Question 1

Respondent's Name and/or Organisation Nick Daines CPRE (Sussex)

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 11

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	It is not justified
	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy EN 11

The Regulation 19 Habitats Regulations Assessment (HRA) undertaken by AECOM on behalf of Tunbridge Wells Borough Council (TWBC) concludes at page 27, that:

“Therefore, it can be concluded that there will be no adverse effects upon the integrity of Ashdown Forest SPA [Special Protection Area] as a result of increased recreational pressure resulting from the Borough of Tunbridge Wells Local Plan.”

Although the HRA considers that development within the Borough may give rise to a likely significant effect to the conservation objectives of the Special Protection Area (SPA) through increased visitor pressure, the appropriate assessment within the HRA has ruled out an adverse effect due to the implementation of mitigation/avoidance measures in the form of Suitable Alternative Natural Greenspace (SANG) and Strategic Access Management and Monitoring (SAMM).

Paragraph: 003 Reference ID: 65-003-20190722 in the Government Guidance Appropriate assessment
- GOV.UK (www.gov.uk) on appropriate assessment states:

“An appropriate assessment must contain complete, precise and definitive findings and conclusions to ensure that there is no reasonable scientific doubt as to the effects of the proposed plan or project.”

Although CPRE (Sussex) support much of the information pertaining to the SPA in the HRA, they do not consider the conclusion of no adverse effect is justified due to a complete lack of evidence to support the effectiveness of the proposed mitigation/avoidance measures comprising SANG and SAMM. It is not that the findings of the HRA with regard to the SPA do not reach the required threshold of being beyond reasonable scientific doubt, there is a total lack of complete, precise and definitive findings to support the conclusion of no adverse effect.

The HRA contains a considerable volume of text leading up to the conclusion of a potential adverse effect from additional visitor pressure, but then states that Policy EN 11 will be adopted. This policy includes the requirements for developer contributions for SAMM and SANG provision for sites within the 7 km zone, but nowhere within the appropriate assessment is any information whatsoever to confirm the effectiveness of these proposed measures.

Contained in Policy EN 11 is the requirement for:

"Alternative provision(s) for mitigation to address the impact of visitors will only be considered where it can be demonstrated that it will be effective and deliverable over the lifetime of the development."

Thus, the policy requires that any alternative mitigation proposals should demonstrate their effectiveness before they will be considered despite there being no information provided in the appropriate assessment to demonstrate the effectiveness of SANG and SAMM.

Furthermore, TWBC's mitigation/avoidance measures are only intended to address the impact of recreational pressure from development within 7km of the SPA. Within this zone, TWBC does not propose to include any housing allocations and only considers that some windfall development may occur. But data contained within the HRA indicates that a large proportion (80%) of visitors to the SPA from TWBC live outside this 7 km zone indicating that visitors from development beyond this distance could increase the current pressure and result in an adverse effect. Thus, policies that the HRA currently

screens out as not likely to have a significant effect as their development is outside the 7km zone, could well have a significant effect once a correct interpretation of the results of the visitor survey is undertaken.

The 2016 visitor survey relied upon by the HRA identified that 3% of the total number of dog walkers visiting the SPA came from three settlements in TWB all outside the 7km zone. Furthermore 75% of the visitors to the SPA from TWB came from these same three settlements outside the 7km zone. In the penultimate paragraph in Section 5 of the HRA titled Appropriate Assessment, it is stated:

“Whilst there is strong scientific evidence to conclude that TWB’s contribution to recreation in Ashdown Forest is insignificant, policy EN 11 ensures that the effect of any net new housing within 7km will be subject to appropriate mitigation, according to the SAMM and SANG approach adopted by surrounding authorities”

It is clear to CPRE (Sussex) that 3% of the total number of dog walkers visiting the SPA, 3% of the total number of frequent visitors and 5% of the total number of visitors interviewed as coming from TWB, cannot be considered as insignificant. However, this incorrect conclusion of insignificance is possibly the reason whereby any increase in visitors from outside the 7km zone has been incorrectly screened out. Quite obviously, with around 1,500 new dwellings being proposed for Royal Tunbridge Wells under Policy STR/RTW 1, plus further dwellings arising from intensification and windfalls, based upon the findings of the visitor survey, it is highly likely that a proportion of these new residents will visit the SPA and potentially contribute to an adverse effect. But bizarrely, this impact does not figure in the appropriate assessment as it has been incorrectly screened out.

Thus, the HRA is deficient in both identifying the area from which additional visitor pressure could arise and proposing avoidance/mitigation measures which are unsupported by any analysis or data confirming their effectiveness. Despite the conclusion reached by the HRA in regard to the SPA, this conclusion of no adverse effect is contrary to the requirements of the Habitats Directive, the Habitats Regulations and Government Guidance meaning that the HRA is not justified and unsound.

Without an HRA conforming to the Regulations and correctly concluding no adverse effect to the SPA, Policies EN 11, STR 1 and ED 1 that rely on the conclusions of the appropriate assessment in the HRA are not justified and cannot be taken forward into the new plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The appropriate assessment within the Regulation 19 HRA is defective thereby failing to support Policy EN 11.

To rectify this lack of justification, the appropriate assessment should be revised to:

1. Correctly identify the areas of Tunbridge Wells Borough from where additional visitor pressure to the SPA may arise from development, and
2. Provide avoidance/mitigation measures to prevent any increase in visitor pressure arising from development within the submission local plan that are supported by complete, precise and definitive findings and conclusions to ensure that there is no reasonable scientific doubt as to the effects of the proposed plan on Ashdown Forest SPA.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is anticipated that both TWBC and Natural England will not agree with our view that the appropriate assessment within the HRA is defective with regard to Ashdown Forest SPA. Our presence at the hearing will enable us to explain more fully to the Inspector our reasons for concluding the assessment is defective and we will be able to challenge any defence of parts of the assessment.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	CPRE Sussex
---------------------------------------	-------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN11

Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	It is not justified
	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Regulation 19 Habitats Regulations Assessment (HRA) undertaken by AECOM on behalf of Tunbridge Wells Borough Council (TWBC) concludes at page 27, that:

“Therefore, it can be concluded that there will be no adverse effects upon the integrity of Ashdown Forest SPA [Special Protection Area] as a result of increased recreational pressure resulting from the Borough of Tunbridge Wells Local Plan.”

Although the HRA considers that development within the Borough may give rise to a likely significant effect to the conservation objectives of the Special Protection Area (SPA) through increased visitor pressure, the appropriate assessment within the HRA has ruled out an adverse effect due to the implementation of mitigation/avoidance measures in the form of Suitable Alternative Natural Greenspace (SANG) and Strategic Access Management and Monitoring (SAMM).

Paragraph: 003 Reference ID: 65-003-20190722 in the Government Guidance Appropriate assessment - GOV.UK (www.gov.uk) on appropriate assessment states:

“An appropriate assessment must contain complete, precise and definitive findings and conclusions to ensure that there is no reasonable scientific doubt as to the effects of the proposed plan or project.”

Although CPRE (Sussex) support much of the information pertaining to the SPA in the HRA, they do not consider the conclusion of no adverse effect is justified due to a complete lack of evidence to support the effectiveness of the proposed mitigation/avoidance measures comprising SANG and SAMM. It is not that the findings of the HRA with regard to the SPA do not reach the required threshold of being beyond reasonable scientific doubt, there is a total lack of complete, precise and definitive findings to support the conclusion of no adverse effect.

The HRA contains a considerable volume of text leading up to the conclusion of a potential adverse effect from additional visitor pressure, but then states that Policy EN 11 will be adopted. This policy includes the requirements for developer contributions for SAMM and SANG provision for sites within the 7 km zone, but nowhere within the appropriate assessment is any information whatsoever to confirm the effectiveness of these proposed measures.

Contained in Policy EN 11 is the requirement for:

"Alternative provision(s) for mitigation to address the impact of visitors will only be considered where it can be demonstrated that it will be effective and deliverable over the lifetime of the development."

Thus, the policy requires that any alternative mitigation proposals should demonstrate their effectiveness before they will be considered despite there being no information provided in the appropriate assessment to demonstrate the effectiveness of SANG and SAMM.

Furthermore, TWBC's mitigation/avoidance measures are only intended to address the impact of recreational pressure from development within 7km of the SPA. Within this zone, TWBC does not propose to include any housing allocations and only considers that some windfall development may occur. But data contained within the HRA indicates that a large proportion (80%) of visitors to the SPA from TWBC live outside this 7 km zone indicating that visitors from development beyond this distance could increase the current pressure and result in an adverse effect. Thus, policies that the HRA currently screens out as not likely to have a significant effect as their development is outside the 7km zone,

could well have a significant effect once a correct interpretation of the results of the visitor survey is undertaken.

The 2016 visitor survey relied upon by the HRA identified that 3% of the total number of dog walkers visiting the SPA came from three settlements in TWB all outside the 7km zone. Furthermore 75% of the visitors to the SPA from TWB came from these same three settlements outside the 7km zone. In the penultimate paragraph in Section 5 of the HRA titled "Appropriate Assessment", it is stated:

"Whilst there is strong scientific evidence to conclude that TWB's contribution to recreation in Ashdown Forest is insignificant, policy EN 11 ensures that the effect of any net new housing within 7km will be subject to appropriate mitigation, according to the SAMM and SANG approach adopted by surrounding authorities"

It is clear to CPRE (Sussex) that 3% of the total number of dog walkers visiting the SPA, 3% of the total number of frequent visitors and 5% of the total number of visitors interviewed as coming from TWB, cannot be considered as insignificant. However, this incorrect conclusion of insignificance is possibly the reason whereby any increase in visitors from outside the 7km zone has been incorrectly screened out. Quite obviously, with around 1,500 new dwellings being proposed for Royal Tunbridge Wells under Policy STR/RTW 1, plus further dwellings arising from intensification and windfalls, based upon the findings of the visitor survey, it is highly likely that a proportion of these new residents will visit the SPA and potentially contribute to an adverse effect. But bizarrely, this impact does not figure in the appropriate assessment as it has been incorrectly screened out.

Thus, the HRA is deficient in both identifying the area from which additional visitor pressure could arise and proposing avoidance/mitigation measures which are unsupported by any analysis or data confirming their effectiveness. Despite the conclusion reached by the HRA in regard to the SPA, this conclusion of no adverse effect is contrary to the requirements of the Habitats Directive, the Habitats Regulations and Government Guidance meaning that the HRA is not justified and unsound.

Without an HRA conforming to the Regulations and correctly concluding no adverse effect to the SPA, Policies EN 11, STR 1 and ED 1 that rely on the conclusions of the appropriate assessment in the HRA are not justified and cannot be taken forward into the new plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The appropriate assessment within the Regulation 19 HRA is defective thereby failing to justify Policy EN 11 and others.

To rectify this lack of justification, the appropriate assessment should be revised to:

- 1 Correctly identify the areas of Tunbridge Wells Borough from where additional visitor pressure to the SPA may arise from development, and
- 1 Provide avoidance/mitigation measures to prevent any increase in visitor pressure arising from development within the submission local plan that are supported by complete, precise and definitive findings and conclusions to ensure that there is no reasonable scientific doubt as to the effects of the proposed plan on Ashdown Forest SPA.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is anticipated that both TWBC and Natural England will not agree with our view that the appropriate assessment within the HRA is defective with regard to Ashdown Forest SPA. Our presence at the hearing will enable us to explain more fully to the Inspector our reasons for concluding the assessment is defective and we will be able to challenge any defence of the incorrect parts of that appropriate assessment.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
- . STR/HA1 / AL/HA4 – Land off Copthall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
- . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
- . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and
- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

4.3 Dandara supports the overall vision of the Pre-Submission Local Plan and the specific aspirations for the expansion to Paddock Wood and Royal Tunbridge Wells, and also welcomes the focus on sustainable development and achieving high quality design.

4.4 The Council's strategic objectives are centred around delivering sustainable development, boosting housing supply (including affordable housing), endorsing garden village principles, high quality design, investment and delivery of infrastructure, active and sustainable travel, promoting economic growth, protecting and conserving the historic environment and natural landscapes, controlled release of Green Belt land, commitment to reducing carbon dioxide emissions and addressing climate change and working with local communities as part of the neighbourhood planning process.

4.5 The planned expansion of Paddock Wood is identified as being a key component of the Vision and Strategic Objectives.

4.6 Dandara supports these strategic objectives but suggests these objectives should be expanded, with further emphasis made on promoting healthy lifestyles, specific reference to tackling poor air quality and the regeneration of town centres in the interests of ensuring the Local Plan is positively prepared and consistent with national policy as set out by Paragraph 35 (a and d) of the NPPF.

4.7 Dandara also supports the Council's aspiration for high quality development at other settlements across the Borough which responds to the distinctive and particular character of their locations. The combination of strategic and smaller allocations form a critical component of the Council's housing strategy and are capable of being delivered in the short, medium and long-term within the Plan period.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4.6 Dandara supports these strategic objectives but suggests these objectives should be expanded, with further emphasis made on promoting healthy lifestyles, specific reference to tackling poor air

quality and the regeneration of town centres in the interests of ensuring the Local Plan is positively prepared and consistent with national policy as set out by Paragraph 35 (a and d) of the NPPF.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPF.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five

Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
 - . STR/HA1 / AL/HA4 – Land off Cophall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
 - . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
 - . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and

- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

4.30 The Pre-Submission Local Plan confirms there are exceptional circumstances to alter the boundaries of the Green Belt to remove land from the designation for the proposed development at Tudeley Village, Paddock Wood (including land at east Capel), at a few sites around Royal Tunbridge Wells (particularly at North Farm/Kingstanding Way), and at Pembury.

4.31 The approach taken in Pages 58 – 60 of the Development Strategy (2021) is consistent with the well-established process that has been established through the Courts (notably *Calverton*) in the application of Exceptional Circumstances.

4.32 More recently, the case of Compton Parish Council is also relevant with Sir Duncan Ousley commenting (*inter alia*):

1. "Exceptional circumstances" is a less demanding test than the development control test for permitting inappropriate development in the Green Belt, which requires "very special circumstances".
2. The phrase does not require at least more than one individual "exceptional circumstance". The "exceptional circumstances" can be found in the accumulation or combination of circumstances, of varying natures, which entitle the decision-maker, in the rational exercise of a planning judgment, to say that the circumstances are sufficiently exceptional to warrant altering the Green Belt boundary.
3. General planning needs, such as ordinary housing, are not precluded from its scope; indeed, meeting such needs is often part of the judgment that "exceptional circumstances" exist; the phrase is not limited to some unusual form of housing, nor to a particular intensity of need.

4.33 Fundamentally, the borough is heavily constrained – aside from the 22% of the borough designated as Green Belt, 69% is AONB, with 5,321 ha of Green Belt land (out of 7,134 ha) also being within the AONB. This means that 74.5% of the Green Belt land is also within the AONB. Moreover, the majority of the Green Belt wraps around the main urban area of Royal Tunbridge Wells and Southborough, around Pembury and the area to the east of Tonbridge/west of Paddock Wood (located within Capel parish), the eastern boundary immediately adjoining the existing western developed boundary of Paddock Wood.

4.34 With the clear need in the NPPF (2019) to promote sustainable development, to do this without the release of land from the Green Belt would result in significant development being inappropriately located in lower tier settlements (such as Frittenden, Goudhurst) which either do not have the necessary infrastructure to support such growth and/or are located in sensitive landscape contexts.

4.35 The need to ensure that sustainable development is encouraged as part of the review and consideration of Green Belt release is firmly established in Paragraph 138 of the NPPF which states: "When drawing up or reviewing Green Belt boundaries, the need to promote sustainable patterns of development should be taken into account. Strategic policymaking authorities should consider the consequences for sustainable development of channelling development towards urban areas inside

the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary”.

4.36 Through the Development Strategy Topic Paper (Feb 2021) TWBC has clearly articulated what the consequences for sustainable development would be if it was to not include Green Belt release as part of its proposed released.

4.37 At the Plan Wide level, the case for Exceptional Circumstances is fully justified. In the next section we have provided comment on what the relevant Local Exceptional Circumstances are to support the proposed release of allocated sites to which Dandara has an interest in.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

N/A – no amendments proposed.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPE.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Dandara

Question 2

Agent's Name and Organisation (if applicable) CBRE Ltd

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road

Paragraph Numbers: 5.47 - 5.51

[TWBC: Covering letter, Full Written Representation, Landscape Concept and Southborough Vision Document attached as Supporting Information. This representation has been input against Section 3 - Vision & Objectives, Section 4 - The Development Strategy, Policies STR/SS 1, STR/HA 1, AL/RTW 5 and STR/CRS 1 – see Comment Numbers PSLP_1685, PSLP_1688, PSLP_1689, PSLP_1697, PSLP_1703 and PSLP_1711]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
- . STR/HA1 / AL/HA4 – Land off Copthall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
- . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
- . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and
- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

5.156 Pre-Submission Local Plan Policy STR/RTW1: 'The Strategy for Royal Tunbridge Wells' sets out the development strategy for Royal Tunbridge Wells including the provision of between 1,416-1,536 new dwellings, including affordable housing on 18 sites including the Southborough site (site allocation Policy AL/RTW5). Dandara support Policy STR/SO1 and consider growth at Southborough to form a logical and sustainable small urban extension to Tunbridge Wells, consistent with the assessed spatial strategy

5.157 The site is allocated in the Pre-Submission Local Plan by Policy AL/RTW 5: 'Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road' as part of a wider site allocation comprising adjacent land to the west and south at Caenwood Farm for a total 100 new dwellings, including 40% affordable housing and 5% serviced self-build and custom housebuilding plots (see Figure 13 below). Dandara support site allocation Policy AL/RTW5 but a set out a series of detailed comments below.

Green Belt Release5.158 The site was included in the Council's Green Belt Study Stage Three (November 2020) as part of the wider site allocation AL/RTWXX: 'Land to the north of Caenwood Farm, Speldhurst Road'. This assessment concluded that wider parcel AL/RTWXX makes a "Relatively Strong" contribution to preventing neighbouring towns merging, and a "Moderate" contribution to checking the sprawl of the large built up area and the prevention of encroachment on the countryside as shown in Figure 14 below. The impact of its release on the adjacent Green Belt is deemed "Negligible" and overall, the harm resulting from the release of AL/RTWXX is "Low-Moderate".

5.159 The redrawing of the Green Belt boundary in this location will follow strong, defensible boundaries that are permanent and can endure beyond the plan period.

5.160 The Council's Green Belt Study Stage Three concludes that while release of land within AL/RTW 5 will breach the Green Belt boundary formed by Speldhurst Road, it will be replaced by an equally strong boundary formed by existing woodland blocks to the south and by proposed supplementary mitigation planting.

5.161 Dandara support the above findings from the Council's Green Belt Study Stage Three and fundamentally agree with the nature and extent of harm to this Green Belt as identified by TWBC. The redrawing of the Green Belt boundary in this location will follow strong, defensible boundaries that are permanent and can endure beyond the plan period in accordance with Paragraphs 136-139 and 141 of the NPPF. 5.162 Dandara agree with the findings and conclusions of the SHELAA in respect to Site ref. 100 and the Council's Green Belt Study Stage Three and consider the Council's Local Exceptional Circumstances case for the release of this to be robust and sound.

Landscape Sensitivity 5.163 The site was not included in the Council's LVIA (November 2020) as it does not fall within or immediately close to the High Weald AONB.

5.164 The Tunbridge Wells Landscape Assessment (2017) classifies the site as lying within the Speldhurst Wooded Farmland Landscape Character Area (LCA). This area is characterised by: "A topographically distinct landscape of high ridges intersected by a complex network of valleys and steep sided ghylls extending west from Royal Tunbridge wells. The landscape is distinguished by weathered outcrops of sandstone, lush deep ravine woodlands, sunken lanes running between high banks of sandstone, beech and holly hedgerows, Commons which permeate into the centre of RTW and an important swathe of remnant unimproved pasture".

5.165 As set out in Define's commentary in the Southborough Vision Document (June 2021), whilst the site is considered to share some of the above identified landscape characteristics, it is highly constrained by vegetation blocks, with limited intervisibility to the wider LCA. There is equally some separation from settlement immediately to the north due to a thick belt of trees along Speldhurst Road, but its proximity to this urban fringe, and significant exposure to the rear of properties along Reynolds Lane along the western boundary, does result in the majority of the site having a strong relationship with the existing settlement.

5.166 Define also note that due to the screening provided by existing built form and dense vegetation, there are few views into the site, other than glimpsed views from along the western boundary (Public Right of Way WB1 (see Figure 5 of the Southborough Vision Document)). However, views from this public footpath area already influenced by settlement through a small row of properties and their rear gardens to the west.

5.167 Due to the complex intervening landform and vegetation pattern no views further afield are considered likely, but it is acknowledged this will need to be tested through appropriate LVIA to accompany any future detailed planning application(s).

Emerging Concept Masterplan – Dandara 5.168 The enclosed Southborough Vision Document (June 2021) prepared by Define on behalf of Dandara provides an overview of how Land to the south of Speldhurst Road at Caenwood Farm, site allocation policy AL/RTW could be developed in a way that responds positively to its context, and the opportunities and constraints of the site, in order to deliver residential development alongside substantial green and blue infrastructure. The Vision Document includes a conceptual (indicative) masterplan for Dandara's land interest including the wider AL/RTW5 site allocation as shown in Figure 15 below as part of delivering comprehensive development and the entire site allocation.

5.169 The conceptual masterplan identifies a potential small residential urban extension to Southborough that blends into this sensitive landscape/settlement edge and which adds positively to the recreation and amenity value of the local settlement through the provision of significant and accessible green/blue infrastructure that flows through the site, providing connections to focal points of natural open space on the southern and western boundaries.

5.170 This approach will facilitate the positive enhancement of the beneficial use of the wider Green Belt with retained woodland, a key landscape feature, improved public access and potential opportunities for new habitat creation as well as new outdoor sport and recreation in accordance with Paragraph 141 of the NPPF.

5.171 The conceptual masterplan identifies a total development area of circa 2.80 Ha which comprises circa 1.05Ha within Dandara's land ownership to the north-east of the wider Caenwood Farm site.

5.172 The indicative and high-level development layout is informed by the site's constraints set out above and in particular its landscape context, in which the conceptual masterplan seeks to retain all existing vegetation (with the exception of access points only), and keep development away from the southern and western edges.

5.173 In accordance with the Council's Stage Three Green Belt Study (November 2020) the conceptual masterplan seeks to retain woodland to the south and reinforce this with additional tree planting to create a robust new Green Belt boundary.

5.174 In terms of initial design and layout considerations for the entire site allocation, the conceptual masterplan demonstrates it is possible and appropriate to achieve higher density residential development of circa 3-5 storeys along the main access street from Speldhurst Road with a more formal character framing the street and long-views to St Johns Church of England; more medium density development in the central spine of the site with residential dwellings of circa 2-2.5 storeys; and remainder of the site, particularly closer to the green buffer and woodland to the south (more sensitive landscape areas) residential dwellings of circa 2 storeys, with further scope for higher density, circa 1.5-2 storey mixed dwellings in the heart of two larger residential parcels in the northern-eastern area of the site.

5.175 Dandara agree with the findings and conclusions of the SHELAA in respect to Site ref. 100 and the Council's Green Belt Study Stage Three and consider the Council's Local Exceptional Circumstances case for the release of this to be robust and sound. Suitability of Residential Use / Quantum

5.176 The entirety of the site was included as part of the Council's SHELAA (January 2021) referred to as Land to the south of Speldhurst Road, adjacent to Whitegate Close, Tunbridge Wells (SHELAA site ref. 100). A Site Location Plan extract is included in Figure 16 below. The adjacent land at Caenwood Farm is also included in the SHELAA (Site ref. 30) and is also a proposed housing allocation (Policy AL/RTW5) in the Pre-Submission Local Plan.

5.177 The SHELAA assessment confirms that the existing site is a greenfield site in agricultural use with a series of TPO trees along Speldhurst Road. The site was deemed suitable for residential development on the basis it is adjacent to the LBD of Royal Tunbridge Wells and is well situated in respect to existing services at Royal Tunbridge Wells and Southborough. Moreover, the release of the site from the Green Belt would result in "Low to Moderate" harm.

5.178 The SHELAA concludes that Site ref. 100 is a suitable site falling adjacent to the existing LBD of Royal Tunbridge Wells. It is considered that it is a sustainable site as confirmed through the SA. The SHELAA did however confirm it is unsuitable to release adjacent Site ref. 30 from the Green Belt due to the harm it would cause.

5.179 Site allocation Policy AL/RTW 5 seeks the provision of a total 100 homes on the site, including 40% affordable housing. Dandara support site allocation Policy AL/RTW5 and the allocation of the site for housing. However, Dandara suggest the quantum of housing should be uplifted to 110 no. homes.

5.180 Technical evidence and initial feasibility work undertaken by Dandara confirms that Dandara's land parcel which is allocated for residential use is suitable for residential development and has sufficient capacity and is able to deliver circa 30-40 new dwellings at a density of circa 30-40 dpa which is considered appropriate for the site, factoring in its location, wider context and site constraints and ensuring appropriate provision for encompassing suitable and accessible "green" and "blue" infrastructure as part of a comprehensive and sensitive design approach that respects the site's sensitive landscape/settlement edge location. Accordingly, this will ensure that the allocation secures the efficient and effective use of the Land to the south of Speldhurst Road, adjacent to Whitegate Close in line with Paragraph 122 of the NPPF.

Self Build and Custom Housing

5.181 Site allocation Policy AL/RTW5 seeks to secure 5% of the development proposals for self/custom build provision. Dandara does not support this element of the Policy AL/RTW5.

5.182 Paragraph 6.381 of the Local Plan notes that since 1 April 2016, there has been an average of 1.96 registrations for a self/custom build property per month. Utilising this data, TWBC has therefore projected a need for 518 self/custom build dwellings over the Plan period (up to 2038). This is considered to be too simplistic a forecast and does not reflect actual demand.

5.183 Paragraph 6.381 goes on to (correctly) note that self/custom build predominantly comes forward via windfall schemes, mainly as single dwelling schemes. Accordingly, TWBC considers that 77% of provision (401 dwellings) will come forward via windfall, leaving 115 – 120 dwellings to be identified in the Plan.

5.184 Draft Policy H8 ('Self and Custom Build Housing') seeks to secure the residual self/custom build provision at 3 no. allocated sites – Caenwood Farm (AL/RTW5), Spratsbrook Farm (AL/RTW16), and

Tudeley Village (STR/SS3). However, the Draft Local Plan (including Sustainability Appraisal) does not set out the rationale as to why these sites were identified for self-building housing over other sites in the Local Plan and there is no supporting evidence to support a need for self build housing in these locations.

5.185 Ultimately, the selection of self/custom build sites will depend on consumer choice on where individual households seek to build their own home. As above, this predominantly occurs on single dwelling/windfall schemes and can also be locationally dependent including village and countryside settings. The sites identified above all have policy constraints that need to be addressed as part of any application and would make self/custom homes challenging to deliver on site factoring in the necessary highway / landscape mitigation amongst other social infrastructure requirements that would be required to accommodate new residential development.

5.186 Dandara therefore consider the threshold applied and the inclusion of self-build housing at the Southborough site is not appropriate when factoring in the site's location and specific constraints. The site allocation as proposed already includes a requirement for the provision of 'extensive green infrastructure' which would be in excess of that required to support the delivery of approximately 100 homes. Factoring in the above outlined site constraints and factoring the size of the site, it is not suitable for self-build housing as this could threaten the viability and deliverability of this site for housing.

5.187 Dandara suggest flexibility in the policy provision below to cater for the demand at the time the scheme is at the planning application stage. Dandara suggest it would be prudent to insert a policy caveat for an early review mechanism into Draft Policy AL/RTW5 to assess whether this local demand self/custom build housing in this locality and whether this need has already been met elsewhere in the Borough in-line with the proposed housing trajectory. Meeting the demand will largely be based on consumer choice at the time as well as the locational options for those on the Council's self/custom build register. Any such review should regard to other viability considerations for the scheme.

5.188 Dandara also recommend that the provisions/sites in Policy H8 are deleted in that self/custom build can come forward as based on the demand for suitable locations at build out.

5.189 Accordingly, in light of the above comments, Dandara suggest Policy AL/RTW16 is amended as follows: This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for circa 110 residential dwellings, of which 40 percent shall be affordable housing, and if required (subject to TWBC evidence base confirming need), a minimum of five percent to be available as serviced self-build and custom housebuilding plots.

Highways / Access 5.190 Site allocation Policy AL/RTW5 (part 1) rightly requires the new vehicular access to be provided from Speldhurst Road, with the exact location to be determined by detailed transport assessment work. There is a further requirement to consider appropriate widening of the section of Speldhurst Road that runs adjacent to the site and the provision of an appropriate level of parking on-site. Dandara support this requirement and the policy approach to requiring a detailed transport assessment.

5.191 Dandara also support the requirement under site allocation Policy AL/RTW5 for the creation of a new access subject to detailed transport assessment work.

5.192 Policy AL/RTW5 (part 3) further requires the possibility of alterations to Reynolds Lane with restricted access for non-residents as appropriate or necessary. This land falls outside Dandara's land ownership but they would welcome discussions on the access option with the Promoters of the wider allocation at Caenwood Farm.

5.193 PJA Highways have undertaken initial highway technical work on behalf of Dandara including technical review of the Site, its constraints and the key highway considerations, including the requirement for a new access from Speldhurst Road as part of a 100 unit residential scheme (including 30-40 dwellings on Dandara's land interest).

5.194 This technical assessment work confirms that the site is well located to local amenities, and has good access to public transport services and is considered to constitute a sustainable location.

5.195 An initial highway safety review using Personal Injury Collision (PIC) data confirms that overall, the number of PICs in the vicinity of the site is low, with no fatal collisions or collisions resulting in serious injury recorded. Therefore, there is no evidence to suggest that the proposed development would exacerbate any existing highway safety concerns.

5.196 The technical assessment work to date has sought to prepare a preliminary access strategy which recommends the creation of a new bell-mouth junction from Speldhurst Road within the site, located between Edward Street and Taylor Road. Initial vehicle tracking confirms this access would provide safe and efficient access and egress to the site and would be fully compliant with the requirements of the Kent Design Guide .

5.197 It is acknowledged that further transport assessment work including traffic volume counts and detailed highway modelling will be required at application stage. It is also accepted that early detailed discussions with KCC Highways will be required to agree the location and type of access from Speldhurst Road.

5.198 In respect to car parking, it is noted that an appropriate level of parking will need to be achieved on-site, factoring in the site's constraints and need for a safe and efficient site layout and internal access. Dandara further support the requirement of a Low Traffic Neighbourhood as required by Part 5 of Policy AL/RTW5.

5.199 At the appropriate stage, Dandara will engage in pre-application discussions with the Council and KCC Highways to agree the site access strategy and necessary highway mitigation measures to be delivered as part of the proposed residential development. Dandara also note that any such application will be informed by a detailed transport assessment.

5.200 Policy AL/RTW5 (part 4) which seeks enhanced footpath links to be provided from the existing route to the west of the site to connect to other footpaths and the surrounding area. Dandara support the policy approach but recognise the extension of footpaths will require the necessary permission and will require agreement with adjacent landowner.

Trees 5.201 Policy AL/RTW5 (part 9) requires future development to secure the long-term management of the pasture and woodland retained for landscape and ecological mitigation. Dandara support this policy requirement and despite the proposed retained woodland and pasture falling on the wider site allocation (not Dandara's land interest) it is recognised the retention of these green features is key to the design and landscape quality and overall placemaking of the future housing schemes on both development parcels.

5.202 Policy AL/RTW5 (part 10) requires regard for the existing hedgerows and mature trees on-site, with the layout and design of the development and to be informed by an arboricultural survey and landscape and visual impact assessment. Dandara broadly supports this requirement, however there is likely to be a need for an element of tree clearance to occur along Speldhurst Road to accommodate the access provision, with mitigation provided for loss of any trees elsewhere on the site. Accordingly, it is recommended that the text "Where feasible" is introduced at the beginning of the second sentence.

5.203 Lloyd Bore on behalf of Dandara have undertaken an Arboricultural Report (April 2021) which comprises a detailed tree survey. This confirms the absence of Category A Trees with the majority of trees either categorised as either 'C' or 'U'.

5.204 The emerging concept masterplan for Southborough has been informed by the access strategy and findings of the Arboricultural Report. The proposed access from Speldhurst Road is sought between Edward Street and Taylor Road and would result in some loss of primarily low (Grade C) trees. The higher quality, Grade B trees will be retained where possible and a tree-lined frontage and green buffer to Speldhurst Road will be retained to ensure the site remains well-screened to the existing residential properties on the north (opposite) side of Speldhurst Road in accordance with the Council's SHELAA.

5.205 As set out above, it is acknowledged that the proposed access strategy and precise location of the site access will be informed by highway modelling and technical conversations with KCC Highways and will also be informed by discussions with the Council's Tree Officer to agree necessary tree removal and any necessary mitigation / additional tree planting. It is apparent that the proposed site access is proposed further down Speldhurst Road, beyond Prospect Road, there is a likely requirement for further tree removal to create larger visibility splays.

5.206 The emerging concept masterplan for the site and wider allocation seeks to retain the existing woodland to the south, reinforce this boundary and green buffer with additional tree and hedgerow planting to help screen views out.

5.207 Therefore, given these trees of limited amenity value, a degree of tree loss is considered to be acceptable in principle subject to all other relevant policy considerations.

5.208 It is acknowledged that the soft landscape scheme as part of any future application should introduce new tree and boundary planting on-site as part of mitigating any tree loss, ensuring the development is appropriately screened from the existing residential properties along Speldhurst Road as well as enhancing biodiversity and in the interests of achieving a high quality development. It is also acknowledged that an arboricultural assessment will be required in support of any future application.

Open Space / Play Space / Green Infrastructure 5.209 Policy AL/RTW5 (part 8) requires extensive green infrastructure to be provided, shown in both the green areas shown indicatively on the site layout plan (see Figure 14 above) and through the non-green areas where relevant. Policy AL/RTW5 (part 6) seeks improved access to existing and new open green space areas.

5.210 Whilst Dandara support the policy approach to securing new open space and improving public access to it, it is however noted, as set out above, that the provision of 'extensive green infrastructure' would be in excess of that required to support the delivery of approximately 100 homes. Despite this, Dandara support the unique nature of the site, the relationship to the existing adjacent ancient woodland and the value of green infrastructure for this site.

5.211 Dandara support Part 9 of Policy AL/RTW5 which seeks to secure the long-term management of the pasture and woodland retained for landscape and ecological mitigation to be secured by the development. Dandara would expect a Site-wide Landscape Management Plan to be prepared under a condition on any future planning permission and this could be linked to any legal agreement requiring the landowners / management companies to ensure the long term management of the site.

5.212 In a similar vein, Dandara support Part 11 of Policy AL/RTW5 which requires a suitable legal mechanism to secure the provision of open space as part of the entire site allocation.

5.213 Dandara further support Part 12 of Policy AL/RTW5 which requires the provision of on-site amenity/natural green space and children's and youth play space. Dandara are committed to delivering a high quality residential scheme including the provision of appropriate play space and natural greenspace in the interests of good placemaking in accordance with the PPG.

Housing Delivery 5.214 The Council's Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) confirms that site allocation AL/RTW5 is included in the Council's trajectory for the long term delivery of 100 new homes in two tranches: 70 homes in 2031/32 and 30 homes in 2032/33.

5.215 Dandara support the planned growth for the site, however we consider that quantum of development at the site should be uplifted 110 no. homes for the reasons set out above and to account for the delivery of 30-40 dwellings on Dandara's land interest and the remaining 70 dwellings on the wider site allocation (not Dandara's land interest). The proposed annual delivery rates (average 50dpa) are broadly supported, and in this context, Dandara is able to achieve 30-40 dpa in a single phase.

5.216 Dandara has undertaken an array of technical/background work for the site including that appended to these representations. Matters to have been addressed include landscape, heritage, ecology, highways, access, drainage and infrastructure. Furthermore, TWBC's Infrastructure Delivery Plan (March 2021) does not identify wider infrastructure schemes as a prerequisite to development at the site.

5.217 The above information confirmed that there are no site constraints to development and accordingly the development could commence from 2023/24.

5.218 The Site is therefore available now, is suitable for residential development and deliverable now in the short term i.e. first 5 years of the new Plan Period (2020/21 – 2024/25). The Council's trajectory should be amended accordingly.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Quantum:Dandara suggest the quantum of housing should be uplifted to 110 no. homes.

5% self/custom build provision:Dandara suggest Policy AL/RTW16 is amended as follows:This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for circa 110 residential dwellings, of which 40 percent shall be affordable housing, and if required (subject to TWBC evidence base confirming need), a minimum of five percent to be available as serviced self-build and custom housebuilding plots.

Policy AL/RTW5 (part 10)5.202 Policy AL/RTW5 (part 10) requires regard for the existing hedgerows and mature trees on-site, with the layout and design of the development and to be informed by an arboricultural survey and landscape and visual impact assessment. Dandara broadly supports this requirement, however there is likely to be a need for an element of tree clearance to occur along Speldhurst Road to accommodate the access provision, with mitigation provided for loss of any trees elsewhere on the site. Accordingly, it is recommended that the text "Where feasible" is introduced at the beginning of the second sentence.

Housing Trajectory5.215 Dandara support the planned growth for the site, however we consider that quantum of development at the site should be uplifted 110 no. homes for the reasons set out above and to account for the delivery of 30-40 dwellings on Dandara's land interest and the remaining 70 dwellings on the wider site allocation (not Dandara's land interest). The proposed annual delivery rates (average 50dpa) are broadly supported, and in this context, Dandara is able to achieve 30-40 dpa in a single phase.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPF.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 16 Land to the west of Eridge Road at Spratsbrook Farm

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.0 INTRODUCTION

1.1 These representations are submitted on behalf of Dandara Ltd in response to the Tunbridge Wells Borough Local Plan - Regulation 19 Consultation. The Consultation (26 March – 04 June 2021) comprises a “Pre-Submission” consultation document as part of the Local Plan process. It follows the earlier Reg 18 “Issues and Options” (May – June 2017) and Reg 18 “Draft Local Plan” (Sept – Nov 2019) stages of the Local Plan to which Dandara has made previously made representations to.

1.2 Dandara is a privately owned property developer with experience in delivering high quality and bespoke residential led and mixed-use schemes across the UK. Dandara has interests at land along the southern edge of Tunbridge Wells, namely known as “Spratsbrook Farm” (the “site”). The site forms land as allocated within the emerging Local Plan (ref. AL/RTW 16) for development of approximately 120no. new homes. Whilst Dandara supports the allocation of the site, it considers that the proposed quantum of development should be uplifted to 170no. new dwellings. Accordingly, this will ensure that the allocation secures the efficient and effective use of the land at Spratsbrook Farm in line with the National Planning Policy Framework (para 122).

1.3 We set out within these representations our reasoning for the proposed uplift in unit numbers. This approach is supported through landscape and masterplanning evidence being provided by Dandara and which is also addressed in these representations.

1.4 This report should be read in-conjunction with other representations being prepared by CBRE (on behalf of Dandara) concerning other site interests. The CBRE representations will address other allocations and policies of the Local Plan including more detailed development management policies.

1.5 Notwithstanding our client's interests, these representations have been prepared in objective terms and assesses the Local Plan against the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG).

1.6 These representations address the main aspects of the Local Plan/site allocation and in summary confirm the following:

1) Local Plan Strategy – Meeting Housing Need:

- The Local Plan seeks to meet the Government's Objectively Assessed Standard Method for new homes (678dpa) over an 18-year Plan period (2020 – 2038);- This entails a need for 12,204 units over 18 years;- The Local Plan seeks to provide 13,069 – 13,444 dwellings during the Plan period;- Taking the mid-point of the above, this provides a buffer of 8.6%;- We consider that a buffer closer to 20% would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from neighbouring authorities, including from Sevenoaks and Wealden;- We consider that the range of dwellings proposed provides uncertainty as to the extent of housing need being met;- Our client's proposals at Spratsbrook Farm, including our proposed uplift to the allocation quantum, provides certainty to units being delivered from the site. An uplift in the allocation would assist in meeting the wider housing needs of the area.

2) Land at Spratsbrook Farm, Tunbridge Wells:

- The site forms a proposed allocation in the Local Plan for development of approximately 120no. new homes;- As above, we consider that the site should be allocated for a greater quantum of development (i.e. 170no. homes) than currently proposed by the Local Plan– this will ensure an efficient and effective use of the land;- The site is identified for anticipated delivery in the long-term (2035/36 – 2036/37);- We do not support the trajectory on this basis and consider that the site can be delivered by Dandara in the shorter-term (i.e. from 2023/24 – 2025/26).- Development of the Site will secure appropriate "green", "grey" and "blue" infrastructure, as including open space and landscape provision, as well as access and on-site drainage infrastructure.

1.7 In summary, we support the Local Plan in broad terms. However, these representations conclude that the Local Plan could be considered "Sound" in accordance with the NPPF, subject to changes identified in these representations.

1.8 They further support the identification of the site for development and enclose further technical work to support its allocation.

2.0 LOCAL PLAN STRATEGY – MEETING HOUSING NEEDS

2.1 This section sets out our representations on the Local Plan spatial strategy with regard to meeting housing need. ***This has particular reference to Policy STR1 (The Development Strategy)*** and its supporting paragraphs.

a) Housing Need

2.2 In line with the Government's Standard Method for housing need, the Local Plan needs to plan for the delivery of 12,204 new homes during the Plan period 2020 – 2038. This amounts to 678 dwellings per annum.

2.3 The emerging Local Plan is seeking to provide for a "lower" and "upper" range in the quantum of development, as extending from 13,059 – 13,444 dwellings. This is made up of existing committed sites and proposed allocations as follows:

Table 1: Local Plan housing strategy

Housing Strategy

Lower Provision

Upper Provision

Existing commitments/allocations

4,983

4,983

Proposed allocations

8,076
8,461
Total
13,059
13,444
Requirement
12,204
12,204
Buffer
855 (7%)
1,240 (10%)

2.4 We support the ability of the Plan to seek to meet its own needs in full. However, the use of “lower” and “upper” ranges, as above, provides uncertainty in terms of the quantum of development to be achieved by the Local Plan. In this context, we note that the Local Plan seeks to achieve a 7 – 10% buffer and this range entails a difference 385 dwellings.

2.5 We consider that the Plan should be seeking to achieve a greater buffer of up to 20%. There are a number of factors underpinning this objective as set out under items b) – d) as follows.

b) Delivering a sufficient supply of homes

2.6 Tunbridge Wells Borough Council has not been able to demonstrate a 5-year supply of housing land for a number of years (c. 5 years+). TWBC’s stated supply currently stands at 4.83 years.

2.7 Equally, the Housing Delivery Test Measurement (2020) amounts to 85% delivery in Tunbridge Wells in the previous three measurement years as follows:

Table 2: Housing Delivery Test Measurement 2020 (as at Feb 2021)

2017-18
2018-19

1,807
No. of homes delivered
519
553
474
1,540
Shortfall/Surplus

85%

Action required

Action Plan

2.8 It is evident from the above that there has been recent and continued under delivery of homes in TWBC. The NPPF (footnote 39) is clear in-so-far as a 20% buffer should be applied whereby the HDT falls below 85%. The objective of this is to redress previous shortages in supply and in this light, we consider that up to/in the region of a 20% buffer should be applied for the Local Plan. This will ensure that flexibility in supply is provided as well as securing choice and competition in the market for new homes.

c) Addressing Affordability

2.9 The ability to afford a home is a problematic issue in TWBC. This is the result of many socioeconomic factors; one of which relates to housing demand and the shortfall in supply. Delivery over the past 10 years (2010/11 – 2019/20) has averaged 330dpa in TWBC. This is **half** the housing need determined by the Council's Objective Assessment of Housing Need (OAN) determined under the policies of the 2012 NPPF (648dpa). The 2019 NPPF introduced the 'Standard Method' for calculating **minimum** local housing need, replacing the OAN. The **minimum** need calculated by this method is higher than the OAN at 678dpa for Tunbridge Wells. However, it is important to note how this figure is 'capped' due to the acute affordability problems in the Borough. If the Standard Method were uncapped, it shows need of 764dpa in Tunbridge Wells. As the PPG (ID2a-007) states, "*The cap is applied to help ensure that the minimum local housing need figure calculated using the standard method is as deliverable as possible*" however it also states that "*The cap reduces the minimum number generated by the standard method, **but does not reduce housing need itself***" (our emphasis). The minimum that should be targeted by the Council is delivery of 678dpa, as **actual** housing need in Tunbridge Wells is higher at 764dpa.

2.10 To put the affordability issues in context, the median affordability ratio is used for the purposes of calculating the Standard Method minimum. The ratio in Tunbridge Wells is currently 13.27. This means a household earning a median salary would require 13.27 times that salary to afford a median priced home in the Borough. A median priced home costs £390,000 as of 2020. The median ratio compares to an average of only 7.84 nationally, 9.92 in the south-east, and 10.06 across Kent. This means the ratio in Tunbridge Wells is 69% higher than the national average, 34% higher than the regional average, and 32% higher than the Kent average. The ratio also increased most from the previous 2019 ratio in Kent, and is the 12th highest in the country outside of London.

2.11 It is clear that additional housing is required in the Borough to address the acute affordability problems inherent there, which have only been exacerbated by the lack of delivery over the past decade. This is needed to address both supply and demand, thereby driving down price. A 20% buffer is therefore considered appropriate having regard to the above market signals and the need to address affordability concerns. Such a buffer has been accepted at Examinations for other nearby local authority areas (with similar/lower affordability ratios) including Canterbury (2017), Mid Sussex (2017/18) and Guildford (2018). It is thereby recommended that the planned supply of homes is increased in the Plan in order to secure a 20% buffer.

d) Responding to potential unmet needs from neighbouring authorities

Sevenoaks Unmet Need

2.12 TWBC shares a number of functional relationships with adjacent local authority areas. This includes migratory patterns for school, work, etc. with other authorities including Sevenoaks, Tonbridge and Malling, Maidstone, Ashford, Rother and Wealden. These authority areas are shown on Figure 2 of the Local Plan.

2.13 Tunbridge Wells shares the “West Kent Housing Market Area” with Sevenoaks and Tonbridge and Malling. Para 4.12 of the Local Plan refers to potential/“unknown” unmet needs (c. 1,900 dwellings) arising from Sevenoaks. TWBC’s Duty-to-Cooperate Statement (March 2021) goes on to refer to a formal request from Sevenoaks (April 2019) in terms of assisting with unmet need. The issue of Sevenoaks unmet needs was also the subject of lengthy discussions at the recent (Oct 2020) Examination of the Tonbridge and Malling Local Plan.

2.14 The DtC Statement recognises the current uncertainty regarding the progress of the emerging SDC and TMBC Local Plans. It is therefore considered that the Tunbridge Wells Local Plan should provide the appropriate flexibility in seeking to positively grapple with the unmet needs arising from Sevenoaks.

2.15 This can be achieved through an uplifted buffer to 20% and it is considered that the uplift in need can be addressed in Tunbridge Wells. In this context, we note that Tunbridge Wells has direct functional relationships to Sevenoaks, including the shared mainline train services to London. It is therefore a good location for unmet needs arising from Sevenoaks to be met.

Potential for unmet needs from Wealden

2.16 Wealden District is situated to the south of Tunbridge Wells. The latest Wealden Core Strategy (2013) is predicated on the need to deliver 9,440 homes (2006 – 2027). This averages at 450dpa.

2.17 WDC has embarked upon work on its new Local Plan. The WDC Reg 18 Draft Local Plan is due for consultation early in 2022.

2.18 The Government’s current Standard Method amounts to 1,225dpa for Wealden. This would equate to 24,500 new dwellings over a 20-year Plan period, as being proposed by WDC. This represents a significant uplift on the current Core Strategy requirement.

2.19 The signed Statement of Common Ground (WDC and TWBC - 08 Feb 2021) recognises that WDC’s housing figure as above, represents an “unconstrained”/“policy-off” figure. This does not have regard to constraints in WDC including the South Downs National Park to the south as well as the implications of the Pevensey Levels RAMSAR site.

2.20 Given the above, it is not anticipated that WDC is going to be able to meet its needs in full. It is therefore recommended that flexibility is built in to the TWBC Local Plan to accommodate potential for unmet needs arising from WDC. This can be achieved by increasing the housing provision in TWBC through the application of a 20% buffer.

e) Summary

2.21 The Local Plan currently seeks to provide a buffer of 7 – 10% above the identified need for new homes. A buffer in the Plan is welcomed, however, the current proposals provide uncertainty as to what can be achieved. This is important given the context set out above (items b – d) and it is considered that the Plan should be seeking to secure a definitive buffer of up to 20%. This can be achieved by two means:

i. Identifying and allocating further sites in the Local Plan – this can have regard to sites previously identified in the Reg 18 Draft Local Plan consultation; and ii. Where feasible, increasing the development quantum on allocated sites.

2.22 In the next section, we address our client’s site at Spratsbrook Farm in the context of item ii above and the ability of the site to deliver an increased quantum of development above that as allocated in the Local Plan.

3.0 RESPONSE TO POLICY AL/RTW16 - LAND AT SPRATSBROOK FARM

3.1 In this section, we address the main issues for the site, having regard to the Local Plan allocation for the site (ref. AL/RTW16) and the evidence base underpinning it. In the first instance we provide a site overview.

a) Site Overview

3.2 The site forms undeveloped greenfield land situated on the southern edge of Tunbridge Wells. The site has the following characteristics:

- It broadly comprises two land parcels in the eastern and western element of the site;
- The western element of the site forms part of the High Weald AONB;
- The entire site forms Green Belt with the eastern element proposed for Green Belt release in the Local Plan;
- Part of the western element forms land and abuts land in connection with a Scheduled Ancient Monument – Iron Age Hill Fort associated with the High Rocks;
- Listed building of Ramslye Farmhouse is set in a wooded setting to the south of the Site;
- The western element of the site contains woodland boundaries including Ancient Woodland;
- Access is deliverable from the A26 – this provides the main access route to the nearby Town Centre;
- A Public Right of Way runs parallel to the southern boundary providing access from the A26 to the wider countryside;
- The site is in close proximity to the Town Centre and thereby forms a suitable urban extension;
- Land abutting the southern boundary forms land also in Dandara's control and is located within the administrative area of Wealden. Dandara is promoting this area (to the WDC Local Plan), to form a wider urban extension.

b) Policy AL/RTW16 – Land at Spratsbrook Farm

3.3 The Site is allocated for development under Policy AL/RW16 for the following scope of development:

The site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 120 dwellings, of which 40% shall be affordable housing, and a minimum of five percent to be delivered as serviced self-build and custom housebuilding plots, together with enhanced informal open space and recreation areas as part of a landscape buffer.

3.4 The Local Plan (refer to Map 16 – Site Layout Plan) proposes that built development occurs in the eastern element of the site only with the western parcel being secured as “Open Space and Landscape Buffer”. Dandara supports this aspect of the Local Plan and we will comment on the proposals for the western area of the site further below.

Quantum of development

3.5 Dandara has undertaken architectural and feasibility work for the identified eastern development parcel for the site. This work is enclosed at **Appendix 1** and identifies that the site is able to achieve and deliver approximately **170 dwellings**. This is deliverable whilst securing appropriate densities at the site as well as encompassing suitable “green” and “blue” infrastructure and a sensitive design response in an AONB setting. This would include open space linkages through the site connecting to the western open space parcel. Children's play space could also be secured as well as SuDs provision, with access being provided from the A26.

3.6 In line with the NPPF, the proposed uplift in the development will make efficient use of the site. Furthermore, it can contribute towards achieving a secure buffer in the Local Plan and as set out in the earlier section, we consider that an uplifted buffer (to up to 20%) should be pursued in the Local Plan.

Self/Custom Build

3.7 Policy AL/RTW16 seeks to secure 5% of the development proposals for self/custom build provision. Dandara does not support this element of the policy.

3.8 Para 6.381 of the Local Plan notes that since 01 April 2016, there has been an average of 1.96 registrations for a self/custom build property per month. Utilising this data, TWBC has therefore projected a need for 518 self/custom build dwellings over the Plan period (up to 2038). This is considered to be too simplistic a forecast and does not reflect actual demand.

3.9 Para 6.381 goes on to (correctly) note that self/custom build predominantly comes forward via windfall schemes, mainly as single dwelling schemes. Accordingly, TWBC considers that 77% of provision (401 dwellings) will come forward via windfall, leaving 115 – 120 dwellings to be identified in the Plan.

3.10 **Policy H8 (Self and Custom Build Housing)** goes on to seek to secure the residual self/custom build provision at 3 no. allocated sites – Caenwood Farm (AL/RTW5), Spratsbrook Farm (AL/RTW16), and Tudeley Village (STR/SS3). The Local Plan (including Sustainability Appraisal) however, does not set out the rationale as to why these sites were chosen over other sites in the Local Plan.

3.11 Ultimately, the selection of self/custom build sites will depend on consumer choice on where individual households seek to build their own home. As above, this predominantly occurs on single dwelling/windfall schemes and can also be locationally dependent including village and countryside settings.

3.12 For when build out occurs on the Dandara/Spratsbrook scheme (TWBC anticipates this to occur from 2035/36), the need for self/custom build may have been met through windfall. Meeting the demand will largely be based on consumer choice at the time as well as the locational options for those on the Council's self/custom build register.

3.13 Furthermore, the ability of the site to deliver self/custom build plots will depend on viability considerations as balanced against the need to meet full affordable housing requirements. We therefore suggest flexibility in the policy provision below to cater for the demand at the time the scheme is at the planning application stage. This should also have regard to other viability considerations for the scheme. We also recommend that the provisions/sites in policy H8 are deleted in that self/custom build can come forward as based on the demand for suitable locations at build out.

3.14 In the light of the preceding paragraphs, we recommend that policy AL/RTW16 is amended as follows:

The site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 120 170 dwellings, of which 40% shall be affordable housing, and if required (subject to need), feasible and viable a minimum of five percent to be delivered as serviced self-build and custom housebuilding plots, together with enhanced informal open space and recreation areas as part of a landscape buffer.

3.15 Following the above, policy AL/RTW16 includes 12 no. development requirements. We comment on these below with recommended modifications in some instances.

Table 3: Dandara response to Policy AL/ RTW16 requirements

[TWBC: Table removed for formatting purposes - contents only below - full table in supporting information]

Policy AL/RTW16 Requirements / Dandara comments

No. 1 - Vehicular access to be provided into the site from the A26 Eridge Road. **Comments on No. 1** – Dandara supports this requirement.

No. 2 - Pedestrian links from the site to be provided and improved to connect to the existing Public Rights of Way network in the vicinity of the site and to formally designate the informal footways as Public Rights of Way to increase and improve accessibility and informal recreation within and around this area. **Comments on No. 2** – Dandara supports this requirement.

No. 3 - The design and layout to take the form of a Low Traffic Neighbourhood, and shall ensure pedestrian and cycle permeability through the site, including the provision of cycle and pedestrian links into the adjacent Ramslye Estate and into the town centre and to the train station. **Comments on No. 3** – Dandara broadly supports this requirement, however the delivery of cycle and pedestrian links into the town centre and to the train station would occur on land Dandara does not control. It is therefore recommended that “**where feasible and viable**” is inserted to the end of the requirement.

No. 4 - Improved public transport links are required to serve the development. **Comments on No. 4** – Dandara supports this requirement.

No. 5 - Development shall be located on the areas identified for residential use on the site layout plan. The open space shown in green on the site layout plan is to be managed under an approved scheme of agriculture with public access. **Comments on No. 5** – Dandara broadly supports this requirement, however, it is unknown as to what the requirements are for the open space area (western element of the site) to be “**managed under an approved scheme of agriculture with public access**”. The subject land is not proposed to be retained for agriculture use. Instead, it is proposed for “**open/ in formal space provision**” and it is recommended that the policy is modified accordingly.

No. 6 - Regard shall be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment. The retention and enhancement of the trees along the Eridge Road is a priority. **Comments on No. 6** – Dandara broadly supports this requirement, however there is likely to be a need for an element of tree clearance to occur along Eridge Road to

accommodate the access provision, with mitigation provided for loss of any trees elsewhere on the site. This is recognised within TWBC's landscape evidence base and accordingly, it is recommended that the text "**Where feasible**" is introduced at the beginning of thesecond sentence.

No. 7 - *The layout, form, design and mass of built development on-site to have regard to the topography, ancient woodland and buffers, and impact on the setting of the High Weald AONB. It shall include a landscape buffer along the south-western boundary, including to protect the amenity of the adjacent farmhouse.***Comments on No. 7** – Dandara supports this requirement.

No. 8 - *Detailed historic landscape and archaeological assessment to be provided as part of any proposals coming forward to assess the impact on heritage assets, including on the High Rocks Hill Fort, a Scheduled Ancient Monument.***Comments on No. 8** – Dandara supports this requirement.

No. 9 - *Provision of on-site amenity/natural green space and recreation ground, as well as children's and youth place space.***Comments on No. 9** – Dandara supports the provision of on-site amenity/natural green space as well as children's and youth play space. In this context strategic/semi-natural open space will be secured in the western parcel of the site and this will contribute to biodiversity net gains in the natural environment.

Dandara does not however support the provision of a "**recreation ground**" at the site. This is not considered necessary given the scale of the allocation proposals and equally the size/form of the site does not allow for playing pitches, etc. Accordingly, the provision for a "recreation ground" is not justified in line with the NPPF and it is recommended that this provision is deleted from the policy.

These facilities could be delivered as part of a wider scheme for the site as encompassing land within WDC to the south. Such a scheme would deliver the land requirements for a recreation ground and provide the critical mass for such a facility.

No. 10 - *Any development coming forward will need to consider any impacts on the adjacent land within the Wealden District Council area, and in terms of infrastructure provision with East Sussex County Council as well as Kent County Council.***Comments on No. 10** – Dandara supports this requirement.

No. 11 - *A suitable legal mechanism shall be put in place to ensure that the provision of public open space is tied to the delivery of the housing, at a suitable stage of the development, to be agreed at the planning application stage.***Comments on No. 11** – Dandara supports this requirement.

No. 12 - *Contributions are to be provided to mitigate the impact of the development, in accordance with Policy STR/RTW1.***Comments on No. 12** – Dandara supports this requirement.

3.16 Should the above matters be addressed this would enable the policy to be "justified" and "sound" in line with the NPPF.

4.0 RESPONSE TO LOCAL PLAN - EVIDENCE BASE

4.1 In this section, we address the salient issues for the site, having regard to the evidence base underpinning it. This is detailed on a topic-based approach as below:

a) Housing Trajectory

4.2 The Local Plan is supplemented by the Housing Trajectory contained within the Housing Supply and Trajectory Topic Paper (Feb 2021). The trajectory for allocated sites is provided at Table 9 (page 29) of the document.

4.3 For the Spratsbrook Farm site, the Trajectory proposes that 60 dwellings will be delivered per annum from 2035/36 – 2036/37.

4.4 We support the planned growth for the site, however as per earlier sections we consider that quantum of development at the site should be uplifted 170no. homes. The proposed annual delivery rates (60dpa) are broadly supported, and in this context, Dandara is able to achieve 75dpa as set out in previous representations.

4.5 Notwithstanding the above, it is however unclear to us as to why such a significant delay to the delivery timeframe is being proposed – as commencing from 2035/36.

4.6 Dandara has undertaken an array of technical/background work for the site including that appended to these representations. Matters which have been addressed include landscape, heritage, ecology, highways, access, drainage and infrastructure.

4.7 The above information confirmed that there are no site constraints to development and accordingly the development could commence from 2023/24. Furthermore, TWBC's Infrastructure Delivery Plan (March 2021) does not identify wider infrastructure schemes as a prerequisite to development at the site. Early delivery of the site will help to redress the Housing Delivery Test and 5-year Housing Land Supply and this is considered important given the potential for delays at other site allocations (due to infrastructure/landownership and other site issues).

4.8 In the light of the above, we would thereby propose the following amended "justified" and "sound" trajectory for the site.

Table 4: Revised Trajectory for Spratsbrook Farm

b) Green Belt

4.9 The Metropolitan Green Belt extends to c. 22% of the TWBC area. The extent of Green Belt is shown at Figure 6 of the Development Constraints Study (2016) and from this it is evident that Green Belt broadly surrounds the urban area of Tunbridge Wells.

4.10 The exceptional circumstances for allocating development in the Green Belt falls to be considered with reference to the Calverton Judgment (*Calverton Parish Council v. Nottingham City Council*, CO/4846/20014) (https://www.london.gov.uk/sites/default/files/ad_22_calverton_judgement.pdf) and the factors to be considered in demonstrating exceptional circumstances, are namely:

a) The acuteness/intensity of the objectively assessed need;b) The inherent constraints on supply/availability of land, prima facie suitable for sustainable development;c) The consequent difficulties in achieving sustainable development without impinging on Green Belt;d) The nature and extent of the harm to this Green Belt; ande) The extent to which the Green Belt may be ameliorated.

4.11 Items a) – c) are addressed within the wider round of evidence base including within the Housing Needs Assessment Topic Paper (Feb 2021) and Development Constraints Study (2016). It is evident that there is a compelling case for development to occur in the Green Belt at the urban edge of Tunbridge Wells given that it is the main town/tier 1 settlement of the Borough and the largest settlement in the wider West Kent area.

4.12 This section thereby focuses on items d) and e) above and these items are addressed within TWBC's wider Green Belt Review including the "Stage 3 - Green Belt Review - Assessment of Site Allocations (Nov 2020)".

4.13 The Stage 3 Review provides an assessment of the site characteristics in regard to the 5no. purposes of the Green Belt (set out in the NPPF). These are as follows:

1) Checking the sprawl of large built up areas; 2) Preventing neighbouring towns from merging; 3) Safeguarding the countryside from encroachment; 4) Preserving the setting and special character of historic towns; 5) Assisting in urban regeneration by encouraging the recycling of derelict and other urban land.

4.14 Only the eastern parcel of the site is proposed for Green Belt release and the Stage 3 report notes that *“the area to be released makes a Moderate contribution to checking the unrestricted sprawl of the large built up area, to the prevention of encroachment on the countryside and to preserving the special character and setting of Tunbridge Wells”*.

4.15 Furthermore, the Stage 3 report goes on to confirm that the impact of its release on the adjacent Green Belt (i.e. western parcel) will be Negligible. Harm resulting from the release of the site will be Low-Moderate.

4.16 The Landscape Concept Note (Define – **Appendix 1**) provides an independent critique of the Local Plan evidence. This however fundamentally agrees with *the nature and extent of harm to this Green Belt* as identified by TWBC.

4.17 Equally, Define has reviewed the “Potential Mitigation Measures” identified for the site in the Stage 3 Green Belt Review, as considered in the context of the extent to which the Green Belt may be ameliorated.

4.18 Potential for mitigation measures includes:

- The layout, form and mass of built development to have regard to the topography, trees, hedgerows and Ancient Woodland;
- The potential requirement for a buffer to development to the Scheduled Monument;
- The provision of a soft landscape buffer along the south-western boundary;
- Other potential mitigation measures could include the introduction of locally characteristic woodland or hedgerow planting to the north-west of Ramslye Farm (between the western and eastern elements of the site).

4.19 The Stage 3 Review goes on to note that these measures would help to reduce any potential visual influence of development on adjacent Green Belt land and would help to integrate development into the landscape. The Define Assessment (**Appendix 1**) confirms that these aspects of the scheme are deliverable at the site and accordingly will reduce the potential for Green Belt harm.

4.20 Additionally, the scheme will secure measures that would increase public access to the remaining Green Belt land (western parcel). These measures include:-

- Provision of links from the site to the existing PRow and pedestrian and cycle links to the adjacent Ramslye Estate;
- The ability to demonstrate a positive contribution to Biodiversity Opportunity Area targets; and the provision of publicly accessible open space and recreation.

4.21 In line with the NPPF (para 138), these measures would increase public access to remaining Green Belt land, thereby off-setting potential harm through compensatory improvements to the environmental quality and accessibility of the remaining Green Belt land.

4.22 The above context clearly demonstrates that there are exceptional circumstances for the Green Belt release of the site and the Local Plan is considered “sound” on this basis.

c) AONB

4.23 The eastern/development parcel of the site does not form AONB. In this regard, the development of the site can be considered in the context of the “setting” of the AONB which includes the western parcel (to be retained as Green Belt).

4.24 The assessment of the site within its AONB context is addressed within the “Landscape and Visual Impact Assessment of Proposed Allocation Sites within the High Weald AONB (Nov 2020)”. This report confirms that there are some characteristics that distinguish the western and eastern elements of the site. It notes of the contribution to local distinctiveness and intrinsic value of the western parcel and accordingly recommends its retention as open space. Dandara supports this assessment.

4.25 The report goes on to note that the eastern parcel lies outside the AONB, is influenced by adjacent housing to the north and east and subsequently has a substantially lower sensitivity to development. Accordingly, development within the eastern field is more consistent with the existing settlement pattern.

4.26 Furthermore, the potential landscape and visual effects for development have the potential to be mitigated by additional structural planting and through enhancements to the western parcel. The overall effects of development within this part of the site would be subject to detailed design, however if carried out sensitively in line with policy guidance, could have no residual significant effects.

4.27 Dandara accepts the findings set out in the evidence base in terms of AONB. The Define assessment (**Appendix 1**) demonstrates that the scheme is able to achieve a sensitive design response in an AONB setting. This will be achieved as follows through, *inter-alia*, the following:

- Retain the western parcel within AONB;
- Utilise western parcel as open space;
- Retain as far as possible trees/hedgerows lining A26 (east of site);
- Introduce high quality replacement planting where trees are to be removed;
- Ensure better connectivity to the countryside including enhancing PRoW routes;
- Secure biodiversity enhancements including improved links between areas of designated woodland.

4.28 Accordingly, the development will be sensitively located and designed with the setting of the wider High Weald AONB.

5.0 CONCLUSION

5.1 The Reg 19 “Pre-Submission Local Plan” is broadly supported. These representations fully support the allocation of the site at Spratsbrook Farm, Tunbridge Wells and the land use implications of the allocation are robustly addressed in the evidence base through the Green Belt review and AONB assessment.

5.2 Nonetheless, it is considered that Spratsbrook Farm can deliver a greater quantum of development at the site as amounting to 170 no. dwellings – making an efficient and effective use of the site in line with the NPPF. This is considered against the housing need background for the Local Plan and the need to achieve and secure an increased buffer (20%) in the Plan. The uplift of development at the site will help address affordability issues in the area as well as the potential for unmet needs from neighbouring authorities (i.e. Sevenoaks and Wealden).

5.3 These representations recommend further amendments to the Local Plan with regard the site. In summary these include:

- Increased flexibility to respond to the actual need for self/custom build homes at the time the scheme comes forward should such provision be viable;
- Alterations to the housing trajectory to bring the site forward for development earlier in the Plan period from 2023/24.

5.4 These representations further provide comments on the detailed requirements of the site allocation to seek to address the policy in terms of “soundness”. We trust our representations are helpful in this regard and we reserve the right to comment upon potential additional modifications at the Examination stage of the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara is seeking modifications be made to the Local Plan, in particular to policy AL/RTW16 (Land west of Eridge Road, Tunbridge Wells). Should such modifications not be made/submitted to the Inspector by TWBC, Dandara would seek to present its arguments at the relevant examination hearing sessions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Dandara

Question 2

Agent's Name and Organisation (if applicable) CBRE Ltd

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Paragraph Numbers: 5.153 - 5.193

[TWBC: Covering letter, Full Written Representation, Landscape Concept and Southborough Vision Document attached as Supporting Information. This representation has been input against Section 3 - Vision & Objectives, Section 4 - The Development Strategy, Policies STR/SS 1, STR/HA 1, AL/RTW 5 and STR/CRS 1 – see Comment Numbers PSLP_1685, PSLP_1688, PSLP_1689, PSLP_1697, PSLP_1703 and PSLP_1711]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
- . STR/HA1 / AL/HA4 – Land off Copthall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
- . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
- . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and
- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

5.6 Pre-Submission Local Plan Policy STR/PW1 sets out the strategy for delivery of strategic housing allocations, Policy STR/SS 1: The Strategy for land at Paddock Wood, including land at east Capel and Policy STR/SS 2: Paddock Wood Town Centre. This includes the delivery of approximately 3,933 – 4,033 new dwellings at Paddock Wood comprising:

- Approximately 3,490 – 3,590 dwellings at Paddock Wood, including land at east Capel (Policy STR/SS1);
 - At least 30 dwellings as part of the revitalisation of Paddock Wood Town Centre and east Capel (Policy STR/SS2);
 - Approximately 413 dwellings at Land at Mascalls Farm (Policy AL/PW1);
- this includes 313 dwellings which already benefit from planning permission.

5.7 Dandara support the key overarching principles of Policy STR/PW1 including the requirement to contribute towards flood storage/attenuation/mitigation measures and flood defence works to reduce local flood risk and assess the impact of development on the setting of the High Weald Area of Outstanding Natural Beauty (AONB).

5.8 However, Dandara suggest that the word "approximately" 3,490 – 3,590 dwellings is replaced with "between 3,490 – 3,590 dwellings" as this is intended to be a quantum range and should be updated in the interests of ensuring "effective" policies in accordance with Paragraph 35(c) of the NPPF.

5.9 Appendix A provides a clear conceptual approach to how the requirements of Policy STR/PW1 can effectively be integrated to deliver upon the allocation. This work has been produced to evidence how our own technical assessment work broadly supports the proposed approach that is presented in the Structure Plan. The detail of how this will be progressed will clearly be part of further consideration with key local and statutory stakeholders as part of the SPD process, however, should provide the confidence of deliverability and that the draft policy provides an appropriate basis from which to progress the masterplanning of the site.

5.10 Policy STR/SS1 allocates a series of land parcels at Paddock Wood and east Capel, including PW1_1 for approximately 3,490 – 3,590 new dwellings and for it to adhere to Garden Village principles. Dandara support the key overarching principles of Policy STR/PW1 and site allocation STR/SS1 and the need for new housing and delivering mixed communities. Dandara support the Council's approach to produce four Framework Masterplan SPDs that are informed by the overarching Structure Plan.

5.11 Dandara specifically support the provision of new homes on the Western Parcel (see Figure 4 above) which includes Land at Badsell Farm (SHELAA Site ref. 142) for the delivery of new homes, a new neighbourhood centre and the Council's promoted new sports/leisure hub and health centre which part comprises adjacent land to the north (SHELAA Site ref. 309) within the site allocation. Figure 5 below identifies land parcel 142. We have further comments with regards to the approach to the new sports/leisure hub which are addressed in Paragraphs 5.56 – 5.71 below but have no issue with the principle of the land being used for this use, subject to the Council satisfying themselves that there proposals are acceptable with respect to landscape, highways, heritage considerations etc. It should be noted that whilst located in part on Dandara's land interest, the sports/leisure provision if not being promoted or delivered by Dandara. Dandara can confirm the land as available to be safeguarded for such future use.

5.12 Dandara is committed to working with the other strategic site landowners to prepare the masterplan for the Western parcel, which includes the entirety of their land interest at Badsell Farm, Paddock Wood. Dandara also wish to work collaboratively with the strategic site landowners developing masterplans for the other Northern and Eastern parcels and Paddock Wood Town Centre to ensure that strategic growth at Paddock Wood is of a high quality, delivers the requirements of Policy STR/SS1 and is fully coordinated.

Emerging Concept Masterplan and Landscape Framework – Dandara 5.13 The enclosed Land at Badsell Farm, Paddock Wood Landscape Concept Document (June 2021) prepared by Define with input from JTP has been prepared in support of the site's residential allocation and includes an initial assessment of site capacity and land budget factoring in the above identified site constraints.

5.14 The Landscape Concept Document includes a remodelled emerging concept masterplan and landscape framework for the Land at Badsell Farm site shown in Figure 6 below which is based on a remodelled floodplain using detailed flood modelling to maximise the site's development potential and make an efficient use of land while including necessary flood management and open space/sport provision in accordance with Paragraphs 96, 122 and 157 of the NPPF and crucially, to satisfy the requirements of draft Policy STR/SS1. Importantly the emerging concept masterplan has been underpinned by the site technical evidence base collated to date (flood modelling, baseline heritage advice, landscape visual impact analysis) to test the robustness of the masterplan and to ensure it responds to the site setting and its constraints.

5.15 Dandara's emerging concept masterplan therefore differs to the Council's Structure Plan (Map 28 of the Pre-Submission Local Plan) which is understood to be based on existing Flood Zones (EA Flood Map which sets out high level food zones and does not identify Flood Zones 3a/3b) and excludes any development in Flood zones 3a. Dandara's indicative site masterplan is benefited by, and based on, more-detailed flood modelling and realigned floodplain to maximise site development potential and making an efficient use of land while including appropriate flood management and mitigation as part of achieving necessary "betterment".

5.16 Dandara note that a similar and successful approach to remodelling the floodplain to achieve betterment and maximise the developable areas in the interests of efficient use of land in accordance with the NPPF was taken as part of the Phase 2 Northstowe redevelopment (3,500 new homes) in Cambridgeshire (South Cambridgeshire District Council) LPA ref. S/2011/14/OL, dated 9 January 2017, as amended) in accordance with the Northstowe Area Action Plan (adopted July 2007). It is noted that the EA / Council were fully supportive of approach to floodplain remodelling and this strategy was found to be sound.

5.17 The level of technical input that has informed the Structure Plan on Page 149 is appropriate in the context of informing a strategic policy and is consistent with Paragraph 156 of the NPPF as it relates to considering flood risk. To ensure that the Structure Plan on Page 149 does not intentionally pre-determine the production of the more detailed SPDs (and accompanying more detailed evidence) the status of the Structure Plan (and its strategic, conceptual nature) should be included in the policy to avoid it being seen as a 'fix' and provide transparency as to its intentions.

5.18 The technical work undertaken by Dandara in respect of detailed flood modelling confirms that there is more than one way to achieve the outcome of the established masterplan and good place-making principles under the Policy STR/SS1 and the Structure Plan and accordingly, there should be sufficient flexibility at this stage as long as principles align. Such flexibility will allow detailed discussions with the Council and key stakeholders through the masterplanning, SPD and future development management process.

5.19 Dandara propose that detailed flood modelling undertaken will be shared with the Council and the Environment Agency as part of future masterplanning and pre-application discussions to ensure the flood strategy and necessary mitigation to achieve betterment is agreed prior to future planning application submission. However, Policy STR/SS1 and the associated future Framework Masterplans (SPDs) should be flexible to allow for alternative approaches, whilst still achieving the objectives of the policy.

Quantum 5.20 Dandara accept that the quantum and scale of residential development for each strategic land parcel within site allocation STR/SS1 will be informed by a detailed masterplanning exercise factoring the individual site constraints and will draw down from the approximately 3,490 – 3,590 new dwellings. This figure is marginally below the quantum tested by the Council in their latest SHELAA (January 2021) which confirmed site allocation Policy STR/SS1 is suitable for delivering circa 3,600 homes. In this context, the reference to ‘approximately’ in the policy is not appropriate and instead should read “between 3,490 – 3,590 dwellings”. This would allow for the further detailed masterplanning work to appropriately test and refine the development capacities associated with individual sites within the artificial cap.

5.21 Dandara suggest additional flexibility is built into Policy STR/SS1 to account for the distribution and quantum of development and specific parcel layout to be determined by detailed masterplanning process and to form part of the Framework Masterplan SPDs to be adopted by TWBC to guide future development.

5.22 The enclosed Land at Badsell Farm, Paddock Wood Landscape Concept Document (June 2021) prepared by Define and JTP has been prepared in support of the site’s residential allocation and includes an initial assessment of site capacity and land budget based on remodelled floodplain layout and factoring all other constraints set out above.

5.23 This site capacity assessment confirms the site has an indicative potential capacity of between 500 – 600 dwellings based on a total 17 ha net deliverable residential area including roads and an average density of 35 - 38 dwellings per hectare. This housing range is indicative and is subject to detailed masterplanning and design feasibility work.

5.24 The delivery of circa 500 – 600 homes on Land at Badsell Farm represents between 14-17% of the total 3,490 – 3,590 dwellings to be delivered and therefore represents a significant proportion of homes and key site within the wider strategic allocation Policy STR/SS1.

Heritage 5.25 Supporting Paragraph 5.166 to Site allocation Policy STR/SS1 notes that whilst there are no listed buildings within the allocated sites, there are clusters of listed buildings adjacent to the site boundaries, including Badsell Manor Farm and the settings of the settings of these buildings form an important part of the heritage of the town.

5.26 Accordingly, Dandara have undertaken a Heritage Baseline study (Turley, August 2020) which concludes that appropriate mitigation and separation distances will ensure that any adverse impacts on the setting of the Mill House Group is avoided.

5.27 The heritage impact on the Badsell Manor Group is likely to be more sensitive due to its historic, functional and visual connection with the surrounding agricultural lands (including the site). However, confirms the following mitigation is proposed to the emerging landscape framework in response to the site’s heritage sensitivities:

- Retention of a planted buffer to the sides of Badsell Manor Farm;
- Enhancement of existing rows of trees along boundaries adjacent to Badsell Manor Farm and along the field to the north of Badsell Manor Farm;
- Retention of the existing field patterns within the site and/or reflection of these patterns within the development through landscaping and arrangement of landscaping, built form, transport routes, amenity, etc.

5.28 The Heritage Baseline study concludes that any perceived adverse impact on the significance of the listed buildings arising from development of the Site and the associated change in part of its landscape setting, would be towards the “lower end of the scale of less-than-substantial harm, identified by NPPF paragraph 196”. In that context, that less-than-substantial harm should be weighed against the significant public benefits of the proposed development, having regard to the considerable weight and importance to be placed on the desirability of preserving their special interest and setting (i.e. sustaining their heritage significance) in considering the overall acceptability of development on-site.

5.29 Therefore, the emerging concept masterplan for Land at Badsell Farm incorporates appropriate mitigation to demonstrate how the character, setting and significance of adjacent heritage assets associated with the Mill House and Badsell Manor identified groups of listed buildings can be preserved in accordance with paragraph 196 of the NPPF. Dandara note that sufficient flexibility should be included in the site allocation Policy STR/SS1 as to the specific design approach through the masterplanning process but provides confidence that heritage won't be a constraint to deliverability of the established principles.

Local Exceptional Circumstances5.30 Site allocation Policy STR/SS1 results in the strategic release of Green Belt land at Paddock Wood. This includes the release of the Western Parcel from the Green Belt.

5.31 As set out in the previous Chapter, there are clear Plan-Wide Exceptional Circumstances that support the release of Green Belt to deliver the objectives of the Plan.

5.32 The site is included in the Council's Green Belt Study Stage Three: Assessment of Green Belt Allocations (November 2020) prepared by LUC. Former Draft Allocations AL/CA3 and AL/PW1 (herein referred to as AL/PW1) includes an area of land of approximately 148 ha to the west and north-west and north of Paddock Wood that will be released from the Green Belt to deliver the vision for Paddock Wood. This is part of a larger allocation that also includes areas of non-Green Belt land to the north and east of Paddock Wood. This allocation includes two whole parcels - PW1_1 (southwest parcel) which comprises the entirety of Land at Badsell Farm, Dandara's land interest and PW1_2 (north-west parcel) - and small parts of PW1_3 (north central parcel) and PW1_4 (north-west central parcel) as shown in Figure 7 below.

5.33 The Green Belt Study Stage Three assessment confirms that overall, AL/PW1 makes a "strong" contribution to the prevention of encroachment on the countryside and a "relatively weak" contribution to prevent coalescence of neighbouring towns; and the impact of its release on the adjacent Green Belt is "moderate".

5.34 That said, Green Belt Study Stage Three assessment correctly references variations in harm for sub-Green Belt parcels. The western (blue) portion of Dandara's land interest (defined on its western edge by Tudeley Brook and on its eastern edge by the hedgerow lying between the inset edge and Tudeley Brook as show in Figure 7 above) makes a "relatively strong" contribution to Green Belt Purpose Test 3, but is considered to "contribute less to the impact on the perceived separation between Tudeley Village and Paddock Wood and will cause less impact on the distinction of adjacent Green Belt land to the south-west, west, north-west and north". Accordingly, the impact associated with the release of this area is "minor-moderate" and the harm rating is "moderate".

5.35 Dandara consider the Council's Green Belt Studies (Stages 1-3) to be detailed, robust and in accordance with Paragraph 35(d) of the NPPF. The Green Belt assessment appropriately captures the assessment of the site and, in turn, the policy appropriately responds (through the Structure Plan) to ensuring that residential development is contained to the east of the site with the western boundary kept more open through the indication of sports use on this part of the site.

5.36 The existing boundary between the Green Belt and Paddock Wood on the western approach into the town is abrupt, characterised by a dense housing area. The release of the site from the Green Belt offers the potential for a more logical boundary to be established to the Green Belt which is capable of enduring in the longer term using strong features (in the tree belt and road) which are physical and likely to be permanent.

5.37 The enclosed Landscape Concept Document (June 2021) (Appendix A) includes Define's independent study of the role of the Land at Badsell Farm site in delivering the purposes of the Green Belt. This study concurs with the findings of the Stage Three Green Belt Study. The existing belt of mature trees along the A228 provides a robust and easily identifiable new Green Belt boundary, and there is the potential to make this more robust, with the planting of additional vegetation as part of the masterplan.

5.38 All of the mitigation measures proposed by the Stage Three Green Belt Study are included within Dandara's emerging concept masterplan and landscape framework.

5.39 The Council's Development Strategy Topic Paper (February 2021) at Page 60 sets out the Local Exceptional Circumstances case for the release of Land at Paddock Wood (including land in east Capel). This is summarised as follows:1. the land proposed to be released from the Green Belt here is part of a wider release of non-Green Belt land to deliver development in a sustainable location,

around an existing settlement, with the potential to rejuvenate and revitalise the town centre: approximately 48% of the total area of land included for the comprehensive urban extension is currently designated as Green Belt; 2. through the comprehensive development of this site, and particularly the land to the west of Paddock Wood (i.e. that which would be released from the Green Belt), it has been identified through the Strategic Flood Risk Assessment that there is the potential for the flood mitigation required in association with this development to deliver “betterment” through reduced flood risk to existing areas of Paddock Wood and its surrounds. This requirement is specifically included in the policy, and is considered to make a significant contribution to the exceptional circumstances for the release of this land from the Green Belt;

5.40 We fully support the identification of the 3 points raised above. In developing point (1) further, in promoting the sustainable development on Paddock Wood it is clear that the benefits to sustainable development would be significantly less if further expansion of Paddock Wood was prioritised on ‘non-Green Belt’ land. Given the way that the Green Belt boundary is drawn to avoid Green Belt land would result in greater travel distances to the train station and key services in the High Street and would be inconsistent with Paragraph 138 of the NPPF.

5.41 Furthermore, in respect of (2) it is important to state that the betterment that would result is a product of the site being allocated for housing development which in effect acts as enabling works to the proposed remodelling. It would not be feasible for the remodelling work to be undertaken in isolation from the site being allocated for development.

5.42 As set out in Chapter 6 of the Landscape Concept Document (June 2021), Dandara’s emerging concept masterplan has been informed by the requirement for land to the south-west of Paddock Wood to provide flood mitigation which is central to the ‘exceptional circumstances’ as outlined above and in support of release of the land from the Green Belt. BWB have undertaken detailed flood modelling for the Site to understand the flood mitigation potential of Land at Badsell Farm to make the development more flood resistant and resilient to manage residual flood risk and achieve flood betterment for existing dwellings to the south-west side of Paddock Wood as required by draft Policy STR/SS1. BWB have identified the opportunity to remodel the floodplain and, in doing so, provide flood mitigation alongside additional developable area.

5.43 The emerging concept masterplan demonstrates that the remodelling of the floodplain and development parcels could in our view result in a better urban design response which can be tested through masterplanning and pre-application process, hence the need for the site allocation to provide sufficient flexibility.

5.44 Dandara therefore suggest the Council provide greater flexibility in Policy STR/SS1 and the emerging Structure Plan to reflect alternative options for the distribution of development and remodelling the floodplain in the interests of maximising the site’s development potential and ensuring an efficient use of land, while including necessary flood management and betterment to Paddock Wood required as part of the Local Exceptional Circumstances case in accordance with Paragraph 122 of the NPPF. The provision of a larger developable area would boost housing capacity on site and would help address the Council’s housing need and maximise sustainable development at allocated strategic sites in accordance with Paragraphs 73, 122 and 157 of the NPPF and crucially, to satisfy the requirements of draft Policy STR/SS1.

AONB Considerations 5.45 The Badsell Farm site and wider Paddock Wood masterplan (Policy STR/SS1) are not located within the High Weald AONB.

5.46 The key published document for understanding the relationship between the High Weald AONB and the site is the Council’s AONB Setting Analysis Report. This document recognises that development to the west of Paddock Wood (western parcels of draft allocation STR/SS1, including PW1_1) are “unlikely to have an adverse effects on the setting of the High Weald AONB”. However, to ensure a positive scheme is developed, a series of specific mitigation measures are proposed as summarised below:

- . Promote a landscape led approach to masterplanning that creates a structure to contain the allocation sites which is consistent with the character of the adjacent High Weald AONB.
- . Test the visibility of proposed development including preparation of LVIA with viewpoint analysis from the ‘Millennium Viewing Point’, a critical viewpoint location, using wireframes or photomontages in order to fully assess the potential effects on the setting to the AONB.
- . Any masterplan should adhere to relevant guidance including the National Design Guide (January 2021) and should take inspiration from the High Weald Design Guide and Management Plan.

- . Give careful consideration to the views and rural setting of listed buildings and historic farmstead, which are visible within the landscape from the High Weald AONB.

5.47 Dandara support the conclusions of AONB Setting Analysis Report and consider this to be a robust evidence base document.

5.48 The enclosed Landscape Concept Development Report (June 2021) includes an assessment of key viewpoints and assesses the response to the AONB.

5.49 Therefore, as set out in the enclosed Landscape Concept Development Report (June 2021), Dandara consider the emerging concept masterplan to positively include and respond to the Council's suggested AONB mitigation requirements and therefore is unlikely to have an adverse effect on the setting of the High Weald AONB as concluded by the AONB Setting Analysis Report.

Minerals Safeguarding5.50 It is acknowledged that the adopted Kent Minerals and Waste Local Plan 2013-2030 (September 2020) confirms that Land at Badsell Farm is located within a designated area of sandstone as part of the Upper Tunbridge Wells Sand Formation.

5.51 Site allocation Policy STR/SS1 (Part 11) requires consideration for potential mineral deposits on the Western and Eastern land parcels of site allocation Policy STR/SS1 and for any viably workable minerals should be extracted prior to development commencing on the site.

5.52 As currently drafted the policy is unsound as the requirement for prior extraction of mineral before development can commence would affect the delivery of key strategic infrastructure at Paddock Wood and, in turn, delay when benefits (including regeneration benefits associated with Paddock Wood Town Centre) could be realised. As such, Dandara objects to the current wording of the policy.

5.53 This approach has recently been considered through the examination of the South Oxfordshire Local Plan in a similar context where, at Paragraph 295 of the Inspector Letter, it was confirmed that a similar policy to STR/SS1 (Part 11) would not be consistent with Paragraph 204 (D) of the NPPF (2019). In that case, and as advocated here, we suggest that the policy is amended to include reference to "encouraging developers to extract minerals prior to non-mineral development taking place where this is practical, viable and environmentally feasible".

Housing Delivery5.54 The Council's Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) that allocation STR/SS1 is to deliver between 3,490 – 3,590 new homes with an average delivery of 300 dwellings per annum (dpa) in the medium - long term; 2025/26 – 2036/37.

5.55 Dandara support the planned growth and quantum of homes at Paddock Wood. Dandara also strongly endorse Policy STR/PW1 which suggests the western land parcel of Paddock Wood should be delivered in two parts referring to Dandara's and Crest Nicholson's separate land interests.

5.56 Dandara note that Draft Policy STR4 (Ensuring Comprehensive Development) promotes comprehensive site development. Whilst Dandara support the thrust of this policy, it should be amended to reflect a more flexible approach to housing delivery in the strategic allocations. For example, where land parcels that are not inter-dependent one another to come forward, as in the case of the Western Parcel of Paddock Wood (Policy STR/SS1) this will allow two parcels to be delivered independently in the interests of the timely delivery of new homes and to ensure that any delivery issues with one land parcel do not unnecessarily delay and fetter development elsewhere. Dandara suggest the detail and phasing of the strategic sites could be worked through the Framework Masterplan SPD process and would ensure that Policy STR/SS1 is "effective" in accordance with Paragraph 35(c) of the NPPF.

5.57 Land at Badsell Farm is suitable and has capacity for circa 500-600 dwellings. However, Dandara suggest the average delivery figure of 300 dpa is overly conservative when factoring this is a strategic allocation and this delivery figure is shared across principally four strategic sites. Dandara recognise the need to demonstrate a regular and achievable rate of supply to an Inspector but, suggest a delivery rate of circa 350-390 dpa is more suitable and realistic.

5.58 Dandara wish to draw the Council to their Knights Park scheme were 70-100 dwellings were delivered per annum.

5.59 On the Badsell Farm site alone, the site is available and there is nothing preventing the site being delivered in the medium – long term i.e. 2025/26 – 2032/33/34. Dandara expect to deliver circa 75-100 dpa as part of a multi-phased development. The Council's trajectory should be revised accordingly in the interests of being "justified" and found to be "sound" by an Inspector in accordance with the NPPF.

Development of the site will secure appropriate “green”, “grey” and “blue” infrastructure, as including open space and landscape provision, as well as access and on-site drainage infrastructure.

Neighbourhood Centres5.60 Site allocation Policy STR/SS1 (part 2b) identifies Land at Badsell Farm as having potential for one of three new neighbourhood centres with an overall, combined floorspace cap of 2,000 sqm commercial floorspace (Class E). Dandara welcomes this neighbourhood centre allocation in the interests of good placemaking, providing complimentary services and local facilities to support new housing and creating sustainable communities in accordance with the NPPF, PPG and the Government’s recent Living with Beauty publication (January 2020).

5.61 However, Dandara would like to understand who is delivering the neighbourhood centre and what are the timescales envisaged for its delivery.

Infrastructure5.62 We are continuing to work with TWBC through the strategic working group to consider the information presented in the Infrastructure Delivery Plan and reserve the right to comment further on this during the formal examination process as necessary. Below we have set out principal comments in respect of the ‘headline’ infrastructure provision.

Sports Provision5.63 Site allocation Policy STR/SS1 (parts 2d and e) proposes the creation of a new sports/leisure hub and possible health centre which have been promoted by the Council on Dandara’s land (some also extends to the land of Crest Nicholson). The Policy STR/SS1 states:“...a new sports and leisure hub, which could incorporate an indoor 25m swimming pool and indoor and outdoor sports facilities. Around 10 hectares of land should be safeguarded within the western parcel (edged in blue on Map 27), to the south of the railway line and to the east of the A228 for this purpose”.

5.64 The reference in the policy to ‘could’ creates ambiguity as what is required to be delivered as part of the policy vs what TWBC has aspirations to deliver on the site (i.e. beyond the requirements of CIL 122). As set out further below, there is no justification for a swimming pool to be delivered based on the evidence base and scale of the allocation, however, we appreciate that TWBC may have its own aspirations to deliver more transformational infrastructure benefits alongside the allocation to seek to address existing deficiencies in Paddock Wood that are highlighted in the evidence.

5.65 Dandara’s position of open space and sports provision is summarised as follows:1) The land for the Council promoted sports/leisure hub area is available if it is considered appropriate/necessary and based on local sports / open space needs;2) Dandara can in any event meet the open space / play space needs of major residential-led mixed use development on-site own site and is not reliant on other sites coming forward or not;3) It is therefore for the Council to provide robust evidence as to why the amount / type of sport/leisure provision and location, what layout is required, as well as to ensure appropriate access, including necessary public transport connections.

5.66 The Council’s Tunbridge Wells Retail and Leisure Study (April 2017) indicates the existing need for a new swimming pool in Paddock Wood, independent of the allocation. The Council’s Indoor/Built Sports Facility Needs Assessment (June 2018) indicates the requirement for a new 25m swimming pool in Paddock Wood, to meet current and future growth (our emphasis) as part of the new Local Plan but is not specific to the strategic allocation at Paddock Wood and does not specify where. Dandara note that the emerging evidence base suggests a need for half a new swimming pool in Paddock Wood based on the proposed strategic allocation only.

5.67 The Council’s Playing Pitch Strategy 2017-2033 (November 2017) states that the urban expansion of Paddock Wood generates a demand for a series of play pitches including 5 x adult 11 vs 11 pitches, 2 x junior 11 vs 11 pitches, 2 x junior 9 vs 9 pitches, 3 mini soccer 7 vs 7 pitches and 2 mini soccer 5 vs 5 pitches. The strategy includes a new sports hub with grass and 3G runner crumb pitches.

5.68 The Council’s Tunbridge Wells Borough Council Open Space, Sport and Recreation Study (June 2018) confirms that Paddock Wood currently has a sufficient supply of all typologies except for youth play space. The study confirms there are ‘gaps’ in access to children’s play space in the north west of Paddock Wood.

5.69 The study highlights the potential for additional youth facilities (or expanding existing ones) within parks and recreation grounds. The study was based on the planned growth at Issues and Options stage and the need for 7,928 dwellings and to accommodate 17,600 new dwellings. This evidence base has not been updated to reflect the Draft Local Plan and the open space and play space requirements specific to Paddock Wood.

5.70 Dandara's emerging concept masterplan (see Figure 6 above) includes the 10Ha of safeguarded land for the Council's new sports/leisure and health hub in accordance with Site allocation Policy STR/SS1 (parts 2d and e). An initial open space assessment has been undertaken which confirms the following quantities of open space in Table 2 below which are considered likely to be needed on the basis of delivery of between 500 and 600 new homes.

5.71 Dandara's emerging concept masterplan currently shows the quantities of play and allotment typologies, and in addition provides significantly more amenity and parks and recreation space to better reflect the site's landscape setting and character.

5.72 The above review of the open space requirements of Capel Parish and Paddock Wood indicates that the use of Land at Badsell Farm for the provision of sporting facilities and youth play space would help to address a deficiency. Analysis of walking distances also indicated that a sports hub in this part of the site may be best suited to provision of some, but not all, of the sporting and leisure needs of Paddock Wood, raising the potential that the Site could deliver the sports fields use, with the built form elements (e.g. a swimming pool or leisure centre) being located elsewhere.

5.73 Dandara fully acknowledges the need for appropriate sports and leisure provision to be provided as part of the package of infrastructure that is delivered with the allocation. Whilst Dandara would not be responsible for building the facility proposed, Dandara supports the principle of safeguarding land on the site to ensure that, through the masterplanning process, this need is met, if the location/type is considered to be appropriate and necessary.

5.74 As part of the masterplanning process ahead of the submission of planning applications on the site, it is prudent to consider what implications the proposed sports hub allocation would have for the existing Putlands Sports & Leisure Centre. The existing sports and leisure centre are arguably better placed, geographically, to benefit both the emerging and existing population of Paddock Wood and, as such, it may be a better opportunity for financial contributions to support the improvement and expansion of this facility. In addition, what are the implications of a new sports/leisure hub at Land at Badsell Farm, Western Paddock Wood on this facility, can the two sports/leisure hubs operationally work together and will they have a different sports offering?

5.75 Therefore, Dandara supports the approach to safeguarding land in the Structure Plan for a proposed leisure, sports and recreation use so allow this to be considered further through the masterplanning process to determine exact open space / sports provision requirements, which are viable and both appropriate and necessary in this location.

5.76 Dandara seek additional clarity from TWBC on the type and quantum of sports provision they are looking accommodate on Land at Badsell Farm, Western Paddock Wood. It is acknowledged this will be informed by the masterplanning process and preparation of Framework Masterplans but it is not clear how much of the above identified sports pitch and other facility demands can be met on site, timescales for delivery and who will deliver this major sports and leisure infrastructure.

5.77 Dandara also suggest Draft Policy STR/SS1 is amended to clarify that the delivery of a sports/leisure hub will be a matter to be specifically dealt with through an equalisation agreement / pooled planning obligations, and crucially, that the provision of land will be counted as part of Dandara's share of these contributions.

Highways Approach

5.78 Proposed strategic growth at Paddock Wood is supported by new highway and transport infrastructure requirements. Site allocation Policy STR/SS1 (part 7) seeks to secure the phased delivery of highway and transport infrastructure, including on- and off-line improvements to the A228 around Colts Hill and the provision of a new highway to bypass Five Oak Green.

5.79 The Council's Infrastructure Delivery Plan (March 2021) confirms this new A228 Colts Hill bypass is of critical importance and is required in the medium term. Dandara however note that the Council's evidence base (including the Transport Assessment Report Update, March 2021 and Strategic Sites and Infrastructure Study 2021) confirm that the provision of a new highway which bypasses Five Oak Green is only required for the development of Tudeley Village. As stated at Paragraph 6.34 of the Strategic Sites and Infrastructure Study (2021): "Therefore, it is recommended that should Tudeley Village come forward, a link road is needed to reduce highway trips through Five Oak Green. The link road would need to join the A228 near Colts Hill".

5.80 Furthermore, under the Paddock Wood 'only scenario' it is confirmed at Paragraph 6.76 that this would result in the removal of the need for the Five Oak Green Bypass.

5.81 In this context, as drafted Policy STR/SS1 (part 7) is not justified in requiring contributions to be made by Paddock Wood allocations to the provision of the Five Oak Green bypass. Whilst we

acknowledge that as a result of the cumulative nature of the schemes they may be a requirement to make a proportional contribution, this is not currently reflected in the wording of the policy which reads as if the bypass is a pre-requisite for the development of Paddock Wood, when the evidence suggest to the contrary, that it is not necessary.

5.82 Accordingly, Dandara object to Policy STR 6 (Transport and Parking) part c) 'Highway Network' on the basis that the provision of the Five Oak Green bypass and measures along the A228 do not relate to the Western Parcel and therefore are not directly related. This policy should be amended accordingly so it is consistent with Paragraph 56(b) of the NPPF.

5.83 In addition, and in a similar vein, Policy STR/SS1 (part 15) should be amended to distinguish between the development of Paddock Wood and Tudeley. The reference to 'or a version of this document as amended should be replaced with the reference to the document upon which the viability assessment to inform the allocation has been undertaken. Without this the policy is left unclear and unambiguous as to its intentions.

5.84 In light of the above, Dandara seek assurance from TWBC that all such infrastructure contributions are strictly necessary to Land at Badsell Farm to make the development acceptable in planning terms; are directly related to the development; and are proportionate and therefore, fairly and reasonably related in scale and kind to the development in accordance with the planning obligation tests set out at Paragraph 56 of the NPPF.

5.85 Dandara also note that the emerging Paddock Wood and East Capel Structure Plan shows an indicative bus route through the Western parcel connecting to the proposed sports/leisure hub with access from Badsell Road. Dandara note that the detailed bus route will need to be determined as part of the masterplanning process and agreed with KCC Highways. Dandara can confirm that the development of Land at Badsell Farm is deliverable from independent access to the south, from Badsell Road based on the technical work undertaken.

5.86 Accordingly, Dandara suggest that sufficient flexibility is shown in the Council's revised Structure Plan and Policy STR/SS1 specifically mentions that internal road layout and access will be determined by the masterplanning process and negotiation with KCC Highways.

Pedestrian and Cycling Approach 5.87 As set out in the enclosed Landscape Concept Development report (June 2021), Dandara's emerging concept masterplan for Land at Badsell Farm has been informed by the Tunbridge Wells Strategic Masterplanning and Infrastructure Study Design Principles. In respect to highways and pedestrian and cycling principles, the emerging concept masterplan proposes east to west connecting paths/cycle paths which connect the site (including the proposed sports/leisure / health hub) to existing and proposed crossing points over Gravelly Steams, to existing paths within the south-west of Paddock Wood. Dandara consider the emerging concept masterplan to satisfy the pedestrian and cycling design principle.

Rail Crossing 5.88 Site allocation Policy STR/SS1 (part 2i) seeks the requirement for a new north-south pedestrian and cycle link over the railway line (within the western parcel). Whilst Dandara support this infrastructure, it is considered this should be an aspiration rather than a requirement. Further detail is required on how this will be delivered and funded. It is also acknowledged that it may not be possible to deliver the railway crossing as this will require agreement with Network Rail who will undertake the relevant works.

5.89 Dandara are mindful that there are already significant infrastructure costs to be secured via S106 financial obligations and the new pedestrian/cycle bridge is not necessary to facilitate access from Land at Badsell Farm site to primary connections of Paddock Wood Town Centre and Paddock Wood Railway Station as part of ensuring sustainable development and ensuring planning obligations requested by the Council are necessary; directly relate to the development; and fairly and reasonably related in scale and kind to the proposed development in accordance with the key planning obligation tests set out under Paragraph 56 of the NPPF.

Community Infrastructure Levy 5.90 The Council do not currently have an adopted Community Infrastructure Levy (CIL) Charging Schedule. However, the Council are expected to prepare a CIL Charging Schedule in parallel to the submission and Examination of the emerging Local Plan. Dandara seek clarity on the Council's approach to CIL and associated timing. Dandara also seek further clarity on the role CIL will have for strategic allocations such as Paddock Wood.

5.91 Given the exhaustive list of new infrastructure requirements and 40% affordable housing requirements, it is strongly advocated that the strategic allocations including Policy STR/SS1 have a

zero CIL rating for all development uses as part of encouraging the delivery of these major-scale and complicated sites. The development of Land at Badsell Farm will be able to deliver any necessary infrastructure provision on-site through S106 contributions as necessary and therefore will not burden existing infrastructure, which could justify a CIL contribution.

5.92 Dandara suggest TWBC review Policy STR 5 (Infrastructure and Connectivity) in light of the soundness tests set out at Paragraph 35 (a-d) of the NPPF to ensure the approach to infrastructure contributions is positively prepared; justified; effective and consistent with national policy, specifically, Paragraph 56 of the NPPF and the CIL Regulations 2010 (as amended).

Ensuring Clarity in the Policy STR/SS15.93 Dandara support the Council's approach to the requirement for the production of four Framework Masterplan SPDs that are governed by the overarching Structure Plan.

5.94 However, Dandara are mindful that Paragraph 16 (Part d) of the NPPF requires Plans to: "d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

5.95 With reference to Paragraph 16 of the NPPF, and as stated in Dandara's previous Draft Local Plan (Regulation 18) representations (dated November 2019), Policy STR/SS1 should be restructured to provide individual policies or 'sub policies' with specific criteria for each of the four strategic land parcels and in doing so reduce the length of, and simplify, the wording of this site allocation policy. This would allow specific design and policy criteria to be tailored to the individual land parcels, and make it clear what is to be delivered for each of the four strategic parcel areas and include some general criteria that applies to the entire strategic allocation.

5.96 The revised policy wording set about above would also assist Applicant's with future masterplanning and progression to pre-application and planning application stage as well as assisting Council Officers in applying the policy as part of the determination of future applications. We also consider that it would be of benefit to ensuring that the policy is easily understood by members of the public and the local community. We look forward to working with TWBC and the other land promoters at Paddock Wood through a Statement of Common Ground to achieve the necessary changes.

5.97 This approach would also allow the specific infrastructure items in the Council's Infrastructure Delivery Plan to be assigned to the four strategic land parcels or masterplan areas thus making it clear who is paying for what and also to ensure there is no double counting.

5.98 Dandara also suggest additional flexibility is built into masterplanning approach to Policy STR/SS1 to recognise that the distribution and quantum of development and specific parcel layout will be progressed by the next master planning SPD stage and then future planning applications for each parcel that are submitted in general accordance with the adopted Framework Masterplan SPD, again allowing for flexibility within the detailed scheme design.

5.99 To be clear, Dandara is supportive of site allocation Policy STR/SS1 subject to the proposed policy amendments in the interests of soundness as summarised in Appendix B. The proposed restructure of the Policy STR/SS1 would make the policy more targeted and succinct and importantly, more robust in relation to the key policy tests set out at Paragraph 35 of the NPPF. It is acknowledged that the proposed amendments to Policy STR/SS1 will be refined through the SoCG with TWBC.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to Table 3 of Dandara's Reg.19 Written Representations Report prepared by CBRE (June 2021). In summary the proposed amendments are set out below:

STR/SS1: Part 1-15 Policy STR/SS1 should be restructured as follows:

- . Provide individual policies or 'sub policies' with specific criteria tailored to each of the four strategic land parcels or Masterplan Areas. The specific design criteria specific and directly related to each strategic land parcel will help guide future development.
- . Specific criteria for each strategic land parcel should provide sufficient flexibility to acknowledge that the distribution of development within the parcel areas to be determined by the Masterplanning process.
- . General policy criteria should be provided that relates to the entire Paddock Wood strategic allocation.
- . Specific infrastructure items in the Council's Infrastructure Delivery Plan to be assigned to the four strategic land parcels or masterplan areas thus making it clear who is paying for/delivering what and also to ensure there is no double counting.

Proposed restructuring of Policy STR/SS1 would make the This will reduce the length of, and simplify, the wording of this site allocation policy and make it more user friendly.

This approach will also allow specific design and policy criteria to be tailored to the individual land parcels thus making it more targeted, robust and justified in accordance with Paragraph 35 of the NPPF.

STR/SS1: 2 (part a) Dandara support the proposed quantum for the entire strategic allocation however Part 2 (a) should read "between" not "approximately" 3,490 – 3,590 dwellings". The proposed change will make the policy more precise and robust and justified in accordance with Paragraph 35 of the NPPF.

STR/SS1: 2 (part b) Dandara welcomes this neighbourhood centre allocation. Dandara however seek clarification on who is delivering the neighbourhood centre and what are the timescales envisaged for its delivery. Additional detail on the delivery of the neighbourhood centre allocation would make the policy criteria more robust in accordance with Paragraph 35 of the NPPF.

STR/SS1: 2 (part d) Draft Policy STR/SS1 should be amended to clarify that the delivery of a sports/leisure hub will be a matter to be dealt with through an equalisation agreement / pooled planning obligations, and crucially, that the provision of land will be counted as part of Dandara's share of these contributions. The proposed amendments will add more certainty to the delivery of sports/leisure provision and to ensure infrastructure costs are evenly distributed across the strategic parcels and future planning obligations satisfy the necessary tests: "necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development" in accordance with paragraph 56 of the NPPF.

STR/SS1: 2 (part i) Whilst Dandara support this infrastructure, it is considered this should be an aspiration rather than a requirement. Further detail is required on how this will be delivered and funded. Further justification is required to ensure the proposed planning obligation(s) requested by the Council are necessary; directly relate to the development; and fairly and reasonably related in scale and kind to the proposed development in accordance with the key planning obligation tests set out under Paragraph 56 of the NPPF.

STR/SS1: 7 Policy STR/SS1 (part 7) is not justified in requiring contributions to be made by Paddock Wood allocations to the provision of the Five Oak Green bypass. The policy should be re-worded to remove this requirement as it is not a pre-requisite for the development of Paddock Wood and is not necessary. Dandara suggest that sufficient flexibility is shown in the Council's revised Structure Plan and Policy STR/SS1 specifically mentions that internal road layout and access will be determined by the masterplanning process and negotiation with KCC Highways.

Further justification is required to ensure the proposed planning obligation(s) requested by the Council are necessary; directly relate to the development; and fairly and reasonably related in scale and kind to the proposed development in accordance with the key planning obligation tests set out under Paragraph 56 of the NPPF.

STR/SS1: 11 As currently drafted the policy is unsound as the requirement for prior extraction of mineral before development can commence would affect the delivery of key strategic infrastructure at Paddock Wood and, in turn, delay associated regeneration benefits. Dandara suggest that the policy is amended to include reference to “encouraging developers to extract minerals prior to non-mineral development taking place where this is practical, viable and environmentally feasible”.

The proposed change will make the policy more targeted and robust and justified in accordance with Paragraph 35 of the NPPF.

STR/SS1: 15 Policy STR/SS1 (part 15) should be amended to distinguish between the development of Paddock Wood and Tudeley. The reference to ‘or a version of this document as amended’ should be replaced with the reference to the document upon which the viability assessment to inform the allocation has been undertaken. Without this the policy is left unclear and unambiguous as to its intentions.

The proposed change will make the policy more targeted and robust and justified in accordance with Paragraph 35 of the NPPF. Further justification is required to ensure the proposed planning obligation(s) requested by the Council are necessary; directly relate to the development; and fairly and reasonably related in scale and kind to the proposed development in accordance with the key planning obligation tests set out under Paragraph 56 of the NPPF.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPF.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of ‘justified’ with the requirement now for ‘an appropriate strategy’ rather than ‘the most appropriate strategy’.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Dandara

Question 2

Agent's Name and Organisation (if applicable) CBRE Ltd

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

[TWBC: Covering letter, Full Written Representation, Landscape Concept and Southborough Vision Document attached as Supporting Information. This representation has been input against Section 3 - Vision & Objectives, Section 4 - The Development Strategy, Policies STR/SS 1, STR/HA 1, AL/RTW 5 and STR/CRS 1 – see Comment Numbers PSLP_1685, PSLP_1688, PSLP_1689, PSLP_1697, PSLP_1703 and PSLP_1711]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
- . STR/HA1 / AL/HA4 – Land off Copthall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
- . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
- . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and
- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

Reg.18 - Policy AL/CRS13

Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road – Omission Site

The Site is not allocated in the Pre-Submission Local Plan. The site has been omitted from the previous Draft (Regulation 18) Local Plan (site ref. AL/CRS13 / SHELAA ref. 120) version and was formerly allocated for approximately 40 residential dwellings with the development of the site requiring a highways assessment and works, in terms of access.

5.222 The Council's previous iteration of their SHELAA (July 2019) which was prepared in support of the Draft (Regulation 18) Local Plan confirmed that the site is likely to be sustainable, due to its proximity to the Limits to Built Development (LBD) and adjoining existing built development. The assessment also noted the availability of the site and its ability to be delivered within the Plan period.

5.223 The Council's updated SHELAA (2021) includes the site (SHELAA ref. 120) (see Figure 18 below) for 40 dwellings but despite being considered available, the site was deemed unsuitable on the basis: "Site is in proximity to the Limits to Built Development and is adjoined by existing built development. The site is likely to be sustainable in this context. However, it has not been possible to demonstrate that a safe, suitable and sustainable access for both vehicles and pedestrians can be achieved. There are traffic safety issues at the junction of Mill Lane and Sissinghurst Road (A262) that are unlikely to be overcome (ref planning refusal 19/00308)".

5.224 The SA undertaken to inform the SHELAA site appraisal confirmed the "loss of greenfield land and potential boundary issues with the AONB contribute to the negative scores for Land Use and Landscape". However, Paragraph 10.15 of the Committee Report for ref. 19/00308 (dated 12 August 2020) reaches a different conclusion. On the basis the site lies outside the AONB, the Council's Landscape Officer considers the proposed development is "not considered to Council's Landscape Officer advise that it is not considered to cause significant harm to the landscape character of the area or indeed the setting of the AONB".

5.225 However, the Council's Landscape Sensitivity Assessment (July 2018) confirms that "tree cover alongside the road precludes any significant intervisibility between town and countryside".

5.226 In addition, the Council's AONB Setting Analysis Report (November 2020) confirms that the existing "hedgerow and tree belt on the southern boundary of the site lines the road, screening the site from view. The existing land use within the site is consistent with the AONB to the south, however the site is surrounded by housing on three sides and development of the site would be consistent with the emerging settlement pattern". Similarly, the Paragraph 10.17 of the Committee Report for ref. 19/00308 states: "Whilst there would clearly be some landscape harm by virtue of the introduction of the residential development, this harm would be reduced by virtue of the layout proposed and the retention of the majority of the boundary trees which would reduce views".

5.227 Overall, the Committee Report for ref. 19/00308 (Paragraph 10.38) concludes that the "wider character here is unlikely to be significantly impacted as a result of the proposed development".

5.228 Dandara note that site CRS13 was not included as part of the Council's LVIA (November 2020), a supporting evidence base document to the Pre-submission Local Plan.

5.229 Therefore, the Council's evidence base does not provide landscape sensitivity grounds to support the omission of the site as a potential housing allocation.

5.230 Dandara has undertaken architectural and feasibility work for the site. This work informed a recent planning application for site for 42 new dwellings as detailed below.

5.231 The site is suitable for residential development as concluded in the Council's previous SHELAA and has capacity to deliver 40-45 dwellings. This is deliverable whilst securing appropriate densities at the site as well as encompassing suitable "green" and "blue" infrastructure and a sensitive design response in an AONB setting.

5.232 The proposed uplift in the development of the site can contribute towards achieving a secure buffer in the Local Plan and as set out in the earlier section, we consider that an uplifted buffer (to up to 20%) should be pursued in the Local Plan accordance with Paragraph 73 of the NPPF and Footnote 39.

Planning Application 5.233 "Erection of 42 new dwellings, alongside car parking, cycle parking, drainage, internal road network and the creation of a principal access off Sissinghurst Road (A262), plus public open space, a play area and associated landscaping" which refused on 20 August 2020 (LPA ref. 19/00308/FUL).

5.234 Planning application ref. 19/00308/FUL was refused for three reasons summarised below:

1) Site access; it was not demonstrated that the scheme would achieve for safe, suitable and sustainable access for all, including appropriate visibility splays on Sissinghurst Road. The development would therefore lead to an unacceptable impact upon highway safety; 2) No completed legal agreement to secure provision of affordable housing; and 3) No completed legal agreement to secure contributions towards community facilities including education, libraries, social care, community learning, youth provision, waste provision, NHS, open space and biodiversity offsetting.

5.235 It is therefore noted that the impact of the landscape setting and AONB did not form one of the Council's reasons for refusal contrary to the findings of the SA summarised in the Council's SHELAA 2021. As confirmed in the Committee Report for application ref. 19/00308/FULL, dated 12 August 2020, the principal reason for refusal was due to highway access concerns, hence the site's omission in the Pre-Submission Local Plan.

5.236 Refused application ref. 19/00308/FUL is now subject to a live appeal which was lodged in December 2020 (PINS ref. APP/M2270/W/20/3265584) and is now registered, valid and awaiting assignment of an Inspector.

5.237 The Appellant's (Dandara's) appeal case confirms the principal matters at issue are whether the proposed site access junction with the A262 provides adequate visibility splays and is, therefore, considered to be safe.

5.238 The Committee Report for application ref. 19/00308/FULL, dated 12 August 2020, of 12 August 2020 states (Paragraph 10.10) that there "would be good connectivity and it would be possible to walk/cycle to the village centre..." and there "are a number of local services within the village which would be comfortably accessed". The Committee Report concludes that the proposal would achieve sustainable development (Paragraph 10.24) in accordance with the NPPF.

5.239 Dandara's appeal case demonstrates that proposed scheme includes suitable and safe access and is consistent with the NPPF (paragraphs 108 and 109 of the NPPF).

5.240 In respect to contributions towards affordable housing and community facilities (reasons for refusal no. 2 and 3), the Appellant's Statement of Case seeks to agree a Statement of Common Ground with the Council which will include any financial contributions required by the proposed development and such contributions will be secured through appropriate Section 106 legal agreement.

5.241 The Appellant's Affordable Housing Statement sets out a robust case for why the proposed delivery of 15 affordable dwellings on-site (36% of total housing proposed) will make an important contribution to the affordable housing needs of Tunbridge Wells and should be afforded substantial weight in the determination of this appeal.

5.242 Therefore, Dandara object to the removal of the site allocation which is unfounded. Whilst it is accepted the site was recently subject to a refused application ref. 19/00308/FUL, there is no indication from the KCC Highway response the access objection cannot be overcome and therefore, it is unreasonable to preclude this site for a housing allocation. The matters that are the subject of the appeal relate to the development management process and do not principally affect the allocation of the site.

5.243 Accordingly, Dandara suggest the Council reinstate site allocation AL/CRS13 and allocate the site for circa 40-45 new dwellings as part of 20% buffer the Council should be applying to its deliverable sites as part of maintaining supply and delivery in accordance with Paragraph 73 of the NPPF (including Footnote 39) and the PPG.

Housing Delivery 5.244 Subject to the outcome of the above planning appeal, TBC should reinstate housing allocation AL/CRS13 in the submission version of the emerging Local Plan and include the site in the Council's revised housing trajectory.

5.245 The site comprises a underutilised greenfield site, within the settlement boundary, outside the AONB and is capable of delivering 42 new homes and thus forming a valuable contribution to meeting the Council's small and medium sized sites housing requirement and constituting windfall development in accordance with Paragraph 68 of the NPPF. The Site is suitable for housing and can suitably accommodate a high quality development for circa 40-45 dwellings, the site is available; and deliverable within the first 5 years of the Plan period.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

5.243 Accordingly, Dandara suggest the Council reinstate site allocation AL/CRS13 and allocate the site for circa 40-45 new dwellings as part of 20% buffer the Council should be applying to its deliverable sites as part of maintaining supply and delivery in accordance with Paragraph 73 of the NPPF (including Footnote 39) and the PPG.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPF.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: Covering letter/email as follows - copy also attached as Supporting Information]

CBRE is appointed by Dandara Ltd. to submit representations relating to the Regulation 19 Pre-Submission Draft version of the Tunbridge Wells Borough Local Plan.

Dandara hold specific land interests in respect of the following sites as set out in our representations:

- . STR/PW1 / STR/SS1 – Badsell Farm, Paddock Wood ('Paddock Wood');
- . STR/HA1 / AL/HA4 – Land off Copthall Avenue and Highgate Hill, Hawkhurst ('Hawkhurst');
- . STR/RTW1 / AL/RTW5 – Land at Speldhurst Road, Southborough ('Southborough');
- . AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm');
- and
- . Omission Site – Land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road ('Sissinghurst');

The above sites are located within the administrative area of Tunbridge Wells Borough Council ('TWBC'). The Paddock Wood, Hawkhurst, Southborough and Spratsbrook Farm sites are all allocated in the Pre-Submission Draft Local Plan.

Separate written representations have been submitted by Barton Willmore LLP in respect to Dandara's land interests at AL/RTW 16 – Land to the west edge of Eridge Road at Spratsbrook Farm ('Spratsbrook Farm'). CBRE's written representations have been fully coordinated with Barton Willmore LLP's representations for Spratsbrook Farm.

Accordingly, please find the following enclosed representations which will be sent via email and secure electronic file transfer:

- . This cover letter;
- . Completed Local Plan Response Forms; and
- . Written Representations Report dated June 2021.

Dandara will continue to engage with TWBC as well as key stakeholders, to feed into and inform later stages of the plan-making process including the Examination hearings in due course.

Dandara will also continue to monitor the progress of the emerging Local Plan and will also look to make written representations on the next stage, Examination hearings in due course.

[TWBC: End of covering letter/email]

5.104 Site allocation AL/HA4 was included in the Council's SHELAA (January 2021). The assessment for the Site covered the 5.28ha central and eastern parcel (Site refs. 78) and the separate adjacent parcel to the north-west (Site ref. 419). The SHELAA concluded that both sites 78 and 419 are suitable as potential Local Plan allocations on the basis they are sustainable locations for development, given it is located within/mostly adjacent to the LBD and there is pedestrian access to the centre of Hawkhurst. In addition, the assessment noted that both sites are available and are both deliverable within the Plan period. Dandara support the findings of the SHELAA and proposed site allocation AL/HA4.

5.105 Pre-Submission Local Plan Policy STR/HA1: 'The Strategy for Hawkhurst parish' sets out the development strategy for Hawkhurst parish and the requirement for "circa" 161-170 net new dwellings, including affordable housing. Dandara support this policy and Set Limits to Built Development (LBD) for Hawkhurst, factoring in the amendments as a result of the proposed site allocations.

5.106 The site is allocated in the Pre-Submission Local Plan AL/HA4: 'Land at Copthall Avenue and Highgate Hill, Hawkhurst (Highgate)' for 70-79 dwellings, including 40% affordable housing, and significant areas of publicly **accessible open space**. **A Policy Plan is included at Figure 9 below.**

Planning Applications

5.107 Dandara has undertaken architectural and feasibility work for the identified western/central development parcel for the site.

5.108 Dandara submitted a full application (LPA ref. 18/01063/FUL) in March 2018 for the redevelopment of the majority of site allocation AL/HA4 (see application site location plan in Figure 10 below) for a total 49 residential unit scheme. This application was refused in April 2019 despite an Officer recommendation for approval. The scheme was refused by Members at committee for one sole reason based on the design of the access via Copthall Avenue despite KCC Highways Authority agreement that the proposed access was acceptable.

5.109 An appeal was subsequently submitted but was since withdrawn on 23 September 2020 in light of a fresh application for the entirety of the site allocation was sought.

Latest Application5.110 An EIA Screening Opinion request (LPA ref. 20/03901/ENVSCR) was made on 23 September 2020 for a 71 unit residential scheme. The Council's EIA Screening Opinion decision dated 12 March 2021 confirmed the development did not constitute EIA Development and therefore an Environmental Impact Assessment was not required in support of a planning application.

5.111 Dandara submitted a new full application (LPA ref. 20/02788/FULL) on 23 September 2020 for the larger land parcel, containing the entirety of the Draft Allocation AL/HA4 (see A site location plan extract is provided in Figure 11 below) for a 71 residential unit scheme: "Development of the site to provide 71 dwellings, alongside car parking, cycle parking, sustainable drainage, internal road network, public open space and associated landscaping and including the demolition of existing agricultural barn and garage and alterations to the existing access from Highgate Hill".

5.112 The application removed the previous proposed site access from Copthall Avenue which was not supported by KCC Highways.

5.113 The application was subsequently refused (against Officer recommendation for approval) at TWBC Planning Committee on 12 May 2021 despite Officer recommendation for approval. The reasons for refusal on the decision notice dated 19 May 2021 are as follows: 1. AONB: the proposal would not conserve and enhance the landscape or scenic beauty of the AONB, and exceptional circumstances have not been sufficiently demonstrated to demonstrate the proposals outweigh the adverse impacts and are in the public interest. 2. Impact on highway network: development would result in a quantum of traffic that would have a significant adverse effect on capacity and congestion of the crossroads in Hawkhurst and the wider transport network.

5.114 Considering the principle of Development and taking each reason for refusal below, Dandara refute the reasons for refusal.

Principle of Development5.115 The Council's Committee Report for ref. 20/02788/FULL confirms that the majority of the site lies outside the LBD, wherein the adopted Local Plan directs new residential development in sustainable locations, within the LBD of existing settlements. However, it is recognised that the Council cannot currently demonstrate a 5-year housing land supply (4.83 years) which forms an important material consideration in applying the presumption in favour of sustainable development and determining applications without delay in accordance with Paragraph 11 of the NPPF.

5.116 Where a Local Planning Authority cannot demonstrate a five year housing supply, Paragraph 11 (d) of the NPPF is engaged. This states that in the absence of any relevant Development Plan policies, or the policies which are most important for determining the application are out-of-date, permission should be granted unless: "i. the application of policies in this Framework (listed in footnote 6) that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or ii. **any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole**".

5.117 Footnote 7 to the NPPF states that this includes (for applications involving the provision of housing) situations where the LPA cannot demonstrate a five year supply of deliverable housing sites with the appropriate buffer, as set out in Paragraph 73. Footnote 6 states these policies include AONBs, irreplaceable habitats and heritage assets.

1. Impact on the High Weald AONB5.118 The site (formerly Policy AL/HA6 now Policy AL/HA4) was included as part of the Council's Landscape and Visual Impact Assessment (LVIA) (November 2020), a supporting evidence base document to the Pre-Submission Local Plan. The site was identified as being small scale and comprising semi-enclosed landscape, with features and characteristics that are typical of the High Weald AONB. It was recommended that any proposed development should be concentrated to the north and west of the site and it was concluded that "a sensitive and well designed housing development would be acceptable in this location, providing that it creates a positive edge to settlement and respects the separation between Highgate and The Moor".

5.119 Moreover, under the heading 'potential to avoid or reduce adverse effects' within the Council's LVIA for site HA 6, the Council's LVIA identifies the following five practical measures that identify how effects on the AONB can be reduced and moderated: 1. The inclusion of the eastern and southern parts of the site within open space would protect existing landscape features and would limit the potential for new development to affect the character of the wider rural landscape. 2. The open space has the potential to include the enhancement of existing features and new complementary habitats, which could link existing habitats within and around the site. The space would maintain the rural edge to the site and the retention of existing trees and woodland would filter and screen views of the proposed

development.3. The inclusion of an appropriate new landscape buffer to the western site boundary would assist in protecting the significance of adjacent heritage assets.4. The proposed allocation would be consistent with the existing settlement pattern to the south of Hawkhurst. It would provide opportunities to create new recreational routes and facilities for existing and new residents.5. The introduction of a long term management plan for the site would maintain the quality and condition of the AONB landscape within the site.

5.120 Overall, the LVIA concluded that site has a medium potential for harm to the AONB if developed and medium – low potential for harm to the AONB if recommendations within the report are met. Dandara support the findings and recommendations of the LVIA and consider this to be a detailed and robust assessment.

5.121 The LVIA (August 2020) submitted as part of application ref. 20/02788/FULL confirms that the proposed development approach is sensitive to the local landscape character and visual impact through the incorporation of suitable primary mitigation measures, including using a low density, informal layout which builds on the characteristics of local farmstead typologies, and retaining large areas of open space and woodland to the south and east, creating a 'soft', informal edge to Hawkhurst, which is visually contained within its existing and strengthened woodland setting. This approach would link habitats, create landscape buffers to heritage assets, and would be consistent with the existing settlement pattern, with minimal impact on the separation of Hawkhurst from the Moor. This sensitive approach would be managed in perpetuity through a long term management plan, to be agreed with the Council.

5.122 As a result, the LVIA concludes the proposed development will result in "very limited harm", and the "character and value of the AONB are protected and the proposed development will assimilate successfully into its context". After a 15 year establishment period, the residual effects are minimal and there will be no significant effects to the AONB or Local Landscape Character.

5.123 As contained in the Council's Committee Report, the TWBC Landscape and Biodiversity Officer supported the findings of the Applicant's LVIA for the site which concludes a "Medium-High value" and "Medium-High sensitivity" with "Medium magnitude of change resulting in a Moderate adverse effect". Whilst these effects will lessen overtime it was further concluded that the landscape the effect of development on a greenfield site is predicted to remain "Moderate" overall. The Council's Landscape and Biodiversity Officer (Paragraph 181) states: "I do not disagree with the final conclusion although the initial harm may be higher and the mitigation more effective than suggested such that the final result is the same. Whilst noting that such a level of harm is almost inevitable for a greenfield site in a similarly sensitive landscape it must be remembered that this is still an impact on the AONB and must be given great weight".

5.124 The TWBC Landscape and Biodiversity Officer and Planning Environmental Officer both were fully supportive of the proposed scheme and raised no objection and it was confirmed that the "Council considers this would provide a benchmark for other developments who wish to develop in the High Weald AONB in the future" (Paragraph 10.66 of the Council's Committee Report for ref. 20/02788/FULL).

5.125 This statement leaves a very clear impression of the quality of the design approach to the site, and its long term potential in enhancing the quality of development locally.

5.126 Furthermore, Paragraph 10.66 of Council's Committee Report for ref. 20/02788/FULL states: "overall there is likely to be significant localised harm to the AONB but this can be reduced through a sensitive approach, detailed design and securing long term management of the landscape areas. The AONB and landscape harm would be as a result of the introduction of additional residential dwellings into an open Greenfield area. The proposal offers opportunities to improve some aspects of the site in terms of landscape character and appearance as well as ecological enhancements".

5.127 It is further concluded at Paragraphs 10.90-10.91 of the Council's Committee Report that: "The overall conclusion when assessed against the requirements of para 172 of the NPPF, and having particular regard to the emphasis in the NPPF and NPPG on supporting sustainable development and contributing to the 5 year housing land supply, is that the proposal will have a moderate positive impact overall.

As such, it is considered that principally due to the housing delivery benefits outweighing the identified harm to the landscape and environment, there are exceptional circumstances where the development is in the public interest in this instance to depart from the NPPF presumption against major development in the AONB".

5.128 The proposed development would conserve the landscape and scenic beauty of the AONB and the proposed landscape scheme mitigation is sufficient to mitigate against any impact. The proposed development includes robust local exceptional circumstances case which would outweigh the adverse impacts of the development and that delivery of 71 much need homes is in the public interest given the Council's housing shortage in accordance with Paragraph 172 of the NPPF, the provisions of the PPG, Policy EN25 of the Tunbridge Wells Borough Local Plan 2006, Core Policies 4 and 14 of the Core Strategy 2010, Policy LP2 of the Hawkhurst Neighbourhood Plan and aligns with the Council's own policy evidence base.

2. Highways Impact 5.129 In respect to the site location and whether the proposed development constitutes sustainable development, Paragraphs 10.29 and 10.90 of the Council's Committee Report (dated 12 May 2021) confirms the development would satisfy the social and economic objectives and despite having some environmental impact as set out above, on balance the proposed development is considered to support sustainable development and contribute to the Council's 5YHLS in accordance with paragraph 175 of the NPPF.

5.130 In regards to highway impact, the Council's Committee Report (Paragraph 10.114) concludes that the Council and KCC Highways (as Highway Authority and technical experts), that despite the proposed scheme having an adverse impact upon the highway network and on overall planning balance, the scale of development and associated trip generation will not have a "severe impact" and TWBC were supportive of the scheme.

5.131 In light of the above, if the proposed development is found to constitute sustainable development, provides sufficient, safe and suitable access and would not result in unacceptable impact on highway safety the application should not be refused in accordance with Paragraphs 108 and 109 of the NPPF.

5.132 Therefore, Dandara argue that the proposed development would not have a significant adverse impact on the highway network and includes safe and suitable access on accordance with Paragraphs 108 and 109 of the NPPF, the provisions of the PPG, Core Strategy Policy 3 and Policy AM1 of the Hawkhurst Neighbourhood Plan.

Summary 5.133 Dandara therefore refute the Council's reasons for refusal for planning application ref. 20/02788/FULL which was refused despite Officer recommendation for approval including the Council's Landscape and Biodiversity Officer and Planning Environmental Officer.

5.134 Dandara are currently considering their options for appeal.

5.135 Fundamentally, in the context of these local plan representations, the suggested reasons for refusal do not affect the principle of developing/allocating the site and are matters that are associated with the development management process. On the basis of the evidence that has been collated for the site and has been independently prepared by TWBC the proposed allocation of the site for residential development remains sound.

Draft Site Allocation AL/HA4 5.136 The site is allocated in the Pre-Submission Local Plan AL/HA4: 'Land at Copthall Avenue and Highgate Hill, Hawkhurst (Highgate)' for 70-79 dwellings, including 40% affordable housing, and significant areas of publicly accessible open space. Dandara broadly support this allocation.

5.137 That said, Dandara have made some specific comments below in respect to specific requirements of site allocation Policy AL/HA4:

Quantum of Development 5.138 Dandara support Policy AL/HA4 and the allocation of the Hawkhurst site for comprehensive development. The Site is capable of accommodating at least 71 residential units as part of high-quality scheme as per refused application ref. 20/02788/FULL. Dandara have undertaken an array of technical/background work which formed part of the previous applications and consider the site to have potential to accommodate additional dwellings and therefore support the proposed quantum of 70-79 dwellings as set out under draft allocation Policy AL/HA4 in the interest of securing the efficient and effective use of the Land at Copthall Avenue and Highgate Hill, Hawkhurst (Highgate) in line with Paragraph 122 of the NPPF.

5.139 However, Dandara suggest the word "circa" is added so revised site allocation Policy AL/HA4 reads "circa 70-79 dwellings" in the interest of completeness, consistency with other site allocation policies and in order for the new Plan and its policies to be found sound in accordance with paragraph 35 of the NPPF.

Land Uses / Layout 5.140 Part 5 of Policy AL/HA4 identifies specific areas of the site for residential use. Dandara support this requirement. It is noted that refused scheme ref. 20/02788/FULL, was consistent with this requirement and proposed residential on the western and central development parcel areas and open space / landscape buffer on the eastern land parcel.

5.141 Part 7 of Policy AL/HA4 requires the layout and design of the scheme to factor in the location of the site on the edge of the settlement and the setting of listed buildings, and to provide a scheme that is sensitively designed and provides a suitable edge to the settlement. Dandara support this policy requirement in the interest of achieving a high design quality and in the interests of good place making.

5.142 Dandara further note that the refused scheme provided as a suitable edge to the settlement as concluded in the Council's Committee Report (Paragraph 10.80): "The sensitive design of the development, particularly in its exploration of using a high quality agricultural courtyard / barn typology which acts as the new settlement edge and interface with the AONB beyond the site".

Highways 5.143 Part 2 of Policy AL/HA4 seeks the provision of the main vehicular access into the site to be from Highgate Hill. Dandara support this main vehicular access requirement and highlight that main vehicular access was proposed from Highgate Hill as part of refused application ref. 20/02788/FULL which was supported by the Council and KCC Highways.

Trees / Ancient Woodland 5.144 Part 8 of Policy AL/HA4 requires proposals to assess and respond to, ancient woodland and TPOs on-site through the development layout and design to be informed by an ecological survey. Dandara support this policy requirement.

5.145 Dandara further note that in respect to the refused scheme ref. 20/02788/FULL, no objection was raised by the Council's Tree Officer. Paragraph 10.45 of the Council's Committee Report for ref. 20/02788/FULL concludes that: "(...) whilst there are some impacts upon trees and landscaping, this is not considered to be significant or to a level which would warrant refusal of consent".

5.146 Similarly, no objection was raised from the Council's Landscape and Biodiversity Officer in respect to the conclusions and proposed mitigation set out in the accompanying detailed ecological assessment.

Open Space / Play Space / Green Infrastructure 5.147 Dandara support Part 9 of Policy AL/HA4 which requires the provision of on-site amenity/natural green space and children's and youth place space. Dandara are committed to delivering a high quality residential scheme including the provision of appropriate play space and natural greenspace in the interests of good placemaking in accordance with the PPG.

Housing Delivery 5.148 The Council's Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) confirms that site allocation AL/HA4 is included in the Council's trajectory for the short term delivery of 75 new homes (mid-range) in two tranches: 44 homes in 2023/24 and 31 homes in 2024/25.

5.149 Dandara support the planned growth for the site and then proposed quantum range of 70-79 homes is appropriate. Dandara however do not support the trajectory for the site on the basis, new homes could be delivered sooner in the first five years of the Plan period i.e. from 2021/22 as the site is available now; and there are no site constraints to development. Dandara suggest 2 year delivery period is reasonable given the size of the site.

5.150 The site is therefore available now, is suitable for residential development and deliverable now in the short term i.e. first 5 years of the new Plan Period (2020/21 – 2024/25). The Council's trajectory should be amended accordingly.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Site Allocation AL/HA4 Proposed Amendment 5.151 Dandara broadly support site allocation Policy AL/HA4, however require an amendment to the allocation to reflect the proposed access as part of refused scheme ref. 20/02788/FULL.

5.152 Draft site allocation Policy AL/HA4 (part 3) includes a requirement for a new pedestrian link to Copthall Avenue. The proposed scheme for ref. 20/02788/FULL included this requirement to reflect the proposals at the time which sought demolition of an existing property, replacement with another and creation of the new pedestrian link. However, the Applicant subsequently removed this and proposed an alternative pedestrian link from the public open space to Fieldways which was agreed as acceptable with KCC and TWBC Officers.

5.153 Dandara suggest the location of future pedestrian access is less prescriptive to reflect the multiple access options either to Copthall Avenue or Fieldways in the interests of allowing sufficient flexibility, not pre-determining a masterplan process and not compromising future site delivery. Dandara recognise there would always be a pedestrian and vehicular route onto Highgate Hill. Part 3 of Policy AL/HA4 should be reworded to include the option of securing emergency vehicle and pedestrian access to be provided "either to Copthall Avenue, Highgate Hill and/or Fieldways".

5.154 For the reasons set out above and in the interest of ensuring robust and sound policies / site allocations, Dandara suggest the Council amend site allocation Policy AL/HA4 in accordance with Paragraph 35 of the NPPF.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Dandara wish to participate in the hearing session to discuss their representations and to provide further evidence to assist the Inspector where necessary in the interests of ensuring the emerging Local Plan, its strategic allocation policies and all other strategic and development management policies can be found to be sound and meet all the specific soundness tests set out at Paragraph 35 of the NPPF.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4.9 The Council's supporting Sustainability Appraisal (SA) sets out the preferred growth strategy of securing a planned strategic extension at Paddock Wood based on garden village principles, supplemented by the creation of a new garden village at Tudeley Village and promotion of new growth at existing settlements.

4.10 The production of the SA is a key evidenced based document in understanding whether or not the approach to the spatial strategy is sound. The NPPF (2019) introduced a subtle but important change to the definition of 'justified' with the requirement now for 'an appropriate strategy' rather than 'the most appropriate strategy'.

4.11 The SA (February 2021) includes the assessment of 8 alternative options for the spatial strategy. In presenting a robust approach the SA (February 2021) correctly considers the implications for the spatial strategy in including Paddock Wood in some options and excluding it from others.

4.12 Paragraph 6.2.13 of the SA (February 2021) succinctly summarises the consequences for sustainable development if an alternative spatial strategy was pursued which sought to focus growth exclusively in the main town and main town and villages. In the assessment it is noted that the exclusion of Paddock Wood (and in turn the additional pressure that this would place on other areas to accommodate growth) would have a detrimental impact upon 8 of the SA objectives including: objectives of business growth, climate change, deprivation, employment, health, services, travel and water. The assessment work undertaken provides a sound basis to inform the proposed spatial strategy with the approach representing an appropriate strategy (as required by the NPPF).

4.13 At the more detailed policy level, the SA provides a rigorous and robust testing of the 11 Local Plan strategic objectives against the 19 SA objectives and confirms there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives.

4.14 The SA explains the Council's assessment of their growth strategy options as set out in the Issues and Options stage SA (2017).

4.15 The Council's site assessment review includes assessment of potential development sites and reasonable alternative sites. Dandara support the scoring for Land to the north of Badsell Road, Five Oak Green, Paddock Wood (Site ref. 142) as part of strategic allocation STR/SS1 and TN12 Land off Copthall Avenue and Highgate Hill, Hawkhurst (Site ref. 78); and Land at Speldhurst Road, Southborough (Site ref. 100). Dandara consider the review of these development sites to be accurate, robust and informed by proportional evidence in accordance with Paragraph 35(b) of the NPPF.

4.16 However, Dandara disagree with the findings of the reasonable alternatives site assessment, land east of Camden Lodge, adjacent to Mill Lane and Sissinghurst Road (Site ref. 120). This is discussed further on in this submission, however, this site was a largely neutral scoring site and comprises a small greenfield site within the settlement boundary and not located in the AONB and is proposed for medium scale residential redevelopment.

4.17 Dandara support the Council's SA subject to the above comments on the Council's strategic objectives, consider it to be robust and satisfies the relevant legal requirements including SEA in accordance with Paragraph 32 of the NPPF.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Mr Mark Daters
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.199 (page 153) to 5.299 plus supporting plans , policies and maps (pages 153 to 165).

Policy Map Inset Maps 33, 34

Policy STR/SS 3

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Site is nearer Tonbridge than Tunbridge Wells, particularly to the west of the Site which is a different local authority.

Purposes of Green Belt land include "to prevent neighbouring towns from merging into one another (Tonbridge to Paddock Wood based on the proposed development) and "to assist in safeguarding the countryside from encroachment" (surrounding Tudeley and Capel). The proposed development does not consider these purposes.

Such a large scale and concentrated Green Belt development does not consider a further Green Belt purpose to "assist in urban regeneration, by encouraging the recycling of derelict and other urban land. TWBCs original Plan identified multiple Sites spread across the Borough including urban Sites which are far more likely to not impact Green Belt land or impact on a marginal basis spread over multiple Sites.

Whilst the proposed development is within TWBC authority, it is the infrastructure and services including the station and supermarkets in Tonbridge which will be used by the new residents as this will be the local town. Tonbridge High Street is already congested seven days a week demonstrating it is already at maximum traffic capacity. It cannot manage any more. The existing Tonbridge roads cannot be widened or developed to improve traffic flow which is why congestion has increased annually over many years. There appears to be no plan in the Consultation Draft for a new station in Tudeley so residents who commute will use Tonbridge station which also allows a more frequent train service from the other train line serving Tunbridge Wells. Tonbridge will be the favoured commuter station over Paddock Wood or Tunbridge Wells each serviced by one train line compared with two at Tonbridge and a longer train journey costing more.

The closest Grammar Schools are in Tonbridge; Weald of Kent, Tonbridge Girls Grammar and The Judd.

The costs of infrastructure on the Tonbridge & Malling side of the local authority boundary will fall to Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings.

If the B2017 from Tudeley to Woodgate Way at the border of Tonbridge were to be improved as part of the proposed development it would not solve any traffic issue but simply move traffic faster to Woodgate Way but result in the same congestion into Tonbridge.

The cost to Tonbridge based businesses due to traffic issues may drive businesses from the area. There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, not Tunbridge Wells, because Tonbridge is much closer.

There should be land separating Tonbridge and Tudeley.

I understand the Medway floodplain covers parts of the proposed development. Concreting over fields will increase the potential flood risk and widen the floodplain. The increased potential for flooding will affect part of the proposed development or move the flooding further down the River Medway to areas such as Yalding. Climate change will increase the risks further in the future.

I believe TWBC can challenge the Government housing targets locally since development of Green Belt land can only be made in "exceptional circumstances" which do not appear to have been met for many sites. I would like to see TWBC use this argument to remove the garden settlement at Tudeley from this plan.

I cannot see any benefits fits of this proposed development. It appears TWBC are opting for convenience in response to one landowner rather than seeking numerous smaller developments spread across TWBC requiring less significant infrastructure changes. Tonbridge and TMBC rather than Tunbridge Wells and TWBC will bore the brunt of the resulting insufficient infrastructure, pollution from one concentrated and significant development in one location and permanently remove pleasant and healthy countryside and agricultural land.

Therefore, based on the numerous reasons outlines above the plan is unsustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

N/A

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1

Respondent's Name and/or Organisation	Alex Dave
---------------------------------------	-----------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS 3

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please find this as a response to the local draft plan, and in particular, the plans for Tudeley Garden Settlement (STR/SS 3).

As a resident of Tudeley for over 5 years myself and my family are objecting to the proposal of this "Garden Village". TWBC has 20 wards, you are proposing that you wish to put 50% of it into just a single ward, that being Capel. This inhibits the development of housing, infrastructure and amenities elsewhere on the borough.

You also propose that in East Capel you wish to add 2060 more dwellings where there are already 918 dwellings and a staggering 2800 in Tudeley itself. This is extraordinarily disproportionate to the size of the area and is placing a huge amount of greenbelt land in danger. The PM in 2016 has stated that Greenbelt land would not be placed at risk. It appears that you have disregarded that statement. We would stand to lose 600 acres of Greenbelt land to new housing as well as a further 200 acres quarried via the Kent mineral plan.

As it currently stands there are 2452 people living in Capel if this plan is adopted the population, then the estimates are this population will grow to in excess of 13700+. Most will be using private cars, which in turn will be detrimental to the air quality as well as cause major traffic congestion of which there is already issues due to the 200 plus pupils at Capel school and also the traffic to Somerhill School. Not to mention the huge carbon footprint this will create. Add to this the proposal that a new secondary school next to Capel Primary will add a further 2000 pupils (KCC Guidance). There is nowhere near enough consideration and arrangements within the plan regarding the impact on highways. I urge and invite any planner to visit our house during peak hours on Crockhurst Street and see the current level of congestion during term time. You will soon see that the proposals within the plan will be insufficient to cope with the huge numbers of extra vehicles. We appreciate that the direction of travel is to reduce private vehicle use, but this is not achievable in the short-term future and so the impact on traffic and air pollution has been significantly underestimated.

The Local plan proposes that 15 years + of large construction sites active in Capel with enormous infrastructure issues. The impact of this on the mental health of existing residents should not be downplayed. I fear it would make it impossible to continue living in the village.

Within the plan it states:

"The development provides an opportunity for a new railway station to be delivered on the site to provide rail linkages to London on the Ashford/Dover line (linking to Tonbridge and Paddock Wood). The delivery of a station is not anticipated during the plan period, and provision of a station has not been included in the Council's considerations of this site through the Sustainability Appraisal, or in terms of planning merits or infrastructure requirements. However, the Masterplan makes provision for a station to be accommodated in the future, if this can be realised."

Why has this been included when I believe Network Rail have stated a new station is not possible? This is pie in the sky and included to try and soften the infrastructure blow, but there is no evidence it can ever be realised.

Incredibly the development at East Capel is entirely on a flood plain. Tudeley also has high risk flood areas. Mitigation may fail or move more water downstream to East Peckham, Yalding, Golden Green, Tonbridge and beyond. I am sure you will have photos shared with you of the flooding of the exact areas where this development is planned for.

TWBC is made up of 48 Councillors. Only 1 of these represents Capel. TWBC has received over 1000 comments objecting to the Local Plan's impact on Capel which is way more than any other area. Yet it appears that in 2019 hundreds more dwellings were added to Capel in the revised plan in 2020 with no recognition of the concerns listed in the new documents. This shows an incredibly inept ability to engage with the community. There has been an absolute lack of genuine engagement and respect for current residents throughout this ordeal.

It also shows that despite there being a Reg 18 consultation nothing was done to highlight any of the above concerns. This makes a mockery of the entire process. 97% opposed the plan, there were 1174 comments from 804 people. The only action taken was to (as mentioned above) add more unrealistic goals of increased housing.

I find it quite incredible that 51% of the new housing from the Local Plan is being placed into an area where only 2% of the TWBC population live! It is disproportionate and it should also not be ignored that a lot of the strain (on infrastructure and services) from this development would be on neighbouring Tonbridge and Malling rather than TWBC- a coincidence? We think not.

There was a clear lack of prioritisation given to looking at alternative Brownfield sites. Given that there are vacant offices in Tunbridge Wells such as the AXA building and no real analysis of Castle Hill or Blantyre. Why? It seems that TWBC are taking the easy option by trying to meet their housing targets in one area and decimating this existing area to save the rest of the wards. Due diligence should be completed to further examine these numerous brownfield sites dotted around all wards.

You have been accused by one of your own councillors of a lack of transparency and scrutiny. You are all complicit in your lack of activity and lack of scrutiny about what this plan means for the populations of Capel and also those in surrounding areas. TWBC council leader has even said directly to Save Capel, the group trusted to be the voice of the residents "You will never win!" We have lost any faith in the leadership in our council- a very sad state of affairs when you are elected to represent your residents.

This plan should not be allowed to go ahead. The fallout will be catastrophic for current residents in and around Capel.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation	Charles Davenport
---------------------------------------	-------------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS3 Regulation 19 - Tudeley Village

Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

Complies with the Duty to Cooperate	No
-------------------------------------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	It is not justified
	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The plan to build a new town at Tudeley Village does not provide accurate data on where the residents for the 2800 houses will come from nor where they will work or travel to. There is no provision for additional public transport links nor other amenities such as supermarkets. The plan uses out of date data regarding the likely demands of use on the local road network. The policy does not take into consideration in sufficient detail regarding the problems which will arise from traffic and public transport to the nearby transport hubs such as Tonbridge Railway station and its parking facilities and the Sainsburys/Iceland in Tonbridge which will likely attract most of the demands of the new village. Tudeley road does not have the capacity to handle the current traffic demand in the mornings let alone when there are a potential 5600 extra road users heading towards the Station at Tonbridge and towards the A21.

5.217 - There is no explanation on how the new settlement will be self containing nor how safe cycling and walking access will be provided to Tonbridge and Tunbridge Wells.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The policy STR/SS3 needs to provide an explanation of where the residents for the 2800 houses will come from and where the likely areas of employment will be located. The policy needs to provide a detailed traffic and transport impact plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

I, as a resident here have been asked to provide additional comments to the above. I therefore enclose my feelings as at this time and indeed over the past 2-3 years when this dreadful situation was suggested by you and Council members including the Housing Minister in the Government.

We as residents in the Parish have been unable to live our lives under this heavy cloud of indecision which has surrounded us and, if fact, has blighted our existence.

It actually pains me to have to reiterate what I have already voiced upon ears who have no intention of even listening.

As a home owner and Resident of Tudeley at the above, I at now 87 years of age have resided in peace for over 35 years in beautiful surroundings. How, you wish to deprive me and many residents of this neighbourhood of this peace and subject us to our final years surrounded by a vast area of bricks and mortar disguised in the biggest disaster you are about to plunge us into. You will totally regret your decision if this comes into fruition and which I can only pray, does not.

Money and prestige for some is the main object and financial gain for certain individuals and those involved should be ashamed to put forward this horrendous scheme which will ruin our beautiful landscape for ever.

I am sure if it is your intention to provide homes, Kent possesses plenty of land which could be exploited and which, therefore, would cause less havock to many of us residing here in Tudeley.

My final wish is that this Plan is scrapped and indeed FORGOTTEN for ever.

DAVID LLOYD LEISURE LTD REPRESENTATIONS. TUNBRIDGE WELLS LOCAL PLAN (PRE SUBMISSION VERSION).

We are instructed by our client, David Lloyd Leisure Ltd (David Lloyd), to submit general representations following the publication of the Tunbridge Wells Reg19 (Pre- Submission) Local Plan.

We appreciate that the advanced stage of the publication document supports representations only in those areas where consideration is given to whether the Plan is sound, legally compliant or otherwise on the Council's approach to the duty to co-operate. However, following a business review, David Lloyd has a requirement within the Tunbridge Wells area. This requirement was post publication of the Reg.18 Plan.

The Borough Council has published the Pre-Submission version of its Local Plan (also known as the Regulation 19 version) which is intended to set out proposed planning policies to guide development in the Borough up to 2038. Within the context of a long-term vision and related objectives, it comprises overarching strategic policies, including a new development strategy, supported by both place-specific local strategies and site allocations, and specific policies on a range of topics, including those relation to the provision of leisure and other 'Class E' development.

The evidence base supports modest additional development for health and fitness facilities in the Borough: notably through additional swimming facilities, and David Lloyd would welcome early engagement with the Council to achieve this.

The deadline for making representations is the 4th June: these representations are submitted within that timeframe.

Background

David Lloyd is Europe's premier health, racquets and fitness provider.

David Lloyd has operated for over 30 years and owns some 99 David Lloyd clubs in the UK (including 3 Harbour Clubs) and a further 23 across Europe and the Republic of Ireland. David Lloyd has ambitious growth plans both in the UK and Europe.

The business has some 600,000 members and is a significant employer in the health and fitness market, employing over 8,000 people. These include an expert health and fitness team of over 2,000 professionals and more than 680 tennis coaches. David Lloyd Clubs had been awarded a Sunday

Times Top 25 Best Big Companies award for the past four years, most recently making it to number 16 in 2020.

David Lloyd's racquets' facilities are unrivalled in the UK, with some 1000 tennis courts, 400 badminton courts and squash courts.

In addition to the racquets' facilities, across all clubs, David Lloyd has over 150 swimming pools and the company offers more than 10,000 exercise classes every week.

David Lloyd also provides significant coaching programs for children, both as part of the normal operation of its clubs and as 'outreach' to local schools, colleges and other amateur organisations. It is estimated that every week some 25,000 children swim and some 16,000 receive tennis coaching at David Lloyd clubs.

In addition to the core activities of racquets and health and fitness, a number of clubs also benefit from health and beauty spas, lounges, food and beverage, crèches, nurseries and specialist sports shops.

The COVID-19 pandemic has brought into sharp focus the need for both fitness and mental resilience and David Lloyd are at the forefront of development both in fitness innovation across its clubs, and mindful-wellness through its classes and spas.

Property Aspirations and Requirements

In both the UK and Europe sophisticated analysis and consumer data assists David Lloyd in identifying where the demographic sweet spot is in any given location.

David Lloyd has identified 50 locations across the UK, including the Tunbridge Wells area, that have a demographic profile that compares to the existing membership base and where there is an under provision of premium health and fitness facilities. This exercise enables David Lloyd to search in very targeted locations for suitable development sites.

Employment

David Lloyd's largest format of club generates circa 80 full time equivalent jobs.

The club targets local employment opportunities in the appointment of full time, part time and self-employed staff. In the majority of cases therefore, employment is sourced locally, targeting local job markets to fulfil the needs and function of the club. Additional services, including cleaning contractors, deliveries for the restaurant and maintenance requirements are, again, sourced locally where possible.

Development Site Opportunities: Tunbridge Wells.

In terms of the retail and leisure needs of the borough, we note that the Retail and Leisure Study (2017) undertaken by the Council has assessed the quantitative and qualitative needs over the plan period, taking account of planned housing growth, as well as the 'health' of the key centres within the borough. The study also sets out the leisure requirements for the borough in broad terms and acknowledges the importance of cultural and leisure activities in supporting the mix of uses within the borough to ensure vibrant and resilient centres.

In helping meet established leisure needs, we note Policy STW/RTW(5) promotes leisure uses within Key Employment Areas, whilst STR/RTW2 Promotes retention and enhancement of Leisure uses in Royal Tunbridge Wells town centre.

The Study notes that there is some leakage outside the Borough from some sectors, and that the largest expressed desire from resident questionnaires was for additional pool / swimming facilities. Taking this as a lead, the Study notes modest capacity for additional health and fitness within the Borough and notes that the market will likely be able to facilitate the development of any such facilities in appropriate locations through the development management process, rather than necessarily requiring specific allocations. This is a view which we would support and will allow some flexibility in terms of the application of format and location.

It is pertinent that much of the evidence base supporting this additional growth in the Borough is 2015-2017. The UK health and fitness market continues to grow, with trends continuing towards a more health conscious society, which has seen a boom in mental wellness and holistic classes including yoga, Pilates and mindfulness.

This social sustainable agenda is strongly supported within Sport England's 'Planning for Sport' Guidance, which focuses on 12 principles in seeking to help the planning system provide opportunities

for all to take part in sport and physical activity. The guidance builds on the importance the Government, and its National Planning Policy Framework, places on the need for the planning system to enable and support healthy lifestyles.

Principle 8 states planning policies and Councils should support the new provision, including allocating new sites, for sport and physical activity which meets identified needs. The guidance further adds the planning system should be proactive in delivering new sport and physical activity provision which implements the recommendations and actions of relevant assessments of need. Where relevant, this should include allocating deliverable sites for new provision for sport and physical activity planning policy documents (for example site allocations documents and neighbourhood plans).

At this stage David Lloyd have not secured a specific site in Tunbridge Wells but have been reviewing various opportunities and will be engaging shortly with the Council with a view to advancing proposals within the Borough to help meet further enhancement of heath, fitness and wellbeing provision.

We look forward to hearing from you with confirmation that this written representation has been received and its contents noted, although clearly this is set within the context of David Lloyd not having made representations to earlier versions of the Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have sent a separate email consisting of a screen shot of an email I sent you nearly 2 years ago. Nothing has changed my mind about the proposed developments. It is actually WORSE now since you intend to prevent residents from east Paddock Wood and East Peckham from crossing the railway bridge on Maidstone Road. This means we either pay and park at the Train Station car park or do an extremely long diversion via Badsell Road. Have you visited the junction by Mascalls School recently, since the latest new housing estate was built? The congestion at the traffic light is HORRENDOUS at peak times. You intend to ADD to this by diverting all the above mentioned traffic via this T-junction. It beggars belief!

[TWBC: Email of 05/11/19 reads:]

Even though I am not a resident of Tunbridge Wells Borough I have worked in and around Paddock Wood for 37 years.

It is bad enough having to put up with new developments in the area around Paddock Wood, but having seen the proposed plans for reducing the Green Belt area between Paddock Wood and Tonbridge I am appalled by the idea of unnecessarily building new homes in this beautiful area of the Weald.

The build up of morning traffic during school term is appalling on the road between Five Oak Green (note the colour in the placename) and Tonbridge already.

Also the peace and serenity of Tudeley Church (with its beautiful Mark Chagall windows) would be lost for ever if a housing estate were to appear in the field behind it.

Please reconsider your plans for the future

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

AL/HO3 The surface water drainage from this site is proposed to go via an existing gully and sewer in front of and beside 6 Station Cottages, discharging via a neighbouring garden and thence to the watercourse to the rear of Station Cottages. This pipe blocks on an annual basis and flood conditions then occur around and sometimes in Station Cottages. At present both Southern Water and Kent Highways disclaim ownership of this sewer and it cannot be right that a development of any size should be considered when the responsibility for the removal of surface water rests with no-one. This problem is further complicated by a spring which rises on the site and, in times of heavy rainfall, adds considerably to the flow of water. I would hope that the matter of surface drainage can be addressed in the plan as a matter of some priority.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I consider this to be unsound due to the impact of additional traffic that this development will cause.

Old Hay connects to Pearsons Green Road which is a 60 mph country road with restricted visibility on exiting Old Hay. I have already had 1 vehicle end up in my front garden as a result.

There is already extensive traffic with large lorries, skip lorries, delivery vans and private vehicles. At times, you can wait 5 minutes to exit the driveways near the junction with Pearsons Green Road due to the build-up of traffic trying to exit Old Hay. When traffic is trying to enter Old Hay at the same time, Pearsons Green Road grinds to a standstill.

Old Hay itself is a single track concrete road with very few designated passing places. Increasingly vehicles use private driveways to allow other vehicles to pass causing damage and distress.

With such a narrow entrance to Old Hay, it is already tight for large vehicles entering Old Hay and this has already resulted in significant damage to a private vehicle parked wholly on my driveway, resulting in not insignificant cost, disruption and inconvenience.

It is my belief that any further development along Old Hay that will result in any further traffic volume will cause unacceptable hardship on local residents, not just those residents living within 200yds of the junction with Pearsons Green Road but also to those living further down the road.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My wife and I have here at Colts Hill since the summer of 1993, her family having lived and worked in the parish of Capel for generations. It remains a beautiful corner of the Garden of England largely unspoilt Green Belt of small hamlets and villages set out amongst small woods and good quality arable land.

The proposed housing development for Paddock Wood and East Capel is unsound on a number of important and key issues.

Paddock Wood is already subject to two significant and unfinished housing developments. The proposed plan makes inadequate provision for accommodating the substantial increases in traffic levels in the immediate and wider area adder to these ongoing developments and there yet to be seen impact. Paddock Wood has been subject to considerably housing development since the 1960s yet nothing has been done to provide a proper road infrastructure. The B2160, the Maidstone Road, is subject to congestion caused by parking on the carriageway which is particularly challenging to the buses and HGVs which have to access local businesses. This is no more apparent that those delivering to the Waitrose supermarket which have the further gauntlet of traversing Commercial Road, the center of the village.

To the south of the village on the B2160 is the junction with the B2017 from Tonbridge, the A228 and the proposed new development west of Paddock Wood and in East Capel. Residents of the proposed new development will have to traverse this already busy junction when seeking to access the village amenities and because of the weight restriction on the railway bridge on the B2160(7.5t), this route, the B2017, is also the access for HGVs. It is single carriageway road with a narrow pavement on its north side.

Traffic from the proposed development heading west reaches the A228 and may proceed westely on the B2017 towards Tonbridge and the A21 or turn south towards Tunbridge Wells.

The B2017 linking Tonbridge to Paddock Wood is a winding rural single carriageway with pavements only provided within Five Oak Green. Within Five Oak Green residential parking on the carriageway already impedes the smooth flow of traffic which is exacerbated during the morning rush hour past the Primary School when children are being dropped off. I have commuted daily from Colts Hill through to the A21 at Tonbridge for over 25 years and this 4 mile journey can often take upto 40 minutes if there is the simplest obstruction. Added to this morning congestion is the school traffic entering the Schools at Summerhill where the queues there tail back onto the carriageway and can cause tailbacks back beyond the turning for the Hartlake Road. Traffic heading easterly from the proposed development would have to negotiate Five Oak Green itself before arriving at the A228 where if then turning South

towards Tunbridge Wells will substantially add to the significant congestion heading up Colts Hill. Other minor roads in the area are already subject to significant levels of rush hour traffic and many of these are single carriageway country lanes.

Looking across the north of the Tunbridge Wells Borough poor road infrastructure provision is evident wherever you look. The A228 from the B2017 south to the A264 interchange with the A21 has been subject to a proposed bypass for over 30 years, the A228 being the important link between the two primary Hospitals serving West Kent. But the A264 itself as it heads into Tunbridge Wells is substantially congested not only at peak times all the way through to the center of the town. Similarly at the western end of the B2017 turning south westerly towards the A21, the A26 here is also heavily congested at rush hour and traffic turning north westerly on the A26 as it bypasses Tonbridge to its east is already beyond capacity with substantial rush hours queues. Adding 1000s of additional vehicle movements is simply unsustainable and it must also be noted that Tunbridge Wells Borough Council has not adequately consulted the Tonbridge and Malling Borough Council on which a substantial proportion of this additional traffic will fall.

There are further concerns regarding the potential consequences of this new development upon the water table and increases in flooding of the surrounding area. The proposed development is low lying land alongside the Tudeley Brook and a previous housing development to the south of Paddock Wood saw a number newly built homes subject to subsidence after completion.

The proposed development would also see a reduction in amenity as a number of tranquil footpaths through arable land would be obliterated.

The Inspector is urged to be aware of the other proposals for housing development, not only STR/SS3 for the new village at Tudeley to the west but also the machinations of Maidstone Borough Council in respect of a housing development at Beltring adjoining Paddock Wood towards its immediate north. The piecemeal approach does a great disservice to the people of Paddock Wood and Capel and the cumulative affects of all of these developments is the destruction of our rural environment.

In summary, a) the proposed development is inappropriate in the Green Belt, b) will completely gridlock the entire road network in this rural corner of the Borough, c) the plan is not properly integrated either within the Borough itself or strategically within the wider area of West Kent, d) loss of amenity, e) lack of strategic planning across Borough and West Kent.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This proposal is not sound and inappropriate in this rural setting.

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My wife and I have here at Colts Hill since the summer of 1993, her family having lived and worked in the parish of Capel for generations. It remains a beautiful corner of the Garden of England largely unspoilt Green Belt of small hamlets and villages set out amongst small woods and good quality arable land.

The proposed housing development for Tudeley is unsound on a number of important and key issues.

As already stated the area is rural in nature and aesthetics, comprising arable land and small woods. The proposed development is of such magnitude that it will obliterate Tudeley and be a visible blight on the views from across the Medway Valley from Golden Green and East Peckham. Of particular import are the world renowned Chagall windows in All Saints Church. Notable because this is the only church in the world to have all its twelve windows decorated by Chagall. The other three religious buildings with complete sets of Chagall windows are the Hadassah Medical Center synagogue, the Chapel of Le Saillant, Limousin, and the Union Church of Pocantico Hills, New York. When Chagall arrived for the dedication of the east window in 1967, and saw the church for the first time, he exclaimed "C'est magnifique! Je les ferai tous!" ("It's beautiful! I will do them all!") To desecrate the setting of the church by surrounding it with housing is tantamount to vandalism.

Traffic and infrastructure. The proposed plan makes inadequate provision for accommodating the substantial increases in traffic levels in the immediate and wider area. The B2017 linking Tonbridge to Paddock Wood is a winding rural single carriageway with pavements only provided within Five Oak Green. Within Five Oak Green residential parking on the carriageway already impedes the smooth flow of traffic which is exacerbated during the morning rush hour past the Primary School when children are being dropped off. I have commuted daily from Colts Hill through to the A21 at Tonbridge for over 25 years and this 4 mile journey can often take up to 40 minutes if there is the simplest obstruction. Added to this morning congestion is the school traffic entering the Schools at Summerhill where the queues there tail back onto the carriageway and can cause tailbacks back beyond the turning for the Hartlake Road. Traffic heading easterly from the proposed development would have to negotiate Five Oak Green itself before arriving at the A228 where if then turning South towards Tunbridge Wells will substantially add to the significant congestion heading up Colts Hill. Other minor roads in the area are already subject to significant levels of rush hour traffic and many of these are single carriageway country lanes. Looking across the north of the Tunbridge Wells Borough poor road infrastructure provision is evident wherever you look. The A228 from the B2017 south to the A264 interchange with the A21 has been subject to a proposed bypass for over 30 years, the A228 being the important link between the two primary Hospitals serving West Kent. But the A264 itself as it heads into Tunbridge Wells is substantially congested not only at peak times all the way through to the center of the town. Similarly

at the western end of the B2017 turning south westerly towards the A21, the A26 here is also heavily congested at rush hour and traffic turning north westerly on the A26 as it bypasses Tonbridge to its east is already beyond capacity with substantial rush hours queues. Adding 1000s of additional vehicle movements is simply unsustainable and it must also be noted that Tunbridge Wells Borough Council has not adequately consulted the Tonbridge and Malling Borough Council on which a substantial proportion of this additional traffic will fall.

It must be noted that these 1000s of potentially new residents will have to travel to work and school. There is no provision for cycleways or pavements within the plans, existing bus routes use these same already congested roads and there are no plans to provide sustainable levels of local employment.

There are further concerns regarding the potential consequences of this new development upon the water table and increases in flooding of the surrounding area. To the north of the proposed development lies the Medway and its flood plain and to the east Five Oak Green village which has been subject to some serious flooding in the last decade and which frequently has large tankers adding to the congestion on the B2017 when extracting excess water from the Alder Stream. This process is not limited to Five Oak Green, only today as I travelled along the B2017 there was a tanker in the road alongside the water facility in Tudeley itself.

In summary, a) the proposed development is inappropriate in the Green Belt, b) destroys the unique setting of the world famous Chagall windows in All Saints Church, c) will completely gridlock the entire road network in this rural corner of the Borough, d) the plan is not properly integrated either within the Borough itself or strategically within the wider area of West Kent.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This proposal is not sound and inappropriate in this rural setting.

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

BackgroundI have lived in this area since 1993 when I moved to Mile Oak . When I was working I commuted by car and over the years I have seen that the volume of traffic on what were previously quiet country roads around Paddock Wood has increased exponentially, these roads being quite unsuited for heavy traffic loads . I have also regularly experienced long delays caused by volume of traffic when getting onto and off the A21 at Kippings Cross, on Pembury Road into Tunbridge Wells and any on road into Tonbridge from Paddock Woodside. Development of the scale as proposed by TWBC will overload our crowded local road network.

Development on farmlandThe use of prime agricultural land as first choice (easy choice ?) for development is detrimental to the national good and I oppose it in principle.

The development Tunbridge Wells plan for Paddock Wood and Caple is flawed as it does not take into account the post "Brexit" reality where there is now extreme pressure for national self-sufficiency in food production . As the plan does not take this into account approval for development of any prime farm land should not be given. Prime arable land in the UK is not infinite.

In particular, the land in the South East corner of the plan is presently in full productive use growing many acres of blackcurrants, approval for development here should not be given. The nation cannot afford loss of land from food production to built development.

The Prime Minister stated to parliament on 3 May 2021 new housing development will be on BROWN FIELD sites.

Climate CrisisThe plan is flawed in regards to climate change as it does not take in to account the loss of the many acres of land currently in use for food production. Loss of valuable agricultural land results in the increased importationof food and so adding global warming pollution by additional emissions resulting from shipping across the globe .The need to reduce "food -miles" in the face of a climate crisis has been ignored in this plan.

Traffic CongestionIf the plan for the development of land for housing in the South East Corner is approved traffic flow heading for Tunbridge Wells, East Grinstead, Gatwick and A21 heading South will go up Pixot Hill, through Brenchley and Matfield. These roads cannot handle this traffic and Brenchley is a pinch point. TWBC cite a report of a survey they commissioned estimating a ridiculously low figure of 3% of traffic from the new development will head this way to head South to the A21 - this report is flawed - (Stantec report 6.6.2). The plan should be rejected

As supporting evidence I can provide an *accurate* survey - I live in Mile Oak adjacent to the proposed development in the South East corner where 1500 houses might be built, to head south or , if I want to go to Tunbridge Wells , I drive through Brenchley and Matfield to join the A21, so from first hand knowledge I can state that figure of 3% proposed by TWBC in the report they commissioned is wildly wrong. I estimate that 50% plus of my car trips go through Brenchley to the A21 (and 100% of my trips in to Tunbridge Wells go this way) and traffic from the proposed development for the East and the South East Corner will certainly follow the same route. The impact on the narrow streets of Brenchley will be significant and the plan does not accurately assess this and should be rejected

Within the plan (in the LCWIP phase 2 report) there is also a proposal to close the railway bridge on Maidstone Road, Paddock Wood, to all traffic other than buses This will create "rat runs" on Wagon Lane, Lucks Lane and Queen Street for cars, vans and small lorries heading south and wanting to access the eastern side of Paddock Wood, an area where a very large development is proposed, bringing heavy volumes of traffic on to narrow rural lanes. The plan does not take this into account as is therefore flawed

Flooding

If the proposed sites in the south east corner of Paddock Wood are converted from agricultural to built development the removal of so many acres of fruit production will cause the ground water table level will rise and so damage properties along Mile Oak Road, properties in Catts Place Cottages along this road.

Protection of Heritage Assets - The plan is flawed in respect of the historic hamlet of Mile Oak (where 50% of the properties are listed) which is in Brenchley parish, Mile Oak lies immediately adjacent to the Paddock Wood boundary. The proposed development site in the South East corner would directly connect Mile Oak into the urbanisation of Paddock Wood. Any development work in the South East corner would destroy the nature and value of Mile Oak hamlet as an heritage asset unless a clear greenfield gap maintained. This a specific and strong reason why the south east corner should not be considered for development.

In the plan no mention been made about considering the rural setting and heritage asset value of the listed buildings in Mile Oak hamlet. To repeat, the plan is flawed in this regard and should be rejected

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	James Dawes
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph Numbers: 2.24 - 2.31	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No

Complies with the Duty to Cooperate

Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan claims precedence over Neighbourhood Plans if they are superseded by strategic or non-strategic policies that are adopted subsequently or they conflict with the Council's strategy.

If the council want to retain the support of local people they must give precedence to the neighbourhood plans otherwise the council will not take the population with them. The people who live in a parish know best the problems associated with housing costs, traffic and schooling and if the council is able to only adopt the aims of the neighbourhood plan when it coincides with their wishes but ignore it when it does not, then the neighbourhood plan is a useless document – advisory at best.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 2.26 and 2.27 need to be re-drafted in the following terms:

2.26 As explained at paragraphs 29 and 30 of the NPPF, neighbourhood planning gives communities the power to develop a shared vision for their area, but that neighbourhood plans must not promote less development than set out in strategic policies for the area, or undermine those strategic policies.

2.27 The NPPF also clarifies that once a neighbourhood plan has been brought into force, the policies it contains take precedence over existing non-strategic policies in a local plan covering the neighbourhood area, where they are in conflict; unless they are superseded by strategic or non-strategic policies that are adopted subsequently.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because the local council should not be able to over-rule a neighbourhood plan and they will always attempt to garner more power to themselves if allowed.

Significant representations were made to TWBC during the regulation 18 consultation period none of which were answered or addressed by the council.

The proposed development is on green belt, on a flood plan, unserved by suitable infrastructure including public transport, road networks, doctors surgeries and schools and is in or very adjacent to an area of outstanding natural beauty.

Should this development go ahead its geographical position in relation to the amenities Tunbridge Wells affords is such that residence will pay council tax to TWBC but use very few if any of TWBC amenities. Instead they will rely on amenities provided by Tonbridge which is significantly closer to the development but falls under a different local council. This is bad enough even before you consider that the plan itself admits that road links between Paddock Wood and Tonbridge are poor and not suitable for expansion. How then will people get to Tonbridge where the nearest supermarkets are located?

Paddock Wood is already overdeveloped for its infrastructure and amenities and is certainly not the self sufficient, bustling town the plan portrays it as. This development will make the situation significantly worse in every regard save for TWBC revenue.

With no proper public transport infrastructure this development relies on multiple vehicle homes which will inevitably and significantly increase traffic on roads that are already unfit for current traffic levels. Cycle and foot paths will not be used by people taking children to school or going to work for the overriding majority of new residents.

This element of the local plan is fundamentally flawed and TWBC have until now refused to acknowledge that. Please put a stop to this outrageous proposal to irreversibly ruin a significant area of outstanding natural beauty.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This section of the local plan should be scrapped.

Tunbridge Wells has significant brown field sites that should all be developed before a single green field site is even considered for development.

As and when this has happened improvements to infrastructure including roads, public transport, schools, public health and community centres should be in place BEFORE developments of this magnitude are allowed. For the plan to say these things are being considered is simply not good enough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy AL/HA 5 Land to the north of Birchfield Grove

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a Birchfield Grove resident, I wish to register my objection to Policy AL/HAS which seeks to allocate land to the north of Birchfield Grove for the purposes of a new joint doctors' surgery, parking spaces and ancillary facilities.

My reasons are all substantiated by Kingsley Smith's comprehensive submission to you dated 21 May 2021. Therefore to prevent being lengthy and repetitive, I have precised my response which wholly refers back to Kingsley Smith's submission.

AONBSee Solicitor's report on this aspect. To me there seem to be no 'exceptional circumstances' as to why the surgery should be located at Birchfield Grove. Certainly the downsides of such a project would be catastrophic in terms of encroachment in an AONB. Also Site 413 was excluded from the January draft of the PSLP because of AONB issues. Have there been any changes since then? None are evident to me. Also the ecological strip intended as protection for wildlife, flora etc would be breached, contrary to what I was told when purchasing my property.

TRAFFIC AND ACCESSTraffic congestion in Hawkhurst is a well known and frustrating fact. The village simply cannot cope with current, let alone, increased volume. Every day there are back ups from the traffic lights to the junction with Birchfield Grove - an impossible situation exacerbated by vehicle fumes, speeding traffic braking hard to join the queue - an accident waiting to happen. In addition, visibility to exit Birchfield Grove is difficult to say the least, as is entry into Birchfield Grove, particularly at night - there are no street lamps - dark sky policy. How would this policy sit with a large practice, cars etc on the north side of the ridge? (I notice planning was turned down recently for 6 bungalows opposite Birchfield Grove due to traffic/access reasons).

Birchfield Grove itself is a narrow cul de sac and entirely unsuitable for large flows of traffic. Some houses are only a few feet from the road which in itself presents a high degree of danger let alone the resultant stinking fumes which will be generated by queues of cars trying to exit Birchfield Grove and speeding cars having gained entry, plus the prospect of larger vehicles, ambulances etc.

ALTERNATIVE SITEA well documented fact that TWBC has agreed to a proposed joint surgery at KGV with notable advantages over Birchfield Grove. The provision also of a Community Centre is a real bonus, a facility for a village the size of Hawkhurst so desperately needs. Why are the doctors so insistent on pressing for Birchfield Grove when services already exist at KGV, parking and no encroachment on AONB and housing - do ask yourselves! Gaining access at Birchfield Grove will no doubt lead to future applications from the owners of the land beyond for a large housing project. A ridiculous scenario which would only add to current problems previously mentioned not to mention Sewage which is a major concern in this area.

I trust TWBC will give careful and measured thought to this reapplication and its long term effects if granted, and fully embrace the points raised here and in particular, Kingsley Stevens submission.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

<input type="checkbox"/>	It is not justified

. It is not effective

. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a resident of Nursery Road, just on the other side of the railway bridge from the High Street / Commercial Road side of Paddock Wood. I have lived here for four years, and my young children attend Brenchley and Matfield School around 3 miles away in Brenchley. This was felt to be a better fit than Paddock Wood School for my eldest who had some developmental difficulties at school selection time.

I take my children to school from my home, over Paddock Wood railway bridge, every morning at around 8.20am - 8.30am, returning to work from home at around 8.50, and the same round trip at pick up time (3.00pm to 3.45pm). The railway bridge is not congested or even particularly busy at these times, or at any other time of the day that I use it (e.g. at afternoon/evening rush hour). If the new houses go ahead in Paddock Wood, they will be situated on the 'right' side of the bridge for all the amenities, so I can't see that the proposed developments will add a large number of journeys over the bridge either.

If the bridge is closed, I will still have to drive my children to school due to the distance and the lack of pavements for walking, but I will have to go a long way round adding probably more than 10-15 minutes to every journey and therefore increasing emissions etc. I would anticipate that the majority of houses on this side of the bridge would be in the same boat. Added to this, my likely route would be via the Hop Farm / A228 and then back along the B2017 (Badsell Road) past the new development, so this will make any additional traffic from development even worse.

Closing the bridge will under no circumstances 'reduce the number of vehicle trips in the town' as stated in the plan. It will simply mean that all of us on the 'wrong' side of the bridge will have to drive a long way around to get over the railway, therefore INCREASING traffic past the Hop Farm and along the A228, or worse still having people zooming along single track country lanes such as Wagon Lane and Queen Street. The plan actually states that the bridge is the only road over the railway in Paddock Wood – closing it is completely illogical. People won't walk to the Paddock Wood supermarkets and lug their weekly shop back – they'll get in the car and drive the long way round, or probably more likely carry on and take their business to other towns.

This will cut a significant number of residents off from the local amenities, literally rendering a whole side of the town as 'the wrong side of the tracks'. If new houses are built north of the railway, no one will want them without any vehicular access to the town itself. This has not been thought through at all, and you need to listen to residents on this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposal to close the railway bridge simply needs to be removed. If necessary, this should be reassessed AFTER any new houses are built, when the level of congestion can be appropriately assessed. Alternatively, solve the problem by building another crossing over the railway, rather than removing the only one that connects one side of the town to the other.

If the proposal is because the road cannot handle the increase in traffic from the new houses, perhaps this is indicative that Paddock Wood / Capel is not an appropriate area for this amount of development to take place. Either improve the infrastructure, or remove the demand. Do not cut residents off from local business.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would be happy to give evidence as someone who lives in a road that will be deeply affected by this proposal. I make no 'unnecessary' journeys over the bridge, and would be pleased to outline my situation and why this is an ineffective and unsound policy.

I object to the inclusion of land in East Capel in "The Strategy for Paddock Wood" (Policy STR/PW1).

This land is Green Belt land and should only be built upon if an "exceptional circumstance" exists.

TWBC's own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan's aims without using the Green Belt land at East Capel.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

For the past 12 years my husband and I have been fortunate to live in Tudeley. We chose to purchase a Grade II listed building and have invested time and money in its ongoing maintenance and protection. We were drawn by the setting – within the AONB surrounded by beautiful countryside and assumed since designated Green Belt, the local area would be protected from development. I enjoy walking the local footpaths and for the past 8 years have undertaken voluntary work and species surveys at RSPB Tudeley Woods Reserve. I am also a keen wildlife gardener and constantly amazed by the species we attract to the garden from neighbouring habitats.

I consent to my contact details being added to your consultation database. Please keep me informed of all future Local Plan consultations. I understand that my comments may be published by TWBC.

I am writing to object to “The Strategy for Capel Parish” (Policy STR/CA1).

1) Loss of MGB

<https://www.gov.uk/guidance/national-planning-policy-framework/13-protecting-green-belt-land>

National Planning Policy Framework 13. Protecting Green Belt land Notably Paragraphs 134 & 143-145

- The Capel Master Plan is contrary to the purpose of the Green Belt: (a) to check the unrestricted sprawl of large built-up areas; (b) to prevent neighbouring towns merging into one another; (c) to assist in safeguarding the countryside from encroachment; (d) to preserve the setting and special character of historic towns; and (e) to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

- The STR/CA1 map illustrates the potential reduction in separation between Tonbridge, Tudeley, Five Oak Green and Paddock Wood which is wholly unacceptable and impractical on so many levels.

2). The Natural Environment- As Capel currently stands we are blessed with a network of public footpaths which enable access to attractive countryside, wonderful views and the ability to easily walk between settlements. The possibilities to get outside and the health and wellbeing benefits that bestows, are endless with local highlights being:

Foal Hurst Wood RSPB Tudeley Woods Sherenden and Moat Farms The River Medway Whetsted Gravel Pits

- The amenity of all of these sites and many of the connecting footpaths have the potential to be harmed by the proposed developments, be it by destruction of views, noise pollution, increased footfall and its associated issues (littering, dog fouling, anti social dog walkers).

Biodiversity- Capel is rich in biodiversity. - A historic lack of biodiversity recording as evidenced by inventories supplied by KMBRC of the area does not mean species do not exist! - Whilst some species are highly territorial and location loyal, that is not to say they won't be adversely affected by significant changes to neighbouring locations particularly in terms of air, noise and light pollution. From my own experience, the land around Sherenden Farm, which borders the CA1 site, is used for feeding and or breeding by a number of Birds of Conservation Concern - I suspect there are many more besides:

Red List: Fieldfare House Sparrow Lapwing Linnet Redwing Skylark Song Thrush Starling Yellowhammer

Amber List: Kestrel Swift

- At present our amphibians, aquatic animals, birds, invertebrates, mammals, reptiles and fauna enjoy a fairly undisturbed existence save for seasonal agricultural operations in some areas and they are

free to roam and spread without too many man made barriers. With the exception of the A228 Paddock Wood bypass, they currently do not encounter major roads. If this were to change, it may artificially and detrimentally alter natural behaviour whilst potentially increasing road kill.

Cumulative Effect The cumulative effect on biodiversity of this level of simultaneous development must not be underestimated - Tudeley Village and Senior School (CA1), East Capel (PW1), Mineral extraction at Whetsted Gravel Pits and the Colts Hill bypass proposal will destroy or disturb vast tracts of habitat. The associated ground disturbance and noise and air pollution on site and construction plant noise/pollution on surrounding roads will surely encourage species displacement. I cite Foal Hurst Wood LNR as a specific example likely to be adversely impacted by East Capel (PW1) and the Colts Hill Bypass. - When considering development of this scale in a relatively confined area of the borough we can't afford to consider each site in isolation but should employ a holistic view to protection. - It unjust and short sighted that only species with designated protections are considered during the planning process.

Biodiversity Offsetting - Just because an agency arrives at a notion for national adoption, doesn't make it a credible idea. - If you proposed replacing a substantial area of tarmac i.e. a disused airfield, or cleaned up a substantial contaminated brownfield site, then I would agree this would represent a net gain in biodiversity. - If however you tell me you are going to destroy a large area of Green Belt but mitigate its loss by better managing a TWBC woodland I would call this an insult. The woodland is already a biodiversity resource and if you are currently not managing a precious resource in an optimal way you are failing. - Biodiversity Offsetting is just smoke and mirrors.

3) Transportation

Existing Road Management and Anti-social Behaviour - Is it wise to create/expand roads within Capel and surrounding areas when TWBC and local agencies are obviously stretched to the limit. Whilst proactive in road surface maintenance, this is not true of the roadside verges. Littering is already an issue the length of the B2017 and Hartlake Road etc with residents resorting to litter picking in the absence of council operations. - Similarly, whether down to lack of will or resources, the Police seem unable to control the late night anti-social driving issues along the B2017, neighbouring lanes and Woodgate Way which is both a source of noise pollution and potential jeopardy for legitimate road users and residents. - Drivers routinely exceeding the 40 mph speed limit, together with inappropriate HGV use are issues that will be exacerbated by any road expansion and increased population. - If TWBC and the authorities are unable to address such issues as the population currently stands what chance have they with a significant population increase?

Road Network - I fail to see how existing roads outside of the development sites will cope with the increased population. Woodgate Way, Vale Road, and Cannon Lane Tonbridge and Pembury Road Tunbridge Wells are already subject to chronic congestion. - I frequently travel between Tudeley and the B245 (London Road), when Cannon Lane is congested I use the High Street via Medway Wharf Road as the Vale Road/High Street roundabout is increasingly unusable. A significant increase in road users will exacerbate congestion in Tonbridge as the nearest town to 'Tudeley Village'. - In the 12 years we have lived in Tudeley the increase in local traffic congestion has grown.

Associated road network as yet undefined. - Expansion of existing roads and/or creation of new roads may further contribute to sprawl. - I fail to see how the B2017 through Tudeley could be expanded given that dwellings abut the road on either side, the southern portion being AONB. - We can only surmise new road locations which seems an unsound basis for consultation.

4) Inappropriate Development Senior School west of Tudeley - TWBC state 'Tudeley Village' is "a standalone garden settlement" so why will senior school provision be made outside its boundaries? Similarly, primary school provision may be met by expansion of Capel Primary School, Five Oak Green. - Both these proposals will have detrimental effects on traffic congestion on the B2017 and A26 Woodgate Way west of Tudeley and on the western extreme of Five Oak Green where school run parking is already chronic and a source of traffic congestion.

"The school shall be designed to minimise trips to and from it by private vehicle and to facilitate active transport modes, such as walking and cycling from Tudeley Village"

– Regrettably, I think it is a naïve and idealistic expectation in this age of multiple vehicle ownership and heavy use thereof.

5) Additional Concerns

- Water supply to development sites – how is an increase in population sustainable when Kent is vulnerable to drought?
- Further negative environmental impact of bringing utilities and drainage to and from development sites.
- Increased potential for flooding with increase in impervious surfaces.
- Reduction in vital food production through loss of valuable agricultural land.
- The negative impact of nearby development on heritage assets and their setting notably the many listed buildings and in particular the unique and renowned Tudeley All Saints Church with its Marc Chagall stained glass windows.
- I understand Pembury Hospital is already struggling to meet demand, how will an increase in population be cared for particularly as 'Tudeley Village' occupancy is aimed at all stages of life so would assume maternity, paediatric and elderly care etc?
- I understand there is controversy as to how the future population / housing requirement figures were arrived at. There is evidence of local properties stagnating on the housing market (ironically I suspect a symptom of the outrageous Local Plan). Rumours abound that such housing schemes attract London overspill rather than address local need. As the uncertain political climate and Brexit unfolds I would expect a review of the proposed figures and against more up to date ONS data than is currently being used.

I object to the inclusion of land in East Capel in “The Strategy for Paddock Wood” (Policy STR/PW1).

This land is Green Belt land and should only be built upon if an “exceptional circumstance” exists. TWBC’s own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan’s aims without using the Green Belt land at East Capel.

[TWBC: Note the comment on STR/PW1 has also been input against Policy STR/PW1]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Respondent's Name and/or Organisation	Andrew Dewdney
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I submitted fairly detailed comments for the Regulation 18 consultation, most of which appear to have been ignored, and I am wondering why the Planning policy means that I have to re-submit them so you can see them, and why you shouldn't have access to those Reg 18 consultation remarks.

I was initially bought up in Paddock Wood from the mid 1960s, and attended school in Tonbridge. After university I moved to London and then spent some time abroad, returning to the area in the late 1990s. I have a number of general comments concerning the last 50 years of my experience of living in this area:

- 1 Road Infrastructure: The dualing of the A21 has been discussed since the 1970s, and I remember the section being opened between Sevenoaks and Tonbridge. The only other main road infrastructure that has been added in the 40 years since I left in the early 1980s is the A21 dualing from Tonbridge to Kippings Cross. This is great news but the downside is that it has caused significantly more congestion along the B2160 to and from Paddock Wood. I have often encountered queues back to the Matfield Church to get to the A21 roundabout, and getting through Matfield is a game of cat-and-mouse through the parked cars on the road. This will obviously get worse with the increased housing approved and planned for Matfield and Paddock Wood. Whilst there appears to be little in the plan for new road infrastructure except for the Capel bypass and new "village" development, buried in the TWBC consultation reports are proposals to close the railway bridge at Paddock Wood to anything but buses. This is madness. Where are all these new residents supposed to work (seeing as the local plan is suggesting that the new jobs are going to be largely generated in the industrial estates to the North of the railway)? The local plan should be seeking to develop additional road and bridge infrastructure to cope with the additional load that will be put on it, rather than restricting the existing infrastructure to buses.
- 2 Parking: across the rural parts of the borough, from Sissinghurst to Matfield and beyond, permission has been granted for a large number of homes but with no commensurate increase in off-road parking. Traffic through the villages is now being slowed and queuing - leading to higher levels of pollution and poorer air quality for residents. At a Reg 18 planning meeting I attended in Horsmonden, the planning officer in attendance from TWBC tritely commented that "such queues are good for reducing speeding vehicles". Provision in the plan should be made for sufficient off-road parking for residents and visitors - in order to maintain the capacity of the current road infrastructure to accommodate the vast number of increased residents and traffic this will generate, without any significant improvement in the road network set out in the plan.
- 3 Rail infrastructure: The scheduled journey times to London from Paddock Wood are now longer than when I was getting the train to school in the mid-1970s. Two years ago the Secretary of State for transport canvassed opinion on reducing stopping services between Ashford and Tonbridge (to reduce travel times from Ashford - notwithstanding the High Speed One alternative to Kings Cross). I asked the TWBC planning department representative at the Reg 18 meeting

whether there had been discussions with the operator about capacity given the proposed increase in housing in the borough and in neighbouring boroughs (given the huge developments down the line in Marden and Staplehurst). She responded saying that the rail operator had come back saying that there "may be some additional capacity". She didn't know whether this was at peak times or whether the company would operate longer trains to increase capacity. This seems typical of the TWBC local plan - woolly thinking on real issues and no discussion with neighbouring councils. When I started commuting to London in the 1990s it was possible to get seats up until Sevenoaks in the morning peak. Pre-pandemic it was getting difficult by Tonbridge. The rail services have not been increased to this area since the 1980s yet it is assumed that it will be able to accommodate the vast numbers of new customers along the line. There needs to be some joined-up thinking in government and planning to look at the bigger picture.

- 4 Infrastructure: My parish council has concerns that the TWBC Infrastructure Development Plan (IDP) is incomplete. TWBC should be specifying the core infrastructure assets that need to be in place and be ready by construction or sale of the first phases of house-building. There has been history in of developers being granted planning permission and then putting on hold development after the first phase. TWBC doesn't have the resources to put this in place and is dependent on developers to do so. According to the planning representative at the Reg 18 meeting I attended, this has happened in a Paddock Wood development (to my great surprise the planning representative admitted that the "Paddock Wood contract has been a mistake") and the conditional infrastructure improvements required by the planning permission were not implemented. It is well known that developers are also able to escape "affordable" home numbers after PP on the basis that they make the development uneconomic. This can also happen with conditional infrastructure commitments as developers can go bankrupt, merge or change strategies. To me the TWBC Local plan appears to be development led rather than infrastructure led, which may lead to more contractual mistakes by the Council with developers and risk leaving inhabitants with the housing but not the associated infrastructure improvements to

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I don't feel qualified to comment on the legal nature of the Plan - you are in a much better place to opine on that than the bulk of the 120,000 people that live in the Borough. However, I have a number of comments on the soundness of the local plan:

- 1 As set out in my comments I believe that this plan is development driven rather than infrastructure driven. TWBC have taken the centrally imposed housing targets for the borough and not challenged them. The council has used the standard methodology using 2014 data to calculate the requirement for 678 houses per annum. The council has ignored the ONS 2016 forecast, which would reduce the national housing need from 300,000 houses per annum to 160,000. This would give a requirement for 484 homes per annum.
- 2 I don't think that TWBC has complied with its NPPF requirements to examine reasonable alternatives to the standard methodology. In the Dixon Searle Partnership report it says that TWBC has examined reasonable alternatives but concluded that they are not possible. I can't find any evidence of the council exploring alternatives, nor why such alternatives were rejected, but in a borough with so much AONB and Greenbelt land there could be reasons to question and move away from the standard methodology.
- 3 In addition to the AONB/Greenbelt argument, there have been two major changes in circumstances since the Reg18 consultation in 2019: Covid pandemic and the UK has now left the EU with a

- trade deal for goods, but not services. Both will have a major negative impact on the UK's growth in the coming decades and given that services are not included in the deal, the impact on the City (and many people in this Borough work there) but there is no economic analysis in the Viability Assessment that takes this into account. This is a serious error of omission.
- 4 In the 37 page Local plan viability assessment there are 4 references to Covid and leaving the EU but general waffle about how this will lead to uncertainty - what about modelling the impact of the Borough of a decline in the assumed growth rates that underly the assumptions?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

TWBC has not made it easy to make comments - the local plan website is slow, links don't work properly and access to the documentation is not intuitive. Hence I have decided to submit my comments directly.

I have had an involvement in this borough from my childhood and my children have been brought up here. I don't have the opportunity to elect a planning inspector nor challenge their approvals. Therefore before that inspector opines on what will happen to this area, that is close to my heart, I believe they should speak to as many people as possible and find out the depth of feeling towards this plan. TWBC is changing the shape of this borough, and its historic villages and landscapes, acre by acre. The ruling party has seen its share of the vote fall from 80% 5 years ago to 37% in the last elections. People don't want the plan in its current form and 97% of the 1,100 comments on the Reg 18 process were opposed to it. You will come in, give your opinion and walk away leaving this generation and all future generations in this area to deal with the consequences. It has taken me hours of (unpaid) time reading hundreds of pages of documents, attending meetings, so I think it would be only fair for you to hear me, and others, out.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Closing the railway bridge in Paddock Wood to traffic other than buses is shortsighted and not in the interests of existing residents and the occupants of the massive new development in the plan. More crossings of the railway will be needed to accommodate the increased population.

Why has the walking/cycling strategy paper only recently been commissioned when the TWBC has granted PP hundreds of houses in Paddock Wood already? Again this is evidence of the development led approach by TWBC rather than seeking to put in place the necessary infrastructure plans first. TWBC needs to change its approach to being infrastructure driven.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been resident in Tonbridge for 30 years and know the area well. I am concerned about the TWBC proposed plan for a number of reasons, some of which are detailed below.

What is also noticeable by its absence is any reference to consultation and co-operation with Tonbridge and Malling BC regarding the affects this plan will have on their residents.

This plan is not considered sound for a number of reasons which are not listed below in any specific order of importance.

This plan will significantly impact local infrastructure. For example (*this list is not exhaustive*):-

- . increased traffic on roads will result in increased local congestion, decreased air quality and an increased carbon footprint (queues on the A26 for example are already lengthy, particularly at peak times);
- . increased use of already overstretched local peak-time rail use is inevitable based on the local connectivity with London and elsewhere (before I retired I commuted to London daily and noticed that trains were increasingly very busy in peak time);
- . there will be increased health care requirements including hospitals, GP surgeries, dentists, etc. which are already strained in the area (getting an appointment is already very difficult);
- . an increased demand on utilities;
- . significant increased demand for local school places which have the additional issue of dropping off and collection times (this is particularly relevant to Capel School that my grandchildren attend and from where we collect then twice a week).

While these points are noted in the plan there is no definitive indication given of how TWBC will "work with" various agencies and providers to deliver the expected increased infrastructure requirements. It is not clear if these will even be possible to deliver in the short and longer term.

Completion of the plan will take over 15 years resulting in increased congestion, and significant disruption to local people. As the proposed development is on the outskirts of TWBC this plan gives all of the benefits of council tax to TWBC but all of the disturbance and hassle to Tonbridge & Malling (e.g. all relevant local infrastructure issues as noted previously and the increased demand for car parking for residents, commuters, shoppers, etc.)

The number of dwellings in the plan is totally disproportionate to the area. The proposal would represent a 500%+ rise in the number of dwellings in Capel. I visit Capel regularly and the rural atmosphere would be destroyed if the planned housing goes ahead). Also interesting is that the Councillor for Capel only represents 2% of the total number of TWBC Councillors.

The proposal is to build on a known flood plain and high-risk flood area. The increased "concreting over" will result in an increased risk of flooding to the area and/or move the water downstream to other

surrounding areas such as Tonbridge, Yalding, East Peckham, Golden Green, etc. where flood mitigation fails. If dwellings are subsequently flooded as a result of the building, this is likely to increase house insurance costs and could result in flood insurance being unobtainable which would have a dramatic and undesired effect on the saleability of property in the area. Should this happen, it is possible that affected residents could have a potential claim against TWBC and their Councillors.

The proposal will destroy about 600 acres of green belt land. Why would this be considered where there are alternative brown field sites that may not have been adequately studied and considered. Equally, a substantial acreage of good quality agricultural land will also be lost forever. This is in addition to a further 200 acres that are due to be quarried as part of the Kent Minerals Plan. This will turn what is now a rural Kentish Parrish landscape into just another concrete conurbation – once green belt land is gone it can't be replaced!

It is also understood that Hartlake Road which links Golden Green to Tudeley may be closed to all traffic if this plan is not approved. A large number of individuals use the road regularly and its closure will add to the congestion on the main road from Tonbridge to Tudeley. This is already highly congested and will increase the pollution from stationery or slow-moving vehicles. There has been no consultation on this because if there had been there would have been a far higher number of objections received.

If TWBC have proposed this plan to meet government targets, what efforts have been made to advise Central Government that their house building targets are not feasible in this area, as Sevenoaks have done? The South East of England is already densely populated and further extensive building and urban sprawl as proposed will add to emissions, further reduce green spaces, and contribute to the further deterioration to local and global climates.

It is clear that TWBC have ignored the unprecedented local response at Reg 18 and have not adequately addressed the concerns raised. Why has there been such a lack of scrutiny and transparency to this plan as it affects a far larger area and population than the corner of the TWBC ward where it is proposed the development is situated? Engagement with the local community in Capel and the surrounding area that will be affected has been totally ineffective as the majority of people that will be personally affected by this plan do not appear to have been honestly and robustly advised of the true effect on them if the plan is agreed. This seems totally inequitable

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- . The implications of this plan are not sufficiently or widely known about. This must be rectified by the publication and circulation of a transparent document advising all citizens in all affected areas of the potential impacts of the plan and their opportunity to respond to these.
- . The publication of a detailed plan agreed with all relevant agencies and providers affected by the proposal.
- . Publication of how TWBC have adequately addressed the objections raised in Reg 18.
- . The publication of discussions with Tonbridge & Malling BC relating to this proposal and its effects on their residents.
- . Revisit feasibility of alternative brown-field sites.
- . A substantial reduction in the number of dwellings proposed (maximum 10% of original plan) with these to be on brown-field sites.
- . Push back by TWBC on Central Government housing target for the area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ No, I do not wish to participate in examination hearing session(s)

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1936, PSLP_1938, PSLP_1939, PSLP_1940 and PSLP_1941]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments)(see web link)

. Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of

the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID).

How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1936, PSLP_1938, PSLP_1939, PSLP_1940 and PSLP_1941]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID).

How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Millie Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1936, PSLP_1938, PSLP_1939, PSLP_1940 and PSLP_1941]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is

parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the

Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Millie Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1936, PSLP_1938, PSLP_1939, PSLP_1940 and PSLP_1941]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Millie Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1936, PSLP_1938, PSLP_1939, PSLP_1940 and PSLP_1941]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Millie Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 5 Heritage Assets	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Improved or new access to historic parks and gardens could easily facilitate the erosion of historic landscape not intended for vehicular use.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Delete latter half of last sentence in para 1 of EN5 ...”and in the case of historic parks and gardens, provides, where possible, improvement of access to it.”.

The proposed wording of policy EN5 invites alternate use of historic landscape which the Kent Compendium of Historic Parks and Gardens 2010 intends to prevent.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Further clarification

Question 1	
Respondent's Name and/or Organisation	Philippa Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4, please see Comment Numbers PSLP_2100 and PSLP_2103]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be

translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Question 1	
Respondent's Name and/or Organisation	Philippa Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4, please see Comment Numbers PSLP_2100 and PSLP_2103]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be

translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Tom Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE2, AL/BE 3, AL/BE 4 and EN1 – see Comment Numbers PSLP_1767, PSLP_1768, PSLP_1769, PSLP_1770 and PSLP_1771]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see <https://tunbridgewells.gov.uk/planning/planning-policy/local-plan/previous-stages/local-plan-comments/section-5-benenden>)

o Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

- according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

O The Friends of the East End (FEE) are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.

- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to uninformed views that fly in the face of TWBC policy and advocate direct and pointless confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The ensuing chaos hardly bears thinking about. At least it seems the opinions now being afforded most weight are those of people who have worked hard for two years to understand the issues and come up with a coherent way forward.”
- o Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 **The plan is unsound because of the untimely publication of site allocations**

- . Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- . The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”)

1 **The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**
Supporting Documents

- . **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020. See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore *a report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does not note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's Rural Lanes: Supplementary Planning Guidance. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs*, Benenden).
- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.

- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.

o There is no "pre-school/nursery" as stated in the Overview o There is no "Small shop at hospital" as stated in the Overview o The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "Representation to the TWBC Draft Local Plan Regulation 18" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant

from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining

on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are

not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Tom Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE2, AL/BE 3, AL/BE 4 and EN1 – see Comment Numbers PSLP_1767, PSLP_1768, PSLP_1769, PSLP_1770 and PSLP_1771]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see <https://tunbridgewells.gov.uk/planning/planning-policy/local-plan/previous-stages/local-plan-comments/section-5-benenden>)

- . Looking at the issue in terms of its hectarage:
- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.

- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only "31 residents from the East End" had sent in "comments". For the strength of today's opposition to the BNP, see the FEE's current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to uninformed views that fly in the face of TWBC policy and advocate direct and pointless confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The ensuing chaos hardly bears thinking about. At least it seems the opinions now being afforded most weight are those of people who have worked hard for two years to understand the issues and come up with a coherent way forward."

- . Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 **The plan is unsound because of the untimely publication of site allocations**

- . Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called "Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site "allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

- . The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."

1 **The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

Supporting Documents

- . **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020. See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore *a report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two,

Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's Rural Lanes: Supplementary Planning Guidance. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).

- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "Representation to the TWBC Draft Local Plan Regulation 18" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013,

to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the

village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Tom Dorey
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE2, AL/BE 3, AL/BE 4 and EN1 – see Comment Numbers PSLP_1767, PSLP_1768, PSLP_1769, PSLP_1770 and PSLP_1771]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see <https://tunbridgewells.gov.uk/planning/planning-policy/local-plan/previous-stages/local-plan-comments/section-5-benenden>)

- . Looking at the issue in terms of its hectareage:
- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February

23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>. Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to uninformed views that fly in the face of TWBC policy and advocate direct and pointless confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The ensuing chaos hardly bears thinking about. At least it seems the opinions now being afforded most weight are those of people who have worked hard for two years to understand the issues and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

1 The plan is unsound because the evidence on which it is based is inaccurate or irrelevant **Supporting Documents**

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020. See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore *a report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's Rural Lanes: Supplementary Planning Guidance. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development.
- These omissions undermine the report's conclusion.

- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "Representation to the TWBC Draft Local Plan Regulation 18" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not

adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (<https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20>

Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities

including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Question 1	
Respondent's Name and/or Organisation	Tom Dorey
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE2, AL/BE 3, AL/BE 4 and EN1 – see Comment Numbers PSLP_1767, PSLP_1768, PSLP_1769, PSLP_1770 and PSLP_1771]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see <https://tunbridgewells.gov.uk/planning/planning-policy/local-plan/previous-stages/local-plan-comments/section-5-benenden>)

- . Looking at the issue in terms of its hectareage:
- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation

the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP.”

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) “The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings.” *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), “The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary.” *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP’s AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP’s AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP’s plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to uninformed views that fly in the face of TWBC policy and advocate direct and pointless confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The ensuing chaos hardly bears thinking about. At least it seems the opinions now being afforded most weight are those of people who have worked hard for two years to understand the issues and come up with a coherent way forward.”
- . Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the

BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 **The plan is unsound because of the untimely publication of site allocations**

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called "Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site "allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."

1 **The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**
Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020. See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore *a report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's Rural Lanes: Supplementary Planning Guidance. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).

- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . **Inset Map 18 (Benenden Hospital)**, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "Representation to the TWBC Draft Local Plan Regulation 18" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is

parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Tom Dorey

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE2, AL/BE 3, AL/BE 4 and EN1 – see Comment Numbers PSLP_1767, PSLP_1768, PSLP_1769, PSLP_1770 and PSLP_1771]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see <https://tunbridgewells.gov.uk/planning/planning-policy/local-plan/previous-stages/local-plan-comments/section-5-benenden>)

- . Looking at the issue in terms of its hectareage:
- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>. Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to uninformed views that fly in the face of TWBC policy and advocate direct and pointless confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The ensuing chaos hardly bears thinking about. At least it seems the opinions now being afforded most weight are those of people who have worked hard for two years to understand the issues and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 **The plan is unsound because of the untimely publication of site allocations**

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

1 **The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020. See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore *a report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);

- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's Rural Lanes: Supplementary Planning Guidance. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs*, Benenden).
- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "Representation to the TWBC Draft Local Plan Regulation 18" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent,

which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since

then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Malcolm Dorrington [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Malcolm Dorrington [REDACTED]
Comment ID	PSLP_132
Response Date	21/05/21 13:10
Consultation Point	Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel (View)
Status	Processed
Submission Type	Web
Version	0.4
Files	Malcolm Dorrington- Representation letter.docx (3)
Question 1	
Respondent's Name and/or Organisation	Malcolm Dorrington
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 for Paddock Wood including land at east Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in the borough for virtually my whole life and been a resident of Paddock Wood for 35 years, and it seems like we have been having construction work going on here for at least half of that time, at present there are three large developments underway at the same time, all of which is being carried out on former agricultural land, On top of which TWBC want to build another 13,000 houses again on prime agricultural land, this figure is 50% of its target, TWBC are saying that the government is asking to much.

Across the whole borough Paddock Wood and Capel are at the most risk of flooding with the ever increasing autumn and winter rainfall flooding issues have worsened.

We do not have the infrastructure to cope with more housing, the schools are full, the doctors surgeries are full and with the advent of the forthcoming Churchill Retirement Home development on Commercial Road we are losing five existing shops with nowhere to build more.

The country side next door which became so important to the health and well being of residents during the pandemic will be gone forever and there will be no there will be no green space in between, we will no longer be a rural area, we will be a giant urban sprawl.

Please see the document attached under question 8

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see the document attached under question 8

[TWBC: text of supporting document copied here for ease of reference]:

I have lived in the borough for virtually my whole life and been a resident of Paddock Wood for 35

years, and it seems like we have had major construction work going on here for at least half that time, at present there are three large developments underway at the same time, all of which are being carried out on former agricultural land, on top of this TWBC want to build another 13,000 houses which is 50% of its target, they are actually claiming that the government is demanding too much.

Across the whole borough Paddock Wood and Capel are at the most risk of flooding; it is a fact that with every new development and ever increasing autumn and winter rain fall flooding issues have worsened. It is also a fact that local doctor's surgeries and schools are full, the plan mentions building more surgeries but will they find doctors to fill them, the surgery in neighbouring East Peckham has been closed for a number of years. A new school was supposed to have opened in September 2018 but has never been started; the plan mentions more shops in Paddock Wood but five existing shops are to be demolished to make way for a Churchill Retirement home development in the main street. The National Planning Framework is clear that poorer quality farmland should be preferred, yet the land in question is shown in predictive maps produced by Natural England to be some of the most agriculturally rich land in the borough, yet the planners jumped on it because the current owners put it forward, obviously to line their own pockets, they did not consider the effect it would have on food production. This area is historically a farming community, it was the place where thousands of Londoners used to travel to work in the hop fields, for them it was a holiday as well and for many the only times they got to see the countryside, the hops have mainly gone but the area is still rich in orchards and arable farming. This area is also full of public footpaths, during the pandemic it has been a godsend for the health and wellbeing of local people, it was the countryside next door, easily accessible by foot when travel restrictions were introduced, if the local plan goes ahead this will be lost forever to ourselves our children and grandchildren.

The National Trust, the Woodland Trust and Countryfile are all engaging in planting thousands of new trees, TWBC want to rip out thousands of existing trees, orchards and hedgerows, the very heart of our local countryside, this will make flooding worse and decimate wild life.

The subject of overdevelopment in Kent and the South East has already aired in Parliament by Teresa May saying 'wrong homes are being put in the wrong place', Sir Roger Gale has also criticised the development of agricultural and green belt land in Kent.

The final issue is that if this goes ahead there will be no separation between Paddock Wood and Tonbridge, there will be no greenbelt in between, we will no longer be a rural area, we will be a giant urban sprawl, a giant concrete slab.

Question 1	
Respondent's Name and/or Organisation	Malcolm Dorrington
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS3 for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in the borough for virtually my whole life and been a resident of Paddock Wood for 35 years, and it seems like we have been having construction work going on here for at least half of that time, at present there are three large developments underway at the same time, all of which is being carried out on former agricultural land, On top of which TWBC want to build another 13,000 houses again on prime agricultural land, this figure is 50% of its target, TWBC are saying that the government is asking to much.

Across the whole borough Paddock Wood and Capel are at the most risk of flooding with the ever increasing autumn and winter rainfall flooding issues have worsened.

We do not have the infrastrucuter to cope with more housing, the schools are full, the doctors surgeries are full and with the advent of the forthcoming Churchill Retirement Home development on Commercial Road we are losing five existing shops with nowhere to build more.

The country side next door which became so important to the health and well being of residents during the pandemic will be gone forever and there will be no there will be no green space in between, we will no longer be a rural area, we will be a giant urban sprawl.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

There is a site off Medway Road in St. James where Trident Trailers used to be located. This building has been boarded up for over a decade and should be subject, in my view, to a compulsory purchase order. The area has several blocks of flats and this land is an eyesore. It could be developed into housing, parking or a number of other uses.

STR6 does not refer at all to the 20 mph speed limit set up in the town centre. While several areas were completed in a hurry in order to take advantage of a grant, mistakes have been made. In St. James, for example, the speed between Camden Road and Quarry Road changes to 30 mph immediately before a church hall where a nursery takes place and a primary school in a congested area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a

Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Sandra Dowse ([REDACTED])
Comment ID	PSLP_2136
Response Date	03/06/21 11:59
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.2
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Sandra Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4, please see Comment Numbers PSLP_2135 and PSLP_2136]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a

Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.

2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Richard Dowse ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Richard Dowse ([REDACTED])
Comment ID	PSLP_2152
Response Date	03/06/21 11:56
Consultation Point	Policy STR 6 Transport and Parking (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Richard Dowse ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Richard Dowse ([REDACTED])
Comment ID	PSLP_2154
Response Date	03/06/21 11:56
Consultation Point	Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Richard Dowse ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Richard Dowse ([REDACTED])
Comment ID	PSLP_2156
Response Date	03/06/21 11:56
Consultation Point	Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

- Policy STR 1 The Development Strategy
- Policy STR 2 Place Shaping and Design
- Policy STR 3 Brownfield Land
- Policy STR 5 Infrastructure and Connectivity
- Policy STR 6 Transport and Parking
- Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

- Policy STR 1 The Development Strategy
- Policy STR 2 Place Shaping and Design
- Policy STR 3 Brownfield Land
- Policy STR 5 Infrastructure and Connectivity
- Policy STR 6 Transport and Parking
- Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

- Policy STR 1 The Development Strategy
- Policy STR 2 Place Shaping and Design
- Policy STR 3 Brownfield Land
- Policy STR 5 Infrastructure and Connectivity
- Policy STR 6 Transport and Parking
- Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Dowse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy
Policy STR 2 Place Shaping and Design
Policy STR 3 Brownfield Land
Policy STR 5 Infrastructure and Connectivity
Policy STR 6 Transport and Parking
Policy STR 7 Climate Change

Policy STR 8 Conserving and Enhancing the Natural, Built, and Historic Environment

Policy PSTR/BE 1 The Strategy for Benenden parish

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Policy EN 1 Sustainable Design

[TWBC: this representation has been input against Policies STR1, STR 2, STR 3, STR 5, STR 6, STR 7, STR 8, PSTR/BE1, AL/BE 1, AL/BE 3, AL/BE 4 and EN 1, please see Comment Numbers PSLP_2147, PSLP_2149, PSLP_2150, PSLP_2151, PSLP_2152, PSLP_2153, PSLP_2154, PSLP_2155, PSLP_2156, PSLP_2129, PSLP_2133 and PSLP_2157]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019.

Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE’s current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland's. The AL/BE 3&4 fails

to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: "*The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.*" This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site "*includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.*" AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In

the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting

between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood all my life, and I have seen it grow from a village to a town over the years. I love my town, and the green fields surround us, and the smaller villages that are nearby.

However, with all of the current housing developments around us it has highlighted problems with traffic congestion exiting the town. With school traffic, it now takes upward of 45 minutes to travel the six miles between Paddock Wood and Tonbridge for work. When schools are not in session, the same journey takes around 15 minutes. Building all of the extra houses in Paddock Wood and East Capel will make this unmanageable.

5.153 states, "The growth around Paddock Wood will also provide a significant opportunity for investment into Paddock Wood town centre so it can respond to meeting the needs of the additional population it will serve." This was supposed to happen before the three housing developments that are currently under construction were started. We still do not have the second primary school or the improvements to the Badsell Road/Maidstone Road junction.

5.158 & 5.160 both mention the green belt. This is there to stop urban sprawl. If the land at East Capel is built on, this will effectively merge Paddock Wood and Five Oak Green into one urban development. 5.158, 5.163, 5.164 & 5.165 all mention flood plains and flooding. Land to the North of Paddock Wood, and the land at East Capel are effectively flood plains. If these are built on, even with flood mitigation in place, it will still cause a significant flood risk to the existing town of Paddock Wood, plus those settlements further downstream. 5.166 mentions the heritage of the town. We have very little heritage left due to planning being granted for various developments over the years, including the retirement complex that is due to be built soon. Each of those has destroyed historic buildings. We would like to retain what little we have left for future generations to enjoy

5.167 mentions the route of the old Hop Pickers railway line. I was under the impression that this was protected from development? 5.175 states, "All sites are within walking or cycling distance of Paddock Wood railway station." Does this consider bad weather? Traffic on the roads significantly increases when the weather is bad, as people do not want to walk or cycle. 5.174 The justification does not make any sense. TWBC has 20 yards. It seems that over 50% of the allocation is just going to two wards; Paddock Wood and Capel.

5.177 says that the growth here is justified. On what basis? Surely, there are other sites, such as Castle Hill, or brownfield sites around Tunbridge Wells.

5.180 says "...but deficiencies in service provision, mobility, and flooding infrastructure have been identified. Comprehensive strategic development offers an opportunity to address these deficiencies and inject the town centre with new vitality and viability." So why were the current crop of 1000 houses

allowed planning permission? We will struggle to support the residents of those, let alone the other thousands that will move in under this plan.

5.184 "Whilst it is not anticipated that the industrial units at Eldon Way, to the north west of the town Tunbridge Wells Borough Local Plan 141 Pre-Submission Local Plan Regulation 19 Consultationcentre, adjacent to the railway line, will become available over the plan period, if suitable alternative employment premises are identified, residential uses would be supported in principle in this location subject to other policies in the Plan." Eldon Way is built on marshy ground and currently sits on what is essentially a raft. Moving the businesses to elsewhere and trying to build houses on this would be extremely difficult.

5.186 "Growth could positively improve life and opportunities for those living in the town, or those wanting to remain but unable to find a house." The houses need to be affordable by the local population. The three current developments do not have anything in the price range that is affordable for most residents of Paddock Wood.5.185 point 5 "This should include consideration of how the natural and historic environment of the local area is reflected and respected." TWBC have stated repeatedly that we do not have any historic areas and have allowed areas we consider historic to be demolished. The allocation for the new sports hub on the land at East Capel is in the wrong place. It would create extra congestion at an already busy junction. This would be better sited on the land opposite Transfesa Road, and would allow access to the site from Maidstone Road, and also from the A228 via Eastlands Lane, therefor cutting congestion at the junction by the Hop Farm roundabout

The travel plan mentions putting the restricted traffic access back onto Commercial Road, to allow buses only on the lower part. When this scheme was last implemented, it caused problems. There was no clear-cut advice for disabled or elderly residents about access to the parking bays outside of the shops, and it pushed extra traffic out onto the surrounding housing estates (Warrington Road and Green Lane). The lower part of Commercial Road needs to stay as access for all vehicles, with traffic wardens to discourage pavement parking. The travel plan also mentions the railway bridge on Maidstone Road. It states that this is the town's only crossing point for the railway, and proposes to close it to all traffic except busses. This is a truly ridiculous idea. It would cut off the main artery of the town, and force extra traffic out on the Badsell Road/A228 Junction, and the A228/Maidstone Road junction at the Hop Farm.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

My name is Mrs F Duke of the above address. I am writing to you with regards to the proposed closure of the Railway Bridge to cars. I have lived at my current address for over 50 years and have always been happy to walk to the village whenever it was possible for me to do so. Unfortunately I am no longer able to walk very far and rely on Family, Friends and G4 to take me shopping and to appointments that I need to go to. My children live on the south side of Paddock Wood so use the bridge to come and collect me to take me to Waitrose shopping each week. At the moment it is a quick and easy journey to collect me or to get to me in an emergency, but if they are unable to use the bridge it will be a much longer and drawn out journey that will cause more pollution rather than less. It will also be at least a 10 minute drive on a good day to get to the Doctors rather than the current 3 minutes. Where is the sense in this decision? I already feel that I am cut off due to my needing help to get anywhere and this decision if it goes ahead will only make me more cut off.

Please re think this decision as in my opinion it will cause more pollution problems and traffic jams in the area than leaving it as it is.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Dear Local Planners,

Thank you for offering the opportunity to respond in writing:

[TWBC: copy of part of Local Plan website duplicated]

You have made the mechanism for responding so complex and structured that I cannot negotiate it: I am sure I am not alone. This will undoubtedly have reduced response - and the cynic in me asks if perhaps this is the outcome you had hoped for?

I am therefore sending you a topped and tailed printed copy of my previous response: nothing has changed.

The the spirit of democracy, I hope you will find a way to forward this with all the other responses.

[TWBC: posted response has been copied here for ease of reference]:

[TWBC: for images, maps and charts, see full representation attached].

The Right Homes In The Right Places? A response to TWBC's Draft Local Plan

February 2017: The government calls for 'the right homes in the right places'. [Fixing our broken housing market. A housing white paper]

July 2019: TWBC responds with the wrong homes in the wrong places.

[Tunbridge Wells Borough Draft Local Plan Regulation 18 Consultation Draft]

The Right Homes In The Right Places?

Contents:

- 1 Personal Statement
- 2 The Right Homes? National guidance not observed by TWBC. Why building new homes willy-nilly will not help solve the housing crisis. Why building the right type of homes is crucial. How affordable and social housing are desperately needed. Why the draft Local Plan fails to deliver. i) What TWBC is required to do ii) There's no housing shortage - there's a crisis iii) So where have all the homes gone? a) Some have several while others have none b) Buy to let reduces the market c) The top of the market sequestered iv) How should Tunbridge Wells respond? v) Affordability - what is it?
- 3 In the right places? Why building on Green Belt is counter-productive. How building on watershed above the flood-prone Medway endangers downstream communities. The danger to heritage assets. Why the draft Plan's transport strategy is unachievable. i) Green Belt ii) Flooding iii) Heritage assets iv) Transport
- 4 Climate change and the environment Even UK Parliament accepts climate crisis. New research supersedes TWBC plans.
- 5 Can TWBC deliver? Recent and not-so-recent projects suggest a lack of competence. Neighbouring councils not apprised. TWBC claims a firm evidence base not possible in the time. i) A history of failure ii) A failure to consult iii) Evidence base impossible in the time iv) Non-compliance with NPPF
- 6 Appendices
- 7 **Personal statement**

My beloved mum died just over a year ago: we buried her at All Saints' Tudeley. She loved All Saints' Tudeley, and served for some years as secretary of the PCC. She was passionate about the countryside, and was a lifelong member of CPRE. We thought it was so appropriate that from her grave one could see the wonderful view across the Medway valley:

It had given us great comfort to know that she was to be buried in sight of this beautiful rural view, one of our favourites in Kent. My wife wishes to be buried at Tudeley, and as a local, born and bred in Kent, it was my hope to be buried there too.

So you can imagine our distress when we saw the plans for the proposed Tudeley Village. It was devastating to think that there might be a new housing estate within a few yards of our graves. It is hard to see how this will 'respect the setting of... All Saints Church'.

I love to hear the skylarks singing from the field to the south of the church; how sad if they must go.

[TWBC: see image in full representation attached]. The ground has now settled enough for a headstone, and we had chosen the inscription from Psalm 121: 'I will lift up mine eyes unto the hills'. That inscription is looking bitterly ironic now - if it is to look like this:

[TWBC: see image in full representation attached].

That's my personal sadness.

But there are also innumerable reasoned arguments against this project. Here are some of them. **2. The Right Homes?**

1 i) What TWBC is required to do

"The Plan is required to meet the full assessed need within the borough for market and affordable housing of 678 per annum" [Draft Local Plan 2.31 page 27]

This sounds incontrovertible, doesn't it?

But it simply isn't true.

Here is the latest government advice on the subject:

"The National Planning Policy Framework is clear that, to enable effective planning of new homes, local planning authorities should start the plan-making process with a clear understanding of the number of new homes that they need in their area.

While this is an essential first step, it is not the only stage in the process. Local planning authorities then need to determine whether there are any environmental designations or other physical or policy constraints which prevent them from meeting this housing need.

These include, but are not limited to, Ancient Woodland, the Green Belt, Areas of Outstanding Natural Beauty and Sites of Special Scientific Interest.

They also need to engage with other authorities – through the duty to co-operate – to determine how any need that cannot be accommodated will be redistributed over a wider area. This means that the level of housing set out in a plan may be lower or higher than the local housing need."

[www.gov.uk/government/publications/fixing-our-broken-housing-market]

So it is clear that:

- . TWBC must balance housing need with environmental considerations
- . TWBC cannot determine local housing need until they have consulted other authorities

Neither of these conditions has been met. TWBC's draft Local Plan has not followed NPPF guidelines and is therefore unsound in general and in detail.

The following pages demonstrate how far TWBC's plan is from meeting these - and other - conditions. * *There is NO housing shortage! (But there IS a crisis.) The UK has 28.1 million residences (ONS 2014) and 27.6m households (ONS 2018) * The crisis is a shortage of AFFORDABLE HOUSING Average UK home costs eight times average earnings (Conservative Party Conference 2017) * Tunbridge Wells has a very poor record of provision of AFFORDABLE HOUSING 1,705 needed, just 580 provided in 2012-2017 (W Kent Housing & Homelessness Strategy) * There IS a problem of distribution 1.5m people own multiple homes (ONS) while others have none at all * There IS a problem of inequality UK inequality is second worst in Europe (OECD Social and Welfare Statistics 2017) * There IS a problem of money laundering and tax evasion UK property market is particularly attractive (draft Registration of Overseas Entities Bill 2018) * The Tunbridge Wells Borough Draft Local Plan will address NONE of these problems Green Belt provides executive housing, not affordable homes (CPRE Oct2019) * Instead the Tunbridge Wells Borough draft Local Plan will create a ghetto for the wealthy Average house prices: SE England = £383,422, Tudeley = £715,000 [Zoopla]*

1 i) There's no housing shortage - there's a crisis

We have all heard that we are short of millions of homes, and that we must build hundreds of thousands of new ones a year to address the situation. TWBC's draft Local Plan appears to agree:

"The rising household numbers, coupled with an ageing population, mean that the Council will continue to need to provide a mix of housing types and sizes, including specialist forms of housing. This presents a challenge for the new Local Plan, as it will need to facilitate the delivery of affordable housing... [Draft Local Plan, section, 2.30 p27]"

Whilst it is well-known to almost everyone, it's worth asking if this housing shortage does, in fact, exist?

It does not.

So says Ann Pettifor, Director of Policy Research in Macroeconomics, Fellow of the New Economics Foundation, and author of *The Case for the Green New Deal*. And the statistics back up this view:

"In 2014, there were 28 million dwellings in the UK, but only a predicted 27.7 million households in 2016. As the director of consulting at Oxford Economics, Ian Mulheirn, highlights, London's number of dwellings grew faster than the number of households between 2001 and 2015." [www.theguardian.com/commentisfree/2018/jan/27/building-homes-britain-housing-crisis]

The Office of National Statistics confirms it:

[TWBC: see image in full representation attached].

[<https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/families/bulletins/familiesandhouseholds/2018>
<https://www.ons.gov.uk/peoplepopulationandcommunity/housing/articles/ukperspectives2016housingandhomeownershipintheuk/> 2016-05-25]

1 ii) So where have all the homes gone?

And yet, there is certainly a housing crisis, characterised by increasing homelessness and a shortage of homes for first-time buyers, making it impossible for our young people to get onto the housing ladder.

According to Theresa May addressing the Conservative Party Conference in 2017, the average UK home cost eight times average earnings; mortgages are limited to 4.5 times salary.

Where does the problem lie? How can be it that we have more homes than families, and yet still not enough homes for everyone?

1 a) Some have several while others have none

First of all, some people have several houses, while others have none. "At the time of the 2011 Census, 1,570,228 usual residents in England and Wales (2.8 per cent of the usual resident population) reported having a second address in another local authority in England and Wales, that they used for 30 days or more each year". [www.ons.gov.uk/peoplepopulationandcommunity/housing/bulletins/2011censusnumberofpeoplewithsecondaddressesinlocalauthoritiesinenglandandwales/2012-10-22]

1 b) Buy to let reduces the market

Second, an increasing number of property owners own homes that they do not live in.

In recent years, buy-to-let has grown exponentially, removing homes from the sale market. Between 1999 and 2015, lenders advanced 1.7 million loans for buy-to-let houses, according to the Council of Mortgage Lenders. This trend was especially marked in the south east, as the chart shows.

[TWBC: see chart in full representation attached].

[Council of Mortgage Lenders cml.org.uk]

That's 1.7 million homes removed from the market - fully 6% of the total. Their owners are wealthy enough to own two or more houses, and they rent the spare ones out, at a profit, to people who cannot afford to buy a house.

So those who can afford to own more than one property make an income from the rent paid by people who can't afford to buy even one.

1 c) The top of the market sequestered

Thirdly, property at the top of the market is made unavailable through tax avoidance and money laundering.

The National Crime Agency suggests that "the scale of money laundering impacting the UK annually is in the hundreds of billions of pounds". [www.nationalcrimeagency.gov.uk/what-we-do/crime-threats/money-laundering-and-terrorist-financing]

“£180 million worth of property in the UK has been brought under criminal investigation as the suspected proceeds of corruption since 2004”, said our local MP and then Business Secretary Greg Clark, introducing the government’s plan for a Register of Overseas Entities. [www.gov.uk/government/news/world-first-register-to-crack-down-on-criminals-laundering-dirty-money-through-uk-property-market-to-go-live-by-early-2021]

In 2015 the London Mayor’s office reported that 36,342 London properties were held by offshore haven companies. Not even the Land Registry knows who owns these homes. [www.london.gov.uk/questions/2015/1366]

According to the Standard, “Land Registry figures also show that in just one deal signed off by Boris Johnson in 2011, at Riverlight Quay in the Nine Elms regeneration area, 15 per cent of the homes sold so far have been bought by foreign firms.” [www.standard.co.uk/news/london/revealed-how-foreign-buyers-have-bought-100bn-of-london-property-in-six-years-a3095936.html]

Almost one in ten (9.3 per cent) properties in the borough of Westminster were owned in 2016 by offshore companies, say Transparency International. [www.independent.co.uk/news/uk/crime/the-uk-is-a-global-corruption-centre-campaigners-claim-a7058126.html]

Is this a London thing, entirely irrelevant to Tunbridge Wells?

Not at all. The UK total is certainly much more. In 2015, Private Eye’s research linked more than 100,000 land title register entries to specific addresses around the country.

And it’s not just someone else’s problem: two-thirds of the purchases were made by companies registered in just four British tax havens - Jersey, Guernsey, the Isle of Man and the British Virgin Islands. [www.private-eye.co.uk/registry]

OECD figures show that UK incomes are already the most unequal in Europe, save only for Lithuania. The people at the bottom of the housing ladder have no hope whatever of buying a home, however many we build.

[TWBC: see chart in full representation attached].

Some people own many homes, whilst other people have none. It’s a problem not of housing shortage but of inequality, and as Pettifor says, you can’t build your way out of that.

We will not address the gap between rich and poor by allowing already wealthy landowners and property developers to submerge Tudeley under concrete.

iii) How should Tunbridge Wells respond?

It is obvious that these are structural inadequacies, quite out of the power of TWBC to affect, and more suitably addressed at national and international level.

But TWBC cannot just carry on building executive homes on Green Belt as if these issues did not exist.

It is crucial that TWBC plays its part. It must keep up to date with recent analysis, it must deal with the problems as best it can, and if necessary it must respond to government that the portrayed housing demand is inaccurate, and the imposed solution (just build more houses) unworkable. Sevenoaks’ response to government has been imaginative, though controversial.

Have TWBC taken any account of any of these meta-problems? Apparently not: it seems they have swallowed whole and unquestioningly the view that any new houses, built anywhere, are a good thing. TWBC’s response has been merely supine.

And yet the only people who will benefit from Tudeley New Town will be the property developers and the land-owner - whose own assets may already be offshored to Ireland for tax.

What kind of property will actually help to counter all these threats? An estate of Persimmon Homes, Dandara and Berkeley homes is not the solution. Nor is a luxury Poundbury development, commanding prices one third higher than those around it. What is the local situation in Tunbridge Wells, and how should TWBC respond?

Answering a 2017 Freedom of Information Request by Chris Gerry, TWBC stated that there were in 2017 just 20 rough sleepers in Tunbridge Wells. [www.whatdotheyknow.com/request/information_on_rough_sleepers_in_FOI_F06396]

And on March 31 2016, there were 994 households on the borough council’s housing register, of whom 430 needed one-bedroom accommodation, and 363 needed two-bedroom. [West Kent Housing and Homelessness Strategy]

TWBC bases its plan on national and local housing need, using Central Government's 2014 household projections data [TWBC Housing Supply and Trajectory Topic Paper, p1]. This data is five years out of date, and has been superseded by more recent - and much lower - projections.

Only on 12 September 2019, Housing Minister Esther McVey MP announced a crackdown on developments on the nation's Green Belt, saying:

"Once the Green Belt is built on it's often gone for good: that's why we are determined to protect it. The public have told us loud and clear they want it kept for future generations to enjoy". [Ministry of Housing, Communities & Local Government, 12 September 2019]

Perhaps TWBC's aim is to provide homes for social rent?

These would certainly be the only type of homes that would be immune to the inflationary effect of oligarchs, investment funds and offshore trusts. They would not contribute to house inflation. And they would actually begin to tackle TWBC's local housing need. And there is good evidence that council houses are increasingly being seen as the local solution.

After all there have been famous recent successes such as Norwich, winner of the 2019 RIBA Stirling Prize for its Goldsmith Street development, or the Bourne Estate in Holborn.

[TWBC: see image in full representation attached].

[Council housing: it's back, it's booming and this time it's beautiful - Oliver Wainwright, Guardian, 20 June 2019]

And mayor of London Sadiq Khan has negotiated a £1bn fund from central government to build 11,000 new council homes over the next four years, set explicitly at social rent levels.

[<https://governmentbusiness.co.uk/news/24102018/%C2%A31bn-plan-build-11000-new-london-council-homes>]

Perhaps TWBC has something similar in mind?

But the phrases 'council house' and 'council housing' are entirely absent from the draft local plan. Nor does the term 'housing association' appear. The words 'social housing' appear only as a definition on page 529. In fact, TWBC seems to have entirely overlooked a number of modern trends in housebuilding.

Whatever the reason, Tunbridge Wells BC is clearly not about to embark on on a major programme of council house building.

So the focus is firmly on affordability: in its West Kent Housing and Homelessness Strategy, TWBC speaks almost exclusively about affordable housing. v) Affordability - what is it?

[TWBC: see image in full representation attached].

[www.tunbridgewells.gov.uk/residents/housing/affordable-housing/ west-kent-joint-housing-and-homelessness-strategy]

The draft plan is similarly ambitious for affordable homes. This may be a panic reaction to such unfavourable headlines as 'The borough is falling woefully behind... in 2013-14 just 36 affordable homes were delivered...' [www.kentlive.news/news/kent-news/affordable-housing-hard-come-tunbridge-492345]

But no numbers are given. And what is meant by 'affordable'? The national planning policy definition is homes that cost 20% below the market rate or less. [NPPF Revised July 2018, Annex 2]

The average house price in Tudeley is £715,000. [www.zoopla.co.uk/house-prices/tudeley]

By the NPPF definition, then, an 'affordable' home would cost up to £572,000. **Who will buy an 'affordable' home in Tudeley?**

The average house price in Tudeley is £715,000. [www.zoopla.co.uk/house-prices/tudeley/]

By the NPPF definition, an 'affordable' home would cost £572,000.

According to Halifax, the average deposit put down by those buying their first home in the first half of 2018 was 16%. [http://static.halifax.co.uk/assets/pdf/mortgages/pdf/halifax-first-time%20buyer%20review-13-january-2017-housing-release.pdf]

16% of £572,000 is £91,500, leaving a balance of £481,000; using the standard loan-to-income ratio of four-and-a-half times income, we can see that this 'affordable' home will only be available to those with an income in excess of £107,000 pa.

With a £91,500 deposit, a Halifax tracker mortgage over 35 years for the balance of £481,000 [www.moneysavingexpert.com], will have monthly repayments of £1,928 for 26 months, and then £2,539 for 22 years and 10 months - or £30,468 per year.

The average salary for a registered nurse in the UK is £24,664 [www.payscale.com]. The national average salary for teachers is £30,097. [www.glassdoor.co.uk]

Perhaps the new homes will be priced lower than average house prices in Tudeley? That's not what has happened in Poundbury, on which the new development is being modelled.

Poundbury homes are now 27% more expensive than those in Dorchester, just walking distance away. [www.rightmove.co.uk/house-prices/Dorchester.html]

[TWBC: see image in full representation attached].

If that happened in Tudeley, the new homes would not cost £715,000, but a whopping £908,000.

In fairness, however, maybe we should compare the new housing not with Tudeley's luxurious homes, but with those in less-eligible Five Oak Green nearby. The average house price paid there is a mere £512,500 [www.zoopla.co.uk] - though applying the Poundbury/Dorchester factor would take that to £650,000.

These prices are still not affordable for our teachers and nurses.

And there won't be many of such houses, either. Building on Green Belt land turns out not to produce many affordable homes: located in beautiful rural settings, the houses tend to be overwhelmingly 'executive' (ie expensive) houses.

In fact, 'affordable' homes make up just 13% of those built on land that was previously Green Belt. [CPRE Report 'Space to Breathe' October 2019]

So of our 2,800 Tudeley homes, 2,436 (87%) will be at full price - something close to a million pounds. Of the whole estate of 2,800, just 364 will be at <80% of full price - probably not less than £650,000.

So 364 'affordable' homes at £650,000? This is still a long way from the 1,200+ needed as identified by TWBC's West Kent Housing & Homelessness Strategy.

If the objective is to generate affordable housing in our area, this seems an oddly inefficient way to go about it. **3. In The Right Places?**

1 i) Green Belt:

TWBC Development Strategy:

"Prevent urban sprawl by keeping land permanently open"

"The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open to maintain the character of the Green Belt. Once established, Green Belt boundaries should only be altered in exceptional circumstances and should be fully evidenced and justified, through the preparation or updating of a Local Plan." [TWBC draft Local Plan 4.48]

TWBC's own analysis of Green Belt of July 2017 identified five purposes:

- . Purpose 1: Check the unrestricted sprawl of large built-up areas;
 - . Purpose 2: Prevent neighbouring towns from merging;
 - . Purpose 3: Assist in safeguarding the countryside from encroachment;
 - . Purpose 4: Preserve the setting and special character of historic towns; and
 - . Purpose 5: Assist in urban regeneration by encouraging the recycling of derelict and other urban land
- [Tunbridge Wells Green Belt Study, July 2017, Stage Two, section 1.2]

The development proposed would appear to fail at least on the first four of these counts.

TWBC also admits that the Local Plan "does not designate other land as 'replacement' Green Belt to replace that to be removed". In other words, there will be a net loss of Green Belt; the plan offers to mitigate this, but does not specify how.

The Green Belt Study (July 2017) determined a Very High Level of Harm to the Green Belt Associated with Release of Broad Areas in an area covering Tudeley; but Tudeley is not examined individually. Presumably the Tudeley plan came in too late for inclusion - has proper consideration been given to these issues - or is this another sign that the plan has been rushed?

[TWBC: see map in full representation attached]. [Tunbridge Wells Green Belt Study, July 2017]

Comparison is made with other nearby boroughs. TWBC notes that “Sevenoaks District Council is not proposing to wholly meet [sic] its housing need”, and that “the constraints applying to Sevenoaks apply similarly to this borough”. [TW Draft Local Plan 4.8, page 34]

Government analysis of Green Belt, Areas of Outstanding Natural Beauty and Sites of Special Scientific Interest shows that Sevenoaks has 94% of such areas, leaving only 6% of other kinds, while TWBC has only 75%. In other words, 25% of TWBC’s area is NOT Green Belt, AONB or SSSI.

[www.gov.uk/government/uploads/system/uploads/attachment_data/file/644783/Housing_Need_Consultation_Data_Table.xlsx]

Clearly Sevenoaks can build very little if at all without infringing protected areas. But despite making the comparison, TWBC is entirely different, with 8,000 of its 33,000 hectares available for development.

But TWBC’s draft Local Plan takes no account of this. Instead it plans to build a large portion of its new homes entirely on the 22% of its land which is Green Belt. It’s hard to see this as anything but perverse.

[TWBC: see map in full representation attached]. [Map from Draft Local Plan Summary leaflet, pp4-5, my annotation]

TWBC’s strategic objective number 9 is “To establish garden settlements as a model for the future delivery of development in the borough.”

TWBC’s argument is that Tudeley is the only place they can put such a settlement.

But it is to be the model for others. If Tudeley is the only possible location, then where are these other future settlements to be?

And if there are other possible sites, why are these not being considered now?

TWBC admits that the convenience of dealing with just one landowner is a factor in its decision. The inspector may consider that mere convenience should not drive decision-making in the planning arena.

1 ii) Flooding:

The European Commission’s guidance on Flooding Best Practice - though long - is well worth reading. It’s pretty clear that no one at TWBC has done so. Here’s a flavour:

“human interference into the processes of nature should be reversed” “restore rivers’ natural flood zones” “strategy should cover the entire river basin area” “one should not pass on water management problems in one region to another” “shift from defensive action against hazards to management... [to] include rare events” “flood protection is never absolute, and may generate a false sense of security” [European Commission Environment Directorate: Best Practices on Flood Prevention, Protection and Mitigation: https://ec.europa.eu/environment/water/flood_risk/pdf/flooding_bestpractice.pdf]

A cursory look at the Environment Agency’s long term flood risk maps shows how seriously we must take this problem. It is not sufficient to kick it into the long grass to be dealt with at the masterplanning stage.

[<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>]

[TWBC: see image in full representation attached].

The topographical map shows how adding impermeable surfaces in the suggested area will create rainwater flows downhill directly into the Medway:

[TWBC: see map in full representation attached].

Further maps appended.

There must be huge concern for communities downstream, such as Maidstone or Yalding, so heavily hit in 2000 and again at Christmas 2013.

[TWBC: see image in full representation attached].

Recent plans to protect this part of the Medway basin have been dropped, leaving the area especially vulnerable. The cost of the 2013 flood to local business alone was estimated at £100m.

[www.bbc.co.uk/news/uk-england-kent-36973257]

Acknowledging the huge risks, TWBC’s plan offers: ‘flood storage/attenuation/mitigation areas to reduce the flood risk to particular existing residential areas in Five Oak Green and Paddock Wood’. [Policy STR/CA 1, page 156] The details of such mitigations are left to the masterplanning stage - when it will be too late to pull back if such mitigations turn out to be impractical or uncertain.

TWBC's mitigations are unspecified - dreamt up on the spur of the moment, perhaps? There are few strategies that will mitigate covering 600 acres of farmland in tarmac. As the EU says, the best mitigation is not to do anything so unsustainable in the first place.

iii) Heritage assets:

[Draft Local Plan, p158: "particularly respect the setting of heritage assets, especially All Saints Church... (see Policy EN 7: Heritage Assets)]

I'm not the only one who loves Tudeley Church: it is visited by many thousands of international tourists every year.

In just one six-week period between 20 August and 10 October, All Saints' visitors book reveals visitors from Denmark, Germany, France, Switzerland, Ireland, Australia, Georgia, Ecuador, South Africa, Belgium, Spain, Belarus, Netherlands, Canada, Japan, Gibraltar, Israel, Greece, Czech Republic, Italy, Norway, Egypt. [Analysis of All Saints' Tudeley Visitors' Book - appended]

The car park is routinely occupied by coaches of 30-50 seats or more. In the six months to 1 October 2019, the church calendar shows 84 visiting groups (defined as being 8 or more people). If the average group consisted of just 40 people, that is 2,000 visitors a year. [www.tudeley.org/dailycalendar.htm]

Of course, the vast majority of visitors come independently. Between April and October, 66 pages of the visitors' book were filled. Each page has 21 lines, giving at least another 1,000 visitors. [Visitors Book, All Saints' Tudeley]

How many did not bother to sign? Twenty minutes spent in the church reveal that only a tiny minority do so. The total number of visitors per year is certainly in excess of 10,000.

Many stay in the area, and even more use local restaurants and pubs: they generate significant income for the area. [ITN News, interview with Aline Koehler-Price, Poacher & Partridge, Tudeley, July 9, 2019]

All Saints' location is part of the attraction. A world-famous artwork in the middle of fields and woods is a significant draw. A world-famous artwork in the middle of a housing estate? Not so much.

According to Visit Kent, tourism's total value to the local economy has risen to £278 million a year. Is it really wise for Tunbridge Wells to jeopardise All Saints' contribution to that? [www.timeslocalnews.co.uk, 17th January 2019]

So far we have looked only at numbers. Artistically speaking, how important is it really? According to Simon Jenkins' 'England's Thousand Best Churches' it's "a superb work of 20th century church art"; Jenkins' book waxes lyrical, and devotes a whole page colour illustration to the east window.

[TWBC: see image in full representation attached].

The overall objective of the Local Plan is "to ensure the quality of life for all residents whether in the home, at school, at work, or at leisure in 2033 is better than today". [TWBC Consultation Statement Sep 2019]

And in section 4.24 the plan notes that 'the cultural offer of an area can benefit wellbeing... the borough has a cultural need'. [Draft Local Plan, section 4.24, p36] How can we calculate well-being? With mental health very much on today's agenda, what recourse do people find in Tudeley?

If the comments are anything to go by, visiting this country church in its quiet location has a transformative effect on many who come. Here are just a few comments from the visitors' book:

'A magical and spiritual place' 'There is so much peace here' 'Beautiful windows in a peaceful setting' 'Meditative and beautiful' 'Silence is golden' 'So tranquil'

How much of this peace will visitors find if there is a housing estate all around the plot?

Meantime, the church provides inspiration for further artistic endeavour. Poetry and music have been generated by its presence and value:

[TWBC: see images in full representation attached].

From Oxford University, one commentator speaks of the experience of sitting in "that still, small church, immersed in the colour and pain and hope of those windows shining through". [www.universitychurch.ox.ac.uk/sermons/chagall-tudeley]

Note the mention of stillness. Surround this gem with houses, and that is what will be lost.

The best way to 'respect the setting of... All Saints' Church' is NOT to build 2,800 houses around it. **iv)**

Transport:

Perhaps the most compelling argument against the Local Plan for Tudeley is in the matter of transport. It has been pointed out that the traffic from the new development would inevitably devolve on Tonbridge and its railway station. As neighbouring MP Tom Tugendhat points out, this station is already the busiest in Kent - and - other than London - one of the busiest in the south-east of England.

[TWBC: see image in full representation attached].

There is little or no prospect of a new railway station to serve the new community. Simply put, the transport links do not exist.

TWBC realise this - but they have a plan: "Technology in transport is moving rapidly, including in relation to autonomous vehicles... scope for new and innovative technology." [Draft Local Plan para 4.61]

Early drafts of the plan recommended autonomous vehicles connecting Paddock Wood, Tudeley and Tonbridge; these futuristic recommendations have been tactfully dropped in the published version. But TWBC has a record for embracing this innovative thinking, though so far only in theory. An imaginative and visionary proposal was put forward as far back as 2016 - though its proponent had been working on it for some four years prior to that.

[TWBC: see image in full representation attached].

'Self-driving cars could be introduced in Tunbridge Wells' [www.kentononline.co.uk/tunbridge-wells/news/kent-town-set-for-30m-92396]

Self-driving Vehicles for Tunbridge Wells. Joint Transportation Board Agenda and minutes, Monday, 15th February, 2016 [https://democracy.tunbridgewells.gov.uk/meetings/documents/s26066/15b%20Self-driving%20Vehicles%20for%20Tunbridge%20Wells%20-%20Appendix%20B%20-%20Background%20Papers.pdf]

As of 2019, this attractive and compelling £30million project still exists only on paper. It seems highly probable that the same fate would befall the Tudeley version. TWBC has a standard response to all insoluble problems: future technology will provide. These tech solutions are as-yet uninvented, and/or impractical. ---

In parenthesis, I don't expect many people in Tunbridge Wells have ever seen a podcar, or even a picture, so here is one. We look forward to seeing them in Tudeley. [www.podcars.com]

Alternatively, the 'Mister' model seems particularly well-suited to rural Kent:

[TWBC: see image in full representation attached].

There may also be scope for a development of this kind - perhaps sited mid-Medway? *

[TWBC: see image in full representation attached].

* After flooding, obviously. **5. Climate change and the environment**

TWBC Objective: 'to tackle climate change' [Draft Local Plan, p32, Vision and Objectives 2, Strategic Objectives #7: "tackle climate change and minimise the impact of development on communities..."]

On 1st May Parliament passed a motion declaring a climate emergency. Just when we need to treasure our green spaces more than ever, it's short-sighted indeed to be considering submerging Green Belt, AONB, and ancient woodland under yet more development.

However environmentally friendly a development may be, its carbon footprint will be huge: every cubic yard of concrete is responsible for emitting around 400 lbs of CO2. [World Business Council for Sustainable Development]

And the more we pave the Medway valley, the more flooding there will be - TWBC's 'mitigations' notwithstanding. The water has to go somewhere.

We now know that climate change is happening far faster than was previously thought [Scientific American August 19, 2019]; the UK Met Office now confirms that after 11,000 years of stable global temperatures, there has been a rapid heating in the last twenty years.

[TWBC: see chart in full representation attached].

The UK has a responsibility be at the forefront of change: as the first to industrialise, it has cumulatively contributed more carbon dioxide emissions than most other countries. [Myles Allen, Professor of Geosystem Science, University of Oxford]

The latest reports came in August 2019; the draft Local Plan does not - and could not - take account of them. In the light of new research this development is clearly far from sustainable. The Tudeley project represents the thinking of the past, when we thought we could just take from the planet and give nothing back. We know better now.

1 Can TWBC deliver?

2 i) A history of failure

It's cruel to mock the afflicted, but it must be admitted that TWBC's history on delivering on its projects is not an encouraging one. The election of councillors from outside the old TWBC clique seems to augur well for the future, but there is a long way to go.

Here is what locals call 'the cinema site'. It faces directly onto TWBC's council offices.

[TWBC: see image in full representation attached].

To the frustration of residents, it has presented this appearance for eighteen (yes - 18!) years.

Residents were incredulous that in eighteen years, TWBC was unable to manage this prime site in such a way that it was anything other than an eyesore. The previous structures were demolished in 2001. According to the local newspaper, diggers were finally spotted just last month. [TWBC: see image in full representation attached].

[www.timeslocalnews.co.uk/tunbridge-wells-news/ work-finally-gets-underway-on-the-derelict- cinema-site]

But note that the plan includes a mix of units, to include retail outlets.

Once upon a time, retail could be depended upon to provide an income from any town development; those days are gone. In Tunbridge Wells' main retail centre, Royal Victoria Place, a third of the shops stand empty. [www.kentlive.news/news/kent-news/ nearly-third-royal-victoria-places-1032472]

There is no plan to convert any retail premises to dwellings. (Why not?) Instead, TWBC plans for yet more unsustainable retail outlets. Yet again, TWBC is living in the past.

Next, it turned out that their flagship project for new council offices and theatre was deeply unpopular with residents. Voters turfed out long-established councillors in favour of a single- issue party, the Tunbridge Wells Alliance. After years of planning and expenditure in excess of £10million, the project - known around the borough as 'The Vanity Project' - was finally quashed on October 8 2019.

[TWBC: see image in full representation attached].

At once, TWBC created more problems with its grandiosely-named and similarly costly Public Realm plan, costing £1.3million and driving Monson Road retailers close to bankruptcy. The works started on July 7 2019 and were supposed to finish on September 1, but had not been completed by October 30.

[www.timeslocalnews.co.uk/tunbridge-wells-news/ ten-sets-of-roadworks-on-same-day-bring-the-town-to-a-standstill]

As late as 1 October, local journalist Mary Harris began a social media campaign to save local shops: "What Monson News has on the shelves is all they can afford now to put on there..."

[TWBC: see image in full representation attached].

The draft local plan has already cost over £574,000 and is on track to be 2 years and 2 months behind schedule. And yet it has been rushed through.

[@twellsense analysis, via Twitter]

TWBC's plan offers 'a vibrant and viable town centre'. [4. 5.9]

The Council has "ambitious plans to improve the offer of the town centre with both public and private sector investment, including the Calverley Square project providing a new modern theatre..."

Vibrant and viable? The Calverley Square project is cancelled. The local retail centre is on its last legs. The council's grandiose plans are bringing retailers to their knees.

Do these experiences encourage us to believe that TWBC is competent to manage the Tudeley project, in partnership with a landowner who gives his job title as 'farmer'?

Or do they indicate another expensive omnishambles?

1 ii) A failure to consult

TWBC's draft Local Plan looks to the future - and it's rosy:

"A new garden settlement will have been established at Tudeley Village, including homes, employment, and community facilities: this will continue to develop into the following years. It will be well connected to other settlements..." [Vision and Objectives, 3.2, 1, page 21]

Which 'other settlements' are these, and how will they be connected? The only meaningful one is nearby Tonbridge which has its own housing need. The Tudeley development is located absolutely on TWBC's border with Tonbridge and Malling. It is 1.5 miles from Tonbridge Railway Station, and the best part of 6 miles from Tunbridge Wells Station.

It is clear that all the infrastructure demand will be placed on Tonbridge.

The Local Plan developed for nearby Sevenoaks was recently rejected by inspector Karen Baker for not properly consulting neighbouring authorities, saying:

"My main concern relates to the lack of constructive engagement with neighbouring authorities to resolve the issue of unmet housing need and the absence of strategic cross boundary planning to examine how the identified needs could be accommodated. Indeed, the council did not formally ask neighbouring authorities if they were in a position to address its unmet housing need until just before the Local Plan was submitted for examination.

Any failure of the duty to co-operate cannot be rectified during the examination and therefore the only option is for a report recommending non-adoption to be issued or for the plan to be withdrawn."

So how have nearby TWBC handled their duty to co-operate? The headlines are not encouraging.

[TWBC: see image in full representation attached].

[www.kentonline.co.uk/tonbridge/news/council-blasts-plans-for-thousands-of-new-homes-214496]

Neighbouring Tonbridge and Malling Borough Council knew nothing of the Tudeley plan. When it was revealed in full, T&MBC went so far as to hold a special meeting to discuss it (2 Oct 2019), at which Tonbridge and Malling's mayor said: "I am so angry I can hardly speak".

In his response letter on behalf of T&MBC, Planning Policy Manager Ian Bailey wrote: "TMBC needs to be assured that it will be a key partner". [Response on behalf of Tonbridge and Malling Borough Council (T&MBC) 16.10.2019]

TWBC replied blandly that "The policies specifically state that we will work closely with neighbouring authorities on the infrastructure requirements of the Plan." The inspector may consider this to be a little late in the day, and wonder why it is limited only to infrastructure requirements?

As for residents, the full proposal for Tudeley was only publicly revealed in May 2019: [TWBC: see image in full representation attached].

[Excerpt from letter from Castle Planning of Berkhamsted, Herts, dated 31st July 2019, on behalf of The Save Capel Campaign Group and Capel Parish Council]

Other aspects of the plan were developed years earlier, and indeed, the plan itself was due for publication in January 2019. Was it delayed until May to work up some justification for the so- recently-included plan for Tudeley? Or were the plans kept quiet for as long as possible because TWBC knew they were flawed?

For consistency of approach, the Inspectorate must surely return the plan to TWBC for 'lack of constructive engagement'.

iii) Evidence base impossible in the time

Section 1.30 of the plan states that TWBC has "commissioned and completed a substantial and varied evidence base" [Draft Local Plan, 1.30, p19]

Yet the Tunbridge Wells Green Belt Study, Stage Two, prepared by LUC in July 2017, makes no mention of the Tudeley project - though other parcels are examined in detail. Was Tudeley not included in TWBC's plans at that time?

How can 'a substantial and varied' evidence base have been constructed between publication of the Green Belt Study in July 2017 and the first mention of the scheme in April 2018? Certainly very little time has been allowed to build up "a substantial and varied evidence base". How could such an evidence base be comprehensive without the views of residents? How could those views have been incorporated when the plan became public only in May 2019?

One might conclude that the various arguments in favour of the Tudeley project have been hastily put together to justify, ex post facto, its inclusion in the Draft Local Plan. This view is supported by the failure to consult with neighbouring boroughs: presumably TWBC simply didn't have time to comply with this aspect of the Local Plan system.

1 iv) Non-compliance with NPPF

Does the plan comply with the Local Plan system in other respects? According to the NPPF Consultation Draft p18, it is required to be:

"Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development."

- . There has been no objective assessment of the area's housing need
- . Plan was not agreed with neighbouring councils eg Tonbridge and Malling
- . Does not balance needs, so is not consistent with sustainable development*

* The term 'sustainable development' is long defined as "development that looks to balance different, and often competing, needs against an awareness of the environmental, social and economic limitations we face as a society" Sustainable Development Commission, 2011

"Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence"

- . Reasonable alternatives (eg brownfield) have not been considered
- . The attraction of dealing with just one-landowner has overridden other concerns
- . No proportionate evidence of alternatives: they have simply been ignored

"Effective - deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground"

- . Not based on cross-boundary working with T&MBC - and others?

"Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework."

- . Not consistent with recent ministerial pronouncements on Green Belt (See also notes on sustainable development above)

In conclusion, it is clear that TWBC's Strategy for Capel Parish fails on many counts. It has failed to follow proper NPPF procedures in consulting with neighbouring boroughs, with calculating its housing need, or taking account of environmental factors.

It dismisses the causes of the national housing crisis without consideration. It proposes a ghetto for the wealthy. It fails to address its own housing need - 1,000 families waiting for housing.

It proudly boasts its plans for affordable homes, conveniently overlooking the fact that they will be affordable only to those with incomes over £100,000.

It is out of date with respect to environmental challenges. It pays insufficient attention to the risks of flooding, promising unspecified mitigations. Without justification, it places a huge percentage of its planned housing entirely on the one fifth of its area which is designated Green Belt. It fails to focus on the 25% of its area which is NOT Green Belt, AONB or SSSI.

TWBC's plan would utterly ruin its biggest heritage asset - the quiet peace of a country churchyard, and a mecca for visitors from far and near, thereby jeopardising its own tourism income.

It offers futuristic but unspecified solutions to its transport problems, dumping them unannounced on its neighbouring borough, whose railway station is already the busiest in south-east England.

It claims to be concerned about climate change, but offers more unspecified and probably non-existent mitigations. It exaggerates the value of its evidence base, and seeks to divert attention from the rushed manner in which its plan for Tudeley has been developed.

It has a record of proposing unworkable plans, spending millions of pounds of ratepayers' money on them, and having them collapse. Residents opine that it is not competent to manage its own parking policy, let alone a major housebuilding project.

It is, in short, a failure.

TWBC's response to the government's call for 'the right homes in the right places' is to come up with the wrong homes in the wrong places.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation	Jenny and Andrew Dunkin
---------------------------------------	-------------------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

AL/RTW 6 land at 230 and 202 Upper Grosvenor Road

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The NPPF is clear that decisions regarding planning policies for new development should protect the environment and ensure safe good quality living conditions for future and existing residents and users.

Three previous applications to redevelop the existing single house and garden at 230 Upper Grosvenor Road, into multiple dwellings and car parking have previously been withdrawn or rejected on multiple grounds. Council Officers found that the plans for multiple dwellings submitted were too dense for the size of the plot, that there would be damage to existing mature trees, that creating road access to the plot would lead to an unacceptable rise in vehicular traffic in terms of noise and air pollution and that there would be an increased risk of road traffic accidents. None of these material facts has changed. Therefore, the adoption of this plot for intensive development is neither of effective nor justified. In respect of road safety it may be demonstrated through a trustworthy road traffic assessment conducted both at peak and off peak times, that pedestrian and road traffic levels have substantially increased since the last planning application was made in 2005, partly due to the changes in local infrastructure, for example the considerable expansion of the retail area at Dowding Way.

The adoption of this plot in to the Local Plan would represent a serious unjustified overdevelopment of the site. The size of the developable area is not large, especially if one artificially inflates the apparent buildable area by counting the existing single track driveway and planned road access in the calculations. The existing site is awkwardly shaped being hard against the railway boundary to one side and adjacent to multiple existing residential properties for the entirety of its length, which means that from the outset the potential of **'ensuring safe and healthy living conditions'** for all is compromised. In order to fit a large number of dwellings on to the small plot there is little option other than to create high rise looming blocks of flats, only single aspect in terms of fenestration, resulting in windowless rooms and internal shared areas, orientated so that the apartments would be either too hot and too bright, or too cold and too dark. There is little room for the provision of worthwhile safe outdoor playareas for children, particularly ones that could be surveilled from indoors, or be safely separated from residents' moving vehicles and road access. The awkward proposed access to the site for vehicles makes it uncertain as to whether a fire appliance, ladders and hoses would be able to reach all units in the development. This would be unsafe and therefore not legally compliant.

In terms of **'safeguarding and improving the environment'** adopting this small plot for the use of any type of large footprint, high density building with hardstanding for car parking will negatively impact the existing and potential future biodiversity of this small area of green space. The trees and garden serve as a respite for all species from noise, light and air pollution and a buffer zone between the busy road and the railway for a large number of existing residents from numbers 194 to 228 Upper Grosvenor Road. For the residents of 232-242 Upper Grosvenor Road their small and only outdoor green space would also be severely compromised. Developers' promises to respect the root drainage and the canopy spread of the many trees subject to Tree Protection Orders on this plot and to include new planting

and soft landscaping in their plans in order to sustain or enhance biodiversity are not protected in terms of policy wording and cannot be assured in terms of the future lifespan of any development.

The NPPF states that new development should **'limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.'** The existing single dwelling and garden currently have no negative impacts in this respect and could be described as **'intrinsically dark'**. A high density development with multiple flats using internal lighting, adjacent floodlit parking areas and the intensification of use of the existing, single track access driveway to become a streetlamp lit pedestrian foot and cycle path, will constitute a marked negative change, where light spill impacts both the residential amenity of a large number of people and the biodiversity of the area. This is unsound and not legally compliant with the NPPF. This is evidenced by the Senior Scientific Officer's observations in the Environmental Protection statement, submitted as part of a current Planning Application regarding this plot, dated 26 March 2021: *"I would recommend the attachment of a condition to ensure that neighbouring properties are not affected by light spill from the development."* It is impossible to foresee how any proposed design could light the pedestrian footpath, the vehicle access and the parking areas sufficiently to make them safe for users yet avoid light spill negatively impacting both a large number of existing residents and the environment. (Photograph attached to demonstrate proximity of the currently unlit driveway to existing homes.)

The NPPF also states that planning policies and decisions should protect **'the potential sensitivity of the site or the wider area to impacts that could arise from the development'**. The compact nature and awkward shape of this wedge of land mean that conceiving a design which limits or excludes overlooking is extremely challenging. Developers will rely on the screening provided by existing mature trees on the site. However, a current Planning Application pertaining to this site: 21/00460/OUT evidences how easy it is for developers to use computer generated images to convey an impression of a far taller, broader and generally more substantial tree canopy than is in fact the case and which omits to make visually clear that the majority of these trees are deciduous and so, bare for many months of the year. Therefore, the impact on both existing and future residents' rights to privacy and to avoiding both overlooking and overhearing in their homes cannot be assured by the adoption of this plot for dense development, making it both unsound and not legally compliant.

The NPPF states that **'it should be ensured that...safe and suitable access to the site can be achieved for all users'**. In respect of road safety and the safety of pedestrians this site is ill-suited to an intensification of use of the existing single track driveway to a pedestrian and cycle path between number 228 and numbers 232-242 Upper Grosvenor Road and the additional road access proposed by the demolition of 202, Upper Grosvenor Road.

Upper Grosvenor Road is a long residential road which serves as a main artery for the town. The road is used by large vehicles including lorries and is a bus route for both local buses and frequent rail replacement bus services. In many stretches the road is too narrow to allow two way traffic, not least because there is limited off street parking so many residents are obliged to park on the street. At all times but, especially at rush hour when there are families and children walking to school, drivers frequently mount the curb or abuse the dropped curb at the exact point proposed to be the entrance and exit for pedestrians and cyclists. Drivers frequently exceed the speed limit and there has been more than one fatality and several serious injuries to pedestrians and other road users in this immediate area. (Photograph attached to evidence traffic build-up and resulting congestion with vehicle mounting the curb at the access point for the proposed pedestrian and cycle path.)

The proposed road access to the dwellings to be created by the demolition of the house at number 202 is similarly dangerous and ill-conceived. The road access would join the main road at a bend and on an incline and, unless several residents' front garden and driveway hedges and shrubs are severely cut back, or even removed, it is the case that sight lines in both directions would be severely compromised and would be further impacted when rubbish bins are left out. In winter, low sun further reduces visibility.

At peak times residents of the new development will be forced to queue with idling engines waiting to turn left or right, on to or from Upper Grosvenor Road. This will exacerbate existing congestion and create fumes polluting the air. Queuing or moving traffic along and around the proposed access would severely compromise the environment in terms of noise, fumes and vibrations and the existing residential amenity of a large number of residents in the adjacent and surrounding homes. The close proximity of several private driveways, a bus stop and the junction of Silverdale Lane opposite the proposed access, also increases the risk of accidents in stretch of a road that has seen many accidents including regular damage to residents' parked cars.

For these reasons the adoption of this plot into the local plan would not be compliant with a duty to provide existing and future users with safe access and road safety.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The site is unsuitable for a dense development with multiple dwellings and their accompanying vehicles. There is no justification for cramming blocks of flats on to a small piece of land that is better and more effectively purposed as a green buffer zone offering sustainably built homes to key workers. In terms of modifications, it could be proposed to scrap the demolition of number 202 Upper Grosvenor Road and focus on removing number 230 and replacing it with two family homes. These homes would be accessed using the existing driveway. Residents of the new houses could have parking for a maximum of 4 vehicles not including occasional visitors, this would need to be legally protected to avoid overuse by vehicles. In this way the existing green space and biodiversity would be preserved or even enhanced, road safety would not be seriously negatively impacted and existing residents' amenities would be less compromised. Residents of the new homes would enjoy their privacy and safe garden space.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Adopting this plot of land into the Local Plan will only meet the criteria for sustainability if the scale of any development is mindful of the relevant environmental issues at every stage. Any intensification of plot use increasing from a single to multiple dwellings with accompanying motor vehicles does not represent a sustainable use of land even if steps are taken in an attempt to mitigate against some elements of potential negative impact. The use of power, energy and resources required to build an intense development and the application of largely non-sustainable, non-recyclable, non-eco-friendly

building materials like wise. Large areas of hardstanding and buildings on garden land at the expense of existing trees and wildlife habitat represents the antithesis of sustainability.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see Broadlands Planning supporting letter *[TWBC: Please see supporting documents]*, which sets out why the definition of the Limits to Built Development on Local Plan Inset Map 15; Hawkhurst is not sound, as denying the character and appearance of the continuous built development on the south west boundary of Hawkhurst and north of High Street, with the LBD defined too tightly to the historic core of the centre of Hawkhurst.

Tunbridge Wells Borough Regulation 19 Pre Submission Local Plan 2021. Representations in respect of the proposed Limits to Built Development north of High Street, Hawkhurst, as shown on Inset Map 15; Hawkhurst, and following the terms of Policy STR1; The Development Strategy, Policy STR/HA 1; The Strategy for Hawkhurst Parish, and Inset Map 15; Hawkhurst.

This submission is made on behalf of Mr and Mrs Dunlop and family. I attach a completed form for this representation.

The submission sets out my client's concerns at to the definition and extent of the Limits to Built Development on the south western edge of Hawkhurst and north of the High Street, as set out in;

1. Policy STR1; The Development Strategy;

To achieve, this the Local Plan: 2. Looks to focus new development within the Limits to Development of settlements, as defined on the Policies Map, where proposals accord with the other relevant policies of this Plan;..

2. Policy STR/HA 1; The Strategy for Hawkhurst parish;

'The development strategy for Hawkhurst parish is to: Set Limits to Built Development for Hawkhurst, as defined on the Policies Map (Inset Map 15) as a framework for new development over the plan period.'

3. The delineation of the Limits to Built Development shown on Inset Map 15; Hawkhurst, as drawn to the south west of Hawkhurst and, in particular north of High Street, which approach we consider over restrictive, not justified, and not sound.

We note the terms of the Review of the Limits to Built Development Addressed in the **Limits to Built Development Topic Paper-Regulation 18 Consultation August 2019**, in particular the following;

1.2 Limits to Built Development (LBDs) are used to differentiate between the built up areas of settlements and areas of countryside beyond. Generally, and subject to compliance with other policies in this Plan, there will be a presumption that the principle of proposed development such as infilling, redevelopment, and/or changes of use will be acceptable inside the LBD, while land and buildings outside the LBD will be considered as countryside where there is much stricter control over development.

II. Principles

2.10 The following principles are used to define LBDs:

- 1) LBDs are policy lines drawn around the 'main' built up area of a sustainable settlement – but they do not seek to define settlements as such.
- 2) Land inside the LBD will generally be substantially developed – including buildings, roads (excluding roads on the edge), etc.
- (3) The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds, outdoor sports, and leisure, unless surrounded by other development.
- 4) LBD boundaries should normally follow physical features, e.g. roads, walls, field boundaries, although there may be instances where it is appropriate to cut across property curtilages to ensure that local character and/or amenities are protected.
- 5) LBDs need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.
- 6) There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.

11 Criteria

'Criteria used to determine what should or should not be included within LBD Boundaries;

Any amendment to LBD's should:

(c) ..have no adverse effect on landscape character.

(e).. be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character, appearance or setting-does it relate more to the built environment or to the surrounding countryside.

(f)..not extend existing features or result in ribbon development

Exclude

1 *Isolated buildings or sporadic/dispersed development e.g individual or small groups of buildings separated from the main built up area of the settlement.*

1V. *large rear gardens or paddocks stretching well out from the built form of the settlement. Where there is an obvious variation in the rear line of garden curtilages along the edge of a settlement, then a striking line will be applied through these to form a uniform edge to the settlement*

We note that;

- . Along High Street the main built up area is linear in character and appearance and does incorporate both the higher density and historic area nearer the core at the central crossroads and the lower density residential areas of detached houses fronting High Street as it extends to the west.

- . The latter is clearly part of the historic development pattern of Hawkhurst as it has grown from its hamlet origins, as is typical of most settlements. It provides an essential range of higher and lower density homes of homes for the residents of Hawkhurst, and is a part of the 'main' and sustainable built area of Hawkhurst.
- . These buildings and their curtilages along this part of High Street are not isolated or dispersed, but materially contiguous.
- . The Proposed Limits to Built Development along High street, however, is drawn tightly to the higher density and historic 'consolidated Core' of Hawkhurst and some later residential estate development along Oakfield.
- . To the west of this LBD, however, is found a materially unbroken line of primary residential development, barring the buildings of Hawkhurst Golf Club, along to the Hawkhurst Hospital, including the more densely historically developed enclave of houses with more limited curtilages on the eastern and western entrances of Slip Mill Road to High Street, and a range of virtually uninterrupted detached houses in more extensive and landscaped grounds which are tightly defined on their northern edge by open cultivated farmland. This is part of the urban area of Hawkhurst.

My clients **object to the restricted extent of the defined Limits to Built Development on this western edge of Hawkhurst, as shown on Inset Map 15; Hawkhurst.**

We request that the Inspector for the Examination finds it appropriate to extend the Limits to Built Development north of High Street along to the Hawkhurst Hospital.

This request is justified and made on the following grounds;

- . This area is contiguous with the historic core of Hawkhurst, and cannot be characterised as fringe land on the 'edge' of the settlement of Hawkhurst.
- . This area is an integral part of the historic development of the settlement of Hawkhurst, and its developed confines.
- . This is not open 'countryside' land, but part of the built up area of Hawkhurst.
- . This land is substantially developed, including lower density homes in landscaped grounds.
- . The area is well defined and constrained by High Street as the main western entrance to Hawkhurst, and open agricultural fields to the north.
- . The substantial landscaping of the houses, both within their curtilages and along the High Street roadside, contributes materially to the attractive landscape character of this approach the Hawkhurst centre.
- . The incorporation of this area within the defined Limits to Development will not harm its landscaped character.

The inspector is requested to determine accordingly.

[TWBC: For full representation please see supporting documents]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see attached Broadlands Planning letter of full representation *[TWBC: Please see supporting documents]*, which sets out the case for an extension of the Proposed Limits to Built Development north of High Street, Hawkhurst, on Inset Map 15; Hawkhurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here. [PSLP_443, 457 Broadlands Planning for Dunlop SI-1 Representation.pdf](#)

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please see Broadlands Planning supporting letter *[TWBC: Please see supporting documents]*, which sets out why the definition of the Limits to Built Development on Local Plan Inset Map 15; Hawkhurst is not sound, as denying the character and appearance of the continuous built development on the south west boundary of Hawkhurst and north of High Street, with the LBD defined too tightly to the historic core of the centre of Hawkhurst.

Tunbridge Wells Borough Regulation 19 Pre Submission Local Plan 2021. Representations in respect of the proposed Limits to Built Development north of High Street, Hawkhurst, as shown on Inset Map 15; Hawkhurst, and following the terms of Policy STR1; The Development Strategy, Policy STR/HA 1; The Strategy for Hawkhurst Parish, and Inset Map 15; Hawkhurst.

This submission is made on behalf of Mr and Mrs Dunlop and family. I attach a completed form for this representation.

The submission sets out my client's concerns at to the definition and extent of the Limits to Built Development on the south western edge of Hawkhurst and north of the High Street, as set out in;

1. Policy STR1; The Development Strategy;

To achieve, this the Local Plan: 2. Looks to focus new development within the Limits to Development of settlements, as defined on the Policies Map, where proposals accord with the other relevant policies of this Plan;..

2. Policy STR/HA 1; The Strategy for Hawkhurst parish;

'The development strategy for Hawkhurst parish is to: Set Limits to Built Development for Hawkhurst, as defined on the Policies Map (Inset Map 15) as a framework for new development over the plan period.'

3. The delineation of the Limits to Built Development shown on Inset Map 15; Hawkhurst, as drawn to the south west of Hawkhurst and, in particular north of High Street, which approach we consider over restrictive, not justified, and not sound.

We note the terms of the Review of the Limits to Built Development Addressed in the **Limits to Built Development Topic Paper-Regulation 18 Consultation August 2019**, in particular the following;

1.2 Limits to Built Development (LBDs) are used to differentiate between the built up areas of settlements and areas of countryside beyond. Generally, and subject to compliance with other policies in this Plan, there will be a presumption that the principle of proposed development such as infilling, redevelopment, and/or changes of use will be acceptable inside the LBD, while land and buildings outside the LBD will be considered as countryside where there is much stricter control over development.

II. Principles

2.10 The following principles are used to define LBDs:

- 1) LBDs are policy lines drawn around the 'main' built up area of a sustainable settlement – but they do not seek to define settlements as such.*
- 2) Land inside the LBD will generally be substantially developed – including buildings, roads (excluding roads on the edge), etc.*
- (3) The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds, outdoor sports, and leisure, unless surrounded by other development.*
- 4) LBD boundaries should normally follow physical features, e.g. roads, walls, field boundaries, although there may be instances where it is appropriate to cut across property curtilages to ensure that local character and/or amenities are protected.*
- 5) LBDs need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.*
- 6) There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.*

11 Criteria

'Criteria used to determine what should or should not be included within LBD Boundaries;

Any amendment to LBD's should:

- (c) ..have no adverse effect on landscape character.*
- (e).. be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character, appearance or setting-does it relate more to the built environment or to the surrounding countryside.*
- (f)..not extend existing features or result in ribbon development*

Exclude

- 1 Isolated buildings or sporadic/dispersed development e.g individual or small groups of buildings separated from the main built up area of the settlement.*
- 1V. large rear gardens or paddocks stretching well out from the built form of the settlement. Where there is an obvious variation in the rear line of garden curtilages along the edge of a settlement, then a striking line will be applied through these to form a uniform edge to the settlement*

We note that;

- Along High Street the main built up area is linear in character and appearance and does incorporate both the higher density and historic area nearer the core at the central crossroads and the lower density residential areas of detached houses fronting High Street as it extends to the west.
- The latter is clearly part of the historic development pattern of Hawkhurst as it has grown from its hamlet origins, as is typical of most settlements. It provides an essential range of higher and lower density homes for the residents of Hawkhurst, and is a part of the 'main' and sustainable built area of Hawkhurst.
- These buildings and their curtilages along this part of High Street are not isolated or dispersed, but materially contiguous.
- The Proposed Limits to Built Development along High street, however, is drawn tightly to the higher density and historic 'consolidated Core' of Hawkhurst and some later residential estate development along Oakfield.
- To the west of this LBD, however, is found a materially unbroken line of primary residential development, barring the buildings of Hawkhurst Golf Club, along to the Hawkhurst Hospital, including the more densely historically developed enclave of houses with more limited curtilages on the eastern and western entrances of Slip Mill Road to High Street, and a range of virtually uninterrupted detached houses in more extensive and landscaped grounds which are tightly defined on their northern edge by open cultivated farmland. This is part of the urban area of Hawkhurst.

My clients **object to the restricted extent of the defined Limits to Built Development on this western edge of Hawkhurst, as shown on Inset Map 15; Hawkhurst.**

We **request that the Inspector for the Examination finds it appropriate to extend the Limits to Built Development north of High Street along to the Hawkhurst Hospital.**

This request is justified and made on the following grounds;

- This area is contiguous with the historic core of Hawkhurst, and cannot be characterised as fringe land on the 'edge' of the settlement of Hawkhurst.
- This area is an integral part of the historic development of the settlement of Hawkhurst, and its developed confines.
- This is not open 'countryside' land, but part of the built up area of Hawkhurst.
- This land is substantially developed, including lower density homes in landscaped grounds.
- The area is well defined and constrained by High Street as the main western entrance to Hawkhurst, and open agricultural fields to the north.
- The substantial landscaping of the houses, both within their curtilages and along the High Street roadside, contributes materially to the attractive landscape character of this approach the Hawkhurst centre.
- The incorporation of this area within the defined Limits to Development will not harm its landscaped character.

The inspector is requested to determine accordingly.

[TWBC: For full representation please see supporting documents]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see attached Broadlands Planning letter of full representation [TWBC: *Please see supporting documents*], which sets out the case for an extension of the Proposed Limits to Built Development north of High Street, Hawkhurst, on Inset Map 15; Hawkhurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here. [PSLP_443, 457 Broadlands Planning for Dunlop SI-1 Representation.pdf](#)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been asked to respond to the above draft Plan.

It is noted the Plan seeks to meet the assessed housing needs of your Borough within its own boundaries and this is welcomed given the existing system.

However, the Parish Council appreciates the housing figures imposed, in effect, by Central Government have the regrettable consequence of requiring a level of development that ignores much of your Borough is in the Green Belt or Area of Outstanding Natural Beauty.

It would urge your Council, like we have our own Borough to question Central Government policies in this respect including the changes signalled in the Queens Speech which look likely to increase the pressure for more development in the South East and erode still further local peoples' ability to influence local planning.

However, the purpose of this letter is to express our concern about the effect of the housing proposals on this Parish in terms of traffic impact especially from Paddock Wood.

We realise our Borough is especially concerned about traffic impact on Tonbridge Town but we wish to press the case for a proper assessment on the impact on East Malling.

The route through East Malling with its narrow High Street and Chapel Street; low level railway bridge; Width Restriction Order and Conservation Area status with many listed buildings is unsuitable to take more traffic. It would be detrimental to the quality of life of local residents and the Conservation area.

It is also relevant that outside our Parish the crossroads at Watlingbury are an Air Quality Management area and little can be done there to ease the peak time traffic congestion which occurs.

We fear traffic flows from Paddock Wood will increase the numbers using the north-south route from East Peckham via Watlingbury crossroads through East Malling to the A20 and nearby junction 4 of the M20 at Leybourne.

It is considered everything possible should be done to direct such traffic to the A228 which was some years ago re-classified as the north-south route with the dualling of the West Malling By-Pass and down to Junction 4 by a Leybourne By-Pass.

We would also urge improvements, long promised, take place at Colts Hill and we note there is a reference to a by-pass of Golden Green linking to the A228.

In conclusion, we would ask that with KCC who we realise advise your Council on highway issues the effect on East Malling is properly taken into account.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Further to the earlier submission by East Peckham Parish Council. East Peckham Parish Council now wishes to put on record our concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP) for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed.

It is the view of East Peckham Parish Council that this is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of East Peckham, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish Council notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than speculative.

East Peckham Parish Council also notes the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I do not believe the plan is sound. The volume of new homes planned for Paddock Wood (approx. 4000) is unreasonable and disproportionate. The town is already having substantial home building which is already a lot but is proportionate to the town and the environment. Building a further 4000 homes is not proportionate and will adversely effect the environment . Further valuable green belt land will be lost as a result of building the 4000 homes. I do not believe that this number of homes is at all justified for Paddock Wood and will destroy the surrounding nature. In addition, the infrastructure of the town cannot support it and plans to improve the infrastructure are, I believe, severely wanting. The development would also exacerbate the risk of flooding in the town. I believe planners have an obligation to maintain the character of Paddock Wood and not undermine the quality of life of existing residents. I don't believe these considerations have properly been taken into account.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe the only way to make the local plan sound in respect of the planned home building in Paddock Wood is to undertake building on available brown field sites – of which there are a number to the north of the town. Also the number of homes needs to be substantially reduced in order to not adversely effect the green belt, the infrastructure of the town and the quality of life of existing residents.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I do not believe the proposal to close Maidstone Road to traffic is sound. It will put residents to huge inconvenience as well as causing drivers to drive even further to get out of town on the north side. Proposals for restricted access on Commercial Road will likewise cause huge inconvenience to residents. I don't believe these plans are reasonable nor proportionate.

They have been developed to solve a problem that I don't believe exists.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The plans for Maidstone and Commercial road should not be approved.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)

Reference - Development Strategy Topic Paper (sections K 6.218 'inappropriate development in areas at risk of flooding should be avoided by directing development away from areas of highest risk (existing or future)' plus sections K 6.221 and K6.222).

TWBC acknowledge much of their borough is designated an Area of Outstanding Natural Beauty so has limited potential for development forcing by default only Paddock Wood, Tudeley and Capel as 'suitable'. Due to flood plain Zones 1 to 3 (both here and downstream - increased flood risk to existing properties East Peckham, Queen Street, Laddingford and Yalding) makes this proposal both not legally compliant and unsound. Based on these factors - why is TWBC not challenging their Whitehall housing allocation to be based on solely eligible land?

Reference Strategic Site Master Planning and Infrastructure Paper (section 4 Paddock Wood and others). The combined housing proposal for Paddock Wood, Tudeley, Capel plus Maidstone BC proposal for Belting is tantamount to a new town. Surely development on such a scale, which also impacts all nearby districts and the national transport links is a strategic decision for Whitehall? West Kent already has one new town earmarked for the Medway Valley at Burham. I recall David Cameron considered Yalding as a site for a garden city and quickly back tracked due to the flood risk - is the present proposal similar?

Reference - Strategic Site Master Planning and Infrastructure Paper - Paddock Wood Sections 4.58 - 4.63. This acknowledges water table is so high flood storage solutions are limited (s4.62), recent flooding of Warrington Road (s4.63) and that building is reliant on local flood defences (s4.59). Conclude even with this knowledge combined with rising sea levels TWBC are prepared to put both new and existing homeowners at even higher flood risk - hope they have deep pockets to cover negligence claims from insurance companies of flooded homeowners - not a good use for the public purse.

Reference - Strategic Site Master Planning and Infrastructure Paper - Paddock Wood transport infrastructure. Sections 4.14, 4.24, 4.42, 4.43, 4.44, 4.47, 4.50. Assumes all traffic will leave developments via existing and to be built eastern/south distributor road. Issue compounded by the closure to all buses of the Maidstone Road in central Paddock Wood.

This does not take into consideration vehicles from the new developments of Church Farm and Mascalls Farm developments which wish to travel north (most common - M20 links, Kings Hill plus towns of Maidstone and Medway). Their quickest route will be Queen Street then single track roads of Lucks Lane or Waggon Lane. These are already rat runs at peak times. Unsuitable for heavy use, potential accident blackspots and misery for residents whose homes are positioned very close to the roads (i.e. historic cottages with little or no front gardens). How is TWBC to prevent this?

Reference - Strategic Site Master Planning and Infrastructure Paper - Paddock Wood Section 4.64 - states known drainage issues but 'scale of the betterment required is to be determined as well as how the cost burden can be shared fairly'. Therefore conclude TWBC is aware of the flooding risk however is still prepared to grant developers permission to build without properly calculating costs to make good flood defences, transport infrastructure and sewage treatment systems. Does it reasonably think developers will pay for this unchallenged long after they have built their planned estates? In the words of Greg Clark and KCC - infrastructure first - why does TWBC think differently - competent management of the public purse deems the developers should pay not the taxpayer. If the then cost makes the development unviable then so be it. In the years to come does TWBC really want a similar situation to what happened in Gloucs/Somerset Levels. a couple of winters ago - all due to incompetent approval to build on flood plains.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Background - lived in local area for over 50 years and at present address for the last 10 (Level 3 flood plain zone). Have experienced neighbours having sewerage and water coming into homes - last time 2013 & before current development, ditches came close to flooding last winter (2020). Through a combination of rising sea levels and wetter winters this is going to become more common. Over the years I have witnessed too numerous floods in Yalding as well. Further building whether approved or proposed makes this situation more acute. During this time we have seen a steady increase in traffic levels on Lucks Lane and Queen Street especially around rush hour when traffic volume is constant (excessive for a single track road). Berkeley Homes have said they have never experienced the boggy conditions faced on their Paddock Wood site. Developers are having problems (even in the current housing boom) to sell the Paddock Wood homes with numbers sold to overseas investors. This proves lack of demand (due to flood plain location) and encourages overseas rental properties (not government policy).

Possible Solutions

TWBC challenge Whitehall's housing targets for the borough through the removal of unsuitable land from any equation used to arrive at the target number of homes. This would see the removal of areas of outstanding natural beauty and either flood plain land (or land whose development will affect existing settlements downstream).

Smaller scale developments for each village (for example 100 homes per village). Spreading development reduces the need for infrastructure improvement expenditure, offers homeowners better location choice (maybe with housing reintroducing a better social dynamic to villages), less impact to the countryside.

National policy for new town development - rather than TWBC's current via the back door. My proposal for consideration is Hastings/Bexhill due to the volume of low value land. This would be accompanied by the full dualling of the A21 and improvements to rail links. Such a proposal would not only regenerate this area but would bring employment opportunity throughout the A21 corridor - which would include TWBC area.

Should the development of Paddock Wood go ahead - traffic calming for Queen Street (with possible one way traffic from the railway bridge to the development) and the stopping up of Lucks Lane and Waggon Lane to all but local residents and cyclists

Flood defences for all existing properties in Tudeley, Capel, Five Oak Green, Paddock Wood, Queen Street, East Peckham, Laddingford and Yalding. Backed up by financial compensation underwritten jointly by the developers/TWBC in the event of flooding for the next 50 years.

If TWBC feel their local plan proposals are so beneficial why not put this to a public vote?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to express the voice of the public.

The proposals of TWBC do not represent the wishes of local residents.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

AONB

Any development on Site 413 will inevitably damage the AONB. The likely size of the building and the subsequent parking requirements would be absolutely catastrophic to one of the most beautiful and unspoilt areas in the village. The need for lighting for the car park and security of the building would absolutely destroy any semblance of the dark sky policy. It is difficult to believe that anyone could have chosen a more environmentally damaging site to build a Medical Centre.

The Secretary of State Inspector refused earlier appeals for development of this site stating great weight should be given to conserving the landscape and beauty of the AONB, which have the highest status of protection in relation to landscape and scenic beauty. The site is unchanged since this decision 7 years ago and seems to allow no reasonable argument to permit development on this site.

The location of this site would be very difficult to police effectively and would undoubtedly encourage anti-social behaviour, which is currently associated with the existing car parks in the village.

Building the Medical Centre would cause significant damage to existing wildlife, flora and fauna. This would inevitably damage the ecological mitigation area that surrounds Birchfield Grove particularly during the construction period and for the following years.

CHANGES TO LOCAL PLAN

Site 413, which included the Site considered in Policy AL/HA 5 in addition to a hundred houses, was taken out of the Local Plan in mid-December 2020 following a consultation process in which arguments against Site 413's inclusion were advanced including one from KCC Highways who strongly objected to major developments on the grounds that the Hawkhurst crossroads was already severely congested. The new Medical Centre was then allocated to the King George V Playing Fields (KGV) along with the proposed community centre as evidenced in the revised Local Plan at that time. Before 12th January, doctors from the two Hawkhurst practices were in talks with the owner of Fowler's Park (Site 413) and were unwilling to talk to Hawkhurst Parish Council, who was willing to engage with the doctors to find a solution at KGV. It was clear, however, that the doctors had a decided preference for the Site at Fowler's Park. Later in January the owner of Fowler's Park appears to have offered free 0.79 hectares of land within Site 413, big enough to accommodate the combined doctors' surgeries plus related services and parking for over fifty vehicles but without the houses. Clearly such a facility would still generate significant traffic flows and there would seem to be no good reason for its reinsertion to the Local Plan given the reasons for its removal in December 2020. The fact that the 0.79 hectares of land was offered free is not a planning issue and nor is the matter of any preference the doctors have for any given site. The issues of traffic congestion, attendant air pollution and other matters that argued against Site 413 still stand. **The Planning authority is put to proof that genuine and legitimate**

planning issues came to its attention in the second half of January to cause this rapid reversal in its position with regard to the siting of the medical centre.

In addition, at a meeting in early February involving members of both the TWBC planning department and Hawkhurst Parish Council as well as representatives of the doctors, the proposal that the 0.79-hectare Site should be ring-fenced to prevent access to housing development in other parts of Site 413 was considered and rejected. As Rydon holds the access option to Site 413, it would seem that the most obvious reason for the landowner's "generosity" is the increased likelihood of housing development in Site 413 at a later stage, once the Medical Centre becomes established, which is something that would bring significant financial benefits to both the landowner and Rydon.

TRAFFIC

As noted above, the location of the site would result in more cars passing through the crossroads, resulting in even more congestion and also resulting in harmful air pollution. Air pollution is especially important and for very obvious reasons every step should be taken to minimise the risks not to make a bad position worse.

Access to and from the site through Birchfield Grove is clearly unsuitable. The road was never designed to facilitate the increased volume of traffic and congestion would be inevitable especially when deliveries are being made to the residents.

Also the junction between Birchfield Grove and Rye Road has difficult sightlines and increased usage would bring significant risk of serious accidents. This matter was raised previously when a planning application for six dwellings opposite Birchfield Grove was denied on these grounds.

LOCAL PLAN NOT JUSTIFIED

The Policy AL/HA5 cannot be justified, as it has not taken into account any better alternative sites for the Medical Centre.

The King George V Playing Field.

The Hawkhurst Parish Council proposed to release some land so that the Medical Centre would be co-located with the new Community Centre at the KGV and therefore create a community hub. This was a matter that the doctors seemed not willing to discuss with the Parish Council (see Changes of Local Plan above). This land is partly developed so there could be shared parking and utilities and no damaging intrusion on the AONB. If the Medical Centre were sited here, at the more populous area of the village, this would help to ease any congestion on the crossroads and Rye Road.

Hawkhurst Community Hospital

As this is an already developed site, there would be an obvious synergy to having the Medical Centre and the Community Hospital in the same place, which would result in a greater benefit to the community as a whole than sum of their separate parts.

Hawkhurst Golf Club

The current planning application includes provision for a Medical Centre.

NOT CONSISTANT WITH NATIONAL POLICY

The National Planning Policy Framework states that consideration should be given to enhance the landscape and beauty of the AONB and development should be limited. Any development should help to improve the local environment. As stated previously, given the number of better alternatives there is no justification in this development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The only modification that can make the Local Plan sound in relation to Policy AL/HA5 would be to remove it from the proposed site and place the Medical Centre at one of the alternative sites listed above. We note that the Parish Council has, in this regard, expressed a preference for KGV.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Dear Sir, Madam,

I am a resident of Golden Green and have lived here for 8 years. I have lived in this local area with my wife and 2 children, now grown up, for the last 34 years, so I do know the area well.

I wish to express my opposition to STR/SS 1, the proposed new strategy for Paddock Wood and land east of Capel. I do not feel that the proposals are sound, appropriate, or reasonable to build so many new houses in this area for several reasons.

The community response to the Regulation 18 proposals for both STR/SS 1 and STR/SS 3 were very large, however TWBC seems to have ignored these objections.

The planned 4000+ houses for STR/SS 1 will bring a significant increase in traffic and demands upon the local infrastructure. Interestingly, the closest town main town to this proposed development is Tonbridge and not Tunbridge Wells as the development is on the outskirts to the TWBC area.

I understand that there is a proposal to close part of Maidstone Road (B2160), which runs north of Paddock Wood. This makes no sense, as there are in effect only 4 roads into Paddock Wood. To close the main north access, would divert all traffic via the A228 and then due east along the B2017. This is almost certainly to become a major bottleneck for commuter and emergency services, leading to increased pollution and significantly impacting residents. Additionally, Mascalls Academy school is at the junction of B2017 and the B2160, so to bring even more traffic closer to a major local school, I believe to be a poor and incorrect decision.

I do not believe that due consideration has been applied to the impact that such a large increase in housing will have on the local amenities, or of the huge increase to local traffic. Car use will inevitably increase dramatically and I believe that this could be better managed by siting the increased housing much closer to Tunbridge Wells. This would give greater opportunity to improve the public transport network in their own main town, rather than push all the new housing out to out-lying villages and effectively promote a significant increase in car usage.

I urge you to reject the proposals as they stand.

Best regards Graham Edwards

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Significantly reduce the proposed number of houses to be built and remove the proposed closure of the Maidstone Road

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Dear Sir, Madam,

I am a resident of Golden Green and have lived here for 8 years. I have lived in this local area with my wife and 2 children, now grown up, for the last 34 years, so I do know the area well.

I wish to express my opposition to STR/SS3, the proposed new strategy for Tudeley Village. I do not feel that the proposals are sound, appropriate, or reasonable to build so many new houses in this area for a number of reasons.

Firstly, the area that the housing is proposed to be sited, is partially flood plain. This is there for a reason and to cover it with housing and roads and driveways is only to push the flood problem on somewhere else. There does not seem to be a coherent and sensible approach to managing the flood issue. To defer this very important matter to further down the planning cycle is in my view naive and simply assumes that this matter can be dealt with satisfactorily at a later point.

TWBC are opting to create a significant number of houses right on the boundary of their area, nicely out of the way of their own larger towns, reap the benefits of the council tax and "dump" the infrastructure problems, such as schools, doctors surgery etc, onto Tonbridge and Malling. This seems cheeky at best ! In reality, it is a very poor decision to create a mess and walk away, such that it doesn't affect TWBC, other than reap the financial rewards. It seems that the proposal to go with a couple of very large housing developments, that satisfy TWBCs housing requirements, that does not include brown field sites as the preferred option, is to simply take the easiest route for Tunbridge wells planning and council.

The addition of so many houses will significantly increase the local traffic. The main arterial roads local to me, such as the A26 and the B2017 into Tonbridge, especially at rush hour are already at walking pace. This creates significant pollution, impacts the environment and increases costs to businesses and time to everyone impacted. The A26 from Hadlow to Tonbridge frequently tails back to Three Elm Lane already. With the proposed closure of Hartlake Road, this will be even worse. The proposed closure of this road seems to make no sense at all. This route is used frequently, especially by locals to get quicker and more efficient access to the A21 to head south or north. Without this, we will be forced to have to work our way through Tonbridge, which increases time and fuel costs and adds to even more congestion. The alternative routes for me to access Tunbridge Wells or anywhere South will either mean going west to pick up the A26 and work my way through the centre of Tonbridge or out east via East Peckham and then south using the A228, which is a much longer route. Both of these increase pollution, exacerbate already busy roads and increase time and costs.

The proposed development at Tudeley will bring with it 1,000s more cars as typically most families have a car, frequently 2 per household. TWBCs proposals to negate this with an additional railway station on the main line has been opposed by the railway authorities, as the busy east-west main line to Ashford / Folkstone already has 2 stations relatively close to each other, Tonbridge, and Paddock

Wood. An additional station in between would have a significant impact on timetables. When questioned at a public meeting, which I attended at Somerhill school, at the Regulation 18 stage, about the additional congestion from the extra vehicles that such a large number of houses would bring to an already overloaded infrastructure, their response was that they would promote cycling. This is simply ridiculous along even the main roads which are narrow, with no footpath and hilly.

I am astounded that TWBC do not want the increased population that this proposal will bring to be sited much closer or within their main town of Tunbridge Wells. This would create much greater opportunities for both using brown field sites and enhancing a local bus / public transport network.

Tunbridge wells response to the wide and significant objections to Regulation 18, seem to have been largely ignored, perhaps assuming that if they just keep ploughing on, it will all be accepted. This could not be further from the truth.

I do not believe that the impact of the proposed significant increase in housing has been fully considered and the detrimental affect on the neighbouring town – Tonbridge and out-lying villages such as Golden Green.

Representation from Local Councils, Members of Parliament and many, many residents, all opposed to the current plans have been seemingly ignored by TWBC. I urge you to reject the plans and significantly reduce the number of proposed housing for Tudeley.

Best regards

Graham Edwards

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

STR/PW 1 (6)

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

In the Council's Reg 18 draft Local Plan policy AL/PW 4 the site was proposed to be allocated for the provision of a community hub subject to requirements including.

- 1 An assessment has been undertaken which has clearly shown the area of playing field which would be lost as a result of the development is surplus to requirements; or the loss of playing fields resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location;

In the current draft policy this requirement has been removed, as have two other requirements for the site's development.

The submission draft policy is not now compliant with paragraphs 96 or 97 of the NPPF or Sport England's Playing Field Policy

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This policy should be amended to include the requirement for any development on this site to demonstrate that, an assessment has been undertaken which has clearly shown the area of playing field which would be lost as a result of the development is surplus to requirements; or the loss of playing fields resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location;

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The policy as drafted is clearly contrary to the Council's evidence base for playing pitches provided by its Playing Pitch Strategy 2018 in which it is stated in several sections that the site should be protected unless its loss is justified or mitigated in accordance with Sport England's policy.

The omission of this requirement now has not been justified. The current planning application relating to this development does not comply with Sport England's policy and the Local Plan policy appears to have been redrafted to enable its requirement and that of paragraphs 96 and 97 of the NPPF to be overlooked.

Future Notifications

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It is not clear in the policy as drafted that any playing field land proposed to be lost should be subject to an assessment having been undertaken which has clearly shown the area of playing field which would be lost as a result of the development is surplus to requirements; or the loss of playing fields resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location as required by paragraph 97 of the NPPF and Sport England's Playing Field Policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

An additional criterion requiring the above should be added to the policy. Sport England will object to any development proposals for the school's land that it considers does not comply with paragraph 97 of the NPPF or its Playing Field Policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation Jo Edwards, Sport England

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

OSSR 1

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The draft policy says that existing open space, sport and recreation facilities will be retained unless allocated in the plan for another purpose/ use/ development.

It is not clear in the wording of this policy if the requirement for these allocations to be assessed in accordance with paragraph 97 and Sport England's Playing Field Policy has already been addressed, or if this will be required in relation to any development proposals that come forward on them.

It is recognised that the individual allocation policies including for Culverden Stadium, Colebrook Rec, and King George V Playing Fields do identify these as a required criteria for development but, on other sites i.e. Cranbrook School and Memorial Park Recreation Ground, this is not an identified requirement for development.

Criteria 4. of the policy is not consistent with paragraph 97 of the NPPF or Sport England's Playing Field Policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. The policy should be amended to clarify that where sites in existing or last in use for sport or recreation use are allocated for another purpose / use / development that this is subject to

An assessment having been undertaken which has clearly shown the area of playing field which would be lost as a result of the development is surplus to requirements; or the loss of playing fields resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location.

2. Criteria 4 of the policy should be deleted

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

This policy is not consistent with paragraph 97 of the NPPF or Sport England's policy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_320, PSLP_321 and PSLP_322]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Georgia Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_320, PSLP_321 and PSLP_322]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Miss Georgia Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Miss Georgia Edwards [REDACTED]
Comment ID	PSLP_322
Response Date	17/05/21 11:38
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Georgia Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_320, PSLP_321 and PSLP_322]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Christopher Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Christopher Edwards [REDACTED]
Comment ID	PSLP_312
Response Date	18/05/21 11:38
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.4

Question 1	
Respondent's Name and/or Organisation	Christopher Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_312, PSLP_314 and PSLP_315]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Christopher Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Christopher Edwards [REDACTED]
Comment ID	PSLP_314
Response Date	18/05/21 11:38
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.4
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Christopher Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_312, PSLP_314 and PSLP_315]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
