail space; this is in spite of the number of empty premises in the town centre. In a visual survey of Mount Pleasant, Calverley Road, Royal Victoria Place and Crescent Road we identified 51 empty premises and in addition there is the well-publicised closure of John Lewis in north farm. We consider that retail businesses are going through a period of significant structural change which the Covid pandemic has hastened but not caused in the shift to online shopping and distribution. We therefore consider the case for the need for more retail space to be very weak.

Office space

We agree with the statement at paragraph 5.24 that no additional office space is needed in the town centre and existing space may need to be re-purposed. We note a recent BBC survey of major employers reported that 85% of employers will not be returning to their offices full-time, and indeed in a straw poll of our own small group, 100% of those people working in office space will not be expected to return to the office full-time.

This represents another structural change in working patterns. However, we also consider it an opportunity for the growth of more local services in the leisure and culture sectors that will provide additional local employment, potentially reduce travelling and if managed appropriately, enhance the borough and the experiences of its residents.

To that end we consider the plan should include an addition to the strategic policies that ensures there is suitable flexibility in planning decisions in terms of purpose (e.g. between retail, office and housing) so as to avoid the highly undesirable circumstances of Green Belt and green field development running amok while the town centres languish empty and underutilised. This addition could possibly be made in STR4 but a case could be made for such a clause in all of the strategic policies.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction and General Comment

The British Horse Society (BHS) is a registered charity with over 100,000 members. The BHS represents and promotes the interests of all horses and those who care about them, including 2.7 million people in Britain who ride or who drive horse-drawn carriages. We offer world-class qualifications, an approvals system awarding quality instruction and care, and support and guidance on access, safety and welfare issues.

Equestrianism is a popular and healthy activity for people of all ages. The BHS commissioned research into the physical health, psychological and wellbeing benefits of recreational horse riding in the United Kingdom which was published in 2011. It assessed riding as a moderate intensity exercise and examined the frequency with which individuals take part. Reliable evidence indicates that physical exercise produces wellbeing benefits linked to social interaction and changes in mood, anxiety, self-esteem and other personal emotions.

The report is available on www.bhs.org.uk/enjoy-riding/health-benefits .

Horse activities engage a high proportion of people with disabilities, women participants and participants over the age of 45. Nearly 40% of those taking part do not participate in other forms of physical activity. All these factors are very important in recognising that equestrianism is vital to the health of a significant section of the population which is known to be at risk.

Equine and equestrian businesses include riding schools and coaches, livery yards, competition yards, trekking centres, breeders, trainers, welfare charities, veterinary services, farriers, feed merchants, tack, equipment and clothing manufacturers and retailers, shows and event services.

The British Equestrian Trade Association (BETA) represents more than 800 member companies. The most recent BETA National Equestrian Survey (2015)¹ indicated:

- . Estimated £3,600 spent on each horse
 - . £4.3 billion economic value of the equestrian sector
 - . £560 million spending on items such as hats and body protectors, clothing, books and magazines
 - . 944,000 horses in Britain
 - . 3 million regular riders of 2.7 million total
 - . 74% female (962,000 female regular riders, 348,000 males)
- 44% of those riding once a week or less say they would ride more frequently if they had access to safe off road riding or bridleways. This is the most cited reason that would make people ride more frequently. www.beta-uk.org/pages/industry-information/market-information.php .

Whether purely for recreation or when riding or driving professionally, equestrians may use public rights of way (including roads) and open spaces, and may rely on them as the only place they may

ride or drive. Routes free from motorised traffic are preferable, for safety and for freedom from noise and pollution, providing a healthy respite for body and mind.

England has 117,250 miles of recorded public rights of way, of which only 22% are bridleway or byway (available to riders). Many of these paths are unusable on horseback because they have been isolated by busy roads or truncated by development or a failure to record a through route. Some areas may have a network of bridleways or byways, other areas have none at all, including the whole of adjacent parishes, meaning that riders may have no off-road access for a ten mile radius or more, and carriage-drivers may have nothing within tens of miles. **This is the case in much of the Borough of Tunbridge Wells, where the proportion of public rights of way that are of bridleway or byway status is considerably lower than the national average (only 16% of rights of way in Kent are bridleways or byways); most of these are very short routes that would take no more than a few minutes to ride, linked by increasingly busy roads.**

The BHS considers horse-related traffic incidents to be significantly under reported, to it, the police or any other body. This view is supported by the Hospital Episode Statistics (NHS Digital) in 2015-16 which reported 4,094 episodes requiring treatment in hospital for 'animal-rider or occupant animal-drawn vehicle injured in transport accident'. Between 29.02.20 and 28.02.21

- . 1,010 road incidents involving horses have been reported to The British Horse Society
- . Of these, 46 horses have **died** and 118 have been **injured**
- . 130 people have been **injured** because of road incidents
- . 45% of riders were victims to **road rage** or **abuse**
- . 80% of incidents occurred because a vehicle **passed by too closely** to the horse
- . 43% of incidents occurred because a vehicle **passed by too quickly**

(* Note that this figure is undoubtedly a fraction of those that occurred.)

The cost of a fatal road traffic collision is around £1.8million per casualty; with even slight incidents around £18,000 per casualty (www.gov.uk/government/publications/reported-road-casualties-great-britain-annual-report-2016) based on medical, police, insurance, lost output and 'human' (distress, suffering, pain) costs. It does not take account of secondary costs to other people affected by a road traffic incident, for whom the consequence of delays could be considerable.

A figure for an equine casualty is not available, but transport and disposal of a dead horse alone is likely to be £1,000. Replacement for the majority of horses is likely to cost several thousand pounds. For some horses there may be lost output in terms of stud fees or prize money. In UK law unfortunately a horse is considered to be property, not a sentient being, but most horse owners will attribute the equivalent of human cost (distress, suffering, pain) as well as veterinary and insurance costs and lost benefits of ownership.

The thousands of new homes proposed in this Draft Plan will contain a large number of additional households containing one or more people who will want to ride, yet this Plan, so far, appears to contain no proposals whatsoever for improving and extending public riding facilities, the only mention of equestrians being Policy ED6 placing conditions on recreational (including equestrian) uses in the countryside. Indeed, the Plan proposes to build housing developments on the sites of two equestrian centres, without providing any replacements for them. This compounds the loss of several other riding stables to housing developments in recent years. Moreover, the additional motor traffic which will be caused on the rural roads which are currently used by equestrians around Paddock Wood, Brenchley and Matfield and Pembury will mean there are even fewer places where people can safely ride.

In creating the new strategic settlements and in providing access improvements to the Green Belt designed to compensate for the loss of areas of Green Belt, the opportunity should have been taken to create a network of new public bridleways and horse riding routes. As at Trent Park in London, these should be linked to the provision of riding centres, or else access to the riding routes should be within safe and easy reach of an existing riding centre.

Wherever possible, new cycle routes should be dedicated as public bridleways, so that horse riders are able to use them as well as cyclists and walkers. The proposed cycle route linking Sissinghurst, Cranbrook and Hartley to Bedgebury Forest would be a particularly useful route for horseriders as Bedgebury Forest is the only place in the Borough where there is anything approaching a network of bridleways. The new developments at Hawkenbury, particularly the new sports hub, should provide horse riding routes that link to the existing public bridleways nearby. In some London

Boroughs, horse riding routes have been created around the perimeter of playing fields and the same could have been done here, but it appears there is no intention to do so. **The proposed green infrastructure route along the old Hop Pickers' Railway Line should also be a route for horse riders**, like the Cuckoo Line and the Forest Way in East Sussex, both of which are old railway lines that are now non-motorised user routes, instead of just proposing it as a walking and cycling route.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Provide for new riding stables with linked riding circuits as part of the new strategic developments.
Prioritise the provision of new bridleways.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To ensure that suitable new riding facilities will be provided as part of the new strategic developments under the Plan and to provide guidance as to how this might best be done.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation The Rt Hon Greg Clark MP

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Comments on the whole Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please accept this as a response to the Tunbridge Wells Borough Council Regulation 19 consultation, which is currently in progress.

I support the intention to adopt a local plan, since this is the most secure way to ensure that important decisions - such as where new development takes place, the conditions development must meet, protection of our beautiful and precious natural environment, safeguarding against flooding and the provision of local infrastructure - are made locally. A failure to adopt a local plan that passes examination in public would mean that all parts of the Borough - towns and villages - would be subject to uncontrolled, unplanned speculative development with the national Planning Inspectorate deciding on individual applications, rather than our own elected councillors with their deep knowledge of our local area.

I note that the draft plan has been developed by a cross-party working group and that it was supported by all of the political parties represented in the Tunbridge Wells Borough Council. For such a detailed and long-lasting plan this seems to me to be the right approach to take to its development.

Clearly the most appropriate forum for detailed proposed changes is the Examination in Public that follows submission of a proposed plan. At the Examination in Public members of the public and their representatives will be able to make detailed proposals for change to particular sites directly to the Inspector who will have the power to order modifications to the submitted plan.

I intend to request to appear in person at the Examination in Public to represent the views of my constituents in every part of my constituency.

While this stage is not for the detailed changes that the Examination in Public will consider, it is important that the draft plan is clear about strategic objectives. I set out here a number that I would be grateful to have taken into account prior to submission. They comprise seven principles for a sustainable local plan that I would like to see the plan reflect.

These are:

1. Protecting our precious natural environment

It is of prime importance that any new development, anywhere in the Borough, must be environmentally sustainable. We are fortunate to live in one of the most beautiful parts of Britain, with both Green Belt and Areas of Outstanding Natural Beauty, as well as environmentally important and beautiful land that does not carry such a formal designation.

In areas of proposed significant development - including but not limited to those close to Capel, Paddock Wood, Ramslye, Hawkhurst and the Weald villages - it is important at the Examination in Public that the impact on the natural environment - including the volume, design, density and sustainability of the proposals - is assessed in detail, including by independent bodies such as The Woodland Trust and Kent High Weald Partnership, and that alternatives to the initially proposed sites are rigorously considered.

For example, too many recent developments have involved the loss of mature trees which I believe must be avoided in a sound plan. It will also be necessary to consider the differences in the character of the settlements - including in Capel, for example, the centuries-old tradition of smaller, hamlet-like settlements.

2. "I before E": Infrastructure before Expansion

Too often new development takes place before - and in many cases, without - the necessary infrastructure being provided. This includes not just road capacity, but provision for GP surgeries, schools, public transport (buses and trains), drainage and sewerage capacity and other aspects of supporting investment.

I strongly urge the Council to emphasise in the proposed plan and through the Examination in Public a clear principle of "I before E": no expansion should take place by way of development being started

unless and until the supporting infrastructure is agreed, funded, contracted and construction started or work commenced.

3. Brownfield first

Once built on, it is difficult to return land to nature in the future. So we must be sparing in our use of green fields, even outside the formally-designated Green Belt and Areas of Outstanding Natural Beauty. The plan should adopt the principle of 'Brownfield first' - making use of land that has been previously developed and is no longer needed for its current use. Sometimes this will involve the Council or developers investing to remediate land that has been contaminated by previous uses. The plan should be clear that gardens should not be considered to be previously developed ie brownfield land.

4. Establish walking, cycling and equestrian connections between every settlement in the Borough

The opportunity of a 10-year local plan is that it should establish connections between places that would not be possible through piecemeal, unplanned development. There is a major opportunity to do this with walking and cycling routes connecting our settlements.

Many local people have, during lockdown, discovered the delights of the area around us. They have made use of public footpaths and bridleways that have been established in the past. This plan should be an opportunity to provide more connections for this and future generations. Too often, especially in the countryside, the ability to enjoy the glories of our natural environment and to live in rural areas are impeded by the lack of safe pedestrian or cycle or equestrian routes between settlements and sometimes even within them.

I believe that the plan should set out a clear ambition to ensure that all settlements within the Borough are connected to each other by safe routes for non-motorised traffic. Sometimes they will be provided alongside motor vehicle routes - such as the cycleway which follows the A21 between Tonbridge and Pembury, for which I successfully campaigned. At other times, the opportunity should be made to establish walking and cycling routes away from roads, such as using existing public rights of way and establishing new ones.

5. Road traffic should be provided for, not wished away

The plan should embody a significant upgrade in our road capacity. In the past, it was thought that if road capacity was restricted, making travel by car more unpleasant and unpredictable, it would cause car use to fall away. That was a fallacy. Locally, the dualling of the A21 shows the right approach. When it was restricted to a single carriageway between Tonbridge and Pembury, traffic did not reduce but instead pollution, environmental degradation and accidents (several of them fatal) increased. The dualled A21 is a better, safer, cleaner and more environmentally positive road than the one it replaced.

By 2030, no car with a petrol or diesel engine will be sold in the UK. This means that during the lifetime of the proposed plan, the assumption that cars are sources of pollution - damaging air quality and contributing to climate change - will have to change. Soon, all cars will be powered by clean electricity or hydrogen and contribute no damaging emissions.

There is much that needs to be upgraded in our road network. In particular, the plan should emphasise the importance of dualling the A21 south of Kippings Cross. It should also provide for an alleviation of the dangerous and congested A228 crossing Colts Hill - which, as the principal route between Tunbridge Wells, Maidstone and the Medway towns, should be regarded as a prime strategic route. The congestion within our towns should be addressed - including the Pembury Road into Tunbridge Wells and the notorious crossroad at Hawkhurst. The proposed plan would be an important place to emphasise a vision for reduced speeding between villages. It goes without saying that the plan should not reduce road capacity. In that respect, the bizarre appearance of an option of closing to traffic (other than buses) the railway bridge at Paddock Wood should be dropped immediately. It is so obviously inappropriate that residents should not have to worry about it.

6. Any new development must positively reduce, and not add to, the flood risk for existing residents

Several parts of the Borough are in low lying areas and/or in areas with a history of flooding. All the indications are that we should prepare for more frequent incidences of weather events that give rise to flooding than was typical in the past.

I share the concerns of my constituents that existing levels of protection have often not been adequate to the demands of current meteorological conditions. Through a debate in the House of Commons, and subsequent pressure on Southern Water, I have obtained action to install a new "round-the-town"

drainage system in Paddock Wood, as well an investment in infrastructure such as in Nevill Street, Tunbridge Wells. The local plan should make two inviolable requirements of any new development:

(i) That it will not add to the overall flood risk of the area in which it is proposed;

and

(ii) That it will take the opportunity to *reduce* the current flood risk faced by existing residents. This can be achieved by requiring, for example, investment in new drainage infrastructure or upgraded pumping stations to serve existing populations, or to create flood defences such as flood containment areas.

Consistent with principle 2, these commitments should be required to be enacted *before* development can take place.

7. Better provision should be made for playing fields, sport and leisure facilities

An advantage of development that is planned rather than speculative and piecemeal is that it can provide for collective facilities that will be needed now and in the longer term.

Sports and leisure facilities are prime among these. The erosion of playing fields must be ended and the local plan should establish the principle that no playing field should be lost - in whole or part - without an equal or better new facility provided in its place. In this respect, better should refer to both area and quality.

New sports and leisure facilities should be established in return for new development.. This will involve providing for upgraded facilities - for example all-weather pitches are increasingly demanded to allow year-round sporting events to take place. Care should be taken that the provision of new sports facilities is undertaken sensitively and not at the expense of other valued uses.

I would be grateful if the Council would consider these recommendations as it revises the plan for Examination in Public, at which point I will contribute further specific requests and representations on individual sites directly at the Examination in Public.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would be grateful if the Council would consider these recommendations as it revises the plan for Examination in Public, at which point I will contribute further specific requests and representations on individual sites directly at the Examination in Public.

Duty to Cooperate

Soundness

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see the attached representations statement prepared by Pro Vision on behalf of Cooper Estates Strategic Land along with the associated appendices. However in summary we have the following comments:

Duty to Cooperate

We have significant concern that, given the context of the problems already identified through the respective Examinations of the SDC and TMBC plans, that the TWBC plan, in the same HMA, is at risk of failing the legal test on the specific matter of a lack of strategic, cross-boundary planning to meet housing needs. We consider that the three Councils have failed to engage constructively to resolve the issue of unmet housing needs, and given the findings of the Inspector in respect of the SDC Examination, namely that "The absence of such engagement means that neither the submitted plan nor neighbouring authorities' plan-making processes have been shaped by adequate consideration of how Sevenoaks' full housing need was to be met", the Regulation 19 LP should not proceed to submission. Instead, TWBC should engage directly with SDC and TMBC to work together to address the housing needs of the West Kent Housing Market Area.

Meeting the needs of Older People

We welcome the recognition by TWBC that there is a specific need for extra care accommodation within the Borough. However, we conclude that insufficient sites are proposed for allocation to meet the identified need. Sites proposed for allocation either will deliver residential care homes / beds instead of extra care accommodation, and/or they may either be undeliverable or with no certainty of

deliverability from the evidence available, and in respect of the proposal allocation of the Woodsgate Corner site, even if this site were to come forward for Extra Care housing, the Council itself acknowledges this will not be before 2031 and so therefore this site does nothing to meet the need which is accepted to exist now. We conclude that this need can only be met fully by providing for additional sites through the Local Plan including the land at Sandown Park, Tunbridge Wells.

Soundness

Notwithstanding our concerns about legal compliance, we consider that modifications are required to Paragraph 6.350, and that the Council should not seek through the Local Plan to influence the interpretation of the Use Classes Order. This should be left to the decision-making process, where applications are assessed and determined on their merits and on the facts of the case before the Council at that time. We consider that amendments should be made to Policy H3 to eliminate ambiguity by removing the reference to “units” and insert instead the word “dwellings” to ensure consistency in the policy. We consider that the Plan is also unsound in that there has been no assessment of the viability of seeking affordable housing from C2 residential care community (Extra Care) developments, and so the plan and its evidence base have had no regard to the unique development and operating costs of such developments. The policy is considered to make such developments unviable.

The modifications to the Local Plan suggested on behalf of CESL are necessary to ensure that it would be positively prepared, justified, effective and consistent with national policy.

[TWBC: the full representation (attached with appendices) has been divided into Duty to Cooperate (whole Plan) (PSLP_2048), Policy H6 (PSLP_2049), Policy AL/PE6 (PSLP_2050), Policy STR/RTW1 (PSLP_2051) and Policy H3 (PSLP_2052). As there are many footnotes throughout the representation these have been referenced in a list at the end of each part of the representation].

1.0 Introduction

1.1 These representations have been prepared by Pro Vision on behalf of Cooper Estates Strategic Land Ltd (CESL). CESL is the owner of the land at Sandown Park, Tunbridge Wells (the Site). Pro Vision are chartered Town Planners, Architects, Urban Designers and Ecologists.

Background

1.2 The Site has previously been promoted to Tunbridge Wells Borough Council (TWBC). The Site features in the 2009 Strategic Housing Land Availability Assessment (SHLAA) in two parcels (See **Appendix 1**): Parcel 55 - the land north of Blackhurst Lane; and Parcel 56 - the land south of Blackhurst Lane).

1.3 For Parcel 55, TWBC concluded in 2009:

- . “the site is very well screened with a woodland border so no significant views into and out of the site”; and
- . “it could be suitable for a sensitive ... development... in a woodland setting”.

1.4 For Parcel 56, TWBC concluded:

- . “the site is very well enclosed by woodland boundary to the north, east and west of the site, but the area to the south, exposed to Pembury Road is open”; and
- . “sensitive...development could be accommodated taking in to account the presence of Ancient Woodland and the need for landscaping to protect the open views to the south”.

1.5 The site was subsequently promoted as an omission site for C2 uses within the processes that culminated in the Site Allocations Local Plan (SALP). This included the submission of comments to the Draft SALP in March 2015 and attendance at the Examination between October and December 2015. This also included a Judicial Review that concluded in February 2017.

1.6 The thrust of the CESL representations, including the Judicial Review, were that:

- 1 the housing need for older persons in the 2010 Core Strategy was not based on a National Planning Policy Framework compliant Full Objectively Assessed Need; and
- 2 there was, at the time of the SALP Examination, an uncontested independent and reliable evidence of quantified existing C2 need for an additional 1,400 specialist dwellings for older persons in the Borough between 2013 and 2033 (70 units per annum) in the Council’s 2015 Strategic Housing Market Assessment (SHMA)²; and
- . there was a separate need for 796 care and/or nursing home bedspaces in the same 2013 and 2033 period³; and

1 only 3 sites were allocated in the SALP that may have been suitable for C2 uses⁴, but in any event, these were dependent on market forces to deliver these as C2 schemes instead of as C3 housing.

2 In any event, these 3 sites would only deliver a maximum of 227 units, and only then if all of the largest site was fully delivered as C2; but as vi. the Council considered that any care facility that did not involve staff attending to bedspaces within an institutional population would constitute a C3 use, not a C2 use; so

3 the SALP did not seek to allocate the Site for C2 use within the context of the 2010 Core Strategy.

1.7 At the SALP Examination on 9 December 2015, TWBC conceded that, notwithstanding the above points, the issues raised regarding C2 need would be taken forward via an early subsequent review of the Core Strategy / SALP⁵. This process now forms the emerging Local Plan the subject of this Regulation 19 consultation.

1.8 CESL pursued a Judicial Review (JR) into the SALP adoption. The reasons for the JR are documented in the submitted *“Joint Statement of Facts and Grounds”* made between CESL and TWBC⁶ as part of the JR process. These indicate that the JR was made because:

- . The SALP Inspector misunderstood the Claimant’s primary case (that the SALP did not address the need for homes of older persons (including, but not only, care homes) as identified in the Core Strategy in 2010) and that he failed to address the issues arising from this position (Appendix 3, Para 59); and so
- . The SALP Inspector did not allow the possibility that the SALP could have sought to select and allocate Greenfield sites adjacent to the Limits of Built Development (LBD) at Tunbridge Wells, within the context of a need that had been identified by the 2010 Core Strategy, but which was unmet by the SALP (Appendix 3, Paras 66 and 68); and
- . The SALP Inspector concluded, erroneously, that he was precluded by case law from taking into account changes in evidence and policy that have taken place since the Core Strategy was adopted in 2010 (Appendix 3, Paras 80 - 89).

1.9 The February 2017 Judgement to the Judicial Review⁷ concluded that the JR was unsuccessful and that the SALP did not need, at that time, to allocate further sites for C2 use. This was because the 2010 Core Strategy (CS), to which the SALP was a daughter document, set no target for it to do so itself because there was no need identified within the CS for such sites.

1.10 In other words, the reason for the JR failure was not in relation to the merits of the need argument outlined at Para 1.6 above (which evolved after the Core Strategy was adopted), or whether the proposed allocation was or was not C2 use; but a procedural one alone (i.e. the relationship of the SALP to the CS).

1.11 The Site was promoted as a potential C2 development site during the Call for Sites exercises (July 2016 and May 2017) relating to this emerging Local Plan.

1.12 Pro Vision made representations on behalf of CESL to both the Issues and Options stage (June 2017) and the Draft Plan stage (Regulation 18, November 2019) of the emerging Local Plan regarding the policy context for C2 proposals.

1.13 The thrust of the representations at Regulation 18 stage was that, notwithstanding the commitment made by TWBC during the SALP Examination (Appendix 2) to revisit the C2 need and possible allocations resulting:

- . The 2015 SHMA, which informed the SALP process, continues to be relevant to the emerging Local Plan. Furthermore, the 2017 Update to the same⁸ sets out the changes to the number of people aged 75 and over who are expected to be living in some form of C2 accommodation which indicates an increase of about 750 people over the 2015-35 period in Tunbridge Wells – equivalent to 37 units per annum (Paragraph 8.3);
- . Accordingly, there is still a significant, Council-acknowledged, need for accommodation for the older people;
- . The Council continues to assume that the market should be left to decide whether to deliver any site as conventional (C3) housing, for which there is a pressing need within the Borough anyway; consequently
- . The Regulation 18 Consultation Local Plan only carried forward an allocation from the SALP (AL/RTW 32 at Beechwood Sacred Heart School). This site benefits from planning permission⁹, issued September 2017. Therefore, this allocation does nothing to support the established unmet

- need, and the future need identified within the Borough by the evidence base supporting this Regulation 19 consultation;
- Policy H9 is, in any event, inconsistent with Paragraph 59 of the 2019 Framework and the June 2019 edition of the Planning Practice Guide relating to Housing for Older and Disabled People¹⁰. Specific elements of the latter that are overlooked are:
 - o “plan-making authorities should set clear policies to address the housing needs of older people, which could provide indicative figures or a range for the number of units of specialist housing for older people needed across the plan area throughout the plan period” (Paragraph: 006 Reference ID: 63-006-20190626);
 - o “Allocating sites can provide greater certainty for developers and encourage the provision of sites in suitable locations” (Paragraph: 013 Reference ID: 63-013- 20190626);
 - o The different types of specialist housing available to meet the diverse needs of older people (Paragraph: 010 Reference ID: 63-010-20190626). This also indicates that care provided within such communities is regulated by the Care Quality Commission (CQC);
 - o When determining whether a development for specialist housing for older people falls within C2 (Residential Institutions) or C3 (Dwellinghouse) of the Use Classes Order, consideration could, for example, be given to the level of care and scale of communal facilities provided. (Paragraph: 014 Reference ID: 63-014-20190626).
 - o Accordingly, Table 6 of the Regulation 18 Local Plan is an inadequate summary of the PPG on this matter, and incorrectly perpetuates the position taken by the CS / SALP.

1.14 The logical conclusion from the Regulation 18 Representations was therefore that TWBC should allocate further sites, specifically for C2 use. This should have prompted a proper consideration by TWBC of all sites promoted for C2 use and including the land at Sandown Park promoted by CESL.

Regulation 19 Consultation

1.15 These representations are the CESL response to the Regulation 19 Pre-Submission Local Plan (the LP).

These representations relate to:

- The Duty to Cooperate
- Older People's Housing Need
- Proposed Older People's Allocations
- Land at Sandown Park
- Extra Care Use Class
- Policy H3

1.16 The National Planning Policy Framework (the Framework) states¹¹ that for a Local Plan to be suitable for adoption it must be both legally compliant and sound. To be considered sound, it must demonstrate that it is:

- *"Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- *Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- *Effective - deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- *Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework."*

1.17 These representations explain why the Regulation 19 Local Plan is neither legally compliant, nor 'sound'. Should the LP progress in its current form to Submission and Examination, CESL requests participation in the LP Examination through written and oral submissions.

2.0 Duty to Cooperate

Introduction

2.1 A legal test for the TWBC Local Plan at Examination will be whether the Duty to Cooperate (DtC) has been satisfied.

2.2 In response to the legal requirements, and national policy¹², TWBC has published a Duty to Cooperate Statement¹³ (the Statement).

2.3 The Statement concludes (Page 54) that *“TWBC has actively undertaken a process of on-going collaborative, constructive engagement working with others in progressing cross-boundary strategic matters in the preparation of the Pre-Submission Local Plan”*.

2.4 This implies that the LPA is satisfied that it has met, or is in the process of meeting, the DtC as it progresses towards submission and examination of the LP. We have reservations as to the validity of this conclusion for the reasons set out below.

Scope of the DtC

2.5 The DtC requires identification of cooperation over strategic, cross-boundary spatial planning matters. Four such matters are identified for the LP:

- . Housing needs
- . Employment/economic needs
- . Infrastructure and transport; and
- . Environment.

2.6 The Green Belt is a conspicuous issue that is missing. The Green Belt influences most, if not all, of these strategic matters.

2.7 As the Statement rightly acknowledges, the PPG encourages LPAs to commission joint research and evidence to address key cross-boundary matters. The Green Belt in this region is one such key strategic planning policy matter, acting as a significant constraint to development, but no joint study has been undertaken, and therefore decisions about opportunities to amend Green Belt boundaries, and its coverage across each Council area to meet development needs have been taken in isolation.

2.8 This contrasts to the approaches taken in some other regions so that strategic, cross-boundary decisions can be taken to release land for development in the most sustainable and effective places. We would draw attention to several precedents for such strategic reviews of Green Belts since the introduction of the DtC through the NPPG in 2012. These include:

- . West Midlands Joint Green Belt Study (July 2015)¹⁴
- . Dacorum BC, St Albans City and District Council and Welwyn Hatfield Borough Council: Green Belt Review Purposes Assessment, November 2013¹⁵
- . Christchurch and East Dorset: Green Belt Assessment: Final Report (September 2017)¹⁶.

Neighbouring authorities and the DtC

2.9 It is relevant to note how the neighbouring authorities have fared with the DtC in recent months. Both Sevenoaks District Council (SDC) and Tonbridge and Malling Borough Council (TMBC) are more advanced in the plan-making process than TWBC, and have had Local Plans at Examination in the last two years.

2.10 As has been widely reported, both SDC and TMBC have encountered significant challenges over their compliance with this legal test.

2.11 In summary, SDC's Local Plan is not proceeding following the Inspector's letter identifying failings with the DtC¹⁷. This has subsequently been tested in the Courts and the Inspector's position has been supported¹⁸. SDC's position has been deemed “unarguable” by Rt. Hon. Lady Justice Macur in the Court of Appeal, who concurred with the Judgement of Dove J in the High Court, that *“the applicant had failed to take part in any timely, constructive, active or ongoing engagement with neighbouring councils regarding unmet housing needs in accordance with s33A(2) & (3) P & CPA 2004, informed by the Framework and Planning Practice Guidance.”*

2.12 A key paragraph from the Inspector's letter to SDC is:

*“In conclusion, I consider that the Council has not adequately undertaken constructive engagement with neighbouring authorities to resolve the issue of unmet housing need in the District and has failed to plan strategically by not sufficiently examining how these needs could be accommodated. The absence of such engagement means that neither the submitted plan **nor neighbouring authorities' plan-making processes have been shaped by adequate consideration of how Sevenoaks' full housing need was to be met**”.* (Our emphasis).

2.13 TMBC's Local Plan has also met similar problems following commencement of the Examination in autumn 2020. There, the Inspectors concluded that the DtC had not been satisfied¹⁹:

"...we consider it reasonable to conclude that the Council has failed to engage constructively, actively and on an ongoing basis in the preparation of the plan, so far as it relates to the strategic matter of housing".

2.14 In both cases, the failure to meet the DtC related specifically to the strategic, cross-boundary issue of housing needs. Both SDC and TMBC are within the West Kent Housing Market Area along with TWBC. Therefore, given that TWBC was part of the same process of strategic planmaking, logically, there must be significant risk that TWBC is not immune from the identified failures of its two neighbours.

Who is responsible for remedying failures in DtC?

2.15 The fate of both SDC and TMBC's Examinations has clarified, if clarification were needed, that failures in this legal duty cannot be remedied through the Examination process. Therefore, it is incumbent on TWBC before progressing to Submission and Examination of its Local Plan, to ensure that compliance with the DtC is fully reviewed in the context of the problems highlighted in the neighbouring authorities.

2.16 Noting that meeting strategic housing needs is the issue, specifically unmet needs in SDC, and that the Green Belt in the region is one of the key factors affecting the development capacity, it adds further emphasis on the need for joint evidence and coordinated strategy over the approach to the Green Belt in the West Kent HMA.

2.17 Paragraph 4.12 of the Regulation 19 Local Plan recognises: *"In addition to seeking to meet the borough's housing needs, the NPPF expects councils to also take into account any unmet housing needs from neighbouring areas"*. However, the paragraph continues: *"... the position for Sevenoaks District Council is unclear. It was not proposing to wholly meet its housing need (with a shortfall of 1,900 dwellings), although this is likely to be further tested."*

2.18 The Housing Needs Assessment Topic Paper for the Pre-Submission Local Plan states at Paragraphs 2.47 – 2.48:

"...the Borough Council should, as a minimum, seek to meet its own local housing needs within the borough. In addition, although there is uncertainty about the robustness of the request by Sevenoaks District Council for help in meeting some of its housing need, it would be prudent to also consider the scope to help meet its unmet needs in order to ensure, as much as possible in accordance with the NPPF, that the full housing need across the West Kent housing market area is met".

"Indeed, it is considered that the Sustainability Appraisal should assess a growth option that covers the scope for meeting up to the full unmet need (as currently advised) from Sevenoaks, of 1,900 dwellings. In addition, a further scenario with this in addition to the borough's own uncapped need should be assessed. This will provide an option with a relatively high level of growth, that covers both greater local needs than from Sevenoaks, or indeed elsewhere, if the current request is withdrawn or not found to be reasonable."

2.19 The Sustainability Appraisal does assess the option of uncapped and meeting unmet need, and unsurprisingly concludes that there will be greater social and economic benefits resulting from additional growth, but with that there would be higher environmental impacts. This is a matter of planning balance. But weighing heavily in favour of further growth is the clear need for housing within the West Kent Market Area. Therefore TWBC, along with TMBC and SDC should have engaged constructively, actively and on an ongoing basis in the preparation of the respective Local Plans, in accordance with the Framework so that *"the full housing need across the West Kent housing market area is met"*.

2.20 However, the DtC Statement concludes (Paragraph 4.25) that:

"...TWBC has fulfilled its legitimate expectations under DtC in relation to meeting housing needs and that it remains to be fully tested what, if any, unmet need there is from SDC. While TWBC has been an "active engager" with SDC it remains SDC's responsibility, rather than TWBC's, to lead on resolving its own housing needs. Discussions with SDC will continue on this matter ahead of submission of the TWBC Local Plan". (Our emphasis).

2.21 This appears to be a very similar line of argument to that adopted by TMBC i.e. deferral to the LPA experiencing the strategic problem – but which was criticised by the Inspectors' as follows: *"The*

Council argue that SDC did not formally ask them for help and it was not up to the Council to “make the running”, but **this is a circular argument with a risk that both parties were seemingly deferring the issue to the other**.²⁰ (Our emphasis).

2.22 Genuine cooperation between the HMA authorities would therefore require the issue of unmet need to be clarified and addressed and a strategic, cross-boundary solution identified for all the strategic plans involved. That would ensure that housing need, across the spectrum of different social groups, including specialist housing for older people, is both fully understood, and planned for in an effective way.

Conclusion on DtC

2.23 We have significant concern that, given the context of the problems already identified through the respective Examinations of the SDC and TMBC plans, that the TWBC Local Plan, in the same HMA, is at risk of failing the legal test on the specific matter of a lack of strategic, crossboundary planning to meet housing needs.

6.0 Soundness

6.1 We consider the LP is not sound (i.e. is not positively prepared, justified, effective or consistent with national policy) in how it translates the broad development strategy and identified need into detailed policy for the provision of sufficient specialist accommodation to meet the needs of older people, specifically in relation to the provision of Extra Care housing. We also consider the LP is not sound in respect of the definition of Extra Care and Policy H3 in respect of affordable housing.

Extra Care Definition

6.2 Paragraph 6.350 of the Regulation 19 LP states:

“The PPG states that it is for the local planning authority to consider whether a particular development may fall within Use Class C2 (residential institutions) or C3 (dwelling houses).

- Class C2: Residential Care Homes and Nursing Homes, End of Life, Hospice Care, and Dementia Care Home Accommodation;*
- Class C3: Age restricted general market housing, Retirement Living, Sheltered Accommodation, and Extra Care Accommodation, Assisted Living, Close Care, Continuing Care”*

6.3 Paragraph 6.351 continues: *“The above list is not exhaustive or prescriptive and sets out how different types of housing for older people would generally be viewed in terms of the Use Class Order, taking into account, in particular, the level of care that may be provided. However, it is acknowledged that levels of care provision do vary depending on the nature of the scheme put forward, with some schemes including a mix of Class C2 and C3 uses so that residents can remain in the one location, adjusting the level of care they need as their needs change. Consequently, each application will be assessed on its own merits.”*

6.4 It is agreed that Paragraph: 014 Reference ID: 63-014-20190626 of the PPG does states that it is for the LPA to consider into which Planning Use Class a particular development may fall. The PPG recognises that *“When determining whether a development for specialist housing for older people falls within C2 (Residential Institutions) or C3 (Dwellinghouse) of the Use Classes Order, consideration could, for example, be given to the level of care and scale of communal facilities provided.”*

6.5 However, the PPG is referring to the assessment of a planning application i.e. when presented with an application for older persons housing, it is for the decision-maker on the facts of the case to determine whether the proposed use is C2 or C3. This section of the PPG was not intending for each Council to categorise types of older persons housing into either C2 or C3 of the Use Classes Order.

6.6 If Paragraph 6.350 of the LP is not amended, an application such as that approved in July 2020 by Wealdon District Council at Little Mount Farm⁵⁵ in Frant (on the border of Royal Tunbridge Wells) for a C2 Extra Care scheme⁵⁶, would be regarded as a C3 development in TWBC. This is non-sensical i.e. the determining factor is the nature of the use, not the geographical location of the development.

6.7 We note that there have been numerous appeal decisions and Judgements providing useful analysis of how a proposal for Extra Care housing should be considered, including consideration of the distinctions between a C2 use and a C3 use when it comes to Extra Care schemes.

6.8 In particular, the East Devon District Council application 16/0872/MFUL⁵⁷, granted on appeal in January 2018 at Station Road, Sidmouth, considered the nature of C2 uses. This appeal decision also cites other independent sources including the RTPi's former Good Practice Note 858 and a Housing,

Learning and Improvement Network (Housing LIN) document⁵⁹. Together, these indicates that C2 uses include “*purpose-built accommodation in which varying amounts of care and support can be offered and where some services are shared.*”

6.9 In the appeal decision for a scheme that included both flatted apartments and self-contained dwelling-style premises, the Inspector acknowledged that each unit in the development would have “*their own front doors, private space and facilities*”. However, many, but not all, would be accessed via communal spaces and that the occupiers of the units would have access to a range of communal areas and facilities including:

- . a restaurant/bar/cafe serving food throughout the day;
- . a well-being suite comprising a gym, treatment rooms and pool
- . a communal lounge; and
- . a staffed and supervised physiotherapy suite and a hydrotherapy pool.

6.10 All of the above facilities would be available primarily to residents, but the Inspector noted that these could also be available to the general public. Nonetheless, these matters, together with (a) an age restriction for primary occupiers (of 60 years or older) and (b) that the unit occupiers must be in need of at least 2 hours of personal care per week, would still constitute a C2 operation, even though in that case a care team would not be resident on site (only visiting as required/scheduled).

6.11 To address these concerns, Para 6.350 should be deleted, or at the very least amended so that the determination of the use class of a proposal is made on a case by case basis having regard to the particular facts pertaining to a development proposal. Given the variety of business models operating in the Extra Care sector, and the varying levels of care provided in such developments, it is entirely inappropriate for a Local Plan to ascribe Use Classes to these uses, the decision should be left to the decision maker.

7.0 Conclusion

Duty to Cooperate

7.1 We have significant concern that, given the context of the problems already identified through the respective Examinations of the SDC and TMBC plans, that the TWBC plan, in the same HMA, is at risk of failing the legal test on the specific matter of a lack of strategic, cross-boundary planning to meet housing needs.

7.2 We consider that the three Councils have failed to engage constructively to resolve the issue of unmet housing needs, and given the findings of the Inspector in respect of the SDC Examination, namely that “*The absence of such engagement means that neither the submitted plan **nor neighbouring authorities’ plan-making processes have been shaped by adequate consideration of how Sevenoaks’ full housing need was to be met***”, the Regulation 19 LP should not proceed to submission. Instead, TWBC should engage directly with SDC and TMBC to work together to address the housing needs of the West Kent Housing Market Area.

Meeting the needs of Older People

7.3 We welcome the recognition by TWBC that there is a specific need for Extra Care accommodation within the Borough. However, we conclude that insufficient sites are proposed for allocation to meet the need. Sites proposed for allocation either will deliver residential care homes / beds instead of Extra Care accommodation, and/or they may either be undeliverable or with no certainty of deliverability in the evidence available, and in respect of Woodsgate Corner, even if this site were to come forward for Extra Care housing, the Council itself acknowledges this will not be before 2031 and so therefore this site does nothing to meet the need which is accepted to exist now.

7.4 We conclude that this can only be addressed by providing for additional sites through the LP including the land at Sandown Park, Tunbridge Wells.

Soundness

7.5 Notwithstanding our concerns about legal compliance, we consider that modifications are required to Paragraph 6.350, and that the Council should not seek through the Local Plan to influence the interpretation of the Use Classes Order. This should be left to the decision-making process, where applications are assessed and determined on their merits and on the facts of the case before the Council at that time.

7.6 We consider that amendments should be made to Policy H3 to eliminate ambiguity by removing the reference to “units” and insert instead the word “dwellings” to ensure consistency in the policy.

7.7 We consider that the Plan is also unsound in that there has been no assessment of the viability of seeking affordable housing from C2 residential care community (Extra Care) developments, and so the plan and its evidence base have had no regard to the unique development and operating costs of such developments. The policy is considered to make such developments unviable.

7.8 The modifications to the LP suggested on behalf of CESL are necessary to ensure that it would be positively prepared, justified, effective and consistent with national policy.

7.9 If the LP proceeds in its current form to Submission and Examination, CESL will seek invitation to participate in the relevant hearings to elaborate these concerns.

2

(see web link)

, page 18 and Table 5

3 Ibid, page 18 and Table 6

4 Hawkhurst Castle (Policy AL/HA3; 30 units), WA Turner Factory, Broadwater Lane (Policy AL/RTW13, 170 units maximum in a mixed C2/C3

scheme) and Beechwood Sacred Heart School (Policy AL/RTW16, 27 units).

Subsequent to the proposed allocation, but prior to the adoption of the SALP, the Hawkhurst Castle site was granted permission

(13/02636/FULMJ) in November 2013 for a net gain of 36 bedspaces (total now 90). (see web link)
It is now operational.

At the time of writing, the WA Turner Factory (the larger part of the AL/RTW13 allocation) does not benefit from a planning permission

for the proposed residential allocation or a care facility. Similarly, no part of the adjacent exchange site, which also forms part of the

AL/RTW13 site benefits from a planning permission for a residential or care facility.

The Beechwood Sacred Heart School site (AL/RTW16) has a planning permission for a 69-bed care home alongside the redevelopment

of the school. This permission 16/07697/FULL was granted on 5 September 2017. It is currently in the process of being implemented.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

See Question 5 above and in addition please see the attached representations statement prepared by Pro Vision on behalf of Cooper Estates Strategic Land along with the associated appendices.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Given the issues raised in relation to the Duty to Cooperate and the concerns in relation to both legal compliance and soundness, it is considered necessary to participate in the Examination hearings in relation to these matters and to address the questions of the Inspector. Also, and specifically in relation to the promotion of the Land at Sandown Park, Cooper Estates Strategic Land have interest from an operator (Audley Group) and can therefore provide an operator perspective on key issues relating to older peoples housing needs and the planning use class of community care villages.

Question 1

Respondent's Name and/or Organisation Mr Adrian Cory

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Comments on the whole Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared . It is not effective . It is not justified
--	---

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am astounded that the Council should intentionally make it so difficult, complex and burdensome to submit representations on the Local Plan. The Web based portal is extraordinarily difficult for the lay person to navigate and populate. I am a former senior civil servant and IT expert and even I found it too complex and burdensome to manage. I reverted to the offline form, which is also cumbersome to complete, requiring extensive cutting and pasting.

I believe that your representation arrangements are beyond the capability of many ordinary people to manage and that, consequently, the number of representations you receive will be artificially suppressed. There is suspicion in our local community that this is deliberate.

For this reason I believe that the Council is failing in its duty to cooperate.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Council should make it much easier for people to comment on the Plan, even if this means more work for its staff.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Environment Agency
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Pre-submission Local Plan

[TWBC: Relevant parts of this full response have been duplicated against individual Policies - please see Comment Numbers: PSLP_467, 471, 473, 474, 475, 476, 477, 478, 479, 480, 484, 486]

Question 4

Do you consider that the Local Plan:

Is sound

Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 19 consultation on the Pre-submission Local Plan

Tunbridge Well Borough Council

Thank you for consulting us on the pre-submission of Tunbridge Wells Local Plan. We have reviewed the submitted material and **find the submission sound**. However, we have the following advice to provide.

Flood risk

We welcome the inclusion of Flood Risk Policy EN 25. We have no objection in principle to the inclusion of the proposed developments around Paddock Wood (Policy STR/SS 1 - Paddock Wood Development Plan), however flood risk concerns have been highlighted in previous comments made back in February and may become more apparent at detailed Flood Risk Assessment (FRA) stage. Once at the detailed FRA stage, the development brief should identify that considerable flood mitigation may be required but also that they can meet and pass the exception test.

Biodiversity

Place Shaping and Design covers – ecology; flooding; water supply; wastewater.

We welcome the reference to Kent Design Guide, as there are dedicated sections around the riverine environment and sensitivities. We would suggest to ensure a clear definition of “adaptation measures against the future impacts of climate change” is included, as referenced within Place shaping chapter. The elements aimed sustainability are appropriate and valid for ensuring careful decisions are made, but it would be an enhancement to the objectives if the design principles also stated to foster better resilience for wildlife corridors and incorporation of green/blue corridors.

Infrastructure and Connectivity

We suggest to enhance wording for examples within “**Green:** network of natural and semi-natural features, including, for example, street trees, green roofs, parks, ponds, rivers, woodlands.” There are wet woodlands within the Tunbridge Wells district, suggest to add ‘all types of woodland’.

Policy EN 14: Green, Grey, and Blue Infrastructure

We welcome the emphasis on multi-benefit schemes and the cross-cutting values that can be achieved for people and wildlife through smart designs and choices.

We also welcome the statement highlighting ecology aspects and the need to build in resilience through wildlife networks and the specific recommendation to consult with multiple stakeholders to inform development outcomes, including regulators.

Conserving and Enhancing the Natural, Built and Historical Environment

It is recommended to add a reference to the opening paragraph about the Priority River Habitats that also widely occur in the district, and that conserving and enhancing those watercourses which are also identified as Priority River Habitats (map data available through data.gov.uk). The definition of a Priority River is that they consist of rivers and streams that exhibit a high degree of naturalness (i.e. show very little modification over time). The naturalness classification used to map priority river habitat is based on recent work to review the river SSSI series.

We suggest reference to green-blue infrastructure is included in Point 6. There is an emphasis on Green types, whereas Blue includes wetlands and rivers – and often the two coincide, we would want to emphasise that the two can be the same in some locations. Also, highlighting an emphasis on Blue infrastructure delivery can also create support for delivering enhancement contributions towards achieving Water Framework Directive Status Objectives, Actions and Mitigation Measures.

Policy EN 9: Biodiversity Net Gain

This is sound – with an inclusion of necessary demonstration through measurable means and specific use of the DEFRA Biodiversity metric system. No further comment.

Policy EN 8: Outdoor lighting and dark skies

This is welcomed and generally sound. We would recommend to adjust wording to reflect that not only should light spill not unacceptable impact wildlife, but this in particular means to avoid impactful light spill onto wildlife corridors as well as foraging behaviours.

Policy EN 24: Water Supply, Quality, and Conservation

The wording around Water Framework Directive is accurate and we welcome the strong support. However there is a missed opportunity to remind developers that opportunities may exist to deliver physical enhancements that are recognised to approach Reasons For Not Achieving Good in a given waterbody. These should be sought wherever feasible, i.e. benefits can be for both physical and of water quality, the two are linked to supporting WFD objectives and fostering resilience in wetland habitats.

Policy AL/RTW 18

This location contains or borders with ordinary watercourses that would benefit from establishing no-development buffer zones of at least 5m.

Policy AL/RTW 20

Note that woodland parcels to the east and north are mixed deciduous and wet woodland priority habitats, any landscape management scheme here ought to preserve and enhance the unique habitat qualities which occur here. There may be opportunity for boardwalk style pedestrian routes.

Environmental Net Gain

We would recommend the Local Plan ensures that Strategic policies point towards achieving Environmental Net Gain, and reflects a holistic Natural Capital objective.

Invasive Non-Native Species

There is limited specific mention or wider consideration and acknowledgment of the proven and potential negative impacts of invasive non-native species upon the landscape character, environmental resilience, prolonged costs of eradication once established in great numbers and waste management implications. It would be prudent to consider how developers, land sales and purchases might automatically require targeted surveys for such undesirable species, and intend to produce containment and management plans. Furthermore, they can support the existing co-ordinated action to manage catchment wide control by working in partnership with the external Catchment groups, by submitting records and reporting treatment programmes.

Groundwater resources

Section 6.272 refers to South East Water's Water Resources Management Plan (2015-2040). This is now superseded by their Water resources management plan 2019 (2020-2080).

Section 6.273 may need minor updating soon as a revision to the Environment Agency's 2013 water stress classification has just been consulted upon. There will however be no change to the "serious water stress" status of the region - it will only be expanded. We welcome the requirement in section 6.274 and Policy EN24 for residential developments to meet the optional higher standard of water efficiency provided for in the Building Regulations. We also welcome the encouragement in Policy EN24 to consider rainwater harvesting and greywater recycling opportunities.

We would additionally suggest a requirement for water efficiency in non-domestic developments such that at least larger developments meet a BREEAM standard of Very Good or Excellent. Some councils have required Outstanding.

Groundwater quality

We welcome the inclusion of the section on Water Supply, Quality and Conservation, which includes Policy EN 24. We also note and welcome Policy EN 28 on Land Contamination, but have the following comments.

- Closed landfill sites represent development risks that we believe should be addressed directly, either in Policy EN 28 or the subject of its own policy.
- Any planning application on or in the immediate vicinity of an historic landfill must be accompanied by a full technical analysis of the site and its associated risks in accordance with Environmental Health and Environment Agency requirements for permitted sites.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you would like to attach a file in support of your comments, please upload it here. [PSLP 462, 467, 471, 473-480, 484, 486 Environment Agency SI-1 Representation.pdf](#)

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Legal compliance and duty to cooperate

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement

was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 **The Friends of Woodbury Park Cemetery (FWPC)** were established in 2006 to help protect, conserve and sympathetically enhance for public benefit and enjoyment Woodbury Park Cemetery, to record and foster its heritage of memorials and its ecological importance, and to develop its use as an educational resource .
- 1 We plant and tend it all year round, focussing on preserving the rich habitat and enhancing biodiversity. We greet visitors, many from quite long distances, and answer their eager questions while encouraging them to become active supporters. We conserve its 600 historic memorials, and our research on the lives and times of the Victorians buried here is shared through walks, talks, and publications. Our projects for children and annual award scheme for primary schools are designed to encourage mindfulness, interest in sustainability, and pride in Tunbridge Wells past..
- 1 **Woodbury Park Cemetery(WPC)** is a remarkable place requiring careful consideration and protection within the Borough Plan. One of Tunbridge Wells “*irreplaceable and valuable assets*”, and registered with Historic England as a garden of special historic interest, it provides :
 - . a unique visual record of Tunbridge Wells Victorian history and a place of learning for both children and adults ;
 - . a major collection of public sculpture on over 600 gravestones;
 - . an east/ west green pedestrian and wildlife link forming a significant element of the green infrastructure in an increasingly densely built part of the town, much of it in high-occupancy residential blocks surrounded by hardlandscaping;
 - . a habitat and haven with Local Nature Reserve status in the heart of the town protecting threatened rare flowers and wildlife. The Friends have won a Gold Award from the Kent Wildlife Trust for their conservation work there;
 - . a combination of quiet, interesting and beautiful commemorative surroundings that promotes mental and physical wellbeing and has become increasingly appreciated during COVID limitations;
 - . inspired artistic and practical use of its romantic topography, winding paths and mature trees to provide a secluded dignified burial place for thousands of local people. It is Grade II Heritage Listed as an excellent example of an early Victorian cemetery that has preserved almost intact its original layout and structures .

Both Historic England and the Department of Justice have published detailed information and advice on managing cemeteries like WPC.

- 1 All these reasons, and their interactions that make WPC so special, also make it highly vulnerable to insensitive developments on its periphery. These can lead to serious damage to what it offers. Development controls have failed to prevent a recent major intrusion of this sort, an apartment block towering very close to the boundary, along with its parked cars and prison- like mesh fencing, which now blights the lower area and has caused part of the cemetery's Listed original sandstone wall to collapse. Pressure to permit further such insensitive redevelopments seems likely to increase with the precedent this has set and both local and national encouragement being given to redevelop and make much more intensive use of urban land . **The Local Plan needs to strengthen safeguards to protect such an important and historic Council asset and the cultural, environmental, health, heritage and other contributions it makes to Borough strategies.**
- 1 Its detailed contents, alongside other key plans, will provide the legal basis for decisions on planning applications for development and the use of land surrounding the cemetery for the next 18 years, and are therefore critical to what WPC will be able to continue towards the Borough's

planning goals. **WPC needs more specific reference by name within the Plan and associated Policy plans and statements including those concerning Central Royal Tunbridge Wells.**

- 1 **The Borough's cemeteries and a possible unsound element in the Local Plan** The Plan could also benefit from a clearer policy and general criteria for treatment of all the borough's historic cemeteries generally as such. These are a distinctive and essential category of land use contributing to and affected by planning policies and the exercise of development control powers, including in cases where the Council are the owners. Collectively the Borough's cemeteries are guardians of the mortal remains of millions of its dead, with the prospect of as many more to come. Religious faiths, the bereaved and society generally all expect their dead to be treated with dignity in peaceful well-kept surroundings dedicated to the purpose, their graves marked and protected, some with memorial sculpture of great beauty.
- 1 National legislation provides for local authorities to take over their ownership and maintenance when C of E graveyards are closed to further burials, as happened to WPC in 1934 and may have also been the case in many other parts of the Borough. Growing importance is now being attached nationally to old graveyards for all the reasons applying to WPC. Some may now like them have been designated as nature reserves or have Heritage status. Most have not.
- 1 This situation has relevance across the whole Borough in relation to its land use provision and planning, strategic aims, development control, and its ownership responsibilities on behalf of the public. We are therefore very puzzled to find no mention of cemeteries, churchyards or burial grounds in the Sustainability Assessment and its implications for the contents of the Local Plan. It may of course have been assumed that under national planning guidance this category of specialised land use and its complexities is adequately covered via references to the categories of historic parks and gardens/nature reserves/commons/ open spaces, green areas, heritage sites etc. Our experience with WPC indicates this is not always so.
- 1 **These matters run far beyond the scope and expertise of FWPC but suggest their omission from examination in the sustainability appraisal and thus their relevance to the Local Plan based on it may need revisiting to ensure the Borough's proposals are soundly based.**
- 1 Meanwhile in respect of the need to protect, conserve and enhance WPC in its multiple and in some case specialised roles, we would wish to see clarified and made explicit in planning guidance to all those making development applications that **overlooking, noise and visual intrusion in relation to cemeteries will be given extra weight in their consideration. We would also welcome developers being advised to be in touch with FWPC as informed neighbours on behalf of current and prospective users of cemetery, when preparing any proposals close to its periphery.**
- 1 **In any event it might be helpful to create a planning guide for developers close to cemeteries.** It would indeed be regrettable if the precedent that appears to have been set by the development referred to in para 4 were to pave the way for further serious detriments to WPC from similarly insensitive projects responding to the call for intensified high density redevelopment in the central town zone in which the cemetery stands, and the areas immediately adjoining.

12 We warmly welcome and strongly support as a context for urgent measures to reduce the threat of detriment to WPC the following strategic and policy sections of the Plan:

- . **STR 5** recognition of parks, amenity and natural green spaces.
- . **STR8** opportunities for biodiversity enhancements including the long term management of green corridors, development of green infrastructure networks and improving connectivity between habitats; the conservation and enhancement of historic parks and gardens and special regard to their settings.
- . **PN4** the requirement for developers to reflect the local distinctiveness and sensitivity to change of the historic environment and, in particular, to be required to demonstrate an understanding of heritage assets and their setting and associated significance, vulnerabilities and opportunities.
- . **PN9** proposals for developments to meet a biodiversity net gain position.
- . **PN10** protections for designated sites and habitats; and
- . **PN12** protections for ancient woodlands, veteran trees and trees, including in historic parks and gardens.
- . **PN26 Drainage** A policy of timely checks then prompt enforcement action could also play a useful part in securing the future of WPC. We urge TWBC to ensure the sustainable drainage requirements on future developers are adhered to and closely monitored. Local topography and soils mean Woodbury Park Cemetery and its adjoining triangle of woodland act as a natural drainage sump for their immediate surroundings, generating their own springs and a pond in the adjoining small wooded area of land. But in recent years it has suffered from time to time from

excess water flow from neighbouring streets and hard standings damaging paths, vegetation, memorials and the Chapel sandstone crag, . Adjoining developments must not be allowed to exacerbate this.

- . **424 and 6.425** In the context of heritage assets, landscape, trees and biodiversity such as that of WPC, we welcome the comments in these sections regarding residential extensions, alterations, outbuildings and annexes, and the need to consider the wider visual impact on the street scene and surrounding area. We wish to see added the appropriateness of boundary materials used and degree of privacy they offer to important sites like WPC. Some neighbours over the years have erected inappropriate or inadequate fencing or actual walls on top of the original sandstone cemetery walls . This detracts from privacy and visual enjoyment from the WPC side and has caused damage to parts of these historic boundaries .
- . **3, 7.17, 7.23** We strongly support the requirement to monitor the application of the Local Plan and urge this to give priority to historic assets like WPC and immediately tackle any unfavourable impacts.

13 Guidance within cemeteries for users We wish to raise also a guidance issue concerning sustainability **within** historic cemeteries. Adverse or inappropriate behaviour there can lead to costly unintentional damage, create safety risks from memorials, crush plants and bulbs and demoralise other users and volunteer workers. In the case of WPC footfall has steadily risen following the improvement work done by the Friends, new arrivals in the locality and the attraction of permissible outdoor activities during the COVID lockdowns. Current development permissions and the likely further impetus of the Plan's proposed local land allocations will increase it further.

We believe that users of the cemetery should be better and more authoritatively informed by a published set of byelaws clearly displayed at the entrance.

Matters covered would include the importance in order to avoid damage and danger, of sticking strictly to paths , not climbing on memorials , keeping dogs under control, avoiding trampling on graves or removing plants or foliage and of course no alcohol consumption, fires or camping. When the Friends encounter specific problems of this nature they often hear the not unreasonable words "Where does it say that ?".

14 AL/RTW4 Redevelopment proposal for 36-46 St John's Road

This major redevelopment offering accommodation for 80 elderly people is in a logical place for that purpose in relation to shops and facilities. However because of its close proximity to WPC its design must avoid adversely affecting that in any way. Coming at this time , conditions attached to it will be a test case of whether and how far the many welcome statements in the draft Local Plan, concerning protection of heritage assets and their settings, green infrastructure and biodiversity enhancement by developers can yet be reflected in the deployment of planning powers such as planning conditions and developers contributions **The developer should also if possible include action to bring positive benefit to the Cemetery which will be such an important contributor to their quality of life.**

- . The new structure will inevitably be much bulkier and much taller than the former bus garage. **The Friends would strongly oppose any visible intrusion on the traditional skyline when viewed from the cemetery, or any overlooking of it.**
- . Access from the site to WPC. While the bus garage was standing, the regular access to WPC from its premises by stressed bus drivers for a relaxed sandwich break was always via the vehicle exit onto Woodbury Park then the two minute walk via the cul de sac to the WPC gate. The building layout needs to cater for this. **FWPC would be 100 % opposed to any breach of the Listed cemetery wall to create a new access.**
- . The cemetery as a beautiful and peaceful place to sit or stroll will be a valuable amenity for the residents of the new block. However the current condition of some of the paths is poor due to increasingly heavy usage and intermittent flooding of stretches causing erosion, harmful wear and tear on exposed tree roots , plus trip hazards, and damage to adjoining graves by walkers take avoiding action in muddy sections. The additional surge in usage from this large new residential block while welcome in spreading further the benefits that the cemetery has to offer the community will undoubtedly aggravate this in a situation where we are still seeking affordable ways and resources for tackling both the drainage and resurfacing problems. **We suggest the developer should be asked to help find an agreed solution and design for this, especially while his ground workers will be close by preparing the St Johns Road site.**
- . Alternatively, in keeping with the Local Plan proposal that developers should make a net increase to local biodiversity, and given how vital it is for WPC as whole that it remains united with its

adjoining landlocked "triangle" in order to retain its canopy of trees and habitat of tangled marshy undergrowth, **we believe that a developer contribution would be desirable to help safeguard in perpetuity this linked area and its access onto Upper Grosvenor Road, perhaps to be a children's nature study area named in honour of a person of their choice.** This would be a major contribution to fostering biodiversity, help to reduce climate change, strengthen the town's green network and benefit generations of local children.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

General response to Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for your email dated 25 March 2021, regarding the above mentioned planning policy consultation.

Aerodrome Safeguarding is a legislative requirement for officially safeguarded aerodromes of which Gatwick Airport is one. Aerodrome safeguarding is the process used to ensure the safety of aircraft while taking off and landing, or flying in the vicinity of aerodromes.

It is vital that their safe operation is not impacted upon by buildings, structures or works which infringe the protected Obstacle Limitation Surfaces (OLS), impact on navigational aids utilised by the airport, distracting or confusing lighting or by development which has the potential to increase the number of birds or the bird hazard risk. Please note this list is not exhaustive.

The Royal Tunbridge Wells area is around 31km East from the ARP (Aerodrome Reference Point) at Gatwick Airport. At this distance the only potential impacts on aerodrome safeguarding would be in relation to instrument flight procedures (IFPs). In the area covered by the local plan only buildings/structures over 150m above ground level (AGL) would have a potential impact.

Later on this year we will be issuing a new consultation map requesting that we are consulted on any buildings/structures of 150m AGL or above.

The crane permit process is changing in the near future. Any crane operator wishing to erect a crane anywhere in the UK higher than 10m above ground level or higher than the immediately surrounding trees/structures will need to obtain a permit from the CAA before the crane is erected. For further details of this process please refer to CAP1096 'Guidance to Crane Operators on Aviation Lighting and Notification' available at www.caa.co.uk

Please note that the start date for crane permit applications being submitted to the CAA will not now be the 31st May, this is due to be extended.

Thank you for giving us the opportunity to comment on this document. If you have any queries please do not hesitate to contact me.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	

Respondent's Name and/or Organisation	Chris Gow
---------------------------------------	-----------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Pre-Submission Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The process for understanding the Local Plan is a matter of navigating through 140 separate documents, 400Mb of data and amounting to a total of 7,786 pages of documents. The process of understanding the intertwined nature of the documents for ordinary folk without training or experience of Town and Country Planning Laws is a challenge, and therefore difficult to conform to the expressed format of addressing particular policy, and thus this submission will be a more general assessment of the Local Plan.

I will attempt to put forward an overall suggestion that the plan should be returned to TWBC for a revision that takes account of some factors that I think are particularly relevant, and I suggest may expose significant flaws in the Local Plan as submitted.

The previous public consultation (Regulation 18 Consultation) resulted in some 8000 comments from some 2000 contributors. The plan was revised, and most of the objection were ignored, and the Plan was largely unchanged to the current submission here.

Once the Local Plan is accepted policy for development for the next decade is set out, and experience of the local planning process suggests that it is impossible to make any changes, even with the benefit of new evidence and opinion.

Thus it is vital for the Local Plan to be well thought out and consistent in applying the directing Policies, and setting out a plan that is able to deliver a fair and clear framework that has the best interests of the residents of Tunbridge Wells, rather than offering opportunity to land owners and developers.

The Local Plan should be returned for further consultation for the following reasons:

1

Many of the assumptions made that underpin the basis of the Local Plan are now out of date and irrelevant, and in light of changes to society and working and retail habits that will come about as a consequence of the pandemic these assumptions (data and common sense observations) should be re-assessed to provide a more realistic and up-to-date premises of the local plan. The post-pandemic effects are likely to cause great changes and the local plan must be delayed to take this into account.

2

The public consultation produced 8000 comments from 2000 respondents mostly against many parts of the local plan, and these objections have been swept aside and ignored. There is widespread opposition to the plans to build in Green Belt Land and building in the ANOB, and concerns over building in flood risk areas, and further concerns about the effects of climate change, sustainability, and other green issues. The response of the planning officers is to largely to ignore all opposing views and opinions, and commission further studies to bolster their case.

The recent local Council elections changed the balance of power in the Council, and the residents at Capel voted against the existing councillor in favour of an independent because of the opposition to the planned housing development in the Tudley Flood Plain.

3

The development on Green Belt Land and in the AONB should be the last resort, and all other location of available development land should be completely exhausted before any Green Belt Land is developed.

The Local Plan shows Green Belt Land and development in the AONB, and ignores many brown field sites, redevelopment of existing buildings, particularly retail and office buildings vacant because of changes in society due to post covid changes.

Development of Green Belt Land, provided -

1. to check unrestricted sprawl of large built up areas
2. to prevent neighbouring towns merging into one another
3. to assist in safeguarding the countryside from encroachment
4. to preserve the setting and special character of historic towns
5. to limit potential level of harm to the Green Belt associated with release

should not be included for development on the Local Plan.

Development in the AONB should not be included in the Local Plan.

4

The plan should be rejected and re-written to take account of a new assessment of the town centre and associated results of a post-pandemic economy where it is likely to be further shop and business closures, and where the availability of development opportunity and particularly change of use from commercial to residential occupancy must be considered as part of a whole local plan delivery.

5

The availability of brown field sites and change of use resulting from the post-pandemic economy, and changes in work patterns where office space is no longer required must change the assumptions that underpin the Local Plan, and thus the Local Plan should be rejected so these revised circumstances are reconsidered and incorporated in revised local plan.

6

The delivery of the local plan will so to speak lock the future development strategy of the town for the next decades and we must take more time to consider what sort of future we want for the town. Here is a chance to call a halt to pre-conceived ideas and generate a new and enlightened way to deal with development and progress in challenging times as we deliver a Local Plan for a post-pandemic society.

The Plan contains inconsistencies where the definitions of Green Belt and AONB are variously interpreted, in one location contradicting statements in another. It appears that this is an consistency that has been recognised by other comments.

The Plan ignores the value, aims and objectives of the Green Belt, and fails to protect Green Belt Land.

The Plan ignores the preservation of the AONB.

The Plan fails to deliver clear policy and direction for Carbon Emissions.

The plan fails to take account of the post covid pandemic economy and changes in work habits.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan should be returned to the consultation stage so the Plan can be re-written to take account of the invasion of Green Belt Land and development in AONB, and re-consider existing brown field sites for development first, as the conversion of existing buildings for alternative use (housing) is less impact on carbon footprint. As the first principle the plan should develop brown field sites particularly if they are in central locations, where the impact on sustainable transport and the requirement for car ownership and use of public transport can be delivered.

The Plan should be returned for consultation to take account of the post pandemic developments and changes in work and leisure activities, and take account of changes in social activities. For example offices and retail premises that are vacant should be the priority for redevelopment for housing, located in central areas where a sustainable transport policy can be delivered.

The Local Plan will shape the future of the borough for decades, and should be fit for purpose. The Plan is not sound in the current version and should be returned and re-submitted for consultation.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The citizens of Tunbridge Wells should be fighting for a change in this process, and I am sure there will be support from the people once they realise consultation will make a change and deliver a fair and equitable society that delivers the needs and best interests of the ordinary folk of the borough.

The Plan is conceived to allow the developers to set the agenda, and the call for sites favours developers and land owners to select the easy (and cheap) sites to develop where the most important factor is the profit, rather than delivering housing that meets the needs of those folk who are attempting to make

a start with a family for example, where low cost housing could available in the centre of town where a car is not essential, and use of an affordable public transport system can be used for essential travel.

There is not much evidence this is a priority in the Local Plan, and particularly in the post pandemic economy, the Plan should be returned for a proper re-assessment.

The Local Plan should be a document that directs the development of the Borough for the next period, but must be in the control of the local council and be adaptable as the economic and social factors change, so it must be possible for change in the future life of the Local Plan. As it is now the Local Plan sets policy in such tight terms that a mistake made at the writing stage sets the framework for 15 or 20 years, and this surely is not in the best interests of the people of Tunbridge Wells.

The threat to Green Belt Land in the Local Plan is an erosion of land set aside and protected by Law as designated Green Belt and all developments on Green Belt Land should be removed from the Local Plan. There are alternative sites in the Call for Sites list that should be considered and developed, even if costs are higher than a green field site.

Also there should be no development on sites in the AONB, also protected areas.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Vince Greene
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS1

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a rambler in the area for many years and use the footpaths in the Paddock Wood / Capel area quite a lot because I enjoy the physical and mental benefits of walking in the area and to nearby villages. I have a deep love of nature and appreciate our need and reliance on it, not only for food production but for biodiversity, pollination and clean air.

There are many veteran and possibly ancient oaks in and between copses between Paddock and Capel as well as a rich diversity of wildlife in the quarry lakes in the vicinity; this with wetlands and ditches. The proposed removal of vast tracts of Green Belt would severely impact this wildlife severely and the essential and national activity of rambling, for me and countless others - permanently here for all future generations.

Wild animal life would be severely affected by mass house building, not just by having less space to survive but for lack of food. This would impact the food chain through appalling and irreversible damage to biodiversity in this region. This with the loss of Green Belt farmland would mean a marked decrease in the ability to feed our borough and to have good food quality and quantity from any land remaining. As all other boroughs in the country are facing the same prospects, the developments are not in the 'national interest' because they would contribute to the progressive lack of farming space. This is an alarming prospect because the UK simply cannot afford to import most of its food. The Local Plan is 'not consistent' with national policies for Green Belt and AONBs, and the mass release of Green Belt for development is 'unsustainable' because of the 'unique impact' on it of being converted en masse to housing.

'Exceptional circumstances' are needed to release Green Belt but there is none defined in NPPF or Planning Practice Guidance. Green Belt release may be ameliorated or reduced to the lowest reasonably practicable extent but in the case of Paddock Wood / Capel in this development, there would be 'High Harm' to it.

The amount of trees and hedgerows needing felling for the developments is also of deep concern to me. The clean air produced from trees is essential to counteract pollution, and birds and wildlife generally need contiguous hedgerows, copses and woods to form a country-wide network. Isolated wildlife areas in the midst of farmland and housing suffers for lack of accessibility to food, nesting places and mating partners and I am particularly concerned about 'veteran' trees, hedgerows and woods in and around Paddock Wood and Capel. Some trees in Capel are hundreds of years old and form part of our heritage as well as being there for pleasure and the appreciation of our natural environment. Plus, the long term detrimental effect on the leisure industry from the progressive lack of green space has not been adequately addressed and mapped in the Local Plan either.

The proposed 'green and blue' areas in the Neighbourhood Plan of Capel have not been legally defined in the Local Plan. There is no detailed account of how these will be mapped, created, maintained, protected or how any of this would be policed.

Fields used for hops and farming generally are part of our heritage and may be needed again if anything detrimental should happen to the national, European or world economy - as well as from having to

feed an increased population in coming decades. The threat of future pandemics like the current Covid 19 outbreak have also not been addressed. There could be a time when food imports are severely affected, resulting in starvation for whole regions no longer able to grow their own food locally and unable to import due to fears of disease transmission and unable to afford imports anyway.

There has not been enough use of brownfield sites such as of the old cinema site opposite the council offices in Tunbridge Wells. Inner town regeneration, though costing more initially, seeds tremendous and spectacular benefits later on in giving proximity to town centres and giving easy access to facilities and infrastructure already in place. Use of brownfield sites prevents towns and villages from merging into one another and exacerbating problems, as would be the case with the proposed mass house building in Paddock Wood / Capel. Brownfield usage also helps to stop inner towns becoming run-down, derelict, poverty-ridden crime spots covered in graffiti, that threaten to bring down whole regions and inevitably, house prices too.

This all amounts to a shocking failure of 'soundness'! This development must not proceed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The windfall targets of 'c + 10%' and 'c + 26%' should be abandoned and the Standard Calculation of the government be used instead. The Local Plan is based in part on a massive increase in population that is wholly unrealistic up to 2038 and i challenge that used and tabulated therein. There is a rich vein of brownfield land and thousands of vacant properties in the borough. These can easily be used long before any mass house building comes into play. As stated above, the benefits long term are fantastic.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

My deep appreciation of nature and the area as a rambler means i am highly valuable for any meetings being held. Please include me.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Local Plan as a whole should be suspended at central governmental level and submitted for a formal and independent review.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Transport Strategy

References are made to an opportunity for a new railway station to be delivered for the Tudeley Village development. It is noted that the station is not anticipated for delivery during the plan period and has not been included in the Local Plan considerations but has been allowed for in the site Masterplan. KCC The Borough Council should be mindful of potential opposition to this proposal, as it would further increase the journey times for passengers travelling between Ashford and Tonbridge, as well as for those travelling between any of the smaller stations on that section of route and London. Therefore, if this proposal is to be progressed, KCC would recommend further consultation with stakeholders and the public.

The Borough Council should also be mindful that given the need for developer majority funding contribution for a new station, there would need to be significant contributions from the 2,800 dwelling development of Tudeley Village.

On balance, a dedicated, high quality, carbon neutral bus service between Tudeley Village and Tonbridge and/or Paddock Wood stations could more deliverable, unless a business case can be demonstrated showing there are net benefits to a rail station scheme and should potentially be explored. The County Council would draw the Borough Council's attention to the Kent Rail Strategy, as published in March 2021. The Kent Rail Strategy provides details of rail proposals for Tunbridge Wells – including power upgrades to enable the operation of consecutive 12-car trains in peak periods, and mainline service enhancements (depending on provision of paths to London termini, availability of rolling-stock and signalling upgrades on the Orpington – Sevenoaks corridor).

STRATEGIC FLOOD RISK ASSESSMENT

Sustainable Urban Drainage Systems

The County Council, as Lead Local Flood Authority, recommends that the Chapter 9.4 - Sources of SuDS Guidance of the updated Strategic Flood Risk Assessment should reference Kent's Drainage and Planning Policy, adopted in November 2019, as it provides guidance on how drainage strategies are assessed. With reference to paragraph 9.4.3 Kent Design Guide – Making it Happen, KCC recommends that the related footnote directs to the relevant design chapter C2.

INFRASTRUCTURE DELIVERY PLAN (IDP)

Provision of County Council Community Infrastructure and Services

Paragraph 2.40 - Funding from Development

The County Council supports and would strongly encourage the Borough Council to continue to support the delivery of infrastructure via section 106 development contributions, noting its relative sustainability to fund infrastructure.

Theme 3: Health

The County Council urges the need for the IDP to make reference to support accommodation facilities for both extra care and specialist care. The County Council current requests for development contributions to be secured through section 106 agreements for this type of health care provision. Therefore, KCC would urge support through the Local Plan and accompanying IDP.

There remains significant demand for residential and nursing care homes that can meet the needs of people with challenging and complex dementia. It should be noted that the County Council is currently seeking new residential care home providers to join the KCC Care Home Contract and to operate a mixed economy of both local authority funded and private funded residents.

Waste Management

The County Council, as Waste Disposal Authority, welcomes the update to the IDP following KCC's feedback to the earlier Regulation 18 consultations. The IDP now better reflects the position in regard to waste management.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel

Policy STR/SS 3 Strategy for Tudeley Village

LCWIP Local Cycling and Walking Infrastructure Plan (p48)

[TWBC: this representation was set against the whole Plan but has been duplicated by TWBC at Policies STR/SS1, STR/SS2 and STR/SS3 for ease of reference - see PSLP_1310, PSLP_2326, PSLP_2327 and PSLP_2828 respectively]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 15 years, and have seen the expansion of the town even within that time. Despite promises, the infrastructure has never been delivered to address the issues created by the increase in housing. There has been increased flooding across the town, with more frequency, with some residents suffering from foul water in their homes caused by inadequate sewage systems having to cope with yet more residents. There has been a lack of investment by TWBC in Paddock Wood, no expansion of medical services, no improvement in the shopping facilities in the town, or in the leisure centre which is now run down. In fact, the opposite has been true. TWBC has consistently approved planning for developments that detract from Paddock Wood and add more problems without delivering on any of the investment that is critical. We have been promised time and again that there would be no further development without the infrastructure in place in advance. There is little or no regard on the impact of continued overdevelopment on the very nature of Paddock Wood and surrounding villages; no consideration of the increased flood risk to existing residents from the developments already approved, let alone those in the pipe line. And absolutely no consideration of the residents.

There is also a need to reassess the total requirement for housing going forward - the Government's "levelling up agenda" shows that increased housing will be needed in the north of England rather than in the SE corner - these changes in national approach have not been followed through into the local plan. TWBC have not sufficiently considered the future housing need of the borough to ensure that the number of dwellings being planned for is correct.

As part of the previous consultation on the local plan, TWBC included as part of its justification for building in Capel and Paddock Wood that the land owner had decided to sell the land, and that dealing with one land owner rather than several would be easier. This is possibly the worst, most egregious reason for building on one location that has ever been heard.

The local plan is not positively prepared, effective nor justified for a number of critical reasons.

Firstly, on the requirement for the plan to be positively prepared and effective. TWBC have not amended their plan to account for the changed circumstances brought about by the COVID 19 pandemic. The pandemic has shown that commuting and working patterns have changed and will continue to remain different to that expected pre-COVID - the local plan has not been reviewed to ensure it is fit for purpose going forward.

The vast majority of housing has been proposed to be placed at the tip of the borough - this site is entirely unsuitable for providing housing of increased job opportunities for the rest of the borough,

which stretches far to the east and south, whilst at the same time "lumping" the housing in one small area. The realities of travel across the borough means that this housing will not be suitable for those who live and are employed in, for example Cranbrook. Therefore, despite the stated aim of the plan to provide affordable housing and employment to the residents of the borough it will do the opposite. The proposal will result in people moving to the borough from outside it, ensuring that locals are unable to take advantage of the increase in housing, and inflating prices to the point that no one who works locally will be able to live here.

Much of the infrastructure included within the local plan will not be for TWBC to provide - and the rest will be dependent on "contributions" from developers. There is a very real risk that these will never materialise.

At the recent vote by councillors on whether to move to Reg 19 consultation, several of the papers were not made available, and worse, it was clearly stated in the meeting that some councillors had not even bothered to review the papers in advance of the vote. This is a clear abdication of responsibility, and undermining of due process.

Therefore the plan is not effective.

In relation to whether the plan is justified - the response to regulation 18 consultation was woefully inadequate - despite a large number of responses expressing serious concerns with the local plan (97% opposed the plan), these were not taken into account, with TWBC ploughing on with their proposal regardless of the views of the residents who would be affected by it. This makes a mockery of the consultation process required under national law. The only changes made were to exacerbate the issue by putting more houses into the plan for Capel and Paddock Wood.

The local plan also proposes to build on land that is at risk of flooding, while taking away agricultural land and green spaces. These are all in contravention of the stated aim of the plan.

The plan itself states that green belt is to prevent urban sprawl and should be protected - yet TWBC are proposing to remove 5% of green belt land in Capel parish to build the extension to Paddock Wood, and the Tudely Village. These are entirely unjustified removals of green belt land, and would in effect create a long corridor of development between Paddock Wood and Tonbridge. Green belt is meant as a protection - it should not be removed from such protection without significantly stronger justification. There are alternative sites which would not require the use of green belt land such as Castle Hill.

Flooding is a very real issue already in Paddock Wood and Five Oak Green. Flooding incidents are increasing, with the greatest threats coming from surface water flooding. The sites at Capel and Paddock Wood proposed for development are all prone to flooding, and play a key role in ensuring that existing developments are not affected more severely. This winter, the ground was saturated for weeks in the areas the plan expects to build. In Tudely, the water runs down the road like a river, and that is without the additional building in place. The proposal would remove trees and other vegetation that use the water; they would concrete over the very land with acts as a sponge. The mitigation that is proposed is insufficient to respond to this increased, and increasing risk. Combined with the proposal to create new roads to service these new developments, the issue just gets worse and worse. This is also against national policy which states that flood plans should not be built on where alternatives exist. Alternatives exist within Tunbridge Wells borough. Where mitigation plans are put in place, they will only exacerbate the impact on communities up and down river - places which already struggle with flooding - Tonbridge, East Peckham, Yalding to name just a few.

The plan also proposes to dig up more and more countryside to build additional roads to deal with the increased traffic - on yet more green belt and countryside. This area risks being covered in concrete, with the increase in air pollution, risk of flooding, reduction in green space and biodiversity the only likely outcomes.

The proposal made under the LCWIP Local Cycling and Walking Infrastructure Plan to block access to vehicles over the railway bridge will completely cut off half of Paddock Wood from the town centre - forcing all vehicles to use the A228, or country lanes. There is no consideration to the impact of having thousands of extra cars needed to make that journey, no consideration of the real world impact on the residents of Paddock Wood. What if there is an accident on the main road that closes it? What if an ambulance or fire engine is needed? What about residents who are less mobile? This plan will have the opposite effect to that stated. This has to be one of the most poorly thought through and ludicrous ideas within the local plan. Wishing that fewer people drove cars doesn't make it so. Taking other steps

- effective enforcement of parking on Commercial Road, creating a lively retail area rather than permitting more and more flats to be built in place of retail units will be much more likely to.

This plan goes against national policy - there is no provision for addressing the biodiversity crisis, no substantive plans to mitigate against the impacts of climate change with the expected increase in flooding. There is no recognition of the importance of green space for residents of Paddock Wood. There is no substantive plan for ensuring biodiversity net gain across the plan.

The only part of this plan I can support is the provision of a swimming pool - and yet, even with all the housing planned, it's still only potential in the plan. There is no assurance that ANY of the "benefits" put forward will be realised.

Paddock Wood has already absorbed 1000+ housing units, the intention to build yet another 6000+ dwelling within the space of 5 miles is utterly without consideration of the current character of the area, or its residents. Paddock Wood will grow in area by 200%, Tudely will expand by 500%. This is completely disproportionate. Local residents are being ignored.

It is also clear from the representations from Tonbridge and Malling Borough Council (TMBC), and its many residents that the duty to cooperate has been entirely disregarded by TWBC. The impacts of the exponential growth in housing proposed under this local plan will be felt by neighbouring local authorities as the services and infrastructure required by such a significant increase in housing and population will predominantly be felt by TMBC and Maidstone BC rather than by TWBC, but will not receive any revenue from council tax etc. the increase in traffic alone will have a significant impact on the residents of TMBC, there will be an increase in the number of people expecting to attend Tonbridge schools, and use leisure facilities in Tonbridge. TWBC's intention to put the vast majority of its intended housing growth right on the border with 2 other local authorities shows a blatant disregard for the knock on impact on those boroughs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to LISTEN to its residents and neighbouring local authorities. There needs to be a fundamental reassessment of where additional housing is needed in the borough and not take the easy approach of putting the vast majority of housing into one small area of the borough which won't support other residents and unfairly results in 15 years of disruption for a small proportion of the borough's residents. This will help address the effectiveness of the plan.

Alternative sites need to be considered - and some have already been offered up by developers. There has been inadequate consideration of brownfield and alternative sites, with simple dismissal of such ideas in response to proposals offered under previous consultations. These sites should be where they are not on flood plains, not on good agricultural land that will be lost forever, and not where the impacts of the developments will be felt almost entirely by a small proportion of residents and by those residents of neighbouring local authorities who will not benefit from any additional funding.

In addition, options 7 and 8 as set out in the Sustainability Appraisal should be further considered to more fairly distribute housing need across the borough.

Should development continue in Paddock Wood and Tudely Village, it must be a requirement that the additional services and infrastructure the plan suggests "may" follow need to be in place first. There

needs to be a complete rethink of the LCWIP Local Cycling and Walking Infrastructure Plan so that the road bridge in Paddock Wood is not closed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

the assessment of impact on the sustainability objectives in table 15 of the SA are not accurate - the benefits are overplayed - they would not be felt across the borough, the developments will not provide social mobility and inclusion as suggested, and the negative impacts on air, biodiversity, climate change, health, noise, travel and water are all under recognised.

whole Plan: Duty to Cooperate

[TWBC: the full representation has been divided between comments on the whole Plan with regard to Duty to Cooperate (PSLP_2258), Policy STR1 (PSLP_2259) and Policy STR/SS1 (PSLP_2260).

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for consulting Maidstone Borough Council (MBC) on the draft Tunbridge Wells Borough Local Plan (TWBLP). Maidstone Borough Council's comments on the draft plan are detailed below.

Duty to cooperate

The Localism Act 2011 places a legal duty on planning authorities to engage constructively, actively, and on an ongoing basis, to ensure the effectiveness of Local Plan preparation in relation to strategic, cross-boundary issues. Effective and on-going joint working between strategic policy-making authorities is integral to the production of a positively prepared and justified strategy. MBC formally responded to Tunbridge Wells Borough Council's (TWBC) previous Local Plan consultations in 2017 and 2019 and has continued to be informed of, and involved in, the preparation of the most recent draft Local Plan (the subject of this formal consultation) through regular officer-level meetings. This includes meetings to consider the proposed larger settlements/garden communities. Additionally, in March 2021 MBC and TWBC agreed a statement of common ground to accompany the TWBC Regulation 19 consultation.

MBC therefore considers that the duty to cooperate in plan-making between the two authorities has been satisfied and that cooperation is ongoing.

I hope these comments are helpful and look forward to continuing, constructive dialogue on strategic, cross boundary issues as part of the duty to cooperate as our respective Local Plans progress.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation	Belinda Malpas
---------------------------------------	----------------

Question 2

Agent's Name and Organisation (if applicable)	NA
---	----

Question 3

To which part of the Local Plan does this representation relate?	Policies Map
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policies Map Numbers 04, 07,08 and 09.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound	No
----------	----

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The LP is unsustainable on the basis of population increase which is projected from 2452 people to 13700 in Capel alone. The use of private cars and vehicles will be detrimental to the environment. Proper consideration has not been given to the lack of infrastructure in the way of medical facilities, schools and transport in an area already struggling with busy and unsuitable roads. TWBC is not reacting in ways the local community need issues to be dealt with. For instance in the case of Hartlake Road as one example they have suggested that they will close it. That is not a proper solution as anyone local knows it is a regularly used road taking traffic off of the other routes through to Tonbridge and Tudeley/FOG.

It seems to me that community engagement has not entirely been effective and local community concerns are being sidelined. Proper consideration has not been given to very real concerns expressed about building on flood plains and problems which may result in moving more water downstream to Yalding, Tonbridge and beyond. Issues well documented in local and national press.

We need to protect our Green Belt and prevent urban sprawl in what is essentially a rural setting. The character of this area will be destroyed forever along with the biodiversity of the habitats and the beautiful views. All Saints Church in Tudeley is a national tourist attraction because of the very special Chagall Windows. Kent is known as the garden of England but this LP is destroying so much character and beauty and once it is gone it will never be the same again.

We talk of protecting our environment and biodiversity but this plan represents destruction on a grand scale. There should not be any building on Green Belt land as it is there to prevent urban sprawl.

Furthermore, Tonbridge and Malling are opposed to this scheme on the basis it will overload the infrastructure and have conceded the points raised in previous objections but TWBC are not properly considering the impact on Tonbridge and Malling.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Consider Brownfield and alternative sites like Castle Hill or vacant sites and offices in Tunbridge Wells. Do not build on the Green Belt and flood plains. The Site Allocation LP 2016 did not accept a need to build on the Green Belt. Don't destroy a rural Green Belt parish.

Properly consult on infrastructure, environmental and pollution issues and actively find real solutions.

Work with Capel PC and Tonbridge and Malling BC and address all the problems.

Use logic and balance in decisions rather than imposing 51% of LP housing on Capel parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I have to say I find it a real concern that this form completion is incredibly hard and very easy to complete wrongly let alone creating an account and the whole process of making objections. I was employed as a Lawyer for 10 years and my Son is a Graduate and we have both struggled. How can this be a fair process in terms of the considerations and objections that need to be made by local people. I cannot see that a lot of people will engage they would simply not be able to manage to complete and understand these forms the disabled, the elderly, people who are poorly educated and even educated people. This feels a very unfair process and certainly not a democratic process. The form needs to be set out more simply and be more understandable to ordinary citizens just as Lawyers learned to use more simple and understandable language when dealing with their clients.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non-existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the next few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need **"It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly"** There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough's recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley, Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de-designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coupled with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion **"if possible to provide betterment"**. If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in High Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unsustainable. A promised masterplan at the last public enquiry to co-ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is **"and where possible, improve air quality"**. If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these **"The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change"**. The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity **"general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth"** cannot cope now and any further new houses will compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase "active travel" be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out **"It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters"** This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development “ chops” down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees were saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very “vitality” of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are impractical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development. Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and grand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on **“It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.”** Objectives should be in place to achieve this not assumptions!

Policy STR 3

Brownfield Land (Statement)

Where is the real evidence that Brownfield land is being considered across the Borough rather than Greenfield build in PW and Capel?

a-g. These list all the reasons why Brownfield development could be unacceptable but logically they should also apply to the proposed new dwellings in PW. Within the plan they seem not to apply. Why the mismatch In policy in the DLP?

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships,

this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must **make** proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery **must be** secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” **“The council strongly encourages”** is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main categories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 “The Local Plan Vision is clear” The local plan **Vision** is far from clear, rather than expected **“expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”** It must read **“it will ensure by legal means”–that future infrastructure etc.** To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95. This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this, rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Policy STR 6

Transport and Parking (statement).

- 1 **a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:**
- 2 **The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services**

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge , restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Towns residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities' will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 **Public transport.**
- 3 **"Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:**

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is " Pie in the Sky" as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where's the evidence?

Car parking

Policy TP 3: Parking Standards

To revitalise our local high street and commercial centres after Covid the Borough must implement a free parking strategy across the board including PW car parks to give a boost to our local retailers and encourage people back to the shops in our community's.

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 3. Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and I object to its inclusion in the DLP.

Section5: Place Shaping Policies Introduction

Paddock Wood

Pg 166. The Strategy for Paddock Wood.

5.239 This paragraph clearly states the importance of identifying the flood risk in the area and the importance to recognise this when agreeing planning applications and the policies in this DLP. The most risk is North of the railway and no residential development should be allowed in this allocation as in previous Local Plans with only commercial development being acceptable.

5.240 The release of the GBL west of Paddock Wood and none of the exceptional circumstances justify this release set out in Policy STR/SS 1. The only justification is to allow the allocation of new dwellings to meet the TWBC allocation and the unchallenged Government Allocation.

5.241 This is a false statement regarding the number of presently agreed houses which is at least 1400 new dwellings within the last Local Plan. It should also take into account the number of windfall houses built in PW during that time and the pressure put on the existing inadequate infrastructure.

5.242 The significant growth planned for PW 3,490-3,590 dwellings will significantly change the existing character of the Town and is not sustainable as regards the present provision of medical facilities and capacity at the primary school and Mascalls School. The present Town centre will also not be able to sustain the new houses. In short the allocation is disproportionate to the overall TWBC allocation and this document seeks to justify the figures by false statements and attached documents. The number was picked out the sky and then make it sustainable.

5.244 There is frequent mention of a Masterplan through out this whole document to again support the allocation of 3,590 houses and there is no detail of the plan and the legal requirement put on developers and other utilities and stakeholders in the Town. A previous masterplan was promised for PW and it did not happen. The detail of the masterplan must be presented and agreed in this DLP.

Policy STR/PW 1

The Strategy for Paddock Wood

- 1 Mention is made to Affordable housing but no mention of the need for Social housing as we come out of the Pandemic. The affordable housing in PW not affordable to many residents even with the present TWBC policy on its provision to developers. The TWBC is missing its target on this provision. We need more Social housing.
- 2 Flood mitigation at present on the existing new developments predominantly relies on drainage ponds which is not sustainable in the future as we experience Climate Change and more extreme weather events. The fact is they are being built on high Flood risk areas and should not be allowed. There has to be a limit to how many houses that are sustainable within the present infrastructure.
- 3 No mention is made to protection of Foal Hurst Wood nature reserve owned by PWTC as more houses are built around its boundary. Light pollution is a major threat to the present wildlife that exist in the wood including resident Dormouse.

Allocation policies for Paddock Wood

Land at Mascalls Farm

5.253 The protection of Foal Hurst Wood and the link to Brick Kiln Wood should be included to protect the present Dormouse population in FHW.

5.255 The site allocation of 400 homes is over intensive and unsustainable within the DLP

5.256, 5.257 These statements highlight the probability that the allocation of 3,590 will be exceeded as the duration of the plan progresses and the limit of 3590 must not be breeched.

Policy AL/PW 1

Land at Mascalls Farm

This development already has planning permission so why is it in the DLP and appears to be open to consultation, it is not!

Section 6: Development Management Policies

Policy EN 1

Pg 324.Sustainable Design

- 1 This mentions the needs of occupiers in relation to their changing circumstances as they grow older or life changes at any age, without needing to move House. New dwellings as part of TWBC policy should adopt “**Life Time Home Standards**” for all new build across the Borough in the DLP. This also should include the inclusion of new bungalows in any new development allocation including Social Housing. Developers need to be forced to include new Bungalow dwellings in the DLP allocation.

Within this whole policy the main theme is “should” relating to the policy provision and it should be replaced by “**must**”. This gives a clear commitment to ensure that the policy statements are not just words to be ignored but to be acted on.

- 1 **Highway safety and access**
- 2 Due to the unfair allocation of 3,590 new dwellings in PW it will result in a massive impact, with congestion around the town including Badsell Road. The Local Cycling and Walking Infrastructure Plan Phase 2 has proposals to ban cars using the Railway bridge to access the Town centre. The rerouting of traffic via the Badsell road to access the Town centre will increase congestion

along the Badsell Road. This proposal has also not been subject to direct consultation with the residents of PW. This should be implemented by TWBC before this DLP Consultation is reviewed after the closing date of Friday 4th June 2021.

3 Crime reduction

Paddock Wood has just seen its present Police station demolished for new housing and results in no direct police presence in the Town. With the proposed 3,590 new dwellings there is a clear need for a new police station to serve the increasing community. This should form part of the need within the DLP.

1 Community engagement

At present numerous planning applications are ignored by TWBC when PWTC and residents clearly object to them regarding past policy on local plans. The recent approval of the Churchill development in the town centre clearly went against previous policy and PWTC objections. We need closer liaison with TWBC planning office and our elected Borough Councillors who make the real decisions and to stop us being continually ignored. We live local and need to be listened to and supported.

Design checklist to support the design criteria in Policy EN 1 1. Design, character, and site context

All of these questions look fine on paper but what is the process if any have the answer of no! Hopefully if only one is not met then the design of any new development would be rejected.

The residents again need that commitment from TWBC as part of the DLP.

Climate Change Mitigation and Adaptation

Climate change mitigation

6.32 The statement is to be supported identifying the greatest challenge the world and our local communities in the Borough face in the near future up to 2030 and beyond. The modelling produced by the Utilities need to be challenged and subject to rigorous scrutiny as regards events over a 100 years etc. These events are occurring more often and any new development must have the required infrastructure to cope with these extreme events.

6.36 This statement is not forceful enough when : The Local Authority **expects** developers to undertake a 'fabric first' approach to reduce overall CO2 emissions from buildings. Developers "**must**" replacing the expects to implement these policy statements.

As part of this statement it should include the policy to ensure that all the Towns including Paddock Wood and Parishes within the Borough implement a local A Carbon Free Footprint to meet the Borough target of 2030. This policy should be implemented with subsidies from the Borough to help the communities create their local policies in support of the Borough policy of carbon free by 2030.

Policy EN 3 Climate Change

Mitigation and Adaptation

I broadly support the Policy EN3 but enforcement is the key with any new development being subject to scrutiny and enforcement from the Borough. It is responsibility of TWBC to implement this and not the Town and Parish clerks. Who is meant to ensure that any conditions imposed on developers as a result of these fine words in the DLP are actually complied with?

Policy EN 5

Heritage Assets

Within this policy statement the Wesley Centre in Paddock Wood should be clearly mentioned and protected for the future.

Pg 353.Natural Environment

Requirements and processes for planning applications

6.138 These are fine policy statements but who again enforces the developers to put them into practice. Within the DLP allocation of 3590 new houses in PW all of this development is on present green and open space and existing countryside. That environment is destroyed with no regard to the resident wildlife and natural trees and plants. TWBC should demand the developers provide such elements as hedgehog highways between the dwellings to help the Hedgehogs adapt to their new environment. Existing trees must be incorporated into the design of the new developments.

Pg357 Protection of Designated Sites and Habitats

Local sites

6.153 The local nature reserve owned by Paddock Wood Town Council PWTC **must** be mentioned in this policy statement to protect the woodland and its resident wildlife and habitat against over development and encroachment on its existing boundary's.

Pg381. Policy EN 21

Air Quality

TWBC must implement this policy statement across the borough as more and more houses are built in this DLP including PW. The present bus services in the rural areas are totally inadequate and an integrated bus and railway network will encourage more public transport use and improve air quality.

Pg 387 Development and Flood Risk

6.277 This statement needs to be reviewed as most of the proposed new development in PW within this DLP is in a high area of flood risk. **“The Strategy for Paddock Wood and east Capel and STR/SS 3”** is totally unsustainable and supports the argument the allocation of 3,590 is not sustainable when considering all the policy statements in this DLP. The number of new dwellings is not proportionate to the rest of the Borough in meeting its total allocation of 12,000 plus new dwellings. Paddock Wood just cannot cope with this large number of new houses and it should be reduced.

Pg388 Policy EN 25

Flood Risk

Where it is proven that the mitigation is not sustainable then the development should not be allowed as part of the DLP. Failure to do so will mean increased flooding in areas such as PW and Capel and the residents will pick up the cost, not the developers or the TWBC.

Pg 397.Policy H 1 & Pg401 H 3

Housing Mix

6.326 Within this policy statement there is no mention of the provision of Social Housing in the borough. As a matter of urgency this must be included after the pandemic and covid and hopefully the rebuilding of the economy.

Pg 428 Policy ED 1

The Key Employment Areas

Paddock Wood Eldon Way and West of Maidstone Road

Paddock Wood Transfesa Road East and West

Both of these locations identify the present local key employment areas in PW and should be maintained. The proposal within the DLP to provide residential dwellings North of the railway bridge in PW contradicts this policy. This type of Commercial development is more suited to high risk flood areas in PW as describe in the DLP and not for new residential development in the same area.

Pg 466 Public Car Parks

The introduction of free parking should be implemented as part of this DLP for all the Borough public car parks. To rebuild the local economy across the borough and support our local retailers after the Pandemic and Covid. We need our residents to shop local and this policy will support that goal.

Pg468 Policy TP 5

Safeguarding Railway Land

The former Paddock Wood to Hawkhurst (Hop Pickers) line

This policy is fully supported within the DLP and supports PWTC in setting out a strategy to try and enhance and improve the route for future recreational use including walking along the route, where possible to Hawkhurst.

Personal Note.

When considering all the various statements included in these sections of the DLP it is so plainly obvious that many of the statements contradict themselves in justifying the new housing allocation. The Borough has quite frankly built the reasons why the allocation in PW and Capel is not sustainable and across the Borough. The point is will the safe guards be implemented in the DLP and the fine words acted on in the future, past history makes me think not. PW will change for the worse for ever!!! The Borough must stand back and review its present DLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am a Paddock Wood Town Councillor and these comments are based on a personal opinion and view on the various sections and paragraphs within the Draft Local Plan. They do not represent the views of the Town Council

This Tunbridge Wells Local Plan is probably the most controversial consultation to be submitted to the residents of Paddock Wood and the whole of TWBC to date. The plan is brief and has no exact detail in the documents justification for so many proposed new dwellings in the Borough. In fact some of the policies and statements made in the DLP contradict each other and in reality build their own reasons to why the proposed new 3,590 dwellings are unsustainable around the Town.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

The former PW to Hawkhurst (Hop Pickers) Line

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link

with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the next few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need **"It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly"** There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough's recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley, Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coup[led with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion “**if possible to provide betterment**”. If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in Hgh Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unsustainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is “**and where possible, improve air quality**”. If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these “**The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change**”. The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity “**general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth**” cannot cope now and any further new houses with compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase “ active travel” be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out “**It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters**” This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many

more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development “ chops” down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees were saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very “vitality” of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are impractical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development.

Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and g

rand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on **“It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.”** Objectives should be in place to achieve this not assumptions!

Policy STR 3

Brownfield Land (Statement)

Where is the real evidence that Brownfield land is being considered across the Borough rather than Greenfield build in PW and Capel?

a-g. These list all the reasons why Brownfield development could be unacceptable but logically they should also apply to the proposed new dwellings in PW. Within the plan they seem not to apply. Why the mismatch In policy in the DLP?

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships, this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must **make** proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery **must be** secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” **“The council strongly encourages”** is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main categories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 **“The Local Plan Vision is clear”** The local plan **Vision** is far from clear, rather than expected **“expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”** It must read **“it will ensure by legal means”–that future infrastructure etc.** To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95. This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this, rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Policy STR 6

Transport and Parking (statement).

- 1 **a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:**
- 2 **The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services**

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge , restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Towns residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities' will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 **Public transport.**
- 3 **"Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:**

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is “Pie in the Sky” as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where’s the evidence?

Car parking

Policy TP 3: Parking Standards

To revitalise our local high street and commercial centres after Covid the Borough must implement a free parking strategy across the board including PW car parks to give a boost to our local retailers and encourage people back to the shops in our community’s.

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 3. Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and PWLP objects to its inclusion in the DLP.

Section5: Place Shaping Policies Introduction

Paddock Wood

Pg 166. The Strategy for Paddock Wood.

5.239 This paragraph clearly states the importance of identifying the flood risk in the area and the importance to recognise this when agreeing planning applications and the policies in this DLP. The

most risk is North of the railway and no residential development should be allowed in this allocation as in previous Local Plans with only commercial development being acceptable.

5.240 The release of the GBL west of Paddock Wood and none of the exceptional circumstances justify this release set out in Policy STR/SS 1. The only justification is to allow the allocation of new dwellings to meet the TWBC allocation and the unchallenged Government Allocation.

5.241 This is a false statement regarding the number of presently agreed houses which is at least 1400 new dwellings within the last Local Plan. It should also take into account the number of windfall houses built in PW during that time and the pressure put on the existing inadequate infrastructure.

5.242 The significant growth planned for PW 3,490-3,590 dwellings will significantly change the existing character of the Town and is not sustainable as regards the present provision of medical facilities and capacity at the primary school and Mascalls School. The present Town centre will also not be able to sustain the new houses. In short the allocation is disproportionate to the overall TWBC allocation and this document seeks to justify the figures by false statements and attached documents. The number was picked out of the sky and then made it sustainable.

5.244 There is frequent mention of a Masterplan through out this whole document to again support the allocation of 3,590 houses and there is no detail of the plan and the legal requirement put on developers and other utilities and stakeholders in the Town. A previous masterplan was promised for PW and it did not happen. The detail of the masterplan must be presented and agreed in this DLP.

Policy STR/PW 1

The Strategy for Paddock Wood

- 1 Mention is made to Affordable housing but no mention of the need for Social housing as we come out of the Pandemic. The affordable housing in PW not affordable to many residents even with the present TWBC policy on its provision to developers. The TWBC is missing its target on this provision. We need more Social housing.
- 2 Flood mitigation at present on the existing new developments predominantly relies on drainage ponds which is not sustainable in the future as we experience Climate Change and more extreme weather events. The fact is they are being built on high Flood risk areas and should not be allowed. There has to be a limit to how many houses that are sustainable within the present infrastructure.
- 3 No mention is made to protection of Foal Hurst Wood nature reserve owned by PWTC as more houses are built around its boundary. Light pollution is a major threat to the present wildlife that exist in the wood including resident Dormouse.

Allocation policies for Paddock Wood

Land at Mascalls Farm

5.253 The protection of Foal Hurst Wood and the link to Brick Kiln Wood should be included to protect the present Dormouse population in FHW.

5.255 The site allocation of 400 homes is over intensive and unsustainable within the DLP

5.256, 5.257 These statements highlight the probability that the allocation of 3,590 will be exceeded as the duration of the plan progresses and the limit of 3590 must not be breached.

Policy AL/PW 1

Land at Mascalls Farm

This development already has planning permission so why is it in the DLP and appears to be open to consultation, it is not!

Section 6: Development Management Policies

Policy EN 1

Pg 324.Sustainable Design

- 1 This mentions the needs of occupiers in relation to their changing circumstances as they grow older or life changes at any age, without needing to move House. New dwellings as part of TWBC policy should adopt “**Life Time Home Standards**” for all new build across the Borough in the DLP. This also should include the inclusion of new bungalows in any new development allocation

including Social Housing. Developers need to be forced to include new Bungalow dwellings in the DLP allocation.

Within this whole policy the main theme is “should” relating to the policy provision and it should be replaced by “ **must**”. This gives a clear commitment to ensure that the policy statements are not just words to be ignored but to be acted on.

1 Highway safety and access

2 Due to the unfair allocation of 3,590 new dwellings in PW it will result in a massive impact, with congestion around the town including Badsell Road. The Local Cycling and Walking Infrastructure Plan Phase 2 has proposals to ban cars using the Railway bridge to access the Town centre. The rerouting of traffic via the Badsell road to access the Town centre will increase congestion along the Badsell Road. This proposal has also not been subject to direct consultation with the residents of PW. This should be implemented by TWBC before this DLP Consultation is reviewed after the closing date of Friday 4th June 2021.

3 Crime reduction

Paddock Wood has just seen its present Police station demolished for new housing and results in no direct police presence in the Town. With the proposed 3,590 new dwellings there is a clear need for a new police station to serve the increasing community. This should form part of the need within the DLP.

1 Community engagement

At present numerous planning applications are ignored by TWBC when PWTC and residents clearly object to them regarding past policy on local plans. The recent approval of the Churchill development in the town centre clearly went against previous policy and PWTC objections. We need closer liaison with TWBC planning office and our elected Borough Councillors who make the real decisions and to stop us being continually ignored. We live local and need to be listened to and supported.

Design checklist to support the design criteria in Policy EN 1 1. Design, character, and site context

All of these questions look fine on paper but what is the process if any have the answer of no! Hopefully if only one is not met then the design of any new development would be rejected.

The residents again need that commitment from TWBC as part of the DLP.

Climate Change Mitigation and Adaptation

Climate change mitigation

6.32 The statement is to be supported identifying the greatest challenge the world and our local communities in the Borough face in the near future up to 2030 and beyond. The modelling produced by the Utilities need to be challenged and subject to rigorous scrutiny as regards events over a 100 years etc. These events are occurring more often and any new development must have the required infrastructure to cope with these extreme events.

6.36 This statement is not forceful enough when : The Local Authority **expects** developers to undertake a ‘fabric first’ approach to reduce overall CO2 emissions from buildings. Developers “**must**” replacing the expects to implement these policy statements.

As part of this statement it should include the policy to ensure that all the Towns including Paddock Wood and Parishes within the Borough implement a local A Carbon Free Footprint to meet the Borough target of 2030. This policy should be implemented with subsidies from the Borough to help the communities create their local policies in support of the Borough policy of carbon free by 2030.

Policy EN 3 Climate Change

Mitigation and Adaptation

PWLP broadly supports the Policy EN3 but enforcement is the key with any new development being subject to scrutiny and enforcement from the Borough. It is responsibility of TWBC to implement this and not the Town and Parish clerks. Who is meant to ensure that any conditions imposed on developers as a result of these fine words in the DLP are actually complied with?

Policy EN 5

Heritage Assets

Within this policy statement the Wesley Centre in Paddock Wood should be clearly mentioned and protected for the future.

Pg 353.Natural Environment

Requirements and processes for planning applications

6.138 These are fine policy statements but who again enforces the developers to put them into practice. Within the DLP allocation of 3590 new houses in PW all of this development is on present green and open space and existing countryside. That environment is destroyed with no regard to the resident wildlife and natural trees and plants. TWBC should demand the developers provide such elements as hedgehog highways between the dwellings to help the Hedgehogs adapt to their new environment. Existing trees must be incorporated into the design of the new developments.

Pg357 Protection of Designated Sites and Habitats

Local sites

6.153 The local nature reserve owned by Paddock Wood Town Council PWTC **must** be mentioned in this policy statement to protect the woodland and its resident wildlife and habitat against over development and encroachment on its existing boundary's.

Pg381. Policy EN 21

Air Quality

TWBC must implement this policy statement across the borough as more and more houses are built in this DLP including PW. The present bus services in the rural areas are totally inadequate and an integrated bus and railway network will encourage more public transport use and improve air quality.

Pg 387 Development and Flood Risk

6.277 This statement needs to be reviewed as most of the proposed new development in PW within this DLP is in a high area of flood risk. **“The Strategy for Paddock Wood and east Capel and STR/SS 3”** is totally unsustainable and supports the argument the allocation of 3,590 is not sustainable when considering all the policy statements in this DLP. The number of new dwellings is not proportionate to the rest of the Borough in meeting its total allocation of 12,000 plus new dwellings. Paddock Wood just cannot cope with this large number of new houses and it should be reduced.

Pg388 Policy EN 25

Flood Risk

Where it is proven that the mitigation is not sustainable then the development should not be allowed as part of the DLP. Failure to do so will mean increased flooding in areas such as PW and Capel and the residents will pick up the cost, not the developers or the TWBC.

Pg 397.Policy H 1 & Pg401 H 3

Housing Mix

6.326 Within this policy statement there is no mention of the provision of Social Housing in the borough. As a matter of urgency this must be included after the pandemic and covid and hopefully the rebuilding of the economy.

Pg 428 Policy ED 1

The Key Employment Areas

Paddock Wood Eldon Way and West of Maidstone Road

Paddock Wood Transfesa Road East and West

Both of these locations identify the present local key employment areas in PW and should be maintained. The proposal within the DLP to provide residential dwellings North of the railway bridge in PW contradicts this policy. This type of Commercial development is more suited to high risk flood areas in PW as describe in the DLP and not for new residential development in the same area.

Pg 466 Public Car Parks

The introduction of free parking should be implemented as part of this DLP for all the Borough public car parks. To rebuild the local economy across the borough and support our local retailers after the Pandemic and Covid. We need our residents to shop local and this policy will support that goal.

Pg468 Policy TP 5

Safeguarding Railway Land

The former Paddock Wood to Hawkhurst (Hop Pickers) line

This policy is fully supported within the DLP and supports PWTC in setting out a strategy to try and enhance and improve the route for future recreational use including walking along the route, where possible to Hawkhurst.

Note. From PWLP.

When considering all the various statements included in these sections of the DLP it is so plainly obvious that many of the statements contradict themselves in justifying the new housing allocation. The Borough has quite frankly built the reasons why the allocation in PW and Capel is not sustainable and across the Borough. The point is will the safe guards be implemented in the DLP and the fine words acted on in the future, the PWLP thinks not and PW will change for the worse for ever!!! The Borough must stand back and review its present DLP.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

This submission is made on behalf of Paddock Wood Labour Party of which I am presently Chair.

This Tunbridge Wells Local Plan is the most controversial consultation to be submitted to the residents of Paddock Wood and the whole of TWBC to date. The local Labour Party has made submissions to every local plan over the last 40 years. This plan is brief and has no exact detail in the documents justification for so many proposed new dwellings in the Borough. There are numerous contradictions within the document so it must have the most serious scrutiny and any objections and answers must be considered closely at the hearing stage.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

PSLP

[TWBC: for other comments by Paddock Wood Town Council relating to specific Policies, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

1 Plan Period

1.1. The Local Plan period of 2020 – 2038 is insufficient to cope with the extent of the strategic proposals contained within the Local Plan. The NPPF states that “Strategic policies should look ahead over a minimum 15-year period from adoption (except in relation to town centre development)”¹ and the Local Plan makes reference to this where it states “In accordance with national policy...this Plan runs from 2020 to 2038, following anticipated adoption in June 2022”². However, there is no justification provided by TWBC as to why 2020 – 2038 is the selected plan-period. Given the Council's proposed change of its current development strategy of focusing development on its key urban areas (Royal Tunbridge Wells and Southborough) to directing the majority of its growth to an area with high flood risk (Paddock Wood) and a location in the middle of the countryside (Tudeley) there is clearly a need for more lead in time to plan for this proposed new strategy which will require an enormous amount of funding, due diligence, community / stakeholder engagement and joined up planning in order to properly plan and deliver.

1.2. MHCLG recognises the need for longer plan periods in its recent consultation on proposed changes to the NPPF (30th January – 27th March 2021) where it proposes to amend paragraph 22 of the NPPF to require a minimum of 30 years where larger-scale development is proposed. The consultation document refers to new settlements specifically and the explanatory text in the consultation clarifies that ‘major urban extensions’ are also included as part of this (see excerpts from the consultation below). Whilst MHCLG's consultation on the proposed changes to the NPPF provide a clear direction of travel for plan-making and that authorities will need to plan ahead for at least 30 years, the NPPF is already clear that 15 years is a minimum period and given the scale and complexity of growth proposed in this Local Plan we consider (and provide evidence in our representations) that the Local Plan period should cover at least 30 years from adoption. Although TWBC considers the Local Plan will be adopted in 2022 we consider this to be highly optimistic due to the issues that will need to be examined at the Examination in Public (EiP) and we would suggest that this be pushed to 2023 at the earliest.

1.3. TWBC's proposed plan-period is ‘driving’ the Local Plan's suggested delivery rates and phasing for the proposed strategic allocation at Paddock Wood and Tudeley which are entirely unrealistic.

TWBC's evidence³ claims that the entirety of the proposals at Paddock Wood will be completed by 2036/37 and that delivery at Tudeley will extend beyond the plan period with 2,100 to be delivered by 2038 and 700 beyond the plan period. We go into more detail on these unrealistic delivery rates and development phasing assumptions in our representations however it is important to capture this in these representations on the plan-period as this appears to be what is driving the Council to adopt such an unreasonable approach to its Development Strategy which is an extremely unwise decision by TWBC.

1.4. Therefore, the plan period should be changed to 2020-2053. As a result of this change in the plan-period the majority of the Council's evidence base will need to be reviewed and updated. Given the extent of time that will be required to update the evidence base and proposed policies we suggest that TWBC not proceed with submission of the Local Plan in order to save the Council, the taxpayers and other key stakeholders a considerable amount of time and resources that will result from a Local Plan which is clearly unsound and not legally compliant.

[TWBC: for figures, please see full representation attached as a supporting document]

1 Duty to Cooperate

2.1. TWBC has not complied with the Government's legal test for discharging its Duty to Cooperate. Local authorities must fulfil the legal requirement to cooperate with the Duty to Cooperate prescribed bodies by "engaging constructively, actively and on an ongoing basis"⁴ on cross boundary strategic matters from the commencement of preparing the Local Plan to submission of the Local Plan to the Secretary of State for examination. TWBC has also failed to comply with the Town and Country Planning (Local Planning) (England) Regulations 2012⁵ which states that:

"(6) Where a local planning authority have co-operated with another local planning authority, county council, or a body or person prescribed under section 33A of the Act, the local planning authority's monitoring report must give details of what action they have taken during the period covered by the report."

The only TWBC Authority Monitoring Report (AMR) available on TWBC's website is the 2019-2020 Authority Monitoring Report⁶ so it is impossible to determine what Duty to Cooperate monitoring was or was not published in early Monitoring Reports. The 2019-2020 AMR does not detail actions TWBC has taken in relation to the Duty to Cooperate. It simply states that there has been progress on statements of common ground during the year and up to date and that these are set out in the Council's Duty to Cooperate Statement produced in support of the 'merging Local Plan'. It states that *"Perhaps the prime strategic matter at present is the capacity of the borough, as well as neighbouring authorities to meet housing needs"* and that *"this is subject to ongoing assessment through the preparation of the new Local Plan"*. It explains that *"it is likely that it is possible to meet its local housing need under the Standard Method, but not the uncapped housing need figure or to contribute to meeting wider housing needs"*. It finally states that *"Of note, dialogue with Sevenoaks District Council is continuing to clarify whether it will be meeting its own need"*⁷.

2.2. The above outline of the contents of the Council's AMR 2019-2020 does not comply with the regulations as there is no detail provided regarding the Duty to Cooperate activities undertaken. Simply stating that there has been progress on statements of common ground and that Sevenoaks DC is continuing to clarify whether it will meet its own development needs is not sufficient detail to comply with the regulations.

2.3. Furthermore, TWBC's Statement of Community Involvement (October 2020) commits to reporting *"on how it meets the Duty Cooperate in its Authority Monitoring Report"*⁸, however as explained above its AMR 2019-2020 does not provide the details of the actions undertaken. The SCI misunderstands the regulations as it not about reporting how the Council claims it meets the duty, it is instead supposed to provide a clear log of the actions undertaken.

2.4. Section 33A of the Planning and Compulsory Purchase Act 2004, as inserted by section 110 of the Localism Act 2011⁹ requires the council to cooperate with other local planning authorities and other 'prescribed' bodies in preparing and developing development plan documents and other local development documents so far as it relates to a strategic matter.

2.5. Despite TWBC preparing a document of near 560 pages seeking to evidence that it has discharged the duty, the document has a considerable amount of 'padding' and lacks substantive evidence that 'active', 'ongoing' and 'constructive' cooperation took place from the start of the preparation of the Local Plan up to submission. If further evidence of cooperation were to be submitted by TWBC in the

lead up to, or after submission of the Local Plan then this would clearly demonstrate that the Local Plan and its policies were not informed by this engagement – which is, after all, the entire reason for the Duty to Cooperate as explained in the NPPF: “*effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy*” 10. The purpose of the duty is not to have a Statement of Common Ground, an SOCG is simply a way to demonstrate that effective and on-going work has informed the preparation of the Local Plan.

2.6. In any case Planning Practice Guidance (PPG) states that authorities should make any statements of common ground (SOCG) available on their website by the time they publish their draft plan so that communities and stakeholders have a transparent picture of how they have collaborated:

*Authorities should have made a statement of common ground available on their website by the time they publish their draft plan, in order to provide communities and other stakeholders with a transparent picture of how they have collaborated.*¹¹

As we set out in the table below there are no published SOCGs with Tonbridge & Malling BC or with Kent CC to support the Pre-Submission Local Plan.

We have also reviewed the Interim Duty to Cooperate Statement for the Draft Local Plan (Regulation 18)¹² and there was only one up to date SOCG published at that stage which was with Sevenoaks District Council 13. However, the validity of this SOCG cannot be relied upon as Local Plan was found by the Inspector in the same year (2019) to be unsound and not legally compliant due to SDC having not met the Duty to Cooperate¹⁴.

The other SOCG with a neighbouring authority was a 2016 SOCG with Maidstone Borough Council¹⁵ which to be fair has very little substance on which TWBC could rely upon to demonstrate the tests of the duty at that stage.

2.7. Turning to the current Duty to Cooperate Statement supporting the Regulation 19 Local Plan, it is difficult to see how TWBC has moved much further forward in a meaningful way with most of its neighbouring authorities.

2.8. The Duty to Cooperate engagement records in the TWBC document indicate that there are multiple gaps of 5 months or more with the other Local Authorities. There are no details about what the SOCG with Tonbridge & Malling BC will include and what are the actions in relation to joint evidence base, strategic policies and/or cross-boundary issues.

2.9. Further to this point regarding no SOCG with Tonbridge & Malling BC, we are aware that a number of TMBC Councillors have recently sent a letter to TWBC (dated 2nd June 2021) reiterating its opposition to several aspects of the Local Plan with particular regard to the Tudeley Village proposals which it considers will have an impact on Tonbridge “*above and beyond all recognition*”. The letter expresses in detail the disappointment with TWBC to address TMBC’s points raised previously (including the 2019 Local Plan consultation). There are a number of specific points raised in the letter which are summarised below and which were discussed at the TMBC Extraordinary Planning and Transportation Advisory Board on 17.05.2021 which available for public viewing online¹⁶:

- . TMBC last week rejected a planning application for another supermarket at Tonbridge Retail Park on Cannon Lane due to concerns about the ability of the road network to cope. Cannon Lane was originally build as the ‘mini-bypss’ in Tonbridge yet is frequently gridlocked. Thousands of homes just over the border in Tunbridge Wells borough would only lengthen queues across the south east of Tonbridge and make it harder for children to travel to the excellent schools in town.
- . The TMBC response to the Tunbridge Wells Local Plan (Regulation 19), as agreed at the Transportation Advisory Board meeting (June 2021) will include a number of accurate and extremely pressing comments:
- . Most relevant is the inability of TWBC to fully model forthcoming development in Tonbridge as part of its assessment as residents will look toward the town of Tonbridge much more than any other of the identified retail centres in Tunbridge Wells borough for services, shops and schools. Consequently TMBC would have expected to see a complete list of proposed mitigations (if even possible) within Tonbridge to cope with this however none have been put forward in the Local Plan process.
- o TMBC does not think the reduction in car use arising from the development is realistic.

o The development proposed near the border of Tonbridge will have landscape impact including rural roads and public footpaths which would link the proposed development at Tudeley with Tonbridge. This detrimental impact has not modelled. The Landscape and Visual Impact Assessment only applies to sites located within the High Weald AONB. This underplays the wonderful landscape that is visible within Tonbridge and to Tonbridge from notable landmarks. TMC would have expected the assessment to account for the character of the area within TMBC as well.

. TMBC strongly argues that the inclusion of STR/SS3 (Tudley Village) is unsound as it does not meet the NPPF's tests of soundness. It is not positively prepared because the cumulative impact of development on Tonbridge and Malling has not been assessed. It is not justified because reasonable alternatives have not been considered fully. It is not effective because significant infrastructure improvements will be needed, which are not forthcoming. It is inconsistent NPPF because the severe impacts on traffic cannot be mitigated.

. TMBC requests that TWBC removes the allocation from the Local Plan.

2.10. The above describes a letter and some of the discussion from TMBC's Advisory Board meeting in May however it is not TMBC's official response to the Regulation 19 Local Plan. It does provide some important indication as to how TMBC is likely to respond to the Local Plan and demonstrates the lack of cooperation by TWBC with TMBC.

2.11. With no signed SOCG with TMBC and the grave concerns it has about the evidence and unsoundness of the Local Plan, as well as the lack of constructive engagement, it is clear that TWBC has not discharged the Duty to Cooperate in relation to TMBC (or the other prescribed bodies).

2.12. We have prepared a table below to help summarise the status of SOCGs that TWBC does or in most cases does not have in place. We have included in the table, Kent County Council as it is considered that they are a key body in the preparation and delivery of the Local Plan and it seems reasonable that TWBC should prepare an SOCG with KCC to clarify what cooperation has taken place, what is agreed and what is not agreed. Given the scale of strategic proposals at Paddock Wood and Tudeley surely an SOCG with KCC is critical.

2.13. We have included 'Strategic Site Promoters / Landowners' in the table given that the delivery of the strategic growth at Paddock Wood and Tudeley is dependent to a very great extent on the developers. There needs to be public clarity about what is agreed between TWBC, KCC and the developers in a SOCG. Such an SOCG cannot wait until the planning application stage as the Local Plan examination is the opportunity to deal with difficult issues using a plan-led approach rather than storing up issues for a later day.

2.14. The PPG explains what a Statement of Common Ground should contain¹⁷. The PPG also states that *"The level of cooperation detailed in the statement is expected to be proportionate to the matters being addressed. The statement is expected to be concise and is not intended to document every occasion that strategic policy-making authorities meet, consult with each other, or for example, contact prescribed bodies under the duty to cooperate. The statement is a means of detailing key information, providing clear signposting or links to available evidence on authorities' websites."* Most of the Statements of Common Ground included in the TWBC Duty to Cooperate Statement for Pre-Submission Local Plan refer to meetings and discussions on crossboundary issues, however they often lack the documentation of the preparation of joint evidence base and strategic policies¹⁸ to ensure development is coordinated, (such as the distribution of unmet needs or policies relating to county matters).

2.15. It is not clear from the Duty to Cooperate Statement what are the additional (if any) joint studies commissioned, besides the ones in partnership with Sevenoaks District Council.

2.16. TWBC's Statement of Community Involvement states that *"The Council will meet the spirit and letter of the legislation and supporting guidance in collaborating on strategic matters affecting the borough"* however it clearly has not met the spirit or the letter of legislation and national policy.

[TWBC: for table, please see full representation attached as a supporting document]

1 Garden Settlement Principles

15.1. We consider that the Local Plan's multiple references to 'Garden Settlement Principles' is unjustified.

15.2. The NPPF states that local authorities should *"set clear expectations for the quality of the development and how this can be maintained (such as following Garden City principles) and ensure that a variety of homes to meet the needs of the different groups in the community will be provided"*⁵⁰.

15.3. The Local Plan states that “at the heart of the creation of a sustainable community is the delivery of the new settlement based on garden settlement principles”⁵¹. It then lists ten “qualities”. Policy STR/SS1 (The Strategy for Paddock Wood, including land at east Capel) states that “The development strategy for Paddock Wood and east Capel is to: (6) Ensure the development embeds the garden settlement principles. Planning applications need to demonstrate consideration of the associated key qualities as outlined in the supporting text”. We note that the proposed ‘Garden Settlement Principles’ are identical to the “Garden community qualities” set out in the Government’s Garden Communities Prospectus (2018)⁵². Whilst we share TWBC’s ambitions for the quality development that would result from planning and delivering development in line with these principles we seriously question how these principles have been considered in the Council’s evidence base and how deliverable they are.

15.4. For instance, the Council’s viability evidence talks about the garden settlement principles where it states regarding development at Paddock Wood and Tudeley: “In the context of the aspiration to deliver these strategic sites on garden settlement principles, however, it is recognised that the site works and infrastructure costs will be significant. Accordingly, there will need to be an approach to finding the right balance to both ensure the provision of the necessary infrastructure to support growth, and secure affordable housing delivery in accordance with policy to the fullest extent possible”⁵³. To translate this paragraph from the viability evidence, it is effectively saying that ‘Garden Settlement Principles’ are aspirational and that the proposals at Paddock Wood and Tudeley will struggle to deliver the infrastructure requirements and affordable housing requirements before one can even consider the aspirations of the ‘Garden Settlement Principles’.

15.5. Although the viability evidence supporting the Local Plan claims to include assumptions about the additional costs associated with applying ‘Garden Settlement Principles’ we cannot identify where these additional costs are set out in the evidence.

15.6. The Inspectors of the Uttlesford Local Plan – which proposed multiple new garden settlements and stated that the new settlements would need to be developed in line with ‘garden city principles’ found that there were no mechanisms in place to ensure that the garden city principles could and would actually be delivered by the developers. They stated in their letter: “Without assurances that the necessary mechanisms outside the plan would be put in place, we cannot be content in principle that the new proposed settlements would be true Garden Communities, or that the plan’s stated vision for these new settlements would be met. This is a serious concern.”⁵⁴. We have the same concerns for the Tunbridge Wells Local Plan in respect of the purported application of ‘Garden Settlement Principles’ with no concrete mechanisms for actually delivering development in this way and no evidence to justify it.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan

Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

3. Sustainability Appraisal / Strategic Environment Assessment

General

3.1. Through scrutinising the Sustainability Appraisal (SA), it became apparent that the justification for the preferred development strategy is unsound, as the preferred development strategy would involve the loss of Green Belt and the AONB. As such, this approach does not comply with paragraph 118 of the NPPF which emphasises the benefits of developing suitable brownfield, under-utilised land and buildings and airspace above existing residential and commercial premises for new homes. In contrast, the nontechnical summary states that “following the maximisation of sustainable development in settlements across the borough, the preferred development strategy embraces the creation of a new garden settlement, together with a major urban extension based on garden settlement principles. Both of these proposals would involve significant loss of Green Belt land, it being found unreasonable for such large growth to occur in the AONB and there being no sustainable opportunities outside of the AONB. However, these are justified in part on meeting development needs, given the limited capacity for this scale of growth to be otherwise distributed across the borough.”

3.2. The above SA statement indicates that the loss of Green Belt is justified via the ‘exceptional circumstances’ case, whereby, in accordance with paragraph 37 of the NPPF, “strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development”. Paragraph 37 of the NPPF clarifies that this can be justified if the following can be justified:

“a) makes as much use as possible of suitable brownfield sites and underutilised land;
b) optimises the density of development in line with the policies in chapter 11 of this Framework, including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and
c) has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground.”

3.3. TWBC have clearly not fulfilled the NPPF's criteria set out above. First and foremost, the preparation stage of the Local Plan should be informed by a suite of evidence documents. Given that the borough is largely constrained by Green Belt and the AONB, it is unclear as to why TWBC did not undertake further urban capacity studies and small sites studies. The outputs of this work would likely unlock new growth potential in areas deemed appropriate for higher density development within the borough, as in accordance with the NPPF. In the absence of this it is noted that the Brownfield and Urban Land Topic Paper¹⁹ concludes that “a review of brownfield sites now proposed for allocation shows that high densities are being proposed on all but two sites (on Land at Benenden Hospital.) While these sites have a relatively low density, this reflects the constraints and location of the site. There are regarded as appropriate densities in line with paragraph 122 of the NPPF. The other proposed brownfield site allocations are achieving densities well above 30 dwellings per hectare with particularly high densities on sites in Royal Tunbridge Wells, showing the Pre-Submission Local Plan will seek to optimise the use of sites in the town centre and other accessible locations.”

3.4. The above summary is concerning as it highlights TWBC's lack of regard for the Green Belt. It is clear that the proposed loss of Green Belt and AONB conflicts with paragraph 133 and 11bi) of the NPPF and also provides that TWBC have not fully evaluated potential sources of supply. With regard to paragraph 37 of the NPPF (as set out above), it is clear that there has been no thorough review of under-utilised land nor has there been sufficient regard for sites in town centres and near public transport where constraints exist but there is potential for them to be overcome.

3.5. With reference to clause c) of paragraph 37 of the NPPF, TWBC's Statement of Common Ground states that (our emphasis added) “In September 2020, TWBC wrote to MBC indicating that they are exploring all potential options to meet the need of the borough. In this letter, TWBC formally requested that MBC accommodate some or all of the housing proposed in the Draft Local Plan within the Green Belt, or as major development in the AONB, and at least 14 hectares of employment land. An initial response was issued by MBC in December 2020. This stated that MBC could not accommodate any

of TWBC's need, as it was proving very challenging to accommodate the extra homes needed until 2037, necessitating growth to be focused on two 'garden communities'". The above statement severely undermines the legitimacy of TWBC's approach, as TWBC did not engage constructively with MBC and instead sought only to accommodate housing needs in the Green Belt and AONB within MBC. As such, this approach does not comply with paragraph 37) of the NPPF on the grounds that TWBC's and MBC's collaborative evaluation of the potential sources of housing supply was entirely unsatisfactory.

3.6. It is worth acknowledging that the above matter was a key issue within the St Albans City and District Local Plan examination, where the Examiners' (Letter from Examiners dated 14th April 2020) recommended the withdrawal of the Plan and stated that (our emphasis added) "the Council's approach to the Green Belt is also of concern to us in relation to the DtC. The Plan proposes substantial Green Belt boundary alterations to enable land to come forward for development. Paragraph 137 of the Framework requires that before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic planning authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. It has not been demonstrated that the Council's approach to the Green Belt has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through a statement of common ground (SoCG)". Similarly, it cannot be demonstrated that TWBC have been informed by discussions with MBC. On the contrary, TWBC did not show any flexibility or openness in their approach to meeting their identified housing needs. It is important to note that the St Albans City and District Local Plan was subsequently withdrawn on 19th November 2020 due to the Examiners' concerns that there was "inadequate evidence to support the Council's contention that exceptional circumstances exist to alter the boundaries of the Green Belt".

Horsmonden

3.7. Table 27 also assesses Horsmonden as a potential location for further assessment. However, the explanation states that Horsmonden is not situated within the Green Belt or AONB, however it won't be taken forward based on access and landscape sensitivity issues. This is unjustifiable, as such issues are afforded less weight than Green Belt and AONB matters within the NPPF. This decision undermines the entire SA as it provides evidence that TWBC have not accorded within the NPPF when decision-making.

Sustainability Appraisal: Paddock Wood – Draft Local Plan scenario

3.8. With regard to Table 27 of the SA (which sets out which development options are to be progressed and considered further, the approach for the Draft Local Plan Paddock Wood and East Capel allocations was explained as "Land is outside of the AONB and has useful rail and road transport links. There is potential for the existing town to benefit from the substantial investment that new development would bring including resolution of existing flooding problems. The site is partially Green Belt and the most recent Green Belt Study concludes the overall harm rating of releasing this land from the Green Belt is high. However, there is scope for compensatory measures such as new hedgerow planting, enhanced pedestrian routes or conversion of fields from arable to grassland. For these reasons, this site was considered to warrant further examination as a reasonable alternative."

3.9. In contrast, the Iden Green site was explained as "the site is wholly very rural and within the AONB and its landscape impacts were considered too severe to warrant further consideration as a reasonable alternative." Whilst the need to protect AONBs is set out under paragraph 11bi) of the NPPF (whereby "strategic policies should, as a minimum, provide for objectively assessed needs for housing, unless [...] the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"), the protection of the Green Belt is established through Chapter 13 of the NPPF and is afforded the same weight as the protection of AONBs. With that in mind, it is evident that the interpretations made in the SA are entirely subjected and do not align with the higher-level policies of the NPPF. As such, the SA is unsound.

3.10. The above summary is concerning as it highlights TWBC's lack of regard for the Green Belt. It is clear that the proposed loss of Green Belt and AONB conflicts with paragraph 133 and 11bi) of the NPPF and also provides that TWBC have not fully evaluated potential sources of supply. With regard to paragraph 37 of the NPPF (as set out above), it is clear that there has been no thorough review of under-utilised land nor has there been sufficient regard for sites in town centres and near public transport where constraints exist but there is potential for them to be overcome.

3.11. The methodology which underpins Table 29 (SA scores for the four urban extension growth options at Paddock Wood including land in east Capel) is entirely unclear and inconsistent. Under

some SA Objectives, the relative impacts between different 'options' (the scale of development proposed) was considered, whereas the SA Housing Objective reasoning states major positive across all options as "despite offering varying quantities of new dwellings, the 4 options are not differentiated on this objective because, even the option with the lowest numbers would still make a significant difference." This method is unsatisfactory as there is no real quantitative analysis as to what the potential impacts are and what thresholds feed into the scoring matrix. On this basis, the SA is entirely unsound as there is no real evidence to support the SA scoring.

3.12. The justification provided to explain the "?" (mixed) impact on water across all options for the Paddock Wood and East Capel options is inaccurate. The SA states that "mixed water scores is applied equally across the options as all would represent a substantial demand for water and wastewater treatment, and all would provide significant benefits to Paddock Wood and Capel in the form of reductions in existing flood risk. The benefits could be slightly greater in options 2 and 4 where development is directed to the areas of flood zone 2 and 3 west of Paddock Wood (in east Capel). An improvement to flooding issues for existing residents is one of the key justifications for the proposed release of this Green Belt land on the west side of the settlement." It is clear that the development options will not lead to any benefits in water/flood risk. The IDP confirms that flood mitigation measures will be provided as part of these schemes, however, these measures are intended to ensure that flood risk is not heightened across the wider area (i.e. there will be no added benefits). Therefore, the SA's mixed scoring is inaccurate and unsound.

Question 1	
Respondent's Name and/or Organisation	Roger Blake, Railfuture
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Local Plan (whole Document)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Railfuture is Britain's leading, longest-established, national independent voluntary organisation campaigning exclusively for a better railway across a bigger network for passenger and freight users, to support economic (housing and productivity) growth, environmental improvement and better-connected communities.

We seek to influence decision makers at local, regional and national levels to implement pro-rail policies in transport and development planning.

We are content that the Pre-Submission Local Plan is compliant with legal and procedural requirements, and from our perspective is sound.

We observe that the new shadow sub-national transport body Transport for the South East (TfSE), which includes Kent and its districts, and Medway, within its regional scope has been developing its 30-year Transport Strategy 2050 in parallel with the new Local Plan for Tunbridge Wells, and secured formal approval by its shadow Partnership Board in July 2020. Since then it has embarked on a number of studies to inform its draft Strategic Investment Plan, one such being the South Central Radial Area study which for the first time accorded TfSE recognition to an 'economic corridor' between the hubs of Royal Tunbridge Wells and Brighton, via Wealden and Lewes Districts.

Whilst acknowledging that the next Local Plan for Tunbridge Wells has a shorter planning horizon than TfSE's Transport Strategy, we nevertheless consider that the latter provides additional strategic context to Local Plan policies. Specifically, the economic corridor may be perceived currently as defined essentially by the road network while across the timespan of TfSE's Transport Strategy the corridor has potential for transformational development of rail links between the hubs at either end. The new Local Plan, and its successors, need in our view to be fully cognisant of the opportunities thereby available for Tunbridge Wells.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

General comments on whole Plan

[TWBC: see also further comments on individual sections and policies - PSLP_914, 925, 926, 928, 929, 930, 931, 932, 933, 938. The whole representation form (personal details redacted has also been attached as it contains plans and images]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

Forward

We appreciate the effort and thought that has gone into preparing the Pre-Submission Local Plan. We note and welcome a number of areas where our representations in respect of the Regulation 18 draft local plan consultation have been taken into account and the plan amended.

The task of developing a local plan over such a long term is very challenging especially in the context of a significant and society changing event such as the Covid pandemic. We agree with the statement set out at paragraph 2.41 of the Pre-Submission Local Plan that acknowledges the challenges of planning when faced with structural societal changes. We agree that a flexible approach should be taken when attempting to assess and balance the needs of retail, office, housing and culture.

To that end we make the following observations:

Retail

We note the plan identifies a need for increased retail space; this is in spite of the number of empty premises in the town centre. In a visual survey of Mount Pleasant, Calverley Road, Royal Victoria Place and Crescent Road we identified 51 empty premises and in addition there is the well-publicised closure of John Lewis in north farm. We consider that retail businesses are going through a period of significant structural change which the Covid pandemic has hastened but not caused in the shift to online shopping and distribution. We therefore consider the case for the need for more retail space to be very weak.

Office space

We agree with the statement at paragraph 5.24 that no additional office space is needed in the town centre and existing space may need to be re-purposed. We note a recent BBC survey of major

employers reported that 85% of employers will not be returning to their offices full-time, and indeed in a straw poll of our own small group, 100% of those people working in office space will not be expected to return to the office full-time.

This represents another structural change in working patterns. However, we also consider it an opportunity for the growth of more local services in the leisure and culture sectors that will provide additional local employment, potentially reduce travelling and if managed appropriately, enhance the borough and the experiences of its residents.

To that end we consider the plan should include an addition to the strategic policies that ensures there is suitable flexibility in planning decisions in terms of purpose (e.g. between retail, office and housing) so as to avoid the highly undesirable circumstances of Green Belt and green field development running amok while the town centres languish empty and underutilised. This addition could possibly be made in STR4 but a case could be made for such a clause in all of the strategic policies.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following extracts are from the representation submitted by KeepKent.Green and the Golden Green Residents Association - for the full representation, please see supporting documents]

KKG Objects to Policies STR/SS1 and STR/ SS3 as well as providing additional commentary on other policies, that lead to conclude the Local Draft Plan is not legally compliant, is not positively prepared, is not justified or effective or consistent with NPPF.

Executive Summary

The current proposed PSLP is too narrow, and lacks basic detail, confining over 50% of its total housing allocation to the boroughs boundaries, which will have significant consequences with neighbouring LPA's of Tonbridge & Malling, Sevenoaks, Weald and Maidstone Borough Councils.

Although TWBC have allocated considerable time and resources in producing 1,000's of pages of policy and evidence documents, in order to provide a compliant Draft local Plan submission, the PSLP as highlighted within Reg 18 continues to lack detail, clarity and common sense.

Many issues raised within Reg18 consultations, still remain unanswered concerning the identification, prioritisation and phasing of infrastructure schemes and hence the deliverability of the strategy. In respect of prioritisation, more infrastructure may be critical and essential than desirable, particular concern is how critical many of the infrastructure projects are, the magnitude of cost, the uncertainty concerning their phasing and funding position overall.

For example the PSLP lists the New Colts Hill bypass as being critical (p94) as needing to be in place before sites come forward for development, yet Policy STR/SS 1 refers to the bypass in terms of it being a potential scheme. There is a long held aspiration (since the 1980's) by Kent County Council to deliver the Colts Hill Bypass. It is understood that the latest cost estimate for the scheme will exceed £50 million and recent applications for funding have been unsuccessful.

Some of the larger infrastructure projects within the plan are dependant on joint funding contributions both from Paddock Wood, East Capel and Tudeley, therefore if one of the sites is not allocated, funding

could become an issue, especially as the viability study analysis forecasts only 3 of the 8 illustrations provided as financially viable.

On the 9th June 2016, Planning Inspector made reference to Paddock Wood's local Infrastructure where he raised issues regarding drainage and flooding and recommended that development on individual allocated sites provide for appropriate management and drainage measures, highlighting the key constraints as above but recognising the area has critical drainage.

These developments in Paddock Wood have now been constructed and issues continue to be flooding, drainage and sewage with a number of occasions where the sewage has entered residents homes and Gardens, not just within these developments but a much larger area within Paddock wood and Five Oak Green.

There should be more of an emphasis and focus of regenerating Tunbridge Wells Town itself, as the last decade has seen very little regeneration with declining and empty retail units, many brownfield sites have remained vacant for years, for example the demolished/ derelict Former Tunbridge Wells Cinema, a gross developable site of 0.97 ha, Vale Avenue 1.88 ha (site has been assessed for development potential, notably for mixed use including residential, office and hotel/ conference use, these 2 sites are situated in prime locations within the town and should be at the centre of regenerating the town itself, providing affordable housing, that will encourage people to live, work, shop and socialise within the town and not be reliant on motor vehicle transport unlike the Garden Village Strategy that the PSLP promotes.

The Coronavirus pandemic has seen a significant amount of retailers close permanently the most significant John Lewis Partnership Tunbridge Wells with over 42,000 sqft of retail space, The Royal Victoria Place covered shopping centre has seen a number of closures over the last 3 years from retailers such as GAP, Topshop, Dorothy Perkins, Monsoon, Basil, Anne Summers, H & M, BHS, Lasenza as well as many small retailers, many units remain empty.

As highlighted within the PSLP STR1 The Development Strategy the total housing allocation for Royal Tunbridge Wells is 1,222-1320 new homes versus **4,000** in Paddock Wood/ East Capel and **2,800** at Tudeley Village, followed by Cranbrook/ Sissinghurst 718-803, Hawkhurst, 643-693, Horsmonden 225-305, Pembury 294-304 with all 9 remaining Parishes with allocations from 15-150.

The vision of the PSLP should be to regenerate and enhance the Town itself using all the brownfield and vacant sites currently available, designing and developing Tunbridge Wells as major cultural, vibrant town with first class educational, art and leisure facilities, as well as providing competitive 21st century facilities that will entice major companies/ businesses to relocate to the town.

The Tudeley Village Settlement and East Capel will not attract young people or major companies / businesses to the area as the main access will be reliant on motor vehicles and will rely on the footfall of the development, out of town employment facilities will have to be heavily discounted to attract any interest.

This PSLP promotes the continued migration of people from London and its suburbs to the area, who have taken advantage of increasing property values; this has been even further exacerbated during COVID 19. - 33,575 people left London to move to Kent in 2019, property websites have reported a substantial increase in people looking for homes outside London since lockdown started. That was the highest number of people arriving in Kent from London in the 9 years of available data. Tunbridge Wells saw net gains in people moving to the area in 2019.

As of March (the last figures available) the average home costs £296,830 in Kent compared to the average cost of £486,000 it costs to buy a home in London. Tunbridge Wells borough continues to have higher average house prices than the rest of Kent and the South East region (as based on Land Registry House Prices 2019). Since 2006, the average price of a house in Tunbridge Wells has increased by £195,753 (an increase of 73%). Comparatively, other areas across Kent and the South East of England have seen increases of 62% (£127,004) and 64% (£145,447) respectively.

The PSLP promotes migration to Tunbridge Wells Borough rather than satisfy the existing communities requirements, providing affordable housing to the community who have resided within the Borough all their lives. Residents are being forced to move out of the Borough due to increased housing prices within the area ,which have become unaffordable to many within the community.

The Sustainability Appraisals for Tudeley are not accurate and unreasonable and are based on TWBC's own criteria and objective assessment and inconsistent with other strategic sites appraisals.

With the possibility of development / extraction of up to 3.5m tonnes of sand and gravel from 2 further quarries(Stonecastle Farm and Moat Farm) neighbouring Tudeley Garden Village as defined in the Kent County Minerals and Waste Plan, diesel powered plant equipment and 100's of HGV's will be accessing the local road networks with many minor roads not fit for purpose to accommodate such machinery, this will increase the carbon footprint and further deteriorate surrounding air quality. It is unclear within the PSLP how and if TWBC has effectively engaged with KCC regarding the KCC Minerals Plan, safeguarding mineral assets policy

Although the plans vision is to reduce the reliance of motor vehicles and encourage the community to cycle and walk to Tonbridge and Paddock Wood, Tudeley to Tonbridge is 4 miles, East Capel to Paddock 4.5miles, approximately 6mins journey time in a car with no traffic, within peak journey times 20-25 minutes. Walking from the sites to Tonbridge or Paddock will take approximately 1 hour and 15-20 minutes by bicycle, with no major supermarkets planned within these developments both sites will still heavily rely on motor vehicles as the prime mode of transport.

Commentators highlighted evidence within Reg18 that Tudeley Garden Village is undeliverable, due to the many infrastructure, transport, landscape, flooding and heritage constraints. The unusual arrangement between the landowner and the council and lack of detail, no comprehensive master plan or a robust viability plan, considering the evidence submitted within Reg18 and the fact that this is the largest development with the history of the Parish of Capel, it is surprising the Council have not taken the opportunity to provide further evidence base to address the many concerns that have been raised.

With all neighbouring LPA's considering Garden Village Settlements within their own Local Plans it is clear that there has been very little engagement between the LPA's has taken place at executive/ decision making level, to consider a holistic approach, agreeing long term infrastructure and transport issues that will affect each authority.

The proposed settlement in Tudeley will have a significant impact on Tonbridge town and this will need to be assessed in much greater detail. In addition, impacts resulting from the Tudeley Village and Paddock Wood allocations on the road network in Tonbridge and Malling Borough and Maidstone, Weald and Sevenoaks Boroughs should also be assessed further.

The County Council as the Local Highway Authority has fundamental concerns that the impact of the additional vehicular traffic brought about by the preferred growth strategy has not yet been effectively addressed in the Draft Local Plan by clearly defined mitigation measures.

The proposed Garden Village at Tudeley will not be 1 settlement but 2 as it is divided by a mainline railway, the initial first phase of this development will be constructed without any major infrastructure improvements along a sensitive Southern boundary of Weald ANOB, which will create significant harm to the surrounding landscape and topography as well as creating significant heritage concern to the setting of All Saints Church at Tudeley.

Constructing larger crossings at frequent points across the railway may be possible but it won't tie the two halves of the settlement together enough to make it one settlement, so it will not satisfy garden settlement principles.

The TWBC's Local Plan seeks low levels of car use , yet Tudeley Village is an isolated location, which relies on the private car.

The Tudeley Village Proposals do not demonstrate how the scheme has been informed by landscape character and context . An early understanding of character and context is a basic requirement of good design as set out in the Kent Design Guide (Kent County Council 2000) and the more recent MHCLG 2019 policies and guidance relating to ANOB/ Green Belt and its setting.

The design principles that have been presented do not follow established best practice 'placemaking principles. Features such as straight roads, extensive use of rear parking courtyards;and limited opportunities to integrate green infrastructure, do not reflect best practice principles, such as those set out in the National and County Design Guide, 'Manual for Streets and Parking' what works where'. Overall the vignette appears to lack cohesion and clear strategy for public realm streets and open space.

The proposed garden settlement at Tudeley Village is a highly controversial and unrealistic proposal. It should not form part of the vision of the Plan because if it is not achieved, or is withdrawn, then the

whole vision will have failed. The garden settlement should not be given an undeserved status by implementation of one, questionable development proposal.

Duty to Cooperate

So far as detailed within the PSLP (par 1.43) "The above discussions will continue as the plan progresses and the council intends to agree Statements of Common Ground where relevant. Completed statements will be available to view as part of the following draft Duty to Cooperate Statement". TWBC has not agreed Statements of Common Ground notices with all neighbouring LPA's as this documentation has not been submitted within the draft plan.

Has TWBC breached the Localism Act 2011?

It has not engaged constructively, actively and on an ongoing basis, failed to consult the public relating to strategic matters, or those that have significant impacts affecting two or more local authority areas.

Ignored over 95% of public responses from the initial Consultation and Objections consultation, regarding Tudeley Village as well as commentary from National House Builders and other consultees questioning the sustainability and viability.

Over 8,000 responses to The local Plan Regulation 18 Consultation with 100's opposing the strategy for Capel (The largest response TWBC have received from any public consultation).

The Plan should be "Locally Led". The Garden Community prospectus states "Strong local leadership is crucial to developing and delivering a long term vision for these new communities. All proposals should have the backing of local authorities in which they are situated, including the County Council in two tier areas.

We are particularly concerned with the lack of detail which demonstrates collaboration across local authority boundaries. To ensure that the potential local growth benefits have been considered.

Proposals should set out how the local community is being, or will be, engaged and involved at an early stage, and strategies for continued community engagement and Investment. This has not happened, the community has not been consulted in a fair and reasonable way.

Engagement in planning, especially of larger, more complex sites, is critical. The greater the engagement with the local community, as well as the Council and other key stakeholders, the more weight can be given to any master planning approach.

Parts of the plan are Not Locally Led, Capel Parish Council have rigorously objected to the Plan.

Tonbridge and Malling Borough Council have also voiced their concerns, holding 2 EGM's totally dedicated to TWBC Draft Plan, many councilors have raised their concerns regarding general lack of detail, highlighting infrastructure proposals, how the additional costs for increased public services will be met, removal of Prime Agricultural Green Belt land, additional flooding risk and lack of mitigation, the intense Garden Village Development upon the sensitive Southern Boundary will harm the setting and heritage of Capel and Tudeley, the cumulative effect to the High Weald ANOB and surrounding villages.

Why 3 alternative sites in Paddock Wood that are located outside Green Belt land have been rejected.

The impact of air quality within Tonbridge and Malling. The cumulative impact within the existing transportation connectivity and how that will affect Tonbridge Town Centre and other surrounding villages within Tonbridge and Malling Borough.

Hadlow Estates Public Charette Consultation -By Invitation only conducted in Tunbridge Wells, not in Capel Parish - Only 145 attended- Clearly restricting local community to attend and have their say, discriminating against older members of the community without Internet access and lacking the necessary IT skills to have their input, as well as people without access to a motor vehicle, reliant on public transport.

Initial community input into the Hadlow Estates Charette again was only by selected members of the community / stakeholders and selected councilors.

No further public consultations offered by Hadlow Estates within the Parish of Capel, claiming Covid restrictions prevented further physical presentations to the community, referring people to its website for further information.

TWBC refused to consider delaying the Reg 19 consultation period to allow for Covid 19 restrictions for further wider public consultation within Capel Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

KeepKent.green would like to attend and participate in any Inspectors Hearing regarding the TWBC Local Plan.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

The SA highlights within Reg18 SA that 13 alternative sites for garden settlement and urban extension were originally considered, all but 2 sites (Paddock Wood and Tudeley) were ruled out and were not subject to further appraisal, on the grounds primarily of landscape and Impact on the ANOB, however the SA report does not consider the fact that Tudeley Garden Village borders ANOB, and development is only segregated by the road (B2017) and discounts the topography elevations will be severely disrupted by any development as the Medway Valley views will be removed from the elevated ANOB areas, it appears a greater consideration and scoring, regarding unacceptable landscape impacts are applied to other sites.

The growth strategy has been adopted as it has become by default the easiest option for TWBC to consider, until 2017/2018 the Tudeley site had not come forward within the plan and the favoured option was a large development on the A21 situated at Kippings Cross, this option made the most logical sense as it is situated within a convenient corridor, where £100 million infrastructure investment had just been completed with the A21 dualling project.

- Kippings Cross parts of the sites within ANOB and landscape impacts were considered too severe to warrant consideration as a reasonable alternative, although this site was championed by TWBC as their preferred site until 2017 when the landowner submitted Tudeley and East Capel sites. It is well known that TWBC expected Kippings Cross to be brought forward but last minute negotiations between the promoters collapsed.

- Langton Green- Landscape Impacts and ANOB- Biodiversity and Nature Conservation designations are scattered across the borough, but are not common in ANOB, this greater development in ANOB could create increased pressure on wildlife.

It is understood that these parcels of land were considered, but due to land ownership issues TWBC decided the risk of implementation was too high.

Upon receiving news that Kippings Cross sites were not going to be included within the PSLP, promoters quickly submitted alternative sites to TWBC one of which was Tudeley and East Capel, which land is under single ownership as well as located on the borders of the borough and suitably sufficient size to achieve a large percentage of the borough's housing targets, the only downside was the site is located within Metropolitan Green Belt, productive agricultural land, bordering ANOB, located in the

small farming Parish of Capel.

It became very apparent that Capel was the answer to achieve TWBC village settlement ambitions and the Council went to extraordinary lengths to fast track the site, issuing Non Disclosure Agreements to Capel Parish Councillors, weeks before announcing the inclusion of the site, as well as entering into a most unusual promotion agreement with the landowner, allowing the landowner to be responsible for the development of the village, deliver/ contribute the very complex infrastructure required even though the landowner is a farmer with no development experience.

A unique strategy compared to other sites within the PSLP, such as Paddock Wood where TWBC retained David Locke Associates to conduct a detailed Master Plan of all the sites, regarding Tudeley Hadlow Estates has provided a Delivery Strategy which is claimed to be 'a detailed complex vision for a sustainable settlement' this document provides a wish list of objectives, and fails to address implementation and how Tudeley will connect with East Capel and Paddock Wood and Tonbridge, especially initially within Phase 1 with no major infrastructure improvements.

This is the largest development in history within the Parish of Capel, to rely on third party delivery with no experience, appears to be irresponsible and highlights how non delivery will jeopardise the entire PSLP.

Within the SA site filtering process/stage a number of sites were dismissed as 'non-starters' at the very least it would have been a prudent strategy to at least have bought these sites forward and subjected them to further sustainability appraisal scrutiny. For example Frittenden was ruled out on sustainability grounds without actually being subjected to sustainability appraisal, and why Horsmonden was considered a 'non-starter'.

Both the above sites were not ruled out on ANOB/Green Belt grounds but on inadequate transport links, Paddock Wood railway station is approximately 4.5 miles from Horsmonden compared to Tudeley to Tonbridge railway station at 4 miles. Both Tudeley and Horsmonden have limited bus services that operate primarily to transport school children to Paddock Wood, Tonbridge, Tunbridge Wells and Maidstone.

In March 2021 TWBC approved £225million Business Park on the outskirts of Tunbridge Wells providing 800,000 sqft of warehouse and office accommodation. The 30 acre site known as Kingstanding Tunbridge Wells, situated within ANOB and Green Belt. However the neighbouring site Castle Hill which was bought forward in 2020 with proposals to provide 1,500 new residential homes was dismissed from inclusion within PSLP reasons cited were ANOB and Green Belt.

These are clear examples of how the scorings/ratings within the SA should at least be further scrutinised, examining in further detail the greater environmental effect of the plan, as on the face of the evidence within the SA, TWBC have very much exploited the data to provide the desired output.

The original Issues & Options SA identified 6 growth strategies, none of which mentioned Tudeley/Capel as a site for a potential garden village. Growth Strategy 5 was described as a "New freestanding garden settlement. There is no location identified within this option. A new settlement could be located anywhere within the borough."

The SA does not demonstrate there has been adequate assessments of alternatives. It is inconsistent with the assessments of other strategic sites, SHELAA appraisals are inconsistent with other sites.

The TWBC SA assessment is based on 19 sustainability objectives/questions, overall there are 62 sub-questions based on a mix of subjective and objective criteria. Tudeley Village appraisal is based on the 19 Sustainability Objectives, there does not appear to be a link or evidence of 62 sub-questions which leads to question why has this not been applied to Tudeley and would the overall assessment produce a very different picture?

One of the key issues overall is that much of the infrastructure implementation and funding is dependant on the basis that section 106 contributions and public/ private funding are totally dependent on all the strategic sites being delivered as it appears within the viability analysis that shared contributions are required from Paddock Wood, East Capel and Tudeley in order to proceed with the major infrastructure projects.

The addition of the new secondary school provision will not be initiated until almost the maturity of the plan, in the interim where will the 100's of children be schooled?

If you would like to attach a file in support of your comments, please upload it here.

Question 1	
Respondent's Name and/or Organisation	RTW Monson Swimming Club
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Pre-Submission Local Plan

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Comments from covering email]

I am writing on behalf of RTW Monson the local swimming club in order to write with comments for the Pre-Submission of the Local Tunbridge Wells Borough Council Plan. In particular we would like to comment on the 'soundness' of the plan given the supporting documents. As the local swimming club, Royal Tunbridge Wells Monson, we are deeply concerned that the council have not given Swimming provision enough consideration. This is particularly disappointing given that the Retail & Leisure Survey 2017 & the recent survey in 2020 shows that there is public demand for a swimming pool. The current draft only really focuses on the new development at Paddock Wood and the possibility of a new 25m pool there and has no detail on the scope. We also feel that the existing provision of St John's is not adequate for the growing population and we are aware that local residents are struggling for access to Swimming Lessons and general pool time for both children and adults. Indeed as a club we are struggling for pool time and are seriously concerned about the sustainability of our club going forward.

As you know swimming is a life saving skill and provides numerous health, social and wellbeing benefits. Given the changing retail and leisure landscape, swimming remains a vital skill and tool in health and fitness that you have to physically travel to a venue in order to participate in. It could be argued therefore, that swimming may become a 'destination activity' and supersede many of the other activities that individuals are now able to participate in virtually and provide a destination venue for leisure.

We would therefore ask you to further consider in line with the National Plan to "promote vitality and viability" in the town centre first and ensure the leisure provision and swimming facilities are in particular is fit for purpose, meets the need of the population- particularly given the fact that the supporting surveys to the plan highlight swimming pools as an area of focus for local people.

[TWBC: Comments on representation form]

1. It doesn't take into account the Retail & Leisure Study 2017 or latest 2020 study which highlights the requirement of more swimming pools. The proposal for a 25m pool does not detail how many lanes, or whether it will be suitable for competitions. A 4-lane pool for example is expensive to run and will not be as commercially successful or meet the local population demand/needs. What quantitative work has been carried out to look at oversubscription of swimming classes etc. Have the local aquatic disciplines been contacted as key stakeholders?

2. Doesn't account for the lack of provision of swimming pool space in central town of the Borough, lack of lessons etc. Or the fact that the current facilities are old and not fit for purpose. Therefore, doesn't take into account the National Plan 'To promote vitality & Viability with the town centre first approach including leisure. Or key challenges around focus on leisure & culture to ensure long term adaptability of the town centre.

3. With lockdown pushing people to move online for many activities in leisure, swimming remains a destination venue and a key lifesaving and health promoting activity and the plan should take such factors into account.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. Mention of the improvement/replacement of St Johns Leisure centre. 2. Specifically mention the format of the swimming pool proposed at Paddock Wood. 3. Indicate how leisure in Tunbridge Wells itself will be improved as per info given in point 5 above.

As the local swimming club and therefore a key Leisure user for the local area, we feel that the plan should reflect the previous studies findings (i.e. more pools) as well as have an understanding of the constraints that local clubs are working with and the sustainability of such clubs without adequate Leisure facilities that are fit for purpose and the population (children) and the times they can take part in leisure activities.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We are a key user and are hugely concerned about our viability for the future.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Rydon Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Sigma Planning Services

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Legal Compliance

[TWBC: see also representation numbers PLSP_1629, 1702, 1705, 1707, 1708, 1709, 1710, 1713, 1714, 1715, 1717, 1721, 1729, 1732, 1733, 1734, 1737, 1739, 1741, 1743, 1744, 1745 & 1746]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: see supporting documents attached, including composite of all representations].

1 A robust evidence base.

A sound development plan is required to be justified by a robust evidence base. The decision by Members to take the Plan forward for submission to the Secretary of State should have been informed by a complete evidence base and full access by Members to it. This was not the case. The decisions by Cabinet of 21st January 2021 and Full Council 3rd February 2021 agreed to undertake consultation on the Pre-Submission version of the Local Plan (Regulation 19) as it stood before them, subject to authorising the Head of Planning to make minor modifications. At that point key documents were not available to Members, as set out in Appendix A to the report (Rydon 1). Those documents were, allegedly, highly influential in the significant changes to the proposed Spatial Strategy between the Regulation 18 and 19 stages of the Local Plan process. Without access to those documents, Members were not in an informed position to put the Plan forward for Reg 19 consultation.

1 Community Involvement.

Similar considerations apply in relation to the availability of those key documents to the public. Most were made available only days before the commencement of the consultation period on 26th March 2021 leaving the absolute minimum period of time for the public to appraise those very detailed documents and produce a cogent response within the ten week consultation period. There appears to be no reason why those important documents could not have been provided sooner so that Members could make informed decisions and interested parties could have more time to consider them. For example, the Hankinson Duckett Associates Landscape and Visual Impact Assessment of Proposed Allocation Sites within the High Weald AONB was being discussed with Member Working Groups in September 2020 and is dated November 2020 but it was only made available on 9th March 2021. Other key documents were similarly held back from publication. In the context of a positively prepared and justified development plan, in the spirit of transparency and true public engagement, it is difficult to understand why this was the case. It may not strictly be a legal default but it certainly conflicts with the spirit of the process and associated Government Guidance and reflects badly on the TWBC claim that their Plan is positively prepared and justified.

3.Sustainability Appraisal.

The plan-making authority are required to assess the sustainability of their plan proposals and this includes the consideration of reasonable alternatives. The Issues and Options version of the Plan (2017) was accompanied by an Interim SA, the Reg 18 Draft Plan (2019) was accompanied by a full SA and likewise the current Reg 19 Pre-Submission version is accompanied by a full SA. However, in each case, the alternatives that are tested essentially involve different strategies for the spatial distribution of a fixed housing requirement figure. There is no full SA testing of lower or higher numbers of housing provision and there is therefore no robust basis upon which to judge the ability of the District to accommodate the uncapped housing needs of the District or to assist in meeting the unmet housing needs of other Districts. This is most unsatisfactory, does not properly fulfil their legal obligations and undermines confidence in the Council's claim not to be able to meet housing need in full (beyond capped targets) or to assist in addressing unmet housing need in other Districts.

4.Duty to Co-Operate.

Tunbridge Wells forms a substantial part of the West Kent Housing Market Area (WKHMA) together with Sevenoaks and Tunbridge Wells Districts. It has borders with 4 other Districts –

Maidstone

Ashford

Rother

Wealden

There is a significant overlap in housing market terms with Wealden District to the south-west and Maidstone Borough to the north-east. The borders with Ashford to the east and Rother to the south-east, are more rural, dispersed and less significant.

The Council's Duty to Co-Operate Statement provides extensive records of meetings

held with representatives of those adjoining authorities but there is little or no evidence of any constructive, positive or productive engagement, as required by planning law and Government Guidance. Viewed from the outside there appears to be a general understanding between all of the authorities concerned that they should confine themselves to meeting their own locally generated housing needs and that environmental constraints prevent each authority from accommodating more than their bare minimum housing target. This assumption is not based upon objective testing and balancing of economic, social and environmental objectives but upon perception, anecdotal assumptions, environmental lobbying and local political resistance to change. This runs contrary to National and Regional objectives and interests which, in the absence of an over-arching Regional Strategy, depend upon a joint approach from individual District Councils to collectively secure wider objectives – particularly in relation to meeting housing numbers across the South-East and to improve the affordability of housing across the Region.

From their various representations and Statements of Common Ground, the situation with adjoining authorities appears to be that none of them are able to assist in meeting TWBC housing needs and:-

Sevenoaks

Estimated 1900 homes, or more, unmet need and a failed Local Plan.

Tonbridge & Malling

aim to meet their own needs but are encountering difficulty in doing so and have problems with their own Local Plan process which has evidently failed. They object to the TWBC Local Plan proposals at Tudeley/Capel because of proximity and consequent impact upon their local infrastructure and long term spatial strategy of limiting growth in the south of their District at Tonbridge. They advocate a mixed portfolio of housing sites across Tunbridge Wells Borough as a preferred strategy.

Wealden

have a failed Local Plan, a significantly increased housing requirement to meet and a dire five year housing land supply position which is a legacy of their inappropriate moratorium on new housing based upon, subsequently unjustified, measures to protect the Ashdown Forest SPA and SAC. Their new Local Plan is at a very early stage although it seems unlikely that they will be able to meet current and future housing needs in full themselves – particularly in the northern part of District which overlaps with the Tunbridge Wells housing market.

Maidstone

expects both authorities to meet their own needs through forthcoming Local Plans.

Ashford

currently both authorities agree to meet their own Housing needs but Ashford does not know if it will be able to it will be able to plan to meet its own local housing needs for the next Local Plan (SoCG Paragraph 2.8).

Rother

are at an early stage of plan preparation and are not yet able to ascertain whether it can meet its own needs. It is facing a significant increased level of housing need and AONB constraints. (SoCG Paragraph 2.16).

In summary therefore there is a request from Sevenoaks for assistance with 1900 dwellings, Wealden and Rother may need assistance, Tonbridge and Malling have difficulty meeting their own needs and object to the TWBC Spatial Strategy, Maidstone and Ashford are confident in meeting current identified needs but reserve their position for the future. None of the adjoining Authorities are in a position to accommodate any unmet needs from Tunbridge Wells Borough Council.

Therefore, despite many meetings since 2015 there is no settled position, no joint planning, no offer to accommodate TWBC unmet needs and a number of adjoining Authorities either do require assistance in meeting their housing needs or may do so in the foreseeable future. Furthermore, it is clear from the SA and the Housing Topic Paper that TWBC have not looked in any level of detail into

the implications of increasing their housing provision above the capped figure or to take account of unmet housing need in neighbouring authority areas. There is therefore no evidence to justify their position.

This suggests that whilst there has been administrative engagement, there is no evidence that this has been constructive, pro-active or effective. The legal requirements go beyond simple engagement and the Council have failed to discharge the Duty to Co-operate in this respect.

This repeats the situation in the other two Authorities that comprise the WKHMA, Sevenoaks and Tonbridge and Malling, where similar isolationist approaches have been rejected at Examination by their respective Inspectors (Report on the Examination of Sevenoaks District Local Plan 2nd March 2020 – Karen Baker (Rydon 2) and letter to Tonbridge and Malling Borough Council, 2nd March 2021 from Inspectors Louise Crosby and Luke Fleming appointed to conduct an Examination of the Tonbridge and Malling Local Plan). (Rydon 3)

In concluding that SDC had not complied with the DtC in Section 33A of the 2004 Act Karen Baker found that the process did not demonstrate that there had been active, constructive or on-going engagement in respect of unmet housing need. Despite the Secretary of State stressing to Inspectors the importance of being pragmatic in getting plans in place, Ms Baker advised SDC to withdraw their Plan and when they did not do so she issued her Report recommending that the Local Plan is not adopted. SDC have sought to challenge this position in the High Court but were unsuccessful.

Similarly in Tonbridge and Malling Borough Council District Ms Crosby and Mr Fleming could find little evidence of constructive, active and ongoing engagement between the Council and SDC in seeking to address SDC unmet housing needs. They also sought to be pragmatic in addressing the situation but were unable to ignore a failure to comply with the DtC. Their letter advises Tonbridge and Malling Borough Council to withdraw their plan from Examination but Tonbridge and Malling Borough Council have declined to do so (Letter 11th March 2021). (Rydon 3). A Report in similar terms to that issued in the case of the Sevenoaks Local Plan can now be expected.

Tunbridge Wells Borough Council rely on the same basic evidence with respect to the DtC as Sevenoaks and Tonbridge and Malling in the WKHMA. However, TWBC have not taken steps to overcome the flaws in their approach to the preparation of their Plan or in their compliance with the DtC. Therefore they have not complied with Section 33A of the Planning and Compulsory Purchase Act 2004.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to ensure that the Inspector fully understands the representations made and the issues raised can be fully examined and discussed.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: see supporting documents attached, including composite of all representations].

OVERALL CONCLUSIONS

- 1 Rydon Homes consider that the PSLP is unsound because it:-
 - . has failed to comply with the Duty to Co-operate and is therefore not legally compliant.
 - . has failed to properly address the public consultation process in a transparent, fair and reasonable manner.
 - . does not provide fully for the housing needs of the Borough and the unmet needs of adjoining Authorities.
 - . has not properly tested the ability to meet higher housing figures.
 - . has not tested all reasonable alternative spatial strategy options.
 - . promotes an unbalanced spatial strategy which is unlikely to deliver the necessary housing, particularly in the early part of the plan period, because of being over reliant on very large sites.
 - . does not provide a suitable mix of size, type and location of housing allocations.
 - . fails to recognise the potential of the main towns of Hawkhurst and Cranbrook for limited growth required for their future vitality and viability, putting at risk their important role as rural service centres.
 - . has departed substantially from the Spatial Strategy of the Reg 18 Draft Local Plan due largely to unjustified conclusions about impact on the AONB which are not supported by the evidence base.
 - . is based on a flawed Sustainability Appraisal which fails to consider reasonable alternative strategy options or reasonable alternative housing sites and contains a number of errors in individual site assessments.
 - . promotes the loss of Green Belt land over the alternative of development in the AONB where sensitive site selection and mitigation can keep landscape impact to acceptable levels.
- 1 As a result the Plan is not legally compliant, positively prepared, effective, justified by its evidence base or consistent with national policy. It is unsound and should not proceed.
- 1 To produce a sound plan it is considered that TWBC must:-
 - . re-visit the DtC and properly explore the quantum of unmet needs in adjoining Authority areas and their ability to assist in meeting those needs.
 - . increase the housing provision figures to reflect the ability to assist in meeting unmet housing need in neighbouring areas.
 - . re-visit the Spatial Strategy to properly address the potential for development at other Green Belt locations within the Tonbridge – Paddock Wood corridor and to recognise the development potential and social and economic needs of the main rural towns of Hawkhurst and Cranbrook.
 - . include within the new housing allocations, land at Fowlers Park, Hawkhurst and Boycourt Orchards, Sissinghurst which should have been carried forward from proposed allocations in the Reg 18 Plan to the Reg 19 PSLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Rydon Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Neame Sutton

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Soundness and Duty to Cooperate

[TWBC: the full representation attached has been set against PSLP (whole Plan) (PSLP_2089), Policy STR1 (PSLP_2092) and Policy STR/CA1 (PSLP_2093). Appendices listed have also been attached as supporting documents]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.0 Instructions and Introduction

1.1 Neame Sutton Limited, Chartered Town Planners, is instructed by Rydon Homes Limited (“Rydon”) to prepare and submit representations in relation to the Regulation 19 consultation version of the Tunbridge Wells Borough Local Plan (“the Plan”) published in March 2021.

1.2 This document sets out Rydon’s Representations on the Plan and deals with the following specific matters:

- . Matters of Legal Compliance
- . Consideration of the correct Housing Need and Housing Requirement within the Plan in the context of the Housing Supply identified by the Council; and,
- . Site-specific representations in relation to Rydon’s promotion site at Finches Farm, Five Oak Green

1.3 The relevant sections of the Plan, including paragraph and policy references, are cited throughout these representations along with the soundness tests that it is considered the Plan fails to comply with.

1.4 These representations are supported by a series of technical reports and appraisals prepared by Rydon’s professional project team, which comprise:

2.0 Legal Compliance

Duty to Cooperate:

2.1 There are a number of Legal Compliance matters that the Council must address if it intends to proceed with the submission of a Local Plan for Examination. The Regulation 19 consultation stage is intended to comprise the version of the Plan that the Council considers to be Sound and in compliance with the various legal requirements.

2.2 Unlike matters of Soundness that can be addressed through modifications to the Plan any issues relating to Legal Compliance of the Plan cannot be addressed retrospectively.

2.3 It is therefore of vital importance to the Council that the Plan meets the Legal Compliance requirements before it proceeds.

2.4 Of particular importance in the case of Tunbridge Wells and its surrounding authorities is the Duty to Cooperate ("DtC"). Section 110 of the Localism Act 2011 introduces a new Section 33a into the Planning and Compulsory Purchase Act 2004, which requires the Local Planning Authority to cooperate with its neighbouring authorities and other bodies.

2.5 Sub-section (2) goes on to set out how the engagement should be undertaken by stating:

'In particular, the duty imposed on a person by subsection (1) requires the person—

(a). to engage constructively, actively and on an ongoing basis in any process by means of which activities within subsection (3) are undertaken, and

(b). to have regard to activities of a person within subsection (9) so far as they are relevant to activities within subsection (3).'

2.6 Government policy also confirms that:

*'In order to demonstrate effective and on-going joint working, strategic policy-making authorities should prepare and maintain one or more statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance, and be made publicly available throughout the plan-making process to provide transparency.'*¹

2.7 It is therefore a vital legal requirement of the Plan making process that the Council engages with its neighbours on a constructive, active and, ongoing basis. The engagement should be documented throughout the process to demonstrate compliance with the legal requirements.

2.8 The Council has produced a Duty to Cooperate ("DtC") Statement for the Pre- Submission Local Plan (March 2021) that sets out how the Council has collaborated, engaged and cooperated with neighbouring authorities, public bodies and other stakeholders during the preparation of the Local Plan².

2.9 These representations focus specifically on the strategic issue of meeting housing need, which is covered in Section 4 (Pages 46-48) of the DtC Statement.

2.10 The DtC Statement confirms that the Council has worked specifically with those authorities within the same housing market area as defined in the Council's Strategic Housing Market Assessment ("SHMA"), namely:

- . Sevenoaks District Council
- . Tonbridge and Malling District Council

. Wealden District Council

. Rother District Council

2.11 Rather concerningly the DtC Statement goes on to confirm that the Council has only focussed its consideration on Sevenoaks District Council on the basis that is the only authority which has indicated it does not intend to meet its own housing needs in full.

2.12 As a consequence of the Council's focus its DtC consideration has effectively taken its 'eye off the ball' in relation to the other authorities. This has lead to a fundamental failure specifically in relation to Tonbridge and Malling District, which is explored further below, together with Maidstone and Ashford.

Sevenoaks District Council:

2.13 Dealing first with Sevenoaks.

2.14 The DtC Statement summarises the extent of the discussions that have taken place with Sevenoaks, which appears to be limited to an initial request by Sevenoaks in April 2019 for some of its unmet need to be dealt with by Tunbridge Wells. Following which the Council has concluded that it could not meet any unmet need arising from Sevenoaks.

2.15 The Council's conclusion on not being able to meet any unmet need arising from Sevenoaks appears to have been heavily influenced by the fact that, at that time (April 2019), the Sevenoaks Plan had not been examined³.

2.16 Since April 2019 the Sevenoaks Plan has been to examination and the Inspector reached the conclusion that was not legally compliant in relation to a number of key considerations including DtC. The Inspector consequently recommended the Sevenoaks Plan should be withdrawn.

2.17 Sevenoaks sought to challenge the Inspector's conclusions in her Report (dated 02 March 2020). That challenge was rejected by the court in December 2020 and a subsequent attempt by Sevenoaks to appeal the ruling was rejected on 08 April 2021.

2.18 It is therefore inevitable that Sevenoaks will need to withdraw its Plan and restart the process given the Inspector's conclusion that the Plan is both Unsound and has failed the Legal Compliance test specifically in relation to DtC. The consequence of this on the DtC with Tunbridge Wells is significant because Sevenoaks previous draft plan was prepared against the transitional provisions set out in Annex 1 of the Framework 2019 i.e. that plan was prepared against the policy requirements of the Framework 2012 and the corresponding PPG.

2.19 The current SoCG included in Appendix A of the DtC Statement (dated 21 May 2019) identifies an unmet need of 1,900 dwellings arising from Sevenoaks based on an Objectively Assessed Need ("OAN") of 707 dpa for the District over the period 2019-35 equating to 11,312 dwellings (the Sevenoaks Plan made provision for a supply of 9,410 dwellings over the same period)⁴.

2.20 When Sevenoaks commences work on a new Local Plan it will need to make provision for a Local Housing Need ("LHN") based on the new Standard Method as prescribed by the Framework 2019 and accompanying PPG. The consequence of this will be a LHN of 715 dpa⁵, which would increase the deficit (based on the supply identified in the Regulation 19 version of the Sevenoaks Plan) of 2,030 dwellings.

2.21 The situation is therefore materially worse in terms of unmet need arising from Sevenoaks and the Council has done nothing to consider addressing even part of this since signing the SoCG in May 2019 (2 years ago). The Council cannot therefore possibly argue that it has met the key Statutory DtC obligation of working constructively, actively and on an on-going basis with Sevenoaks.

2.22 For this reason alone the Plan has failed the Legal Compliance test and cannot proceed to submission in its current form. In fact the Council will probably need to undertake a further Regulation 19 consultation in due course when this fundamental failure has been rectified and before proceeding to the submission stage.

Tonbridge and Malling:

2.23 There is no recorded need arising from Tonbridge and Malling that the Council should consider addressing as part of the Plan. The DtC Statement and the accompanying Memorandum of Understanding ("MoU") is incredibly light on its content in relation to cross boundary discussions.

2.24 This is particularly concerning given the significant cross boundary issues associated with the Tudeley Village proposal that would be heavily dependent upon services, facilities and other key infrastructure that is situated over the administrative boundary in Tonbridge and Malling Borough.

2.25 It is perhaps telling that Tonbridge and Malling Borough intends to object to this consultation specifically in relation to Tudeley Village. Furthermore the response prepared by Tonbridge and Malling Borough Council states that a SoCG is to be returned by 04 June 2021⁶. The absence of that document from the evidence base during the current Regulation 19 consultation is yet a further example of the failure in terms of Legal Compliance.

2.26 The key considerations raised by Tonbridge and Malling Borough Council in relation to infrastructure and mitigation measures arising from Tudeley Village also go to the Soundness of the Plan as drafted. These are matters that need to be addressed in full and before the Plan proceeds to the submission stage.

2.27 As a further serious concern in relation to the DtC is the fact that the Inspectors appointed to examine the Tonbridge and Malling Local Plan have written to the Council in January 2021 (see copy attached at **Appendix 5**) to confirm their view that there is a fundamental failure of the DtC such that the Examination cannot proceed.

This is yet another example of the problems facing the Council with this Plan in relation to DtC and the serious consequences of not addressing this matter now and before the Plan proceeds to submission.

Rother District Council:

2.28 The SoCG in Appendix A5 of the DtC Statement confirms that Rother District Council is not yet able to confirm if it can meet its own need. This SoCG was signed in October 2020 and no update on that position appears to have been sought or provided by Rother District. The Council cannot therefore say with any certainty whether the issue of unmet need arising from Rother District has been fully explored.

Wider Issues in Terms of Unmet Need:

2.29 Given the interrelationship between the Borough and London, particularly in relation to rail connectivity and the consequent economic connection, which is articulated in the Economic Development Topic Paper (March 2021) and the Travel to Work Area in Appendix 1 in particular the Council appears not to have given any consideration to the potential for unmet need arising from London and whether the Plan should seek to be addressing some of that need.

2.30 In fact the DtC Statement is silent insofar as discussions with any London Boroughs is concerned.

2.31 Although not a fundamental failure this is considered to contribute to the overall failure in terms of Legal Compliance at this Regulation 19 consultation stage.

2.32 The above failures cannot be rectified retrospectively and the Council therefore needs to take action now and then rerun a fresh Regulation 19 consultation in order to avoid the situation that Sevenoaks and other authorities in the locality have found themselves in recently. Indeed Crawley Borough Council is currently undertaking a second Regulation 19 consultation, partly due to gaps in its evidence base and Legal Compliance failings identified during the first Regulation 19 consultation for its emerging Local Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

5.0 Areas Where Changes are Required for Plan to be Legally Compliant and Sound

5.1 In order for the Plan to be found Sound and Legally Compliant there are a number of fundamental changes required:

5.1.1 **Change 1 – Legal Compliance:** The Council MUST revisit the DtC specifically (but not only) in relation to Sevenoaks and explore the opportunity for meeting at least some of the unmet need arising within the Plan. Once complete the evidence of active and ongoing engagement MUST be published alongside a fresh Regulation 19 consultation version of the Plan.

5.1.2 **Change 2 - Soundness:** There is a need to revisit the minimum housing requirement in the Plan in line with the evidence base and in particular dealing with unmet need and the worsening affordability in the Borough.

5.1.3 **Change 3 - Soundness:** The Council must revisit its housing delivery strategy and address the clear shortfall in supply across the whole Plan period and particularly within the first 5-years through the allocation of more sites that are ready and able to deliver in the early part of the Plan period.

5.1.4 **Change 4 - Soundness:** The Council must revisit its Green Belt Study and Landscape Sensitivity Assessment specifically in the context of Five Oak Green because the current approach taken in the Plan does not reflect that evidence base i.e. Rydon's Promotion Site comprises a suitable location for release from the Green Belt as part of a coordinated strategy for creating robust boundaries that will endure in the long term.

5.1.5 **Change 5 – Soundness:** The Council must revisit the Plan Strategy and its Key Evidence Base in relation to Tudeley given the lack of evidence to support the delivery rate relied upon by the Council combined with the lack of support in the current evidence base for the release of this site from the Green Belt and the fact that the immediate neighbouring authority Tonbridge and Malling Borough Council is raising objection to the unacceptable pressure the proposed development would have on infrastructure, services and, facilities located outside of the Plan area. In short terms there are significant concerns in relation to the capability of Tudeley to deliver a sustainable form of development in the timeframe required by the Council. As currently prepared the Tudeley allocation is Unsound.

5.1.6 **Change 6 – Soundness:** Rydon's Promotion Site should be allocated for approximately 140 no. dwellings capable of delivery in the first 5-years of the Plan period alongside a package of wider material planning benefits.

5.2 Unless the above changes are made the Plan will fail the Legal Compliance Test and will not be found Sound at Examination.

5.3 Rydon will take an active part in any future Examination to progress the matters raised in these Representations in the context of the issues raised by the Inspector in due course. In the meantime Rydon would welcome the opportunity to discuss its Promotion Site with the Council.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The matters raised in these Representations cover a number of fundamental issues that go to the heart of the Plan's soundness and in particular its legal compliance. These matters will need to be explored in the relevant hearing sessions at the Examination in order to assist the Inspector in understanding the nature and extent of the concerns raised by Rydon Homes Limited.

In addition, there are a number of matters raised that are of a technical nature and relate to the Council's evidence base. These matters will also need to be explored in the relevant hearing sessions at the Examination.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See attached Representation Documents

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation	Ashley Saunders
---------------------------------------	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

All

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Don't know
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I believe the plan is poorly prepared and seeks an easy way out by promoting large development using land offered en-mass rather than using up land which lends itself suitably to development all across the borough. There are many brown field sites mentioned within the report but are ignored in favor of huge developments in which only a few land owners stand to profit. This also does nothing to solve the overcrowding and congestion already faced in the western part of the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This can be overcome by looking at the many brownfield sites all across the borough and also look at the eastern parts of the borough where space is not so much of a premium and there is not so much overcrowding and congestion in the area as a whole.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy No(s) STR1, STR2, STR3, STR4, STR7, STR8, STR9, STR/SS1, STR/SS2, STR/SS3, EN4, EN5, EN8, EN18, STR/CA 1

[TWBC: for comments related to each of these specific policies, please see Comment Numbers PSLP_1973-1987]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extracts are from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

1. Executive Summary

1.1. This representation is made by the Save Capel Executive on behalf of members and supporters. In preparing this representation, the Save Capel Executive has been assisted and advised by the members and supporters of Save Capel, specialist transport and environmental consultants as well as specialist planning Counsel and solicitors.

1.2. We are seeking modifications to the Plan, and through this Save Capel confirms its willingness to participate in the subsequent stages of the local plan's review and wishes to make formal representations in the oral parts of the examination at the Inspector's request.

1.3. We submit that the PSLP and its supporting evidence base fails on both **legal compliance** and tests of **soundness**:

(1) TWBC has not met its **Duty to Cooperate** with adjacent authorities, because of the lack of constructive and ongoing dialogue concerning housing need and cross border issues affecting the location of housing and provision of the necessary infrastructure.

(2) The consultation in respect of this pre-submission draft has not been undertaken in compliance with the **Statement of Community Involvement** and appears to have failed to have due regard to its duty under s.149 of the Equality Act 2010.

(3) There has not been an adequate assessment of alternatives and the **Sustainability Assessment** is seriously flawed.

(4) The Plan fails the test of **soundness** on a significant number of counts:

i. It is not positively prepared, being based on an unsustainable spatial strategy, which places the largest amount of development in the north west corner of the Borough (at Tudeley and East Capel), where local housing need has not determined the overall target.

ii. It is not justified, as it is not the most appropriate strategy, where reasonable alternatives have not been adequately assessed, and the evidence base contains inconsistencies and conflicts internal to the Plan. The strategy does not bring benefits that outweigh costs to the community (the balanced test of sustainability has not been properly applied).

iii. It is not effective, posing substantial risks by relying heavily on two strategic sites in unsustainable locations. The Infrastructure plan is inadequate and does not meet the substantial needs and is based on inconsistent evidence. It is not deliverable.

iv. It is not consistent with the National Planning Policy Framework (NPPF), taking only selective evidence to demonstrate compliance, in particular with respect to the largest strategic site (Tudeley). The evidence base is lacking in many areas and 'Exceptional Circumstances' to release vast areas of Green Belt for housing are not justified.

1.4. This representation explains these general points, and many others, in more detail and is structured to assist the review process. Arguments are presented policy by policy with detailed supporting evidence also provided as appendices which form part of this submission.

1.5. Save Capel recognises the need for a local plan but requests that TWBC reconsiders the development strategy and prepares a modified (and sustainable) plan which delivers an appropriate level of housing and addresses the issues identified in this representation.

1.6. Whilst it is for TWBC to determine its local plan, it should meet the needs and have the support of the community. Save Capel has identified a number of alternative strategies which are summarised in Section 8.

2. Legal Compliance

Co-operation with neighbouring authorities

2.1. We are not satisfied that TWBC has fully met (if met at all) the duty to co-operate with the authorities and groups set out in TWBC's March 2021 "Duty to Co-operate Statement for Pre-Submission Local Plan" ("DCSPS") in the way in which paragraphs 24-27 of the NPPF envisage TWBC to engage in and maintain effective cooperation.

2.2. We are particularly concerned that the Duty to Co-operate has not been met with Maidstone Borough Council. The recently signed Statement of Common Ground ("SoCG") (March 2021) appears to be nothing other than a "tick box" exercise in which Maidstone Borough Council's refusal to consider meeting any of TWBC's need was accepted without proper scrutiny by TWBC. It states on page 8 that "An initial response was issued by MBC in December 2020. *This stated that MBC could not accommodate any of TWBC's need, as it was proving very challenging to accommodate the extra homes needed until 2037, necessitating growth to be focused on two 'garden communities'... TWBC accepts this position and has progressed to include allocations across the borough, including within*

the AONB and Green Belt, in order to meet its own local housing needs. MBC welcomes the fact that TWBC is meeting its housing need in full, and similarly expects to meet its housing need in full."

2.3. The Duty to Co-operate involves more than a mere "tick box exercise". It requires positive and active engagement with neighbouring authorities (and other groups). It is difficult to understand why, when a Housing Market Area is shared with another Borough, that Borough cannot meet at least some of the need from the adjoining Authority's area. The DCSPS appears to do nothing more than rehearse and repeat in essence the refusal of other authorities to meet some of TWBC's housing need. It does not explain why it did not do more to challenge and scrutinise those refusals.

2.4. It will, of course, be for TWBC to satisfy the Planning Inspectorate that the Duty to Co-Operate has been met when we have seen little evidence of a pro-active approach to the Duty to Co-operate being followed – particularly in respect of the potential impacts that Policies STR/SS 1 and STR/SS 3 will have on the neighbouring authority (Tonbridge and Malling Borough Council) in terms of increases in pollution (and other environmental impacts), traffic, congestion and a need for sufficient infrastructure to be provided to support (and ensure the sustainability of) the developments proposed in STR/SS 1 and STR/SS 3 if the draft local plan is submitted for examination, but we have seen very little to date to demonstrate this to have been the case.

2.5. We await, with interest, how the authorities and groups identified in the DCSPS will respond to this consultation and how they consider TWBC has engaged with them in respect of the Duty of Co-Operation – noting the above. In that regard, the Save Capel Executive reserves the right to provide a further short submission or to raise this issue during the examination if appropriate to do so.

Community engagement

Information on, and the form of, the Consultation

2.6. Since the Reg.18 consultation, the preparation of this pre-submission draft of the Local Plan has been mainly undertaken during a time when much of the UK has been operating under unprecedented restrictions on contact outside of the home. At the time of drafting this representation, the country is still operating under restrictions, with these not being "fully" lifted until 21st June 2021. Whilst the UK Government has encouraged LPAs to continue plan making activities during the pandemic, this poses difficulties in being able to demonstrate effective community engagement in respect of this Reg.19 consultation.

2.7. At the Reg.18 stage, TWBC undertook the Reg 18 consultation by providing information on that version of the local plan and the consultation process through postal correspondence, posters within the town centre, summary leaflets and articles within local magazines, physical borough wide exhibitions, local media and electronic consultation. Due to the COVID-19 pandemic it has not been possible to undertake as thorough an exercise as that carried out at the Reg.18 stage. This is recognised in the Statement of Community Engagement (dated October 2020) at Section 3.0: Consultation Techniques for Local Planning Documents. This move away from the more traditional means of engaging with the Community due to the COVID-19 pandemic towards an almost entirely internet-based consultation undoubtedly means that a proportion of the Community (including those who are considered to have protected characteristics under the Equality Act 2010) will either be unable to, or feel unable to, engage fully with this consultation or the documents now being consulted on. This is an issue that could and should have been avoided.

2.8. On 22nd February 2021, the UK Government published the "Roadmap out of Lockdown"¹. This made it clear that it was anticipated that by 17th May 2021, the restrictions on social contact would be eased, outdoor spaces would reopen, together with non-essential retail and public buildings. This would have allowed TWBC the opportunity to run an information campaign more akin to that which it ran for Regulation 18 from the dates at which restrictions started to be lifted. The Roadmap also makes it clear that the target date of 21st June 2021 has been set to remove all further limits on social contact.

2.9. This consultation started on 26th March 2021 and runs until 4th June 2021. A better, fairer approach that would undoubtedly ensure wider community engagement would have been to have delayed the start of the consultation and use the easing of restrictions to build up towards a more traditional consultation process. It is noted that TWBC has run the consultation for 10 weeks, but with a more inclusive approach to consultation, a shorter consultation running slightly beyond 21st June 2021 would have shown more of a concern for Community Engagement. It is clear (from the October 2020 Statement of Community Involvement) that TWBC set the approach it intended to follow towards the end of 2020 and did not pause to consider the Roadmap set out in February 2021 and adjust its approach to

consultation accordingly. This is clearly not an example of a Local Authority keeping an eye on its duty under s.149 Equality Act 2010 as the circumstances under which a consultation such as this could be conducted changed significantly.

2.10. Further, it should be noted that a number of “technical” issues have arisen in respect of the consultation – potentially to the detriment of those attempting to negotiate the material and make a submission. Those involved in drafting this submission are aware of, and indeed raised with TWBC, the fact that hyperlinks within the documents were not working (notably the SHELAA and Sustainability Appraisal) and maps had been published online in a low, and poor, resolution. This further undermines the accessibility and effectiveness of this form of consultation.

Engagement with Save Capel and Capel Parish Council

2.11. Given Capel Parish Council and Save Capel have been raising concerns about the proposals now set out in STR/SS 1, STR/SS 2, STR/SS 3 and STR/CA 1 TWBC's proactive engagement with both groups has been woefully inadequate. Minutes of TWBC's Planning Policy Working Group were kept confidential, information when it was provided publicly was often quickly discovered to be inaccurate, misleading or incomplete, requests for release of information under the Freedom of Information Act 2000 and the Environmental Information Regulations were repeatedly refused.

2.12. Further it is notable that both CPC and later Save Capel (which was formed in June 2019), were more often than not the driving force in arranging engagement with the Parish and the Local Community. Often it was felt that those who attended the meeting from the Local Community, representatives of the Parish Council and Save Capel were able to articulate clear and constructive issues with what was being proposed and suggest solutions and alternative. It was only after these points had been made that it was clear that those who attended on behalf of TWBC or those looking to bring forward proposed development had no intention of seriously considering the points raised, addressing them or engaging meaningfully with the Local Community.

2.13. Further, what little effort was made by TWBC or those looking to bring forward development to set up what few engagement exhibitions and workshops they could run towards the end of 2020 were again so meaningless in the terms of the level of information provided, the number of people who could attend, or the ease with which they could attend to render them almost pointless.

2.14. Further, when it became apparent that the Consultation was to run during the pre-election period of sensitivity and in the period after the Local Elections during which a Parish Council is not formally constituted, Capel Parish Council raised concerns (through its appointed solicitors) directly with TWBC that (potentially) limited time that would be available for the incoming Parish Council to respond meaningfully to this consultation. This clearly a very serious issue in respect of community engagement with a Parish Council, was simply rebuffed on an unintelligible basis.

Conclusion on the Consultation Carried Out

2.15. The approach to consultation in respect of this pre-submission draft has not been undertaken in compliance with the Statement of Community Involvement – the above demonstrates notable breaches of TWBC's “values for community involvement” at paragraphs 1.9 – 1.12 and Section 2.

2.16. Further, by insisting on maintaining an approach to consultation last reviewed in October 2020 and failing to adjust that approach in light of the changing circumstances in the UK from February 2021 onwards, TWBC appears to have failed to have due regard to its duty under s.149 of the Equality Act 2010 and followed a process that potentially “locks out” a proportion of the local community who were unable to engage fully in an online consultation, but may have been able to have done had a consultation exercise been run in a similar (or more similar) way to that which was carried out at Regulation 18.

2.17. Our topic paper which provides full detail on Community Engagement is included as Appendix 7.

Appendices

The following appendices are to be read in conjunction with this main representation. The documents are submitted separately due to file sizing and integrity.

All these documents will be available on our website www.savecapel.com

Independent reports from planning consultants -

(1) Transport & Infrastructure Review prepared by **Motion Consultants Ltd**

- (2) Motion sub-appendix A - B2017 Swept Path Analysis
 - (3) Motion sub-appendix B - Road Collision Locations
 - (4) Motion sub-appendix C - Public Transport Accessibility
 - (5) Motion sub-appendix D - Walk Catchment

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see attached: "Representation by Save Capel under Regulation 19", dated 3rd June 2021, and Appendices

[TWBC: the following extract is from "Representation by Save Capel under Regulation 19" - for the full representation and appendices, please see supporting documents]

8. How the Local Plan can be improved

8.1. TWBC should make significant changes to the current draft of its Plan; both from the top-down perspective to review its housing target (OAN) for constraints, and bottom-up in eliminating its reliance on two unsustainable strategic sites as the main vehicle for delivery (Policy STR 1).

Specifically, therefore, Save Capel's two **primary recommendations** are;

(1) The housing target within the Plan should be modified by;

- a. Updating the SHELAA and recalculating the OAN using latest government statistics. Please refer to our topic paper on 'housing need' Appendix 9.
- b. Assessing the proportion of AONB, Green Belt and land subject to flood risk to determine and justify a lower and sustainable housing need.
- c. Re-assessing the level of windfall sites in the Plan based on the changes in office and commercial need post-covid over the Plan period. Recent changes in legislation have promoted the change of use of urban sites to residential.

(2) The Spatial Strategy should be revised to remove the two Strategic Sites in Capel parish (Policies STR/SS 1 at East Capel and STR/SS 3 Tudeley Village) and to;

- a. Conduct a comprehensive review of brownfield site availability, particularly taking account of the increasing empty office and retail space available as well as open plan car parks. Save Capel's assessment of Brownfield sites is included in Appendix 8.
 - b. Adjust the housing allocation to sites that are spread around the Borough more proportionately and equitably (in terms of true local need); for example, by utilising smaller brownfield sites for housing rather than reserving them for industrial use that is surplus to the requirements identified in the Plan.
 - c. Review other small sites for housing rejected by the SHELAA for possible inclusion in the Plan with a view to achieving (b) above, and prioritising sites that are accessible to railway lines and trunk roads.
 - d. Re-consider the location of larger development as set out in Save Capel's topic paper 'Alternative Sites' - appendix 8 which identifies a number of sustainable alternatives.
 - e. Develop a more fully researched, funded, and programmed Infrastructure Delivery Plan that assesses the cumulative impact with the developments in the local plans of neighbouring LPAs. This may mean that the OAN would need to be reviewed further to ensure the delivery of a sustainable Plan.
- 8.2. In summary, there are a number of sustainable alternative strategies that would meet a truly 'objectively assessed' housing need and avoid the need to destroy over 600 acres of largely productive Green Belt land in Capel parish. This historic landscape does not need to be ruined forever.
- 8.3. We urge Tunbridge Wells Borough Council to pause the progression of this local plan and take the time needed to prepare a modified (and sustainable) plan which delivers an appropriate level of housing and addresses the issues identified in this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Save Capel has sought to be actively involved in engaging with the Council throughout this review of the Local Plan. As a group we have developed particular expertise and have undertaken significant and extensive research in respect of the effects of the policies to which we have made representations. We consider that we will be able to assist the Inspector(s) examining the final submission significantly.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

2.18. There has not been an adequate assessment of alternatives.

2.19. The issue of "reasonable" alternatives is best considered at two levels: first, in respect of how the growth strategy was selected, and second, in how the particular locations for growth were identified (i.e., the strategic site locations).

Selection of the growth strategy

2.20. The original Issues & Options SA identified 6 growth strategies ("GS"), none of which mentioned

Tudeley/Capel specifically as a site for a potential garden town. GS5 was described as “New freestanding garden settlement. There is no location identified with this option. A new settlement could be located anywhere within the borough.”

2.21. The Reg 18 SA identified two further strategies (see Table 12) on page 36. It concluded that: “The Final Interim SA showed that there were merits in in all strategy options, although Option 5 New Settlement Growth had the highest number of positive scores and lowest number of negative scores. This option, which has been taken to embrace an enlarged town or village based on garden settlement principles as well as a new freestanding garden settlement, is therefore proposed to be integral to the preferred development strategy for the borough.” (page 40).

2.22. The Reg 18 SA then went on to consider 13 alternative sites for the garden settlement and urban extension (on page 37). However, all but 2 sites (Paddock Wood and Tudeley) were ruled out and were not subject to any further sustainability appraisal, on the grounds primarily of landscape and impact on the AONB.

2.23. The draft Reg 19 SA now identifies and sets out how “13 growth strategy options were considered in the SA.”. Option 3 is the one that now appears in the Reg 19 Local Plan and states that it “includes a large PW extension and new garden village at Tudeley”.

2.24. Therefore, between Reg 18 and Reg 19, TWBC developed 13 different growth strategies (i.e. the original 6 growth strategies were expanded to 13). The preferred strategy was identified as GS3 (see page 48) i.e. the large PW extension and garden village at Tudeley.

2.25. Each of those 13 growth strategies were assessed - the table 26 at page 84 sets out the comparative scores/grading system.

2.26. The Reg 19 SA concludes that “it is clear from this exercise that the Pre-Submission Local Plan is preferable to the alternatives identified) at para. 6.2.18 (page 85).

2.27. The first point to note here is that it does not seem as clear as the SA suggests. There are five unknowns in relation to GS3, and it is not immediately apparent looking at Table 26 why for example GS4 (Main Towns) has not been preferred.

2.28. The SA of GS3 (i.e. what now forms the Reg 19 Local Plan) is entirely unclear as to why for example noise and travel gets a “highly mixed score”: see the critical assessment on page 58. It repeats the wording “negative impacts in rural settlements and positive impacts in urban areas”. At least on the face of it, the reasons for that score are unclear, which means in turn that reasons for the selection of GS3 as the preferred option are unclear.

2.29. This gives rise to grounds to credibly argue that the SA is inadequate as the outline reasons for selection of GS3 are unclear.

Strategic site locations

2.30. The table at page 89 – 90 (Table 27) is the critical table as this sets out why the only locations considered suitable for a garden extension and urban extension were considered to be Capel (Site 2) and Paddock Wood (Site 12). In essence, all other sites were ruled out as “reasonable alternatives” and not subjected to SA, mainly on the grounds of location within the AONB and unacceptable landscape impacts.

2.31. It was unreasonable to do so and not consider these sites as reasonable alternatives.

2.32. The first criticism relates to the “filtering” stage that was carried out. It is evident in Table 27 that it was unreasonable for certain sites were dismissed as “non-starters” and at the very least some of the sites should have been taken forward and actually subjected to sustainability appraisal.

For example, and in particular:

a. it is not clear why Frittenden was ruled out on sustainability grounds without actually having been tested via a sustainability appraisal.

b. Nor is it clear why Horsmonden was viewed as a “non-starter”.

2.33. Neither of these sites were ruled out on AONB grounds but rather on inadequate transport accessibility links (Horsmonden) and lack of direct transport links (Frittenden). Whilst these may be the case, it is not immediately apparent (at least on the face of the SA) whilst those made these particular sites “non-starters”.

2.34. The second point is that the AONB designation has been used “carte blanche” to rule out several other options, without even taking them through to full sustainability appraisal.

2.35. However, the fundamental purpose of an SA is not to apply national policy requirements but instead to consider the environmental effects of a plan. Therefore, at the very least a more granular assessment of the landscape impacts should have been carried out within the SA notwithstanding the AONB designation rather than apply a carte blanche “severe” rating to all the proposals within the AONB. They must for example necessarily have had different landscape impacts within the AONB (Castle Hill being a case in point for example).

Sustainability Appraisal for Tudeley Village & Paddock Wood / East Capel

2.36. The Sustainability Appraisal of each site is based on 19 sustainability objectives (“SO”). Each objective is supported by 2-5 detailed and specific decision-aiding questions. In total there are 62 sub-questions based on a mix of subjective and objective criteria.

2.37. Working through these granular 62 sub-questions should result in a reasonably objective and transparent Sustainability Appraisal for each site.

2.38. There are two separate Sustainability Appraisals published for Tudeley Village and Paddock Wood / East Capel. Both are high-level assessments at the 19 strategic objective level – there is no link to nor any evidence of an assessment at the 62 sub-question level for either site!

2.39. Validating the Sustainability Appraisals for Tudeley Village and Paddock Wood / East Capel and considering the 62 sub-questions yields a fundamentally different outcome to TWBC’s proposal in both cases: TWBC results appear to be entirely unreasonable and unsound.

[TWBC: for table, please see full representation attached as a supporting document]

2.40. For Tudeley Village - in summary at the 19 SO level (also see table above):

TWBC proposes 10 positive, 3 neutral and 6 negative scores

A bottom-up assessment reveals 4 positive, 1 neutral and 14 negative scores

2.41. For Paddock Wood / East Capel - in summary at the 19 SO level (also see table above):

TWBC proposes 10 positive, 3 neutral and 6 negative scores

A bottom-up assessment reveals 3 positive, 3 neutral and 13 negative scores (for East Capel only)

2.42. We respectfully submit that TWBC’s assessment of both sites is flawed, illogical and not defensible when assessing the underlying criteria.

2.43. On a side note: It is curious that in TWBC’s assessment both sites are rated with near identical scores across all criteria. While this is possible in theory, it is - given the differences between both sites - statistically-speaking highly unlikely. We cannot prove and only speculate on whether this is indicative of a pre-determined answer being approved due to its convenience. However, we can unequivocally state that TWBC’s assessment of both sites is superficial and simply wrong.

2.44. For a more detailed comparison and an evidence-based rationale for each score at the 62 sub-question level please refer to the ‘Alternative Sites Report’ in Appendix 8.

Sustainability Appraisal for Alternative Selected Sites

2.45. As mentioned under 2.22, TWBC considered several other strategic sites that – in our view mistakenly – were ruled out earlier in the plan-making process.

2.46. As a result, TWBC did not conduct a sustainability appraisal for any of these sites. There are no published sustainability results, neither at the 19 SO nor at the 62 sub-questions level for any site.

2.47. Given the flawed assessment and poor sustainability scores for Tudeley Village and East Capel, Save Capel decided to reinvestigate these sites as potential alternatives.

2.48. Given Save Capel’s limited resources we decided to focus on 2 specific sites – Castle Hill (also located in Capel Parish) and Blantyre House.

2.49. In summary at the 19 SO level (see table below):

A bottom-up assessment for Castle Hill reveals 7 positive, 7 neutral and 5 negative scores

A bottom-up assessment for Blantyre House reveals 8 positive, 6 neutral and 5 negative scores

2.50. A comparison to Tudeley Village and East Capel reveals that both alternative sites are far more sustainable and preferable. Castle Hill in particular feels like a – more sustainable – direct replacement for Tudeley Village.

2.51. We also strongly suspect that some of the other strategic sites such as Horsmonden would also turn out to be more sustainable than Tudeley Village and / or East Capel if subjected to a detailed, objective review. Unfortunately, this was not conducted by TWBC and Save Capel does not have the resources to replicate the analysis for all sites in time for Regulation 19.

2.52. For the assessment and an evidence-based rationale for each score at the 62 sub-question level for Castle Hill and Blantyre House please refer to the ‘Alternative Sites’ report in Appendix 8.

[TWBC: for table, please see full representation attached as a supporting document]

2.53. Key findings from Save Capel’s ‘Alternative Sites’ report are:

The Sustainability Appraisals for Tudeley Village and East Capel are unreasonable based on TWBC’s own criteria and any objective assessment

The Sustainability Appraisals for Tudeley Village and East Capel are inconsistent with the assessments of other SHELAA/strategic sites

Both Castle Hill and Blantyre House are more sustainable sites offering a similar housing potential as Tudeley Village / East Capel

Of the 437 unique sites submitted for inclusion in the SHELAA process, 323 sites were rejected by TWBC.

Based on a review of 90 rejected sites in 3 representative parishes, we recommend to re-consider 43 'rejected' sites for inclusion in the Plan INSTEAD of Tudeley Village / East Capel.

These 43 sites provide a total incremental housing potential of ca. 2,270 units (based on a conservative 30 dph). All are more sustainable than Tudeley Village / East Capel.

An analysis of 7 selected high potential sites reveals a potential housing yield of up to 10,000 dwellings through the use of alternative housing solutions.

Question 1	
Respondent's Name and/or Organisation	Simon Harkins, SGN
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

General comments on whole Plan.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

From reviewing the Pre-Submission Local Plan and other provided documents, my only comments at this time are in relation to the Site Allocations. Below is a summary and a bit more information you may find of use.

NETWORK OVERVIEW

All sites reviewed should be in a location where the gas network is close by, so the initial physical connection to the system should not be a problem.

Gas demand for the Site Allocations was estimated based on the number of dwellings. This was then added and analysed on our Network Analysis Model. From the review I found that the Intermediate Pressure (IP) and Medium Pressure (MP) tiers of the network are relatively robust in Tunbridge Wells and *at this time* the addition of the proposed sites did not pose a risk to the operation of the system or the capacity on these gas tiers.

Please note:

- . Reinforcement of the existing Low Pressure (LP) network may be necessary to support development on this scale, dependant on the site demand and the final point of connection to SGN's network. This will usually only be known when a connections enquiry/request is made.
- . SGN are unable to book capacity and the above assessment does not guarantee the availability of future capacity which is offered on a 'first come, first served basis'.
- . The UK Governments plan to stop all domestic connections to the gas network post 2025 was partly taken into consideration, please be aware of this possible new regulation.

STATUTORY OBLIGATIONS

Where required, SGN will look to manage the provision of any off-site infrastructure improvements, in line with the overall development growth and / or timescales provided. The full extent of these works will be dependent on the nature and location of the requested load(s), potentially requiring LP reinforcement in addition to that required for the IPMP networks and will only become clear once a developer's request has been received. Reinforcement solutions are likely to involve the provision of a new pipeline in parallel to SGN's existing mains system but may also include the installation of above ground apparatus involving land purchase.

As this is a high-level assessment and response, the information provided is indicative only and should be use as a guide to assist you on your assessment. While information obtained through consultation and / or engagement on Local Development Plans is important to our analysis, it only acts to identify potential development areas. Our principle statutory obligations relevant to the development of our gas network arise from the Gas Act 1986 (as amended), an extract of which is given below:-

Section 9 (1) and (2) which provides that:

9. General powers and duties

(1) It shall be the duty of a gas transporter as respects each authorised area of his:-

(a) to develop and maintain an efficient and economical pipe-line system for the conveyance of gas; and

(b) subject to paragraph (a) above, to comply, so far as it is economical to do so, with any reasonable request for him -

(i.) to connect to that system, and convey gas by means of that system to, any premises; or

(ii.) to connect to that system a pipe-line system operated by an authorised transporter.

(1A) It shall also be the duty of a gas transporter to facilitate competition in the supply of gas.

(2) It shall also be the duty of a gas transporter to avoid any undue preference or undue discrimination -

(a) in the connection of premises or a pipe-line system operated by an authorised transporter to any pipe-line system operated by him; and in the terms of which he undertakes the conveyance of gas by means of such a system.

SGN would not, therefore, develop firm extension or reinforcement proposals until we are in receipt of confirmed developer requests.

As SGN is the owner and operator of significant gas infrastructure within the area and due to the nature of our licence holder obligations;

- . Should alterations to existing assets be required to allow development to proceed, such alterations will require to be funded by a developer.
- . Should major alterations or diversions to such infrastructure be required to allow development to proceed, this could have a significant time constraint on development and, as such, any diversion requirements should be established early in the detailed planning process.

SGN would therefore request that, where the Council are in discussions with developers via the Local Plan, early notification requirements are highlighted.

Additionally, SGN are aware of the advances being made in renewable technologies, especially those related to the production of biomethane. Should any developer be proposing to include such technology within their development, then we would highlight the benefits of locating these facilities near existing gas infrastructure. Again, where the Council are in discussions with developers via the Local Plan, we would hope that these early notifications requirements are highlighted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Taylor Wimpey
Question 2	
Agent's Name and Organisation (if applicable)	Turley
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Pre-Submission Local Plan

[TWBC: this representation has been input against the Pre-Submission Local Plan as a whole, Policies STR 1, STR 7, STR/SS 1, STR/SS 3, STR/CRS 1, AL/CRS 3, PSTR/HO 1, EN 2, EN 9, EN 14 and EN 26– see Comment Numbers PSLP_1772, PSLP_1813, PSLP_1818, PSLP_1819, PSLP_1820, PSLP_1821, PSLP_1823, PSLP_1824, PSLP_1825, PSLP_1826, PSLP_1827, and PSLP_1828. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Legal Compliance and Duty to Co-Operate

Sustainability Appraisal (TWBC, February 2021)

Table 12. Updated growth strategy options for the Local Plan considered by this SA.

This table summarises the reasonable alternative options TWBC have tested through the SA process to arrive at, '*an appropriate strategy.....based on proportionate evidence;*' (Paragraph 35, NPPF). Option 11 seeks to assess the implications for accommodating uncapped local housing need and the unmet needs from Sevenoaks District. The latter is acknowledged to be in the order of 1900 homes. However, rather than exploring the most sustainable options to distribute this additional growth, including to the main towns and large villages, TWBC assess a distribution consistent only with Option 9 (Dispersed Countryside). This understandably leads to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan. At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss this as a reasonable alternative. The same evidence is then used to justify why TWBC are unable to assist meeting acknowledged

unmet needs for housing in the area (see our comments on the Duty to Cooperate Statement below). Our client contends that distributing unmet needs solely in line with Option 9 is not a reasonable alternative. It appears only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as an 'appropriate strategy'.

We contend the Council ought to have explored distribution options for unmet needs more objectively, including an assessment of the contribution that more sustainable settlements could make to this. For example at Cranbrook, which is ranked second only after Southborough in the Councils 'Settlement Role and Function Study' (TWBC, Feb 2021). The outcome of the SA process therefore cannot be relied upon to conclude Option 13 is an appropriate strategy, as it has not taken *'into account the reasonable alternatives'*, contrary to paragraph 35 of NPPF and the corresponding SEA Regulations requiring such alternatives to be 'reasonable'. In its current form therefore the Local Plan is not in our view legally compliant. The SA and Local Plan should be updated to address such matters, with an additional round of consultation held prior to its formal submission.

As we outline in our comments on the Duty to Cooperate Statement (TMBC, 2021), there are additional unmet needs that TWBC arguably ought to have accounted for in the reasonable alternatives, tested through the SA process. For example, in the SHMA the Council commissioned as far back as 2015, GL Hearn advised Sevenoaks and Tunbridge Wells Councils *'to engage with the Greater London Authority and London Boroughs in respect of any unmet needs arising from London.'* (Paragraph 2.72, Sevenoaks & Tunbridge Wells SHMA, GL Hearn, 2015). No mention is made to this in any of the reasonable alternatives tested through the SA process.

As we outline in our comments to Policy STR1, in addition to the unmet needs of adjoining LPAs, there are equally compelling grounds to test higher housing requirements as reasonable alternatives to SA Option 13. Firstly to help address affordable housing needs that are evidently not being met by the proposed PSLP housing requirement; and secondly to build in further contingency into the boroughs housing land supply to ensure a continuous supply of housing is delivered, particularly in the first five years of the plan period. We contend the delivery expectations for the two proposed strategic site allocations, which between them account for between 67-69% of new allocations proposed in the Local Plan, are wholly unrealistic and contrary to the evidence we reference. Additional allocations capable of being delivered within the first five years of the plan period are therefore strongly recommended to ensure the plan is both positively prepared and effective.

We suggest that TWBC revisits the SA process to objectively assess reasonable alternatives to meet such needs, including around more sustainable settlements such as Cranbrook. In this respect, we note at Table 53 of the SA, that SHELAA Ref: 25 is listed as a 'reasonable alternative site' at Cranbrook.

Table 53. List of reasonable alternative sites in Cranbrook and Sissinghurst Parish

If one compares the assessment of Site 25 at SA Appendix J (Page 317) with the assessments of the proposed allocation sites at Table 54 (SA Page 153), it is evident that Site 25 outperforms 4 of the 7 allocations proposed. The commentary provided at Table 54 states that, *'where sites were not allocated but had a better range of scores than the allocated sites, there were frequently reasons outside of the SA remit to consider for example highway problems, access issues or deliverability concerns within the plan period e.g. site 409. (our emphasis)*

Further commentary can be found in Appendix J.'

However, if one examines and compares the individual site assessments in SA Appendix J, the grounds for exclusion of Site 25 in favour of others is even less evident. No mention is made in the summary of Site 25 to any 'highway problems, access issues or deliverability concerns' (our emphasis) that would lead one to conclude that Site 25 is not suitable, or performed worse than those proposed for allocation and listed above. Indeed, as is evident at Figure 14 (Page 152) of the SA, and from site visits, Site 25 is well contained, is partially within the built up area and is well located to reduce the need to travel. Yet, as we elaborate on below, the accompanying SHELAA (TWBC, Jan 2021) has since added references to highway matters to justify the exclusion of this site without citing evidence or grounds to substantiate this.

As we highlight below, there are fundamental flaws and errors in the way TWBC have assessed SHELAA Site 25 as a reasonable alternative against others, particularly those proposed for allocation, through both the SA and SHELAA site selection process. This has led to the unjustified omission of Site 25 in our view. Rather than informing 'an appropriate strategy' for Cranbrook, the site selection process appears instead to have been designed with a pre-determined outcome in mind. This is even

more evident if one examines and compares the published SHELAA for 2019 and 2021, where factual errors, poorly evidenced statements and inconsistent assessments are noted. These are matters we have sought to highlight to TWBC throughout the drafting stages of the Local Plan; and as outlined below, in meetings with TWBC in February 2021.

In February 2021, our client met with Officers to discuss discrepancies and inconsistencies in the SA, SHELAA and site selection process at Cranbrook. Our firm conclusion was that Site 25 had been incorrectly categorised as unsuitable, particularly when assessed consistently with others that the LPA had classified as suitable.

This is particular evident if one compares the assessment of Site 25 at Appendix J of the SA (Feb 2021), with other sites selected as suitable in Table 54 of the SA. Site 25 performs better than 4 of the 7 sites selected. Site 25 represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and through pre-application engagement Kent County Council Highways have confirmed there to be no overriding highway access or capacity constraints to development (see Documents A and B). This is also supported by a Stage 1 Road Safety Audit undertaken by our client in respect of the proposed access. We therefore expressed surprise over why the Council had concluded Site 25 to be unsuitable. Moreover, why such a suitable and sustainable site had been overlooked in favour of less favourable options.

Officers confirmed in the meeting in February that they were in the process of updating the SHELAA (2019) prior to publication and would correct inconsistencies where necessary. One fundamental error Officers acknowledged needed updating, was the assertion the site did not have deliverable access via Frythe Way.

The comments we provided to the LPA in our email of 25th February (Document C) can be summarised as follows:

SHELAA (2019) – Site 25 Assessment Comments (By Sub-Header)

Potential Yield: The Council's assessment should be for 70 units, rather than the 85 units shown, as confirmed to Officers through site submissions to date.

Issues to consider:

Landscape Sensitivity Study (CR1):

The 'Landscape Sensitivity Assessment of additional settlements in Tunbridge Wells (LUC, 2018)' [LSS] included Site 25 within sub-area CR1 for assessment. This parcel as a whole was considered to comprise moderate – high sensitivity to small development scenarios; but importantly concluded at page 122 that the '*open field adjacent to Frythe Way is relatively well contained by tree cover and so has a more moderate level of sensitivity to development that is modest enough in scale to avoid appearing above tree lines.*' (Our emphasis).

It is evident from comparing the LSS parcel assessments (p.119-153) that Parcel CR1, specifically the part comprising Site 25, was concluded to be less sensitive to development than most of the other parcels proposed for allocation. No evidence is provided by TWBC to demonstrate why, despite performing better than others, Site 25 should therefore be concluded to be unsuitable on landscape grounds.

Our client referenced their representations to the Regulation 18 consultation plan, which included our own landscape submission and a vision document for the site (see Documents A and D). These concluded there was a strong case for development, and supported a conclusion of suitability for such a modest well screened and urban influenced site.

Heritage – Cumulative impact on setting of Conservation area in context of other 20th/21st century development – further loss of rural setting:

Unlike many of the proposed allocation sites, which abut or are in close proximity to the Conservation Area, Site 25 is well screened and well beyond the area likely to impact on the setting of the Conservation Area. Also on a point of consistency, the 'cumulative impact' comment raised for Site 25, had not been raised in the SHELAA assessments for sites within the zone of influence of the Conservation Area (such as sites 396 and 430). This did not therefore in our view justify a conclusion that Site 25 was unsuitable.

Highway matters:

In the meeting of 25th February, Officers acknowledged that the properties in Frythe Way formed part of Site 25, and that an appropriate means of access could be achieved in principle. Our client also shared correspondence of a meeting with Kent County Council Highways (see Document B), confirming there were no overriding highway constraints to the sites delivery in principle. The site is close to and has good footpath access to Cranbrook High Street, significantly reducing the need to use the car for some journeys. Our client therefore reasonably expected this to be accounted for in the revisions to the SHELAA, including a revised conclusion of site suitability.

Sustainability Assessment:

The SA concluded the site scored largely neutral, with some benefit to housing, and negatively on land use and landscape impact informed by the loss of a greenfield site in the AONB, which lies adjacent to an historic settlement and route ways. In light of the fact Site 25 scores better in landscape terms than most of the sites proposed for allocation, which are more peripheral in sustainability terms, and within the zone of influence of the Conservation Area, it is difficult to understand why this comment hasn't been added to any of the other sites proposed for allocation. It highlights an inconsistency of approach to assessment first and foremost.

Reason:

It is important to note that the reasons the LPA cite for unsuitability are limited to two grounds. Firstly, landscape concerns, which we address and contend are unjustified and inconsistent with conclusions reached with more landscape sensitive sites in the SA.

Secondly, the Council conclude there is '*concern about the ability to provide an appropriate means of vehicular access to the site, which is likely to require access through adjacent site*' (our emphasis). This was a factual error conceded by Officers, as the site did have an appropriate means of access to Frythe Way.

Accordingly, our client reasonably expected to see the SHELAA (2019) updated with a revised conclusion of the site being suitable. This being a fair and consistent approach to assessment with other sites the LPA had concluded to be suitable.

SHELAA (Jan 2021)

On release of the final SHELAA (Jan 2021) our client was surprised to see the suitability conclusion for Site 25 had not been revised. Instead, Officers had revised and added alternative and additional reasons to support the original conclusion reached.

In the SHELAA (2019) Officers concluded the site did not have an appropriate means of vehicular access, which our clients had shown to be factually incorrect. Rather than omitting this, Officers have instead changed the wording to now add in that this is from '*the wider road network*', referencing impacts from increased traffic movements on junctions from the site into the centre of Cranbrook. No evidence has been presented to substantiate this in the transport assessments accompanying the plan, or elsewhere we can find. Neither does it align with the advice of Kent County Council Highways in their response to such matters (see Document B).

Importantly, this traffic impact comment has not been added to proposed allocation CRS4, which arguably has the potential for greater traffic impacts on the same set of junctions. It is unclear therefore why the Council have retrospectively sought to update their conclusion by adding yet further grounds against suitability, other than to avoid altering the conclusion reached to date on this site. Our client is keen to elaborate on the inconsistent approach the Council have taken to such site assessment and SA matters at the Examination into the subsequently submitted version of this plan.

In conclusion, we contend the SA as drafted is not legally compliant, as it does not allow one to conclude the Local Plan strategy is an appropriate one, having been based on objective assessments of reasonable alternatives. This includes reasonable alternatives to the quantum of growth proposed (including unmet needs from adjoining LPAs) and to those sites proposed around Cranbrook. We would recommend the SA is updated to include 'reasonable' alternatives, with amendments made to the plan following a further round of consultation. In this respect, we note at Table 53 of the SA, our client's site (SHELAA Ref: 25) is listed as a 'reasonable alternative site' at Cranbrook. We would respectfully request this site is reassessed and allocated as a logical, modest and suitable allocation for around 70 homes, located a short walk from the heart of Cranbrook. This will assist in meeting local needs for housing, including affordable housing, and contribute to the contingency we contend is

needed to ensure a continuous supply of land for housing is delivered, particularly in the first five years of the plan period (see comments in relation to Policy STR1).

Duty-to-Cooperate Statement (TWBC, 2021)

Paragraph 60 of NPPF confirms that, *'In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.'*

'Figure 1: Local housing market area (from SHMA)' of the Housing Needs Assessment Topic Paper (Paragraph 2.36, TWBC, February 2021) is based on the travel to work area data for Tunbridge Wells within the SHMA (GL Hearn, 2015). This illustrates a strong functional and travel to work relationship with London. As a consequence, GL Hearn advised Sevenoaks and Tunbridge Wells Councils as far back as 2015 *'to engage with the Greater London Authority and London Boroughs in respect of any unmet needs arising from London.'* (Paragraph 2.72, Sevenoaks & Tunbridge Wells SHMA, GL Hearn, 2015). Yet, at Section 4 of the Duty to Co-operate Statement (TWBC, 2021) no mention is made of efforts to understand what such unmet needs may be, or the implications this may have for adjoining LPAs and TWBC over the plan period. This context we argue is key to understanding the extent of pressure adjoining authorities are likely to face over the plan period to assist in meeting such needs.

The Secretary of State for Housing, Communities and Local Government is on record saying there is a significant level of unmet housing need across London that needs to be addressed. The Panel examining the London Plan recommended the overall requirement for many boroughs be reduced to a capacity led figure to account for deliverability over the requisite 10 year period. Whilst initially interceding, the SoS has allowed the Mayor to progress the London Plan to adoption as an interim or transitional action. In his letter to the Mayor of London dated 29 January 2021, the SoS stated that following publication of the Local Plan, *'I fully expect you to start working to dramatically increase the capital's housing delivery and to start considering how your next London Plan can bridge the significant gap between the housing it seeks to deliver and the actual acute housing need London faces. I would again ask you to work closely with those authorities that surround London to develop a strategy to help alleviate the housing pressure that is faced both inside and immediately outside the capital.'* (our emphasis)

The revised standard method for calculating housing need, published by the government in December 2020, confirmed the housing requirements for the London Boroughs. Prior to the publication of Tunbridge Wells Local Plan Regulation 19 Consultation therefore, it seems likely there was an awareness of a growing likelihood of such significant unmet needs across this area; something that has been well documented in the SoS Directions on the London Plan over the last 12 months. In the context of NPPF Paragraph 35 requirement to ensure plans are positively prepared, we therefore find it surprising the Council has not sought with its neighbours to better understand the implications for emerging Local Plans. The London Plan requirement has now been confirmed as an interim figure for the next five years only, and will rise significantly thereafter as a consequence. This will occur within the first five years of the TWBC Local Plan period, which emphasises the importance of preparing a positive plan to face into such issues proactively.

TWBC note at paragraph 4.18 Duty to Co-operate Statement (TWBC, 2021) that SDC have made a formal request for assistance, to help meet a shortfall of 1900 homes. As has been well rehearsed in the recent Inspector's Reports into the Local Plans for both Tonbridge & Malling and Sevenoaks Councils, an identified shortfall of various magnitudes has been known about since at least 2018. At Paragraph 4.19 of the Duty to Cooperate Statement (TWBC, 2021), TWBC outline steps they have taken to conclude they are unable to assist SDC. This can be summarised into two broad points. Firstly, that TWBC have tested options through the SA process to accommodate 1900 additional homes and found this to be unsustainable. Secondly, that SDC may be able to meet more of this unmet need themselves.

Turning to the first point. As we set out in our comments to the SA itself, rather than assessing a reasonable alternative option to distribute this additional growth in a sustainable manner, including to the main towns and large villages, TWBC assess a distribution consistent only with SA Option 9 (Dispersed Countryside). This understandably leads to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan. At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss this option. The same evidence is then used to justify why TWBC are unable to assist meeting acknowledged unmet needs for housing in the area. Our client contends distributing unmet needs solely in line with Option 9 is not a reasonable

alternative. It appears only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

We contend the Council ought to have explored distribution options for unmet needs more objectively, including an assessment of the contribution more sustainable settlements could make to this. For example at Cranbrook, which is ranked second only after Southborough in the Councils 'Settlement Role and Function Study' (TWBC, Feb 2021). The outcome of the SA process therefore cannot be relied upon to conclude Option 13 is an appropriate strategy, as it has not taken '*into account the reasonable alternatives*', contrary to paragraph 35 of NPPF and the corresponding SEA Regulations requiring such alternatives to be 'reasonable'. Similarly, therefore, nor can the conclusion deduced from it that TWBC cannot assist SDC be relied upon. In its current form therefore the Local Plan is not in our view legally compliant in SA or Duty to Cooperate terms, as it has failed to test reasonable alternatives, and is not the product of constructive and ongoing engagement with SDC on options to assist meeting some or all of these needs.

Turning to the second point. It is clear that Sevenoaks district, arguably even more than TWBC, faces significant influence and housing need pressures from the London Boroughs. In the context of the scale of unmet needs evident in London, it is highly likely that SDC will be called upon themselves to explore even higher housing requirements to assist. The pressures on this area are not therefore likely to reduce, but are increasing, requiring adjoining authorities to work together to positively prepare emerging plans that face into such matters within the next five years.

The London Borough of Bexley (LBB), abutting the northern edge of Sevenoaks is just one example. Their draft Regulation 18 Local Plan in February 2019 noted they were planning for a target of 446 homes pa for 10 years. This has risen to 685pa in the confirmed London Plan, and will rise to 2404pa within the next five years once the transitional period ends. This is four times what is currently planned, and almost double the annual SHLAA capacity figure (1245pa) confirmed by Bexley in the London SHLAA (GLA, 2017) for the same 10 year period. Notably, many other London boroughs are also seeing significant rises. In light of this evidence, it is clear that Bexley and other London Boroughs will almost certainly need assistance to address such needs with neighbours in overlapping housing market areas. Indeed, it is notable that representatives of this London Borough were present in stated Duty-to-Cooperate meetings between TWBC and SDC (21 April 2019 entry at Appendix B6 of the Duty to Cooperate Statement (TWBC, 2021), yet no strategy or outcome is stated in relation to such matters.

It is also important to examine the context emerging with the adjoining authorities. In March 2020 Sevenoaks DC received the Inspectors Report into their submitted Local Plan. The Inspector concluded the Council had not discharged its statutory duty to cooperate and that the plan was not consequently legally compliant. SDC have been unsuccessful in challenging that decision, so the delivery of much needed homes for households in acute need will be delayed yet further.

In 2020, Wealden District Council also withdrew its emerging Local Plan following the Inspectors concerns the Council had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters.

In March 2021, Tonbridge and Malling BC received a letter from the Planning Inspector also confirming the authority had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters. TMBC requested the Inspectors issue their final report before confirming next steps, but since that request, SDC have received confirmation their own challenge had failed. We therefore wait to hear whether TMBC follow the same path, but either way, the plans housing strategy will be delayed.

As a consequence, three of the adjoining authorities are delayed in their plan preparation and housing delivery strategies; and the SoS has confirmed there are significant unmet and mounting housing needs requiring collaborative action in London within the next five years. All of which highlights how important it is for the emerging TWBC Local Plan to be as positively prepared as possible.

As we outline, the SA process and the nature of the authority's engagement with adjoining authorities is insufficient in our view to satisfy these statutory requirements. The strategic context highlighted above serves to illustrate just how important it is for TWBC to positively prepare their plan to assist adjoining authorities, particularly over the next five years, pending the removal of the transitional arrangements for the London Plan. As we set out, the justification for not assisting SDC with their unmet needs is not based on an assessment of 'reasonable alternatives' through the SA process. In light of this and the above context, we have significant concerns with TWBC claim they have a legally compliant Local Plan.

We would urge the Council to revisit the quantum of growth proposed and tested through the SA process, and put in place strategies to address this and unmet needs through the duty to co-operate. As we outline in our comments to Policy STR1 below, we contend there are strong grounds to suggest further growth is justified to ensure the plan is positively prepared and effective for the plan period envisaged. As a consequence, we would urge the Council to go further in quantifying what needs in the area are, and importantly devise the strategies needed to address these.

This should assist in ensuring the emerging plan does not meet the same fate as the plans recently examined for both Sevenoaks, Wealden and Tonbridge and Malling Councils, all of which about TWBC. The housing requirement should accordingly be adjusted and tested through the SA process to account for this and other factors we outline in respect of Policy STR1 below.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Michael Coggles, Royal Tunbridge Wells & Area Access Group

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Comments on whole Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS BOROUGH LOCAL DEVELOPMENT PLAN:

My members have asked me to respond to this consultation as follows, stressing areas that directly affect disabled and elderly people.

Further to my letter dated 16th March 2021 to Stephen Baughen the recent statement made to the House by the Secretary of State for Communities & Local Government, that his department are:-

"Seeking a rethink on housing quotas in the south east to avoid it being concreted over and to rebalance the population and industry to the north to support the growth of the Northern Powerhouse".

The following remain our major concerns regarding the legitimacy of the Pre-Submission of the Local Development Plan:-There is a lack of clarity regarding the legal duties and enforcement to bring about inclusion and meet the complex independent access needs of all disabled people now a legal duty. In endeavouring to meet the needs of all groups you have failed to meet the complex and costly needs of disabled people within this document, breaching the legal duty imposed within the Equality Act 2010, which my members and a wider Campaigning for the Rights of all People with Disabilities group of disabled people resident within the Tunbridge Wells area see as a discriminatory fudge:-

1. There is no prominent statement setting out that all developments etc within the LDP must be "totally independently accessible to all". The requirement was imposed on the council at the original Planning Inspector's inquiry and made clear that:-

"Developers must have due regard for Articles 9, 19 & 28 of the UN Convention on the Rights of People with Disabilities, the legally binding UK Disability Strategy 2012 & Action Plan with particular reference to Part 6 to ensure that all newbuild and refurbished buildings, dwellings and workplaces are independently accessible to all."

1.1 The implications of the above statement will alter radically the design and unit size of all new-build dwellings, reducing dramatically the number of units on development sites as well as increasing cost.

1.2 This has been a legal duty imposed on all Local Planning Authorities since the introduction of the Equality Standards in Local Government Targets 2000, the forerunner of the Public Sector Equality Duty, which required "adoption and full compliance" with the said UN Convention and both the Borough and County Disability Policies introduced in 2001 as part of that legal duty.

1.2.1 The Cabinet Office reaffirmed in 2016, 2018 & 2020 that:-

"The articles of the said Convention are non negotiable and must be complied with by 2025, or sooner if resources permit. It is not normal for government to incorporate into UK Law international treaties, Tony Blair then Prime Minister, used the legal device of the Equality Standards in Local Government Targets 2000, the forerunner of the Public Sector Equality Duty to impose the legal requirement, at the lowest level of compliance, "to adopt and fully comply with the said UN Convention" bringing the UN Convention and all its articles into UK Law, together with the requirement for formal ratification by parliament in 2009, to produce regular reports and a UK Disability Strategy by 2012. Many flagship policies are predicated on the long held assumption by successive administrations of compliance, including Welfare to Work and the Personal Independence Payment Regulations."

1.3 Hence the acceptance by the UK Supreme Court in two separate cases of the "disability paper trail", that the UN Convention and the legally binding UK Disability Strategy 2012 were "stand alone not part of the Equality Act 2010 but additional to it". The Equality Act 2010 imposes a legal duty to:-

"Ensure that all disabled people are treated more favourably than other groups to enable and empower them to participate fully in society"

The failure to comply to the letter will have serious implications in the form of sanctions and litigation by all resident disabled people within the borough area against both county and borough for failures

which will doubtless impact upon all councillors and officers past and present directly tasked post 2001 with meeting the said legal duties unless radical changes are made within the EIA document.

2. 2. By 2025 all footways and townscapes must be "totally independently accessible to all", the townscapes must meet the complex requirements for those with visual impairment, having the appropriate tactile delineators and on all footways a wayfinding line, as the minimum requirement for their safety, as well as being independently accessible to all wheelchairs. All signage must be accessible to all, for example pictograms for those with learning or mental health impairments. All crossing points using traffic signals, including temporary ones, must have knurled nobs fitted to enable blind people to detect when it is safe to cross.

3. All cycle tracks must be totally segregated from the pedestrians to accord with the KCC "Vision Zero Road Safety Policy" on Safer Streets, Article 9 UN Convention and the Cycle Tracks Act 1984.

4. By 2025 all buildings and workplaces built or refurbished since 2009, must be totally independently accessible, failure to achieve this will fall on the local planning authorities and those responsible at the time for approving such plans.

Both TWBC & KCC disability equality policies since 2001 are based upon the above and should, if read in conjunction with all the legal duties, (well hidden) be complied with.

5. Whilst I am aware of the need to house people, I am also aware of the growing concerns made to the Secretary of State by the High Weald AONB team about development encroachment. Also the growing concerns of local people regarding the numbers of houses being constructed within Paddock Wood on the Medway water table, Capel, Matfield & Brenchley and the proposed expansion of Tudeley Village, which will affect already overburdened GP, NHS primary & acute services, schools and other local and rail and transport services. The later raised at the recent Local Transport Forum Virtual Meeting.

5.1 The other serious concern for all local planning authorities is that since we have left the EU we can no longer depend upon fresh food and other products coming to us from the EU countries and the UK must once again become an independent food producer, which means that we cannot afford to use up farmland which could and should be used to grow crops or for animal husbandry. The pandemic has indicated the need to retain green field sites within urban areas for recreational and health purposes as well as retaining corridors for wild life.

6. POPULATION CONTROL:

This is an emotive issue, but must be addressed. On a island like the UK which has a finite amount of land available to meet all our needs, it is crucial that we have a clear policy on land use and it is no good saying "this is an issue for the policymakers", it starts at the grass roots, with local people. There is a need locally to ensure that there is a population balance, the 2011 census is out of date, indicators of an imbalance are dear to see with the growing numbers of retirement flats and homes being built or planned within the borough and its wider area, which will, as already stated, affect and impact dramatically the ability of GP, NHS primary and acute services to deal with an aging population. The pandemic has already proved this to be the case. (Eastbourne and the Coastal South East - Report 1985) and later government reports made clear that this must be resisted at all costs to ensure a "balanced population". That unpleasant duty falls within the remit of planning policy and the LDP.

There is a need for an immediate rethink in the light of the Jenrick statement and the current LDP needs to enshrine the duties imposed by the abovementioned legal duties and requirements in full. The Access Group will be happy to provide further detail on the exact legal wording to ensure total compliance is met and enforced.

7. The UK government is committed to maximise the economic and environmental opportunities of zero carbon emission vehicles which will mean a radical redesigning of our townscapes by 2030. To this end the RNIB & Age UK survey on the "public realm" which requires all existing unsegregated shared facilities to be segregated, in the light of cycles, powered cycles, e-scooters, e- skateboards and electric pods, which are inherently silent and cannot be heard by blind, deaf/blind and many elderly people. The suggestion that these groups should be accompanied at all times is now illegal as it is discriminatory, all groups of disabled people have a legal right to independent access and it is the duty of the authority responsible, irrespective of the cost, to provide that safe independent access.

7.1 Until that difficult issue of this group of silent vehicles has been addressed by the Department for Transport (DfT), they remain illegal and their use restricted.

7.2 PLANNING EFFECTS OF ELECTRIC & HYBRID VEHICLES:

Regulations introduced from July 2021, will mean that all newly registered electric and hybrid electric cars, vans, HGV's and buses must have an Acoustic Vehicle Alerting System (AVAS), the regulations ensure that such vehicles produce a specific level of noise, however, the regulations do not cover the other electric vehicles mentioned; it is my understanding that such e-vehicles if permitted, they can only be used on totally segregated tracks. If on-footway cycle tracks, they must have a trapezoidal delineator (see Off's Guidance on Tactile Paving Surfaces) which is very costly; there is a cheaper version of the design which can be seen in Port Madoc, Wales, as the minimum requirement to segregate these electric vehicles from the pedestrian and meet the requirements of KCC's "Safer Mobility Strategy" and new Road Safety Policy.

7.3 The requirement will be enforced on all authorities, so I suggest that in future when planning authorities consider a new development application, one of the legally enforceable conditions they can impose is that all footways must comply with that design, thus saving the council and county council additional costs at a later date.

The document in its current form fails to meet these legal duties and needs to be reworded.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for the opportunity to comment on the above consultation.

The consultation draft of the emerging Tunbridge Wells Local Plan was considered at an extraordinary meeting of this Council's Planning and Transportation Advisory Board on the 17th May 2021 and this response incorporates the views expressed by Members.

Tonbridge and Malling Borough Council welcomes the amendments made to the Regulation 18 draft of the Local Plan in response to the comments by this Council made in October 2019 and recognises the ongoing and pragmatic engagement in respect of the Duty to Cooperate to address the relevant cross-boundary issues and the continuing contributions to the infrastructure planning and master planning of the two strategic allocations at Tudeley and Paddock Wood.

However, the impact of these strategic sites, particularly on Tonbridge and the rural settlements of Hadlow, Golden Green and East Peckham, remains a serious concern. Having reviewed the Pre-Submission version of the Local Plan and the supporting evidence Members wish to make the specific comments set out below, which have also been included in this Council's on-line response. TMBC wishes to reiterate the importance of ensuring that the necessary infrastructure and mitigation measures are finalised and implemented in a timely and effective way. Continued close collaboration between the two authorities in respect of the master planning of both sites and the proposed Supplementary Planning Documents to refine the details is strongly encouraged.

The Local Plan has been prepared in accordance with the requirements of national policy as set out in the National Planning Policy Framework (2019) and Section 33A of the Planning and Compulsory Purchase Act 2004 in respect of the Duty to Cooperate. Please note that the Statement of Common Ground, which will reflect the matters raised in this Council's Regulation 19 response, will now be considered by the Planning and Transportation Advisory Board at its meeting on the 29th June 2021 before being agreed by Cabinet on 6th July.

Specific Comments

The transport evidence base documents underpinning the Local Plan are inconsistent, contradictory and unrealistically optimistic. There is therefore a lack of clarity regarding the infrastructure interventions required to deliver a sustainable plan.

To illustrate this point, the transport assessments, modelling assumptions and proposed mitigations do not take into account normal organic growth and planned development proposals in the Borough of Tonbridge & Malling or other neighbouring authorities and therefore do not adequately address the impacts on the local highway network and the consequential negative impacts on local communities.

Notwithstanding this, the mitigations proposed are considered to be insufficient to fully address all of the impacts on Tonbridge, for example, increased traffic flows into Tonbridge and surrounding villages causing increased congestion and a likely worsening of air quality.

The highway impacts on this Borough will extend beyond Tonbridge, Hadlow, Golden Green and East Peckham, for example additional traffic heading north along the A228 to access the M20 and A26 towards Maidstone and these should also be addressed.

The evidence for the impact on the landscape in the vicinity of the strategic site allocations and biodiversity is incomplete because the Landscape and Visual Impact Assessment only applies to sites located within the High Weald Area of Outstanding Natural Beauty.

The proposed closure of Hartlake Road to through traffic is a concern as it is a well-used route at peak times and it is not clear how the new accesses and internal road layout will provide an alternative north-south route. Whereas, if Hartlake Road were to remain open after the delivery of the Tudeley,

East of Capel Parish and Paddock Wood developments then this road and the lanes beyond would be inadequate for the significant new traffic being introduced and the wide reaching consequences described above would be even greater.

The strategic site allocations will increase the flood risk of the area to the north of Tudeley/Capel Parish, which is already prone to flooding, and this will have an adverse impact on the Medway flood plain.

As a result of this it is understood that the Upper Medway Internal Drainage Board will be seeking developer contributions. Has this been taken into account with regard to the whole plan viability study?

The Tudeley Garden Village master plan anticipates the delivery of new local service centres after phase 3 and the new secondary school will be delivered even later. This will put pressure on infrastructure in Tonbridge in the short to medium term, which the Local Plan seeks to avoid. Therefore, how will these impacts be mitigated?

Whilst recognising that there is not a requirement for a new railway station at Tudeley and that Network Rail has confirmed that the proposed growth in Tunbridge Wells borough does not require specific rail capacity interventions the omission of any mitigation of any impacts is a concern. TMBC encourages TWBC to continue to promote the opportunity for future provision with Network Rail and the rail operators and that this is revisited at the first review of the Plan. Without a new railway station undue pressure will be put on both Tonbridge and Hildenborough stations and TMBC members fear that the car parks serving both stations and the rail services themselves will be unable to cope with the increased demand created by the proposed development in Tudeley in particular.

The inclusion of cross-boundary walking and cycle routes both from the new settlement at Tudeley and associated with the Mabledon House Policy is a welcome contribution towards more sustainable means of transport, but concerns remain that this together with the proposed additional bus services will not result in the anticipated modal shift from private car use of 10%.

Paragraph 4.12 refers to the situation with respect to unmet housing need in neighbouring Sevenoaks District as being 'unclear' although it recognises that a potential shortfall of 1,900 dwellings may be further tested in the event the Local Plan Examination is allowed to continue. Since the Tunbridge Wells Local Plan was published for consultation on 26th March the request by Sevenoaks District Council to appeal the Judicial Review decision in respect of their Local Plan has been declined. Therefore, this contextual paragraph should now be updated.

Paragraph 4.13 recognises that there may be some unmet housing need and that it is therefore appropriate to assess the potential for also contributing to unmet needs. If this exercise has already been carried out, then there should be signposting to the relevant part of the evidence base. However, in light of the events described in paragraph 4.12, it may be more appropriate to update both paragraphs.

There appears to be a mapping error in respect of Map 33 and Map 34, which show the location of the new Secondary School as outside of the Garden Village site boundary, while Map 32 shows the school within the site boundary. For consistency, the maps should make clear that the site is inside the boundary, as the delivery of the school is now addressed by Policy STR/SS3.

I hope these comments are of assistance.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Tunbridge Wells Older People's Forum (TWOPF)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Various comments on aspects of whole Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWOPF very much welcomes the opportunity to respond to the consultation on the comprehensive and in-depth Local Plan. TWOPF seeks to ensure that all residents enjoy the many natural, social, cultural and economic advantages Tunbridge Wells offers.

TWOPF focuses on such elements locally that benefit all people, and especially those who may be older and/or less able to be fully independent whether through, permanent or temporary limitation in their access to, interaction with and enjoyment of Tunbridge Wells' life, facilities and services.

TWOPF recognises the demographic profile and the forecast growth of an ageing population nationally and within the Tunbridge Wells Borough Council area. To that end, TWOPF wishes to flag some key practical aspects that can make a huge and positive impact on the well-being, integration and contribution of older people to the community.

Housing

1 Affordable

The proportion and category of affordable housing development should be in accordance with the local plan policy quota.

1 Older People's housing needs

- . More and appropriate choice of purpose built housing for older people.
- . All new housing to be built with adaptability for disabilities.

Infrastructure

Good infrastructure helps enable older people to have fulfilling independent lives for as long as possible. This should be a prerequisite of any new housing, civic or commercial development. For established communities, existing facilities should be protected or improved. The infrastructure should support people getting out and about safely, easily and in a timely manner.

Well-being, Exercise and Access

- 1 Outdoor space – all housing should have some outside space, whether a garden or a balcony.
- 2 Well maintained, wide and level pavements and dropped kerbs with safe, identifiable and visible crossing points.
- 3 Car parking that enables easily navigable pay systems.
- 4 Sufficient disabled parking bays in central or high demand locations.
- 5 Living in a “walkable town or village” – and as such any new housing and commercial development should be local and have easily access to daily life facilities including General Practitioner Surgeries, pharmacies, banks, post office, shops, library and community centre.
- 6 Public transport should have easily accessible vehicles, have multiple routes that link residential areas and the town and village centres, and services are frequent and give extensive timetables.

Local Green spaces

- 1 Safeguarding the number and overall volume of green areas, increasing the numbers and variety of trees and greenery in line with a greener and healthier vision.
- 2 Maintaining the extent, worth and value of nature and the local wildlife.
- 3 Promoting a litter free communities, green areas and park spaces.
- 4 Support rewilding of parks, verges and other spaces to promote enjoyment of the natural environment and an improved ambiance.
- 5 Introduce electric vehicle charging points in new housing and commercial developments.

Celebrating outdoor community life

1 Safe, widespread and freely accessible places to rest and/or socialise – actively encouraging people to mix in and benefit from their community; and actively combatting loneliness and isolation. New developments to have a proportion of outdoor space which is sheltered or undercover.

1 To have widespread, clean and well maintained civic amenities and facilities that invite and support people of all ages to retain their independence and confidence:

Specifically:

- 1 Public lavatories throughout the town and be adapted for people with disabilities.
- 2 Ample seating / resting areas – including park and street benches; bus stop seats and benches with IT connectivity.
- . Obstruction and clutter-free pavements which help older and disabled people to go where and when they choose (whether on foot, in a wheelchair, mobility scooter etc.)

For more detail please see TWOPF Covid-19 Report. [TWBC: see attached report]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you would like to attach a file in support of your comments, please upload it here.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
----------------------	-----

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

With respect to legal compliance and specifically duty to cooperate matters, Wealden District Council and Tunbridge Wells Borough Council have signed a Statement of Common Ground (SoCG) in March 2021. The overall aim of the SoCG between the two parties is to demonstrate that ongoing and appropriate engagement and co-ordination is taking place between the parties that includes planning for identified cross-boundary strategic planning issues that exist and/or likely to arise resulting from the emerging Tunbridge Wells Borough Pre-Submission Local Plan that has now been published for its representation stage under regulation 19 of the Town and Country Planning (Local Planning) Regulations 2012 (as amended). This was agreed by Wealden District Council's Portfolio Holder for Planning and Development on 12th March 2021.

The SoCG confirms that effective cooperation is taking place between the parties in relation to matters that includes development on the administrative boundary between the two local planning authorities, housing provision, economic development, cross boundary infrastructure issues and matters relating to the natural environment, including the Ashdown Forest Special Area of Conservation (SAC) and Special Protection Area (SPA).

With respect to development on the administrative boundary between Tunbridge Wells Borough and Wealden District, the local authorities have agreed to work cooperatively on such issues and have agreed a protocol and set of principles for dealing with development on or close to the border between Royal Tunbridge Wells and Wealden District. These are set out in the SoCG under paragraph 2.6. It is noted that the emerging Tunbridge Wells Local Plan has allocated land under Policy AL/RTW 16 (named as Land to the west of Eridge Road at Spratsbrook Farm) for 120 dwellings. The Council is satisfied that the policy addresses the impacts on the adjacent land within the Wealden District Council area, and in terms of infrastructure provision with the relevant highway authority's.

In terms of housing provision, it is clear that the emerging Tunbridge Wells Borough Pre-Submission Local Plan sets out to at least meet its own need under the 'standard methodology', which equates to 678 dwellings per annum, or 12,204 homes over the plan period for 2020-2038. Indeed, the total supply expected from the emerging Local Plan ranges from 13,059-13,444 net dwellings, which allows for a buffer to either meet the unmet housing needs from neighbouring local authorities (most notably Sevenoaks District Council) or to ensure the deliverability of the Local Plan if certain housing allocations are delayed or do not come forward. The emerging Wealden District Council Local Plan, although at an earlier stage in the plan-making process, is also intending to meet its own housing needs that equates to 1,225 dwellings per annum under the 'standard methodology'. Wealden District Council will need to test this through the production of its new Local Plan.

It should be noted that Tunbridge Wells Borough Council formally wrote in early October 2020 to Wealden District Council (amongst other neighbouring local planning authorities) to ask what capacity

we would have to assist in delivering housing given the requirement for local planning authorities to look beyond the Green Belt first before releasing such land for development (paragraph 137 of the National Planning Policy Framework (NPPF)), as well as limiting major developments in Areas of Outstanding Natural Beauty (AONB) to where there are exceptional circumstances and in the public interest (paragraph 172 of the NPPF). The Council responded to this request and this is detailed within the SoCG at paragraph 3.2.8.

It should be noted that both authorities are intending to meet their own economic development needs, retail needs and gypsy and traveller accommodation needs through their respective Local Plans. There has been no request from Tunbridge Wells Borough Council or Wealden District Council at this stage to meet each other's needs in this regard. Both Councils will continue to operate existing joint working arrangements, as detailed in the SoCG, to ensure that suitable provision can be made as appropriate.

With respect to the Ashdown Forest Special Area of Conservation (SAC) and Special Protection Area (SPA), it is noted that the Habitats Regulation Assessment (HRA) accompanying the Tunbridge Wells Borough Pre-Submission Local Plan concludes that at this point in time, the Development Plan Document (DPD) does not present any potential risks to European Sites that it is considered are not capable of being mitigated. Both local authorities will continue to work as part of the Ashdown Forest working group for air quality and the Strategic Access Management and Monitoring Strategy (SAMMS) partnership to address visitor pressure in order to secure a common understanding and agreement on effects, avoidance, mitigation and monitoring and where possible to agree and cost share future studies or surveys.

It is considered that the Regulation 19 Tunbridge Wells Borough Pre-Submission Local Plan does not raise any new cross-boundary strategic issues in relation to matters identified above and therefore the Council is satisfied that the legal requirements of the duty to cooperate have been met with respect to Wealden District Council.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Foreword

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The process for understanding the Local Plan is a matter of navigating through 140 separate documents, 400Mb of data and amounting to a total of 7,786 pages of documents. The process of understanding the intertwined nature of the documents for ordinary folk without training or experience of Town and Country Planning Laws is a challenge, and therefore difficult to conform to the expressed format of addressing particular policy, and thus this submission will be a more general assessment of the Local Plan.

I will attempt to put forward an overall suggestion that the plan should be returned to TWBC for a revision that takes account of some factors that I think are particularly relevant, and I suggest may expose significant flaws in the Local Plan as submitted.

The previous public consultation (Regulation 18 Consultation) resulted in some 8000 comments from some 2000 contributors. The plan was revised, and most of the objection were ignored, and the Plan was largely unchanged to the current submission here.

Once the Local Plan is accepted policy for development for the next decade is set out, and experience of the local planning process suggests that it is impossible to make any changes, even with the benefit of new evidence and opinion.

Thus it is vital for the Local Plan to be well thought out and consistent in applying the directing Policies, and setting out a plan that is able to deliver a fair and clear framework that has the best interests of the residents of Tunbridge Wells, rather than offering opportunity to land owners and developers.

The Local Plan should be returned for further consultation for the following reasons:

1

Many of the assumptions made that underpin the basis of the Local Plan are now out of date and irrelevant, and in light of changes to society and working and retail habits that will come about as a consequence of the pandemic these assumptions (data and common sense observations) should be re-assessed to provide a more realistic and up-to-date premises of the local plan. The post-pandemic effects are likely to cause great changes and the local plan must be delayed to take this into account.

2

The public consultation produced 8000 comments from 2000 respondents mostly against many parts of the local plan, and these objections have been swept aside and ignored. There is widespread opposition to the plans to build in Green Belt Land and building in the ANOB, and concerns over building in flood risk areas, and further concerns about the effects of climate change, sustainability, and other green issues. The response of the planning officers is to largely to ignore all opposing views and opinions, and commission further studies to bolster their case.

The recent local Council elections changed the balance of power in the Council, and the residents at Capel voted against the existing councillor in favour of an independent because of the opposition to the planned housing development in the Tudley Flood Plain.

3

The development on Green Belt Land and in the AONB should be the last resort, and all other location of available development land should be completely exhausted before any Green Belt Land is developed.

The Local Plan shows Green Belt Land and development in the AONB, and ignores many brown field sites, redevelopment of existing buildings, particularly retail and office buildings vacant because of changes in society due to post covid changes.

Development of Green Belt Land, provided -

1. to check unrestricted sprawl of large built up areas
2. to prevent neighbouring towns merging into one another
3. to assist in safeguarding the countryside from encroachment
4. to preserve the setting and special character of historic towns
5. to limit potential level of harm to the Green Belt associated with release

should not be included for development on the Local Plan.

Development in the AONB should not be included in the Local Plan.

4

The plan should be rejected and re-written to take account of a new assessment of the town centre and associated results of a post-pandemic economy where it is likely to be further shop and business closures, and where the availability of development opportunity and particularly change of use from commercial to residential occupancy must be considered as part of a whole local plan delivery.

5

The availability of brown field sites and change of use resulting from the post-pandemic economy, and changes in work patterns where office space is no longer required must change the assumptions that underpin the Local Plan, and thus the Local Plan should be rejected so these revised circumstances are reconsidered and incorporated in revised local plan.

6

The delivery of the local plan will so to speak lock the future development strategy of the town for the next decades and we must take more time to consider what sort of future we want for the town. Here is a chance to call a halt to pre-conceived ideas and generate a new and enlightened way to deal with development and progress in challenging times as we deliver a Local Plan for a post-pandemic society.

The Plan contains inconsistencies where the definitions of Green Belt and AONB are variously interpreted, in one location contradicting statements in another. It appears that this is an consistency that has been recognised by other comments.

The Plan ignores the value, aims and objectives of the Green Belt, and fails to protect Green Belt Land.

The Plan ignores the preservation of the AONB.

The Plan fails to deliver clear policy and direction for Carbon Emissions.

The plan fails to take account of the post covid pandemic economy and changes in work habits.

The Local Plan should be returned to the consultation stage so the Plan can be re-written to take account of the invasion of Green Belt Land and development in AONB, and re-consider existing brown field sites for development first, as the conversion of existing buildings for alternative use (housing) is less impact on carbon footprint. As the first principle the plan should develop brown field sites particularly if they are in central locations, where the impact on sustainable transport and the requirement for car ownership and use of public transport can be delivered.

The Plan should be returned for consultation to take account of the post pandemic developments and changes in work and leisure activities, and take account of changes in social activities. For example

offices and retail premises that are vacant should be the priority for redevelopment for housing, located in central areas where a sustainable transport policy can be delivered.

The Local Plan will shape the future of the borough for decades, and should be fit for purpose. The Plan is not sound in the current version and should be returned and re-submitted for consultation.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered. I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

The citizens of Tunbridge Wells should be fighting for a change in this process, and I am sure there will be support from the people once they realise consultation will make a change and deliver a fair and equitable society that delivers the needs and best interests of the ordinary folk of the borough.

The Plan is conceived to allow the developers to set the agenda, and the call for sites favours developers and land owners to select the easy (and cheap) sites to develop where the most important factor is the profit, rather than delivering housing that meets the needs of those folk who are attempting to make a start with a family for example, where low cost housing could be available in the centre of town where a car is not essential, and use of an affordable public transport system can be used for essential travel.

There is not much evidence this is a priority in the Local Plan, and particularly in the post pandemic economy, the Plan should be returned for a proper re-assessment.

The Local Plan should be a document that directs the development of the Borough for the next period, but must be in the control of the local council and be adaptable as the economic and social factors change, so it must be possible for change in the future life of the Local Plan. As it is now the Local Plan sets policy in such tight terms that a mistake made at the writing stage sets the framework for 15 or 20 years, and this surely is not in the best interests of the people of Tunbridge Wells.

The threat to Green Belt Land in the Local Plan is an erosion of land set aside and protected by Law as designated Green Belt and all developments on Green Belt Land should be removed from the Local Plan. There are alternative sites in the Call for Sites list that should be considered and developed, even if costs are higher than a green field site.

Also there should be no development on sites in the AONB, also protected areas.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered. I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

The citizens of Tunbridge Wells should be fighting for a change in this process, and I am sure there will be support from the people once they realise consultation will make a change and deliver a fair and equitable society that delivers the needs and best interests of the ordinary folk of the borough.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Plan is conceived to allow the developers to set the agenda, and the call for sites favours developers and land owners to select the easy (and cheap) sites to develop where the most important factor is the profit, rather than delivering housing that meets the needs of those folk who are attempting to make a start with a family for example, where low cost housing could be available in the centre of town where a car is not essential, and use of an affordable public transport system can be used for essential travel.

There is not much evidence this is a priority in the Local Plan, and particularly in the post pandemic economy, the Plan should be returned for a proper re-assessment.

The Local Plan should be a document that directs the development of the Borough for the next period, but must be in the control of the local council and be adaptable as the economic and social factors change, so it must be possible for change in the future life of the Local Plan. As it is now the Local Plan sets policy in such tight terms that a mistake made at the writing stage sets the framework for 15 or 20 years, and this surely is not in the best interests of the people of Tunbridge Wells.

The threat to Green Belt Land in the Local Plan is an erosion of land set aside and protected by Law as designated Green Belt and all developments on Green Belt Land should be removed from the Local Plan. There are alternative sites in the Call for Sites list that should be considered and developed, even if costs are higher than a green field site.

Also there should be no development on sites in the AONB, also protected areas.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society,

as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Foreword	
Question 4	
Do you consider that the Local Plan:	
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Councillor Mc Dermott thanks people for their time in sending in comments at Reg 18, but has taken no notice of what has been contributed by local people, because Tunbridge Wells Borough Council (TWBC) are still pursuing with vigor -a Garden Settlement Approach in totally inappropriate sites -I might add. This is despite a huge outcry by many members of the public. The coronavirus pandemic has precipitated a faster change in home working and a change in retailing. If the last local plan is outdated this latest proposal most certainly is. I am horrified to see letters dated 2013 used for neighbourhood plans in this document and the outdated 2016 flood plain maps. While the planners were putting this proposal together over the winter of 2019/2020 the rain kept falling, flooding in the critical sites of Paddock Wood and the land below Tudeley -reached biblical proportions and still TWBC will not listen. This Local Plan needs to be updated with far more relevant recent studies and to take into consideration the changes in working habits and listen to the voice of locals. It has not been positively prepared with recent data and is therefore unsound

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Use of old data e.g. Paddock Wood Neighbourhood Plan Have not taken into account the National Policy Framework and National Modal Design code Consultation Proposals 8/2/21

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a resident in Queens Street Paddock Wood and have lived here since 2010. Since the new developments in Mascalls Farm the traffic has already increased considerably since we have lived here. Further down Queens street bridges over the railway lines. These are effectively single lane and there has already been an increase of road traffic accidents since the Mascalls development due to the high volume of traffic travelling over these bridges and on the bends either side.

Our house flooded December 2013 from the downwards journey of the water across the neighbouring concreted yard of the farm adjacent to us. It was able to flow through our house and disperse into the lower ground which is current apple orchards. This will not be able to happen once the land is developed.

I am a resident in Queens Street Paddock Wood and have lived here since 2010. Since the new developments in Mascalls Farm the traffic has already increased considerably. Further down Queens street the bridges over the railway lines are effectively single lane and there has already been an increase of road traffic accidents since the Mascalls development due to the high volume of traffic travelling over these bridges and on the bends either side.

Our house flooded December 2013 from the downwards journey of the water across the neighbouring concreted yard of the farm adjacent to us. It was able to flow through our house and disperse into the lower ground which is currently apple orchards. This will not be able to happen once the land is developed.

We appreciate the government has a housing target to meet, however we strongly object to the disproportion allocation of development in Paddock Wood. Out of an overall housing target of 12000 dwellings. Paddock Wood is currently being allocated approximately 4000 of these, approximately 1/3 of the total borough's allocation. If we include our neighboring villages, Capel and Tudeley figures our joint allocation is over 6000 dwellings over half of the boroughs target.

The development should be spread across the borough using brown sites, expanding areas such as the Longfield site where millions of government funds has already been spent improving the road infrastructure and where there are community services are more opportunities of work available.

The plans should meet an economic objective– to help build a strong, responsive and competitive economy, by ensuring that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity; and by identifying and coordinating the provision of infrastructure;

Developing housing in Paddock Wood does not improve the local economy. There is no specific industry in the area and despite the rail link with London, the trains are unaffordable for many, overcrowded in peak times with insufficient parking for commuters. (Cost for annual season ticket to mainline terminals plus annual parking ticket is over £6K, however there is a waiting list for parking season tickets due to the lack of spaces).

There are limited options in terms of traffic management around the area. Many of the roads are narrow and unable to be widened due to the flood management ditches and the railway bridges. (We have confirmation from Network Rail that they will not be widening bridges to support more road traffic).

Our understanding is that parking is limited with the new developments and therefore people will end up parking in the already narrow roads leading to further congestion.

The current services such as our doctors, dentists and schools are over subscribed. The local police station has been sold off for development and therefore we would like evidence that these services including the fire services have realistic, plans to be sufficiently scaled to meet the additional demands of an increased population.

There are insufficient plans to meet **a social objective**— to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations; and by fostering a well-designed and safe built environment, with accessible services and open spaces that reflect current and future needs and support communities' health, social and cultural well-being;

Our experience so far is that our community high street is to be demolished to make way for further development. This is despite the opposition raised by the local community and the rationale of building a new community centre on green space instead of extending our local sports and leisure centre and turning that into a proper community hub rather than a tired sports hall with very little to offer the youth community of Paddock Wood. There are insufficient green spaces and developments in areas such as Foal Hurst Wood will make these over crowded. There is no parking at many of the local parks and the roads into Paddock Wood are too dangerous to allow children to walk along.

The new housing proposals are to be built on land that is subject to flooding. There are flood mapping plans that provide evidence of this. The long term strategy in previous developments around Paddock Wood has been to leave some areas of land for drainage however these have no long term maintenance strategies and in some cases have now been developed. It is clear these strategies are not working as residents across many parts of Paddock Wood are being flooded more than before. We have no confidence in the sweeping statements that flooding issues have been addressed and we would like to understand the compensation that will be provided to the existing and new residents of Paddock Wood when this occurs.

We cannot see how the development supports **an environmental objective**— to contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimizing waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy

The development of the Church Farm site has already demonstrated the lack of respect for our natural environment. Trees that were subject to planning consent were 'inadvertently' destroyed by the developers.

As mentioned already flooding is of a major concern across Paddock Wood. Residents on the East side of Paddock Wood have had to purchase their pumps due to regularity of flooding down Castle Hill, Mile Oak Road and Queens Street. We are currently surrounded by apple orchards and they are assisting to disperse the run off but if these are developed the situation will be exacerbated.

We would also like to understand if Natural England have been consulted regarding the development proposals as required with a development. The government policy is to protect the best and most versatile (BMV) agricultural land from development. The proposed areas for development (Paddock Wood, Capel and Tudeley) TBWC are the most likely to meet this criteria:

Namely the agricultural land

- . gives the highest yield or output
- . has the widest range and versatility of use
- . produces the most consistent yield from a narrower range of crops
- . requires less input

and this is evidenced by our neighboring farm consistently and successfully growing asparagus see: <http://publications.naturalengland.org.uk/publication/6056482614804480>

Coupled with this is the government have promised to see hundreds of thousands of new trees planted, including in towns and cities and near rivers to reduce flood risk, and help meet the government's commitment to increase planting to 30,000 hectares per year across the UK by 2025.

A further £1.4 million has been awarded to the Environment Agency to fund 'woodlands for water' – 15 projects to plant over 850,000 trees that will protect around 160km of river and help to reduce the risk of flooding to over 500 properties. Tree planting can play a valuable role in reducing flood risk, slowing the flow of water to nearby communities.

It would seem that removing trees by developing our local orchards is counter productive to government policy.

<https://www.gov.uk/government/news/39-million-to-drive-innovative-tree-planting>

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I would suggest that the development across TBW Borough is more equitable therefore alleviating Paddock Wood from the issues raised above specifically:

Development of arable land when the government has specifically stated that farming must be preserved in the UK. - There are other options in Tunbridge Wells that do not consist of developing on farming land

Do not build on the orchards which is contrary to the government directive to plant more trees

Do not create an over populated area around Paddock Woods with poor infrastructure, transport links and public services and little job prospects.

Do not increase the flooding in and around Paddock Wood by concreting the countryside

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Graham Clark
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph 1.29	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 35 of the NPPF states that one of the purposes of local plan examinations is to assess whether they have been prepared in accordance with legal and procedural requirements and whether they are sound. It then goes on to say that plans are 'sound' if they are positively prepared, justified, effective and consistent with national policy.

Tunbridge Wells is located within the West Kent Housing Market Area, which includes Tonbridge & Malling and Sevenoaks Councils.

Sevenoaks Council published their Submission Draft Local Plan in December 2018. This Plan proposed some 8,000 dwellings, a shortfall of some 6,000 dwellings from their acknowledged housing requirement of 13,960 dwellings.

The Inspector stopped the Examination into this Plan in October 2019. She concluded that the Council had failed in its Duty to Co-operate with other planning authorities within the HMA to ascertain whether they could accommodate some of Sevenoaks unmet housing need. The Inspector stated:

My main concern relates to the lack of constructive engagement with neighbouring authorities to resolve the issue of unmet housing need and the absence of strategic cross boundary planning to examine how the identified needs could be accommodated.

Sevenoaks Council subsequently challenged this decision through the High Court. Justice Dove found that "there is no substance in any of the grounds upon which this claim is advanced."The Council's case was therefore dismissed.

Subsequently, the Tonbridge & Malling Local Plan Examination was halted by the inspector in October 2020. The inspector concluded that TMBC had failed in its Duty to Co-operate with Sevenoaks Council to see whether it could assist in meeting some of their unmet housing need.

What all of this points to is the need for joint working on such matters as development constraint studies, settlement capacity studies and green belt assessments. Perhaps even a West Kent wide local plan?? Unfortunately, none of this has work been undertaken on this basis.

I am afraid that Tunbridge Wells Borough Council faces the same dilemma as Sevenoaks and Tonbridge & Malling.

The TWBC Duty to Co-operate Statement (March 2021) is a voluminous document. Unfortunately, it doesn't contain any evidence that there has been any serious consideration given as to whether the borough is in a position to accommodate some of the unmet housing need arising at Sevenoaks.

In this context, it is apparent that Tunbridge Wells Council has also failed in its Duty to Co-operate. Until it has been resolved as to how the shortfall in housing at Sevenoaks is to be met there is no point in opening the Examination into this Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Cranbrook & Sissinghurst Neighbourhood Development Plan Steering Group

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 1: Introduction

[TWBC: for further comments by Cranbrook & Sissinghurst Neighbourhood Development Plan Steering Group, please see Comment Numbers PSLP_1574-1580, PSLP_1582-1586, PSLP_1588, PSLP_1590, PSLP_1592-1623]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Cranbrook & Sissinghurst Neighbourhood Development Plan

Response to Tunbridge Wells Borough Council Pre-Submission Draft Local Plan – 4th June 2021

Section 1: Introduction

Neighbourhood Development Plans (NDPs)

No mention is made of those NDPs in development.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you would like to attach a file in support of your comments, please upload it here. [PSLP_1571-1623\(not inclusive\)_CRS NDP Steering Group Representation.pdf](#)

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph Number 1.26	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tonbridge BC, Sevenoaks BC & Wealden BC current Local Plans have been rejected by the Planning Inspector. How can TWBC commit to ANY new developments as they cannot reasonably calculate the housing requirement and infrastructure need. Maidstone BC has not yet submitted their Reg 19 Plan and their draft plan Reg 18 includes 2 new Garden Villages and may thousands more properties over a similar plan period.

All the above plans will place an excessive load on the current infrastructure in the whole of Mid & West Kent, far more than any KCC or TWBC Highways assessments has considered in the TWBC Plan.

Planning Inspectorate - Procedure Guide for Local Plan Examinations - Section 1.2 states:

"Particular attention should be given to the duty to cooperate"

TWBC has not co-operated as it has an unknown quantity and the impact upon the area MUST be considered in full. The documents do not reflect this at all. The plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC needs to consider the impact of housing developments in ALL neighbouring areas that have yet to be approved and reflect upon the impact of these thousands of homes on the general highways infrastructure.

Given how limited the options are within Tonbridge and Capel due to AONB, river Medway and railway lines crossing the area, these are very difficult to adequately resolve due to engineering difficulties

and their potential costs. s106 contributions alone will not fund this type of engineering and TWBC have failed to demonstrate where any additional funding will come from or even if the proposed highway infrastructure adequately satisfies need.

Traffic is not bounded by Boroughs but by need to travel of its residents and visitors.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I have spent many months examining the documents that TWBC have presented and they are so flawed that I feel I must be present to ensure the arguments presented are accurate.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

In the PSLP Page 13, it states that the plan period is 2020-2038. It is already 2021 and will be 2022 at earliest before the plan is approved and possibly 2023 before any works started. Given the delay to the plan, (potentially 3 yrs), the build program will need to be escalated to a minimum of 770 homes per year and the Highways infrastructure forecasts cannot therefore be met within a reasonable timescale as they rely upon completion of some of the proposed homes for funding. KCC is the overall owner of ALL public highways in Kent and given their lax attitude to highways improvements in Capel over the past 40yrs and there is no evidence this has changed or budgets committed prior to 2025 onwards, it is inevitable that the safety and wellbeing of the current residents of Capel, in particular Five Oak Green and those living on B2017, will be severely impacted for many years before any relief is in sight. This is an unsafe position which will violate our human rights to have a safe and healthy environment to live in and therefore the plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

If it were possible to revise plans and avoid any highways safety issues then we would advise revisiting the plan. However, Save Capel and Capel Parish Council, and their Consultants, have examined every detail of the plan regarding highways infrastructure and have proven the figures supplied by TWBC fall well short of the probable traffic counts and vehicle movements in the area. The PSLP promotes the building of new garden villages and estates in totally the wrong place. As such the PSLP is Unreliable and Unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The TWBC PSPLP has so many inaccuracies and false information that the Planning Inspector should be aware of these various issues. Residents in Capel have zero confidence in TWBC who we do not believe can be relied upon to offer clear and precise answers to questions accurately.

Question 1

Respondent's Name and/or Organisation Friends of Tudeley

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph 1.2.9 Duty to Cooperate

Paragraph 1.3.1 Habitats Regulations Assessment

Paragraph 1.3.3 Sustainability Appraisal

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 1.2.9 Duty to Cooperate

TWBC has failed to present sufficient evidence that the Duty To Cooperate has been fulfilled.

A new settlement such as the proposed Tudeley Village is exactly the sort of strategic planning issue on which cooperation is mandatory. TWBC has failed to provide evidence of genuine cooperation with neighbouring local authorities on strategic matters.

A detailed description of TWBC's failure to present sufficient evidence is in Section 2.0 of the attached report by Graham Simpkin Planning.

Paragraph 1.3.1 Habitats Regulations Assessment

TWBC has not demonstrated that the plan (in combination with other plans and projects) will have no adverse effect on site integrity.

There are no public statements from Natural England or neighbouring Councils (including Wealden Forest District Council) that concur with the TWBC assessment that the impact of development in Tunbridge Wells Borough (in combination with development in other local authority areas) will not adversely affect the integrity of Ashdown Forest SAC through nitrogen deposition.

A detailed description of the lack of appropriate assessment is in Section 3.2 of the attached report by Graham Simpkin Planning.

Paragraph 1.3.3 Sustainability Appraisal

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal. The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal.

The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council recognises that the Tunbridge Wells Borough Local Plan looks to deliver a sustainable future, making effective use of brownfield land across the Borough and ensuring that the necessary infrastructure is available to support development.

The County Council, as a key infrastructure provider, welcomes the incorporation of strategic policies such as Policy STR5 "Infrastructure and Connectivity" which set out the role of infrastructure in the delivery of sustainable new communities. This will help ensure that planned residential and commercial growth will be of high quality and delivered in a way that will help to create the places where people want to live. The detailed consideration of the infrastructure requirements to support development in each of the proposed site allocations is acknowledged and welcomed. Taking an "Infrastructure First" approach to growth is advocated by the County Council and is also embedded in the Kent and Medway Infrastructure Proposition; a proposed deal with Government for new infrastructure investment that will enable accelerated housing delivery, focussed on building the right homes in the right places and providing the public services, transport infrastructure, jobs and homes that residents will need, now and in the future. It is crucial for an infrastructure first approach to be applied to planned growth in the Borough - commitment to close collaboration between key partners will be essential to ensure that good growth is planned, funded and delivered in a timely manner.

Within this response, the County Council provides detailed commentary on the proposed policies and supporting paragraphs. However, the County Council, in its role as Local Highway Authority, has not taken this approach on highways and transportation matters. This is because it is considered that further modelling is needed to inform the assessment of specific strategic and site policies.

During the pandemic, a significant proportion of the population shifted to radically different ways of working, which has revealed the potential for long term changes in where people live and work and how they use infrastructure. It is too early to draw conclusions about long-term behavioural trends that may emerge as a result of the pandemic. However, it will be important to consider scenarios of how people's behavioural trends (that could impact infrastructure use) might change. As Local Highway Authority, the County Council would want to agree the assumptions for such scenario testing.

The County Council, as Local Highway Authority, is concerned that whilst there are a number of welcomed policy proposals with regard to promoting sustainable access and development, the consultation requires further highway evidence to justify the Local Plan's growth strategy.

The County Council, as Local Highway Authority, has worked closely with the Borough Council over the past years on the emerging growth strategy. Nevertheless, its current position is that it requires further supporting evidence, to an agreed methodology, that accurately reflects the proposed growth before KCC can make a fully informed set of comments on the proposals presented in the Local Plan consultation document. The County Council has reviewed the Local Plan and supporting documents, including the Transport Assessment, and identifies the following key issues that require further work:

1 Reference case validity (and therefore future scenario validity) 2 The trip rates used 3 Ambiguity regarding forecast modal shift 4 Deliverability and viability of the mitigation package

Therefore, a full assessment in respect of the impact of the growth strategy on highways and transportation matters cannot currently be carried out and commentary on the Local Plan policies and proposed allocations can be provided once the outstanding information is received.

KCC will look to continue working with the Borough Council over the coming months on the provision of accurate modelling and commensurate and viable mitigation and will aim to update the position as work commences on the Statement of Common Ground.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Omit "at Hadlow"

Add "Stonecastle Farm Quarry is in three Parishes - Hadlow, East Peckham and Capel. Capel Parish is within the Borough - note the plant area and access & egress is located in Capel Parish"

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation	Charles Mackonochie
---------------------------------------	---------------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

1.7

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Stonecastle Farm Quarry is in three Parishes - Hadlow, East Peckham and Capel, the latter being in the Borough. In addition the processing plant and the entrance and egress to the site is located in Capel. The omission of a statement giving the above information raises the question as to whether the implications of future quarrying together with Tudeley Garden Village and expansion in East Capel have been fully considered

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Wording in Para 1.7

Omit "at Hadlow"

Add new sentence "Stonecastle Farm Quarry is in three Parishes - Hadlow, East Peckham and Capel, the latter being in the Borough. In addition the processing plant and the entrance and egress to the site is located in Capel. "

An impact assessment is required to investigate the implications of the combined effects of the proposed quarrying, building and the associated infrastructure upon:

Travel including active travel routes, ramblers, horse riders

Landscape and vistas

Biodiversity

Flooding

Pollution – sound, water and air

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To explain and answer questions on the above

I have been actively involved in the whole question of the quarrying at the request of local residents including chairing liaison meetings between the quarry operator, local representatives and residents and attending public mineral hearing

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see Question 6

[TWBC: comments below for ease of reference]

Wording in Para 1.7

Omit "at Hadlow"

Add new sentence "Stonecastle Farm Quarry is in three Parishes - Hadlow, East Peckham and Capel, the latter being in the Borough. In addition the processing plant and the entrance and egress to the site is located in Capel. "

An impact assessment is required to investigate the implications of the combined effects of the proposed quarrying, building and the associated infrastructure upon:

Travel including active travel routes, ramblers, horse riders

Question 1	
Respondent's Name and/or Organisation	Lee Prebble
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
1.19, 2.16, 2.32, 4.10, 4.47	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Pre-Submission Local Plan Introduction – Draft Local Plan – para 1.19 - p.15 The list of issues is incomplete. Representations made in response to the Regulation 18 consultation referred to the failure to undertake proper assessments of the proposed Tudeley Village site before including it in the Draft Plan. This meant that the largest housing area in the plan didn't go through most of the plan preparation process. There was no Green Belt Study for the site, no Landscape and Visual Impact Assessment, no Biodiversity Assessment. I made representations that the Draft Local Plan was not complete enough to be ready for public consultation when the land for such a big proportion of the housing had not had the same level of assessment as the rest of the plan. The Issues and Options process led to most people (60%) wanting a growth corridor led approach. Less than half wanted a garden settlement and that was when no one knew that the garden settlement would involve destruction of Green Belt and attractive countryside. Protecting Green Belt was a key priority for people who participated in the Issues and Options consultation.

PSLP Population Projections –para 2.16 p.23 Table 1 shows that, by and large the population is shrinking apart from the over 65s. The projected overall increase is due entirely to a rise of 9450 in the 65+ group. For the overall increase of 6155 the Plan proposes to build some 12200 new dwellings and a range of house types (more than one per person for the projected population increase). Clearly the intention is not to meet local needs but to cater for significant inward migration.

PSLP Natural, built and historic environment – para 2.32 p.26 This is a key point. It says that it is recognised that there will be direct impacts on landscape and environmental assets and their settings. It is confirmed that “full account needs to be taken of the landscape and environmental sensitivities of each site, as well as respecting local distinctiveness and providing for enhancements”. It will be demonstrated in this submission that the Plan fails to do this, in particular in relation to the proposed Tudeley Village and its associated infrastructure. For this reason the PSLP is unsound.

PSLP The Development Strategy Housing Needs para 4.10 p.35 The figure for local needs does not acknowledge the projected reduction in population in all sectors apart from the age group 65+. The Plan has taken the housing need figure calculated using a standard method despite having strong grounds to lower it due to the population projections as well as the large amount of Green Belt and AONB land in the borough. The NPPF makes provision for councils to have a choice in the provision of the standard calculation. If provision of these houses is really only possible by sacrificing Green Belt land and harm to the identified local environment then the NPPF makes it perfectly possible for TWBC to say that this is not achievable. TWBC have chosen not to do so. The number of houses delivered by the Local Plan should be reduced by removing any houses planned for Green Belt and sites where the environmental impact, when properly assessed, is not adverse.

PSLP Formulating the Development Strategy para 4.47 p.40 This fails to acknowledge the impact on the local environment in the vicinity of the proposed garden settlement, the landscape and rural character of the area, and is contrary to the vision and strategic objectives. In this respect the Plan is unsound and should not proceed. Furthermore the Council failed to reassess the Strategy in the light of the damage that it would do to the local environment. There is no evidence that there was any reconsideration of the Strategy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove the policies and sections proposing the new garden settlement at Tudeley and the proposed Five Oak Green By-Pass.

This comment and objection has concentrated on the proposed garden settlement at Tudeley and in particular on the failure to properly assess the impact of the development especially in relation to landscape and visual amenity. That should not be taken to mean that other aspects of the PSLP are considered acceptable. As an individual with limited resources there may well be significant concerns regarding other aspects but the fact that the Plan is unsound as demonstrated should mean that it is withdrawn and the whole strategy reconsidered.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would like the opportunity to ask Council officers to respond to the points and objections i have raised.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal adds little or nothing. The summary for the Capel garden settlement site at Tudeley demonstrates that there was no landscape and visual amenity assessment only that it ticked a box for being outside the AONB. In relation to Air Quality the high risk for deterioration is recorded yet a mixed score is given on the possibility of discouraging private car use. Landscape is scored negatively but only apparently because of impact on the AONB. There is no visual impact assessment or assessment of impact on rural character and amenity or the features identified in the Council's own Landscape Character Assessment.

The score in relation to biodiversity should be very negative. For example; in the garden settlement of 2800 dwellings there could be hundreds of cats. Cats have a strong intrinsic hunting urge, even those that are well fed, and in a rural environment prey items will be more abundant. A cat will roam to hunt; farm and country cats will range anywhere from 100m to 3km. A recent Mammal Society study found that 987 cats over a period of 5 months brought home 11,537 items of prey including a minimum of 20 species of wild mammal, 44 species of wild birds, furs species of reptile and three species of amphibians. The RSPB nature reserve at Tudeley Woods is 750m from the proposed garden settlement. The following specifically protected species are on site CA1: Noctule, serotine, brown long-eared, common pipistrelle and soprano pipistrelle bats (recorded flying). There is evidence of BAP, KRDB or other notable species on site: House sparrow (red list & KRDB), Peregrine falcon (KRDB), Spotted flycatcher (red list & KRDB). Kent Ornithological Society Records show that 70 species of birds regularly rely upon the area within the proposed Tudeley site boundary either over winter or during the breeding season. 53 bird species are considered to breed within the proposed site. 12 of the breeding species are Species of Principle Importance as listed under section 41 (England) of the NERC Act (2006). These species need to be taken into consideration by a public body when performing any of its functions with a view to conserving biodiversity. 10 of the species breeding within the proposed site are also red list Birds of Conservation Concern (BoCC), largely due to significant population decline as a result of habitat loss and change in agricultural practices. Yellowhammer, linnet and skylark (all Species of Principle Importance and Red List BoCC) occur within the proposed site in high densities and all three species are undergoing significant population declines. Four species of owl also occur in the area – Tawny, Little, Barn and Long-eared - itself an unusually high number. There are only a few breeding pairs of Long eared owls recorded in Kent, two of which may be resident in the area. This would represent a significant number and would be a serious consideration for developers. There is no up-to-date Biodiversity Assessment of the site to support this allocation. This should be completed and assessed before such a large development is included.

Climate Change The score in relation to the impact on Climate Change is given as slightly negative. This is incorrect. The impact on Climate Change should be "Very Negative" as soils, mature hedgerows and mature trees will be destroyed during the development to be replaced by housing consuming energy in their construction and subsequent use. This will happen regardless of the green spaces and clusters of mature trees retained in masterplanning. To facilitate the development link roads and road within the settlements will result in soils being covered in hard surfaces and mature trees and hedgerows being destroyed. If Tunbridge Wells Borough Council really is in a "Climate Change emergency" then building thousands of houses on open countryside, including new roads is contrary to that declaration. Travel The score for the impact on Travel is given as Positive. This is incorrect. The score for Travel should be Negative. 58% of Capel residents have 2 or more cars (according to the Transport Evidence Base). The site is at least a 45 minute walk from the nearest train station. Network Rail have ruled out building a train station at Tudeley. Many of the new households will have 2 private cars. Many residents will commute to London. Very few commuters (less than 1%) use bikes and buses to get them to the station each day. This won't change. Their behaviour is based on anxiety over missing their trains (they can control private car use more easily than bus timetables/capacity) and the weather (riding a bike in January? Clothing, footwear and bags?).

It is maintained that the site is unsuitable for a garden settlement because it has a main railway line running through the middle of it. No amount of crossings can join the garden settlement in to one settlement. The proposal is for two settlements divided by a railway line, neither of which satisfy garden settlement principles.

The NPPF states "Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting (my emphasis), should require clear and convincing justification". (Paragraph 194). In its consideration of planning applications, TWBC

requires an assessment of the impact of the proposed development on all heritage assets within a kilometre. Applying its own metric to its own development proposals the following approximate numbers of heritage assets in, or within a kilometre of CA1 are; 2 Grade 1, 1 Grade 2* and 70 Grade 2 listed heritage assets. This is a high number of assets that should be protected. Tudeley is particularly sensitive in terms of heritage around All Saints Church, which is a Grade I listed building and the only church in the world with all of its stained glass windows designed by Marc Chagall. Significant consideration should have been given to the heritage and conservation impact of the development proposed in this area on the setting of this unique global heritage asset.

There are clearly a significant number of considerations that need to be taken into account when deciding on a significant allocation for a garden settlement but the evidence set out above demonstrates that the PSLP has failed to comprehensively assess the site at Tudeley. For this reason the Plan is unsound.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Issues and Options paragraph 1.17	
Question 4	
Do you consider that the Local Plan:	
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Purpose of the plan

1.1 The local plan spatial vision is to put 85% of the 2020-2038 homes in two locations Paddock Wood(including East Capel) and Tudeley. Nothing spatial about this -it is concentration. Statement untrue and therefore unsound

The Local Plan Process

1.12 As TWBC are still pursuing 2 large settlements as their proposed plan. I do not believe there has been any change to their ideas as a result of the covid 19 outbreak. The main thrust of their proposals to build 85% of their requirement in Paddock Wood and Tudeley remains.

The two public consultations have been duly carried out, but I do not think progress has been made until they listen to the views of local people as they continue to doggedly keep to their original 'so called plan'. If TWBC ignore the community it is hardly a consultation.

Issues and Option 1.17

Early views were sort in 2017. This process included the expansion of Paddock Wood but wholly and entirely excluded any mention of a garden settlement at Tudeley.

Given that one of the key issues raised as a result of the Issues and Options consultation was the protection of the green belt, the exclusion of the large amount of development in Tudeley (on Green Belt) from the Issues and Options process undermines the soundness of this plan and undermines the effectiveness of this current public consultation.

I would also like to raise the issue that since so many objections and concerns have been raised since Reg 18 the communities in the TWells borough have voted to change their representatives in their areas, in the elections of May 2021 -which just highlights how poor the original consultative documents and process was in 2017. If TWBC ignore the community it is hardly a consultation. It has therefore not been positively prepared.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Introduction

TWBC would need to not concentrate 85% of the housing need on 3 sites. More attentionshould be made to look at further sites to the East of the borough outside ANOB and Greenbelt More agile thinking is required and less of what is easy. A deluge of data has been accumulated to get the data to fit the desired 'Plan'.

Issue and Options

TWBC need to take on board what the local population are saying and not ignore these grave concerns.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Through our duty to co-operate discussions and regular meetings, it is clear that SDC and TWBC share similar issues and ambitions, including:

- . Providing high quality and well-designed development that meets identified needs.
- . Encouraging the re-use of previously developed brownfield land in sustainable locations.
- . Providing infrastructure to support sustainable growth.
- . Conserving and enhancing the AONB.
- . Protecting the Green Belt.

SDC continues to work with TWBC to address strategic cross boundary issues. Engagement has been constructive, active and on-going during the production of our respective Local Plans. In this regard, SDC is content that TWBC has met the requirements of Section 33A of the Planning and Compulsory Purchase Act 2004. We look forward to further engagement in relation to strategic matters and the possible production of a revised Statement of Common Ground.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)
---	--

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

At this stage, SDC is content to rely on written submissions to express its views on TWBC's emerging Local Plan. Officers will inform you as soon as possible should this position change.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Hilary and Nick Andrews

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Para 2.16 Population Forecasts

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

An estimated population increase of 6155 over the plan period 2020-2038 does not necessitate the building of nearly 13,000 new homes in the Borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Revise its house building targets

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	British Horse Society
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 2: Setting the Scene	
Paragraph number: 2.39	
Question 4	
Do you consider that the Local Plan:	

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Active travel should include horse riding, since the alternative to riding a horse to a venue is to transport it in a horsebox.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In this paragraph after walking, delete "and cycling" and insert "cycling and horse riding".

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	No, I do not wish to participate in examination hearing session(s)
--	--

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Mr Adrian Cory

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 2: Setting the Scene

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not effective
<input type="checkbox"/>	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I strongly object to the designation of Hawkhurst as a "Rural Service Centre" (2.4; 2.5). The previous plan incorrectly designated the village as a town, and the choice of this planning jargon term appears to confirm suspicions that TWBC are determined to try to obscure the fact that the correct status of Hawkhurst is a village. To describe Hawkhurst as a "Rural Service Centre" implies that the village offers no more than a collection of services for the surrounding area. That is objectionable and misleading; it obscures the fact that the village is a thriving community in its own right and deserving of recognition as such. Hawkhurst is a village, to be counted amongst the other Wealden villages in the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Hawkhurst must be recorded using its correct designation as a village, and the current implication, that it is an entity sui generis and separate from the village status afforded to other Wealden villages, removed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Introduction

Whilst the main thrust of the Cranbrook Conservation Area Advisory Committee's comments relate to the conservation and heritage of Cranbrook and Sissinghurst, there are some wider issues which are also of concern. In this response we will use the Headings used in the Local Plan document with page or paragraph numbers for extra clarity.

Section 2 :Setting the scene (P 20-28)

Why are the housing projections for TWBC so high? Using the Councils own forecasts of population growth (Table 1, p 24) the population is set to rise by just over 6000 in the 12 year period from 2020 -38. Yet the housing needs are assessed at 12,200 new homes over the planperiod (para 2.8)- that represents over 2 additional houses for each new resident based on local housing need ! . Clearly, we understand the government agenda to build more houses but why so many and in the already overcrowded SE? Why is TWBC not challenging this data?

The impact of Brexit, with a much poorer economic outlook and reduced immigration is likely to have a major impact on housing need. In addition, government policies intended to 'rebalance the North' and other deprived parts of the country must surely mean that greater investment, jobs and new houses will be needed in other parts of the country. The pandemic has also led to a movement away from larger cities to rural areas, as people use the opportunity for more home based working (supported by likely changes in rail fare structures). Given the comparatively expensive housing stock in Tunbridge Wells district, as set out in this section, this is unlikely to put more pressure on this area and could in fact result in a decreased demand as people choose to relocate to cheaper areas, further from London. This Local Plan needs to reflect this changing reality. It is unclear whether it has.

As well as the considerable additional land which will be needed for the projected new housing, there are other important negative impacts, such as loss of countryside, additional transport congestion, pollution and more greenhouse gases. All this goes against other worthy aims about reducing emissions, protecting the countryside etc etc. Concerns are expressed in the Local plan about the Hawkhurst crossroads - the whole A 229 and the roundabout north of Cranbrook will be massively affected by the proposed housing developments.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

No, but other members of the CCAAC may wish to do so.

Question 1	
Respondent's Name and/or Organisation	James Dawes
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph Numbers: 2.24 - 2.31	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No

Complies with the Duty to Cooperate

Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan claims precedence over Neighbourhood Plans if they are superseded by strategic or non-strategic policies that are adopted subsequently or they conflict with the Council's strategy.

If the council want to retain the support of local people they must give precedence to the neighbourhood plans otherwise the council will not take the population with them. The people who live in a parish know best the problems associated with housing costs, traffic and schooling and if the council is able to only adopt the aims of the neighbourhood plan when it coincides with their wishes but ignore it when it does not, then the neighbourhood plan is a useless document – advisory at best.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 2.26 and 2.27 need to be re-drafted in the following terms:

2.26 As explained at paragraphs 29 and 30 of the NPPF, neighbourhood planning gives communities the power to develop a shared vision for their area, ~~but that neighbourhood plans must not promote less development than set out in strategic policies for the area, or undermine those strategic policies.~~

2.27 The NPPF also clarifies that once a neighbourhood plan has been brought into force, the policies it contains take precedence over existing non-strategic policies in a local plan covering the neighbourhood area, where they are in conflict; unless they are superseded by strategic or non-strategic policies that are adopted subsequently.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because the local council should not be able to over-rule a neighbourhood plan and they will always attempt to garner more power to themselves if allowed.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Paragraph Number 2.33 (Flooding)	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

2.33 identifies that to the north and west of Paddock Wood the land is “*particularly prone to flooding*”. The last major flood (2019) covered all of the area north of the railway line to a depth of almost 1m in places and generally to at least 0.75m overall. This link gives an indication of how serious it was.

<https://www.kentlive.news/news/kent-news/incredible-drone-footage-shows-flooding-3673436>

This is just one of several major floods experienced in the Medway Valley over just a couple of decades. In all cases serious property damage occurred and no amount of “ditch or drain clearing” has made any difference at all. In fact, by building even more in the Medway valley, the situation has worsened and so the next major flood may cost lives. Building another 30,000 homes in the Medway Valley is criminal. (TWBC 11k + Tonbridge & Malling Council 6.4k + Maidstone Borough Council (2 new garden villages) + developments already approved in Yalding.

The proposals to control flooding are quite simply ridiculous. North of the railway in Paddock Wood will require the movement of over 20 million tons of earth (brought in from elsewhere!) to raise homes in that area by 1m above current ground level.

The Plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Limit building in the Medway Valley to areas that have NOT experiencing flooding in the past 4 decades.

There are plenty of other sites that are brownfield, not in the green belt or simply away from the Medway Valley, but TWBC seems far too determined to destroy existing homes and then place new builds at risk of flooding too.

The original TWBC Call for Sites identified sufficient areas around the various parishes of Tunbridge Wells Borough to avoid any risk of flooding and to meet the housing need targets. TWBC, quite by surprise to Capel Parish Council, chose 2 sites for 95% of their targets in the full knowledge that flooding was a major issue.

The whole plan is Unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

TWBC cannot be trusted to reveal the truth about the sites they have chosen, and the ones they have deliberately crossed off as being unsuitable. Too much data is inaccurate.

Eg. Our plot (which we offered for building just 3 houses) is 200m from the railway line and was considered unsuitable as "too close to the railway line". By contrast, the proposed Tudeley Garden Village of 2,800 homes has a railway line running through the middle of it that takes diesel trains almost hourly and nuclear waste from Dungeness power station, yet that site is considered a perfect location. The Plan is utter nonsense.

TWBC consultants claim that there are NO diesel trains on that route to pollute the air. That is a clear demonstration of how little the consultants actually researched the facts to form a conclusion which is totally inaccurate.

One Capel Parish Council Councillor is a train driver on that route. I think his word is more reliable than those of desktop consultants.

What is even more annoying is that TWBC paid for that consultation out of our Council Tax funds, adding to their recent money wasting projects that they are more than a little embarrassed about.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

There is no sustainability in the proposals regarding Tudeley Garden Village, Capel Parish East and Paddock Wood West as the destruction of animal habitats and the impact upon the heritage in the area is totally unsustainable.

The PSLP is Unsound.

Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Waste Management

Paragraph 2.22

The County Council welcomes the inclusion of waste in the list of types of infrastructure that will need to be delivered alongside growth. KCC recommends that the sentence that states 'local waste collection, recycling and disposal, waste' is altered to facilities to support local waste collection, bulking, recycling and disposal.

Public Rights of Way

Paragraph 2.23 / 2.39

The County Council supports the reference to walking and cycling and the promotion of Active Travel within this chapter. However, KCC requests specific mention of the Public Rights of Way (PRoW) network and the opportunities for its enhancement through new development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 2: Setting the Scene

Pg21. Paragraphs: 2.4, 2.17-2.19, 2.21-2.27, 2.33, 2.34, 2.41

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the nest few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need **“It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly”** There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough’s recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley , Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coup[led with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion **“if possible to provide betterment”**. If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in Hgh Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unstainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is **“and where possible, improve air quality”**. If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these **“The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change”**. The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the nest few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that

the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need "It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly" There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough's recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley, Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coup[led with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion "if possible to provide betterment". If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in Hgh Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unsustainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is "and where possible, improve air quality". If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these "The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change". The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around

our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Respondent's Name and/or Organisation Mrs Carol Richards

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 2: Setting the Scene

Demographic and housing

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not effective because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The joint Sevenoaks and Tunbridge Wells Strategic Housing Market Assessment (Sep 2015) (Table 14) identifies a projected 37% increase in the size of the 60-74 age group and an 83% increase in the size of the over 75 age group (both for the TWBC area). By 2033, those over 60 will account for just over 30% of the population (joint area) Recent research by KCC (Strategic Commissioning Statistical Bulletin Jul 2019 - http://www.kent.gov.uk/__data/assets/pdf_file/0018/14724/Mid-year-population-estimates-totalpopulation-of-Kent-bulletin.pdf) identifies a significant increase in the proportion of females in the 80+ age group. Noting that many females will have been affected by the recent pension age increase, there is therefore likely to be a greater need to provide social housing for elderly females.

In conclusion, more consideration should be given to developing 20/30 groups of appropriate homes—typically 2 bed bungalows - to accommodate the over 60s in many rural village locations with good bus routes to T. Wells., Retired people often contribute to volunteer work within a community and make a very valuable contribution they could also revitalize shop in the villages. Building large greenfield settlements is the wrong answer to solving the problem of an ageing population. Planning the correct housing for the elderly could reduce costs to the KCC social services budget and also reduce NHS costs by keeping the elderly population more independent. I would look to plan more homes for these individuals near Benenden too, taking advantage of the hospital there. TWBC have been so focused on pushing through two main sites they are not focusing on the demographic need. By moving an aging population into more appropriate homes for them (and not just blocks of MacCarthy and Stone)- as this will not 'encourage' older people to leave their large homes- to release their family homes for others. I shall be one of those individuals and I am not going to move out of my 5 bedroom home unless I have a choice like the above. TWBC and all councils need to be more agile in their thinking and planning for an aging demographic society.

(TWBC Comment - table and graph included within comment have been appended to this comment)

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

More bungalows are required in rural locations in pockets of 10/20

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Mrs Christine Spicer
Question 2	
Agent's Name and Organisation (if applicable)	N/A
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Key issues in the PSLP:

Page 26 paragraph 2.33

Also

SFRA

2016s4793 - Appendix C - Flood Zones (A3 tiles - 31 to 38) – RevB

Pages 1,2, 6, 7 & 8 in particular (composite picture shown below)

Compare the proposed development area with the flood zones:

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Under key issues in the PSLP:

Page 26 section 2.33

SFRA

2016s4793 - Appendix C - Flood Zones (A3 tiles - 31 to 38) – RevB

Pages 1,2, 6, 7 & 8 in particular (composite picture shown below)

Compare the proposed development area with the flood zones:

Of particular concern are the dark blue and lilac areas, flood zones 3a and 3b. In the PSLP it rightly notes that the key issue/challenge is “ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, to provide **betterment**.”

Mitigation against flooding has been poor in the area in the past. Parts of Paddock Wood continue to flood regularly, with surface water flooding particularly an issue. Flood mitigation wasn't sufficient in the recent Persimmon development off Green Lane to stop the field earmarked for a new school to flood this January. It wasn't even a very wet winter. Drainage across Paddock Wood is inadequate, but it also has to be said that with the water table so high, there is nowhere for water to go. You can dig a pond as deep as you like. The water will fill it and the water table will not decrease. It may be possible to mitigate against flooding but at what cost? The inspector needs to look very carefully about the financial viability of building on this land, including careful examination of the green field runoff rates. In particular, the land to the West of Paddock Wood (that is East Capel plots 309, 141, 142), south of railway (the northern parts of plots 79 and 20 in Paddock Wood) and north of the railway (plots 51, 315, 316, 318, 319, 340, 347, 402, 216 and 218) is not suitable for building on, in my opinion. Thus this part of the plan is not sound. I call on the inspector to pay particular attention to this aspect of the plan. Regarding flooding, there has to be **betterment** or no building at all.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Joshua Boyle

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a young person, who is a soon-to-be university graduate. I have lived in Paddock Wood for 13 years, and in that time, I have not seen any chance for me to rent in Paddock Wood. I am a university student, and even with a graduate job, I could not afford the so-called affordable housing; how will someone who is not a graduate afford a house? Average rentals for a 1 bedroom apartment in Paddock Wood are £825 per month, 4 bedroom is £1,850 per month. This median average does take into consideration the grossly inflated wages of commuters travelling to London; what it does not do is consider the average wages of those who live and work in Paddock Wood, and what is affordable for the current residents within Paddock Wood.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The 2020 Planning White Paper states that 10% of all housing should be affordable. I would suggest upping this, and also placing caps on the maximum price for these units, as well as assessing the income of those interesting in buying or renting from TWBC.
<https://commonslibrary.parliament.uk/research-briefings/cbp-7747/>

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is necessary as I would provide a younger voice that wants to move back to Paddock Wood once graduating, and being able to afford my own home.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Joshua Boyle
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Short of the few jobs that will be generated by the few corner shops, there is 0 considering for employment options. TWBC has always neglected the needs of 16-25 year olds in Paddock Wood. Additionally, there are plans for several new primary schools; why are there no plans for secondary schools?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Create more diverse employment opportunities with more retail units, as well as investigate creating an annex for Mascalls, or an entirely new Secondary school.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Axiom Developments Limited (hereafter referred to as Axiom) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Colebrooke Park, which Axiom is promoting for employment-generating development as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The Site

1.2.1 Our client has been promoting land at Colebrooke House for a business park within an attractive parkland campus setting. The site was promoted via the original Call for Sites process in 2016 (site 101) and representations were made at the previous Reg 18 consultation. The site boundary is shown in Figure 1.

1.2.2 The site lies outside of the current settlement boundary for Royal Tunbridge Wells and within both the High Weald Area of Outstanding Natural Beauty (AONB) and the Green Belt.

1.2.3 As a result of the recent A21 dualling project, the site benefits from direct access onto the A21 via the Fairthorne junction. This now provides the site with excellent access to the national road network, whilst also being well-located in relation to the existing employment areas along Longfield Road. The A21 improvements present an excellent opportunity for the site to make a substantial contribution to the local economy through development of the site.

1.2.4 The 8.5ha site comprises a large 19th century residential property set in parkland grounds. Whilst being habitable, the property is currently in need of repairs following a period of under-investment. Its value as a residential property has been substantially affected as a result of the A21 dualling works.

[TWBC: see full representation attached for Figure 1: Proposed allocation site boundary].

1.2.5 There is a unique opportunity to provide employment-generating development which makes the most of the existing characteristics of the site. For example, this could take the form of a high-quality business park, or other employment-generating use set within an established parkland setting and based around the existing 19th century Colebrooke House.

1.2.6 The site provides an opportunity to provide an attractive business location, accessible to the A21 as well as local businesses and services. A Vision Document has been prepared and was submitted with our Regulation 18 representations previously which shows that the site would be capable of delivering around 11,750 sqm of employment-generating floorspace, which would be capable of supporting between 885 and 1,437 jobs if in office use.

1.2.7 The Council's Economic Needs Study (ENS) demonstrates the need for good quality economic development land locally. This was also backed up by responses from stakeholders identifying Tunbridge Wells as a good office and industrial location. ENS paragraph 9.66 in particular identifies demand for offices, and especially higher quality Grade A accommodation in accessible locations, which is the type of development proposed at Colebrooke House. It would score well against all of the bullet points set out in ENS paragraph 10.29, i.e. excellent accessibility; public transport and parking availability; and it being an area with a critical mass of employment use and amenities which would be attractive to investors.

1.2.8 The development would have excellent strategic transport links to the newly upgraded A21 as well as providing opportunities to create and improve existing pedestrian, cycle and public transport links to North Farm, Tunbridge Wells and Tonbridge. Pedestrian, cycle and emergency access links could also be provided into the land to the west, which is also proposed for development as part of the Local Plan proposals.

1.2.9 In respect of deliverability, the site has no planning history of relevance nor a history of unimplemented permissions, and there are no known impediments to the sites being phased for potential development. There is an excellent opportunity to deliver a high-quality employment development scheme during the plan period.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.5.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision has been duplicated here - see full representation attached].

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives have been duplicated here - see full representation attached].

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough.

1.5.9 However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.10 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet borough-wide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.11 With the above modification, the objectives and vision will then be positively prepared.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Axiom Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We generally support the Council's overall strategy and do not object to the proposal for the site to be removed from the Green Belt and safeguarded for future employment uses. However, for the reasons set out in these representations, we believe there are strong arguments in favour of allocating the land for development now.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough.

1.5.9 However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.10 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet borough-wide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.11 With the above modification, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Barth-Haas UK Ltd (herein 'BarthHaas') in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to BarthHaas' existing site at Hop Pocket Lane, Paddock Wood.

1.2 The site

1.2.1 The site comprises the Barth Haas UK headquarters and production facility, which is located east of Hop Pocket Lane in Paddock Wood.

1.2.2 Barth Haas UK forms part of the Barth Haas Group – who are the world's largest supplier of hop products and services. It operates across all continents and provides support to its customers and partners throughout the production and sale cycle. This includes research and development, breeding /growing and marketing. As is recognised in PSLP paragraph 5.236, Paddock Wood evolved around the production of hops, and so as a company who continue to trade in hop products, BarthHaas provides an important link with the history of the town, as well as being an important local employer in its own right.

1.2.3 Our client is currently considering options to expand their facilities. This is likely to require relocation, with an alternative location in or close to Paddock Wood preferred, which will then free up the site. The existing premises are dated and no longer suit the needs of modern businesses – especially being an imposing five storey building – it is likely that the site would need to be redeveloped in order to be attractive to future occupiers.

1.2.4 The extent of the site is shown in Figure 1 overleaf.

[TWBC: for Figure 1: Site Location Plan see full representation attached]

1.2.5 The site was promoted for development through a response to the Regulation 18 consultation draft Local Plan.

1.2.6 The site is very close to both the town centre and the railway station, the latter being accessible via a pedestrian access point immediately south of the site.

1.2.7 The site was assessed by the Council as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA). This concluded that the site could be suitable to be redeveloped to accommodate between 40 and 140 dwellings. The SHELAA concludes that the site is suitable, available and deliverable for such a use, and is in a sustainable location. It is therefore suitable to be allocated for this form of development.

1.2.8 Strategic Sites Masterplanning and Infrastructure Main Report paragraph 4.152 also recognises that some other town centre uses (e.g. retail and leisure) may also be appropriate in this location.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.5.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP wording of Vision has been duplicated here - see full representation attached]

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP wording of Strategic Objectives have been duplicated here - see full representation attached]

Response

1.5.7 BarthHaas broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough, including new high quality employment floorspace which would be suitable for local companies such as BarthHaas to relocate to.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of BarthHaas in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, and especially the identification of the existing BarthHaas site as being suitable for residential-led development.

1.6.3 However, we object to the wording of Policy ED2 for the reasons set out above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and Objectives

[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP_2003), Vision and Objectives (PSLP_2005), Policies STR1 (PSLP_2006), STR4 (PSLP_2008), STR9 (PSLP_2015) and Section 6 Development Management Policies (PSLP_2016)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The site

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.5.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision has been duplicated here - see full representation attached]

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives have been duplicated here - see full representation attached]

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing and in a manner that best compliments the distinctive qualities of the Borough

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a

greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read:

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing and in a manner that best compliments the distinctive qualities of the Borough

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3	

To which part of the Local Plan does this representation relate?

Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and Objectives

[TWBC: the full representation attached has been divided between Policy STR/HA (PSLP_2053), Vision and Strategic Objectives (PSLP_2054), Policy STR1 (PSLP_2055), Policy AL/HA3 (PSLP_2056) and Development Management Policies (PSLP_2057)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Cedardrive Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation – referred to herein as the Pre-Submission Local Plan (PSLP). 1.1.2 These representations relate to land at Hawkhurst Golf Club, which Cedardrive is promoting the construction of a new relief road to reduce congestion in Hawkhurst together with residential redevelopment and other amenities as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The site

1.2.1 The Hawkhurst Golf Club site currently measures 20.69 hectares and comprises a nine-hole golf course, formed by 1968 on the land on the north western side of Hawkhurst, as shown in Figure 1.

1.2.2 The site is irregular and sinuous in shape stretching from the A268 to the south, north along the A229 as far as Gills Green. The A229 Cranbrook Road forms the site's eastern boundary.

1.2.3 The main buildings on the site comprise the existing club house, and two squash courts. The clubhouse building lies at the southern end of the site where the principal vehicular access is located from the A268 High Street leading to an area of parking for visitors. This part of the site is bordered on either side by residential properties with further residential and farm/equestrian properties adjoining the golf course to the west and south-east.

[TWBC: see full representation attached for Figure 1: Aerial view of the Appeal Site (Courtesy of Google Earth 2021)]

1.2.4 The southern part of the site borders the Highgate area of Hawkhurst, which comprises the main village centre. The northern part of the site borders the Gills Green area of Hawkhurst. A new care home has recently been constructed to the east of the northeast of the site on Cranbrook Road, immediately opposite the northernmost part of the site.

1.2.5 The land in the southeast corner of the Site (formerly Springfield Nursery) was granted outline planning consent at appeal (all matters except access reserved) in November 2020, for the erection of up to 24 dwellings on the site (reference 17/02192/OUT). The site is served by an existing access onto the A229 Cranbrook Road to the east.

Regulation 18 Local Plan

1.2.6 The site was proposed to be allocated in the Regulation 18 draft Local Plan, published for consultation in September 2019.

1.2.7 Policy AL/HA1 (land forming part of the Hawkhurst Golf Club course to the north of the High Street) allocated the site for residential development providing approximately 400 – 450 dwellings, a relief road, and community centre (with associated public parking provision).

1.2.8 The policy stated that development on the site should accord with the following requirements:

(1) The development proposals to be informed by a masterplan, which sets out how high levels of permeability will be provided through the site and linkages with the wider surrounding areas will be established.

(2) No buildings to be constructed in the open space landscape and buffer area defined on the site allocations plan, reflecting landscape and topographical constraints.

(3) The provision of a new road through the site to act as a relief road to the existing road network serving Hawkhurst, and to reduce traffic congestion at and around the crossroads of the A268 Rye Road with Cranbrook Road/Highgate Hill at the centre of Hawkhurst.

(4) The relief road shall be fully constructed and brought into use, the closure of the northern arm of Cranbrook Road (at the Rye Road crossroads), and the completion of the public realm works shall be undertaken in accordance with an appropriate timetable, which will be agreed as part of any planning application.

(5) An assessment of the new relief road upon the viability of the commercial area located along the A268 Rye Road.

(6) Transport modelling to inform the location of junctions, traffic lights, bus stops within the site, new/improved pedestrian footways and crossings, to include consideration of the wider settlement centre. Any proposed new or improved junctions with Cranbrook Road to include an assessment of the impact upon trees and the requirement for engineering works, reflecting the steep tree covered banks that are currently present along parts of the site boundary with Cranbrook Road.

(7) The design and layout to be informed by a comprehensive energy and climate change strategy.

(8) Air quality modelling required to inform the location and design of road junctions in close proximity to sensitive receptors, including Marlborough House School and Hawkhurst House Care Home.

(9) The provision of a pedestrian/cycle link through the site to link Gill's Green to the commercial centre of Hawkhurst. Opportunities for other pedestrian/cycle links to be explored, including through the Springfield area located to the north east of the site.

(10) Provision of public electric vehicle charging points and car share facilities in accordance with Policy TP 2: Transport Design and Accessibility.

(11) Development proposals will need to demonstrate a positive contribution to Biodiversity Opportunity Area targets.

(12) Demonstration through the submission of relevant and proportionate heritage investigations that the proposals have taken account of Holman's farmstead and other heritage assets located in proximity to the site and will not have a materially harmful impact upon these assets.

(13) Water courses; SUDs mitigation to protect areas within the Environment Agency's flood zone 3.

(14) Provision of on-site allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation.

(15) The provision of land to accommodate a community facility, to include adequate public parking within the site, or alternatively contributions towards the provision of the facility including adequate public parking on an alternative suitable site which shall be agreed through the planning process.

1.2.9 Cedar drive provided representations at the Regulation 18 stage supporting the draft allocation.

Planning application and non-determination appeal

1.2.10 A planning application was submitted for a development of up to 417 dwellings (since reduced to 374) and a new relief road connecting the A229 Cranbrook Road and A268 High Street.

1.2.11 One of the key benefits of the scheme is a new, public road through the centre of the site which would link the A268 High Street and A229 Cranbrook Road. Combined with the proposals to amend the Highgate crossroads, by closing off the northern arm, this would effectively result in the A229 being diverted through the site.

1.2.12 This new relief road will remove the need for some traffic movements to have to pass through the heavily congested A268/A229 Highgate crossroads in the centre of Hawkhurst. This will improve the performance of that junction, reducing queue lengths and journey times, even taking into account both the proposed development and other committed developments in the area. As a result, the proposals would result in an improvement in traffic conditions at the crossroads, with significant associated air quality benefits within the recently declared Air Quality Management Area (AQMA) on Cranbrook Road. KCC Highways has confirmed that the scheme would improve traffic conditions, as set out later in these representations.

1.2.13 The proposals also included a care home, doctor's surgery and/or community hall or similar use, a public car park, public park, open space, woodland planting and recreation facilities and other associated works. Detailed permission was sought for the road, with outline planning permission sought for the remaining development.

1.2.14 Without prior warning, the Council removed the Golf Club draft allocation from the Regulation 19 Local Plan, which was first published in draft form in December 2020. Following confirmation from planning officers in January 2021 that the application proposals would no longer be supported, an appeal against non-determination has since been lodged, which is due to be heard at a public inquiry in September 2021.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.5.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: representation sets out duplicate of PSLP Vision here - see full representation attached]

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: representation sets out duplicate of PSLP Strategic Objectives here - see full representation attached]

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 Furthermore, we consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing'

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Cedardrive Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of

supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We object strongly to the unjustified removal of Hawkhurst Golf Club from the draft Local Plan, which renders the plan unsound for the reasons set out above.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 Furthermore, we consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing'

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land within Countryside Properties' control adjacent to the Crane Valley, Cranbrook which forms part of proposed allocation reference AL/CRS 2.

1.1.3 The site, combined with land proposed for allocation under AL/CRS 1, currently cover land that represents a single larger Local Plan allocation contained within the adopted Site Allocations Local Plan 2016 Policy AL/CR 4. These sites have traditionally always featured as a single allocation owing to the fact that access to the CR2 land is required through site CR1.

1.1.4 In respect of progress of the site to date; Persimmon Homes secured outline planning permission prior on the CR1 land prior to surrendering its option to another developer. Nonetheless, it is understood that a reserved matters application is in preparation for the CR1 land.

1.1.5 In the meantime, Countryside remains committed to bringing the CR2 site forward at the earliest available opportunity once a suitable access can be achieved via the CR1 land.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the duty to cooperate, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.4.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: PSLP Vision has been duplicated here - see full representation attached].

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives hav been duplicated here - see full representation attached].

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuaded in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the continued allocation of our client's land in Cranbrook, albeit with some modification to the affordable housing requirement in line with the adopted allocation.

1.5.3 Finally, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuaded in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Pembury, which Countryside is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.4.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: PSLP Vision is duplicated here - see full representation].

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives is duplicated here - see full representation].

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The

purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuaded in full and in a manner that best complements the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land adjacent to Countryside Properties' existing site on Highgate Hill, which is now complete following a successful permission allowed at appeal in 2015. Countryside is promoting this additional land as a logical 'phase 2' (SHELAA Site 86) residential redevelopment to mirror the quality of the established scheme.

1.1.3 Based on the current national and local planning context, we consider this additional site to be suitable for development and we consider there to be 'exceptional circumstances' to release this additional land within the High Weald Area of Outstanding Natural Beauty ('AONB'). As a consequence we object to its omission,

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.3.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.3.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.3.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.3.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.4.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: PSLP Vision is duplicated here - see full representation].

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives is duplicated here - see full representation].

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at Highgate Hill, Hawkhurst (Site 86) which is unsubstantiated by evidence. Furthermore, we object to the limited growth promoted around Hawkhurst.

1.5.3 Furthermore, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Hawkhurst.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and Objectives

[TWBC: the full representation attached has been divided between Policy STR/SS1 (PSLP_2160), Vision and Strategic Objectives (PSLP_2161), Policy STR1 (PSLP_2162) and Development Management Policies (PSLP_2163)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Church Farm, Church Road that forms part of the strategic expansion of Paddock Wood (STR/SS1).

1.1.3 The site is allocated in the current Local Plan (Site Allocations Local Plan 2016, AL/PW3A) and is within the 'Limits of Built Development'.

1.1.4 Outline planning permission for 300 dwellings and a new country park, together with associated highways, landscaping, allotments, flood mitigation works including attenuation basins and open space was granted by Tunbridge Wells Borough Council (TWBC) in February 2018 for (reference: 14/504140/HYBRID).

1.1.5 A Reserved Matters application (reference: 19/03655/REM) for the full 300 dwellings was approved by TWBC in July 2020 on part of the site. This approved the full 300 dwellings, but on only part of the developable area. The consented 300 unit development has recently been implemented and is underway.

1.1.6 As part of the overall masterplanning and detailed design process, the reserved matters application identified that an increase in residential density across parts of the site was appropriate, and as such identified a future area of potential additional development within the scheme for a later stage. As such, there is the opportunity to make efficient use of the land available and utilise it to provide further residential development without a reduction in the overall country open space provision and within the area originally envisaged for residential development.

1.1.7 Following pre application advice discussions with TWBC and due to changes resulting from recent planning case law, it is no longer permissible to seek to vary the description of a planning permission through a Section 73 application. Therefore, Countryside Properties have submitted a standalone detailed planning application for the construction of a further 60 dwellings on the site known as phase 2.

1.1.8 Whilst this application has the potential to overtake the Local Plan process, this representation is submitted in parallel to demonstrate that the land as a whole is Countryside.

1.1.9 Based on the current national and local planning context, we consider this site to be suitable for such additional development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.4.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: Vision from PSLP was duplicated here - see full representation attached].

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: Strategic Objectives from PSLP were duplicated here - see full representation attached].

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuaded in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy relies heavily on the delivery of Tudeley Village and the overly optimistic projections to the delivery of housing proposed.

1.5.3 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that Church Farm is a consented and implemented site and that the Phase 2 element is distinct from the wider STR/SS1 Eastern Parcel (being the areas which outside of the current Limits of Built Development). The Plan should reflect the potential for the Church Farm Phase 2 element to be delivered in advance of the other parts of the Eastern Parcel in a form that reflects its physical position contained within a consented and implemented development. This could be achieved by means of a separate site allocation policy for Church Farm Phase 2 and amendments to the Policies Map and Map 28.

1.5.4 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Church Farm, Church Road that forms part of the strategic expansion of Paddock Wood (STR/SS1).

1.1.3 The site is allocated in the current Local Plan (Site Allocations Local Plan 2016, AL/PW3A) and is within the 'Limits of Built Development'.

1.1.4 Outline planning permission for 300 dwellings and a new country park, together with associated highways, landscaping, allotments, flood mitigation works including attenuation basins and open space was granted by Tunbridge Wells Borough Council (TWBC) in February 2018 for (reference: 14/504140/HYBRID).

1.1.5 A Reserved Matters application (reference: 19/03655/REM) for the full 300 dwellings was approved by TWBC in July 2020 on part of the site. This approved the full 300 dwellings, but on only part of the developable area. The consented 300 unit development has recently been implemented and is underway.

1.1.6 As part of the overall masterplanning and detailed design process, the reserved matters application identified that an increase in residential density across parts of the site was appropriate, and as such identified a future area of potential additional development within the scheme for a later stage. As such, there is the opportunity to make efficient use of the land available and utilise it to provide further residential development without a reduction in the overall country open space provision and within the area originally envisaged for residential development.

1.1.7 Following pre application advice discussions with TWBC and due to changes resulting from recent planning case law, it is no longer permissible to seek to vary the description of a planning permission through a Section 73 application. Therefore, Countryside Properties have submitted a

standalone detailed planning application for the construction of a further 60 dwellings on the site known as phase 2.

1.1.8 Whilst this application has the potential to overtake the Local Plan process, this representation is submitted in parallel to demonstrate that the land as a whole is Countryside.

1.1.9 Based on the current national and local planning context, we consider this site to be suitable for such additional development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.4.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: Vision from PSLP was duplicated here - see full representation attached].

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: Strategic Objectives from PSLP were duplicated here - see full representation attached].

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'. 1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy relies heavily on the delivery of Tudeley Village and the overly optimistic projections to the delivery of housing proposed.

1.5.3 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that Church Farm is a consented and implemented site and that the Phase 2 element is distinct from the wider STR/SS1 Eastern Parcel (being the areas which outside of the current Limits of Built Development). The Plan should reflect the potential for the Church Farm Phase 2 element to be delivered in advance of the other parts of the Eastern Parcel in a form that reflects its physical position contained within a consented and implemented development. This could be achieved by means of a separate site allocation policy for Church Farm Phase 2 and amendments to the Policies Map and Map 28.

1.5.4 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.4.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuaded in full and in a manner that best complements the distinctive qualities of the borough'. 1.4.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.4.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Cranbrook Conservation Area Advisory Committee

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and Objectives

Question 4

Do you consider that the Local Plan:

Is sound

Don't know

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction Whilst the main thrust of the Cranbrook Conservation Area Advisory Committee's comments relate to the conservation and heritage of Cranbrook and Sissinghurst, there are some wider issues which are also of concern. In this response we will use the Headings used in the Local Plan document with page or paragraph numbers for extra clarity.

Section 3: Vision and Objectives (P29-32)

Overall this whole chapter feels dated - not looking at the new realities such as we identify above under Setting the Scene. If this is to be an effective document for 12 years it needs to think more creatively.

3.9 We broadly support this para and its recognition of the High Weald AONB landscape, the conservation areas and historic core. However, the AONB around Cranbrook and Sissinghurst should provide a considerable constraint on development and this needs greater recognition in the Local Plan in respect of any future new housing.

Also what about using redundant floorspace above retail in town centres to meet some of the housing targets; this could be positive in delivering small units for young people, where there is often most demand rather than the 4/5 bedroom houses beloved of developers currently .

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

No, but other members of the CCAAC may wish to do so

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Crest Nicholson

Question 2

Agent's Name and Organisation (if applicable) Barton Willmore

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No(s) 3.1-3.16

[TWBC: For further comments by Crest Nicholson, please see Comment Numbers PSLP_2064, PSLP_2066-2074, and PSLP_2077]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

3.0 TWBC LOCAL PLAN/VISION AND OBJECTIVES

“Support.”

3.1 Crest commends TWBC for the amendments made to the Reg 18 version of the Plan to formulate this Reg 19 Plan, particularly in respect to the policies regarding development at Paddock Wood, as it significantly improves the ability to understand the Plan and policies. That said, however, the Local Plan is still very long, as are many of the policies, and could be further simplified and edited to make it easier to read, navigate and comprehend.

i) Vision and Objectives

3.7 Section 3 of the TWBC Reg 19 Local Plan provides a high level “vision” of what the Borough will look like come 2036, and beyond. This is set out in two “Vision and Objectives” (Nos 1 & 2).

3.8 Crest supports these Visions and Objectives, and considers they provide a robust framework upon which more detailed policies are subsequently prepared in the later section of the Local Plan.

2 <https://tunbridgewells.gov.uk/planning/planning-policy/local-plan/evidence>

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

3.2 The Plan should be read as a whole; therefore, it should be as concise as possible with a minimal amount of repetition. This will also remove any discrepancies between slight deviations in wording of different policies.

3.3 Where policies refer to other policies, it is suggested that this is moved to supporting text like the Council has done in paragraphs 6.311 and 6.312 Housing Density. This occurs in many policies, but a particularly poor example is Policy EN21. A more consistent and appropriate approach like that taken in paragraphs 6.311 and 6.312 would inform the reader of the relevant policies to be taken account of, but without it being repeated within individual policies.

3.4 No Policies Map has been published, which makes considering the Local Plan as a whole difficult, as well as when trying to comprehend references made to the Policies Map.

3.5 The Evidence Base² is extensive and relatively robust, albeit we consider that greater clarity could be provided in certain areas, particularly in respect of “transport infrastructure” and “secondary education provision”.

3.6 In preparing these representations, we have reviewed the relevant documents comprising the Council’s Evidence Base and draw reference throughout our respective technical responses.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council's housing delivery. As such, it is important that Crest is represented in all the relevant EiP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
- . STR/HA1 / AL/HA4 – Land off Copthall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
- . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
- . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and
- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

4.3 Dandara supports the overall vision of the Pre-Submission Local Plan and the specific aspirations for the expansion to Paddock Wood and Royal Tunbridge Wells, and also welcomes the focus on sustainable development and achieving high quality design.

4.4 The Council's strategic objectives are centred around delivering sustainable development, boosting housing supply (including affordable housing), endorsing garden village principles, high quality design, investment and delivery of infrastructure, active and sustainable travel, promoting economic growth, protecting and conserving the historic environment and natural landscapes, controlled release of Green Belt land, commitment to reducing carbon dioxide emissions and addressing climate change and working with local communities as part of the neighbourhood planning process.

4.5 The planned expansion of Paddock Wood is identified as being a key component of the Vision and Strategic Objectives.

4.6 Dandara supports these strategic objectives but suggests these objectives should be expanded, with further emphasis made on promoting healthy lifestyles, specific reference to tackling poor air quality and the regeneration of town centres in the interests of ensuring the Local Plan is positively prepared and consistent with national policy as set out by Paragraph 35 (a and d) of the NPPF.

4.7 Dandara also supports the Council's aspiration for high quality development at other settlements across the Borough which responds to the distinctive and particular character of their locations. The combination of strategic and smaller allocations form a critical component of the Council's housing strategy and are capable of being delivered in the short, medium and long-term within the Plan period.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4.6 Dandara supports these strategic objectives but suggests these objectives should be expanded, with further emphasis made on promoting healthy lifestyles, specific reference to tackling poor air

quality and the regeneration of town centres in the interests of ensuring the Local Plan is positively prepared and consistent with national policy as set out by Paragraph 35 (a and d) of the NPPF.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPF.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five

Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Fernham's control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.1.6 Fernham Homes hope to work with the Council to agree a revised proposal. In the interim, these comments explain why we are concerned about the manner in which some sites have been omitted from the plan making process.

1.2 Land at Gate Farm, Hartley Road, Hartley (Cranbrook)

1.2.1 The site to which this representation relates is located on the northern side of Hartley Road/A229 and is approximately 1.48 hectares in area. It is located to the south west of Cranbrook outside built confines but adjacent to the built up area of Hartley.

[TWBC: to view site plan see full representation attached].

1.2.2 The land sits immediately adjacent to residential development to the north and commercial buildings are located on the west side of Glassenbury Road. The site falls entirely within the High Weald Area of Outstanding Natural Beauty AONB.

1.2.3 There are several listed buildings in the vicinity of the site, including:

(i) Hartley Gate Farmhouse (Grade II listed);(ii) Hartley Farmhouse (Grade II listed);(iii) Bull Farm House (Grade II listed); and(iv) Barn 50 Yards North of Bull Farmhouse (Grade II listed).

1.2.4 The surrounding area is characterised by the settlements of Hartley and Cranbrook, residential development with in and around those settlements, commercial developments, farmsteads and agricultural buildings as well as open agricultural land.

1.2.5 To the northeast are residential properties. Opposite the site is the well-established Hartley Dyke Commercial Centre, consisting of Juniors Day Nursery, the Hartley Dyke Coffee House and Farm Shop and several other commercial premises.

1.2.6 In terms of public transport, there are two bus stops located approximately 160m to the east of the site providing a service to Maidstone Town Centre, Loose, Staplehurst, Cranbrook and Hawkhurst. Staplehurst, approximately 10km to the north of the site, provides a regular train service to London, with up to 3no. trains per hour in peak periods (travel time under 1 hour to London Charing Cross and Cannon Street).

1.2.7 The site is not subject to any wider policy designations. The Environment Agency mapping also confirms that the site does not fall within a flood risk zone.

1.2.8 A high pressure water main and overhead power lines run through the site and represent design constraints.

1.2.9 The Hartley Road frontage of the site has been subject to previous smaller scale development proposals as follows:

- 84/00175/OUT - Outline application for 8 semi detached dwellings -Refused; and• 96/00283/FUL - 3 Detached dwellings – Refused. • 17/00795/FULL - Demolition of four derelict agricultural buildings and construction of four detached dwellings with associated parking, landscaping and access from Hartley Road (Withdrawn 08/02/18 following publication of officer's recommendation to refuse in advance of Planning Committee meeting).

1.2.10 The area immediately east of the site, between the built up area and Hartley Gate Farmhouse, has been subject to a planning appeal (APP/M2270/W/18/3203543) for the erection of 8 homes. The appeal was dismissed, but in doing so the Inspector narrowed the sole issue to the effect of the proposed vehicular access on highway safety (i.e. it was suitable in all other respects). The Inspector endorsed the principal of development and had no issue with the impacts of that scheme on the AONB, the character and appearance of the area and on settlement morphology.

1.2.11 Given the suitability of Fernham's land, an outline planning permission was progressed for 27 new homes and registered under Tunbridge Wells planning application reference 19/02170/OUT. However, this application was refused by Tunbridge Wells Borough Council for seven reasons:

(1) The development would cause significant harm to the rural character of the area, would have more than a minimal impact on the landscape character of the locality, would have a detrimental impact on the landscape setting of Cranbrook and would fail to conserve and enhance the special character of the High Weald Area of Outstanding Natural Beauty. It is therefore contrary to Policies LBD1, EN1 and EN25 of the Tunbridge Wells Borough Local Plan 2006, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy 2010, the aims and objectives of the Borough Landscape Character Area Assessment 2017 and the National Planning Policy Framework 2019(2) The application fails to

demonstrate that safe and suitable access to the site can be achieved for all users. It is thereby in conflict with Part 9 of the National Planning Policy Framework 2019, and saved policy TP4 of the Tunbridge Wells Local Plan 2006.(3) There is insufficient evidence to demonstrate that the proposal can result in a net gain in biodiversity. The proposal is thus contrary to Para 170 the National Planning Policy Framework 2019(4) The proposal would harm the setting of nearby listed buildings. It is not considered that there are sufficient public benefits, or any other material considerations, that outweigh this harm. The proposal is thus contrary to saved policy EN1 of the Tunbridge Wells Borough Local Plan 2006, Core Policy 4 of the Tunbridge Wells Borough Core Strategy 2010 and the National Planning Policy Framework 2019(5) The proposal would not provide developer contributions towards Secondary Education, Youth Provision and the Cranbrook Hub projects to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019, the Planning Practice Guidance, Core Policy CP1 of the Tunbridge Wells Core Strategy 2010 and Policies CS4 and R2 of the Tunbridge Wells Borough Local Plan 2006.(6) The proposal would not provide affordable housing within the proposed development. It would therefore conflict with the National Planning Policy Framework 2019, Core Policy 6 of the Tunbridge Wells Core Strategy 2010 and the Affordable Housing Supplementary Planning Document.(7) The proposal would not provide developer contributions towards new single premises for the three General Practices located in Cranbrook to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019 and Core Policy CP1 of the Tunbridge Wells Core Strategy 2010.

1.2.12 Not only did the Council refuse this application, but in seeking to defend the appeal the site was also removed from the Local Plan pre-submission draft.

1.2.13 An appeal was subsequently lodged (Appeal Ref: APP/M2270/W/20/3247977) during the life of which reasons for refusal 5 to 7 were resolved prior to determination (through the provision of a suitably worded Section 106 Legal Agreement). Reason for refusal 3 was also overcome as a result of providing further ecology information and a further commitment within the Section 106.

1.2.14 The main issues for the appeal (and so wider site suitability) were narrowed to:

(1) The impact of the proposed development on the character and appearance of the area including landscape character and the AONB;(2) Highways safety; and(3) Heritage harm.

1.2.15 The appeal was dismissed in February 2021, but in doing so the Inspector provided clear findings on a number of key matters that were in dispute and formed the basis for deleting the allocation. We summarise these findings below. A full copy of the appeal is included as Appendix 1.

Heritage

1.2.16 Paragraphs 50 to 64 directly responded to the heritage evidence, with the Inspector ultimately endorsing the appellant's evidence that heritage harm would be restricted to Hartley Gate Farmhouse only and in the less than substantial range. The Inspector rejected harm to wider assets. At paragraph 150 he concluded:

'Given the relatively low level of harm I have found in relation to the farmhouse and the significant housing and other positive attributes I have identified from the scheme, I find the heritage harm arising would be outweighed by the public benefits identified. Accordingly, the Framework does not provide a clear reason for refusing the development proposed in this specific regard'.

1.2.17 In our opinion, the Inspector provided a very clear conclusion that reason for refusal 4 was not a reasonable basis to withhold consent, nor did it provide a clear basis for disengaging the presumption in favour of sustainable development. As such, we consider the over estimation of heritage impacts contributed to an otherwise suitable allocation being omitted from the pre-submission plan.

Access and Highway Safety Matters

1.2.18 Paragraphs 65 to 88 of the appeal directly responds to the highway evidence. The Inspector's summary of highway matters stated:

'86. The A229 is a busy classified road. It reflects the accompanying dangers and relatively harsh pedestrian environment that might be expected, and improvements can always be made. Nevertheless, the evidence presented demonstrates the local highway network has no particular design flaws, and is capable of withstanding the relatively modest increase in vehicle and pedestrian movements that would arise from the scheme without incurring further undue additional risks or inconvenience. I also note possibilities for further detailed refinements to the scheme, particularly in terms of facilities for

pedestrian movement, and which were discussed at the Inquiry in relation to a possible planning condition should the appeal be allowed.

87. The Framework requires that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. The evidence against the proposed scheme falls significantly short of such a threshold.

88. I therefore conclude that the proposal would provide safe and suitable access for all users and would not be contrary to Policy TP4 of the Local Plan to the extent that it seeks, amongst other things, to ensure that proposals provide a safely located access with adequate visibility and that the traffic generated by the proposal would not compromise the safe and free flow of traffic or the safe use of the road by others'.

1.2.19 In our view, the Inspector provided a very clear conclusion that reason for refusal 2 was not supportable nor a reasonable basis to withhold consent and that the access was suitable for the quantum of development proposed. As such, we consider the dismissal of the site on highways grounds also wrongly contributed to the site being omitted from the pre-submission plan.

Location

1.2.20 At paragraph 117 the Inspector confirmed that the scheme enjoys a moderately sustainable location. Paragraph 124 also acknowledges that the Framework requires that, to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities and that planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. The scheme was deemed to be consistent with this aim and so modest weight was attached to these economic factors as a benefit.

Major Development

1.2.21 At paragraph 155 the Inspector confirms that the appeal scheme was not 'major' development.

Landscape Impact

1.2.22 Having regard to the above, reasons for refusal 2 to 7 were either overcome or dismissed by the Inspector. The only matter between parties relates to reason for refusal 1 and the associated impact upon the AONB.

1.2.23 In considering the conclusions, at paragraph 42, the Inspector is clear that the site may have potential for reintroduction of some sensitive built form, albeit a better balance has to be struck in relation to the legibility and distinctiveness of the AONB.

1.2.24 At paragraph 49 he concludes that the scheme would, by virtue of the extent of built development proposed (rather than principle) would be significantly harmful to the character and appearance of the appeal site and its surroundings.

1.2.25 In summary, all of the above commentary provides a clear basis to suggest that a revised scheme could integrate within the AONB setting. The Inspector stopped well short of concluding the site was unsuitable for development per se and as such we consider the deletion of the site, and subsequent impact it has had on evidence base and thus it is neither justified nor positively prepared.

1.2.26 We explain the wider relevance of the site being wrongly omitted in the context of the wider strategy within the subsequent sections of this representation.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.3 This representation comments on the following elements of the plan:

• *Vision and Strategic Objectives;* • *Development Strategy and Strategic Policies;* • *Place Shaping Policies;* and • *Development Management Policies.* *Vision and Strategic Objectives*

1.3.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.3.5 The vision is set out below:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough.'

The Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents. In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities.*

Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs.

Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Local ambitions are:

• for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities; • for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding; • for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design; • for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs; • for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.6 In order to deliver the vision the plan sets a number of strategic objectives:

(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough; (2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population; (3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments; (4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments; (5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities;

(6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology; (7) To ensure that the borough is vibrant, culturally rich, and economically buoyant; (8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature; (9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met; (10) To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment; (11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters of soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

‘To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing’

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph 3.2 Vision and Objectives

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan 'Vision' is unusual. Rather than inspirational and focused on the ambitions of a community, meeting development needs and protecting the environment, it instead includes direct references to development at Paddock Wood and an unnamed garden village. TWBC has not demonstrated that the plan is the most appropriate strategy. It is not justified by the evidence base and the evidence base was not proportionate.

The Vision and Objectives are not clearly articulated and their evolution (and relationship to strategic policies) has been confusing. The proposed garden village itself was named in the Objectives of an earlier version of the plan. Now it is unnamed in the Pre-Submission Local Plan version of the Vision and Objectives, which relies on a broad reference to 'establishing the role' that a garden settlement can make. Evolution of the plan (and Sustainability Appraisal) through the consultations is difficult to understand and the manner in which a garden village emerged as a preferred strategy seemed abrupt, such that the process was subject to retrospective justification. The evolution of the Vision and Objectives illustrates this. It is important to point out that, because the proposed garden settlement at Tudeley was listed as a plan objective at Reg 18, there would have been very few 'reasonable alternatives'. Indeed, none were identified.

A detailed description of the deficiencies in TWBC's Vision is in Section 4.2 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Vision and Strategic Objectives

1.5.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision duplicated here - see full representation attached]

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives duplicated here - see full representation attached]

Response

1.5.7 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment opportunities across the borough.

1.5.8 The master-planned approach to the strategic expansion of Paddock Wood is also welcomed. However, please note our comments on Policy EN3 in the relevant section below.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr & Mrs Gear in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr and Mrs Gear own Uphill, Benenden, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/BE 1). It is an established residential dwelling situated on the outer edge of the village. It lies outside of the defined 'limits to built development' (LBD), but adjacent to a predominantly residential area close to village services

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it is otherwise free from any restrictive planning designations.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site is suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons set out within this representation.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

1.3 Vision and Strategic Objectives

1.3.1 The pre-submission plan is underpinned by vision and strategic objectives. The vision states:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough.

The Council will work with stakeholders* to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents.

In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities.

Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs.

Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Local ambitions are:

- for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities;
- for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding;
- for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design;
- for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs;
- for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.2 In order to deliver the vision the plan sets a number of strategic objectives:

(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough;(2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population;(3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments;(4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments;(5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities;

(6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology;(7) To ensure that the borough is vibrant, culturally rich, and economically buoyant;(8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature;(9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met;(10) To support the goal to make the borough carbon neutral by 2030, and minimise

the impact of climate change on communities, the economy, and the environment;(11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.5 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.6 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.7 With the above modifications, the objectives and vision will then be positively prepared.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Mr and Mrs B Gear in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Benenden, but the detailed policy requires modification if the site is to be deemed deliverable and the allocation is to be found part of a sound strategy.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: this part of the response has been separated from the full representation submitted by DHA Planning. See full representation attached. See also PSLP_453 (Section 4 Policy STR1: the Development Strategy) and PSLP_454 (Section 5: Benenden - Policy AL/BE1)]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.5 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.6 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.7 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Respondent's Name and/or Organisation	Chris Gow
---------------------------------------	-----------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and ObjectivesVision

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Here in particular the Local Plan is unsound as it does not take account to recent developments, and assumptions made that underpin the data used to build the Local Plan are out of date and are leading to false assumptions.

The Local Plan should be returned and rewritten with further consultation to take account of the post pandemic economy and social change, and the requirement to reassess priorities.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan should be returned and rewritten with further consultation to take account of the post pandemic economy and social change, and the requirement to reassess priorities.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Heyworth Properties Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Heyworth Properties Ltd have an option and "promotion agreement" on the land at Quaker Lane, which was allocated within the Reg 18 Draft Local Plan, but not carried forward within the Reg 19 Local Plan. This is a matter in which we return to. The land is owned by KCC and the County Authority are looking to replace the existing nursery building/facility and to generate a capital receipt for re-investment in other facilities locally.

1.1.3 In addition to this, Heyworth Properties are looking to deliver a high quality scheme that accords with the draft Policy in the Regulation 18 Plan, including the delivery of much needed affordable housing.

[TWBC: for Figure 1: Site Location (Courtesy of Kent Design Partnership) see full representation attached]

1.1.4 The 2.3hectare site is located some 630 metres to the north of the centre of Cranbrook, with residential development to the north and west, a school to the south and school sports fields to the east. The site appears as part of the somewhat "sub-urban" character of this part of Cranbrook and is a very natural extension to the settlement that can be achieved without material harm to the character and appearance of the AONB.

1.1.5 The surrounding area to the north contains the Cranbrook Rugby Club and beyond that open agricultural land. To the south lies the main built-up area of Cranbrook.

1.1.6 According to Tunbridge Wells Borough Council Policy Map, the site falls entirely within the High Weald Area of Outstanding Natural Beauty (AONB) and currently lies outside the Limits to Built Development.

1.1.7 Based on the current national and local planning context, we consider the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High

Weald Area of Outstanding Natural Beauty ('AONB'). Moreover we consider that deletion at Regulation 19 stage was without reason, and that the site was removed from the Local Plan, and other "replacement" sites, included without evidential base and justification. Such action has meant that sites have not been selected on a consistent basis and that the replacement sites have been added at Regulation 19 stage without due consideration.

1.1.8 We also take this opportunity to comment on wider aspects of the Local Plan, a plan which we consider fails the tests of "soundness".

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the Borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes. On the face of it we consider it unlikely that the plan should be able to be considered "sound".

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3 Vision and Strategic Objectives

1.3.1 The pre-submission plan is underpinned by a "vision and strategic objectives". The vision states:

[TWBC: PSLP Vision wording has been duplicated here - see full representation attached]

1.3.2 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Policy Strategic Objectives wording has been duplicated here - see full representation attached]

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Heyworth Properties Ltd in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Inter-Leisure Ltd in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Paddock Wood Garden Centre that forms part of the proposed strategic expansion area of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The site

1.2.1 Our client controls Paddock Wood Garden Centre, Maidstone Road (herein 'the Garden Centre' or 'the Site') and it was promoted for development through the response to the Regulation 18 draft Local Plan. It is available for development and will contribute toward meeting identified development needs.

1.2.2 The site is an established and operational retail Garden Centre located on the northern periphery of Paddock Wood (see figure 1).

[TWBC: for Figure 1 Location of Paddock Wood Garden Centre see full representation attached].

1.2.3 It consists of a mix of hardstanding, permanent buildings, glass houses and temporary structures. It constitutes previously developed land but is situated outside of the existing Tunbridge Wells 'limits to built development' ('LBD'), but within the new LBD as proposed in the PSLP.

1.2.4 The site is not located within the Metropolitan Green Belt or within an Area of Outstanding Natural Beauty.

1.2.5 The site falls within the administrative area of TWBC, albeit close to the borough boundary with Maidstone Borough Council, which is demarked by Wagon Lane.

1.2.6 The existing built up area of Paddock Wood is located approximately 400m to the south of the site, whilst the town centre is situated approximately 1km in the same direction. Immediately north of the site is a commercial plant hire yard, whilst railway station is Paddock Wood (1km) to the south.

1.2.7 We have included an illustrative masterplan with this representation (Appendix 1) to show how the site could be developed to provide additional retail provision to support the new housing and employment uses proposed. An extract is provided below for ease of reference.

[TWBC: for Figure 3: Illustrative site layout plan (Appendix 1) see full representation attached].

1.2.8 The proposals highlight the potential to provide additional comparison or convenience retail development (circa 1,895 sqm) by making efficient use of the extensive and underutilised parking areas.

1.2.9 The site could also be made available for other employment generating uses should there be a greater unmet need.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.5.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision duplicated - see full representation attached].

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives duplicated - see full representation attached].

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment and other supporting opportunities across the borough.

1.5.9 The master-planned approach to the strategic expansion of Paddock Wood is also welcomed.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Inter Leisure Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that retail/employment development is supported at Paddock Wood Garden Centre.

1.6.3 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.6.4 Finally we object to the wording of Policy ED2.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_500 (Vision and Objectives), PSLP_501 (Section 4: Policy STR1 - the Development Strategy and PSLP_502 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr N Wickham in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation. Mr Wickham is a local landowner with various interests, including land at Gate Farm, Hartley which is within the control of Fernham Homes.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.3.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.3.5 The vision is set out below:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough. The Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents. In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities. Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs. Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character. Local ambitions are: • for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities;*

• for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding; • for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design; • for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs; • for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.6 In order to deliver the vision the plan sets a number of strategic objectives:

(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough; (2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population; (3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments; (4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments; (5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities; (6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology; (7) To ensure that the borough is vibrant, culturally rich, and economically buoyant;

(8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature; (9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests

are met;(10) To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment;(11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be persuade in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

Tunbridge Wells has historical, attractive and well used routes that draw visitors to the area and as such these should be maintained and enhanced to a high-quality standard. The County Council requests specific mention of the 594km of PRoW within the Borough and the role of the County Council and its Rights of Way Improvement Plan within this section.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr D Masters in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr Masters owns Triggs Farm, Goudhurst, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/GO 2).

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it benefits from outline planning permission for the erection of 12 dwellings granted at appeal in January 2019.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons we set out within this representation.

1.1.5 We also take this opportunity to comment on wider aspects of the strategy.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

1.3 Vision and Strategic Objectives

1.3.1 The pre-submission plan is underpinned by vision and strategic objectives. The vision states:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough.

The Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents.*

In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities.

Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs.

Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Local ambitions are:

- for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities;
- for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding;
- for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design;
- for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs;
- for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.2 In order to deliver the vision the plan sets a number of strategic objectives:

*(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough;**(2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population;**(3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments;**(4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments;**(5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities;*

*(6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology;**(7) To ensure that the borough is vibrant, culturally rich, and economically buoyant;**(8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature;**(9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met;**(10) To support the goal to make the borough carbon neutral by 2030, and minimise*

the impact of climate change on communities, the economy, and the environment;(11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes.

1.8.1 This representation has been prepared on behalf of Mr D Masters in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Goudhurst, but the detailed policy requires modification if the site is to be deemed deliverable.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: DHA's representation on behalf of Mr D Masters has been split into three separate areas: PSLP_481 - Vision and Objectives, PSLP_482 - Section 4: The Development Strategy, and PSLP_483 - Section 5: Goudhurst Policy AL/GO 2. See also full representation attached]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Raymond Moon
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 3: Vision and Objectives	
pg29. Paragraphs: 3.3 and 3.8	
Question 4	
Do you consider that the Local Plan:	

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity **“general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth”** cannot cope now and any further new houses with compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase “active travel” be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out **“It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters”**This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 3: Vision and objectives

As stated at our Regulation 18 response, we support the strategic objective to 'conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature' However, our advice regarding the proposed allocations still apply as they do not fully contribute to protecting the natural environment of the Borough. Natural England's advice on landscape issues and specific allocations in relation to the High Weald AONB are provided in other sections of this letter.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts

should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.4.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: PSLP Vision duplicated here - see full representation attached]

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives duplicated here - see full representation attached]

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment opportunities across the borough.

1.4.9 The master-planned approach to the strategic expansion of Paddock Wood is also welcomed. However, please also note our comments on Policy EN3 in the relevant section below.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Labour Party
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 3: Vision and Objectives	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity “general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth” cannot cope now and any further new houses with compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase “ active travel” be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out “It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters” This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

3.6

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I object to the plan on the grounds that it is unsound. My main concerns are that the plan presents a disingenuous picture of Tunbridge Wells as the cultural, commercial and retail hub of the county and does not do enough to protect the distinct nature of the smaller towns and villages and the local countryside from over development.

I believe the plan is unsound in its argument that the bulk of the housing development should be located in Tudeley, East Capel and around Paddock Wood, whilst failing to address the considerable planning issues facing Tunbridge Well's town centre (locally referred to as the grot spot) and the traffic jams that regularly stifle the area.

The hub and spoke model this strategy advocates will not deliver the type and location of housing needed by the young, old and affordable demographic identified in the objectives.

The use of greenbelt and flood risk land is an unacceptable solution to a poorly conceived vision that fails to grasp what the people of the whole Borough want, namely unspoilt countryside and a vibrant and accessible cultural hub where there is affordable housing within walking distance of cafes, shops railways and employment.

Please find referenced points below:

I believe the Local Plan should be rejected on the grounds that it is unsound for three main reasons:

1) The plan is built on a faulty presentation of Tunbridge Wells being a vibrant hub to the Borough

The strategy puts forward the model of a central commercial, leisure and cultural hub (Royal Tunbridge Wells Ref Point 3.6) and housing developments in villages and a new settlement, whilst at the same time protecting the character and countryside of the Borough (Points 2.27) and the Green Belt which helps it retain its distinctive character. (Point 2.28)

However, Tunbridge Wells, far from a vibrant centre, has increasingly become a provincial backwater due to poor planning and traffic management dating back to at least 2014 when the town's cinema and retail outlets, connecting the station to the centre of town, were demolished. (Ref Page 80: "A prominent site which has been vacant for many years and in need of redevelopment".) This site in the centre of the town has remained behind hoardings and is well known as the town's grot spot.

The conceptual use for the town centre is not at the heart of the plan, as it should be, to support the whole strategy, but is relegated to an afterthought (ref point 5.26.) The idea that people will want to travel into Tunbridge Wells as a retail and cultural hub are flawed. Why would we want to encourage more car use on already congested and polluting roads to sit in traffic jams in and out of a town where you have to pay to park, when it is easier to go to the North Farm industrial estate locally or Bluewater for a far superior retail provision? The Royal Victoria shopping centre is past its useful function and in light of increased online shopping trends this is only likely to increase, with more outlets becoming vacant.

2) The plan will not meet the housing needs of the groups it aims to provide for

The plan states that the council will improve access to suitable, affordable housing including for local young people and older households. (ref Vision and Strategic Objectives 1 para 3.)

However, this strategy places the vast majority of the housing development for the Borough in a new 'garden settlement' (that has little infrastructure and none of the amenities young and older people will

need) or in what will be great swathes of concrete estates encircling Paddock Wood, which already has limited amenities. Affordable housing, suitable for the demographics described, need to be placed close to shops and cafes and well within walking distance of a town centre and mainline railway. Young and older people do not want to live in isolated 'garden settlements' or sprawling community-less estates, where they are reliant on a car for access to shops, entertainment, cafes and culture and work.

3) The plan does not protect the natural environment and specific characters of the landscape and smaller towns and villages

The plan states that it wants to protect the character of the Borough which includes areas of outstanding Natural Beauty, greenbelt and a living and working countryside (ref point 3.12.)

One of the Boroughs most beautiful and ancient landscapes is Tudeley and Capel. My friends, on a visit from Australia a few years ago, stood transfixed by what they described as stepping back in time into a countryside narrative, worthy of special status. To build on this area would be a terrible act not just for the current community but for future generations. Likewise, the encircling of Paddock Wood, which is in a flood risk zone and building on the greenbelt that maintains its character, whilst preserving car parks in Tunbridge Wells (Ref point 5.11) is planning gone mad!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make this plan sound in meeting it's vision and objectives it should be modified to accommodate a much greater proportion of the accommodation required close to the main centre of Tunbridge Wells, where there is access to amenities and car ownership is not essential. The civic centre site, currently proposed for redevelopment, the 'grot spot' and the underused Royal Victoria Centre are all sites which could be considered. A new vision putting urban living opportunities in the heart of Tunbridge Wells will both revitalise the town and preserve the natural beauty of the surrounding countryside.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would like the opportunity to contribute.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	Yes, I wish to be notified of future stages of the Local Plan

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Pickhill Developments Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Pickhill Developments Ltd control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft. The Pickhill land is site 70.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

1.3.2 It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.3 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.4 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.3.5 The pre-submission plan is underpinned by vision and strategic objectives.

1.3.6 The vision is set out below:

[TWBC: PSLP Vision was duplicated here - see full representation].

1.3.7 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives were duplicated here - see full representation].

1.3.8 Response

1.3.9 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.10 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.11 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.12 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Pickhill Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village. 1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

[TWBC: for further representations on Policy STR/CRS 1 and Policy STR1, please see PSLP_1957 and PSLP_1958 respectively].

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.10 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.11 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.12 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	

Respondent's Name and/or Organisation	Lee Prebble
---------------------------------------	-------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

3.13 and 3.15 Vision and Strategic Objectives

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound	No
----------	----

Complies with the Duty to Cooperate	Don't know
-------------------------------------	------------

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

PSLP Vision and Strategic Objectives 1(Section 3) p.30 The Vision is not consistent. It does not respect the distinctive qualities of the Borough that are identified in the Council's own studies. The proposed garden settlement does not reflect local character in particular as identified in the Borough Landscape Character Assessment SPD. The actual impact on the landscape and visual amenity has not been assessed. Moreover the new settlement will not be well connected with nearby towns and will adversely impact on the rural character and amenities of the area. The countryside in the vicinity of the proposed Tudeley development will not retain the landscape, biodiversity and historic character of the area. It is entirely unclear why there is this inconsistency in treatment between the proposed garden settlement and other settlements – why is Tudeley chosen as a place not to retain the essential local character and why is the countryside in the vicinity not to have its landscape, biodiversity and historic character retained?

PSLP Vision and Strategic Objectives 2 p31 Objective 3 is not consistent with the remainder of the Plan. There is no apparent concern at the possible impact on the existing settlement of Tudeley and its highly valued environmental qualities and amenities. There is no apparent intention to conserve and enhance the historic, built and natural environment of the locality where the proposed garden settlement and its associated infrastructure will have such a significant and devastating impact. The objective should be revised to ensure that if there is to be a garden village full and proper account is taken of the impact on the existing settlement and surrounding countryside and landscape.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposal to include the new garden settlement and its associated infrastructure should be removed and all policies relating to it unless and until a full and proper assessment of the effects and implications are undertaken. Proposals should be consistent with the policies and strategy for protection of the countryside, landscape and other assets.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

to question the officers to ascertain how the proposals are considered to be consistent with the policies.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Considering the wider context, of the Borough and Tunbridge Wells in particular, we make the further observations, with reference to the Local Plan headings and numbering:

Section 3

Visions and Objectives

- a. Despite some points made in the Local Plan 3.1 to 3.5 we dispute that there is any Vision about “what sort of place we want the borough to be in the future”, ie what it should look like, the facilities available, recreational and creative aspects. Where is the Vision relating to the visual features, enhancement of beauty and the artistic and, in terms of heritage, anything in the documents about enhancing the “Spa” aspect of Royal Tunbridge Wells by the provision of water features? (Note: Tunbridge Wells is twinned with Wiesbaden in Germany, another spa town.)
- b. The Local Plan appears to be defined by development, building sites and commensurate infrastructure, but there is more to quality of life than this. We note the degree of attention and finance over recent years to road changes and hard features in the centre of Tunbridge Wells – hardly a tourist attraction.
- c. Little reference is made in the Local Plan to actions necessary to be taken to enhance the historic and cultural side of Tunbridge Wells. (Note – cessation of “The Day at the Wells”)
 - 1 For example, the failure to move forward with the derelict site of the old cinema, the failure of a plan to enhance the Assembly Hall which would not be ruinous or fail to capture the support of the people of TW.
 - 2 Lack of inspiration to market the town in its Spa context through the use of water features, and soft visual features, together with road congestion, all leading to declining tourism.
 - 3 We note “The Water in the Wells Working Group” report c2012 sets out to promote the installation of high quality water features at key locations in and around the town to:
 - 1 Create landmarks and meeting points,
 - 2 Provide modern play places,
 - 3 Refresh the environment,
 - 4 Emphasis the unique TW spa brand, and
 - 5 Raise the profile of TW and thus visitors/tourism.

Nothing in the Local Plan picks up these ideas or follows this thinking. The contrast between Tunbridge Wells and Wiesbaden is noted in the report as “could not be more stark”.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, ‘Northern Powerhouse’, it is possible that the housing needs in the south-east may need to be re-assessed downwards.

- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.
- 4 While it promotes the use of "active travel", the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Agricultural land has a vital role to play in feeding the nation, absorbing carbon and preserving biodiversity, including the biodiversity in soils. Once it is built over the soil biodiversity is lost. Therefore,

to minimise land take, it is essential that density of developments on green field sites is as high as reasonably possible.

CPRE Kent objects to the allocation of land for a new garden settlement at Tudeley, when density could be increased on other allocated sites in more sustainable locations.

Please note: All responses to this Regulation 19 consultation have been prepared jointly by CPRE Kent and by the Tunbridge Wells District Committee of CPRE Kent. For brevity, our comments are expressed as being from 'CPRE Kent' throughout.

The plan is considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Cranbrook & Sissinghurst Neighbourhood Development Plan

Response to Tunbridge Wells Borough Council Pre-Submission Draft Local Plan – 4th June 2021

Section 3: Vision and Objectives

The PSLP is mis-informed on its housing numbers requirement and the ability to plan for fewer homes in areas with multiple high-level constraints (including AONB, Green Belt and Floodplains), such as the borough of Tunbridge Wells. This has, therefore, produced a flawed strategy, and one which would fail to protect the countryside, which is recognized as a priority for central government, as stated by the MHCLG on 25.5.21:

“To compare housing delivery in different parts of the country based on Local Housing Need formula is to misunderstand the nature and purpose of these numbers. That's not how they work – the numbers mentioned are a starting point for local councils to help them understand how much housing is needed in their area and are not legally binding...”

“...Protecting the Green Belt is a priority and our national planning policy reinforces regenerating previously developed land, known as brownfield sites, and prioritising urban areas. The uplift in local housing needed within our biggest cities and urban centres in England will direct homes to where they are better served by infrastructure, and therefore protect our countryside...”

“...The Local Housing Need is simply a measure of need and we recognise that not everywhere will be able to meet their housing need in full – for example, where available land is constrained due to the Green Belt and an area therefore has to plan for fewer new homes.” (MHCLG Comms 25.5.21 (see web link))

Vision and Strategic Objectives 1

Vision (page 30-31)

- 3.9 States that growth should be sensitive and in line with ‘role’, highlighting setting of AONB. However, allocations later in the plan are for major developments, and in this sensitive AONB area, thus one contradicts the other.

States Local ambitions are:

- *“For other settlements, to retain their essential local character, with high quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs;*

- *For the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise.”*

None of these ambitions have been achieved in either the Strategy for Cranbrook & Sissinghurst nor the Place Shaping Policies for Cranbrook & Sissinghurst.

Proposed major developments would be built on the landscape that is supposedly cherished. These developments push far beyond the edge of towns into the AONB landscape, and are not within easy walking distance of the town centre. They are not sustainable as proposed and completely destroy the essential local character.

It is suggested that access to suitable, especially affordable, housing is key, including to local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities. How is this achieved through policy?

There appear to be no policy requirements to prioritise the needs of young people in housing policies.

For Cranbrook and Sissinghurst there are no new employment sites identified nor opportunities created.

Most visions and objectives here seem worthy and something that residents could support. But they are in conflict with or insufficiently supported by policies and allocations elsewhere in the plan.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 1 - Vision

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:**
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Vision and Objectives

4.1. The Local Plan Vision and Objectives section of the Local Plan is confusing, lacks local distinctiveness and lacks ambition.

4.2. The opening line of the Vision states that "growth in new homes, jobs and supporting infrastructure will be achieved over plan period in a manner that respects the distinctive qualities of the borough". We question what it means by 'respect' and it is entirely unclear from this statement what the Council considers to be the 'distinctive qualities of the borough' that should be respected.

4.3. Following the first line, the second line states that "*the Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure and cultural opportunities for all the borough's residents*". This is quite a generic statement about how the Council will work with stakeholders which it is obliged to do in any case. There is nothing locally distinctive about this statement and could be about 'anyplace'.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1

Respondent's Name and/or Organisation Dr Philip Whitbourn

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph number 3.13

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

To be sound, the Plan needs separate and worthwhile "Local Ambitions" for the historic town and regional centre of Royal Tunbridge Wells

Paragraph 3.6 recognises Royal Tunbridge Wells as the main commercial centre in the Borough, serving a wider catchment, reference also being made to its particular environmental qualities, and to its cultural role, while paragraph 3.7 refers to the distinctive character of Southborough, with its own services and facilities. Thus it is not sound for these two distinct towns, which differ greatly in size and nature, to be lumped together for the purposes of "local ambitions" within a shared and unworthy "vision" for their futures, and shared nebulous "local ambitions".

Royal Tunbridge Wells is a major historic town of national importance; it is a regional shopping centre; a tourist destination; and it is a transport node. Thus, its "local ambitions" should relate to those characteristics, and be separately set out from the probably rather different ambitions that may apply to the different characteristics of Southborough, a town that like Paddock wood has its own Town Council and, like Paddock Wood should be separately listed, rather than "dovetailing" with Royal Tunbridge Wells to form some amorphous sounding "main urban area" of mixed uses.. (For "Local ambitions" for Royal Tunbridge Wells, please see overleaf) [TWBC: For "Local ambitions" please see Question 6]

[TWBC: For evidence supporting this representation, please see pages 1-3 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Local ambitions for Royal Tunbridge Wells should include:

- . a priority for the preservation and enhancement of the town's unique and nationally important historic centre when considering planning proposals

- . strengthening Royal Tunbridge Wells' role as a destination town, supporting its tourist industry, and increasing its cultural offering
- . maintaining its position as a regional shopping centre
- . improving its function as a transport node

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the inspector concerning my evidence and representations, as necessary

If you would like to attach a file in support of your comments, please upload it here. [PSLP 534, 535, 540, 543, 546, 549, 551 Dr P Whitbourn SI-1 Evidence supporting representation.pdf](#)

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

CPRE, the countryside charity was formed in 1926. It is a registered charity and one of the longest established and most respected environmental groups in England, with over 40,000 members and supporters living in our cities, towns, villages and the countryside. CPRE Kent is the largest of the CPRE County branches with over 2,300 members, including 150 parish councils, civic societies and other Kent organisations and companies.

Our vision is of a beautiful and thriving countryside that enriches all our lives, and our mission is to promote, enhance and protect that countryside.

We believe that the planning system is a toolbox for achieving better – for people, nature and the economy – while supporting the delivery of more badly-needed homes to end the housing crisis.

In general, CPRE Kent supports a development strategy which meets the following criteria:

- 1 brownfield first, especially in urban areas and not in rural areas if it would result in unsustainable patterns of development;
- 2 development should result in sustainable communities;
- 3 housing provision in rural areas where there is an identified local need and the scale of development is appropriate for the size of the settlement;

The plan should promote development in locations:

- . that are well supported by, or where it can reasonably be shown that they will be supported by, sustainable transport and active travel.
- . that are well served by regular public transport services and social and community facilities, that are in safe walking and cycling distance or would support, or result in, a sustainable settlement. Such routes should feel safe, be well-lit, especially for children and women who have to use them after dark. If they are not, cars will inevitably become the preferred mode of transport to the detriment of sustainability.

Overall, it is our position that the Council should seek to ensure that the impact of development on the countryside, both directly and indirectly, is kept to a minimum and that development is sustainable in accordance with national planning policy.

CPRE Kent considers that there are good reasons why the Tunbridge Wells Local Plan should not meet its housing requirement in full - reflecting the fact that 69% of the borough is designated AONB (and 22% is green belt).

CPRE Kent remains to be convinced that the Council has placed sufficient emphasis on increasing density within the towns or on insisting on high density development on green field sites. The result is that far too much AONB and green belt countryside (and agricultural land) is being allocated for development.

Agricultural land has a vital role to play in feeding the nation, absorbing carbon and preserving biodiversity, including the biodiversity in soils. Once it is built over the soil biodiversity is lost. Therefore, to minimise land take, it is essential that density of developments on green field sites is as high as reasonably possible.

CPRE Kent objects to the allocation of land for a new garden settlement at Tudeley, when density could be increased on other allocated sites in more sustainable locations.

Please note: All responses to this Regulation 19 consultation have been prepared jointly by CPRE Kent and by the Tunbridge Wells District Committee of CPRE Kent. For brevity, our comments are expressed as being from 'CPRE Kent' throughout.

The plan is considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the Council's development strategy.

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development "chops" down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees were saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very "vitality" of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are impractical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development. Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development.

Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Royal Tunbridge Wells Town Forum
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 2 Strategic Objectives

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We broadly support the vision and objectives 2 policy. We consider that paragraph 4 of the policy should also refer to building at a density which makes efficient use of land as required by paragraph 123 of the NPPF.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 2 Strategic Objectives

Paragraph 3.15

Question 4

Do you consider that the Local Plan:

Is sound Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These principles are sound but incomplete for a historic town with an exceptional setting. With the emphasis on growth and new development they do not fully recognise the distinct needs to protect and enhance the present built and natural environment, and the deficiencies of existing infrastructure.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Reword item 8. - To work to upgrade the existing environment, particularly heritage assets and the High Weald Area of Outstanding Natural Beauty, in relation to traffic, parking, and the provision of infrastructure.

Reason: The Strategic Objectives do not adequately reflect the sustainability principles expressed elsewhere in the Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

[TWBC: see supporting documents attached, including composite of all representations].

Vision and Strategic Objectives

Unlike the Strategic Objectives set out in the Draft Reg 18 version of the Plan, the objective is not stated to be to deliver the housing needs identified for the Borough by the end of the plan period but only to contribute to meeting housing need. This diluted objective is inconsistent with a Plan that should be positively prepared and ambitious in order to accord with Government policy. The objective No. 2 seeks only to significantly boost the supply of affordable housing and is therefore inconsistent with Government policy that seeks to significantly boost the supply of all types of homes. The dumping down of the Government's priority of the delivery of a significantly greater number of new homes than in the past, infers a reluctance on behalf of the Council to grapple with the problems of meeting housing needs in full. It is imperative that each local planning authority across the South-East region plays a full part in increasing housing provision, if issues of current and worsening lack of adequate housing provision and levels of affordability are to be improved. There is conflict between the Council's approach and the Guidance set out in Paragraph 11a of the NPPF which requires Plans to positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. As a result the Strategic Objectives are not positively prepared and the Plan is unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
 - . STR/HA1 / AL/HA4 – Land off Cophall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
 - . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
 - . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and

- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

4.30 The Pre-Submission Local Plan confirms there are exceptional circumstances to alter the boundaries of the Green Belt to remove land from the designation for the proposed development at Tudeley Village, Paddock Wood (including land at east Capel), at a few sites around Royal Tunbridge Wells (particularly at North Farm/Kingstanding Way), and at Pembury.

4.31 The approach taken in Pages 58 – 60 of the Development Strategy (2021) is consistent with the well-established process that has been established through the Courts (notably *Calverton*) in the application of Exceptional Circumstances.

4.32 More recently, the case of Compton Parish Council is also relevant with Sir Duncan Ousley commenting (*inter alia*):

1. "Exceptional circumstances" is a less demanding test than the development control test for permitting inappropriate development in the Green Belt, which requires "very special circumstances".
2. The phrase does not require at least more than one individual "exceptional circumstance". The "exceptional circumstances" can be found in the accumulation or combination of circumstances, of varying natures, which entitle the decision-maker, in the rational exercise of a planning judgment, to say that the circumstances are sufficiently exceptional to warrant altering the Green Belt boundary.
3. General planning needs, such as ordinary housing, are not precluded from its scope; indeed, meeting such needs is often part of the judgment that "exceptional circumstances" exist; the phrase is not limited to some unusual form of housing, nor to a particular intensity of need.

4.33 Fundamentally, the borough is heavily constrained – aside from the 22% of the borough designated as Green Belt, 69% is AONB, with 5,321 ha of Green Belt land (out of 7,134 ha) also being within the AONB. This means that 74.5% of the Green Belt land is also within the AONB. Moreover, the majority of the Green Belt wraps around the main urban area of Royal Tunbridge Wells and Southborough, around Pembury and the area to the east of Tonbridge/west of Paddock Wood (located within Capel parish), the eastern boundary immediately adjoining the existing western developed boundary of Paddock Wood.

4.34 With the clear need in the NPPF (2019) to promote sustainable development, to do this without the release of land from the Green Belt would result in significant development being inappropriately located in lower tier settlements (such as Frittenden, Goudhurst) which either do not have the necessary infrastructure to support such growth and/or are located in sensitive landscape contexts.

4.35 The need to ensure that sustainable development is encouraged as part of the review and consideration of Green Belt release is firmly established in Paragraph 138 of the NPPF which states: "When drawing up or reviewing Green Belt boundaries, the need to promote sustainable patterns of development should be taken into account. Strategic policymaking authorities should consider the consequences for sustainable development of channelling development towards urban areas inside

the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary”.

4.36 Through the Development Strategy Topic Paper (Feb 2021) TWBC has clearly articulated what the consequences for sustainable development would be if it was to not include Green Belt release as part of its proposed released.

4.37 At the Plan Wide level, the case for Exceptional Circumstances is fully justified. In the next section we have provided comment on what the relevant Local Exceptional Circumstances are to support the proposed release of allocated sites to which Dandara has an interest in.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

N/A – no amendments proposed.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPE.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 4.2 The Development Strategy

The spatial strategy is not justified and not sustainable, and therefore the plan is unsound. The review of options available to TWBC (including the omission of one of the strategic sites) and a proactive search for settlement edge sites and previously developed/urban sites would have sustainability benefits. This would reduce the reliance on large sites to deliver housing and avoid the need to rely on a new settlement in the Green Belt. The sustainability impacts of the proposed Tudeley Village are significant and it is quite clear that the Sustainability Appraisal process was not the key driver for selecting the spatial strategy.

A detailed description of errors in the Development Strategy is in Section 4.5 of the attached report by Graham Simpkin Planning.

Paragraph 4.8 Housing Need

TWBC has not identified the most appropriate strategy to meet the identified housing need. The value of growth option 7 forming part of the preferred development option, perhaps with a large urban extension, was dismissed without adequate assessment. It could contribute to housing needs in a manner that is sensitive to the settlements at which it is located. The proposed strategy which includes a new settlement at Tudeley Village is not justified, nor consistent with achieving sustainable development.

If TWBC had fulfilled their Duty to Cooperate, it is possible that the proposed new settlement at Tudeley Village (and associated harm to the Green Belt) would not be required. This demonstrates the importance of discussing this issue with nearby Local Authorities with determination. Demonstrating that such discussions have occurred is essential to the Exceptional Circumstances case for alterations to Green Belt boundaries.

A detailed description of the issues caused (and opportunities missed) by TWBC's approach to Objectively Assessed Need is in Section 4.3 of the attached report by Graham Simpkin Planning

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

If you would like to attach a file in support of your comments, please upload it here. [GSP Friends of Tudeley Final.pdf \(2\)](#)

Version	0.1
Question 1	
Respondent's Name and/or Organisation	Chris Gow
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 4: The Development Strategy and Strategic Policies	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This policy must reflect a post covid pandemic factors, enconomic and social, where the Local Plan should be returned for this evaluation to take place, and further consultation to define policy where the post pandemic thinking can be considered for a revised Local Plan.

Local Plan fails to take any account of the post pandemic encomonic and social conditions, and superseeds the assumptions made in the data forming the base of the current Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Local Plan should be returned for further consultation and revision to consider post pandemic conditions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

Question 1	
Respondent's Name and/or Organisation	Cynthia Kirk
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/HO 1 The Strategy for Horsmonden Parish

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am not against some expansion of house building, but the Government's National Planning policy allows for "limited infilling in villages" which I would not oppose (although the proposed development across the area is not fairly distributed.) However, I am strongly opposed to the scale of the proposed developments in Horsmonden which would increase the number of houses potentially by 320 and would completely alter the character of our village and make the traffic problems much more severe. As Horsmonden already has a notable danger spot at the crossroads in its centre (with many near misses as outlined on the SE News) the substantial increase in traffic necessitated by the huge influx in residents living in the proposed housing developments could cause significant health and safety issues.

The infrastructure is not suitable to support the proposed increase of properties. The roads leading from the centre of Horsmonden village are minor roads, which are narrow and have many dangerous bends with poor sight lines. E.g. Access onto the Goudhurst Road by potential residents and school traffic at the site HO3 would be problematical. The inadequate roads simply cannot safely sustain the amount of traffic which would be generated if all these houses were built. Further health and safety issues would be caused by the lack of continuous footpaths (especially on blind bends) along the roads out of Horsmonden village to the proposed new developments at HO2 and HO3 with little availability to develop these.

The proposed developments at HO2 and HO3 would involve a significant loss of trees with HO3 in particular having a significant number of established and mature trees. The natural open countryside views in these sites would be lost forever to the detriment of us and our future generations.

Both of these developments are mostly planned to be built on good quality agricultural land. HO2 is next to Sprivers which is an area of natural beauty designated for the local people ~ providing them with essential recreational opportunities and is an important habitat for wildlife. It would be greatly affected by the development of the significant number of houses proposed to be built adjacent to it.

The plan to ensure that 40% of the new houses would be affordable housing is meaningless if recent developments are anything to go by. The Foundry was a recent development in Maidstone road and comprised mostly of detached houses with a few semi-detached houses. The average house price in this development is £458,166 and the semi-detached houses are selling between £374,500 and £430,000 which are not affordable for ordinary people especially young people who have been born and brought up in the local area and who have to move away in order to rent or buy cheaper properties.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposals for building at HO2 and HO3 need to be reconsidered in the light of the difficulties outlined above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The issue that Horsmonden does not have an adequate public transport system has to be considered. This with limited employment opportunities mean that any additional residents living in the new developments would be dependent on traveling anywhere by car which is unacceptable in so many ways, especially environmentally.

The bulk of the housing development in the plan will not contribute to Horsmonden's economic growth as people will have to work away from the village. The proposal of building a new primary school at the eastern edge of the village to cope with the increased number of children does not appear to have fully examined other options for the better use of the existing site.

Future Notifications

Question 1	
Respondent's Name and/or Organisation	Mr Adrian Cory
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 4: The Development Strategy and Strategic Policies
Paragraphs 2.16; 4.10; 4.13

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Plan fails to explain why TWBC not only accepts the unrealistic housing allocation figure set for the borough by the NPPF, but proposes unilaterally to increase it. The borough's own population projections (based on ONS data) show a projected population increase of only 6,155 over the planning period (2.16). Nevertheless it appears that, the NPPF "standard method" requires the borough to build 12,200 houses over the period (4.10). Rather than challenging the illogic of this allocation, TWBC instead proposes to exacerbate the situation by also contributing to "unmet needs elsewhere" by adding further to its housing allocation (4.13). Surely TWBC should be acting in the interests of its own residents by limiting development rather than assuming responsibility for other councils' allocations? Why can our Council not follow the excellent lead given by Sevenoaks DC in challenging the excessive and unjustified allocation?

Furthermore, planning for excess building above the borough's organic requirement works counter to the sustainability requirement. The inevitable result of such a policy is that new residents would be drawn into the borough from neighbouring districts where, had housing been available, they would have found it more convenient to live, typically owing to proximity to their place of work. Consequently, over-provision of housing where it would not otherwise be required adds to vehicle movement, congestion, pollution and consumption of fossil fuels.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Council should challenge the NPPF housing allocation figure as grossly out of line with projected housing needs in the borough, on grounds that 70% of the borough comprises AONB land, and that to build in line with NPPF allocation works against the sustainability mandate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Housing development is already taking place on three sites surrounding Paddock Wood, at least one of which (Church Road) is known to flood in periods of high rainfall.

With these three current new developments the population of Paddock Wood is likely to rise by more than 40%. The existing infrastructure is inadequate to deal with this increase in population, let alone the further increase generated by the proposed development of areas on the fringes of the town.

Maidstone's Borough Council's proposals to develop sites in the Beltring area will also impact heavily on Paddock Wood, it being the nearest town to the developments (consultation with neighbouring authorities?).

The Capel development will have huge implications for Tonbridge and Malling Borough Council (consultation with neighbouring authorities?) and will put further strain on infrastructure throughout the geographical region. The road network is not suitable for increased volumes of traffic. The health services are already under strain.

A number of retail premises in Commercial Road, Paddock Wood have been forced to close to make way for the new Churchill retirement apartment complex. The former police station has just been demolished and police presence in the area is negligible.

The proposal under consideration to close the road over Paddock Wood railway bridge to all traffic except buses will generate longer journeys and increase air pollution in surrounding areas. The traffic reduction proposal at the station end of Commercial Road is unworkable because of the configuration of surrounding roads.

The proposed cycle path network between outlying new developments and Paddock Wood town centre are unworkable, particularly in areas used by schoolchildren. Footpaths which are redesignated shared use cycle tracks but which don't have any markings to differentiate between the pedestrian lane and the cycle lane (because they're not wide enough to accommodate two lanes) are potentially dangerous to users. Example: Green Lane, TN12 6BF

New schools will not be built until the numbers justify it. What happens in the meantime to those who can't find school places locally?

Where are all these new residents going to work? If there are no local jobs this will put further strain on transport infrastructure.

How will TWBC cope with increased demand for local services: refuse collection, parking, road maintenance.

Will targets for affordable housing be strictly enforced on new developments?

In non Covid times parking facilities in Paddock Wood are just about adequate. Residents of Mascalls Grange and Foalhurst Green are likely to travel into town by car, particularly if planning a supermarket

weekly shop. Will new parking places be created? And which route will traffic take if Commercial Road is closed at the northern end?

A bus service was promised when the Hunters Chase development was built, but didn't happen. Will history repeat itself?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Development should be spread more evenly across the TWBC region. At the moment far too much is concentrated in the North West corner, putting too much strain on the infrastructure and changing the nature of the area from semi-rural to urban. Whilst some of these changes may be beneficial in terms of improved and updated services, some are potentially harmful in terms of the environment and public safety, as in the case of flooding and high traffic volumes. Smaller areas of development spread across TWBC would be more easily assimilated, would put less strain on existing resources and would be cheaper and less disruptive. They would also make developments more attractive to potential purchasers.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Section 4: The Development Strategy and Strategic Policies

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:**
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and grand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main catogories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 “The Local Plan Vision is clear”The local plan **Vision** is far from clear, rather than expected **“expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”**It must read **“it will ensure by legal means”–that future infrastructure etc.** To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95.This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this , rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main catogories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 “The Local Plan Vision is clear”The local plan Vision is far from clear, rather than expected “expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”It must read “it will ensure by legal means”—that future infrastructure etc. To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95. This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this, rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Version	0.1
Question 1	
Respondent's Name and/or Organisation	Lee Prebble
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
4.19, STR1, STR9	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

PSLP Economic Needs p36 There is no acknowledgement of the sea change arising from the Covid pandemic in working patterns. In this respect the 2016 Study is significantly out of date and cannot have anticipated the dramatic changes that have taken place in 2020. (There is a parallel in commercial premises which was acknowledged to some extent in the RCLTCU Study Updates 2020/1). For this reason the Local Plan is unsound and needs to be reconsidered.

PSLP The Development Strategy Policy STR1 p.41 As set out above the Strategy is wrong to seek to develop so many houses without proper consideration of actual local needs and the impact on the high quality landscape and environment of the Borough. The Strategy is inconsistent with the vision and inconsistent in the treatment of the land in the vicinity of Tudeley compared with the approach of the Plan to the remainder of the countryside. This policy is not consistent with Policy STR2 1 in that the development at Tudeley will not respond positively to the local character and preserve and enhance the quality of the existing community and its environs. It is not consistent with Policy STR 3 in that it will not conserve and enhance assets of historic, landscape or biodiversity value in the vicinity of the Tudeley development. The policy is not consistent with Policy STR8 in that the development at Tudeley will not conserve or enhance the natural, built and historic environment of the borough. It does not conserve or enhance the landscape assets, biodiversity geodiversity or habitats of the area. It does not retain or enhance key characteristics or valued landscape features and qualities identified in the Borough Landscape Character SPD. It does not accord with the objectives of that SPD. The allocation of the garden settlement at Tudeley, together with the associated infrastructure, has not been informed by a clear understanding of the landscape context, either on or off-site. There is no demonstration of how the characteristics and landscape features of the area have been incorporated or how harm to the landscape has been avoided or minimised. In these respects the Policy is unsound.

PSLP Policy STR9 p.70 It is not accepted that proper justification has been provided for the removal of areas of Green Belt. For much of the land identified for removal there has been no proper landscape, visual amenity or other environmental impact assessment.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposals for a new garden village at Tudeley and its associated infrastructure should be removed. Before any plan is adopted a full assessment of the landscape and visual impact should be undertaken and detailed impact studies relating to impact on biodiversity and heritage assets should be carried out.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I wish to ask officers about the processes undertaken and why no proper LVIA was carried out in relation to large housing site allocations including the proposals for Tudeley Village

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This comment and objection has concentrated on the proposed garden settlement at Tudeley and in particular on the failure to properly assess the impact of the development especially in relation to landscape and visual amenity. That should not be taken to mean that other aspects of the PSLP are considered acceptable. As an individual with limited resources there may well be significant concerns regarding other aspects but the fact that the Plan is unsound as demonstrated should mean that it is withdrawn and the whole strategy reconsidered.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Rother District Council (RDC) has had regular and continued Duty to Cooperate meetings with Tunbridge Wells Borough Council (TWBC) to discuss the progress of our respective local plans and to address any emerging or evolving cross-boundary strategic planning matters. RDC are content that these have been addressed in the Pre-Submission Local Plan.

At this moment in time, RDC is not at a significantly advanced stage in the production of its new Local Plan to determine whether it will require neighbouring planning authorities to assist in helping meet any unmet local development (housing and employment) needs. We acknowledge in para 4.13 of the Tunbridge Wells Pre-Submission Local Plan, that reference is made to changing circumstances in relation to the position of neighbouring planning authorities, which would apply to RDC. We also appreciate that the development strategy has built in a certain degree of flexibility, in seeking to deliver a quantum of housing development above the calculated standard method for local housing need for the Borough.

Within this section of the Local Plan there are two minor typographical errors to note:

Para. 4.8 refers to the current year (rather than the start of the planning period) as 2020; and

Para 4.17 refers to a figure of 7,721 rather than 7,221 as stated in Table 3.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

RDC do not consider any major modifications are required.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

RDC have no comments to make on the SA/SEA.

Question 1

Respondent's Name and/or Organisation

Rydon Homes Ltd

Question 2

Agent's Name and Organisation (if applicable)

Sigma Planning Services

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 4: The Development Strategy and Strategic Policies

Paragraph 4.41

[TWBC: see also representation numbers PLSP_1629, 1702, 1705, 1707, 1708, 1709, 1710, 1713, 1714, 1715, 1717, 1721, 1729, 1732, 1733, 1734, 1737, 1739, 1741, 1743, 1744, 1745 & 1746]

Question 4

Do you consider that the Local Plan:

Is legally compliant

No

Is sound

No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: see supporting documents attached, including composite of all representations].

Limiting the scale of development in the AONB

The specific references in this paragraph to the need to limit the scale of development in the AONB is unwarranted. Protection of the AONB is only one of a range of important elements to be considered in a Sustainability Assessment. Great weight must be afforded to its protection but that is also the case with a number of other planning policy considerations such as Heritage, Ecology and Green Belt. The specific reference suggests that AONB has been given particular priority emphasis in preparing the SA, which would not be good planning practice. The relevant sentence should be removed.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ Yes, I wish to participate in hearing session(s)

[TWBC: see supporting documents attached, including composite of all representations].

Changes from the Draft Local Plan (Reg 18)

The “refinement” of the Draft Local Plan referred to in this paragraph was not justified by the additions to the evidence base in the period between the publication of the Draft and Pre-Submission versions of the Local Plan. In particular it was not justified by the Hankinson Duckett Associates appraisal of the proposed allocations in the Draft Plan which only suggested the removal of one housing allocation at Cranbrook. The Plan is poorer as a result of those changes from the Reg 18 version and needs to be modified to make it sound by reinstating the remaining allocations proposed in the Draft Plan, suitably modified in accordance with the Hankinson Duckett Associates advice. This paragraph needs to be removed as part of the modifications to the Plan and are necessary to make it sound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ Yes, I wish to participate in hearing session(s)

[TWBC: see supporting documents attached, including composite of all representations].

Development Potential of Hawkhurst and Cranbrook

Whilst this paragraph is factually correct, it is unbalanced and does not give an accurate assessment of the potential of Hawkhurst and Cranbrook as main towns to play an important part in the spatial strategy and to deliver meaningful levels of housing, particularly in the early part of the plan period. The paragraph should be more balanced and confirm the potential for both settlements to accommodate sustainable growth without unacceptable harm to the integrity of the AONB and to address localised issues of traffic congestion and air quality in the case of Hawkhurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ Yes, I wish to participate in hearing session(s)

Respondent's Name and/or Organisation	M Borland
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR 1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It seems incredible that, when 75% of the borough is AONB and/or Green Belt, the Council doesn't consider that it cannot meet its housing requirement in full but instead chooses to allocate greenfield sites for development within these protected areas.

The MHCLG highlighted again on 25 May 2021 that the Local Housing Need numbers are "...starting point for local councils to help them understand how much housing is needed in their area and are not legally binding. Put simply, it is a measure of an area's housing need, against which councils must then consider their local circumstances and supply pipeline. Councils draw up a local housing target, taking into account factors including land availability and environmental constraints such as Green Belt. (See <https://mhclgmedia.blog.gov.uk/>)

This development strategy also appears to conflict with the requirements of the NPPF, particularly paragraph 11(b) which states that strategic policies should provide for assessed needs unless:

"(i) the application of policies in this Framework that protects areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."

This is explained in footnote 6 as policies relating to land designated as green belt, local green space, AONB, irreplaceable habitats, designated heritage assets and areas at risk of flooding.

Or "(ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

How do these Local Plan allocations meet the requirements of Policy STR 7 and the Council's target of achieving net zero emissions across the borough by 2030? The preamble to policy STR7 quotes the Town and Country Planning Association and Royal Town Planning Institute 2018 report *Rising to the Climate Crisis – A Guide for Local Authorities on Planning for Climate Change* states that "*climate adaptation must be understood as the main priority for long-term planning to secure climate resilience, and must be accepted as equally as important as meeting housing need.*" Yet the Plan seems to take the opposite view.

I'm also very concerned that, while the Council's stated aim is optimise density to minimise the loss of green fields, this doesn't seem to stand up to examination in the housing allocations made. The Brownfield and Urban Land Topic Paper (Jan 2021) indicates that the density used in the SHELLA for potential yield is 30dph and potential yield of a small number of urban brownfield sites have been re-calculated at 45dph. While such low densities may be prudent for the Council to use in its overall assessment of its ability to meet housing need, in the real world they will not result in developments that make the effective use of land required by the NPPF.

Agricultural land on the edge of or outside village settlements is being put forward for development. This has a vital role to play in feeding the nation, absorbing carbon and preserving biodiversity, including the biodiversity in soils. But once it is built on, it is lost forever. This could be avoided by increasing

density on urban and brownfield sites. Higher density housing does not need to be ugly. Some of the most desirable properties in Royal Tunbridge Wells "village area" are terraces and other clustered dwellings – the now-valued high density housing of the past. Even in modern developments, a village atmosphere can be successfully created with more compact forms of development - terraces, maisonettes and other three to four storey developments forming an attractive part of the development.

Such housing may also better meet local housing need in an area where ONS data (25 Mar 2021) shows that house prices in Tunbridge Wells are now more than 12 times median earnings.

The draft National Model Design Code suggests that even suburban areas should aim for net housing densities of 40-60dph, with more compact forms of development - a mix of short terraces short terraces and semi-detached units. Instead, the Council appears to be happy to promote sprawling outer-suburb-level density developments, at 30dph or less, where there are currently green fields. The draft NMDC also proposes that urban neighbourhoods should have net densities of 60-120dph and a mix of uses. Again, it looks like there is a serious disconnect between this and the expectations set in the Plan for developments at the urban areas of the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

See above

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation Rydon Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Sigma Planning Services

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 4: The Development Strategy and Strategic Policies

[TWBC: see also representation numbers PLSP_1629, 1702, 1705, 1707, 1708, 1709, 1710, 1713, 1714, 1715, 1717, 1721, 1729, 1732, 1733, 1734, 1737, 1739, 1741, 1743, 1744, 1745 & 1746]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: see supporting documents attached, including composite of all representations].

Spatial Strategy

Overview

1 It is agreed that the main towns in the Borough are:-

Royal Tunbridge Wells

Southborough

Paddock Wood

Cranbrook

Hawkhurst

The most sustainable spatial strategy would be one of focussing most development in or adjoining these settlements to take advantage of existing Infrastructure and public transport services and to provide finance and opportunity to be a catalyst for the improvement of the services available at these settlements for the benefit of both existing and future residents. Growth should be proportionate with the size of the settlement and the existing level of services. This is a conventional approach but is also the most effective, sustainable and deliverable option.

1 The Issues and Options document in 2017 set out 5 alternative strategies of which none of the options reflected this strategy – the nearest being Option 1 – Focussed Growth on the main towns and Option 3 – Proportional development across all settlements. A combination of these two options was never properly tested and the option remains a sustainable and effective one in the event that the current strategy is found to be flawed.

1 The options selected for the Draft Local Plan (2019) were a combination of Option 3 and 5, introducing the risky, highly contentious and, as yet, unproven, concept of a new settlement at Tudeley. The proportion of housing numbers directed to the Tudeley/Capel/Paddock Wood proposed conurbation compared to other locations was as follows:-

Tudeley/Capel/Paddock Wood - 60%

Royal Tunbridge Wells - 13%

Main Towns - 20.5%

Smaller Settlements - 6.5%

1 In the Pre-Submission Local Plan these proportions changed to:-

Tudeley/Capel/Paddock Wood - 66.5%

Royal Tunbridge Wells - 16%

Main Towns - 11%

Smaller Settlements - 6.5%

This adjustment is significant. The proportion of housing directed to smaller settlements remains the same and there is a modest increase at the main town of Tunbridge Wells. However, the main change is a significant reduction, 9.5% at the main towns of Cranbrook and Hawkhurst and a significant increase of 6.5% at the new settlement of Tudeley/Capel/Paddock Wood, meaning that it is now expected to provide over two-thirds of the housing need for the District over the plan period and beyond.

1 The Head of Planning's Report to Cabinet of 21st January (Rydon 1) claimed that this was a more robust strategy on 5 counts (Paragraph 3.18) but in fact there are only three because the same points are duplicated:-

1 **Fewer allocations** in the AONB – but the consequence is more development in the Green Belt.

1 **Reduced development at some smaller settlements** – but increases at others because the % remains the same.

1 **More provision for urban intensification at Tunbridge Wells** – but brownfield land is a finite resource and already the first point of call. It is difficult to see how deliverable brownfield sites

suddenly emerged in Tunbridge Wells between the Draft Plan and the Pre-Submission Plan. The numbers were not significant in any event.

- 1 The change in those proportions is also questioned because it was not supported by any new evidence. The Draft Plan included major development in the AONB and so does the Pre-Submission version. The Hankinson Duckett Associates LVIA of proposed Allocation Sites within the High Weald AONB (November 2020) suggested some alterations to the proposed housing allocations, mainly sensitive landscaping and design to mitigate impact, but there was no general finding of unacceptable harm to the integrity of the AONB. The assessment of cumulative effects (Chapter 7) suggested that the removal of one site at Cranbrook and the reduction of built development at a further site at Cranbrook and three sites at Hawkhurst would reduce the intensity of development along the A229 and would provide localised improvements to the AONB which, if developed positively in more detail, could mitigate against the predicted cumulative effects. There is therefore no finding of unacceptable cumulative harm to the AONB.
 - 1 It is puzzling why, if unacceptable AONB harm was not identified by the LVIA appraisal, TWBC felt compelled to change their spatial strategy between Draft and Pre-Submission versions of the Plan. (See Officer Report to Cabinet 3rd February 2021). It is also puzzling that they chose not to release this document when it was completed in November 2020 but held it back until March 2021, after the Pre-Submission Plan had been finalised.
 - 1 Ultimately they have executed a trade-off between Green Belt and AONB constraints, exercising their decision in favour of the AONB over the Green Belt constraint. This was despite the fact that the Hankinson Duckett Associates report was positive about the potential for mitigation of impact upon the AONB. Both policies are of national importance but Green Belt is an absolute policy that seeks to prevent development in principle, irrespective of individual harm to local surroundings. AONB impact, on the other hand, must be given great weight but is capable of mitigation by design and landscaping in the circumstances of the individual case. The more logical and robust planning response to the Draft Plan would therefore be to follow the Hankinson Duckett Associates advice, retaining the housing allocations in the AONB but modifying them and therefore retaining the sustainability and deliverability advantages of proportionate growth at the main locations of Cranbrook, Hawkhurst and Pembury.
 - 1 The Inspector should ask TWBC to explain why options for a new settlement in the northern part of the District to the south-east of Paddock Wood, where there are no Green Belt or AONB designations, have not been tested and evaluated.
10. The conclusion is that the proposed Spatial Strategy is not justified by the evidence base or effective, in that too much reliance is placed upon the punctual delivery of major development at Tudeley/Capel/Paddock Wood. This puts the delivery of the plan objectives at serious risk because of the uncertainty surrounding the timely delivery of front-loaded infrastructure needed to support those proposals. It is also inconsistent with National policy that seeks the certainty of the prompt delivery of housing to significantly boost the supply of homes and to protect the Green Belt. A strategy which placed greater emphasis on utilising and enhancing existing infrastructure and services at main towns whilst mitigating impact upon the AONB to acceptable levels, is to be preferred. The strategy of the Draft Local Plan achieved a better balance of minimising impact upon the Green Belt, providing sustainable growth at main towns and securing more certainty about the delivery of new housing. The Pre-Submission Plan represents a retrograde step and the strategy should have either not changed or moved in the other direction, placing less reliance on the new settlement concept.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Future Notifications

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policies relevant to submission:-

STR's 1, 9,10.

EN Nos. 12, 19'

Housing Policies impacted:-

H1,H2,H3, H6, H8.

Employment Development:-

ED 1, ED 8.

Inset Map 29.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am entirely happy with the way I have been kept informed about the Local Plan's development and the opportunities provided to me to make my inputs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Note . This is an edited and improved version initially submitted to Tunbridge Wells Borough Council's Planning Department on 12th November, 2019 in response to their 'Call for Sites' programme first announced in 2017.

REF : Land in Pembury village registered as Site No.304.

Land Registry Title No. K50612.

Owner - Douglas Carroll.

The site was not included in the original approved list on Council's 'Call for Sites' list.

The site should be reconsidered in line with the latest version of the Local Plan.

SUSTAINABILITY FOR HOUSING.

All of the Borough Council's requirements for building a sustainable housing development will be met in his area of Pembury. The 'sticking points' mentioned in my previous submission should now no longer exist:-

We already have a 'farmyard' metal gate at the southern end of the plot providing access off the A228. Southern Water, who have their own key, continue use it when servicing the main drains which pass east/west across the land to the hotel area.

A safer access off the A228 should now be considered as the local plan has introduced

- a) the requirement to make improvements to the Woodsgate Corner cross roads and
- b) to improve the A228 itself inviting more dual carriageway.

Therefore an entrance from the A228 to either the southside or to the north of the property adjacent to Marshleyharbour woods would both become very feasible options adhering to all Highway safety rules.

Previous objections:-

- 1 Land of Outstanding Natural Beauty. The land in question, designated as Plot 304, has also been designated as land of outstanding natural beauty. It used to be a meadow when it was part of the Dower House, garden and woodland. The 13 acre estate belonged to my grandmother, Mrs Irene Bird.. I spent my early years there and went to school locally. Every year, the family used to bring in the hay. There also used to be a caravan parked on it. Plot 304 had no formal trees growing on it at all.
- 2 Green Belt. Since the A228 (formerly the B2015) was constructed to run through the property to Paddock Wood and beyond, it has added enormous amounts to the local and national economy over time. With increased employment forecasted and an improved economic and social outlook forecasted, the plan should now disregard the 'Green Belt' designation and seriously reconsider this available land for development. The Strategy of Pembury PSTR/PE1 adds weight to my submission. Providing 24 to 33 new dwellings, it would provide the perfect 'Infil' between Pembury village and the Hotel and the developing hospital beyond that. Different types of housing as per Policy numbers H6 and H8 could also be considered.

The sustainable 'plus points' are:-

- A) A new development designed to meet all planning requirement, properly landscaped and providing adequate parking, loading and turning for all vehicles as will be shown in the plans.
- B) There are growing job opportunities in the Pembury area, along the A21 and the A228 adjacent the proposed new development.
- C) All three possible objections 1, 2 and 3, previously put forward by the council can now be overcome.
- D) All Utility connections from telecommunication to mains drainage are already available in this area and ready for connecting.
- E) Land clearance in preparation for building to commence would be a straightforward operation. There are no protected trees as this site once a meadow when part of the Pembury Dower House estate.
- F) there are excellent transportation links already in place.
- G) There would be no noise, loss of light or pollution hindrances caused to either the local residents in the next door estate to the east nor the hotel to the west.
- H) To the south is Woodsgate Corner and a large 24 hour Supermarket store just beyond. All essential public services, Pembury village shops, pubs, amenities and social life are on the doorstep with a Garden Centre and of course Pembury Hospital just minutes away.
- I) Due to the size of the proposed estate (24 to 33 dwellings), there would be very little impact on traffic volumes in this area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Should I need to be contacted to clarify and aspects of my submission, please contact me on xxx xxx [TWBC: phone number redacted but retained in records].

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

All included in Question 6.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Nick Burbidge
---------------------------------------	---------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

4.52, 4.95

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
----------------------	----

Is sound	No
----------	----

Complies with the Duty to Cooperate	No
-------------------------------------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:**
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Referring specifically to the proposed development of Tudeley, inspite of overwhelming rejection of the plan at Consultation stage the proposed number of houses has increased dramatically (from 440 to 2,800). Most of this development is on a flood plain and entirely against green belt principles - in fact creating urban sprawl by linking Paddock Wood to Tonbridge, as well as increasing traffic pollution. There has been a total lack of transparency and scrutiny and it doesn't seem as if due process has been followed. There hasn't been proven pursuit of Brownfield alternatives.

I believe the proposal is fundamentally unsound as the suggested infrastructure is woefully inadequate and doesn't address the fundamental issue with the plan - that this is building a town on the outskirts of Tonbridge and therefore to suggest changes to Tunbridge Wells infrastructure, wholly misses the point. All infrastructure challenges (schools, traffic, increased train travel, doctor's surgeries) will be a Tonbridge issue - though Tunbridge Wells will receive the council tax - this is wrong.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Look at alternative options - Castle Hill, Blantyre etc and in particular pursue Brownfield options closer to current Tunbridge Wells town infrastcuture.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

- If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**
- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

STR/SS3

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident in Tudeley since 1984 & write in respect of the above consultation to express my deepest concerns about the proposed land use planning strategy for Capel/Tudeley.

The policies referenced above promote a comprehensive mixed use development for Capel/Tudeley, in the form of a 'garden settlement', and encompassing approximately 2,800 dwellings; employment provision, a range of local services and facilities to serve such a settlement; and open space, leisure and recreation uses.

Also proposed is a new six form entry secondary school & primary school – which are to be located within the 'garden village'.

There are a number of very obvious, and very serious, problems with this proposed strategy, including (but not limited to):

- . Green Belt,
- . Infrastructure/deliverability,
- . Area of Outstanding Natural Beauty/Heritage Assets/visual impact,
- . Flooding,
- . Ecology, and
- . Major traffic issues
- . Noise, light & air pollution
- . Loss of prime agricultural land
- . Disproportionate allocation of new housing within the Capel Parish

These shall be briefly addressed in turn as follows:

Green Belt– The site for the new garden settlement falls within the Green Belt, wherein the primary aim of planning policy is to keep land permanently open. In terms of Local Plan preparation this means not releasing land from the Green Belt except in exceptional circumstances. I understand that exceptional circumstances cannot exist if there are alternative, non-Green Belt sites that might be available to accommodate the proposed development. In this case only a small proportion of Tunbridge Wells Borough is washed over by the Green Belt. There is a significant swathe of land to the east of the Borough that is not within the Green Belt, and is therefore free of such constraint. Has it genuinely and robustly been demonstrated that there are no alternative sites available that are outside of the Green Belt? If the answer to this is no, then exceptional circumstances simply cannot exist.

The intended expansion of Paddock Wood together with the new Tudeley Village Development, if allowed, would lead to a corridor of urban sprawl from Tonbridge to Paddock Wood effectively destroying the green belt buffer that currently exists & separates these areas.

Infrastructure/Deliverability –Clearly the delivery of a new garden settlement will be entirely dependent upon the provision, up front, of the infrastructure to serve such. The provision of such infrastructure is likely to be complicated by the fact that the proposed site is dissected by a railway line. In this context, timescales become important. For instance, by the time a (very large scale) planning application has

been determined, conditions have been discharged, and sufficient infrastructure works been undertaken to enable housing and other development to be delivered, it seems incredibly likely that it will be a number of years down the line. As such the strategy does nothing to alleviate housing and employment needs in the short to medium term; and does nothing to meet the stated objectives of producing a Local Plan.

There appears to have been very limited consultation with the major service providers for sewerage, water & power services in connection with the scheme.

These services are currently already stretched within the local area with poor water supply & inadequate foul & storm water services for the current population.

Area of Outstanding Natural Beauty/Heritage Assets –The site of the proposed garden village lies outside of, but adjacent to, the Area of Outstanding Natural Beauty. The National Planning Policy Framework (paragraph 172) states that ‘great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues’. Similarly, there are a number of Listed Buildings located around the perimeter of the proposed allocation, including my own home. The current (and historic) setting of those Listed Buildings is one of a distinctly rural environment, characterised by open fields, interspersed with historic field boundaries and other historic buildings. There is simply no way that the introduction of 2,800 new homes, employment, and associated facilities, on a large swathe of attractive, undeveloped, rural land cannot have a significant and detrimental visual impact upon the adjacent Area of Outstanding Natural Beauty, and upon the setting of the surrounding Listed Buildings.

Flooding –The site itself might not be subject to significant areas of flood risk, but adjoining areas certainly are. Surface water flooding has proven repeatedly to be an issue of serious local concern. Providing a new garden settlement on currently undeveloped, free draining, greenfield land – with the inevitable (considerable) increase in areas of hard surfacing and built form, will simply increase the prevalence of surface water flood risk on the areas of land that adjoin the proposed allocation.

Ecology –Given the extensive scale, and rural/undeveloped nature of the site of the proposed garden settlement, it seems inconceivable that it will not be home to protected species. With such a large scale development it is impossible to fully mitigate against such wholesale destruction of habitat.

Major traffic issues - I have concerns as to whether the traffic modelling that has been carried out to assess the impact of traffic generated by the new development has been fully substantiated & is accurate. There appears to be no consideration given to improving junctions with the major road system that the road between Five Oak Green & Tonbridge links into.

The existing road system during peak periods is often congested & the additional traffic both from & to the new development will exacerbate the current issues. The introduction of a new Secondary & primary School will lead to additional traffic from pupils attending the School from outside the new village development.

Noise, Light & Air pollution - Due to the size of the existing population within the Tudeley area there is very little noise, light or air pollution. This will not be the case once an additional 2,800 houses have been built together with the additional shops, offices & Schools that the plan refers to.

Loss of agricultural land - the proposed site for the new development currently consists of good grade quality agricultural land. Agricultural land has already been lost within the vicinity of the proposed development with land being allocated for additional mineral extraction / quarries. Recent experience has proved that once the material workings have been exhausted the quarries have been abandoned with very little landscaping / reinstatement works carried out & left inaccessible for local people to enjoy.

The extensive solar farm adjacent to the proposed village development that has been installed in recent years has also removed a large area of land from agriculture & has created a visual impact that is out of keeping with the general agricultural nature of the local area.

Both quarries & PV Farm have been created by the owners of the land that the proposed new village development is sited on.

Disproportionate allocation of new housing within the Capel Parish - It would appear that approximately 50% of the new housing requirement within this Local Plan has been allocated to this new Village Development which, bearing in mind the size of the current population of Tudeley & the

surrounding area, is disproportionate to the new housing numbers allocated elsewhere within the Borough.

This is not fair to the current inhabitants of the area whose needs have not been considered & who generally oppose the scheme.

In light of the foregoing matters, the proposed allocation of land at Capel/Tudeley must be removed from the emerging Local Plan, and an alternative, and more sustainable means of meeting housing and employment needs must be identified.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Consultation Point	Table 6 Green Belt Sites (View)
Status	Processed
Submission Type	Web
Version	0.1

Question 1

Respondent's Name and/or Organisation	Ashley Saunders
---------------------------------------	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

4.123 to 4.131 Green belt

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There is a huge proposal to remove the green belt protection to large areas that are currently protected by green belt. If councils can remove green belt as they see fit then one has to ask what is the point of green belt. Tunbridge Wells BC have not shown that this is unavoidable as there are many areas outside of the green belt that could be used. Green belt was set up to protect rural areas from the urban spread but this is clearly not protecting the green belt in Capel.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This can be changed to use up areas which are not protected by Green belt of which there are many in the eastern areas of the Tunbridge Wells Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	.	No, I do not wish to participate in examination hearing session(s)
---	---	--

This response is made on behalf of the 669 signatories on the petition submitted in response to Regulation 18 which was delivered to TWBC Planning Services in 2019 and the Facebook group 'Residents Against Ramslye Development' whose membership is currently 247 (names can be provided if required). We have noted guidance 4.3 and have encouraged the people opposed to the development of site 137/ Policy AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' not to make separate responses repeating the same points as those made here; some however will no doubt have submitted individual responses.

The broad development strategy "...is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services."

In January 2021 the Times of Tunbridge Wells reported that "17 per cent of retail space in and around Tunbridge Wells is currently lying vacant". It has been well documented that the impact of the Covid lockdowns on the retail sector is that many shops will be lost from the high street forever (e.g. Arcadia Group shops) and others will consolidate (e.g. John Lewis which is closing its RTW store). Last year the Courier reported that nearly a third of the Royal Victoria Place units were empty. As set out above there are still numerous empty shops so there is little point planning to build more until the current supply is exhausted. TWBC needs to think more carefully about what the future of retail and office work will be in an increasingly digitalised and flexible world rather than catering for the turn of the century's shopping and working patterns.

Policy STR 1 – The Development Strategy – Table 4 Distribution of housing allocations

As set out in our Regulation 18 representations to the draft local plan we challenge the need for such a large number of new dwellings in the Borough. Office for National Statistics data predicts the population of Tunbridge Wells will grow from 118,848 in 2020 to 123,003,092 in 2038 (Table 1 section 2.16 of the draft pre-submission plan); that is growth in the population of 6,155. TWBC reports that housing stock in 2016 was 49,880. If the occupancy rate of dwellings remains at the 2016 level (i.e. 2.35 people per dwelling) then the need by 2038 will be a further 2,620 dwellings to the stock. Even if one were to

allow for a decrease in the occupancy rate to say 2 people per dwelling, the need would still only be c.3,000 dwellings, i.e. about a quarter of the number of dwellings the plan allows for. Instead, there is an absurd situation where the plan appears to be proposing more than 2 new dwellings per person.

The Housing Supply and Trajectory Topic paper (February 2021) states there are 3,313 dwellings with extant planning permission which by any reasonable calculation will meet the need of the borough's projected population to 2038.

While we appreciate the housing requirement is set by national policy, we do not consider TWBC has appropriately represented the interests of its residents. The policy is eminently challengeable because it is fundamentally flawed. It effectively only considers supply side solutions to housing affordability. Much of the house price inflation experienced in the last 10 years is a consequence of the macro-economic environment (principally interest rates at an historic low for over 10 years driving a search for yield in assets) and other policy decisions such as 'help to buy' and the stamp duty holiday. It is clear there are external demand side issues that do not relate to population growth. By accepting the allocation, TWBC has not acted to protect the rural nature and the associated landscape of the borough that is valued by its residents and is protected under law. We remain of the view the approach to date has been supine and cavalier with our environment and interests. Indeed it is at odds with the Vision and Strategic Objectives by surrendering so much green space and the plan in its current form is not one that "respects the distinctive qualities of the borough". TWBC must take steps to challenge the allocation on our behalf so as to protect our interests.

We welcome the policy wording in respect of the Limits to Built Development (LBD) (section 2, 8 and 9).

While commenting on this section we note that RTW is presented as a whole. There appears to be no analysis or consideration of the distribution of sites within RTW itself. In the Broadwater ward the plan currently proposes c.500 new dwellings on six separate sites (RTW11, 12, 13, 14, 15 and 16). If this approach is adopted then the Broadwater ward will account for c.35% of the overall allocation to RTW. We consider this is unsustainable in terms of the available infrastructure, road network and the appropriate use of land in the case of site RTW16. The total allocation to the Broadwater ward is disproportionate (some wards are hardly affected at all) and inappropriate.

Appendix: Submitted sites not included in the Pre-Submission Local Plan

Rusthall

146 Tunbridge Wells Golf Club, Langton Road, Tunbridge Wells TN4 8XH

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

In addition, we consider the Green Belt assessment of this site is incorrect. The score of "Strong" contribution to "preserving the special character of historic towns" is too high given the land is not visually prominent and is only adjacent to the common. The score should therefore be adjusted to "relatively strong".

RTW

73 Land at Pembury Road (south), Tunbridge Wells

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent.

99 Land at Pembury Road, Tunbridge Wells TN2

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

We note the site is assessed as being in the setting of the AONB whereas in Regulation 18 it was incorrectly assessed as being in the AONB – we would further challenge the setting point. We consider this land to be separate and distinct from the AONB as the A264 creates a barrier and it is not visually in the setting of the AONB.

114 Land at Sandown Park, west of A21, Royal Tunbridge Wells TN2 4RT

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

We note the site is assessed as being in the setting of the AONB whereas in Regulation 18 it was incorrectly assessed as being in the AONB – we would further challenge the setting point. We consider this land to be separate and distinct from the AONB as Blackhurst Lane creates a barrier and it is not visually in the setting of the AONB. The land is further split and separated by Sandown Park so that parcel is not even adjacent to the AONB.

116 Land south of Pembury Road, Tunbridge Wells

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent.

280 Land at The Midway, Nevill Court, Tunbridge Wells, Kent

We wish to challenge why this site was omitted from the sustainability appraisal – the purpose of the appraisal process is to fully consider the positives and negatives, in a structured and documented way. This site appears to have been rejected because it is "within the AONB and landscape impacts were considered too severe to warrant consideration". Other sites within the AONB with equally adverse landscape impacts have been taken forward and without a full suite of sustainability assessments it is not possible to make properly evidenced based policy. As such this omission renders the sustainability appraisal unsound as a whole.

Our response to Regulation 18 identified this site had been inaccurately assessed, for example, it is listed as being in the High Weald AONB when it is not. The site assessment sheet no longer lists the AONB as an issue to consider but the site is considered unsuitable as there is concern over the impact on the Green Belt. This site needs reassessment (sustainability objective scores and site assessment/SHELAA) and the assessment documented and published.

384 Land at Great Bayhall, Tunbridge Wells, Kent

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent.

411 Land at Sandown Park between Pembury Grange and A21, Royal Tunbridge Wells, Kent

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

434 Tutty's Farm, Hawkenbury, Royal Tunbridge Wells, Kent

We wish to challenge the 'unsuitable' decision for this site because the sustainability scores are inconsistent. We consider this site is suitable for housing development.

Our response to Regulation 18 identified this site has also been inaccurately assessed, for example, it is listed as having an AONB component part when this is not the case. As such the sustainability assessment is unsound.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove site 137/ AL/RTW 16 'Land to the west of Eridge Road at Spratsbrook Farm' from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Mr G Ayers

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR 1 The Development Strategy

Policies PSTR/SS1, PSTR/SS3 & PSTR/BM1

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not effective
.	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 5 – comments

The comments below focus on the integrity and how sound the Local Plan (LP) has been assembled, having regard to its overall deliverability. In affect, not necessarily questioning its constitute parts (although some of these inevitably come into question - notably the sheer scale of new housing projected without corresponding highways infrastructure improvements) but how sound the thinking has been applied to knitting these together to achieve the overall strategic outcome for the Borough? In so doing, this is not merely looking at the results at the very end of the Plan Period after some 15 years but critically :-

i) at the very dawn of implementation in 2022 and

ii) followed closely in the formative years of its implementation (circa 2022 - 2028) when in stark contrast, unparalleled numbers of new homes (Expected Completions within Plan Period table) are being planned and yet highway infrastructure, classified as 'critical' by TWBC themselves, necessary to unlock the housing development, is worryingly not implemented until beyond year 10 into the overall 15 year plan period thereby leading to:-

- 1 increased volume of residents in the Borough which in turn multiples car usage exacerbating congestion, &
- 2 as a consequence, a reduction in air quality; &
- 3 a detrimental impact on the environment and residents well being in those parts of the Borough most effected during the transition phase.

Whilst recognising pressures and concerns by residents elsewhere in the Borough, the comments below focus on the impact locally to the Parish of Brenchley and Matfield even though many of the problems to be encountered arise outside of the immediate vicinity of the two villages.

There are three key areas to consider - housing, highway infrastructure and air quality. The thrust of the problem is that at no stage in the Local Plan, does it appear that deliverability has been baselined against existing conditions? For example, have the key highway routes to unlock the 'sustainable' housing developments been modelled against *origin & destination* traffic criteria to establish the extent of spare capacity on the **existing** highway network?

Further, to what extent has TWBC demonstrated how deliverable the Local Plan is under scrutiny? particularly at the interplay between the sizeable local housing development along with the A21 and A228 infrastructure improvements required to unlock them?

It is evident sections of the LP have been 'reviewed' individually but less apparent is the extent to which TWBC has undertaken due diligence and executive scrutiny to the critical path weaving its way through spine of the Local Plan? Without a CPA (Critical Path Analysis) or simple bar chart, it is impossible to form a view as to how deliverable or robust the LP is in this sense? Not the minutiae or stand alone

subjects but the big bite sized bits of the Local Plan that have undeniable strategic links and dependencies with each other.

One of the tests for soundness within NPPF (National Planning Policy Framework) is whether the Local Plan is Justified, or not. To support this an acceptable LP should contain " ... *an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.*"

I cannot claim to have read every section of the Local Plan but I am convinced that there is little to no evidence that supports the the LP is based upon proportionate evidence. Similarly, I have no feeling studying the LP, that the strategies adopted are underpinned by any number of various alternatives options. Surely if such alternative scenarios had been interrogated and contrasted in the LP, it would illustrate the current version as the preferred option.

Moving from generic commentary to specifics, my doubt to the soundness of the LP looks at the strategic interplay between the three subject groups below and the impact specifically on Brenchley and Matfield Parish (BAMP) along with nearby Paddock Wood:-

- . The order of magnitude increase in new housing for Paddock Wood, Capel Garden Village and BAMP, generating more traffic leading to congestion and lower air quality on 82160 running through Matfield; and
- . The impact of extra traffic through Matfield until such time as Highways England acquire ring fenced funding for the £1.5m in their 10 year capital programme to implement the enhanced A21 highway & roundabout modelling planned at Kipping Cross and Blue Boys; plus
- . The impact of extra traffic through Matfield (and surrounding village / rural areas) until such time in the future financial contributions from housing developers (via S106, CIL etc) achieve the £20 million necessary to fund the new A228 Colts Hill bypass works.

Item

Hazard

Risk

Consequence

Increased housing and number of residents at Capel Village, Paddock Wood and Matfield

Extra residential car journeys made by new residents within the Boroughs hotspots and extra HGV's continuing to use B2160 & avoid the dedicated HGV A228 route to join A21

1) additional vehicle trips heading to & from A21 Kipping Cross

2) HGV's continuing to avoid designated HGV route up A228 Colts Hill due to congestion at and poor junction configuration to join the A21

1) Vehicular congestion backing up from Kipping Cross into Matfield village, especially during summer and peak times of the day

2) Additional vehicle traffic and HGV's using B2160 through Matfield village

3) lowering of air quality 4) lowering of residents wellbeing, health and increased journey times.

For the first 6 years, the Boroughs' housing projections (Expected Completions Within Plan Period - Housing Supply and Trajectory Topic Paper for the Pre-Submission) are at the highest level across the whole of the Plan Period to 2038. Yet, the highway infrastructure deemed critical (Infrastructure Delivery Plan) by TWBC themselves to address 1) existing baseline transport problems and 2) unlock the spatial needs for projected housing targets " does not reach even the feasibility/ planning stage until at least year 10 of the 15 year programme (10 years for A21 and beyond year 10 for A228 Colts Hill bypass).Q - what happens to transport congestion, environment, air quality and residents health during the first 10 years of the Local Plan when this critical highway infrastructure is not available?

Q - do the contributions and improvements made in latter years exceed the detrimental impact upon residents wellbeing in the first 10 years?

Under Section 3:Vision and Objectives the following statements are made by TWBC :-

Vision - "general concerns about the infrastructure capacity " ...

Vision and Strategic Objectives 1 - Vision " and supporting infrastructure will be **achieved over the plan period** (this claim reinforces a lack of deliverability during the plan period.) " and under Local ambitions: for Paddock Wood with timely infrastructure provision'

Vision and Strategic Objectives 2 - " To achieve the timely delivery of all forms of infrastructure that meets the needs of development... .. "

How and **when** the Local Plan assures residents these bold claims are supportable not clear, especially when housing is forging ahead in the early years and hard infrastructure doesn't emerge until 2/3rds of the plan period has passed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Section 6 - Recommendations for update to Local Plan

Scale and rate of additional housing plus realisation of A21 and A228 highway improvements

Recommendation 1 - Housing development

- explore to what extent the volume of new housing developments between 2022 and 2028 can be skewed to later in the plan period until such time as A21 and A228 highway improvements are realised.
- Tailor housing development projections to meet existing A21 and A228 highway capacity until future improvements of A21 and A228 fully funded and implemented.

Recommendation 2 - Traffic modelling

- using traffic modelling against housing projections and locations, quantify the existing spare highway capacity available on A21 (Kipping Cross and Blue Boys) and A228 to establish if the extra generated journeys made by new residents (in formative LP years) are tenable, or not.
- enforce dedicated HGV routes to service new housing development sites
- Undertake HGV traffic study at junction of B2017 and A228 to establish why, as the KCC preferred HGV route, instead of continuing up Colts Hill A228, HGV lorries divert through Matfield along B2160 to join A21.

Recommendation 3 - Highway Infrastructure

- Notwithstanding LP safeguarding, explore alternative measures to secure gap funding (reference is made within the LP) A21 & A228 improvements in order to pull forward and thereby retain existing LP year housing projections in the early years 2021 - 2031.
- Ensure A264 Pembury junction **and** A228 Colts Hill bypass improvements are dealt with holistically as one overall highway improvement solution.
- Explore traffic calming technology and improved pedestrian safety in Brenchley and Matfield villages.

Recommendation 4 - Air quality

- adopt air quality monitoring points between 1) The Star and The Poet on B2160 Matfield, 2) A21 Kipping Cross and 3) Eldon Way and Rosemary PI B2160 at Paddock Wood.

Recommendation 5 - National Planning Policy Framework

- Along with any supporting evidence trail, highlight to what alternative scenarios have been considered in drafting the LP and methodology employed leading to the option selected in the current version of the Local Plan.

- . Demonstrate how TWBC have assessed the Local Plan as 'deliverable' , what they identify as tier 1 unavoidable adverse impacts to residents, businesses and visitors and the mitigation measures (or compensatory measures) to be adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided into Policies STR/SS1 (PSLP_2019), STR/SS2 (PSLP_2020), Policy ED2 (PSLP_2021), Vision and Strategic Objectives (PSLP_2022), Policies STR1 (PSLP_2023), STR3 (PSLP_2024) and STR4 (PSLP_2025)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Barth-Haas UK Ltd (herein 'BarthHaas') in respect of the Tunbridge Wells Borough Council Pre-Submission (Regulation 19) Local Plan (PSLP) consultation.

1.1.2 These representations relate to BarthHaas' existing site at Hop Pocket Lane, Paddock Wood.

1.2 The site

1.2.1 The site comprises the Barth Haas UK headquarters and production facility, which is located east of Hop Pocket Lane in Paddock Wood.

1.2.2 Barth Haas UK forms part of the Barth Haas Group – who are the world's largest supplier of hop products and services. It operates across all continents and provides support to its customers and partners throughout the production and sale cycle. This includes research and development, breeding /growing and marketing. As is recognised in PSLP paragraph 5.236, Paddock Wood evolved around the production of hops, and so as a company who continue to trade in hop products, BarthHaas provides an important link with the history of the town, as well as being an important local employer in its own right.

1.2.3 Our client is currently considering options to expand their facilities. This is likely to require relocation, with an alternative location in or close to Paddock Wood preferred, which will then free up the site. The existing premises are dated and no longer suit the needs of modern businesses – especially being an imposing five storey building – it is likely that the site would need to be redeveloped in order to be attractive to future occupiers.

1.2.4 The extent of the site is shown in Figure 1 overleaf.

[TWBC: for Figure 1: Site Location Plan see full representation attached]

1.2.5 The site was promoted for development through a response to the Regulation 18 consultation draft Local Plan.

1.2.6 The site is very close to both the town centre and the railway station, the latter being accessible via a pedestrian access point immediately south of the site.

1.2.7 The site was assessed by the Council as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA). This concluded that the site could be suitable to be redeveloped to accommodate between 40 and 140 dwellings. The SHELAA concludes that the site is suitable, available and deliverable for such a use, and is in a sustainable location. It is therefore suitable to be allocated for this form of development.

1.2.8 Strategic Sites Masterplanning and Infrastructure Main Report paragraph 4.152 also recognises that some other town centre uses (e.g. retail and leisure) may also be appropriate in this location.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies

1.5.8 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.5.9 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of BarthHaas in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, and especially the identification of the existing BarthHaas site as being suitable for residential-led development.

1.6.3 However, we object to the wording of Policy ED2 for the reasons set out above.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN – REPRESENTATIONS ON BEHALF OF BELLWAY

We write on behalf of our client, Bellway Homes Strategic, in relation to the Pre-Submission draft Local Plan for Tunbridge Wells Borough which is currently subject to public consultation. This letter provides the background to Bellway's interest in the Borough and sets out representations on their behalf.

BACKGROUND

Bellway has a legal interest in the land to the north and south of High Woods Lane (Mouseden Farm) on the eastern edge of the built up area of Tunbridge Wells/Hawkenbury which it is promoting for residential led development. The site is separated by High Woods Lane. The area south of High Woods Lane is currently in agricultural use and bordered to the east by woodland, to the south by existing sports uses and to the west by existing residential development. The area north of High Woods Lane is also within agricultural use, with further agricultural uses/woodland to the east and an indoor bowls club and allotments to the west.

The adopted Proposals Map indicates that both parts of the site are within the Green Belt and AONB.

On the basis of the Proposals Map published as part of this consultation indicates that the southern part of the land (south of High Woods Lane) is to be designated under Policy RTW1923 with that area to adjoin the 'Proposed Limited to Built Development'. The northern part of the land promoted by Bellway is not subject to any other proposed allocations. The draft Proposals Map appears to indicate that both parts of the site will continue to be located within the Green Belt and AONB.

REPRESENTATIONS

The following section of this letter sets out Bellway's representations on the draft Local Plan.

Housing Requirement and Supply

Paragraph 4.10 of the draft Local Plan indicates that a total of 12,200 dwellings are required in the Borough between 2020 -2038 calculated on the basis of 678 dwellings per annum to reflect the 'standard method' (over 18 years we calculate this to be 12,204 dwellings). Although we agree that the standard method should be the starting point for calculating the Local Housing Need figure, we also note that this should be a 'minimum requirement', not a minimum 'target' as suggested by paragraph 4.10

Table 3.3 shows how the requirement is to be achieved via the following sources:

- . Extant planning permissions at 1 April 2020: 3,313 dwellings
- . A windfall allowance on small sites of 1,310 dwellings
- . A windfall allowance on large urban sites of 360 dwellings
- . Outstanding SALP/Local Plan site allocations of 276 dwellings
- . Minimum additional allocations to meet need of 6,945 dwellings

As paragraph 4.17 explains, at least 7,221 dwellings need to be identified (a combination of the outstanding and additional allocations). However that figure assumes that 1,670 dwellings will be delivered during the Plan-period from windfall sources. As we note elsewhere, the draft Local Plan has become increasingly reliant upon those sources.

We welcome the Council's recognition (paragraph 4.18) that:

"In practice, aside from the need also to consider the potential for unmet needs elsewhere to be accommodated, it should also be borne in mind that the total capacity of allocated sites would need to be somewhat greater than the above figures, to make allowance for the potential delay and/or non-delivery of a proportion of the sites. In essence, this is to ensure the robustness of the Plan's housing provisions in order to meet the housing need."

Affordability

The Housing Needs Assessment Topic Paper (February 2021) itself therefore acknowledges that the level of growth planned in the emerging Local Plan is not at a level which would address the inherent issues of affordability due to the following commentary:

"With its relatively high house prices, application of the affordability uplift to the borough produces a figure of 741 dwellings/year. However, due to the substantial increase above household growth projections, the above-mentioned 40% increase cap is applied. (i.e. 484 dwellings/year multiplied by 1.4)

Hence, applying the Standard Method, the local housing need for Tunbridge Wells borough is 678 dwellings/year, or 12,204 net additional dwellings over a plan period 2020 - 2038.

It can be seen that this target under the Standard Method is a little, 8.5%, less than the uncapped figure (678/741=91.5%). Further consideration of whether the Council should plan for the uncapped figure, or another level of need than set by the Standard Method, is given in the following section."

Notably the Topic Paper explains that:

"With its relatively high house prices, application of the affordability uplift to the borough produces a figure of 741 dwellings/year. However, due to the substantial increase above household growth projections, the above-mentioned 40% increase cap is applied. (i.e. 484 dwellings/year multiplied by 1.4)."

However the Topic Paper also explains that:

"It also finds that the higher, uncapped need may also be achievable, notwithstanding this would involve a further significant increase over recent building rates. However, it concludes that it would not be unreasonable for the Council to adopt the capped standard method need, having regard to the concentration of growth potential in the west of the borough, the fact that it will be a 'minimum' requirement, and the benefits to housing delivery of getting an up-to-date plan in place as soon as possible."

Bellway consider that the housing requirement should be increased in order to help tackle the identified issues of housing affordability in the Borough. In the event that the housing requirement is not increased in this manner then this only heightens the imperative of ensuring that the Local Plan establishes a planning policy context, by virtue of the sources of supply, allocations and distribution strategy which ensures that the planned level of growth can be achieved. Despite the Topic Paper explaining that the uncapped figure could be achieved, the LPA has not made any steps to address these issues.

Reliance on Windfall Sites

1,670 dwellings from windfall sources represents 13.14% of the total minimum requirement. It also represents 18.78% of the supply still to be met once extant permissions at 1 April 2020 are discounted. In our submission that is a very substantial component of the overall housing requirement, particularly given the recognition at paragraph 4.18 of the draft Plan and the reliance upon large sites.

The reliance on windfalls is also of concern since this has increased, rather than decreased compared to the Council's expectations at the Regulation 18 stage. In our submission, this places greater uncertainty that the minimum housing requirements will be achieved and address local issues such as affordability.

Notwithstanding the comments set out above, Bellway have significant concerns regarding the approach which the Council is pursuing to meet the housing needs in the Borough.

Extent of the 'Buffer'

Paragraph 4.53 and 454 of the draft Local Plan state that:

"It can be seen that the total capacity of all allocated sites, excluding those that already have planning permission at the base date, is 8,076-8,461 dwellings. This compares to the anticipated residual requirement, after sites with planning permission and windfall sites allowances are made, of 7,221 dwellings. In overall terms, the allocated sites, together with these other sources of supply yield 13,059-13,444 dwellings, relative to the Plan's overall target of 12,204 net additional dwellings."

"Taking the mid-point of dwelling ranges, there is a 'buffer' of approximately 1,000 dwellings, equivalent to some 14.6% of the need from allocated sites and 8.6% of overall need. While there is a high level of confidence regarding the achievability and availability of identified sites, and very high for those that have already the benefit of planning permission, and the windfall allowances are robust, it is accepted that it is prudent to provide this degree of flexibility in the actual housing supply, particularly having regard to the high contributions from the strategic sites."

The position set out in the draft Local Plan is therefore that the LPA expects there to be a 'buffer' of around 1,000 dwellings to the minimum housing requirement.

For the reasons set out in these representations, Bellway consider that this is insufficient.

Housing Trajectory

The 'Housing Supply and Trajectory' Topic Paper (February 2021) explains that the Local Plan makes provision for 13,257 dwellings during the Plan period (including existing commitments) (a buffer of 1,053 (or 8.63%) compared to the standard method requirement of 12,204). We assume that this figure is calculated on the assumption that all extant permissions, existing site allocations, windfall sites and new allocations deliver as expected in the trajectory.

As an initial comment, we note that despite the recognition at paragraph 4.18 of the draft Local Plan and the increased reliance upon windfall sources, we note that at the Regulation 18 stage, a buffer of 1,216 dwellings was proposed. The Council has therefore increased its reliance on uncertain sites, but decreased the degree of flexibility.

The 'Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan' (February 2021) indicates that the 3,540 dwellings at Paddock Wood/Capel are expected to be delivered from 2025/2026 and at a consistent rate of between 240 – 300 dwellings per annum until 2036. We consider that the Council has been overly optimistic over the lead in time before this scheme is delivered and then the subsequent rate of housing completions for the reasons set out below:

- Lead in: the 'Housing Supply and Trajectory Topic Paper' envisages that development would commence on this site in 2025/2026. We understand that the Council's Local Development Scheme envisages that the new Local Plan will be adopted in June 2022. That means that there would be less than 4 years between the adoption of the Local Plan and the delivery of housing at this site. However Policy STR/PW 1 establishes that there is a significant amount of work to be undertaken in relation to this allocation. That work includes comprehensive masterplanning and the creation and adoption of one or more Supplementary Planning Documents. The Policy indicates that compulsory purchase powers may be utilised to ensure comprehensive development. The Lichfield report 'From Start to Finish' identifies average 'lead in times' of close to 7 years for sites larger than 2,000 dwellings. The LPA's assumptions are that the site delivers less 4 years from when they expect the Local Plan to be adopted. This lead in time is extremely optimistic and fails to reflect

the complexities of delivering large scale strategic residential sites including land assembly, the preparation of SPDs, the preparation and determination of (complex) applications, reserved matters, conditions and infrastructure delivery. In opinion, the lead in time should therefore be extended. If the delivery of housing from the Paddock Wood/Capel allocation were delayed until 7 full years after the adoption of the Plan, that would suggest the first dwellings would be completed in 2029/30. The effect of this would be to remove 1,200 dwellings from the supply. Removing 1,200 dwellings from the housing trajectory would remove any degree of buffer to the minimum overall housing requirement given the comments at paragraph 4.54 of the draft Local Plan.

- . Completions rate: The Topic Paper explains that the assumed delivery rates are greater than demonstrated through the 'Letwin Review'. Furthermore, there is no analysis as to how matters such as the requirement for phasing/infrastructure delivery would affect the completions rate. In any event, we consider that the expected completions rate is likely to be excessive

The fact that there is such uncertainty regarding the deliverability and timescales for the strategic scale development envisaged at Paddock Wood/Capel is of significance since 3,540 dwellings represents more than a quarter (29%) of the total minimum requirement to 2036 and even on the Council's own calculations they claim an oversupply of 1,000 dwellings (compared to the minimum requirement. Simply delaying the site until 2029/30 removes 1,200 units from the overall supply and therefore more than the claimed buffer. Reducing the annual delivery rate would further reduce the contribution from this site during the Plan period.

The 'Housing Supply and Trajectory' Topic Paper indicates that 2,100 dwellings at Tudeley Village are expected to be delivered from 2025/2026 and at a rate of between 150 – 200 dwellings per annum until 2036. We consider that the Council has been overly optimistic over the lead in time before this scheme is delivered and then the subsequent rate of housing completions for the reasons set out below:

- . Lead in: the 'Housing Supply and Trajectory' envisages that development would commence on this site in 2025/2026. We understand that the Council's Local Development Scheme envisages that the new Local Plan will be adopted in June 2022. That means that there would be less than 4 years between the adoption of the Local Plan and the delivery of housing at this site. However Policy STR/CA 1 establishes that there is a significant amount of work to be undertaken in relation to this allocation. That work includes comprehensive masterplanning and the creation and adoption of one or more Supplementary Planning Documents. The Policy indicates that compulsory purchase powers may be utilised to ensure comprehensive development.

The Lichfield report 'From Start to Finish' identifies average 'lead in times' of close to 7 years for sites larger than 2,000 dwellings. The LPA's assumptions are that the site delivers less than 5 years from when they expect the Local Plan to be adopted. This lead in time is extremely optimistic and fails to reflect the complexities of delivering large scale strategic residential sites including land assembly, the preparation of SPDs, the preparation and determination of (complex) applications, reserved matters, conditions and infrastructure delivery.. In opinion, the lead in time should therefore be extended. If the delivery of housing from the Tudeley Village allocation were delayed until 7 full years after the adoption of the Plan, that would suggest the first dwellings would be completed in 2029/30, two years later than expected by the Council. The effect of this would be to remove 300 dwellings from the supply.

- . Completions rate: Whilst the Council appears to have applied more reasonable completion rates to this site, we consider that evidence will still need to be provided in order to support the claimed figures. Given the overall contribution that this site makes towards housing supply to 2036, it is imperative that the Local Plan is based upon a justified housing trajectory.

In isolation the alterations referred to above to Tudeley Village scheme may result in housing delivery falling below the overall requirements, assuming that it does indeed come forward and at the rate envisaged by the Council. More significant alterations to those referred to above (for example to the delivery rates or other sites) could have dramatic consequences on the achievement of the overall housing requirement (irrespective of any other alterations made to supply).

Simply by delaying these two sites until 2029/30, 1,300 dwellings are removed from the housing supply, and therefore the overall supply is less than the minimum requirement.

These comments demonstrate that, without evidence to support the claimed lead in times or completion rates, the Council is overly reliant upon two sites to achieve the planned housing requirement to 2036. Additional flexibility and sources of supply are therefore required. Revising the current housing trajectory to reflect fairly modest amendments alone results in a significant undersupply of housing against the capped figure derived from the standard method. Other alterations, such reductions in the windfall

allowance or reductions in the supply from other allocations/commitments would increase the extent of that shortfall.

As currently prepared, the Local Plan does not represent a vehicle by which the planned housing requirements will be achieved. In contrast, the Plan will result in an undersupply of housing. This is likely to have severe consequences for the Council's ability to demonstrate a rolling five year supply of deliverable housing sites. This is compounded by the reliance on two large sites (2,100 at Tudeley Village and 3,540 at Paddock Wood delivering 5,640 in combination) represents 78.12% of the remaining level of housing required during the Plan period (7,221 dwellings).

Accordingly, we consider that it is essential that the Council allocate a greater range and diversity of sites for residential development to ensure that the housing requirement of the Plan can be achieved.

Bellway reserve the opportunity to comment on the Council's housing trajectory, including the other sites proposed for residential allocation, in more detail as the Local Plan progresses.

Meeting Affordable Housing Needs

The Housing Needs Assessment Topic Paper (paragraph 3.8) explains that (based on the conclusions of the SHMA, 2015):

"the borough would need 341 affordable homes per annum to meet their housing needs and be eligible for affordable housing (see SHMA, 2015 Table 39, page 90). This includes need arising from concealed and homeless households, as well as from overcrowded households, and those who seek an alternative tenure of accommodation, but would release a home for other households should a new affordable home be provided. This estimate is sensitive to assumptions on spending on housing costs relative to income. It assumes 30%, but the figure falls by about a quarter if 35% is assumed, or about 50% if 40% rent to income ratio is assumed (see SHMA, 2015 Figures from Table 40, page 91).

The Housing Needs Assessment Topic Paper (paragraph 3.9) explains that:

"A separate Housing Needs Study in 2018 (see Housing Needs Study), assessed affordable requirements by taking into account the need from existing and newly forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. Against a gross need for affordable housing of 662 dwellings each year, when the likely annual affordable supply is taken into account, the overall net imbalance is 443 affordable dwellings each year. This is considerably higher than the SHMA estimate of 341 dwellings, but includes significant numbers due to overcrowding, based on the bedroom standard. However, this may not represent actual demand in practice. Furthermore, this, and similar needs due to unsuitable housing, are assumed to be met within five years. The calculation includes meeting all the backlog within five years, but then applies the resulting annualised need for the first five years over the longer period of 15 years that the Local Plan covers. If the backlog is spread over the full 15-year period, based on the HNS estimate, the need is actually 391 dwellings per year."

391 dwellings over 15 years results in 5,865 affordable dwellings being required.

Policy H4 of the draft Local Plan expects all greenfield sites over more than 9 dwellings to deliver a minimum of 40% affordable housing (with PDL sites expected to provide 40%). Even if 40% of all 8,461 dwellings which could be delivered (see paragraph 4.54) were delivered as affordable housing, that would provide 3,384 affordable dwellings (significantly fewer than need acknowledged by the Council). However that approach misrepresents the supply of affordable housing bearing in mind the different requirements applied by Policy H5. In addition, this approach also misrepresents the level of affordable housing which will be delivered, as it is based upon an assumption that all allocations deliver the total maximum (i.e. upper end) level of housing referred to in paragraph 4.54.

On the basis of these comments alone, we consider that the Local Plan fails to represent a positive approach to addressing the need for affordable housing in the Borough. It should also be noted that the provision of affordable housing to 2036 would also be reduced in the event that the strategic allocations at Paddock Wood/Capel or Tudeley are delayed, do not achieve the delivery rates envisaged by the Council or if the further work in support of the Local Plan/CIL indicates that the sites themselves should provide fewer affordable dwellings than might otherwise be expected.

Policy STR1: The Development Strategy

Policy STR1 is accompanied by Table 1 of the draft Local Plan which sets out the scale and distribution of development. That table identifies Tunbridge Wells as the Main Urban Area where allocations are

expected to deliver 1,416-1,536 dwellings. Notably Tunbridge Wells is expected to accommodate significantly fewer dwellings than Tudeley Village during the Plan period despite the clear and obvious disparity between the two settlements/areas. Fundamentally, Tunbridge Wells is a sustainable location for growth now, Tudeley Village is not and will never be in a position where it exhibits the same overall sustainability credentials as Tunbridge Wells.

Overall we note that the quantum of development directed to Tunbridge Wells is disproportionately low compared to the levels of development expected to be provided at other, less sustainable, settlements within the Borough. This is despite the availability of sites at Tunbridge Wells which have been assessed as being suitable, sustainable and logical.

SUMMARY

These representations set out **significant concerns** regarding the draft Local Plan for Tunbridge Wells Borough. In summary, the level of housing required to address issues of affordability and does not provide any realistic opportunities to make a meaningful contribution to meeting affordable housing needs. Whilst the Council claims that the housing supply represents a buffer over the planned requirement, this is based on extremely optimistic assumptions and short lead in times before the key sites deliver. In the case of Paddock Wood the Plan then relies upon very high delivery rates.

A more diverse and greater range of sites are required to address affordability, provide affordable housing and to help ensure that the housing requirement is achievable.

The Plan also provides a disproportionately low level of new housing at Tunbridge Wells despite the sustainability of this settlement, in comparison to other, less sustainable locations. This is borne out by the selection of the Tudeley Village site as a location for a new garden village in a remote location where the extent of measures to support sustainable travel is extremely unclear. Alternative options are available which would direct development to the most sustainable settlement (i.e. Tunbridge Wells) and which are in sustainable locations.

This conclusion is supported by the Council's own evidence which demonstrates the availability and suitability, sustainability and logic of alternative sites on the edge of Tunbridge Wells (including the land promoted by Bellway which is subject to these representations).

The Council's own evidence has overstated the contribution that certain sites, including the land promoted by Bellway which is subject to these representations) makes to the Green Belt. When the land is assessed in a more robust manner (and when assessed independently rather than as part of wider Broad Areas), the contribution is significantly reduced.

The southern part of the land promoted by Bellway (i.e. the land south of High Woods Lane) is subject to a planning permission for recreational uses. That application was submitted by the Borough Council, despite it having no interest in the land. In contrast, Bellway has a legal interest in the land and is promoting this area, as part of a wider site, for residential development. Bellway would be willing to work with the Borough Council to explore opportunities for bringing forward the approved recreational facilities in the area, which residential development on the site could help deliver.

Whilst the Council is pursuing (by allocating and seeking planning permission) land outside of its control for sports and recreation uses, it is concurrently planning to release a number of sites which are already within those uses for residential development which the Council does own. As a matter of general principle this approach appears unjustified.

As it is currently drafted the Local Plan is unsound. It relies on unsustainable and undeliverable solutions to housing needs and is partly premised on releasing the Council's own land for housing whilst proposing land it does not own for compensatory sports and recreation purposes. These fundamental issues of unsoundness are compounded by a lack of documentary evidence to explain why the Council has selected the approaches and proposed allocations in the emerging Local Plan.

Bellway would be willing to enter in to dialogue regarding the land north and south of High Wood Lane and the extent to which this site could deliver housing (delivering the greater range and diversity of sites) in a sustainable location. Bellway would be willing to discuss the manner in which such housing could assist in delivering additional recreational facilities in the area.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 2	
Agent's Name and Organisation (if applicable)	Lichfields
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR1- The Development Strategy

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not effective

. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

While the principle of meeting housing need in full is supported, the strategy for doing so is overly reliant on the strategic sites of Tudeley Garden Village and the Strategic Expansion of Paddock Wood. This policy is therefore neither effective nor justified in this regard. These two strategic allocations have been allocated a total in excess of 5,500 dwellings representing over 60% of all dwellings that are expected to come forward on allocated sites. Furthermore, the Council have applied an optimistic development trajectory for the delivery of these sites. Any delay in the delivery of these strategic sites could have a large impact on the ability of TWBC to meet their housing targets. As such, we recommend that more small and medium sites are allocated within the Local Plan, towards the most sustainable settlements within the Borough such as Cranbrook and Tunbridge Wells. This will provide greater flexibility and confidence that the housing target will be met over the plan period.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Council should allocate more small and medium sites for housing to reduce reliance on the two large strategic sites. These should be located towards sustainable settlements such as Cranbrook and Tunbridge Wells.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is important that TWBC are able to meet their housing targets over the plan period. There may be important matters to discuss to ensure that this plan is sound in this regard.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please refer to paragraphs 3.1 – 3.12 of the attached representations.

[TWBC: for full representation with appendices, please see supporting documents]

3.0 The Development Strategy and Strategic Policies

Distribution of Growth

3.1 Berkeley raises a number of objections to the Plan's development strategy and strategic policies, specifically Policy STR 1 which proposes a large proportion of housing growth at Tudeley Village and Paddock Wood and Capel.

3.2 Berkeley believes that the planned distribution of growth within the Borough should be reflective of Table 13 at Policy ED 8 of the Plan. Development should be prioritised at those settlements at the top of the settlement hierarchy, particularly Royal Tunbridge Wells (RTW) and other settlements such as Cranbrook, where RTW has been classified as the only Primary Regional Town Centre in the Borough.

3.3 Even though the Council acknowledges RTW as the largest settlement within the Borough, the settlement should be recognised as a principle settlement for future growth, as it is the most accessible town, containing the greatest range of facilities and services.

3.4 Furthermore, paragraphs 5.7 to 5.14 of the Plan demonstrate that RTW is a sustainable location for development, located close to major public highways, and well served by public transport networks, including main line train stations within the town centre.

3.5 However, Table 4 at Policy STR 1 of the Plan allocates a relatively small proportion of housing at RTW, with a total of up to 1,536 dwellings allocated within the Plan period. However, there is an over-reliance on the strategic allocation at Tudeley Garden Village and the settlements of Paddock Wood and Capel in which the Plan allocates up to 4,200 dwellings in Capel Parish (includes Tudeley Village and East Capel allocations) and up to 4,032 dwellings at Paddock Wood.

3.6 These major strategic allocations for Capel Parish consist of rural locations classified as lower order settlements within the settlement hierarchy at Policy ED 8, whereby Tudeley Village, Paddock Wood, including land at east Capel have been classified as Neighbourhood Centres at Table 13 of the Plan. As such, we believe that there is a disproportionate level of growth towards Tudeley Garden Village and Paddock Wood and therefore object to the development strategy at Policy STR 1 on this basis.

3.7 Berkeley acknowledges that the Plan limits the growth capacity at RTW based on the constraints posed by the surrounding AONB and Green Belt but feel that further capacity can be accommodated sustainably at RTW and therefore object to Policy STR 1 The Development Strategy and STR/RTW 1 The Strategy for Royal Tunbridge Wells which only plans to allocate approximately 1,416-1,536 dwellings at RTW within the plan period.

3.8 Therefore, Berkeley support's Policy STR 9 of the Plan in principle which proposes the removal of land from the Green Belt which is supported by exceptional circumstances. However, Berkeley feel that additional Green Belt land should be allocated on the edge of sustainable settlements such as RTW and Cranbrook to increase the Council's ability to meet their housing needs in full within the Plan period.

3.9 It is clear that the spatial strategy for the Borough is not reflective of the growth strategy set out within the SA which proposes more urban intensification, especially at RTW. As such, the Council will need to allocate more deliverable sites in sustainable locations in addition to their current supply in order to meet their housing needs in full and have a sound adopted Local Plan.

3.10 Additional sites located at the most sustainable settlements in the Borough should be prioritised, such as Tutty's Farm. The site is in a highly sustainable location which can come forward early in the plan period and deliver the type of homes that the Borough needs without the need for major upfront infrastructure.

3.11 Therefore the overarching development strategy and objective of the Plan should be to maximise delivery of sustainable development in and around Tunbridge Wells, and therefore Berkeley objects to Policy STR 1 and Policy STR/RTW 1.

3.12 In summary, the Spatial Strategy as presented in the Plan has not been positively prepared nor is it justified and therefore does not meet the tests of soundness as set out by paragraph 35 of the NPPF.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to paragraphs 3.1 – 3.12 of the attached representations.

[TWBC: for full representation with appendices, please see supporting documents]

3.10 Additional sites located at the most sustainable settlements in the Borough should be prioritised, such as Tutty's Farm. The site is in a highly sustainable location which can come forward early in the plan period and deliver the type of homes that the Borough needs without the need for major upfront infrastructure.

3.11 Therefore the overarching development strategy and objective of the Plan should be to maximise delivery of sustainable development in and around Tunbridge Wells, and therefore Berkeley objects to Policy STR 1 and Policy STR/RTW 1.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Please refer to paragraphs 3.1 – 3.12 of the attached representations.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please refer to paragraphs 7.1 – 7.14 of the attached representations.

7.0 Sustainability Appraisal

7.1 The Council's SHELAA site assessment has been supported by an updated SA, included as part of the Regulation 19 consultation.

7.2 The Council's assessment of Tutty's Farm remains unchanged from the previous 2019 SA, however the Council has included additional constraints to development within the SHELAA.

7.3 Berkeley would like to refer the Council to the technical work undertaken in support of the SHELAA submission which has been provided to the Council. This work demonstrates that development will be located outside the area of ancient woodland and the Local Wildlife Site which will be sensitively located to limit potential harm to the AONB.

7.4 Berkeley has provided a re-appraisal of the Council's SA assessment which rescores the site in response to the technical work undertaken to date.

[TWBC: for tables, please see full representation attached as a supporting document]

Biodiversity

7.5 Berkeley commits to providing a net biodiversity gain on all new developments. The masterplan has been designed to be landscape-led through enhanced planting and management of significant landscape features within the site.

7.6 On this basis we consider that the site would have no negative impacts on biodiversity and therefore a positive scoring against this SA objective has been applied.

Heritage & Landscape

7.7 Within the SA, the Council's negative heritage and landscape score has been informed by the likely impact on the settlement edge and landscape setting of Tunbridge Wells.

7.8 The 2021 SHELAA assessment is contradictory, whereby the site is referred to as being "adjacent to the LBD of RTW" and has later been discounted as a suitable site for allocation due to being "outside of the LBD". However, the Council's 2019 SHELAA assessment of the site notes that Tutty's Farm would form a "logical extension to the existing allocation adjacent to the site" which adjoins the built up settlement edge of RTW.

7.9 Therefore, the proposed development would be consistent with the existing character and form of RTW and the neighbouring allocation at Hawkenbury Farm and would not cause a negative impact on the settlement edge of RTW.

7.10 As specified at paragraph 5.5 of this submission, the site is well enclosed by vegetation on its northern, eastern and southern boundaries, providing a strong defensible boundary within the landscape setting of Tunbridge Wells.

7.11 Therefore, to reflect the above, the heritage and landscape SA objective scores have been amended to neutral.

Land Use

7.12 Tutty's Farm has an agricultural land classification of Grade 3 which has informed the Council's negative score for land use.

7.13 However, the positive social impacts of the proposed development in the form of a new

purpose-built community building, affordable housing for local people and provision of a variety of natural green spaces would constitute a lower negative scoring of the site against this SA Objective. 7.14 Therefore, the land use SA scoring has been adjusted to a single negative to reflect this.

Question 4	
Do you consider that the Local Plan:	

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The language is not sufficiently robust in some of the policies and introduces ambiguity. Small rural parishes have very different requirements to the larger settlements, having less housing allocations, limited facilities and poor public transport. Consequently some policies have no relevance in rural areas and include no provision of additional facilities. Although the parish has a small housing allocation, the quality of life will be significantly affected by development in Paddock Wood/Capel/Horsmonden/Pembury. There should be some provision for the mitigation of the effects within other parts of the borough of increased traffic on safety, noise and air quality.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Pre-submission Comments from Brenchley and Matfield Parish C council

TWBC Pre-Submission Local Plan

STR1: The Development Strategy

It is noted that at every stage of the TWBC Local Plan the base and end date has changed and been pushed on. Draft Local Plan Reg 18 covered 2018 – 2026 and now the Reg 19 is 2020 – 2038. The Parish Council (PC) questions how the data of completed house builds in the borough from 2016 are incorporated into TWBC's housing calculations. It remains disappointing to note that the twenty units constructed by Rydon Homes in 2019 had been excluded from any projected numbers for the parish. The number of houses from solely the Rydon and Fernham developed sites already sits at 65 new

dwellings for Matfield. It is noted in “Table 4 – Distribution of housing allocations” that 56-60 dwellings distributed within the parish is a high number and yet the parish has already exceeded that number.

It is noted that Southborough rated as an urban area only has 42 dwellings allocated and this does not support point 1 of Policy STR 1. The PC is not convinced that the case for the approach of dispersed growth across the borough has been soundly made, and Matfield village in the TWBC Settlement Role and Function Study 2017 was deemed one of the least sustainable settlements in the borough.

In a Borough such as Tunbridge Wells, with nearly 70% of its land in the AONB and 22% in the Green Belt, with a high proportion of ancient woodland and a vast number of listed buildings and other heritage assets, the housing numbers surely need to be moderated to take account of all these constraints.

Housing Need and Supply

The Office of National Statistics estimates that the population of the borough is likely to increase by 6,155 over the plan period, with a reduction in the 0-14 age group of 11% and an increase in the over-65s age group of 26%. These projections are linked to past rates of development and are not forecasts.

In contrast the NPPF expects Local Plans to use the ‘Standard Method’, set out in national planning policy guidance. Using the standard method has determined a need for 678 dwellings a year in the borough and some 12,200 dwellings over the plan period. This a factor of approximately four times the number of dwellings required by a population predicted to grow by only 6,155! The standard method also concentrates new housing in areas of the country of the least affordability, refuting the government’s aspiration to create a Northern Powerhouse.

The Government is currently undergoing a consultation on changes to the standard method formula as set out by the NPPF 2019 for assessing local housing need, and revisions could be proposed in due course. The consultation commenced in August 2020 and there are wider reforms proposed in the “Planning for the Future” consultation. There has been general support for incorporating housing stock into future methodology and targeting more homes into areas where they are less affordable. Hopefully the any new homes proposed will be dispersed more evenly throughout the UK.

MHCLG has asserted that the ‘Objectively Assessed Need’ is not a target but a starting point, stating on May 25th, “the numbers mentioned are a starting point for local councils to help them understand how much housing is needed in their area and are not legally binding. Put simply, it is a measure of an area’s housing need, against which councils must then consider their local circumstances and supply pipeline. Councils draw up a local housing target, considering factors including land availability and environmental constraints such as Green Belt”.

The PC questions if it is appropriate for TWBC to adopt the figure of building 678 homes per year into its policy framework when Government policy might possibly change in the future? Since the introduction of the standard method the country has experienced Brexit and the Covid pandemic, which may have significant effects on the future population of the borough. So much has changed since the 2014 population figures, which was the starting point for the standard method. These figures will surely be difficult or possibly impossible to reduce once the Local Plan has been submitted for inspection.

STR5: Infrastructure and Connectivity

It is felt there are insufficient plans on infrastructure in the parish and surrounding area. This matter has not been addressed and the language used is ambiguous. There is a lack of information about the funding of infrastructure and its timing in relation to development.

The borough is in a high stress water area and there is concern about the adequacy of the water supply for additional housing and whether planning policies reduce consumption and conserve grey water sufficiently.

The OSSR policies do not meet the needs of small rural communities like Brenchley and Matfield Parish where the size of developments falls below the threshold for the provision of facilities or funding contributions.

STR6: Transport and Parking

The proposals are inadequate to prevent further major deterioration of the quality of life in the parish from traffic and rat running through rural lanes whenever there are problems on the A21 or other main roads. The current problems will be exacerbated by the major developments planned for Paddock Wood and East Capel, unless the A228 improvements have already been made.

There is no provision for highways improvements within the parish to mitigate against the effects of increased traffic from the developments planned for the north and east of the parish. The situation is already hazardous for pedestrians and cyclists, with no safe crossing points on Maidstone Road or Brenchley Road. While the Borough Council appears to be encouraging active travel there appears to be no real and effective action included in the plan to provide safe cycle routes within our parish or connections to nearby settlements. A safe off-road travel route for schoolchildren in the parish to reach Mascalls Secondary School and Brenchley and Matfield Primary School would be desirable. The provision of cycle parking spaces in developments is welcome but people will not be able to cycle unless there are safe routes to use them.

The strategy of active travel and public transport within STR6 is ambitious and encouraging but to date the PC sees little evidence of TWBC being proactive to provide any improved measures in the parish to date. The PC finds this disappointing and is of the opinion single occupancy car-based trips within the Borough will prevail.

STR7: Climate Change

The PC supports this policy but it will only be effective if TWBC is 100% committed to implementing it. In the IDP section 3.178 it is stated that "Borough -wide new developments will require new gas supply". This is in direct conflict with the stated aim that the entire Borough will be carbon neutral by 2030.

-
-

STR8: Conserving and Enhancing the Natural, Built and Historic Environment

Residents' contributions to the Parish Plan Survey and the Neighbourhood Development Plan have shown the great importance they attach to conserving and enhancing these assets.

STR10: Neighbourhood Plans

The Parish Council is currently conducting its Regulation 14 consultation on a Neighbourhood Plan for the parish and trusts that TWBC will make every effort to avoid any delay in the later stages for which TWBC will be responsible. It is hoped that the Neighbourhood Plan will have been made (adopted) before this new Local Plan reaches adoption

PSTR/BM1: The Strategy of Brenchley and Matfield

Changes and improvements are noted from the DLP Reg 18 especially in the number of residential dwellings reducing to 56-60. The changed LBD's are noted, and it is recognised that there will be a number of windfall applications in the parish. It should be considered these applications will not result in harm to the parish's character and setting. There have already been a number of windfall TWBC granted applications in the parish. Naturally with all these sites having 8/9 dwellings there are no affordable houses included: Tibbs Court Farm, Brenchley Garage and The Old Piggeries in Chantlers Hill.

Questions are raised about the reinstatement of the Hop Pickers Line for recreation, cycling and walking as it is understood parts of the line are covered by new development and numerous different landowners are involved. The PC questions how this route will be viable. Less than 5% of the route lies in Brenchley and Matfield Parish.

Recreation/sport provision in Paddock Wood as referred to in Policy STR/SS 1 is vital and an indoor swimming pool is required. Robust language is required from TWBC in confirming these decisions and not the use of language as "potentially or possibly".

AL/BM1: Land between Brenchley Road, Coppers Lane and Maidstone Road has been approved with 45 dwellings. In view of the new total required number, it would have been favourable to reduce number of houses on this site and have an increased green open space and buffer around the perimeter. At present it will be impossible for any schoolchildren to walk or cycle safely to primary/secondary schools and residents will be predominantly relying on private car transport for day-to-day living.

Some of the planning conditions yet to be implemented lack sufficient detail. The relocation of the 30 mph speed limit northwards on Maidstone Road is a priority and its new location should coincide the new LBD designated in the PCLP. The speed sign referred to in AL/BM1 should be a speed indicator

sign, preferably with number recognition. The policy seeks an improvement in pedestrian permeability through the site to link with the surrounding footway network. This could be achieved by a pedestrian link onto Coppers Line, by retaining the gap in the hedge that will be created during the installation of utilities to the site.

AI/BM2: Land at Maidstone Road. 11-15 dwellings allocated for this site with community use around Matfield Village Hall together with a buffer zone. There are many trees on this site and as many as possible must be retained.

The PSLP has suggested that a children's play space be delivered within the green area on the site map in the PSLP. The view of the Parish Council and the Trustees of Matfield Village Hall Charity is that a large fully equipped children's play area should be sited in the purple area marked for community use in the PSLP. MVH Trustees have agreed that an open green area to the rear of the hall and a playground would be a more effective use of this community area than additional car park spaces.

With speeding and increasing traffic being serious problems along Maidstone Road, the community also seeks a speed indicator sign to the south of the proposed site, to replace the sign previously situated outside MVH.

EN1: Sustainable Design

Highway safety and access: "Traffic from new developments should not result in severe residual cumulative impacts on the road network". Traffic queueing at the Hawkurst junction of the A21 with the A268 will impact on Matfield and Brenchley parish and the draft Local Plan states that the increased amount of traffic will hopefully "establish an acceptable impact". The impact is already unacceptable and this language is not sufficiently robust.

As soon as there are traffic hold-ups on the A21, the parish of Brenchley and Matfield is used as a cut through/rat run. It is agreed that the parish is mainly served by minor rural roads, many of which are designated as Rural Lanes, as referred in the Rural Lane Supplementary Planning Guidance. It is noted that this document is dated 1998 but is viewed as a relevant paper. The lanes are narrow with blind bends, often with insufficient space for vehicles to pass each other. Natural verges are an important feature of the rural lane and these get eroded away to deep mud.

The PC urges TWBC to quantify the cumulative impact of traffic in the parish from the proposed developments in Paddock Wood, (especially to the east), Horsmonden, Capel and Pembury. The number of proposed new homes is noted in Horsmonden and some 300 new households will mostly need to go through Brenchley and Matfield parish to go anywhere to the north or west.

Details of the A228 Colts Hill Bypass are vague and disappointing with wording such as "potentially" and "mitigate the impact of strategic growth" when it is obvious how much this infrastructure is required. The same situation is said for the dualling of the A21 Kippings Cross to Lamberhurst with no immediate plans for improvement.

The PC points out the significant weaknesses within this policy, and requests confirmed information on funding and timing for the planned infrastructure.

EN19: The High Weald Area of Outstanding Natural Beauty

Open land below Brenchley Memorial playing fields was designated EN23 in 2006, an important Landscape Approach which was taken out of the DLP in 2016. The land is currently designated EN19 Area of Outstanding Natural Beauty. The High Weald AONB must be at the forefront of all planning decisions and TWBC should resist the temptation to encroach upon the protections provided by the NPPF.

E19 must be rewritten. The importance of AONB is covered in point 6.234 but it is not mentioned again in Policy EN19. The PC would have expected the wording of (para 172) NPPF 2019 to be highlighted and it was mentioned in the final paragraph of Policy EN 21 of DLP Reg 18 2019. The PC would like to see this reinstated in EN19. TWBC has a statutory duty to conserve and enhance the AONB, but this is constantly undermined by TWBC's unproven justification for major development of meeting housing needs and targets. The loophole of "exceptional circumstances" will without doubt be interpreted by developers as "may be possible".

To have the designation of HWAONB should give the highest status of protection in relation to the landscape and scenic beauty but to be given the designation of EN19 from TWBC certainly appears to dilute the protection and is a far cry from the "highest planning protection" that AONB's are meant

to enjoy. The actual policy requires robust language giving this highest planning protection rather than the wording in EN19 majoring on development details.

OSSR1

On Inset Map 20 (Brenchley) two areas are still designated as OSSR1, even though these areas have been in private ownership for many years.

- 1 A large area north of the parish, formerly occupied by Moatlands Golf Club, which was sold in 2008 and is now owned by several private landowners.
- 2 The former allotments on Tibbs Court Lane, north west of Southfield Cottages.

OSSR2

The proposed provision of publicly accessible open space and recreation on new housing or mixed use development sites falls below the standard recommended by Fields in Trust in its 'Guidance for Outdoor Sport and Play', which is adopted by many local authorities. The thresholds for facilities required in new developments in the PSLP are relatively high. OSSR2 Table 16 indicates that sites with less than 20 homes are not required to provide any facilities, with sites between 20 and 49 dwellings only required to provide an amenity or natural green space.

For parishes that lie within the HWAONB, developments tend to be smaller. The consequence in protected rural areas, which generally have limited facilities, is that developers will have no obligation to provide much needed sports or recreation facilities under the PCLP. Windfalls sites of nine homes or less, which have formed a significant proportion of new housing in Brenchley & Matfield Parish, also have no obligation to provide OSSR facilities.

Developers should have an obligation to either provide OSSR facilities or a contribution towards them, regardless of the size of a development. Perhaps there should be a standard levy based on the number of dwellings?

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Parish Council supports the overall negative scores of the sites in Brenchley and Matfield that were put forward in the Call for Sites. There are very few positive scores for any of the sites and a significant number of high negative scores. Many of the sites involve the loss of high-grade agricultural land and would have a negative impact on biodiversity, landscape and heritage. Sustainability is also a factor for many of the sites, which lack a proximity to facilities and public transport.

The villages of Brenchley and Matfield have limited sustainability, with poor facilities in Matfield but a reasonable bus service to Paddock Wood and Tunbridge Wells. Brenchley has more facilities but three bus services to Paddock Wood on only two days during the week. There are no bus services in the evenings that would allow commuters to use public transport.

If you would like to attach a file in support of your comments, please upload it here. [B&M comments Local Plan.docx](#)

Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP_2003), Vision and Objectives (PSLP_2005), Policies STR1 (PSLP_2006), STR4 (PSLP_2008), STR9 (PSLP_2015) and Section 6 Development Management Policies (PSLP_2016)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this this land to be suitable for development.

1.2 The site

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.5.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.5.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.5.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.5.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.5.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: PSLP Figure 5 Key Diagram see full representation attached]

1.5.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 wording has been duplicated here - see full representation attached]

1.5.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.5.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.5.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.5.21 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached]

1.5.22 It should be noted that TWBC has recently refused planning permission for a 71-unit development on PSLP allocation site AL/HA4 at Highgate Hill/Copthall Avenue, which is proposed for the allocation of 71-79 dwellings. The application was refused on points of principle relating to the impact on Highgate Crossroads and the AONB. Whilst the allocation remains in the draft Local Plan, since the Council appears to be opposed to the scheme in principle, it does call into question whether the site has sufficient political support to be retained in the plan.

Response

1.5.23 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.5.24 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.5.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.5.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.5.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.5.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.5.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.5.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.5.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend well beyond 2038.

1.5.32 We also have concerns about the sustainability of Tudeley Garden Village, given that it appears it will not be served by a railway station, and is in an area at risk of flooding – an issue which has raised concerns from Greg Clark MP.

1.5.33 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means their area, and be sufficiently flexible to adapt to rapid change.

1.5.34 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with NPPF paragraph 11 and lacks sufficient strategic flexibility.

1.5.35 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley, such as expanded development at Caenwood Farm which, according to the Council's own analysis, would result in significantly less harm to the Green Belt.

1.5.36 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements.

Green Belt vs AONB Release

1.5.39 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.5.40 We support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.5.41 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.5.42 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.5.43 *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.5.44 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However,

it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is possible to channel much of the development beyond this designated area.

1.5.45 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.5.46 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

Housing Delivery

1.5.47 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.5.48 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.5.49 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.5.50 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached]

1.5.51 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.5.52 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]

1.5.53 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.5.54 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

1.5.55 No major national housebuilder has an option on the site and therefore the site is not "land banked".

Maintaining a Five Year Housing Land Supply

1.5.56 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.5.57 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.5.58 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.5.59 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached]

1.5.60 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.5.61 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.5.62 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.5.63 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual shortfall of 443 affordable dwellings across the Borough.

1.5.64 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.5.65 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.5.66 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.5.67 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy as a start.

The case for further development in Royal Tunbridge Wells

1.5.68 We have set out above why we feel that further development allocations are necessary. There is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

1.5.69 PSLP paragraph 4.45 recognises that the Main Urban Area of Royal Tunbridge Wells and Southborough is a “prime candidate” for meeting housing needs. As with much of the borough, the urban areas are surrounded by land which is in the Green Belt and/or in the High Weald AONB, though land to the west and north in particular (including the wider Caenwood Farm site) falls outside the AONB. With opportunities for development in Tunbridge Wells constrained, the Council needs to make the best use of the least constrained, most sustainable options such as the wider Caenwood Farm site.

1.5.70 PSLP Table 4 shows that only around 15-16% of the proposed housing allocations are in Royal Tunbridge Wells, a very small proportion given the town’s position in the settlement hierarchy. There is clearly scope for this to be increased.

1.5.71 The same paragraph notes that Tunbridge Wells is also constrained by the A26 and A264 corridors, although evidence submitted previously by Caenwood Estates demonstrated that a wider development at Caenwood Farm could be achieved without causing a **severe** impact to the A26.

1.5.72 Caenwood Estates recognise that there is a perception of highway capacity issues locally and have undertaken surveys to provide evidence that the development can be accommodated. It is noted in this respect that Automatic Number Plate Recognition (ANPR) surveys carried out for Kent County Council (KCC) suggest that the majority of traffic travelling on the A26 at peak times is destined for, or originates from within, the Tunbridge Wells urban area.

1.5.73 The potential transport impacts of an expanded development at Caenwood Farm have been assessed in a Transport Technical Note which has been previously submitted, and is attached as Appendix 1. That assessment shows that the A26 London Road/Yew Tree Road/Speldhurst Road junction would continue to operate within its design capacity during both peak hours with the development in place, both at present and by the end of the emerging local plan period. Indeed, the assessment is extremely robust in that it has assumed a higher level of development than the expanded 280-unit scheme being proposed by Caenwood Estates.

1.5.74 The Caenwood site is adjacent to the town’s best served public transport corridor linking Southborough with Tunbridge Wells and Tonbridge, with the nearest bus stop only 130 metres away. High Brooms railway station is only a short walk to the east and offers frequent services to London, Tonbridge, Tunbridge Wells and Hastings. School transport services are also already focused on this area.

1.5.75 The area has already benefited from highways improvements funded by the Local Growth Fund, the aim of which is to finance infrastructure works that would lead to further growth. The nearby A26 junction with Speldhurst Road and Yew Tree Road has recently been upgraded by KCC to cater for growth arising from the new Tunbridge Wells Local Plan. In order to get best value from these works, the Council should be investigating every opportunity for growth in this area.

1.5.76 Furthermore, the recent dualling of the A21 between Tonbridge and Tunbridge Wells has reduced the pressure on the A26 London Road. The South East Local Enterprise Partnership has also contributed £1.039m to the recently-completed A26 Cycle Route Phase 1 scheme between Tunbridge Wells and Southborough, which has further enhanced sustainable transport options on this corridor. More recently, Reynolds Lane, which is adjacent to the site, has been turned into a walking and cycling route.

1.5.77 As a result, the Council can have confidence that both the RTW/AL5 allocation and indeed any expanded allocation to 280 units would not have a significant adverse impact on the local road network. Indeed it would represent a suitable and sustainable location for development in highways and transportation terms.

1.5.78 It is important that housing and employment allocations are sustainably located to assist the Council's ambitions for carbon neutrality by 2030. An expanded housing allocation at Caenwood Farm would be easily accessible from the existing and proposed expanded business parks at North Farm.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Castle Hill Developments Ltd) control the land at Castle Hill that lies to the north of Tunbridge Wells. This site has been promoted through earlier stages in the Local Plan as an alternative location for strategic growth in the Borough, taking account of its significant credentials as a sustainable location for growth adjoining the extensive existing and committed facilities within Royal Tunbridge Wells town. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 An indicative masterplan for the development of Castle Hill is shown below. This relates to the land which has been promoted for residential development through the SHLAA (DPC7).

[TWBC: see full representation attached for Figure 1 – Indicative masterplan for delivery of around 900 homes and associated facilities at Castle Hill, Royal Tunbridge Wells]

1.3 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing or committed infrastructure and services such as those at Castle Hill which adjoins the edge of the town of Royal Tunbridge Wells, the administrative and commercial heart of the borough and surrounding area with its extensive range of services and facilities including health, education, culture, leisure and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.4 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with its replacement with an allocation at Castle Hill. For the reasons detailed in this submission, growth at Castle Hill due to its relationship with existing and committed development and facilities would result in achievement of sustainable development. Furthermore, the proximity of Castle Hill to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This contrasts with that at Tudeley Village which due to the limitations in that local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once / if they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

1.7 In addition, as outlined in our representations to policy STR1, we have significant concerns that the authority has failed in its obligation to discharge the Duty to Co-operate under the Planning &

Compulsory Purchase Act 2004 (as amended), especially with respect of its engagement with other local authorities, especially Sevenoaks District and Tonbridge & Malling Borough.

1.8 As recognised by Inspector's examining other Local Plans (See paragraph 9 of the Inspector's Report into Examination of the Sevenoaks Local Plan (appendix 3) and paragraph 22 of the Letter from the Inspector's regarding the St Albans City & District Local Plan (appendix 13)), the failure to discharge the Duty to Co-operate cannot be rectified once the Plan has been submitted for examination and therefore it must be withdrawn. This is consequently our preferred solution to the Draft Plan as currently prepared.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Castle Hill Development Ltd to the Council's Call for Sites in November 2019 (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Committee Report on planning application 19/02267/OUT – land east of Kingstanding Way, Tunbridge Wells (appendix 11)
- Decision Notice on application 19/02267/OUT (appendix 12)
- Examiners Report into the City & District of St Albans Local Plan (14th April 2020) (appendix 13)
- Report to Tonbridge & Malling Borough Council's Planning & Transportation Advisory Board of 17th May 2021 (including annexes and minutes) (appendix 14)
- Sevenoaks District Council's press release of 12th April 2021 regarding Local Plan (appendix 15)
- Inspector's Report into Examination of the West Dorset, Weymouth & Portland Local Plan (August 2015) (appendix 16)
- Advearse v Dorset Council [2020] EWHC 807 (Admin) (appendix 17)
- Castle Hill Masterplan (appendix 18)
- Overview Transport Strategy for Castle Hill, addressing transport principles and connectivity. Prepared by i Transport (appendix 19)
- Land at Castle Hill, Tunbridge Wells A21 Impact Appraisal. Prepared by i Transport (appendix 20)
- Land at Tudeley Village Sustainability Technical Note. Prepared by i Transport (appendix 21)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy STR/RTW1: The Strategy for Royal Tunbridge Wells

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Castle Hill, Tunbridge Wells (DPC7) – failure to include as an allocation in policy STR/RTW1

Objection

The proposed change that is sought by the objector are:

1. The plan be withdrawn owing to the failure on Duty to Co-operate.

2. Changes sought to the Local Plan with respect of policy STR1.

A) Ensure that the plan period is 2020 to 2039.

B) That the housing requirement is increased to 14,364 dwellings;

C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; and

D) That reference to a new garden settlement at Tudeley Village is removed from the plan.

E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

3. Changes sought to the Local Plan with respect of policy STR8.

The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified with respect of the inconsistency in consideration of landscape impacts between housing and employment sites in the AONB. The Plan includes major employment development in the AONB notwithstanding the clear availability of alternatives such as at Paddock Wood. The authority has not applied the same approach to housing; and b) It is also inconsistent with national policy in the approach to major development in paragraph 172 of the NPPF. This is clear, as indicated in the representation to policy STR1 that there is a clear need for additional housing in the Borough which consequently provides the justification for major development in the AONB, such as that proposed on our client's land at Castle Hill.

4. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are:

That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

5. Changes sought to the Local Plan with respect of the policy STR/RTW1

The Plan therefore as currently prepared in not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities,

b) Is not justified as the evidence does not support the exclusion of the Castle Hill site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

To address these matters of soundness, several amendments are proposed. The proposed changes are. That policy STR/RTW1 is amended to ensure that it acknowledges the allocation of Castle Hill as a development site with consequential amendments made to the document reflecting its identification.

6. Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e., the policies map to ensure that the Tudeley site is retained in the Green Belt.

7. Castle Hill Omission Site: Change sought to the Local Plan.

To ensure that the local plan is sound, land at Castle Hill should be included as a residential allocation with consequential amendments to the settlement boundaries on the northern edge of Royal Tunbridge Wells.

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes similar to the Castle Hill proposal at Royal Tunbridge Wells through the development plan system having appeared at EIPs constantly over the last 30 years. These appearances have included representations on plan policy and the promotion of urban extensions in Surrey, Essex, Kent, Berkshire, West Sussex, East Sussex, Essex, Hertfordshire, Buckinghamshire, Devon, County Durham, Cambridgeshire, Hampshire and Oxfordshire. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan.

3.5 However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should be made, then the Borough's housing requirement should be increased from 678dpa to 756dpa. This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells. A March 2039 plan end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

3.6 To address this requirement for additional homes, we contend that land north of Tunbridge Wells, at Castle Hill should be allocated for residential development (SHLAA ref DPC7). Following site analysis reflected in the submitted master plan, the Castle Hill site can accommodate 900 dwellings. As indicated in these representations and the supporting documents this would be a sustainable addition to the town.

3.7 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Castle Hill can also supply homes to resolve this issue. As detailed in the representations, the Castle Hill site would be a logical addition to the existing and committed development at north Royal Tunbridge Wells (Including the development approached east of Kingstanding Way (appendices 11 and 12)) and should consequently be included in the defined extent of the town, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding to the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Royal Tunbridge Wells alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Castle Hill in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e., Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Castle Hill, to the north of Royal Tunbridge Wells (DPC7) should be included as an additional allocation within draft policy STR/RTW1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area’s minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an areas housing need. It confirms that the area’s housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area now, especially as the Housing

Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London and the wider South East. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy. The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority is currently committed to delivery within policy STR1.

5.3 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However, on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG ID ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.4 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3 x 1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. Had the authority (as we contend) relied upon the uncapped requirement to set their target in the draft submission Local Plan, it would negate the need for an early review to address this need as obligated in the NPPF and PPG (ID ref 2a-007-20190220).

5.5 Achieving delivery of the uncapped housing need of 765dpa would ensure that the authority is actively seeking to address the very significant affordability issues within the Borough (as a result of the high median workplace based ratio) together with demonstrating that it is seeking to contribute towards addressing the very significant unmet housing needs of other authorities, especially Sevenoaks District as detailed below.

5.6 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the clear obligation in the NPPF to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing needs of other authorities

5.7 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.8 In addition, paragraph 60 is clear that in determining an areas' housing needs, account should also be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's current Duty to Co-operate (DtC) Statement accompanying the Draft Submission document summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate.

5.9 The current DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks District, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa, the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.10 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivering growth consistent with the uncapped housing needs is therefore a reasonable and justified approach. For the reasons detailed in the representations, had the draft Submission Local Plan included the Castle Hill site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.11 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.12 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that Tunbridge Wells Borough on 11th April 2019 received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request from Sevenoaks DC are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells' analysis. This is a clear illustration that the authority has not provided the full evidence of engagement with other authorities and our view outlined earlier that the Council has failed in its obligation.

5.13 The Sevenoaks Local Plan Inspector was clear that the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore, that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.14 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.15 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of the whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take. The Sevenoaks judgement (appendix 4) was issued before Tunbridge Wells agreed the draft Submission Local Plan and therefore it was clear that there would be unmet need arising from Sevenoaks District (as acknowledged in paragraph 6 of the letter of the Inspector's examining the Tonbridge & Malling Local Plan (appendix 2).

5.16 Furthermore, the latest position of Sevenoaks District (appendix 15) confirms that the authority is still unable to address its housing needs and consequently is reliant upon neighbouring authorities like Tunbridge Wells Borough to contribute towards the solution.

5.17 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (TMBC) (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.18 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. The Inspectors report states:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Maling would be 'no' due to 'constraints'¹. We consider Tonbridge

and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.19 The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in its obligation within statute with respect of the Duty to Co-operate.

5.20 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared. The TMBC Inspector also emphasised that it had been a long standing issue that Sevenoaks District was unable to address its housing needs and therefore was reliant upon its neighbours to help resolve. Tunbridge Wells cannot therefore absolve itself from contributing towards its resolution given this long standing position.

5.21 Therefore, having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough, as indicated in their DtC Statement (page 18), it is not considered reasonable that it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) would have been a means of addressing unresolved housing needs of others, whilst also making a contribution towards significantly boosting the supply of housing.

5.22 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.23 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore, the Plan should be found not to be legally compliant and should not be examined further.

5.24 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

5.25 Additionally, whilst the current DtC Statement for the Draft Plan indicates that the authority has effectively engaged with TMBC, as confirmed in the report to that authority's Planning & Transportation Advisory Board on 17th May 2021 (appendix 14), this has yet to be confirmed. As indicated in the minutes of the meeting, TMBC was of the view that:

Members expressed concerns on a number of matters including the significant impacts related to increased volumes of traffic; lack of infrastructure to support health care and education; insufficient assessment of visual, ecological and biodiversity impacts; and an increased risk of flooding and did

not feel that the mitigation measures proposed by Tunbridge Wells Borough Council adequately offset the scale of development in this location.

5.26 Furthermore, as indicated in the TMBC Report (appendix 14), they have concerns with respect of the infrastructure impacts of Tudeley village on them, especially as it lies close to the borough boundary and the town of Tonbridge would be attractive to any residents as a result of its proximity and extensive range of services. There concerns indicates that this is a further failure of the currently drafted Local Plan with respect of the Duty to Co-operate and the significant cross-boundary impacts that arise from Tudeley.

5.27 Consequently, alongside the obligation with respect of unmet housing need from Sevenoaks District, there are clearly other strategic concerns with respect of the approach envisaged by Tunbridge Wells Borough and its impacts upon Tonbridge & Malling Borough. These also have yet to be resolved.

Robustness of Plan period

5.28 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.29 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).5.30 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.31 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.32 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.33 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.34 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if, contrary to our evidence on the Duty to Cooperate obligation, the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, a contribution towards unmet housing needs in adjoining authorities should still be made. The Borough's housing requirement should be increased from 678dpa to 756dpa.

5.35 This uplift together with an extended plan period, which reflects a robust period for examination of the draft Submission Local Plan, indicates that rather than requiring 12,204 dwellings from 2020 to 2038, this should be increased instead to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. On either basis, a proportion of these much needed additional homes could be delivered through the allocation of the land at Castle Hill, to the north of Royal Tunbridge Wells.

5.36 A March 2039 plan end date would therefore provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of housing land supply

5.37 Irrespective of the need for the plan to identify between 678 and 2,162 additional dwellings, the Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670

dwelling) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.38 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.39 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for between 8,399 and 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Castle Hill. The suitability of this site is detailed in the section with respect of the omission site.

Employment land need

5.40 Policy STR1 indicates that the authority needs to identify at least 14ha of employment land. The Employment Development Topic Paper indicates that this quantum of employment land is derived from extrapolation of the need as evaluated in the Economic Needs Study with an adjustment to ensure that the timeframe is consistent with the draft Submission Plan. Whilst we have no comments on the overall quantum of employment land required, we note that the justification within the Economic Needs Study is clear (Table 10.1) that the 14ha of employment floorspace required is derived from the combination of growth in both offices (around 6ha) alongside industrial/warehousing premises (around 8ha).

5.41 Whilst we have no comments on the derivation of the requirement for employment floorspace through the Economic Needs Study, having regard to the clear advice in the NPPF that offices are a main town centre use, the Council's strategy for delivering employment floorspace must recognise this distinction, especially with respect of the assessment of sites to address the identified need.

5.42 With regard to the identification of sites, the plan allocates land at Paddock Wood (policy STR/SS1) together with north of Longfield Road, Tunbridge Wells (policy AL/RTW17). These were the areas promoted for employment uses as indicated in the SHLAA. As these locations are not in town centres, the authority would need to demonstrate why the office element could not be accommodated in the relevant areas where the NPPF is clear with respect of the suitability of land for main town centre uses.

5.43 The extent of these areas significantly exceeds the 8ha of land necessary to address the Council's identified need for industrial/ warehousing. The Economic Needs Study is clear (Paragraph 5.6) that both Paddock Wood alongside Longfield Road, Tunbridge Wells are both existing significant employment locations and are therefore suitable for further growth reflecting market demand (NPPF chapter 6).

5.44 Whilst we do not comment on the Council's approach to allocating significant areas of employment land at both Tunbridge Wells and at Paddock Wood, it is noted that the site north of Longfield Road is located within both the Green Belt and AONB. The Draft Submission Local Plan (paragraph 5.109) indicates that the Council has resolved to grant permission for the erection of up to 74,000m² of office/ warehousing development (Class E) on this site, notwithstanding that it is located within these designations. This permission has subsequently been issued by the authority (appendix 12) following the Council's consideration of the application (appendix 11).

5.45 The Council's approval of significant employment development north of Longfield Road, Tunbridge Wells was due to the limited opportunities for such floorspace in the Borough. However as indicated in the SHLAA, significant areas were and have been promoted for employment development at Paddock Wood which is also attractive for operators and occupiers. These areas could have come forward instead of the Council's acceptance of major development in both the AONB and Green Belt. Nevertheless, as indicated by the draft allocation in the Plan together with the Council's resolution to approve (Appendix 11) (now granted (Appendix 12)), the authority has concluded that sites within these constraints can be developed notwithstanding the availability of alternatives in other locations.

5.46 As indicated in these submissions, the Council's approach with respect of housing is inconsistent with that applied for employment in that it has arbitrarily rejected locations in the AONB for major development, like Castle Hill whereas due to its inherent sustainability from proximity to Royal Tunbridge Wells it should have been selected. In contrast, the authority has selected less sustainable housing locations like Tudeley village due to the availability of options outside of the AONB. As indicated, this is inconsistent with the Council's approach to employment whereas notwithstanding opportunities which could address employment needs outside of both the Green Belt and AONB at Paddock Wood, it has nevertheless selected a location within it – land north of Longfield Way (policy AL/RTW17).

Conclusions

5.47 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing. This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.48 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.49 Irrespective of the failure to comply with the Duty to Co-operate, the policy is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later);e) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; andf) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.50 To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

5.51. Those consequential amendments are made to the document to reflect these revisions.

11. OVERALL CONCLUSIONS

11.1 The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2 As indicated in the representations, the Plan as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District, is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient in respect of their legal obligations. The plan also fails under Duty to Co-operate given the significant cross-boundary impacts that arise from Tudeley on neighbouring Tonbridge & Malling. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the Duty to Co-operate obligation including how best to address housing need in the wider area.

11.3 The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

11.4 Irrespective of the failure to comply with the Duty to Co-operate, the plan is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It fails to allocate land at Castle Hill that has been demonstrated to be a suitable, available and deliverable site that can contribute in a sustainable way to meeting the Council's and wider area's housing needs;c) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;d) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;e) It is not justified with respect of the inclusion of land at Tudeley Village to which we object;f) Is not justified in detailing the split in employment needs between offices and industrial/warehousing space; and
g) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

11.5. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

11.5 To address these matters of soundness, several amendments are proposed. The proposed changes are.

That policy STR1 is amended to:

A) Ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings;C) That the 14ha of employment floorspace is clarified to reflect the assessed need for around 6ha of offices and 8ha of industrial/ warehousing space; andD) That reference to a new garden settlement at Tudeley Village is removed from the plan.E) Reference is made to an urban extension allocation at Castle Hill, North Tunbridge Wells.

12. FINAL REMARKS

12.1 We trust the above comments are of assistance in preparing the next iteration of the Local Plan and await confirmation of receipt of our representations in due course.

12.2 We welcome the opportunity to open up dialogue with the Council in order to further proposals which would result in the changes advocated, including the allocation of our clients' land.

12.3 Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Secretary of State, the publication of the Inspector's Report into the Examination of the Plan together with the adoption of the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the Inspector and examination on Duty to Cooperate and issues of soundness that require verbal submissions in response to Matters and Issues to be identified by the Inspector.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Section 3: Vision and Objectives

[TWBC: the full representation attached has been divided into the following - Policy AL/RTW5 (PSLP_2003), Vision and Objectives (PSLP_2005), Policies STR1 (PSLP_2006), STR4 (PSLP_2008), STR9 (PSLP_2015) and Section 6 Development Management Policies (PSLP_2016)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Caenwood Estates Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Tunbridge Wells, which Caenwood Estates is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 The site

1.2.1 Caenwood Estates are promoting land at Caenwood Farm and Whitegates Farm on the western edge of Royal Tunbridge Wells, close to Southborough town centre, for a comprehensive, residential-led mix of uses. The site was promoted via the original call for sites process in 2016 (site reference 30) and in the 2017 Regulation 18 consultation.

Natural extension to the urban area

1.2.2 The wider 60.7ha (150-acre) Caenwood Farm site (shown in Figure 1 overleaf) has been promoted as a natural extension of Tunbridge Wells for almost two decades. The 2009 SHLAA recognised that a substantial part of the site was suitable for development, with the remainder being excluded from further consideration only by virtue of the criteria applied at that time.

1.2.3 Unlike much other land locally the site is not in the Area of Outstanding Natural Beauty (AONB). Parts of the site are contiguous with the established settlement boundary of Tunbridge Wells and it is within easy walking distance of a wide range of services and amenities including places of work, shops, recreational facilities, High Brooms station, the existing and proposed expanded employment facilities at North Farm and an extensive range of community and education facilities including the main concentration of secondary school provision in the town, where St Gregory's, Tunbridge Wells Boys' and Girls' Grammars, Skinners' and Bennett Memorial secondary schools are all located nearby. The site currently comprises low quality (Grade 3 and 4) agricultural land, but also includes some existing residential and agricultural buildings and structures.

[TWBC: for Figure 1: Site location see full representation attached].

Proposals by Caenwood Estates

1.2.4 The whole of the above site was originally put forward for development in the Call for Sites, but it is understood that the Council has concerns about its development in its entirety, especially in the western part of the site.

1.2.5 As an alternative, Caenwood Estates has previously put forward proposals which go further than those currently envisaged in the draft Local Plan and could deliver around 280 units in total. The layout for that scheme would retain various areas of woodland within the site, some of which are protected as ancient woodland, with a minimum 20m buffer provided.

1.2.6 As well as providing a greater number of units than currently proposed in the Local Plan, a 21.4 ha public park was proposed as part of this expanded scheme, which would cover an area of land running through the centre of the Caenwood Farm site. This would provide a significant amenity for existing as well as new residents, as well as those working at Salomons. The park would provide a buffer both to the adjacent AONB and also to the heritage assets on the Salomons Estate, as well as providing further leisure and play facilities for existing and new residents.

1.2.7 The site is in a highly sustainable location, adjacent to the existing built up area, and with good access both to Tunbridge Wells and Southborough town centres, and the existing and proposed expanded industrial area at North Farm. There could also be potential to provide new allotments to replace those lost nearby at Speldhurst Road.

1.2.8 We will set out below our concerns on the timing and delivery of certain aspects of the current Local Plan proposals, and why we believe Royal Tunbridge Wells should take a greater share of development. An expanded Caenwood Farm development along the lines described above could form an important part of a greater level of development in Tunbridge Wells.

1.2.9 However, it should be noted that Caenwood Estates fully supports the current proposed allocation RTW/AL5 and confirms that it would be deliverable within a short timescale.

1.3 Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comment on the plan having regard to these tests of soundness.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.5.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.5.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision has been duplicated here - see full representation attached]

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives have been duplicated here - see full representation attached]

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing and in a manner that best compliments the distinctive qualities of the Borough'

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Caenwood Estates in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.6.3 We fully support the proposed allocation of land at Caenwood Farm for residential development. However, in light of the above, there is a strong case for Royal Tunbridge Wells in general taking a

greater share of development, with some of the wider landholdings at Caenwood Farm being particularly suitable.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.7 Response

1.5.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.5.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read:

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.5.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing and supporting infrastructure to meet the full needs of our population, with particular emphasis on affordable housing and in a manner that best compliments the distinctive qualities of the Borough

1.5.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Re: TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN: REGULATION 19 CONSULTATION

I write in response to your publication of the Tunbridge Wells Borough Council Pre-Submission Local Plan ("**Local Plan**"). Charterhouse Strategic Land ("**Charterhouse**") welcomes the opportunity to review and comment on the new Local Plan and trust that the important matters set herein will be given detailed consideration.

Context

Charterhouse has an interest in the Land lying to the west of Nursery Road, Paddock Wood. The site is situated to the north west of Paddock Wood Train Station and the west of Maidstone Road.

Representations

This representation responds to the policies within the Local Plan published for consultation Friday 26th March to Friday 4th June 2021. We wish to make some preliminary observations on the policies in regards to their compliance with the relevant legal requirements as set out in the Planning and Compulsory Purchase Act 2004 as amended, and the tests of soundness as per Paragraph 35 of the National Planning Policy Framework ("**NPPF**").

"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:

- a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework"*

Charterhouse comments on specific Pre-submission Local Plan Policies

Draft Policy STR 1 – The Development Strategy

Charterhouse supports STR 1 and in specifically section 3;

“3. Provides for the growth of settlements, having regard to their role and function, constraints, and opportunities, together with the development of two strategic sites, namely: a. major, transformational expansion of Paddock Wood (including land at east Capel), following garden settlement principles and providing flood risk solutions; and b. the creation of a new garden settlement: Tudeley Village between Paddock Wood and Tonbridge;”

It is good planning practice to proactively address the housing needs of the borough through the allocation and expansion of Paddock Wood. The head on approach Tunbridge Wells Borough Council (**“the council”**) is taking to ensure it delivers the necessary housing is commendable, and we fully support the number of homes to be delivered at Paddock Wood. However the plan only provides a 10% buffer to the housing numbers, as set out in **4.53** with a provision of 13,059-13,444 dwellings to a target of 12,204 net additional dwellings. Charterhouse raise concern whether a 10% margin of over performance being put in place will allow the council enough flexibility on housing numbers. Between the strategic urban extension to Paddock Wood and Tudeley Village this equates to nearly half (46%) of the overall housing target and 10% flexibility being tied up in these two allocations.

Given the long term delivery prospects of settlement expansions and garden villages, Charterhouse do not consider that the 10% is adequate. It is our opinion that with such projects and such a considerable percentage of the plans housing targets being tied up within the two allocations, any slippage or delays impacting either site could have a damaging effect on the councils housing delivery. We believe that for these reasons it would be advisable for the council to increase their overprovision through smaller allocations within alternative settlements.

We thank the council for the opportunity to comment and would be grateful if you will confirm safe receipt of this representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Respondent's Name and/or Organisation	Graham Clark
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1: The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The development strategy as set out in the Policy STR1 and the Key Diagram is flawed.

The National Planning Policy Framework (NPPF) makes it clear that the primary purpose of the planning system is to achieve a future development pattern that is sustainable.

The Plan acknowledges that Tunbridge Wells and Southborough is by far the largest urban area in the Borough with the widest range and concentration of services and facilities. The town is a sub-regional shopping centre with a wide range of shops, pubs, restaurants and places of entertainment. There are numerous primary and secondary schools and excellent medical facilities. It is located on the Hastings to London railway line, with two well connected railway stations.

Whilst Tunbridge Wells and Southborough is the largest urban area in the Borough, it is not without significant challenges:

1. Since 2011 the birth rate in the town has collapsed. This has led to a number of primary schools threatened with closure. At least one primary school in the town has already had to reduce its intake and this position will invariably worsen as the population ages.
2. The town centre has been suffering with multiple store closures and appears to be in decline. This was happening well before the Covid-19 pandemic. The housing allocations in Paddock Wood, Capel and the other settlements will do little to alleviate this issue. Many of these new residents will invariably look to other towns for entertainment/ shopping, such as Maidstone, Ashford and Tonbridge.
3. The town suffers from heavy traffic congestion. This is partly a result of through traffic from the A21 travelling to places such as Crowborough, Gatwick and Newhaven having to pass through the town centre.
4. As the Local Plan acknowledges, affordability is a major issue in the Borough. By allocating the bulk of the housing outside of Tunbridge Wells and Southborough this will do little to resolve this problem of affordability in the main urban area. In addition, a lot of the people occupying the affordable housing stock will be looking for employment in the larger urban areas of Tunbridge Wells, Maidstone and Tonbridge. Invariably, most people will drive which will add to the traffic congestion that all of these town suffer from.

At paragraph 5.14 the Plan states '*The scale and nature of proposed development at Royal Tunbridge Wells reflects its existing position as the largest settlement within the borough*'. This is clearly not true!!

Roughly 60% the population of the Borough resides in the urban area comprising Tunbridge Wells and Southborough. The Plan however, only proposes that some 12% of the new dwellings should be located in the town itself. This 12% relies on a significant number of brownfield sites, which are 'old chestnuts'. They have been identified in earlier plans and still remain undeveloped. It is probable that many of these sites will remain undeveloped at the end of this Plan.

Given the problems highlighted above, the strategy (Policy STR1) should be to focus more of the housing development in Tunbridge Wells and Southborough and significantly less in Paddock Wood.

I have highlighted some of the challenges facing the town. The Council should be seeing this as an opportunity to plan for the future and to improve the environment and economy of the town by linking new housing development to major and transformative infrastructure improvements.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Plan should be modified such that there should be a higher concentration of new housing at Tunbridge Wells and Southborough and significantly less at Paddock Wood.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Plan fails to explain why TWBC not only accepts the unrealistic housing allocation figure set for the borough by the NPPF, but proposes to add to it.

The borough's own population projections (based on ONS data) show a projected population increase of only 6,155 over the planning period (2.16). However, the NPPF "standard method" requires the borough to build 12,200 houses over the period (4.10).

Rather than challenging the illogic of this allocation, TWBC instead proposes to exacerbate the situation by also contributing to "unmet needs elsewhere" by adding further to its housing allocation (4.13). TWBC should be acting in the interests of its own residents and of the natural environment by limiting development rather than assuming responsibility for other councils' allocations?

Planning for excess building above the borough's organic requirement also tends to undermine the sustainability strategy. New residents would be drawn into the borough from neighbouring districts where, had housing been available, they would have found it more convenient to live, typically owing to proximity to their place of work. Consequently, over-provision of housing where it would not otherwise be required adds to vehicle movement, congestion, pollution and consumption of fossil fuels.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Council should challenge the NPPF housing allocation figure as grossly out of line with projected housing needs in the borough, that 70% of the borough comprises AONB land, and that to build in line with NPPF allocation works against the sustainability mandate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/HA1 (PSLP_2140), Vision and Strategic Objectives (PSLP_2145), Policy STR1 (PSLP_2148) and Development Management Policies (PSLP_2158)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land adjacent to Countryside Properties' existing site on Highgate Hill, which is now complete following a successful permission allowed at appeal in 2015. Countryside is promoting this additional land as a logical 'phase 2' (SHELAA Site 86) residential redevelopment to mirror the quality of the established scheme.

1.1.3 Based on the current national and local planning context, we consider this additional site to be suitable for development and we consider there to be 'exceptional circumstances' to release this additional land within the High Weald Area of Outstanding Natural Beauty ('AONB'). As a consequence we object to its omission,

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.3.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.3.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.3.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.3.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.4.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where it will be located.

1.4.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.4.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated by taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for PSLP Figure 5 Key Diagram see full representation attached].

1.4.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached].

1.4.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.21 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached].

Response

1.4.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider the review process should cease and a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.4.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.4.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.4.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.4.26 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.4.27 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.4.28 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.4.29 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.4.30 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

1.4.31 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.4.32 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.4.33 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley.

1.4.34 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites

to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.4.35 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.4.36 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.4.37 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the east of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

Green Belt vs AONB Release

1.4.38 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.4.39 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.4.40 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.4.41 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of exceptional circumstances.

1.4.42 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.4.43 From a Green belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and

(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.4.44 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However,

it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.4.45 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.4.46 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether exceptional circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.4.47 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.4.48 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.4.49 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.4.50 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met.

1.4.51 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.4.52 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.4.53 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.4.54 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.4.55 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.4.56 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future

development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.4.57 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.4.58 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.4.59 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.4.60 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.4.61 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.4.62 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas.

Housing Delivery

1.4.63 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.4.64 It has been evidenced that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.4.65 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.4.66 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached].

1.4.67 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.4.68 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.4.69 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.4.70 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.4.71 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.4.72 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.4.73 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update it's agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.4.74 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached].

1.4.75 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.4.76 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.4.77 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.4.78 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need

from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.4.79 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.4.80 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.4.81 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.4.82 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at Highgate Hill, Hawkhurst (Site 86) which is unsubstantiated by evidence. Furthermore, we object to the limited growth promoted around Hawkhurst.

1.5.3 Furthermore, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Hawkhurst.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/SS1 (PSLP_2160), Vision and Strategic Objectives (PSLP_2161), Policy STR1 (PSLP_2162) and Development Management Policies (PSLP_2163)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Church Farm, Church Road that forms part of the strategic expansion of Paddock Wood (STR/SS1).

1.1.3 The site is allocated in the current Local Plan (Site Allocations Local Plan 2016, AL/PW3A) and is within the 'Limits of Built Development'.

1.1.4 Outline planning permission for 300 dwellings and a new country park, together with associated highways, landscaping, allotments, flood mitigation works including attenuation basins and open space was granted by Tunbridge Wells Borough Council (TWBC) in February 2018 for (reference: 14/504140/HYBRID).

1.1.5 A Reserved Matters application (reference: 19/03655/REM) for the full 300 dwellings was approved by TWBC in July 2020 on part of the site. This approved the full 300 dwellings, but on only part of the developable area. The consented 300 unit development has recently been implemented and is underway.

1.1.6 As part of the overall masterplanning and detailed design process, the reserved matters application identified that an increase in residential density across parts of the site was appropriate, and as such identified a future area of potential additional development within the scheme for a later stage. As such, there is the opportunity to make efficient use of the land available and utilise it to provide further residential development without a reduction in the overall country open space provision and within the area originally envisaged for residential development.

1.1.7 Following pre application advice discussions with TWBC and due to changes resulting from recent planning case law, it is no longer permissible to seek to vary the description of a planning permission through a Section 73 application. Therefore, Countryside Properties have submitted a standalone detailed planning application for the construction of a further 60 dwellings on the site known as phase 2.

1.1.8 Whilst this application has the potential to overtake the Local Plan process, this representation is submitted in parallel to demonstrate that the land as a whole is Countryside.

1.1.9 Based on the current national and local planning context, we consider this site to be suitable for such additional development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.4.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where it will be located.

1.4.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.4.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated by taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

1.4.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated by taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: Figure 5 Key Diagram from PSLP was duplicated here - see full representation attached].

1.4.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: Policy STR1 from PSLP was duplicated here - see full representation attached].

1.4.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.21 The full proposed distribution of development is set out below.

[TWBC: Table 4 Distribution of housing allocations from PSLP was duplicated here - see full representation attached].

Response

1.4.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent

Neighbours, we endorse a coordinated approach with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.4.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Furthermore, Paddock Wood represents a suitable location for strategic growth owing to the strategies applied to date. Nonetheless, we have concerns regarding the deliverability of the approach to a new settlement.

1.4.24 In our opinion, the proposed new settlement and the strategic growth of Paddock Wood are geographically too close and have the potential to saturate the market in the western part of the borough. Based on market intelligence, it is unlikely that development will come forward at the rates expected by the Council. Indeed, the Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 after. For the plan period, 2,100 homes are allowed for.

1.4.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.4.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.4.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.4.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of Tudeley, both in terms of the start date for completions and the expected build out rates.

1.4.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.4.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.4.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend beyond 2038.

1.4.32 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means their area, and be sufficiently flexible to adapt to rapid change.

1.4.33 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.4.34 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley.

1.4.35 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth mixed with the strategic expansion of Paddock Wood. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area.

1.4.36 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

Green Belt Release

1.4.37 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.4.38 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.4.39 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.4.40 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of exceptional circumstances.

1.4.41 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release.

1.4.42 From a Green belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.4.43 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.4.44 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis but generally extensions to settlements can be mitigated with relative ease. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.4.45 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether exceptional circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.4.46 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met.

1.4.47 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

Housing Delivery

1.4.48 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.4.49 It has been evidenced that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.4.50 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.4.51 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached].

1.4.52 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.4.53 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.4.54 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.4.55 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.4.56 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.4.57 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.4.58 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update it's agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.4.59 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached].

1.4.60 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.4.61 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.4.62 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.4.63 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.4.64 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.4.65 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.4.66 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust

strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.4.67 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy relies heavily on the delivery of Tudeley Village and the overly optimistic projections to the delivery of housing proposed.

1.5.3 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that Church Farm is a consented and implemented site and that the Phase 2 element is distinct from the wider STR/SS1 Eastern Parcel (being the areas which outside of the current Limits of Built Development). The Plan should reflect the potential for the Church Farm Phase 2 element to be delivered in advance of the other parts of the Eastern Parcel in a form that reflects its physical position contained within a consented and implemented development. This could be achieved by means of a separate site allocation policy for Church Farm Phase 2 and amendments to the Policies Map and Map 28.

1.5.4 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Church Farm, Church Road that forms part of the strategic expansion of Paddock Wood (STR/SS1).

1.1.3 The site is allocated in the current Local Plan (Site Allocations Local Plan 2016, AL/PW3A) and is within the 'Limits of Built Development'.

1.1.4 Outline planning permission for 300 dwellings and a new country park, together with associated highways, landscaping, allotments, flood mitigation works including attenuation basins and open space was granted by Tunbridge Wells Borough Council (TWBC) in February 2018 for (reference: 14/504140/HYBRID).

1.1.5 A Reserved Matters application (reference: 19/03655/REM) for the full 300 dwellings was approved by TWBC in July 2020 on part of the site. This approved the full 300 dwellings, but on only part of the developable area. The consented 300 unit development has recently been implemented and is underway.

1.1.6 As part of the overall masterplanning and detailed design process, the reserved matters application identified that an increase in residential density across parts of the site was appropriate, and as such identified a future area of potential additional development within the scheme for a later stage. As such, there is the opportunity to make efficient use of the land available and utilise it to provide further residential development without a reduction in the overall country open space provision and within the area originally envisaged for residential development.

1.1.7 Following pre application advice discussions with TWBC and due to changes resulting from recent planning case law, it is no longer permissible to seek to vary the description of a planning permission through a Section 73 application. Therefore, Countryside Properties have submitted a

standalone detailed planning application for the construction of a further 60 dwellings on the site known as phase 2.

1.1.8 Whilst this application has the potential to overtake the Local Plan process, this representation is submitted in parallel to demonstrate that the land as a whole is Countryside.

1.1.9 Based on the current national and local planning context, we consider this site to be suitable for such additional development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.4.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where it will be located.

1.4.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.4.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated by taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: Figure 5 Key Diagram from PSLP was duplicated here - see full representation attached].

1.4.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: Policy STR1 from PSLP was duplicated here - see full representation attached].

1.4.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.21 The full proposed distribution of development is set out below.

[TWBC: Table 4 Distribution of housing allocations from PSLP was duplicated here - see full representation attached].

Response

1.4.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we endorse a coordinated approach with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.4.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Furthermore, Paddock Wood represents a suitable location for strategic growth owing to the strategies applied to date. Nonetheless, we have concerns regarding the deliverability of the approach to a new settlement.

1.4.24 In our opinion, the proposed new settlement and the strategic growth of Paddock Wood are geographically too close and have the potential to saturate the market in the western part of the borough. Based on market intelligence, it is unlikely that development will come forward at the rates expected by the Council. Indeed, the Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 after. For the plan period, 2,100 homes are allowed for.

1.4.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.4.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.4.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.4.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of Tudeley, both in terms of the start date for completions and the expected build out rates.

1.4.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.4.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.4.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend beyond 2038.

1.4.32 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.4.33 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.4.34 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley.

1.4.35 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth mixed with the strategic expansion of Paddock Wood. Adopting a pattern of

dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area.

1.4.36 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

Green Belt Release

1.4.37 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.4.38 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.4.39 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.4.40 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of exceptional circumstances.

1.4.41 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release.

1.4.42 From a Green belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.4.43 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.4.44 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis but generally extensions to settlements can be mitigated with relative ease. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.4.45 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether exceptional circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.4.46 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met.

1.4.47 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

Housing Delivery

1.4.48 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.4.49 It has been - evidenced that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.4.50 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.4.51 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached].

1.4.52 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology.

As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.4.53 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.4.54 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.4.55 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.4.56 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.4.57 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered

up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.4.58 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update it's agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.4.59 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached].

1.4.60 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.4.61 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.4.62 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.4.63 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of 443 affordable dwellings across the Borough.

1.4.64 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.4.65 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.4.66 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.4.67 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Place Shaping Policies

1.4.68 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver

the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

1.4.69 Policy STR/PW 1 sets the Strategy for Paddock Wood and states that approximately 3,490-3,590 dwellings and accompanying infrastructure will be delivered via the planned extension to Paddock Wood.

1.4.70 Policy STR/SS1 sets the detailed strategy and states:

[TWBC: PSLP Policy STR/SS1 has been duplicated here - see full representation attached].

[TWBC: for Extract of proposed proposal map for Paddock Wood see full representation attached].

1.4.71 An area of open green space is included within the original hybrid application which extends around the northern, eastern and western boundaries of the site. The details of the landscaping of this area have been agreed pursuant to the conditions and S106 of the hybrid planning permission for the site. The Phase 2 element does not seek to amend the extent of this area. The emerging Local Plan seeks the formal allocation of the green space as Local Green Space under Policy EN15. Policy EN15 states:

[TWBC: PSLP Policy EN15 has been duplicated here - see full representation attached].

Site Specific Policy Response Church Farm Phase 2

1.4.72 The inclusion of the wider Church Farm site within the strategic allocation for Paddock Wood (STR / SS1) is generally welcomed and its acknowledgement as a strategy site is supported.

1.4.73 However, the Plan no longer proposes to include individual site allocations within the strategic development area and, in doing so, the strategic allocation does not distinguish between the additional potential development at Church Farm (which would be entirely contained within the consented and implemented 'Phase 1' element (300 units) and the wider 'Eastern Parcel'; the area of STR/SS1 washes entirely over the consented and implemented area and the proposed Phase 2 area alike.

1.4.74 Whilst the aims and objectives of the Paddock Wood Strategic Allocation STR/SS1 are supported, our client objects to the current policy wording in that it does not adequately deal with the specifics of the Church Farm site, namely:

(1) That the site is distinct from the other parts of the strategic allocation STR/SS1 in that the 'Phase 1' element is consented and implemented. This should be recognised in the Plan and the accompanying policies map;(2) That the Church Farm Phase 2 site is specifically suitable and available for an additional phase of development for c.60 residential units (as is shown in the current planning application for this element). This should be specifically referenced in the Plan and on the accompanying policies map and Map 28;

(3) That the Phase 2 element is physically distinct from the wider Paddock Wood strategic allocation (beyond the existing limits of built development) because of the fact that the consented 'Phase 1' element has been implemented;(4) That the Phase 2 element should therefore not be subject to the same requirements as the greater areas of land outside the current Limits of Built Development (e.g. land to the east of Church Farm) in terms of:(a) STR/SS1 (5) in respect of proposals being subject to design review panel; the Phase 2 element will naturally follow the form and design of the consented and implemented Phase 1 element and will not have wider impacts in terms of the design (being entirely surrounded by the consented development. The requirement for the input of the design review panel should not be mandatory in all cases and the requirement should take account of individual circumstances. This aspect of the policy should be reworded as it relates to Church Farm Phase 2;(b) STR/SS1 (8) in respect of the proposals providing transport infrastructure as part of the wider masterplanned strategic allocation, particularly as the Church Farm Phase 2 element would utilise the same access (vehicular, pedestrian and cycle) as the consented and implemented development in which it is entirely contained; this element of STR/SS1 should be reworded to acknowledge that the Church Farm Phase 2 element cannot physically provide for additional connections to the Town Centre, for example (as the connections have already been established by the wider Phase 1 consent);(c) Requiring the site to 'be delivered through' the eastern parcel masterplan; the site is distinct from the areas of potential development to the east within the Eastern Parcel, outside of the current limits of built development. This element of the policy should be reworded to acknowledge that the Church Farm Phase 2 site is distinct from the other parts of the Eastern Parcel and should not therefore be subject to the masterplanning requirements of that area.

1.4.75 Whilst the objective of STR/SS1 to avoid 'piecemeal development' within the strategic area is supported, the Plan should be updated to acknowledge that, because of its unique nature, the Church Farm Phase 2 site is capable of being delivered separately and independently of the wider Eastern Parcel.

1.4.76 Our client considers that the above points would be best remedied through the inclusion of an individual site allocation for Church Farm Phase 2, separate from the wider STR/SS1 'Eastern Parcel'.

1.4.77 Notwithstanding, the proposed allocation of the open green space (to the extent approved by planning permission 14/504140/HYBRID (and later detailed in the details pursuant to the conditions to that consent) as Local Green Space (EN15) is supported.

Development Management Policies

1.4.78 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.4.79 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.4.80 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.4.81 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.4.82 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.4.83 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a support SPD not policy.

1.4.84 Turning to housing policies, policy H2 states that development should make efficient use of land, having full regard to the context of the site, including its character, landscape setting, topography, surrounding built form, and access to infrastructure and services.

1.4.85 In our view, this policy adds nothing beyond the advice contained in the NPPF and therefore adds little. It also goes against the principle of preparing succinct Local Plans.

1.4.86 Policy H3 sets out affordable housing requirements. Whilst we support the general thrust of the objectives and the securing of affordable provision, we object to the rounding up of the calculations and contributions being based on a net rather than gross number of units. For small scale proposals this will often see the proposed percentage increase to closer to 45% and 35% respectively. Such thresholds would therefore need to be tested and justified by evidence. A pragmatic approach would be to apply traditional rounding up or down.

1.4.87 The phasing of affordable provision also needs to be sufficiently flexible so as to not prohibit wider delivery. In this regard, we consider that entering into contract with a registered affordable provider ahead of the 50% occupation should provide the certainty of delivery, but without risking a wider delay in market delivery. The timing of affordable delivery should also be dictated by scale, size and type of site.

1.4.88 The Council will be aware of wider country wide discussions regarding the viability of providing social rented accommodation as part of a wider offer. Such provision is becoming increasingly difficult

and without robust policy in place that addresses this matter, this matter is likely to significantly slow delivery.

1.4.89 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy relies heavily on the delivery of Tudeley Village and the overly optimistic projections to the delivery of housing proposed.

1.5.3 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, but we require amendments to the policy wording for policy STR/SS1 and to Map 28 to make it clearer that Church Farm is a consented and implemented site and that the Phase 2 element is distinct from the wider STR/SS1 Eastern Parcel (being the areas which outside of the current Limits of Built Development). The Plan should reflect the potential for the Church Farm Phase 2 element to be delivered in advance of the other parts of the Eastern Parcel in a form that reflects its physical position contained within a consented and implemented development. This could be achieved by means of a separate site allocation policy for Church Farm Phase 2 and amendments to the Policies Map and Map 28.

1.5.4 We also object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Vision and Strategic Objectives (PSLP_2263), Policies STR1 (PSLP_2264), PSTR/PE1 (PSLP_2265), AL/PE3 (PSLP_2266), STR9 (PSLP_2267) and Development Management Policies (PSLP_2268)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land at Pembury, which Countryside is promoting for residential redevelopment as part of the wider development plan review.

1.1.3 Based on the current national and local planning context, we consider this land to be suitable for development.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the

reasonable alternatives, and based on proportionate evidence;• Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;• the sustainability appraisal (including consultation with the statutory environment consultation bodies);• identifying significant cross boundary and inter-authority issues; and• ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;• Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.4.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.4.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated by taking into account: extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for PSLP Figure 5 Key Diagram see full representation attached].

1.4.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:
[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached].

1.4.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.21 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached].

Response

1.4.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.4.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.4.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large- Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.4.26 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.4.27 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.4.28 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.4.29 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for

a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.4.30 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer terms aspirations that will extend beyond 2038.

1.4.31 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.4.32 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.4.33 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites should be added to offset the loss of the housing relied upon from Tudeley.

1.4.34 In respect of the wider strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements.

Green Belt vs AONB Release

1.4.35 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.4.36 We support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.4.37 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.4.38 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of exceptional circumstances.

1.4.39 From a Green Belt perspective, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);

(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.4.40 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is possible to channel much of the development beyond this designated area.

1.4.41 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.4.42 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether exceptional circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

Housing Delivery

1.4.43 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.4.44 It has been evidenced that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.4.45 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.4.46 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached].

1.4.47 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.4.48 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.4.49 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.4.50 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.4.51 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.4.52 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.4.53 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.4.54 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached].

1.4.55 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.4.56 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.4.57 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.4.58 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.4.59 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.4.60 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.4.61 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.4.62 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Vision and Strategic Objectives (PSLP_2118), Policies STR1 (PSLP_2121), AL/CRS2 (PSLP_2127) and Development Management Policies (PSLP_2128)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Countryside Properties (hereafter referred to as Countryside) in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to land within Countryside Properties' control adjacent to the Crane Valley, Cranbrook which forms part of proposed allocation reference AL/CRS 2.

1.1.3 The site, combined with land proposed for allocation under AL/CRS 1, currently cover land that represents a single larger Local Plan allocation contained within the adopted Site Allocations Local Plan 2016 Policy AL/CR 4. These sites have traditionally always featured as a single allocation owing to the fact that access to the CR2 land is required through site CR1.

1.1.4 In respect of progress of the site to date; Persimmon Homes secured outline planning permission prior on the CR1 land prior to surrendering its option to another developer. Nonetheless, it is understood that a reserved matters application is in preparation for the CR1 land.

1.1.5 In the meantime, Countryside remains committed to bringing the CR2 site forward at the earliest available opportunity once a suitable access can be achieved via the CR1 land.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comments on the plan having regard to these tests of soundness.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, we are concerned about the degree to which the Council has complied with the duty to cooperate, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.4.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where it will be located.

1.4.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.4.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated

by taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for PSLP Figure 5 Key Diagram see full representation attached].

1.4.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR/1 has been duplicated here - see full representation attached].

1.4.18 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.21 The full proposed distribution of development is set out below.

[TWBC: PSLP Table 4 Distribution of housing allocations has been duplicated here - see full representation attached].

Response

1.4.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.4.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.4.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.4.26 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council.

1.4.27 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.4.28 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.4.29 Kings Hill is an extremely prudent example to consider in the context of the Paddock wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases were delivered at lower rates given the need to front load infrastructure.

1.4.30 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

1.4.31 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.4.32 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.4.33 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is should be added to offset the loss of the housing relied upon from Tudeley.

1.4.34 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements.

Green Belt vs AONB Release

1.4.35 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.4.36 We support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation.

1.4.37 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.4.38 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of exceptional circumstances.

1.4.39 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);

(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.4.40 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is possible to channel much of the development beyond this designated area.

1.4.41 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.4.42 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether exceptional circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

Housing Delivery

1.4.43 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed. 1.4.44 It has been evidenced that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.4.45 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.4.46 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing Housing completion rates 2010 to 2015 see full representation attached].

1.4.47 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.4.48 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing Housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.4.49 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.4.50 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.4.51 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.4.52 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.4.53 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update it's agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.4.54 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing Information extracted from the LPA's published supply statements see full representation attached].

1.4.55 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.4.56 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.4.57 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.4.58 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need

from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.4.59 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.4.60 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.4.61 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.4.62 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Countryside Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the continued allocation of our client's land in Cranbrook, albeit with some modification to the affordable housing requirement in line with the adopted allocation.

1.5.3 Finally, we consider that the Local Plan strategy as a whole relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Consultee	Julie Davies [REDACTED]
Email Address	[REDACTED]
Company / Organisation	CPRE Kent
Address	- - -
Event Name	Pre-Submission Local Plan
Comment by	CPRE Kent [REDACTED]
Comment ID	PSLP_463
Response Date	27/05/21 10:19
Consultation Point	Policy STR 1 The Development Strategy (View)
Status	Processed
Submission Type	Web
Version	0.5
Files	Jenrick Gale letter 210421.pdf
Question 1	
Respondent's Name and/or Organisation	CPRE Kent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR1 The Deveelopment Strategy	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not justified
.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

All responses to this Regulation 19 consultation have been prepared jointly by CPRE Kent and by the Tunbridge Wells District Committee of CPRE Kent. For brevity, our comments are expressed as being from 'CPRE Kent' throughout.

Moderation of scale of development

CPRE Kent considers there are good reasons why the Tunbridge Wells Local Plan should not meet its housing requirement in full – reflecting the constraints clearly shown on the key diagram, including the fact that 69% of the borough is designated AONB, 22% is Metropolitan Green Belt and there are areas of Ancient Woodland outside these protected landscape areas.

Additional constraints arise from the location of the flood plain, best and most versatile agricultural land, conservation areas and intrinsically dark skies. All of these factors limit the amount of land available for development in the borough, in accordance with the NPPF. Much of the borough consists of rural landscape, valued and designated as such and demonstrating a pattern of settlement and land use of great historical significance. The settings of the various settlements form part of their character and historic interest. The borough's duties under the NPPF, read as a whole, are not to destroy or damage these features, but to protect and enhance them.

Paragraph 172 of the NPPF requires great weight to be given to conserving and enhancing landscape and scenic beauty in AONBs.

Given that the High Weald AONB stretches across the whole length of the borough, not only should consideration be given to the impact of the development strategy on the AONB, but also the impact on the significant areas of land which lie within its setting.

Paragraph 133 of the NPPF confirms that the Government attaches great weight to the green belt.

In balancing the role the AONB and green belt have on the Council's development strategy, the NPPF at paragraph 3 states "the framework should be read as a whole (including its footnotes and annexes)."

Paragraph 11(b) expands on this by stating that strategic policies should provide for assessed needs unless:

"(i) the application of policies in this Framework that protects areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."

This is explained in footnote 6 as policies relating to land designated as green belt, local green space, AONB, irreplaceable habitats, designated heritage assets and areas at risk of flooding.

Or "(ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."

If the delivery of housing was the sole objective of the NPPF then paragraphs 3 and 11(b) would have not been included. Thus, for these paragraphs to be meaningful they will need to be given due consideration.

CPRE Kent is of the view that the scale of development should be moderated, as set out in paragraph 4.40 of the plan.

The reason given for proposing a strategy that reflects that housing need should hold greater weight than any other consideration is that the need, in itself, would not be met.

This stance overlooks the key issue that it is accepted that need should be a starting point – balanced against the constraints of being a borough with significant green belt and AONB coverage (as stated in paragraph 11(b) footnote 6 of the NPPF).

The Secretary of State for Housing Communities and Local Government confirmed this view in his letter to Roger Gale MP on 21 April (attached), stating in his last paragraph: “I would emphasise that the **standard method is only the starting point for local authorities in identifying the housing need** in a local area. Local housing need does not set a target for the number of homes to be built – local authorities take into account land supply considerations and environmental constraints before determining the number of homes likely to be delivered in the area. **This recognizes that not everywhere will be able to meet their housing need in full.**” [CPRE Kent emphasis]

This position is further confirmed on the MHCLG blog post (25 May 2021) which states:

“That's not how they work –**the numbers mentioned are a starting point for local councils to help them understand how much housing is needed in their area and are not legally binding.** Put simply, it is a measure of an area's housing need, against which councils must then consider their local circumstances and supply pipeline. Councils draw up a local housing target, taking into account factors including land availability and environmental constraints such as Green Belt.

Protecting the Green Belt is a priority and our national planning policy reinforces regenerating previously developed land, known as brownfield sites, and prioritising urban areas. The uplift in local housing needed within our biggest cities and urban centres in England will direct homes to where they are better served by infrastructure, and therefore protect our countryside. It also supports our wider objectives of regenerating brownfield sites, renewal, and levelling up.” [CPRE Kent emphasis in bold]

[see weblink](#)

CPRE Kent considers that the borough does not have the capacity to meet its housing targets without significant harm to the green belt and AONB and other characteristics of the borough protected by, or worthy of protection under, the planning system.

Housing delivery

CPRE Kent has concerns about the number of dwellings proposed in the local plan and how these new homes will be delivered.

The target of 686 dwellings per annum is more than double the 338 dwellings per annum which have been built on average in the borough over the last ten years. Only twice in the last 20 years have more than 686 dwellings per year been built (2006/07 and 2007/08)[1].

This discrepancy between the borough's OAN and any reasonable estimate of future household formation or housebuilding capacity is hardly surprising, since the standard methodology for calculating OAN no longer lays claim to being an estimate of local need, based on up-to-date data.

The Government's published justification for the methodology is as follows. The 2014-based household projections are used within the standard method to provide stability for planning authorities and communities, ensure that historic under-delivery and declining affordability are reflected, and to be consistent with the Government's objective of significantly boosting the supply of homes.

Leaving to one side the question of whether this represents a legally sound basis for the policy - on which we reserve our position - we would suggest that the artificial and unrealistic nature of the OAN should only add relative countervailing weight to the clear and unambiguous duties of the Council to protect the AONB, green belt, irreplaceable habitats, best and most versatile agricultural land and conservation areas in the borough, and avoid inappropriate development in areas of flood risk.

Housing density

In addition, CPRE Kent is firmly of the view that green field development should be the last option and that brownfield sites should be developed first. All development, whether it be on sustainably located brownfield sites, or on green fields should be built at higher than low suburban development densities of 30dph, so that green field land take is kept to an absolute minimum.

In this respect, it is difficult to understand how the Council's stated aims of optimising density (to minimise loss of green fields) has been applied across the proposed allocations. Will schemes be built out at low, medium or high density in the interests of minimising green belt release?

The highest density possible should be used to reflect the nature of local character areas and local housing need requirements.

Paragraph 3.28 of the SHELAA states: *"A more refined density calculation has been used at a later stage in plan making to inform site allocation policies. This will take full account of the context of each site and its opportunities and constraints, such as location, surrounding character and environment –but it's not clear what densities have actually been applied."*

The Brownfield and Urban Topic Paper (January 2021) makes reference to use of an indicative density of 45dph (compared to the 30dph in the SHELAA), which is little more than suburban density levels. If the density of brownfield and urban land is being optimised to what amounts to very low levels of development, the question arises about what happens in the case of green field allocations – and the implications for resultant yields and the provision of affordable housing and support to active travel and public transport.

The Strategic Sites Masterplanning and Infrastructure Study report (February 2021) refers to the opportunity to provide a higher density of development around the settlement centre at Tudeley, with lower density development at the edges to respect rural character. At paragraph 5.63 it is noted that average density would be between 35-38dph for the urban extension at Paddock Wood. These densities are very low and fall below the expectations set out in the draft National Design Code.

The CPRE report Space to Breathe see web link (October 2019) demonstrates that where green belt is being developed it's providing executive housing, without affordable homes and is failing to make the best use of land – with densities at just 14dph, which is far below that needed to support sustainable communities.

Further research undertaken by CPRE and Place Alliance (A housing design audit for England, 2020) see web link concludes that housing schemes performed more poorly with distance from the urban core and with reduced density. The additional constraints imposed by stronger pre-existing urban context, were considered to encourage a more sensitive design response. Building at low density and on green fields is not being done well in terms of design quality. The most successful schemes (as audited in the study of 142 developments) were those at 56dph – which is almost double the national average of 31dph.

The National Design Codes consultation (January 2021) states that density is an essential component of an effective design code. Building at 20-40dph is noted as representing development in outer suburbs; suburban development is pegged at 40-60dph and urban neighbourhoods at 50-120dph.

Setting aside these issues of general principle CPRE Kent is concerned that approximately half of the land to be allocated for homes is concentrated across two strategic allocations. If delivery at either of these sites stalls, housing need will not be met as predicted in the Council's housing trajectory.

Distribution of development

It would be helpful to understand the distribution of development in terms of its relationship to the Council's settlement hierarchy to ensure that development is being planned in the most sustainable locations across the borough.

Table 4 (distribution of housing allocations) does not clearly set out the balance of housing growth in relation to the most sustainable locations across the borough.

Parishes/settlements below the main urban areas of Royal Tunbridge Wells, Southborough and Paddock Wood are listed in alphabetical order. There is no reference to how the number of homes allocated relates to settlement role or function, or to the settlement hierarchy.

Confusingly, the Settlement Role and Function Study (February 2021) provides settlement groupings in tiers (a)-(g), whereas policy ED8 refers to settlements by type: town, rural service and neighbourhood

centres and villages. As such, it is difficult to understand the development strategy in terms of the sustainability of the borough's settlements. Is development being directed to the right places?

Exceptional circumstances

With 5.71% of green belt in the borough being released for development, CPRE Kent is concerned that the Council does not intend to designate additional land as replacement.

The Council has set out in its Development Strategy Topic Paper (February 2021) the exceptional circumstances for releasing green belt, which can be summarised as follows (see paragraph 6.183):

- . heavily constrained borough – green belt/AONB
- . growth in sustainable parts of the borough will impact on green belt and/or AONB
- . development requirements are higher than previous local plans – housing requirement is more than double that required in the 2010 Core Strategy

The Council state that without release of green belt identified development need cannot be met.

The fallacy in accepting such matters as constituting 'exceptional circumstances' is they have the consequence that, the greater the proportion of a district that comprises protected areas, the weaker their protection under the planning system. The correct conclusion under the NPPF, is that the greater the proportion of a district that consists of protected areas, the less scope there is for development in that district. As confirmed by Robert Jenrick on 21 April 2021 (see above) and in the MHCLG blog post of 25 May, housing need/the standard method, is the *starting point*.

CPRE Kent considers that there are good reasons why the Tunbridge Wells Local Plan should not meet its housing requirement in full - reflecting the fact that 69% of the borough is designated AONB (and 22% is green belt).

CPRE Kent remains to be convinced that the Council has placed sufficient emphasis on increasing density within the towns or on insisting on high density development on green field sites. The result is that far too much AONB and green belt countryside is being allocated for development.

AONB

With regard to the AONB, paragraph 172 of the NPPF states:

"Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks and the Broads. The scale and extent of development within these designated areas should be limited. Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest".

Planning Practice Guidance, July 2019, states:

*"The National Planning Policy Framework makes clear that the scale and extent of development in these areas should be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. Its policies for protecting these areas **may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process**, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas. [CPRE Kent emphasis]*

Paragraph: 041 Reference ID: 8-041-20190721.

AONBs together with National Parks have the highest status of protection in relation to landscape and scenic beauty. For National Parks "the Government recognises that the Parks are not suitable locations for unrestricted housing and does not therefore provide general housing targets for them. The expectation is that new housing will be focused on meeting affordable housing requirements, supporting local employment opportunities and key services"[2].

This principle equally applies to AONBs - through paragraph 11(b)(ii) of the NPPF – which seeks to ensure that the scale and extent of development proposed does not harm the purposes for which these areas were nationally designated.

On this point the Glover Review (Landscapes Review 2019) sets out how important it is that the "needs and requirements of the local community will be met within the broader context of achieving sustainable development appropriate to these nationally important landscapes" and how AONBs "should not be

the place for major intrusive development” (pages 62/63). Building homes in the AONB isn’t ruled out completely, with the report acknowledging that “we need more homes in the countryside, including in national landscapes, but in small numbers, built beautifully and made affordable” (page 105).

The CPRE report *Beauty Still Betrayed* (April 2021) see web link highlights the threats to our AONBs as a result of unsuitable housing, particularly in the south east, with the High Weald AONB suffering the highest development of all. Evidence demonstrates that building within AONBs is taking place at low density (averaging 16dph) and doesn’t provide the affordable homes that rural communities need.

To ensure that these special landscapes are safeguarded and receive the highest levels of protection against development (in accordance with paragraph 11(b) footnote 6 of the NPPF), development of small scale affordable and social homes for local people should be prioritised.

Employment

The spatial distribution of future housing and employment needs are not matched. This will result in unsustainable patterns of development as movement takes place between home and work.

The Plan indicates that there is 47ha of key employment areas in the Borough. The plan would increase this by 55%.

The plan (table 5) allocates 25.8ha employment land to ensure at least 14ha is developed. 13.4ha is allocated by the A21 and 11.2ha on two sites at Paddock Wood. There is no differentiation between the sites as they are all allocated for the same mix of use classes.

This raises questions. Such as whether all the allocated land will be developed and how it is phased. Will the Longfield Road allocation be developed first, and would this undermine demand for the Paddock Wood sites? Or vice versa? Or would allocations only be partially developed?

Distance travelled to work data (Census 2011) indicates for Paddock Wood that 30% of 16-74 year-olds in employment either travelled less than 5km to work or worked mainly at or from home. Additional employment land at Paddock Wood could provide opportunities for Paddock Wood residents to work closer to home – which is important from a sustainable travel point of view.

If the Paddock Wood allocations were not delivered, or there was limited development, this is likely to result in greater out-commuting. It would also mean Tudeley residents would have to commute further, rather than having the convenience of being able to work in Paddock Wood (which is nearer than Tunbridge Wells). It could very well increase traffic on the A228 between Paddock Wood and the Longfield Road allocation.

Sustainability and climate change

The NPPF sets out at paragraph 7 that “the purpose of the planning system is to contribute to the achievement of sustainable development. At a very high level, the objective of sustainable development can be summarised as meeting the needs of the present without compromising the ability of future generations to meet their own needs.”

Footnote 4 to this paragraph refers to Resolution 42/187 of the United Nations General Assembly.

Paragraph 9 continues:

“So that sustainable development is pursued in a positive way, at the heart of the Framework is a **presumption in favour of sustainable development** (paragraph 11).”

Whilst 11(b) states:

“Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas⁵, unless:

- 1 The application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area⁶, or
- 2 Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.”

Where footnote 5 states “As established through statements of common ground (see paragraph 27)” and footnote 6 “The policies referred to are those in this Framework (rather than those in development plans) relating to: habitats sites (and those sites listed in paragraph 176) and /or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of Outstanding

Natural Beauty: ...; irreplaceable habitats; designated heritage assets (and other heritage assets of archaeological interest referred to in footnote 63); and areas at risk of flooding or coastal change.”

The NPPF at paragraph 149 requires plans to take a proactive approach to mitigation and adapting to climate change.

The Queen’s Speech (11 May 2021) to Parliament confirmed the Government’s commitment to achieving net-zero greenhouse gas emissions by 2050.

The foreword to the progress report to the Parliamentary Committee on Climate Change (July 2019) points out tougher targets do not in themselves reduce emissions – new plans must be drawn up to deliver them, that climate change will continue to warm in the short-term, and sea level will continue to rise and that we must plan for this reality[3].

The House of Commons Science and Technology Committee report[4] in its conclusions and recommendations encourages the Government “to develop and act on policies to ensure that the UK is on track to meet a 2050 net-zero emissions target” and that “it must seek to achieve this through, wherever possible, domestic emissions reduction.”[5] With regard to decarbonising transport the Committee state “The Government’s current long-term targets for decarbonising transport focus heavily on reducing exhaust emissions and increasing sales of low-emissions vehicles, rather than delivering a low-emissions transport system. In the long-term, **widespread personal vehicle ownership does not appear to be compatible with significant decarbonisation**. The Government should not aim to achieve emission reductions simply by replacing existing vehicles with lower-emission vehicles.” And continues “it must develop a strategy to stimulate a low-emissions transport system, with the metrics and targets to match. This should aim **to reduce the number of vehicles required**, for example by: promoting and improving public transport; reducing its cost relative to private transport; encouraging vehicle usership in place of ownership; and encouraging and **supporting increased levels of walking and cycling**.”[6] [CPRE Kent emphasis].

Siting new development in locations well supported by, or that will support, sustainable transport will help achieve this. This local plan should promote development in locations well served by regular public transport services and social and community facilities, that are in safe walking and cycling distance or would support, or result in, sustainable settlement. Such routes need to feel safe, be well lit, especially for children and women who have to use them after dark - otherwise cars will be the preferred mode of transport.

Dark Skies

The rural areas of the borough, including within the High Weald AONB benefit from dark skies [<https://www.nightblight.cpre.org.uk/maps/>]. Paragraph 180(c) of the NPPF requires plans to limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.

Conclusion

The plan is therefore considered to be unsound because it is not justified and is not consistent with national policy.

CPRE Kent would wish to participate at the examination hearings to explore this issue further.

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Cranbrook & Sissinghurst Neighbourhood Development Plan

Response to Tunbridge Wells Borough Council Pre-Submission Draft Local Plan – 4th June 2021

Section 4: The Development Strategy and Strategic Policies

Policy STR 1: The Development Strategy

Point 8 states that the plan limits ‘development within the High Weald Area of Outstanding Natural Beauty to that which can be accommodated whilst still conserving its key characteristics, this being mostly small-scale, only promoting larger proposals where exceptional circumstances are demonstrated.’

Surely the point of an AONB is to give it maximum protection from development and that the whole AONB is worthy of this protection? Just because land in the AONB was “made available” does not mean it is suitable. Central government recognises this, so why doesn’t TWBC? We don’t believe that major developments within the AONB in Cranbrook and Sissinghurst parish are justified or necessary; the community had identified small-scale alternatives. There are no exceptional circumstances to warrant major development in the AONB.

Point 9 states that the plan; ‘Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary.’

Similar objection here to point 8 – it is unjustifiable to build large dormitory estates on protected countryside, as the government has stated.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy STR1. The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. In addition, the reliance on large strategic sites is going to result in the trajectory not being able to deliver sufficient

housing early in the Plan period and so additional smaller sites are necessary to ensure delivery and so make the Plan effective.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy.

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in some neighbouring Districts/Boroughs may have been unclear. However we now know that following the failure of its high court challenge, Sevenoaks District Council is now required to begin the preparation of their Local Plan again. There is also sufficient uncertainty with Tonbridge and Malling's Local Plan this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. Similarly, Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan. Since the NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within neighbouring areas, within the same market housing area. Not to do so would be contrary to NPPF policy and in our view this suggests that additional sites must be identified and the overall housing target for Tunbridge Wells to be increased.

In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer. Tunbridge Wells Borough Council cannot legitimately argue against this strategy having removed housing allocations from the Regulation 18 draft Local Plan that were perfectly acceptable. We refer the Local Plan Inspector to Policy AL/CRS3 of the Regulation 18 Draft Local Plan relating to Jaegers Field, and attached representations made by our client, which seek to 'reinstate' and expand this housing allocation in Cranbrook.

In relation to delivery of new homes, we are of the view that additional medium sized housing sites (under 70 units) are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional medium and smaller housing sites should be allocated in different locations. Since NPPF seeks to boost the supply of housing and there is nothing in the guidance preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. If over provision occurs, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve. Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (Reg 18) (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines.

[TWBC: the below text is from the Cover Letter attached to this representation]

Pre-Submission Local Plan - Regulation 19 Consultation

We write on behalf of the Trustees and Governors of Cranbrook School in response to the request for feedback on the Reg.19 Pre-Submission Local Plan and in relation to previous representations made on the Reg 18 version. We have the following comments on those areas of the Plan that are of interest to Cranbrook School and to those sections of the report that impact land owned by the School. We would be grateful if you could take these into consideration as part of the consultation process.

Borough Wide Strategy

This letter should be read in conjunction with the enclosed Regulation 19 response forms which discuss the strategic position with regard to soundness, issues arising from duty to co-operate and particularly with regard to housing delivery.

The Council is relying heavily on a small number of larger strategic sites totalling some 6,390 dwellings which is a high proportion in relation to the borough wide housing figures. Our concern is that over reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum. We would therefore question the removal of housing allocations from the regulation 18 Plan that were perfectly acceptable before.

We propose that the Council looks again at the overall suggested housing figures to take account of the broader planning situation, to reduce over reliance on large sites. To help with delivery in the early part of the plan period, in our view, the Council should look to re-balance the proportion of smaller and medium sized sites being put forward – including sites where further information has come forward which provides clarity on deliverability, and/or sites which have been removed from the regulation 18 version of the Plan without strong reasoning.

Strategic Growth & Cranbrook

Turning to the local situation, our concerns expressed above on the overall strategy can be successfully transposed to the settlement of Cranbrook.

We support the acknowledgement in 4.46 that Cranbrook, as a service centre, “warrants its consideration as a focus for growth”. Table 4 lists the Parish of Cranbrook and Sissinghurst as being suitable for further housing development of up to 467 units, 429 of which are in Cranbrook. This was dramatically

reduced from the Reg 18 figures (previously stated as 803 units for Cranbrook alone) and we question whether this level of reduction is warranted when the current growth relies on only three allocations (two of which are over 150 units) – all in the same area to the west of Cranbrook. These are substantial incursions into the surrounding landscape of the Crane Valley well away from the established built form of the town and within the AONB.

With regards progress on the two main proposed allocations in Cranbrook: the reserved matters application at Land at Brick Kiln Lane (TW/20/00814/RM) has been withdrawn, and Land at Turnden Farm (TW/20/03816) is the subject of an inquiry after being called in by the Secretary of State, due to the size of the development in the AONB. Furthermore, the conclusions of Part 6.6 of Tunbridge Wells - Landscape and Visual Impact Assessment of Proposed Allocated Sites within the High Weald AONB (CRS4 – relating to land at Turnden Farm), recommends a phased approach to development, with the proposed woodland planted/established to the south west of the site needing to be planted/established before the development of the north/east part of the site. This phasing will add a delay to the delivery of development at this site. The relevant section of the LVIA forming part of the Council's evidence base states *"The development could be assimilated into the landscape through the mitigation outlined within Figure C14, which would establish additional woodland cover and grassland enhancing the route of the footpath within the site footpath and creating new recreational opportunities."* This highlights that the development of the extent of the site, as proposed (accounting for 1/3rd of the total site area), is contingent upon the delivery of woodland as a key component of mitigation against unacceptable impacts upon the AONB. Furthermore, the need for such extensive areas of mitigation in order to make the proposals acceptable highlights the relatively inefficient use of land in comparison with more modestly sized sites that are already interwoven with the fabric of the town.

As such, we question the focus on these sites as a more strategic allocation, creating a significant edge of settlement extension to Cranbrook rather than balancing and moderating the supply, reducing the extent of rural incursion, and by including several small to medium sized sites that would be better related to the wider town.

Given the uncertainty on timely delivery and the inherently more complex issues associated with larger sites, adding further medium sized sites and/or reducing the quantum of larger housing sites, would assist with supporting timely delivery of housing and providing a more balanced housing trajectory (the smaller and medium sized sites helping to 'kick-start' build out rates earlier in the plan period, with the larger scale sites coming on in the middle to end of the Plan period).

Given that Cranbrook School has extensive land holdings scattered throughout the town – it is considered that some of the land parcels towards the periphery of the School's estate offer excellent opportunities to provide such sites which are readily deliverable, are in genuinely sustainable locations and can be achieved with limited wider landscape effects.

The specific sites will be discussed in more detail below and within the attached documentation – however in overall terms we would suggest an increase in housing provision of at least 113 housing units within Cranbrook, which would go some way to counteracting the reduction by upwards of 300 units within the latest draft Plan compared with the regulation 18 version.

Cranbrook School

We welcome and support the specific reference to Cranbrook School within Section 5 of the document and the recognition of the position and role of the school within the local community. In support of this:

- . Cranbrook School was founded in 1518 and is one of the oldest schools in Kent. It has occupied a site in the centre of Cranbrook throughout this time.
- . The School is a co-educational state secondary school taking students between year 7 and year 13. The School has a current role of just under 900 day and boarding students. The approximately 650 day students live within a defined Catchment Area, currently up to 8.2 miles from the school. One of very few state boarding schools there are in addition some 250 boarding students primarily from elsewhere in the UK and with a limited number from overseas.
- . Cranbrook School provides a high standard of teaching, as demonstrated through OFSTED Outstanding assessments, GCSE, and A Level results.
- . It provides excellent sporting facilities which are available not only to the School students and staff but also to the local community (such as Cranbrook Rugby Club, Cranbrook Badminton Club, Cranbrook Squash Club, Cranbrook Juniors Football Club and Karate Club).
- . The School is the largest employer within the Town with some 80+ members of staff and their families living locally.

- . The School is actively involved with the local community, through theatre events, concerts, and a range of other activities facilitated through access to school facilities.
 - . The School encourages new families to the local community which in turn increases local spend and local support.
 - . The School supports the vitality and viability of the town centre through local spending by staff, School children and their families.
 - . The School assists in the creation of more investment and public funding to Cranbrook.
 - . The School contributes towards the maintenance of the historic setting of Cranbrook and maintenance of its listed buildings and other heritage assets; and
 - . It helps to maintain the overall profile of the town as an attractive place to live, work and visit.
- Notwithstanding these benefits, the School has increasing funding pressures in addition to maintaining and protecting important heritage assets for future generations to enjoy and continue the School's historic legacy. Added to this are significant running and maintenance costs associated with a School campus that includes many individual buildings and land parcels that have been added at different times.

Many sites within the School's estate are dispersed and disconnected from the main school site which means they are poorly placed from the point of view of pupil safeguarding and efficiency of use. Three key land parcels are especially disconnected – Jaegers Field, Big Side, and Rammell Field, as shown below, with Jaegers Field being the most remote from the main campus. If the School is to flourish in the future, it will need to invest in and significantly improve its facilities to meet future demand and curricular needs. At the same time, it will need to coalesce its facilities onto its more core site(s).

[TWBC: for map, please see the Cover Letter attached as a supporting document]

Many of the facilities have been built using the school's own resources and extensive fund-raising from existing parents and former students. It is therefore essential to the future well being of the School that it is allowed to dispose of some underutilised and distant land holdings, representing a small proportion of its overall estate, to raise the funds required to continue to enhance the core facilities. The School has in the order of triple the amount of outdoor space and pitches it would need under relevant educational standards.

It is therefore of significant importance to the School and in turn the educational and economic wellbeing of the Parish, that any policies adopted through the Local Plan processes allow sufficient flexibility for the School to be able to realise its future objectives, and do not place unduly restrictive burdens upon the School which would likely restrict the financial and functional ability of the school to maintain and grow.

Section 5 – Cranbrook and Sissinghurst – Cranbrook School

Whilst we welcome the general comments regarding Cranbrook and Sissinghurst we are disappointed that sites in the ownership of Cranbrook School specifically Jaegers Field, which was referenced in the previous plan, is no longer identified in terms of growth potential by way of a specific site allocation. We do, however, recognise that proposed policy AL/CRS 4 does allow for consideration of alternative land uses in principle. We explore the inclusion of Jaegers and Rammell later in more detail.

Turning to the specific paragraphs relating to Cranbrook School, starting at Paragraph 5.314, we greatly appreciate the support referenced in Para 5.316 and recognition of our ambition to improve facilities and the statement that “specific policy support is warranted”. As stated in the accompanying forms, we recommend a small but very important modification to draft policy AL/CRS 4 to the wording of the second paragraph, to read as follows:

“Proposals for more substantive proposals, including new buildings *and/or* different uses of land, both within the main site and on ancillary landholdings...” (italics indicate changes)

This change is necessary in order to enable the schools medium to longer term vision as it has set out in the masterplan attached to these representations.

The School has developed a high-level Masterplan document setting out plans for the development of the School estate and this will be updated to ensure that it meets the criteria set out in 5.322, upon adoption of the Local Plan. We agree that developments of significance should not be piecemeal but form part of a wider development plan to ensure that facilities continue to meet the growing demands and changes in educational requirements. This document is attached for information, and other detailed work being undertaken and referred to below, will fully address sports, open space and other provision.

The commitments contained within the Plan to ensure normal planning considerations are reflected, recognizing the heritage assets within the school are fully supported.

The Local Plan does however need to better recognize three important factors fundamental to the ability of the school to continue to thrive for the benefit of the local community. Firstly, the facilities must continue to adapt to meet the changing needs and demands of the curriculum. Secondly that in the continued absence of government funding for capital projects the School will need to look to its own assets to fund future developments. Thirdly that the dispersed nature of the current school site is no longer acceptable from a student safeguarding perspective and the School must therefore coalesce into its core site. This will inevitably require investment in the core site and the disposal of the more remote areas to fund this.

Whilst we fully recognize the value of the school's assets to the local community, who enjoy substantial access and use of them, this cannot be a complete barrier to realization of some assets, in particular land, to finance future development of the school facilities, which will of course also enhance wider community experience.

We enclose a copy of our Masterplan for information and consideration, as required by draft policy AL/CRS4. Within the document, the focus of residential led development is centered primarily on Jaegers Field in the short term, in conjunction with a review of sports facilities at Big Side to offset the loss of playing facilities at Jaegers. This review includes a technical assessment of Big Side to ensure it is of at least equivalent standard to Jaeger's Field (with recommendations regarding any works needed to achieve this), and with the formalisation of the community use of facilities at Big Side within a Community Use Agreement. The technical assessment is underway, but the written report is, at the time of writing, awaited, however we have a draft Community Use Agreement that reflects discussions to date with Sport England, which is attached to this letter.

[TWBC: for attachments, please see supporting documents]

Jaegers Field

The School still fully supports the promotion of Jaegers Field as a suitable and achievable housing site and requests re-instatement as a proposed housing allocation. It abuts the limits to built development for Cranbrook, close to local services and facilities, and the site is set between existing residential development and opposite the Weald Academy. It is considered that a sensitive development can be achieved within the parameters of the site which respects the recognized matters of importance, particularly landscape, highways and ecology. Notwithstanding the field is surplus to requirements for School use, the loss of the playing field will be accounted for at nearby Big Side, along with formality of community use of the facilities. There are no material changes which would alter the SHELAA conclusions or Reg 18 draft part allocation of the site – and indeed, significant further technical work has now been progressed by the School which provides greater certainty on the deliverability of the site and the limited impacts upon the surrounding landscape. Alongside further landscape assessment work, other professionals have been engaged to review the highways and ecological aspects. Alongside this, specialist consultants have worked with the school and its retained planning consultants in order to engage in discussions with Sport England regarding the proposals and the linked community use agreement at Big Side, and a positive 'in principle' pre-application outcome has been achieved with them.

As a result, as part of the updated strategy as reflected in the enclosed draft Masterplan, we consider the whole site can be released for housing (with associated woodland and ecological buffer areas and open space). In line with our comments above, this would provide a valuable contribution to bolster housing supply from medium sized sites in the early years of the plan period, especially given the uncertainty of timing and delivery of the remaining Cranbrook sites. For these reasons we would urge Tunbridge Wells to consider reallocating this site in its entirety for residential use. We have attached a technical sheet with further details of the site for consideration. In addition, we have included an indicative layout for residential development on the site, as well as an initial Landscape Report.

[TWBC: for attachments, please see supporting documents]

Rammell Field

We recognise the opportunity to offer a positive and long-term solution for Rammell field, which has been underused and is surplus to the Schools future requirements. Notwithstanding the perceived community and visual value of the site, the field is privately owned and gated and our vision is to

provide a more efficient use of the land to the benefit of the whole community. The future remodeling of the site would be based on the following aspects being incorporated into any proposed layout:

- . Provision of a new, publicly accessible open space, focused on the front portion of the site
- . The open space would be sensitively landscaped to include a memorial garden to those fallen in the world wars and other conflicts; and
- . Provision of an element of sensitively designed affordable and low-cost market housing to the rear of the site, including for those in local housing need.

We attach a technical summary sheet which provides further details of the site along with an initial Landscape Report undertaken by a Chartered Landscape Architect, which we hope will be useful to your considerations. Of particular note is the concept plan within the landscape report, which has informed the suggested policy approach to be taken.

[TWBC: for attachments, please see supporting documents]

Green Space

We reference the policy on Green Space set out in Section 6 and the designated sites referenced in Appendix 2, two of which listed under Cranbrook, Rammell Field and Big Side Playing Field are owned by the School.

Both these sites are playing fields with no public right of access other than for agreed use by certain local sports clubs. We do not accept that either location meets the criteria for Local Green Space (LGS) set out in Para 6.183 and subsequent paragraphs. In the absence of public access, we do not see how they greatly benefit mental health and wellbeing of the community. Furthermore, we do not agree that these two spaces meet the criteria detailed in 6.184.

Notwithstanding these comments, whilst neither space is in our view justified to be included as Local Green Space, we do recognise that as part of the current strategy, Big Side is to be subject to a Community Use Agreement complementing the School's use of the field. Therefore, whilst we would prefer the LGS designation to be removed, we feel more strongly with regard to Rammell Field given that it is surplus to the school's future requirements, and therefore that a bespoke policy relating to Rammell would be a more appropriate approach – this is discussed below.

Earlier in this document we have referenced the dispersed nature of the current School site as being no longer acceptable for the safety of students or staff. Rammell Field falls into this category with both its remoteness from the main school's site being of increasing concern. In responding to the Neighbourhood Plan we have put forward a proposal for this site which focuses on enabling public benefits through allowing a variety of potential uses, including provision of a significant public space within the Conservation Area, and affordable housing focusing primarily on smaller dwellings to meet local needs – please see attached documents for more details.

[TWBC: for attachments, please see supporting documents]

Without doubt the designation of both sites as Green Spaces has the potential to seriously impact the future development and success of the school and restricts its ability to provide a safe environment for students and staff. As such we would recommend the removal of both Rammell Field and Big Side from draft policy EN15.

Furthermore, we would recommend a new policy for Rammell to be included within the Plan, focused on harnessing a unique opportunity to deliver a significant package of community benefits. This new policy would acknowledge the importance of Rammell Field but taking a more positive approach to change with overall wider benefits in mind – as opposed to a more restrictive type of policy which might stifle innovation. Our suggested draft policy is below and could cross reference to a site plan similar to that attached within Figure 12 of the hla Landscape Report (attached).

[TWBC: for attachments, please see supporting documents]

Rammell Field - Community Benefit

The future use(s) of the site shall be focused upon achievable community benefits arising from these uses, with a view to a balanced provision being sought - which would potentially include:

- *New public open space - focused in particular on the preserving and enhancing the setting of the Conservation Area*

- Proposed high quality landscaping to enhance the site boundaries and transitional areas between different spaces and uses
- A memorial garden or other feature designed with community input
- Biodiversity enhancements
- An element of high quality housing reflecting the best of the local vernacular focused principally on responding to genuinely local needs including for those unable to compete in the local open housing market, and including key workers for example in education and healthcare. Any built development should respect and enhance the distinct historic landscape character, and design should be compliant with the High Weald AONB Design Guide and Parish Council's Eco Design guide for new buildings.
- It is expected that a detailed Landscape Masterplan would be incorporated within any proposals submitted for future mixed use of the site

Conclusions

Cranbrook School is undoubtedly a valuable asset to the town and local community, educationally, economically, and culturally, and will continue to strive to retain and further enhance its excellent reputation by continuing to improve its existing educational, sporting, and boarding facilities.

If the school is to flourish in the future, it will need to invest in and significantly improve its facilities to meet future demand and curricular needs. At the same time, it will need to coalesce its facilities onto its more central site(s). Therefore, any policies adopted either through this Plan should be flexible enough to enable the school to update facilities and maintain its standards into the future without being burdened by significant additional restrictions that would jeopardise these needs.

Furthermore, productive use of a modest portion of surplus land for a range of purposes, including housing, would help redress some of the shortcomings identified within the Regulation 19 Plan and would re-balance the overarching strategy from what is in our view, overreliance on a small number of large strategic sites.

We hope that the above comments are valuable in feeding into the planning process. We would very much welcome the opportunity to discuss these representations further with officers of the Council.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify STR1 to increase housing numbers to meet the unmet needs adjoining authorities. Alter the Policy to identify a need for additional smaller and medium sized sites (under 70 units in size).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To be present to test/witness the Council's strategy regarding housing numbers, the trajectory and the delivery of sites.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Crest Nicholson

Question 2

Agent's Name and Organisation (if applicable) Barton Willmore

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: For further comments by Crest Nicholson, please see Comment Numbers PSLP_2064, PSLP_2066-2074, and PSLP_2077]

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following paragraphs are relevant extracts from the representation. For the full representation and appendices, please see supporting documents]

4.0 STRATEGIC POLICIES

Policy STR1: The Development Strategy

“Not positively prepared”

4.1 These representations are submitted on behalf of Crest Nicholson (Crest). Crest is promoting land at North West Paddock Wood.

4.2 Crest supports overall principles, but considers the policy to be unsound, as the policy wording could be more positively prepared.

4.3 Crest supports TWBC in seeking to meet its own strategic housing requirement for the Plan period, as a minimum, particularly given the significant environmental constraints of the Borough (including the High Weald AONB and Green Belt which together cover 75% of the Borough's area). It is thereby positively planning for its residents and the Borough's economic needs for this Plan period. This is welcomed and supported.

4.4 TWBC's "Development Strategy Topic Paper" (TWBC, February 2021) along with the Sustainability Appraisal provides a comprehensive overview as to the basis and justification for the spatial development strategy that has evolved and is now being pursued in the Plan. This work helps in reinforcing the soundness of this policy and the Plan as a whole.

4.5 It is clear, from the work undertaken by TWBC when considering sites for substantial and sustainable strategic growth location outside the AONB and Green Belt, that the option of developing around parts of Paddock Wood is a good sustainable option.

4.6 The tests for major development in the AONB are high and it has been demonstrated that the requisite housing and employment needs cannot be met elsewhere in the Borough (or outside, under the Duty to Cooperate). As such, the Council then considered further development in the Green Belt around Paddock Wood and Tudeley particularly in the context of paragraph 72 of the NPPF which recognises that,

“The supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well located and designed, and supported by the necessary infrastructure and facilities.”

4.7 As paragraph 6.82 of the Development Strategy Topic Paper (February 2021) sets out,

“In summary, the opportunities presented by existing and planned infrastructure investment, as well as economic potential and the scope for net environmental gains, as set out in consideration (a) of paragraph 72 are all very relevant to both locations:

a) Both locations relate to the A228, where improvements are planned, while it is also likely that further transport investment would support growth in both areas.

b) Paddock Wood is an established employment centre with growth potential, while Tudeley would be well located in relation to both it and Tonbridge, a few miles to the west.

c) Green Belt impacts in both cases need careful scrutiny, not least as Tudeley would be wholly within the Green Belt and could impact on the setting of the High Weald AONB, while the growth of Paddock

Wood could also encroach into the Green Belt and, potentially, impact on the setting of the AONB to the south.

d) Flood risk is a further issue, as it is recognised that land to the west of Paddock Wood, in Capel parish, has flooding constraints which would need to be properly considered."

4.8 Five options for further growth around Paddock Wood were considered and assessed. Crest supports the choice of the option that involves development all around the town, including removing a small amount of land from the Green Belt, as it is agreed that this provides sustainable development as it provides general accessibility and therefore support to the town's facilities, facilitates business growth, and can provide flood mitigation. Crest has appointed Ardent Consulting Engineers to review the flood risk and surface water drainage associated with land north west of Paddock Wood. The Flood Risk and Surface Water Drainage Overview (Ardent Consulting Engineers, May 2021) is attached at Appendix 2, and supports the allocation.

4.9 The Development Strategy in paragraph 4 of Policy STR1 states that the Local Plan "Includes an allowance for potential delays or non-delivery of sites". To be more positively prepared, it is suggested that paragraph 4 is amended to read,

"The strategic sites will be comprehensively planned through coproduced Masterplans and Development Framework Supplementary Planning Documents that will allow individual planning applications to come forward in order to facilitate the timely delivery of development and minimise potential delays or non-delivery;"

Housing Trajectory

"Not positively prepared"

4.11 The housing allocation policies need to provide sufficient flexibility to minimise delays in delivery over the Plan period, particularly in the earlier years, to ensure the Council has a rolling five year housing land supply and that the housing need and trajectory is met in full within the Plan period.

4.12 As one of the developers of the Paddock Wood allocation STR/SS1, Crest recognises the benefits of strategic site allocations and is keen to ensure development is planned for comprehensively. Crest believes this will be achieved via the policy mechanisms put forward by the Council – the Masterplan and the Development Framework SPDs, especially if coproduced (see representations to Policies STR2, STR4 and EN1 and STR/SS1). A more flexible approach is required in the local plan, however, to recognise there are a number of different developers (housing and employment) with land interests within the allocation who will be submitting separate planning applications. By allowing individual planning applications to come forward, the Council will be better placed to fulfil its housing trajectory. This is particularly important given TWBC does not currently have a five year land supply and may struggle to have a rolling five year housing land supply going forward in the early years of the Plan.

4.13 Strategic sites do take longer to plan for and start delivering new homes, so it is important that the Local Plan:

- . Recognises that development will be brought forward in a variety of planning applications by different developers and not unduly restrict or delay development coming forward that is in general conformity with a co-produced Strategic Site Masterplan and Development Framework (see representation to Policies STR1 and STR/SS1)
- . Sets out clearly and concisely what is required of each allocation, and parcel therein (See representation to Policy STR/SS1)
- . Evidences and clearly sets out what is fair and reasonable infrastructure required to be provided and by which development parcel, subject to viability (see representation to Policies STR5 and STR/SS1)
- . Minimises repetition and confusion (see representations to Policies STR2, STR4 and EN1).

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested Modification

4.10 4.10 To be more positively prepared, it is suggested that paragraph 4 of Policy STR1 should be modified as follows:

"The strategic sites will be comprehensively planned through coproduced Masterplans and Development Framework Supplementary Planning Documents that will allow individual planning applications to come forward in order to facilitate the timely delivery of development and minimise potential delays or non-delivery;"

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Crest is promoting land at North West Paddock Wood, part of the strategic development site STR/SS1 and a significant part of the Council's housing delivery. As such, it is important that Crest is represented in all the relevant EiP hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

There is a site off Medway Road in St. James where Trident Trailers used to be located. This building has been boarded up for over a decade and should be subject, in my view, to a compulsory purchase order. The area has several blocks of flats and this land is an eyesore. It could be developed into housing, parking or a number of other uses.

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr & Mrs Dunlop
Question 2	
Agent's Name and Organisation (if applicable)	Broadlands Planning Ltd.
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Policies Map (Inset Map No(s)) 15; Hawkhurst

[TWBC: This representation has been put against Policies STR 1 and STR/HA 1 - see Comment Numbers PSLP_443 and PSLP_457]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see Broadlands Planning supporting letter *[TWBC: Please see supporting documents]*, which sets out why the definition of the Limits to Built Development on Local Plan Inset Map 15; Hawkhurst is not sound, as denying the character and appearance of the continuous built development on the south west boundary of Hawkhurst and north of High Street, with the LBD defined too tightly to the historic core of the centre of Hawkhurst.

Tunbridge Wells Borough Regulation 19 Pre Submission Local Plan 2021. Representations in respect of the proposed Limits to Built Development north of High Street, Hawkhurst, as shown on Inset Map 15; Hawkhurst, and following the terms of Policy STR1; The Development Strategy, Policy STR/HA 1; The Strategy for Hawkhurst Parish, and Inset Map 15; Hawkhurst.

This submission is made on behalf of Mr and Mrs Dunlop and family. I attach a completed form for this representation.

The submission sets out my client's concerns at to the definition and extent of the Limits to Built Development on the south western edge of Hawkhurst and north of the High Street, as set out in;

1. Policy STR1; The Development Strategy;

To achieve, this the Local Plan: 2. Looks to focus new development within the Limits to Development of settlements, as defined on the Policies Map, where proposals accord with the other relevant policies of this Plan;..

2. Policy STR/HA 1; The Strategy for Hawkhurst parish;

'The development strategy for Hawkhurst parish is to: Set Limits to Built Development for Hawkhurst, as defined on the Policies Map (Inset Map 15) as a framework for new development over the plan period.'

3. The delineation of the Limits to Built Development shown on Inset Map 15; Hawkhurst, as drawn to the south west of Hawkhurst and, in particular north of High Street, which approach we consider over restrictive, not justified, and not sound.

We note the terms of the Review of the Limits to Built Development Addressed in the **Limits to Built Development Topic Paper-Regulation 18 Consultation August 2019**, in particular the following;

1.2 Limits to Built Development (LBDs) are used to differentiate between the built up areas of settlements and areas of countryside beyond. Generally, and subject to compliance with other policies in this Plan, there will be a presumption that the principle of proposed development such as infilling, redevelopment, and/or changes of use will be acceptable inside the LBD, while land and buildings outside the LBD will be considered as countryside where there is much stricter control over development.

II. Principles

2.10 The following principles are used to define LBDs:

- 1) LBDs are policy lines drawn around the 'main' built up area of a sustainable settlement – but they do not seek to define settlements as such.
- 2) Land inside the LBD will generally be substantially developed – including buildings, roads (excluding roads on the edge), etc.
- (3) The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds, outdoor sports, and leisure, unless surrounded by other development.
- 4) LBD boundaries should normally follow physical features, e.g. roads, walls, field boundaries, although there may be instances where it is appropriate to cut across property curtilages to ensure that local character and/or amenities are protected.
- 5) LBDs need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.
- 6) There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.

11 Criteria

'Criteria used to determine what should or should not be included within LBD Boundaries;

Any amendment to LBD's should:

- (c) *..have no adverse effect on landscape character.*
- (e) *.. be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character, appearance or setting-does it relate more to the built environment or to the surrounding countryside.*
- (f) *..not extend existing features or result in ribbon development*

Exclude

- 1 *Isolated buildings or sporadic/dispersed development e.g individual or small groups of buildings separated from the main built up area of the settlement.*
- 1V. *large rear gardens or paddocks stretching well out from the built form of the settlement. Where there is an obvious variation in the rear line of garden curtilages along the edge of a settlement, then a striking line will be applied through these to form a uniform edge to the settlement*

We note that;

- . Along High Street the main built up area is linear in character and appearance and does incorporate both the higher density and historic area nearer the core at the central crossroads and the lower density residential areas of detached houses fronting High Street as it extends to the west.

- . The latter is clearly part of the historic development pattern of Hawkhurst as it has grown from its hamlet origins, as is typical of most settlements. It provides an essential range of higher and lower density homes of homes for the residents of Hawkhurst, and is a part of the 'main' and sustainable built area of Hawkhurst.
- . These buildings and their curtilages along this part of High Street are not isolated or dispersed, but materially contiguous.
- . The Proposed Limits to Built Development along High street, however, is drawn tightly to the higher density and historic 'consolidated Core' of Hawkhurst and some later residential estate development along Oakfield.
- . To the west of this LBD, however, is found a materially unbroken line of primary residential development, barring the buildings of Hawkhurst Golf Club, along to the Hawkhurst Hospital, including the more densely historically developed enclave of houses with more limited curtilages on the eastern and western entrances of Slip Mill Road to High Street, and a range of virtually uninterrupted detached houses in more extensive and landscaped grounds which are tightly defined on their northern edge by open cultivated farmland. This is part of the urban area of Hawkhurst.

My clients **object to the restricted extent of the defined Limits to Built Development on this western edge of Hawkhurst, as shown on Inset Map 15; Hawkhurst.**

We request that the Inspector for the Examination finds it appropriate to extend the Limits to Built Development north of High Street along to the Hawkhurst Hospital.

This request is justified and made on the following grounds;

- . This area is contiguous with the historic core of Hawkhurst, and cannot be characterised as fringe land on the 'edge' of the settlement of Hawkhurst.
- . This area is an integral part of the historic development of the settlement of Hawkhurst, and its developed confines.
- . This is not open 'countryside' land, but part of the built up area of Hawkhurst.
- . This land is substantially developed, including lower density homes in landscaped grounds.
- . The area is well defined and constrained by High Street as the main western entrance to Hawkhurst, and open agricultural fields to the north.
- . The substantial landscaping of the houses, both within their curtilages and along the High Street roadside, contributes materially to the attractive landscape character of this approach the Hawkhurst centre.
- . The incorporation of this area within the defined Limits to Development will not harm its landscaped character.

The inspector is requested to determine accordingly.

[TWBC: For full representation please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see attached Broadlands Planning letter of full representation *[TWBC: Please see supporting documents]*, which sets out the case for an extension of the Proposed Limits to Built Development north of High Street, Hawkhurst, on Inset Map 15; Hawkhurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here. [PSLP_443, 457 Broadlands Planning for Dunlop_SI-1_Representation.pdf](#)

Reference - Development Strategy Topic Paper (sections K 6.218 'inappropriate development in areas at risk of flooding should be avoided by directing development away from areas of highest risk (existing or future)' plus sections K 6.221 and K6.222).

TWBC acknowledge much of their borough is designated an Area of Outstanding Natural Beauty so has limited potential for development forcing by default only Paddock Wood, Tudeley and Capel as 'suitable'. Due to flood plain Zones 1 to 3 (both here and downstream - increased flood risk to existing properties East Peckham, Queen Street, Laddingford and Yalding) makes this proposal both not legally compliant and unsound. Based on these factors - why is TWBC not challenging their Whitehall housing allocation to be based on solely eligible land?

Reference Strategic Site Master Planning and Infrastructure Paper (section 4 Paddock Wood and others). The combined housing proposal for Paddock Wood, Tudeley, Capel plus Maidstone BC proposal for Belting is tantamount to a new town. Surely development on such a scale, which also impacts all nearby districts and the national transport links is a strategic decision for Whitehall? West Kent already has one new town earmarked for the Medway Valley at Burham. I recall David Cameron considered Yalding as a site for a garden city and quickly back tracked due to the flood risk - is the present proposal similar?

Reference - Strategic Site Master Planning and Infrastructure Paper - Paddock Wood Sections 4.58 - 4.63. This acknowledges water table is so high flood storage solutions are limited (s4.62), recent flooding of Warrington Road (s4.63) and that building is reliant on local flood defences (s4.59). Conclude even with this knowledge combined with rising sea levels TWBC are prepared to put both new and existing homeowners at even higher flood risk - hope they have deep pockets to cover negligence claims from insurance companies of flooded homeowners - not a good use for the public purse.

Reference - Strategic Site Master Planning and Infrastructure Paper - Paddock Wood transport infrastructure. Sections 4.14, 4.24, 4.42, 4.43, 4.44, 4.47, 4.50. Assumes all traffic will leave developments via existing and to be built eastern/south distributor road. Issue compounded by the closure to all buses of the Maidstone Road in central Paddock Wood.

This does not take into consideration vehicles from the new developments of Church Farm and Mascalls Farm developments which wish to travel north (most common - M20 links, Kings Hill plus towns of Maidstone and Medway). Their quickest route will be Queen Street then single track roads of Lucks Lane or Waggon Lane. These are already rat runs at peak times. Unsuitable for heavy use, potential accident blackspots and misery for residents whose homes are positioned very close to the roads (i.e. historic cottages with little or no front gardens). How is TWBC to prevent this?

Reference - Strategic Site Master Planning and Infrastructure Paper - Paddock Wood Section 4.64 - states known drainage issues but 'scale of the betterment required is to be determined as well as how the cost burden can be shared fairly'. Therefore conclude TWBC is aware of the flooding risk however is still prepared to grant developers permission to build without properly calculating costs to make good flood defences, transport infrastructure and sewage treatment systems. Does it reasonably think developers will pay for this unchallenged long after they have built their planned estates? In the words of Greg Clark and KCC - infrastructure first - why does TWBC think differently - competent management of the public purse deems the developers should pay not the taxpayer. If the then cost makes the development unviable then so be it. In the years to come does TWBC really want a similar situation to what happened in Gloucs/Somerset Levels. a couple of winters ago - all due to incompetent approval to build on flood plains.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Background - lived in local area for over 50 years and at present address for the last 10 (Level 3 flood plain zone). Have experienced neighbours having sewerage and water coming into homes - last time 2013 & before current development, ditches came close to flooding last winter (2020). Through a combination of rising sea levels and wetter winters this is going to become more common. Over the years I have witnessed too numerous floods in Yalding as well. Further building whether approved or proposed makes this situation more acute. During this time we have seen a steady increase in traffic levels on Lucks Lane and Queen Street especially around rush hour when traffic volume is constant (excessive for a single track road). Berkeley Homes have said they have never experienced the boggy conditions faced on their Paddock Wood site. Developers are having problems (even in the current housing boom) to sell the Paddock Wood homes with numbers sold to overseas investors. This proves lack of demand (due to flood plain location) and encourages overseas rental properties (not government policy).

Possible Solutions

TWBC challenge Whitehall's housing targets for the borough through the removal of unsuitable land from any equation used to arrive at the target number of homes. This would see the removal of areas of outstanding natural beauty and either flood plain land (or land whose development will affect existing settlements downstream).

Smaller scale developments for each village (for example 100 homes per village). Spreading development reduces the need for infrastructure improvement expenditure, offers homeowners better location choice (maybe with housing reintroducing a better social dynamic to villages), less impact to the countryside.

National policy for new town development - rather than TWBC's current via the back door. My proposal for consideration is Hastings/Bexhill due to the volume of low value land. This would be accompanied by the full dualling of the A21 and improvements to rail links. Such a proposal would not only regenerate this area but would bring employment opportunity throughout the A21 corridor - which would include TWBC area.

Should the development of Paddock Wood go ahead - traffic calming for Queen Street (with possible one way traffic from the railway bridge to the development) and the stopping up of Lucks Lane and Waggon Lane to all but local residents and cyclists

Flood defences for all existing properties in Tudeley, Capel, Five Oak Green, Paddock Wood, Queen Street, East Peckham, Laddingford and Yalding. Backed up by financial compensation underwritten jointly by the developers/TWBC in the event of flooding for the next 50 years.

If TWBC feel their local plan proposals are so beneficial why not put this to a public vote?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to express the voice of the public.

The proposals of TWBC do not represent the wishes of local residents.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan is unsound in my view and in the views of my immediate and extended family, and friends. We do not accept that it is necessary and justified to construct large developments and new settlements on Green Belt land or on or near to AONB land. These protections were put into place to prevent over zealous development, urban sprawl and the conglomeration of once separate places.

We consider that most objectionable of all is the so called Tudeley Village which would be a development entirely out of keeping with the rural undeveloped location and would destroy large swathes of green belt which by the way is currently very pleasant green fields, woodland and a former quarry which is now a lake. This area is quiet, peaceful and serene and provides a large expanse of unspoilt land for wildlife, farming and natural outdoor space for local people.

Furthermore, this area lies between the settlements of Tonbridge and Paddock Wood, both of which are expanding in the direction of this proposal currently, or within this proposal are to be expanded. This means that regardless of the garden village principles the Tudeley Village does not protect from urban sprawl but will create an urban link between Tonbridge and Paddock Wood and therefore fail the test of being part of a sustainable plan or of being effective in terms of Green Belt.

There is an extremely popular campaign in motion to "Save Capel" opposing both of these developments including the expansions west of Paddock Wood. In addition a popular opposition to development at Ramslye exists. Given that these campaigns have support of at least 5000 respondents is it not surely required that these developments are removed from the local plan, we cannot accept these constant losses of AONB and Green Belt across the borough as it is not sustainable and does not respond to the climate crisis sufficiently.

The fields at Capel, Five Oak Green and Paddock Wood are pleasant places which currently serve to provide a home and refuge for wildlife and an effective green belt to those settlements and must therefore remain in place undeveloped, and should receive therefore enhanced protection. These fields and woods were loved by my relatives who lived in Five Oak Green and were places that they fought for during the Second World War by serving their country or doing their domestic duty.

Therefore we all oppose these devastating developments and insist that the borough reconsider that it must follow a prescribed government solution and that it should in fact scale back development across the borough rather than support additional growth. We recognise that some development is required but feel that it can be better located in these cases, and more sustainably achieved under a much reduced level of new allocations and greenfield across the board.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Fernham Homes Ltd
Question 2	
Agent's Name and Organisation (if applicable)	Bloomfields Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., with interest to the site submitted under the previous Call for Sites and considered under the Pre Submission Local Plan SHELAA as Site 143. This logical Site on the edge of Five Oak Green remains deliverable and available under the stewardship of this local housebuilder and as an organic and sustainable addition to the village, this site could be brought forward in a manner consistent with the Council's overarching delivery objectives.

[TWBC: Above comment from covering email]

Fernhams Homes Limited (FHL) is promoting land at Tolhurst Road, Five Oak Green, for residential development and in this context that FHL wishes to express its objections to the development strategy insofar as it relates to development at Capel, as set out in Draft Policy STR/CA1.

The development strategy is based upon meeting, in full, the assessed local housing need for the area along with a "buffer" for flexibility. This is welcome, in principle, since the Plan's evidence base indicates very limited scope to apportion unmet housing need to neighbouring authorities, since neighbouring authorities experience many of the same constraints as Tunbridge Wells.

In this context the Council is asked to consider that The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa, rather than the 678dpa that the authority commits to delivery within policy STR1. It is understood that the Housing Needs Topic Paper indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa. The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the authority should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

It is agreed that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider that a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is unfortunately not positively prepared, is not justified and is therefore not sound or legally compliant.

Also, as a result of this, the development strategy must respond pragmatically but sensitively to the Borough's principal constraints, namely the High Weald Area of Outstanding Natural Beauty (AONB) and the Metropolitan Green Belt. The need to safeguard these areas must be carefully balanced against the need to achieve a sustainable pattern of growth and, in general terms, undertaking this balancing act has been found by Inspectors to be justified through local plan examinations elsewhere in the country (e.g. Guildford and Central Bedfordshire).

Green Belt

Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development. The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated: 'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist. 'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than four times double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. This needs to be considered in the context that the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider

the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact in any meaningful way exists only on contained sites that affect one's perception of openness within the site and from immediate vantage points.

The conclusion that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation is therefore agreed. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

That said, the contribution to development needs from the non-constrained area of the Borough must, within reason, be maximised to limit the extent of Green Belt release and encroachment by new development within the AONB. In Green Belt release terms, this is essential to making the case for "exceptional circumstances" as per paragraphs 136 and 137 of the National Planning Policy Framework (NPPF), and, in AONB terms, to demonstrate that great weight has been provided to conserving and enhancing the AONB and limiting the scale and extent of development within the AONB (NPPF, paragraph 172).

Given the above, FHL welcomes the decision (described at paragraph 4.48 of the Plan's supporting text) to reduce the level of growth previously proposed in the AONB as being beneficial to the overall soundness of the Plan. In part compensation, the Plan has seen a greater focus on urban intensification and brownfield which has been identified as a lynchpin of the development strategy in Draft Policy STR 1. It must be recognised, however, that urban intensification and brownfield redevelopment have limits and those sites that are available may not be quick to come forward given the myriad of issues that typically affect the deliverability of urban and brownfield land. By way of using urban land to its fullest potential in order to avoid directing growth to the Borough's more sensitive areas, the Brownfield and Urban Land Topic Paper (January 2021) details a very exhaustive approach to ensuring that these opportunities are maximised whilst ensuring that the level of growth planned through these means is deliverable and realistic.

Strategy

Combined with the two strategic proposals in the Plan, Tudeley Village and the expansion of Paddock Wood, both of which exist within close proximity to each other and have complex infrastructure and phasing requirements, over-reliance on urban intensification and brownfield sites coming forward could result in a "top-heavy" development strategy unless it is accompanied by a wider dispersal of small to medium sized sites that are capable of yielding housing completions quickly as well as contributing to the viability and vitality of rural areas.

With regards to the trajectory of delivery in relation to the Tudeley village, Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver' provides evidence of the speed and rate of delivery of large-scale housing. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, it is considered that housing may evidently be unlikely to be delivered at Tudeley until around 8 years after the granting of planning permission.

In fact, the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic. It is considered that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. The considered over reliance upon Tudeley Garden Village means that if it is not delivered as planned there would not be any flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

It is therefore welcome that the Plan provides for these opportunities as they will diversify the sources of housing supply and ensure that the Plan retains flexibility to respond to changing circumstances. We would note from Figure 3 of the Housing Supply and Trajectory Topic Paper (February 2021) that expected housing completions within the plan period will ensure a consistent and steady supply to meet ongoing need, particularly in the earlier years, which is important given the Plan's reliance on strategic sites.

As set out above, opportunities for dispersing growth to the rural area generally will be limited by the AONB and the Green Belt. Paragraph 7.16 also identifies the concerns expressed at the Draft local Plan stage about unduly and disproportionately large scales of growth at smaller villages, whereas the proposed allocation of sites such as that at land at Tolhurst Road, Five Oak Green, will ensure a more natural and ultimately more sustainable development as it is at a level whereby growth in Five Oak Green which can also enable the expansion of services and facilities to improve the sustainability credentials of the settlement which, in addition to being in the spirit of the Planning Practice Guidance and the National Planning Policy Framework, can facilitate delivery of the Plan's strategic objective of improving infrastructure, local services and amenities in line with community needs.

In general terms, we consider allocating a material level of growth at Five Oak Green to be sound and fully supported by the Plan's evidence base.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. However, it is considered that the Local Plan strategy relies too heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council has applied overly optimistic projections to the delivery of housing for the Tudeley Garden Village and it is considered that a more realistic timeframe should be adopted for the delivery trajectory of the Tudeley.

In the intervening time, it is considered that further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Five Oak Green where it is considered that sites such as our client's land at should be added to offset the loss of the housing relied upon. For this reason, we object to the exclusion of our client's land at Tolhurst Road, Five Oak Green.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land at Tolhurst Road, Five Oak Green, for development and is seeking changes to Draft Policy STR1. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

FHL supports the general thrust of the Sustainability Appraisal (SA) insofar as it substantiates the preferred development strategy as being preferable against the reasonable alternatives. The SA examines a number of scenarios for the distribution of growth across the Borough including, critically, a scenario which would meet full housing need but does not involve Green Belt release. This scenario (Growth Strategy 6) demonstrates that no Green Belt release would involve major strategic growth at a number of the Borough's rural settlements including those within the AONB thus demonstrating that some Green Belt release is necessary in order to deliver a sustainable pattern of development. We note that no scenario has been tested that would see full housing need met in areas completely outside the AONB. However, this would clearly involve similar major strategic growth in rural settlements by obviating the contribution of Royal Tunbridge Wells and Southborough to meeting housing needs or else by generating excessive reliance on strategic expansions to Paddock Wood and Tudeley Village, which would most likely need to be enlarged. The SA therefore substantiates the need to deliver some growth within Green Belt and AONB.

We note that failure to meet standard housing need by avoiding the AONB or the Green Belt were accompanied by significant negative scores in relation to the delivery of new housing and economic development, as would be expected. We also noted scenarios that would see significant concentrations of growth within the AONB associated with significantly negative environmental effects particularly as regard to landscape, once more as expected. As a result, the SA supports the key limbs of the preferred development strategy of meeting full housing need and reducing the scale of development within the AONB from the Draft Local Plan as against the reasonable alternatives. However, the preferred spatial strategy (i.e. Growth Strategy 13) would still result in the concentration of significant development within the AONB alongside significant Green Belt release to accommodate a new settlement and the transformational expansion of Paddock Wood. The contribution by urban and brownfield land has also been maximised to the reasonable extent possible. As a result, the preferred development strategy is finely balanced and whilst noting since the Regulation 18 consultation the quantum of development has been decreased in some smaller rural settlements beyond the Green Belt and AONB, it is not practical to do so further without resulting in negative environmental effects and/or compromising the deliverability of the development strategy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., who seek to support the site currently drafted for providing housing and a significant community facilities at Sissinghurst (under Policy STR CRS 1), subject to important modifications which ensures the viable delivery of the site.

[TWBC: Above comment from covering email]

Fernhams Homes Limited (FHL) is promoting land south of The Street, Sissinghurst for residential development. It is welcome that the Pre-Submission Local Plan ("the Plan") proposes to allocate this site for development and it is in this context that FHL wishes to express its general support for the development strategy as set out in Draft Policy STR /CRS1.

The development strategy is based upon meeting, in full, the assessed local housing need for the area along with a "buffer" for flexibility. This is welcome, in principle, since the Plan's evidence base indicates very limited scope to apportion unmet housing need to neighbouring authorities, since neighbouring authorities experience many of the same constraints as Tunbridge Wells.

We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider that a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is unfortunately not positively prepared, is not justified and is therefore not sound or legally complaint.

Also, as a result of this, the development strategy must respond pragmatically but sensitively to the Borough's principal constraints, namely the High Weald Area of Outstanding Natural Beauty (AONB)

and the Metropolitan Green Belt. The need to safeguard these areas must be carefully balanced against the need to achieve a sustainable pattern of growth and, in general terms, undertaking this balancing act has been found by Inspectors to be justified through local plan examinations elsewhere in the country (e.g. Guildford and Central Bedfordshire).

That said, the contribution to development needs from the non-constrained area of the Borough must, within reason, be maximised to limit the extent of Green Belt release and encroachment by new development within the AONB. In Green Belt release terms, this is essential to making the case for “exceptional circumstances” as per paragraphs 136 and 137 of the National Planning Policy Framework (NPPF), and, in AONB terms, to demonstrating that great weight has been provided to conserving and enhancing the AONB and limiting the scale and extent of development within the AONB (NPPF, paragraph 172). Implicitly, the need to maximise areas beyond the Green Belt and AONB has already been acknowledged by the Plan’s proposed transformational expansion of Paddock Wood, which apart from being a sustainable location, also has the advantage of avoiding the AONB and would entail only some Green Belt release. This “avoidance” strategy should run through the Plan’s as a whole in order for it to be sound in its conformity with national policy.

Given the above, FHL welcomes the decision (described at paragraph 4.48 of the Plan’s supporting text) to reduce the level of growth previously proposed in the AONB as being beneficial to the overall soundness of the Plan. In part compensation, the Plan has seen a greater focus on urban intensification and brownfield which has been identified as a lynchpin of the development strategy in Draft Policy STR 1. It must be recognised, however, that urban intensification and brownfield redevelopment have limits and those sites that are available may not be quick to come forward given the myriad of issues that typically affect the deliverability of urban and brownfield land. By way of using urban land to its fullest potential in order to avoid directing growth to the Borough’s more sensitive areas, the Brownfield and Urban Land Topic Paper (January 2021) details a very exhaustive approach to ensuring that these opportunities are maximised whilst ensuring that the level of growth planned through these means is deliverable and realistic.

Combined with the two strategic proposals in the Plan, Tudeley Village and the expansion of Paddock Wood, both of which exist within close proximity to each other and have complex infrastructure and phasing requirements, over-reliance on urban intensification and brownfield sites coming forward could result in a “top-heavy” development strategy unless it is accompanied by a wider dispersal of small to medium sized sites that are capable of yielding housing completions quickly as well as contributing to the viability and vitality of rural areas.

With regards to the trajectory of delivery in relation to the Tudeley village, Nathaniel Lichfield’s and Partners (NLP) - ‘Start to Finish: How Quickly do Large-Scale Housing Sites Deliver’ provides evidence of the speed and rate of delivery of large-scale housing. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, it is considered that housing may evidently be unlikely to be delivered at Tudeley until around 8 years after the granting of planning permission.

In fact, the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic. It is considered that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. The considered over reliance upon Tudeley Garden Village means that if it is not delivered as planned there would not be any flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

As set out above, opportunities for dispersing growth to the rural area generally will be limited by the AONB and the Green Belt which is why Sissinghurst, as a sustainable settlement outside both of these areas, plays such a crucial role in the overall development strategy. We note from paragraph 6.66 of the Development Strategy Topic Paper (February 2021), for instance, that the outcome of the SHELAA

process has been to identify a number of suitable sites at Sissinghurst (February 2021), identifying it as one of the best performing rural settlements in terms of the availability of services and facilities.

Paragraph 7.16 also identifies the concerns expressed at the Draft local Plan stage about unduly and disproportionately large scales of growth at smaller villages, whereas the proposed allocation of sites such as that at land south of The Street, together with improved community facilities, will ensure a more natural and ultimately more sustainable development as it is at a level whereby growth in Sissinghurst can also enable the expansion of services and facilities to improve the sustainability credentials of the settlement which, in addition to being in the spirit of the Planning Practice Guidance and the National Planning Policy Framework, can facilitate delivery of the Plan's strategic objective of improving infrastructure, local services and amenities in line with community needs.

In general terms, we consider allocating a material level of growth at Sissinghurst to be sound and fully supported by the Plan's evidence base. In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. The Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements is not agreed. A vast number of residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

The contribution made by Sissinghurst and the non-AONB rural settlements generally to the development strategy should be expressly recognised in Draft Policy STR 1 as it is an issue of strategic importance to reasonably maximise the contribution of areas outside the AONB toward meeting development needs.

In so doing, drawing upon the evidence base, the development strategy should clearly set out the role and function of each higher order rural settlement, including Sissinghurst, in order to explain more clearly in broad, strategic terms the role each one plays its part in delivering the Plan's overall strategy. For Sissinghurst, we would request express recognition for the important role the settlement will play in meeting housing needs over the plan period in a sustainable location that is not affected by fundamental landscape or Green Belt constraints.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Draft Policy STR 1 or a further policy should identify a clear hierarchy of settlements and growth areas to guide the apportionment of housing and explain how each one will play a part in delivering the Plan's development strategy. We note that Limb 3 of Draft Policy STR 1 already does this in respect of strategic allocations but this should be extended to the Borough's rural settlements alongside an express recognition that development outside the Green Belt and AONB should be maximised in order to safeguard these important designations to the extent consistent with broader sustainability objectives.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land South of The Street, Sissinghurst for development and is seeking changes to Draft Policy STR1. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

FHL supports the general thrust of the Sustainability Appraisal (SA) insofar as it substantiates the preferred development strategy as being preferable against the reasonable alternatives. The SA examines a number of scenarios for the distribution of growth across the Borough including, critically, a scenario which would meet full housing need but does not involve Green Belt release. This scenario (Growth Strategy 6) demonstrates that no Green Belt release would involve major strategic growth at a number of the Borough's rural settlements including those within the AONB thus demonstrating that some Green Belt release is necessary in order to deliver a sustainable pattern of development. We note that no scenario has been tested that would see full housing need met in areas completely outside the AONB. However, this would clearly involve similar major strategic growth in rural settlements by obviating the contribution of Royal Tunbridge Wells and Southborough to meeting housing needs or else by generating excessive reliance on strategic expansions to Paddock Wood and Tudeley Village, which would most likely need to be enlarged. The SA therefore substantiates the need to deliver some growth within Green Belt and AONB.

We note that failure to meet standard housing need by avoiding the AONB or the Green Belt were accompanied by significant negative scores in relation to the delivery of new housing and economic development, as would be expected. We also noted scenarios that would see significant concentrations of growth within the AONB associated with significantly negative environmental effects particularly as regard to landscape, once more as expected. As a result, the SA supports the key limbs of the preferred development strategy of meeting full housing need and reducing the scale of development within the AONB from the Draft Local Plan as against the reasonable alternatives. However, the preferred spatial strategy (i.e. Growth Strategy 13) would still result in the concentration of significant development within the AONB alongside significant Green Belt release to accommodate a new settlement and the transformational expansion of Paddock Wood. The contribution by urban and brownfield land has also been maximised to the reasonable extent possible. As a result, the preferred development strategy is finely balanced and whilst noting since the Regulation 18 consultation the quantum of development has been decreased in some smaller rural settlements beyond the Green Belt and AONB, it is not practical to do so further without resulting in negative environmental effects and/or compromising the deliverability of the development strategy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Fernham's control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury

Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.1.6 Fernham Homes hope to work with the Council to agree a revised proposal. In the interim, these comments explain why we are concerned about the manner in which some sites have been omitted from the plan making process.

1.2 Land at Gate Farm, Hartley Road, Hartley (Cranbrook)

1.2.1 The site to which this representation relates is located on the northern side of Hartley Road/A229 and is approximately 1.48 hectares in area. It is located to the south west of Cranbrook outside built confines but adjacent to the built up area of Hartley.

[TWBC: to view site plan see full representation attached].

1.2.2 The land sits immediately adjacent to residential development to the north and commercial buildings are located on the west side of Glassenbury Road. The site falls entirely within the High Weald Area of Outstanding Natural Beauty AONB.

1.2.3 There are several listed buildings in the vicinity of the site, including:

(i) Hartley Gate Farmhouse (Grade II listed);(ii) Hartley Farmhouse (Grade II listed);(iii) Bull Farm House (Grade II listed); and(iv) Barn 50 Yards North of Bull Farmhouse (Grade II listed).

1.2.4 The surrounding area is characterised by the settlements of Hartley and Cranbrook, residential development with in and around those settlements, commercial developments, farmsteads and agricultural buildings as well as open agricultural land.

1.2.5 To the northeast are residential properties. Opposite the site is the well-established Hartley Dyke Commercial Centre, consisting of Juniors Day Nursery, the Hartley Dyke Coffee House and Farm Shop and several other commercial premises.

1.2.6 In terms of public transport, there are two bus stops located approximately 160m to the east of the site providing a service to Maidstone Town Centre, Loose, Staplehurst, Cranbrook and Hawkhurst. Staplehurst, approximately 10km to the north of the site, provides a regular train service to London, with up to 3no. trains per hour in peak periods (travel time under 1 hour to London Charing Cross and Cannon Street).

1.2.7 The site is not subject to any wider policy designations. The Environment Agency mapping also confirms that the site does not fall within a flood risk zone.

1.2.8 A high pressure water main and overhead power lines run through the site and represent design constraints.

1.2.9 The Hartley Road frontage of the site has been subject to previous smaller scale development proposals as follows:

- 84/00175/OUT - Outline application for 8 semi detached dwellings -Refused; and• 96/00283/FUL - 3 Detached dwellings – Refused. • 17/00795/FULL - Demolition of four derelict agricultural buildings and construction of four detached dwellings with associated parking, landscaping and access from Hartley Road (Withdrawn 08/02/18 following publication of officer's recommendation to refuse in advance of Planning Committee meeting).

1.2.10 The area immediately east of the site, between the built up area and Hartley Gate Farmhouse, has been subject to a planning appeal (APP/M2270/W/18/3203543) for the erection of 8 homes. The appeal was dismissed, but in doing so the Inspector narrowed the sole issue to the effect of the proposed vehicular access on highway safety (i.e. it was suitable in all other respects). The Inspector endorsed the principal of development and had no issue with the impacts of that scheme on the AONB, the character and appearance of the area and on settlement morphology.

1.2.11 Given the suitability of Fernham's land, an outline planning permission was progressed for 27 new homes and registered under Tunbridge Wells planning application reference 19/02170/OUT. However, this application was refused by Tunbridge Wells Borough Council for seven reasons:

(1) The development would cause significant harm to the rural character of the area, would have more than a minimal impact on the landscape character of the locality, would have a detrimental impact on the landscape setting of Cranbrook and would fail to conserve and enhance the special character of the High Weald Area of Outstanding Natural Beauty. It is therefore contrary to Policies LBD1, EN1 and EN25 of the Tunbridge Wells Borough Local Plan 2006, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy 2010, the aims and objectives of the Borough Landscape Character Area Assessment 2017 and the National Planning Policy Framework 2019(2) The application fails to demonstrate that safe and suitable access to the site can be achieved for all users. It is thereby in conflict with Part 9 of the National Planning Policy Framework 2019, and saved policy TP4 of the Tunbridge Wells Local Plan 2006.(3) There is insufficient evidence to demonstrate that the proposal can result in a net gain in biodiversity. The proposal is thus contrary to Para 170 the National Planning Policy Framework 2019(4) The proposal would harm the setting of nearby listed buildings. It is not considered that there are sufficient public benefits, or any other material considerations, that outweigh this harm. The proposal is thus contrary to saved policy EN1 of the Tunbridge Wells Borough Local Plan 2006, Core Policy 4 of the Tunbridge Wells Borough Core Strategy 2010 and the National Planning Policy Framework 2019(5) The proposal would not provide developer contributions towards Secondary Education, Youth Provision and the Cranbrook Hub projects to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019, the Planning Practice Guidance, Core Policy CP1 of the Tunbridge Wells Core Strategy 2010 and Policies CS4 and R2 of the Tunbridge Wells Borough Local Plan 2006.(6) The proposal would not provide affordable housing within the proposed development. It would therefore conflict with the National Planning Policy Framework 2019, Core Policy 6 of the Tunbridge Wells Core Strategy 2010 and the Affordable Housing Supplementary Planning Document.(7) The proposal would not provide developer contributions towards new single premises for the three General Practices located in Cranbrook to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019 and Core Policy CP1 of the Tunbridge Wells Core Strategy 2010.

1.2.12 Not only did the Council refuse this application, but in seeking to defend the appeal the site was also removed from the Local Plan pre-submission draft.

1.2.13 An appeal was subsequently lodged (Appeal Ref: APP/M2270/W/20/3247977) during the life of which reasons for refusal 5 to 7 were resolved prior to determination (through the provision of a suitably worded Section 106 Legal Agreement). Reason for refusal 3 was also overcome as a result of providing further ecology information and a further commitment within the Section 106.

1.2.14 The main issues for the appeal (and so wider site suitability) were narrowed to:

(1) The impact of the proposed development on the character and appearance of the area including landscape character and the AONB;(2) Highways safety; and(3) Heritage harm.

1.2.15 The appeal was dismissed in February 2021, but in doing so the Inspector provided clear findings on a number of key matters that were in dispute and formed the basis for deleting the allocation. We summarise these findings below. A full copy of the appeal is included as Appendix 1.

Heritage

1.2.16 Paragraphs 50 to 64 directly responded to the heritage evidence, with the Inspector ultimately endorsing the appellant's evidence that heritage harm would be restricted to Hartley Gate Farmhouse only and in the less than substantial range. The Inspector rejected harm to wider assets. At paragraph 150 he concluded:

'Given the relatively low level of harm I have found in relation to the farmhouse and the significant housing and other positive attributes I have identified from the scheme, I find the heritage harm arising would be outweighed by the public benefits identified. Accordingly, the Framework does not provide a clear reason for refusing the development proposed in this specific regard'.

1.2.17 In our opinion, the Inspector provided a very clear conclusion that reason for refusal 4 was not a reasonable basis to withhold consent, nor did it provide a clear basis for disengaging the presumption in favour of sustainable development. As such, we consider the over estimation of heritage impacts contributed to an otherwise suitable allocation being omitted from the pre-submission plan.

Access and Highway Safety Matters

1.2.18 Paragraphs 65 to 88 of the appeal directly responds to the highway evidence. The Inspector's summary of highway matters stated:

'86. The A229 is a busy classified road. It reflects the accompanying dangers and relatively harsh pedestrian environment that might be expected, and improvements can always be made. Nevertheless, the evidence presented demonstrates the local highway network has no particular design flaws, and is capable of withstanding the relatively modest increase in vehicle and pedestrian movements that would arise from the scheme without incurring further undue additional risks or inconvenience. I also note possibilities for further detailed refinements to the scheme, particularly in terms of facilities for pedestrian movement, and which were discussed at the Inquiry in relation to a possible planning condition should the appeal be allowed.

87. The Framework requires that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. The evidence against the proposed scheme falls significantly short of such a threshold.

88. I therefore conclude that the proposal would provide safe and suitable access for all users and would not be contrary to Policy TP4 of the Local Plan to the extent that it seeks, amongst other things, to ensure that proposals provide a safely located access with adequate visibility and that the traffic generated by the proposal would not compromise the safe and free flow of traffic or the safe use of the road by others'.

1.2.19 In our view, the Inspector provided a very clear conclusion that reason for refusal 2 was not supportable nor a reasonable basis to withhold consent and that the access was suitable for the quantum of development proposed. As such, we consider the dismissal of the site on highways grounds also wrongly contributed to the site being omitted from the pre-submission plan.

Location

1.2.20 At paragraph 117 the Inspector confirmed that the scheme enjoys a moderately sustainable location. Paragraph 124 also acknowledges that the Framework requires that, to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities and that planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. The scheme was deemed to be consistent with this aim and so modest weight was attached to these economic factors as a benefit.

Major Development

1.2.21 At paragraph 155 the Inspector confirms that the appeal scheme was not 'major' development.

Landscape Impact

1.2.22 Having regard to the above, reasons for refusal 2 to 7 were either overcome or dismissed by the Inspector. The only matter between parties relates to reason for refusal 1 and the associated impact upon the AONB.

1.2.23 In considering the conclusions, at paragraph 42, the Inspector is clear that the site may have potential for reintroduction of some sensitive built form, albeit a better balance has to be struck in relation to the legibility and distinctiveness of the AONB.

1.2.24 At paragraph 49 he concludes that the scheme would, by virtue of the extent of built development proposed (rather than principle) would be significantly harmful to the character and appearance of the appeal site and its surroundings.

1.2.25 In summary, all of the above commentary provides a clear basis to suggest that a revised scheme could integrate within the AONB setting. The Inspector stopped well short of concluding the site was unsuitable for development per se and as such we consider the deletion of the site, and subsequent impact it has had on evidence base and thus it is neither justified nor positively prepared.

1.2.26 We explain the wider relevance of the site being wrongly omitted in the context of the wider strategy within the subsequent sections of this representation.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

Development Strategy and Strategic Policies (Policy STR1)

1.3.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.3.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.3.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.3.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.3.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: to view copy of Local Plan Figure 5 Key Diagram see full representation attached].

1.3.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 duplicated here - see full representation attached]

1.3.18 By way of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.3.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.3.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.3.21 The full proposed distribution of development is set out below.

[TWBC: to view copy of Local Plan Table 4 Distribution of housing allocations see full representation attached].

Response

1.3.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider the review process should surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.3.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have

concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.3.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.3.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, housing is unlikely to be delivered at Tudeley until circa 8 years after the first planning permission is approved.

1.3.26 After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.3.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council, with minimal units being delivered within the current plan period.

1.3.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.3.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.3.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock Wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases we delivered at lower rates given the need to front load infrastructure.

1.3.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

1.3.32 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.3.33 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.3.34 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites such as our client's land should be added to offset the loss of the housing relied upon from Tudeley.

1.3.35 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.3.36 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.3.37 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.3.38 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

1.3.39 As explained, our client's land is suitable, available and achievable and was, in our view, removed as response to our client's planning appeal rather than as a result of and robust planning evidence. Indeed, the appeal process itself made clear that six of the seven reasons for refusal could not be substantiated, whilst impact on the AONB could be mitigated with an alternative scale and design approach. In short, our client's site represents a suitable location to reinsert a site that will deliver in the short term.

Green Belt vs AONB Release

1.3.40 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.3.41 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.3.42 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.3.43 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.3.44 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.3.45 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in

achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.3.46 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than four times double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.3.47 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.3.48 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.3.49 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.3.50 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;

(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.3.51 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.3.52 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met. For example, on the sites like our clients that were wrongly omitted.

1.3.53 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.3.54 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.3.55 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.3.56 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.3.57 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.3.58 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.3.59 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.3.60 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.3.61 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.3.62 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.3.63 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.3.64 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas so as to preserve the status quo in the more affluent villages whilst not delivering housing of all tenures throughout the entire borough meeting the borough wide housing need.

Housing Delivery

1.3.65 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.3.66 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.3.67 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced

legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.3.68 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: to view table of housing completion rates 2010 to 2015 see full representation attached].

1.3.69 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times to ensure the new plan is sufficiently flexible.

1.3.70 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: to view table of housing completion rates 2015 to 2020 (statement of common ground) with table note 1 The completions data for 22019/20 is yet to be formally published until the next Authority Monitoring Report 2020 is complete. However, the number of confirmed housing completions has been provided by the LPA as 474 for this latest monitoring year.see full representation attached].

1.3.71 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.3.72 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.3.73 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.3.74 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.3.75 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.3.76 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: to view table of information extracted from the LPA's published supply statements see full representation attached].

1.3.77 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.3.78 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.3.79 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.3.80 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.3.81 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.3.82 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.3.83 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.84 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely immediately deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.84 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely immediately deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Respondent's Name and/or Organisation	Friends of Tudeley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 1 The Development Strategy	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The spatial strategy is not justified and not sustainable, and therefore the plan is unsound. The review of options available to TWBC (including the omission of one of the strategic sites) and a proactive search for settlement edge sites and previously developed/urban sites would have sustainability benefits. This would reduce the reliance on large sites to deliver housing and avoid the need to rely on a new settlement in the Green Belt. The sustainability impacts of the proposed Tudeley Village are significant and it is quite clear that the Sustainability Appraisal process was not the key driver for selecting the spatial strategy.

A detailed description of errors in the Development Strategy is in Section 4.5 of the attached report by Graham Simpkin Planning.

TWBC has not identified the most appropriate strategy to meet the identified housing need. The value of growth option 7 forming part of the preferred development option, perhaps with a large urban extension, was dismissed without adequate assessment. It could contribute to housing needs in a manner that is sensitive to the settlements at which it is located. The proposed strategy which includes a new settlement at Tudeley Village is not justified, nor consistent with achieving sustainable development.

If TWBC had fulfilled their Duty to Cooperate, it is possible that the proposed new settlement at Tudeley Village (and associated harm to the Green Belt) would not be required. This demonstrates the importance of discussing this issue with nearby Local Authorities with determination. Demonstrating that such discussions have occurred is essential to the Exceptional Circumstances case for alterations to Green Belt boundaries.

A detailed description of the issues caused (and opportunities missed) by TWBC's approach to Objectively Assessed Need is in Section 4.3 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal.

The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

If you would like to attach a file in support of your comments, please upload it here. [GSP Friends of Tudeley Final.pdf \(4\)](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided into Policy STR/SS1 (PSLP_2061), Vision and Strategic Objectives (PSLP_2062), Policy STR1 (PSLP_2063), Policy STR4 (PSLP_2065) and Development Management Policies (PSLP_2075)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies

1.5.9 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.5.10 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Mr & Mrs Garthwaite
Question 2	

Agent's Name and Organisation (if applicable) Kember Loudon Williams Ltd

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: For further comments by K LW Ltd. on Policy PSTR/BM 1 please see Comment Number PSLP_507]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy STR1. The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. In addition, the reliance on large strategic sites is going to result in the trajectory not being able to deliver sufficient housing early in the Plan period and so additional smaller sites are necessary to ensure delivery and so make the Plan effective.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy.

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in Sevenoaks District Council was unclear.

However, following the failure of their High Court challenge, Sevenoaks District Council is now required to begin the preparation of their Local Plan again. Since NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within Sevenoaks District. Not to do so would be contrary to NPPF policy and in our view this suggests that additional sites must be identified.

Given the stage reached in the Tunbridge Wells Local Plan process, it would be unreasonable for this Council to not assist Sevenoaks District in meeting part of its housing need. Paragraph 4.16 of the draft Local Plan postulates that Sevenoaks may have an unmet need of 1900 dwellings. Paragraph 4.18 also notes that sites may need to be greater in size to enable delivery of the numbers predicted. Paragraph 4.53-4.54 then explains that sites and other supply with sufficient capacity for 13,059 to 13,444 dwellings has been found. The mid point gives a buffer of 1,000 dwellings above the 12,200 requirement.

Notwithstanding the buffer and the situation in Sevenoaks, it is the case that Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan. It is a neighbouring authority and subject to constraints relating to Ashdown Forest and the Habitat Regulations. Since it is within the same housing market area, it may be necessary for Tunbridge Wells to consider meeting some of its unmet housing need. In fact, following the rejection by the Local Plan Inspector of Wealden's Submission Plan, Wealden have re-wound their Plan preparation process and started from the beginning with an issues and options consultation. It is likely that this Plan is several years from fruition.

There is also sufficient uncertainty with Tonbridge and Malling's Local Plan and this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. A shock to the local housing market seems likely with supply side constraint pushing up house prices. In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer. Tunbridge Wells Borough Council cannot legitimately argue against this strategy having removed housing allocations from the Regulation 18 draft Local Plan that were perfectly acceptable. We refer the Local Plan Inspector to Policy AL/BM2 of the Regulation 18 Draft Local Plan and other representations by our client, which seeks to 'reinstate' this housing allocation in Matfield.

In relation to delivery of new homes, we are of the view that additional smaller housing sites are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional smaller housing sites should be allocated in different locations. Since NPPF seeks to boost the supply of housing and there is nothing in the guidance preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. If over provision occurs, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve. Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines.

[TWBC: For table please see full representation attached as a supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify STR1 to increase housing numbers to meet the unmet needs of Sevenoaks DC and other adjoining authorities. Alter the Policy to identify a need for additional smaller sites. The policy may need to increase by a further 2-3,000 more dwellings.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The landowner wishes to be present to test the Council's strategy regarding housing numbers, the trajectory and the delivery of sites.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr & Mrs Gear in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr and Mrs Gear own Uphill, Benenden, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/BE 1). It is an established residential dwelling situated on the outer edge of the village. It lies outside of the defined 'limits to built development' (LBD), but adjacent to a predominantly residential area close to village services

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it is otherwise free from any restrictive planning designations.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site is suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons set out within this representation.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

[TWBC: for section 1.3 response to Vision and Objectives see separate response PSLP_452].

1.4 Development Strategy and Strategic Policies (Policy STR1)

1.4.1 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.2 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.3 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.4.4 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.5 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: see full representation attached to view copy of Figure 5 Key Diagram]

1.4.6 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached]

1.4.7 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.8 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.9 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.10 The full proposed distribution of development is set out below.

[TWBC: to view copy of Table 4 Distribution of housing allocations see full representation attached].

Response

1.4.11 Our client agrees that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.12 In respect of the wider strategy, our client supports the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.4.13 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible.

1.5 AONB Release

1.5.1 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.5.2 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.5.3 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.5.4 With above criteria in mind, our clients consider there to be clear evidence of an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.5.5 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.5.6 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.5.7 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.5.8 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.5.9 Given the above constraints, planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the AONB is patently met and

with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.6 Housing Delivery

1.6.1 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.6.2 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.6.3 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area. Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table of housing completion rates 2010 to 2015 see full representation attached].

1.6.4 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.6.5 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table of housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]. Tablenote: 1 The completions data for 2019/20 is yet to be formally published until the next Authority Monitoring Report 2020 is complete. However, the number of confirmed housing completions has been provided by the LPA as 474 for this latest monitoring year.

1.6.6 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.6.7 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that sites like our client's land are needed.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Mr and Mrs B Gear in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Benenden, but the detailed policy requires modification if the site is to be deemed deliverable and the allocation is to be found part of a sound strategy.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_452 (Vision and Objectives) and PSLP_454 (Section 5: Benenden - Policy AL/BE1)]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR1: The Development Strategy

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction

- 1 These representations are submitted on behalf of Gleeson Strategic Land (Gleeson) who have previously made representations to the Council at all the 'plan making' stages of the new Borough wide Local Plan. Gleeson are concerned that notwithstanding these previous representations, the Council appears not to have taken them into account in producing the latest 'Pre-Submission' stage of the Local Plan.
- 1 The previous representations submitted on behalf of Gleeson related to the Council's proposed Development Strategy, the Council's Green Belt Study, Local Green Space Assessment and Strategic Housing and Employment Land Availability Assessment (SHELLA), which taken together, related to the promotion of an 'omission housing site' at Sandown Park on the northern side of Pembury Road at Royal Tunbridge Wells (RTW) – which is Green Belt land this in now the subject of a draft designation for Local Open Space (under Policy EN15) as shown on Inset Map 1 of the Pre-Submission draft version of the Local Plan (see the extract below).
[TWBC: for extract image, see full representation attached].
- 1 These further representations reflect Gleeson's continuing concerns that the Council has failed to properly consider the opportunity and benefit of releasing part of this land to contribute to the Council's housing requirement. Instead, the Council has unreasonable and without justification,

chosen to allocate the land as Local Open Space (which is the subject of separate representations submitted on behalf of Gleeson).

- 1 In order for these latest representations to be manageable as part of the Local Plan Examination, they have been submitted under the same headings as previously (i.e. in response to the Council's Development Plan Strategy, Green Belt Study, Local Open Space Assessment and SHELAA) but need also to be considered together to paint the wider picture of Gleeson's concerns about the way the draft local Plan has been produced.
- 1 These specific representations are focussed upon objections to the Council's proposed Development Strategy set out in draft Policies STR1 and STR/RTW1 and Policy Map 1 for Royal Tunbridge Wells and Southborough.

Gleeson's case for objecting to the draft Development Strategy

- 1 The Borough Council's proposed Development Strategy for the Borough is set out in draft Policy STR1 (Development Strategy) of the Pre-Submission Draft version of the Borough Local Plan (2020 – 2038) published in March 2021. The development strategy for Royal Tunbridge Wells and Southborough is set out in draft Policy STR/RTW1 and development proposals for this main 'regional hub' settlement are shown on Inset Map 1. Gleeson object to these draft policies in being fundamentally flawed in failing to have proper regard and weight to all available options to accommodate future growth and in particular, the available Gleeson site at Sandown Park at Royal Tunbridge Wells (RTW). For the reasons examined in these representations, it is Gleeson's case that this land is not only available but also it is suitable for housing use in a highly sustainable edge of settlement location and that as such it should be allocated for housing and open space use as a revision to Inset Map 1 of the Plan.
- 1 Gleeson welcome the Council's intention to meet in full the Borough's assessed housing requirement over the period 2021 – 2038 amounting to 12,200 additional dwellings (at an average of 678 dwellings per year). Based upon the Housing Land Supply. The Council's Housing Land Supply Assessment at 31st March 2020, confirms that based upon this requirement, a further 7,221 dwellings will be needed up to 2038 (taking into account existing housing allocations that remain unimplemented (276 dwellings) but excluding any provision for unmet housing need for an additional 1,900 dwellings required in neighbouring Sevenoaks District (referred to in paragraph 4.12 of the draft Plan).
- 1 Paragraph 4.43 of the draft Plan acknowledges that;
4.43 It is found that, even promoting all suitable SHELAA sites for allocation in the Local Plan, the borough could meet only a fraction of its housing need without the provision for strategic sites, namely the substantial expansion of Paddock Wood (including land at east Capel) and the creation of a new garden settlement at 'Tudeley Village'. With these proposals, the Local Plan can meet the housing need in line with the NPPF's standard method.
- 1 While it is undoubtedly the case the unmet part of the future housing requirement could not met without releasing Green Belt land at Paddock Wood and at Tudely Village, the main focus should rightly be upon making the best use of previously developed and underutilised land within the existing 'Limits to Development Boundaries' (LBDs) of settlements, but also in ensuring that all potentially suitable housing sites around the Borough's main regional hub settlement of RTW have first been properly examined and assessed so as to minimise the release of land in less sustainable Green Belt and other locations elsewhere.
- 1 Furthermore, when producing the initial 'Issues and Options' consultation document back in May 2017, the Council identified six possible options for meeting such needs or indeed, a combination of such options. The Distribution of Development Topic Paper (September 2019) confirms (at paragraph 5.5) that the option identified to potentially deliver development along the A21 on the eastern side of RTW as a 'Growth Corridor' was by far the most supported of the options by respondents (60%). The Council's current Core Strategy Development Plan Document adopted in June 2010 recognises RTW (together with Southborough) as the 'Main Urban Area' and in being by far the most sustainable settlement in the Borough with a wide range of facilities and which the former South East Plan (May 2009) recognised as performing an important role as a 'Regional Hub'. Indeed, the former South East Plan identified a need to review Green Belt land around RTW and Southborough as a potential location to accommodate future development needs in a sustainable manner.
- 1 Moreover, notwithstanding that RTW (with Southborough) is by far the largest and most sustainable settlement within the Borough, throughout the stages of the Local Plan production, there has been no joined-up approach in assessing housing potential on sites around the eastern side of

RTW that are also located within the potential A21 Growth Corridor, and this potential has not been assessed or weighed against alternatives. Instead, the Council's Green Belt study (Final Report dated July 2017) has in the main, ruled out the release of Green Belt land for housing purposes on the eastern side of RTW because of the claimed effect of this being 'high' when assessed against Green Belt Policy functions set out in paragraph 134 of the National Planning Policy Framework (NPPF) February 2019.

- 1 A clear example of this is the land being promoted for housing purposes by Gleeson at Sandown Park on the northern side of Pembury Road at RTW. Gleeson's proposals are shown on an illustrative masterplan (Appendix 1 attached) submitted to the Council previously, which should be considered in conjunction with other detailed supporting documents submitted as part of Gleeson's other representations in relation to the Pre-Submission draft Local Plan.
- 1 While this proposal would result in the removal of some 3 hectares of Green Belt land in order to provide 70 – 80 dwellings, this can be achieved in the form of a minor urban extension that would round off development within this eastern part of Tunbridge Wells. This can also be achieved without giving rise to any harm to the extent of the retained Green Belt land that would continue to prevent the urban coalescence of Tunbridge Wells with Pembury, which is located on the opposite side of the A21 to the east.
- 1 As part of Gleeson's proposals, some 3.3 hectares of associated land located between the proposed housing allocation and the A21 would be retained within the Green Belt, but managed and enhanced by new structural landscape planting and set aside for informal recreational use. This would therefore, not only retain the land's Green Belt function, but would also make compensatory strengthening improvements by landscape enhancement and future management, as well as providing new public access on informal open recreational space where there is none at present.
- 1 This proposal, which Gleeson originally presented to the Council back in March 2018, would be similar to the form of the proposed housing allocations elsewhere at RTW with land released from the Green Belt at proposed sites AL/RTW 5, AL/RTW 14 and at AL/RTW 19. The Council has not put forward any compelling justification as to why it would not be sustainable or in line with the Council's draft Development Strategy Policies STR1 and STR/RTW1.
- 1 For reasons set out in other current representations submitted on behalf of Gleeson, the Council's July 2017 Stage Two Green Belt Study is seriously flawed in the way that it has assessed the potential of the land for housing purposes. This is because the Council's Study assumes the removal of **all** of the Green Belt land between the current built up confines of RTW and the A21 Pembury by-pass and by concluding that in doing so the degree of harm would be 'high'.
- 1 As the Council was already aware from previous consultations with Gleeson in relation to this site, this **is not what was being proposed** and the Gleeson scheme has not therefore been assessed (or indeed reassessed) in any fair, reasonable or proportional way, nor has it been assessed against the much greater potential harm of removing land from the Green Belt at a wholly unsustainable location at Tudeley Village (which has also been assessed in the Green Belt Study as also having a 'High' adverse impact).
- 1 The Council's proposed Development Strategy should therefore, be reviewed in order to properly and fairly reassess the full potential of the releasing Green Belt land around RTW within the A21 corridor, as one of the most sustainable options to help meet the housing requirement, **before** considering and assessing other less sustainable options such as removal of the land from the Green Belt at other less sustainable locations beyond Tunbridge Wells.

List of Appendices

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Include the omission site for housing within the RTW Limit to Built Development for the reasons set out in the representations attached

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To present the case on behalf of Gleeson Strategic Land

If you would like to attach a file in support of your comments, please upload it here. [PSLP_208-209_TCPS for Gleeson Strategic Land_SI-1.pdf](#)

If you would like to attach a file in support of your comments, please upload it here. [PSLP_208-209_TCPS for Gleeson Strategic Land_SI-2_Appendix 1.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Gold Property Development Ltd
Question 2	
Agent's Name and Organisation (if applicable)	Future Planning & Development Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR/SS 1, STR/SS 3 and PSTR/LA 1 – see Comment Numbers PSLP_1555, PSLP_1647, PSLP_1648 and PSLP_1649. Attachments uploaded as supporting information]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Future Planning and Development act on behalf of our client, Gold Property Developments Ltd, in respect of their site, Lamberhurst Winery, Lamberhurst Down, Lamberhurst. This site is being promoted for residential development; it being sustainably located on the edge of the village of Lamberhurst.

The proposed submission version of the Local Plan identifies the requirement for additional land for housing in Policy STR1 and sets out a strategy for meeting this need. The proposed approach principally relies upon the allocation of large scale housing sites arising from the strategic urban expansion of Paddock Wood and the proposed Tudeley Village new settlement. Other than Tunbridge Wells, the Plan proposes only limited housing allocations for the other centres in the Borough, as set out in Table 4 - Distribution of housing allocations.

While it is acknowledged that paragraph 72 of the NPPF supports the new settlements and major urban extensions in order to achieve the supply of a large number of new homes, this must be brought forward in tandem with smaller scale development that is delivered more flexibly and quickly. It is our view that the Council's proposed approach to delivering the homes needed by the Borough is fundamentally unsound, as it is entirely reliant on a small number of volume housebuilders to bring forward development at an unrealistic delivery rate. By contrast, a more even distribution of allocated sites across the Borough, which supports and enhances existing communities, would ensure a more

successful and continuous delivery of homes across the Borough and throughout the Plan period. Small and medium sized sites, usually brought forward by SME developers, rather than volume housebuilders, should play an important role in delivering housing within the Borough, but the proposed delivery strategy promotes the opposite of this.
