5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Christopher Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Christopher Edwards [REDACTED]
Comment ID	PSLP_315
Response Date	18/05/21 11:38
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Christopher Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_312, PSLP_314 and PSLP_315]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**"

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Daniel Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Daniel Edwards [REDACTED]
Comment ID	PSLP_316
Response Date	15/05/21 11:38
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.4
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Daniel Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_316, PSLP_317 and PSLP_318]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Daniel Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Daniel Edwards [REDACTED]
Comment ID	PSLP_317
Response Date	15/05/21 11:38
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.4
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Daniel Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_316, PSLP_317 and PSLP_318]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Consultee	Mr Daniel Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Daniel Edwards [REDACTED]
Comment ID	PSLP_318
Response Date	15/05/21 11:38
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Daniel Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_316, PSLP_317 and PSLP_318]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Anne Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Anne Edwards [REDACTED]
Comment ID	PSLP_308
Response Date	15/05/21 11:38
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.6
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Anne Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_308, PSLP_310 and PSLP_311]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Consultee	Mrs Anne Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Anne Edwards [REDACTED]
Comment ID	PSLP_310
Response Date	15/05/21 11:38
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Anne Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_308, PSLP_310 and PSLP_311]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

- not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
 - . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Anne Edwards [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Anne Edwards [REDACTED]
Comment ID	PSLP_311
Response Date	15/05/21 11:38
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Anne Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: This representation has been put against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_308, PSLP_310 and PSLP_311]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468

Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1

Sustainability Appraisal SHELAA

Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside,

families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in

transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Alison Edwards
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Golden Green for the last 8 years and have lived in the local area for 35 years. I am a local Practice Nurse, working in a local GP surgery, as well as more recently delivering the COVID vaccination programme. This means that I have to frequently travel in all directions across the surrounding area.

I have brought up my 2 children, who attended local schools and we have all attended church and clubs locally for the last 35 years.

In this time, the traffic congestion has definitely increased and the ability to park has also become more difficult. Local GP practices are very busy and getting an appointment takes much longer than it used to and is now frequently several days. As a Practice Nurse in a GP practice myself, I can see that the whole service is under mounting pressure and will soon be overwhelmed.

The main issues with the STR/SS 1 plans and proposals are the significant impact it will have on the local area. The proposed new housing will eliminate 800 acres of greenbelt. This is an area where I love to walk regularly to keep healthy for my mental well-being. Covid restrictions and the lockdowns have taught us to value our countryside more and how important it is to each and everyone of us. As the population grows, it is more important than ever that people have space to roam the countryside locally without having to use their cars. They also need good quality locally produced food which needs agricultural land. The plan if adopted would destroy 100s of acres of agricultural land. We need more of this land not less to support our ever- growing population and for the country to be more self-sufficient, especially in light of Brexit.

The proposed development is also in a high flood risk area (Tudeley) and flood plain (East Capel) which seems madness when the river Medway now floods regularly during the winter months. This water desperately needs somewhere to go. The proposed covering of land will reduce the flood plain capacity and increase the flooding depth by concentrating it into a smaller area. This is then likely to significantly impact other villages further downstream.

At the moment (2021), approximately 2,500 people live in Capel. The proposed development will increase the population to around 13,500. The majority of families will have at least one car and frequently two or more, leading to a significant rise in air pollution and a dramatic affect on the local traffic, especially at rush hour. It seems such a disproportionate increase to add so many dwellings (500% rise), destroying a rural parish, right next to Tonbridge. Tunbridge Wells borough council will receive all the council tax for this, but Tonbridge will have to suffer the increased traffic, car parking, demand on GP Surgeries and schools. There will also be a significant and long-lasting impact of disruption and hassle to the local residents of all surrounding villages during the building phase of this huge number of houses.

I believe that there has been inadequate pursuit of using alternative sites, such as Castle Hill, Blantyre and brown field sites within the TWBC area, especially more local to Tunbridge wells town.

I strongly oppose this plan.

Alison Edwards

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I believe that there has been inadequate pursuit of using alternative sites, such as Castle Hill, Blantyre and brown field sites within the TWBC area, especially more local to Tunbridge wells town.

I strongly oppose this plan.

Alison Edwards

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe that further consideration could and should be made to the Castle Hill site as an alternative.

In addition, the number of houses should be significantly reduced

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Response Date	04/06/21 11:32
Consultation Point	Policy AL/PE 3 Land north of the A21, south and west of Hastings Road (View)
Status	Processed
Submission Type	Other
Version	0.6
Data inputter to enter their initials here	KH
Question 1	
Respondent's Name and/or Organisation	Ahmed Elgamel
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/PE 3 Land north of the A21, south and west of Hastings Road	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Aside of the flood risk and traffic hazard detailed in other representations, the issue with already stretched local civic resources also need to be taken into consideration.

Schools and doctors' surgeries are already at capacity with waiting lists (I speak from personal experience).

Also not having enough parking spaces outside the residential address means there will be struggle for the current residents to park outside their own property and struggle for any road users to use the road since it will turn into one lane system.

No provision has been considered or even suggested by TWBC to make allowances for this.

Without doubt, this proposal has been pushed through very quietly and, without adequate consultation with the local residents and I question the legality of the approval.

Now we are aware we shall ensure that all local residents likely to be impacted by the proposed development are canvassed, fully informed (as TWBC should have done) to ensure everyone is aware of the local impact this might have.

We were only informed by a local neighbour 3 weeks ago of this proposal and there were no plan posts or flyers anywhere around the field that suggests that there was a plan permission submitted for this proposal!!!

I suggest that, any proposed project/ development works now be put on hold until all residents are given adequate notification, full development detail and, the opportunity to seek representation.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Development of the land contained in the above map should be removed from the Local Plan for reasons stated above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

See above Section 6

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See above Section 6

See above Section 6

[TWBC: Comments from Section 6 and 5 stated below for ease of reference]

Section 6

Development of the land contained in the above map should be removed from the Local Plan for reasons stated above.

Section 5

Aside of the flood risk and traffic hazard detailed in other representations, the issue with already stretched local civic resources also need to be taken into consideration.

Schools and doctors' surgeries are already at capacity with waiting lists (I speak from personal experience).

Also not having enough parking spaces outside the residential address means there will be struggle for the current residents to park outside their own property and struggle for any road users to use the road since it will turn into one lane system.

No provision has been considered or even suggested by TWBC to make allowances for this.

Without doubt, this proposal has been pushed through very quietly and, without adequate consultation with the local residents and I question the legality of the approval.

Now we are aware we shall ensure that all local residents likely to be impacted by the proposed development are canvassed, fully informed (as TWBC should have done) to ensure everyone is aware of the local impact this might have.

We were only informed by a local neighbour 3 weeks ago of this proposal and there were no plan posts or flyers anywhere around the field that suggests that there was a plan permission submitted for this purposal!!!

I suggest that, any proposed project/ development works now be put on hold until all residents are given adequate notification, full development detail and, the opportunity to seek representation.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STRA/HA/1, HA2, HA3, HA4, CRS1 and CRS3 AL/SA 1, AL/SA 2	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

For all of these reasons, and in addition, these policies will not preserve and certainly will not enhance the AONB. This is contrary to NPPF para 172.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

1. Remove CRS3 (Cranbrook Turnden site)
2. Modify CRS1 to reflect reduction of overall housing numbers in Cranbrook as a result of the removal of CRS3 and/or CRS/1
3. Remove HA4 (Copthall allocation)
4. Modify HA1 to reflect reduction in overall housing numbers in Hawkhurst

5. Modify HA2 and HA3 to incorporate wording from existing Local Plan Policy AL/HA1 in order to retain and reinforce Area of Landscape Importance as part of any new proposal put forward for planning permission
6. Further modify HA1 to emphasise that development outside the Limits of Built Development will not be permitted save unless it is a recognised exception from elsewhere in the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
ED5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy ED5 of the Pre-Submission Local Plan (PSLP) is not "Sound" in terms of the revised NPPF for the following reasons:

1. It has not been positively prepared. It is a confused Policy that seeks to deal with employment, redundant buildings, historic buildings and Tourism in one policy in the Economic Development section of the plan. The overriding needs of the Borough are the provision of housing but Policy ED5 prioritises employment use over residential use with regard to disused rural buildings.

2. It is not justified or effective, the evidence argues in favour of prioritising residential use in redundant farm buildings not employment. The approach of promoting employment uses in these buildings is a historic one that predated the significant change in National Policy with regard to allowing employment buildings to go to residential use.

3. It is inconsistent with National Planning Policy contained in the revised NPPF and in the T&CP (General Permitted Development) (England) Order 2015. The criteria in the Policy with regard to giving preference to employment uses over residential use is not justifiable in planning terms, is contrary to National Planning Policy and could result in a negative impact on housing supply.

The NPPF seeks a 'significant boost to housing delivery' and contains lengthy and specific requirements to measure and meet housing targets. While it also acknowledges the importance of employment development it is clear that housing delivery is the most significant issue. As part of this provision Para 68 of the NPPF supports the development of windfall sites as does Para 4.15 of the Local Plan and Para 79 of the NPPF supports the re use of redundant buildings in the countryside for residential use.

Furthermore Government Policy in Schedule 2, Part 3 of the T&CP (General Permitted Development) (England) Order 2015 specifically allows redundant farm buildings to go to residential use without any requirement that they first be tested for an alternative economic use or be of historic merit. The overall purpose of the General Permitted Development Order is to fast track non contentious development and specifically with regard to redundant rural buildings was to provide much needed additional residential units. Furthermore the GPDO generally gives permitted development rights to changing business and storage uses to residential development.

Thus the thrust of National Planning Policy is to prioritise residential over employment uses and specifically the use of redundant rural buildings for residential use. In direct conflict Policy ED5 supports economic use for such buildings and only permits residential use in exceptional circumstances. Thus the approach in Policy ED5 is clearly at odds with the revised NPPF and other National policy with regard to this matter.

Policy ED5 provides very onerous tests with regard to demonstrating that rural buildings should first be considered for employment uses which includes the requirement for a lengthy 18 month marketing period which will be highly onerous to the applicant and goes against the principle of rapid decision making. Policies should only be adopted if they can be justified in terms of meeting specific planning objectives and safeguarding against specific planning harm. Policy STR1 identifies the need for a further 14 ha of employment land in the Borough up to 2038 based on the Economic Needs Study (ENS) that was carried out for Tunbridge Wells and Sevenoaks in 2016. Para 4.56 of the Plan and the adjoining Table 5 in the Plan show gross employment allocations of 26.5 ha with a net developable area of 25.8 ha. Thus there is a very healthy economic land supply situation.

The ENS only makes general references to rural employment provision and that converted rural buildings only make a small contribution to Employment land supply and new employment provision should be made adjoining existing major employment areas or close to good transport links. With regard to “**existing**” employment sites it says in Para 10.32 that these should be protected but **consistent with the provisions of the NPPF**. It suggests marketing evidence over 2 years should be provided to support a change of use and the the Council have misinterpreted this to apply it to rural buildings that are not existing employment sites. In its conclusions it does say that the council should react positively to applications for employment use in rural buildings but not to the extent that it should override other uses. The Economic Development Topic Paper puts forward a permissive approach to rural businesses but again there is no in depth need analysis and no justification to override other policies. Thus in terms of provision there is no justification to prioritise employment over residential use with regard to conversion of these buildings.

It is also noteworthy that Policy ED5 allows redundant farm buildings to go to Tourism use without having to meet any of the tests for residential use. This also demonstrates that there is not an overriding need for these buildings to be used for economic purposes and it is clearly wrong that Tourism should be given priority over housing provision under current National and Local Planning Policies. As stated above the need for residential units should have priority or at least be on par with the need for economic units and therefore there is no justification for the onerous tests in the Policy with regard to the residential use of rural buildings and therefore no material harm can be shown for giving residential use as a priority for the conversion of rural buildings. This would be in line with recent National Planning Policy.

There is also an objection to criteria (a) in Policy ED5 which is that buildings for conversion to residential use should have historic or architectural value. This again implies, contrary to National Policy that residential use is in some way onerous and needs special justification. Furthermore the criteria confuses the need to preserve buildings of historic or architectural merit which is covered by other policies in the Plan and making the best use of redundant buildings in rural areas. In para 6.472 in explanation of Policy ED5 it acknowledges the importance of rural buildings generally and states;-

“Many of the existing buildings are of historic or architectural interest...others are not of historic or architectural interest but rather of a more functional appearance, however they are still reflective of the rural character and landscape”.

Para 79(c) of the NPPF only refers to “the development would re-use redundant or disused buildings...” there is no requirement for them to be of historic or architectural interest. Criteria (a) is therefore unnecessary in planning terms, and contrary to National Planning Policy. So are criteria (b) and (d) which are not required under Class Q of Part 3 of Schedule 2 of the GPDO 2015. Criteria (c) would be covered by other legislation and is not necessary.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In order to meet these objections the following changes should be made:-

Proposed changes to Policy ED5:- First sentence of first paragraph should include reference to residential development and the second sentence should be deleted. Criteria 7 should refer to Gardens. Criteria (a) (b) (c) and (d) should be deleted. Delete Para 6.478 and Criteria 7 of Para 6.480, all references to criteria (a) (b) (c) and (d) and make any other amendments needed in the explanatory text to be consistent with the proposed policy changes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

This topic raises important issues with regard to the relationship between National and Local Policy considerations. I am a qualified planning consultant who ran a major Planning consultancy in London for many years and I feel I could assist the Hearing.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Paddock Wood for 40 years. It used to be a lovely town. The fields and countryside were stunning and it felt very rural; now the entire town is a mass of concrete. We do not need to double the size of the town with expensive houses, which locals cannot afford and would not buy anyway as they are, or will be, built on a flood plain, which is against National Policy. As there is no local market, the houses are being marketed in Hong Kong as Buy To Let.

As the town expands the flooding will only get worse as trees, hedges and drainage ditches are removed or concreted over. Traffic is terrible, particularly during rush hours and school drop-off/collection times. East Capel is a small village; it doesn't have the infrastructure to be able to take on anything like this size of over-development. It will ruin the current village.

It is not necessary to build on Green Belt Land and productive farmland. With Brexit it will be more important for us to be able to grow our own food, not just locally but on a national level.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- ☐ It is not effective
- ☐ It is not justified
- ☐ It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

With particular reference to the sections of the LCWIP page 48 Section 4.12:

Low Traffic Town: The Maidstone Road railway bridge provides the only vehicle access over the railway line in Paddock Wood. Consequently, it is the focus of a high proportion of vehicle trips in the town. The concept of a 'Low Traffic Town' would expand upon the Low Traffic Neighbourhood principle recommended in this report by removing vehicle access over the railway bridge except for bus services. This is likely to reduce the number of vehicle trips in the town which in turn would improve conditions for walking and cycling and create further opportunities for improving the town's streetscapes.

Commercial Road: this is the main high street in Paddock Wood and should be the key public space in the town. Instead, its layout is primarily focussed on accommodating through traffic, providing access to car parks, and enabling access for larger vehicles (>7.5t). Consequently, the resulting streetscape does not fulfil its potential as the key street in the town. To achieve more significant change, the current vehicle access and parking facilities would need to be reviewed and considered for removal to create a healthier, greener, and more attractive High Street. This approach would build upon KCC's previous EATF design arrangement which also removed through access for vehicles.

This is a reprehensible plan for anybody with any mobility issues. My daughter is 2 and has many health problems. She can neither walk nor cycle, nor is she likely to in future. My mother is 79 and cannot walk very far or stand for very long. We live on the same road with the railway bridge between us. In the event of a fall her lanyard would telephone me to come to her assistance but the bridge closure would mean a long detour for me to get to her. This detour would quadruple the mileage I, and many others living on the Hop Farm side of the bridge, would have to drive daily. The closure of a section of Commercial Road requiring disabled people to walk further to access shops would also seriously affect our family and would cause a lack of trade to the local businesses as people would avoid more inaccessible Paddock Wood to shop elsewhere more convenient and accessible.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- ☐ No, I do not wish to participate in examination hearing session(s)

I have lived in Paddock Wood for 40 years. It used to be a lovely town. The fields and countryside were stunning and it felt very rural; now the entire town is a mass of concrete. We do not need to double the size of the town with expensive houses, which locals cannot afford and would not buy anyway as they are, or will be, built on a flood plain, which is against National Policy. The current town population of Paddock Wood is about 8,400 people and with approximately 3,500 houses planned in Paddock Wood and another 2,800 in Tudeley 2 miles away, the local population is likely to be flooded with another 12,000 plus people. It is unsustainable. As the town expands the flooding will only get worse as trees, hedges and drainage ditches are removed or concreted over. Traffic is terrible, particularly during rush hours and school drop-off/collection times. East Capel and Tudeley are small villages; they don't have the infrastructure to be able to take on anything like this size of over-development. It will ruin the current villages and Paddock Wood. It is not necessary to build on Green Belt Land and productive farmland. With Brexit it will be more important for us to be able to grow our own food, not just locally but on a national level. We should use Brownfield sites rather than dumping 6,000 new houses in an area of outstanding natural beauty that has historically been productive farming land, and which protects Paddock Wood from flooding.

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Paddock Wood for 40 years. It used to be a lovely town. The fields and countryside were stunning and it felt very rural; now the entire town is a mass of concrete. We do not need to double the size of the town with expensive houses, which locals cannot afford and would not buy anyway as they are, or will be, built on a flood plain, which is against National Policy. As there is no local market, the houses are being marketed in Hong Kong as Buy To Let. As the town expands the flooding will only get worse as trees, hedges and drainage ditches are removed or concreted over. Traffic is terrible, particularly during rush hours and school drop-off/collection times. Tudeley is a small village; it doesn't have the infrastructure to be able to take on anything like this size of over-development. It will ruin the current village. It is not necessary to build on Green Belt Land and productive farmland. With Brexit it will be more important for us to be able to grow our own food, not just locally but on a national level.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

- . Yes, I wish to be notified of future stages of the Local Plan

I have lived with my wife in Paddock Wood for 7 years and I grew up in Matfield. It used to be a lovely town. The fields and countryside locally were very rural and green; now the entire town is a mass of concrete with more developments beginning every day. We do not need to double the size of the town with expensive houses, which locals cannot afford and would not buy anyway as they are, or will be, built on a flood plain, which is against National Policy.

As the town expands the current flooding will only get worse as trees, hedges and drainage ditches are removed or replaced by housing estates. Traffic is terrible, particularly during peak hours and school drop-off/collection times. East Capel is a small village; it doesn't have the schools, shops, doctors or road infrastructure to be able to take on anything like this size of over-development. It will ruin the current village. It is not necessary to build on Green Belt Land and productive farmland. With Brexit it will be more important for us to be able to grow our own food, not just locally but on a national level.

Respondent's Name and/or Organisation	Mr Duncan Ennis
---------------------------------------	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR6 2b) Low Traffic Town, possible closure of Paddock Wood Railway Bridge to vehicles as part of the Local Cycling & Walking Infrastructure Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

With particular reference to the sections of the LCWIP page 48 Section 4.12:

Low Traffic Town: The Maidstone Road railway bridge provides the only vehicle access over the railway line in Paddock Wood. Consequently, it is the focus of a high proportion of vehicle trips in the town. The concept of a 'Low Traffic Town' would expand upon the Low Traffic Neighbourhood principle recommended in this report by removing vehicle access over the railway bridge except for bus services. This is likely to reduce the number of vehicle trips in the town which in turn would improve conditions for walking and cycling and create further opportunities for improving the town's streetscapes.

Commercial Road: this is the main high street in Paddock Wood and should be the key public space in the town. Instead, its layout is primarily focussed on accommodating through traffic, providing access to car parks, and enabling access for larger vehicles (>7.5t). Consequently, the resulting streetscape does not fulfil its potential as the key street in the town. To achieve more significant change, the current vehicle access and parking facilities would need to be reviewed and considered for removal to create a healthier, greener, and more attractive High Street. This approach would build upon KCC's previous EATF design arrangement which also removed through access for vehicles.

This is a ridiculous plan for anybody with any mobility issues. My daughter is 2 and is disabled. She can neither walk nor cycle, nor is she likely to in future. My mother-in-law is 79 and cannot walk very far or stand for very long. We live on the same road with the railway bridge between us. In the event of a fall her lanyard would telephone my wife to come to her assistance but the bridge closure would mean a long detour for us to get to her. This detour would quadruple the mileage I, and many others living on the Hop Farm side of the bridge, would have to drive daily. The closure of a section of Commercial Road requiring disabled people to walk further to access shops would also seriously affect our family and would cause a lack of trade to the local businesses as people would avoid more inaccessible Paddock Wood to shop elsewhere more convenient and accessible.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	.	No, I do not wish to participate in examination hearing session(s)

To whom it may concern,

Myself and my wife moved with our young family to Capel in 1995. A quiet home in the countryside with farms, AONB and greenbelt land all around us.

We have lived in Redwood Park in the hamlet of Capel for 26 years. As the years have gone by the local lanes have become much busier but it has not spoilt the much needed hedgerows, wild life or the friendly village community surrounding us in Capel and Five Oak Green.

Our local area may be expected to accommodate building new homes as should everybody, but it should always be PROPORTIONATE to the local need. This proposed plan does not reflect the needs of the area and tramples over the wishes of the local population.

As sensible and concerned citizens we recognise there is a demand for housing in this country. However we do not accept the fact that it is necessary or correct to be building at the expense of green belt land, AONB and on flood risk areas.

The TWBC are claiming they have exhausted and fully investigated ALL brownfield sites but have yet to substantiate this.

This current plan is massively disproportionate to this areas need for extra housing and has been pushed through to this stage in spite of incredible opposition. This proposed Tudeley Housing Estate (beautifully named Tudeley Garden Village) along with the East Capel proposed development, is a convenient way of TWBC fulfilling an extremely high proportion of their allocation of unsubstantiated housing needs. Unfortunately this shows a total disregard for the residents of the surrounding areas. Tudeley itself, Five Oak Green, Capel, East Peckham, Paddock Wood and Tonbridge to name a few. The area of this Tudeley Housing Estate is green belt land, flood risk and AONB land. The infrastructure of the surrounding areas will not be able to cope with the population growth requiring, GP surgeries schools and roads.

Boris Johnson stated in the House of Commons that there would be no building on green belt land unless in exceptional circumstances. These exceptional circumstances in our opinion appear to be the Teachers Estate are willing to release these acres of beautiful countryside to TWBC which is the easiest and most convenient answer to the housing quota. Dealing with only one very accommodating landowner.

A few years ago TWBC turned down an application made by the Poacher public house in Hartlake Road Tudeley. They applied to build a small bed and breakfast business to compliment their current building. The planning office stated it would spoil the surrounding green belt area and would create

more of a problem in regard to flood risk. The reasons given are just some of the very reasons our community are stating now. To build thousands of unwanted homes in this area will increase the flood problems further down the line and TWBC should be held accountable over this proposed decimation of our countryside of which can never be replaced.

Regulation 19 consultation on the Pre-submission Local Plan

Tunbridge Well Borough Council

Thank you for consulting us on the pre-submission of Tunbridge Wells Local Plan. We have reviewed the submitted material and **find the submission sound**. However, we have the following advice to provide.

Flood risk

We welcome the inclusion of Flood Risk Policy EN 25. We have no objection in principle to the inclusion of the proposed developments around Paddock Wood (Policy STR/SS 1 - Paddock Wood Development Plan), however flood risk concerns have been highlighted in previous comments made back in February and may become more apparent at detailed Flood Risk Assessment (FRA) stage. Once at the detailed FRA stage, the development brief should identify that considerable flood mitigation may be required but also that they can meet and pass the exception test.

Biodiversity

Place Shaping and Design covers – ecology; flooding; water supply; wastewater.

We welcome the reference to Kent Design Guide, as there are dedicated sections around the riverine environment and sensitivities. We would suggest to ensure a clear definition of “adaptation measures against the future impacts of climate change” is included, as referenced within Place shaping chapter. The elements aimed sustainability are appropriate and valid for ensuring careful decisions are made, but it would be an enhancement to the objectives if the design principles also stated to foster better resilience for wildlife corridors and incorporation of green/blue corridors.

Infrastructure and Connectivity

We suggest to enhance wording for examples within “**Green:** network of natural and semi-natural features, including, for example, street trees, green roofs, parks, ponds, rivers, woodlands.” There are wet woodlands within the Tunbridge Wells district, suggest to add ‘all types of woodland’.

Policy EN 14: Green, Grey, and Blue Infrastructure

We welcome the emphasis on multi-benefit schemes and the cross-cutting values that can be achieved for people and wildlife through smart designs and choices.

We also welcome the statement highlighting ecology aspects and the need to build in resilience through wildlife networks and the specific recommendation to consult with multiple stakeholders to inform development outcomes, including regulators.

Conserving and Enhancing the Natural, Built and Historical Environment

It is recommended to add a reference to the opening paragraph about the Priority River Habitats that also widely occur in the district, and that conserving and enhancing those watercourses which are also identified as Priority River Habitats (map data available through data.gov.uk). The definition of a Priority River is that they consist of rivers and streams that exhibit a high degree of naturalness (i.e. show very little modification over time). The naturalness classification used to map priority river habitat is based on recent work to review the river SSSI series.

We suggest reference to green-blue infrastructure is included in Point 6. There is an emphasis on Green types, whereas Blue includes wetlands and rivers – and often the two coincide, we would want to emphasise that the two can be the same in some locations. Also, highlighting an emphasis on Blue infrastructure delivery can also create support for delivering enhancement contributions towards achieving Water Framework Directive Status Objectives, Actions and Mitigation Measures.

Policy EN 9: Biodiversity Net Gain

This is sound – with an inclusion of necessary demonstration through measurable means and specific use of the DEFRA Biodiversity metric system. No further comment.

Policy EN 8: Outdoor lighting and dark skies

This is welcomed and generally sound. We would recommend to adjust wording to reflect that not only should light spill not unacceptable impact wildlife, but this in particular means to avoid impactful light spill onto wildlife corridors as well as foraging behaviours.

Policy EN 24: Water Supply, Quality, and Conservation

The wording around Water Framework Directive is accurate and we welcome the strong support. However there is a missed opportunity to remind developers that opportunities may exist to deliver physical enhancements that are recognised to approach Reasons For Not Achieving Good in a given waterbody. These should be sought wherever feasible, i.e. benefits can be for both physical and of water quality, the two are linked to supporting WFD objectives and fostering resilience in wetland habitats.

Policy AL/RTW 18

This location contains or borders with ordinary watercourses that would benefit from establishing no-development buffer zones of at least 5m.

Policy AL/RTW 20

Note that woodland parcels to the east and north are mixed deciduous and wet woodland priority habitats, any landscape management scheme here ought to preserve and enhance the unique habitat qualities which occur here. There may be opportunity for boardwalk style pedestrian routes.

Environmental Net Gain

We would recommend the Local Plan ensures that Strategic policies point towards achieving Environmental Net Gain, and reflects a holistic Natural Capital objective.

Invasive Non-Native Species

There is limited specific mention or wider consideration and acknowledgment of the proven and potential negative impacts of invasive non-native species upon the landscape character, environmental resilience, prolonged costs of eradication once established in great numbers and waste management implications. It would be prudent to consider how developers, land sales and purchases might automatically require targeted surveys for such undesirable species, and intend to produce containment and management plans. Furthermore, they can support the existing co-ordinated action to manage catchment wide control by working in partnership with the external Catchment groups, by submitting records and reporting treatment programmes.

Groundwater resources

Section 6.272 refers to South East Water's Water Resources Management Plan (2015-2040). This is now superseded by their Water resources management plan 2019 (2020-2080).

Section 6.273 may need minor updating soon as a revision to the Environment Agency's 2013 water stress classification has just been consulted upon. There will however be no change to the "serious water stress" status of the region - it will only be expanded. We welcome the requirement in section 6.274 and Policy EN24 for residential developments to meet the optional higher standard of water efficiency provided for in the Building Regulations. We also welcome the encouragement in Policy EN24 to consider rainwater harvesting and greywater recycling opportunities.

We would additionally suggest a requirement for water efficiency in non-domestic developments such that at least larger developments meet a BREEAM standard of Very Good or Excellent. Some councils have required Outstanding.

Groundwater quality

We welcome the inclusion of the section on Water Supply, Quality and Conservation, which includes Policy EN 24. We also note and welcome Policy EN 28 on Land Contamination, but have the following comments.

- Closed landfill sites represent development risks that we believe should be addressed directly, either in Policy EN 28 or the subject of its own policy.
- Any planning application on or in the immediate vicinity of an historic landfill must be accompanied by a full technical analysis of the site and its associated risks in accordance with Environmental Health and Environment Agency requirements for permitted sites.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
	Policy STR 5 Infrastructure and Connectivity
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Infrastructure and Connectivity

We suggest to enhance wording for examples within “**Green:** network of natural and semi-natural features, including, for example, street trees, green roofs, parks, ponds, rivers, woodlands.” There are wet woodlands within the Tunbridge Wells district, suggest to add ‘all types of woodland’.

[TWBC: For general response please see Comment Number PSLP_462]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you would like to attach a file in support of your comments, please upload it here. [PSLP_462, 467, 471, 473-480, 484, 486 Environment Agency SI-1 Representation.pdf](#)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Conserving and Enhancing the Natural, Built and Historical Environment

It is recommended to add a reference to the opening paragraph about the Priority River Habitats that also widely occur in the district, and that conserving and enhancing those watercourses which are also identified as Priority River Habitats (map data available through data.gov.uk). The definition of a Priority River is that they consist of rivers and streams that exhibit a high degree of naturalness (i.e. show very little modification over time). The naturalness classification used to map priority river habitat is based on recent work to review the river SSSI series.

We suggest reference to green-blue infrastructure is included in Point 6. There is an emphasis on Green types, whereas Blue includes wetlands and rivers – and often the two coincide, we would want to emphasise that the two can be the same in some locations. Also, highlighting an emphasis on Blue infrastructure delivery can also create support for delivering enhancement contributions towards achieving Water Framework Directive Status Objectives, Actions and Mitigation Measures.

[TWBC: For general response please see Comment Number PSLP_462]

Environmental Net Gain

We would recommend the Local Plan ensures that Strategic policies point towards achieving Environmental Net Gain, and reflects a holistic Natural Capital objective.

Invasive Non-Native Species

There is limited specific mention or wider consideration and acknowledgment of the proven and potential negative impacts of invasive non-native species upon the landscape character, environmental resilience, prolonged costs of eradication once established in great numbers and waste management implications. It would be prudent to consider how developers, land sales and purchases might automatically require targeted surveys for such undesirable species, and intend to produce containment and management plans. Furthermore, they can support the existing co-ordinated action to manage catchment wide control by working in partnership with the external Catchment groups, by submitting records and reporting treatment programmes.

Policy EN 24: Water Supply, Quality, and Conservation

The wording around Water Framework Directive is accurate and we welcome the strong support. However there is a missed opportunity to remind developers that opportunities may exist to deliver physical enhancements that are recognised to approach Reasons For Not Achieving Good in a given waterbody. These should be sought wherever feasible, i.e. benefits can be for both physical and of water quality, the two are linked to supporting WFD objectives and fostering resilience in wetland habitats.

Groundwater resources

Section 6.272 refers to South East Water's Water Resources Management Plan (2015-2040). This is now superseded by their Water resources management plan 2019 (2020-2080).

Section 6.273 may need minor updating soon as a revision to the Environment Agency's 2013 water stress classification has just been consulted upon. There will however be no change to the "serious water stress" status of the region - it will only be expanded.

We welcome the requirement in section 6.274 and Policy EN24 for residential developments to meet the optional higher standard of water efficiency provided for in the Building Regulations. We also welcome the encouragement in Policy EN24 to consider rainwater harvesting and greywater recycling opportunities.

We would additionally suggest a requirement for water efficiency in non-domestic developments such that at least larger developments meet a BREEAM standard of Very Good or Excellent. Some councils have required Outstanding.

[TWBC: For general response please see Comment Number PSLP_462]

Flood risk

We welcome the inclusion of Flood Risk Policy EN 25. We have no objection in principle to the inclusion of the proposed developments around Paddock Wood (Policy STR/SS 1 - Paddock Wood Development Plan), however flood risk concerns have been highlighted in previous comments made back in February and may become more apparent at detailed Flood Risk Assessment (FRA) stage. Once at the detailed FRA stage, the development brief should identify that considerable flood mitigation may be required but also that they can meet and pass the exception test.

[TWBC: For general response please see Comment Number PSLP_462]

To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
	Policy EN 28 Land Contamination
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Groundwater quality

We welcome the inclusion of the section on Water Supply, Quality and Conservation, which includes Policy EN 24. We also note and welcome Policy EN 28 on Land Contamination, but have the following comments.

- Closed landfill sites represent development risks that we believe should be addressed directly, either in Policy EN 28 or the subject of its own policy.
- Any planning application on or in the immediate vicinity of an historic landfill must be accompanied by a full technical analysis of the site and its associated risks in accordance with Environmental Health and Environment Agency requirements for permitted sites.

[TWBC: For general response please see Comment Number PSLP_462]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you would like to attach a file in support of your comments, please upload it here. [PSLP_462, 467, 471, 473-480, 484, 486 Environment Agency SI-1 Representation.pdf](#)

Respondent's Name and/or Organisation	Esquire Developments
Question 2	

Agent's Name and Organisation (if applicable) Esquire Developments

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

APPENDIX 10 - Current and Future Sustainability Trends in relation to Carbon Emissions, Behavioural Trends and Technological Advances .

APPENDIX 11 - Pre-Application Responses

APPENDIX 12 - Response from Conservation and Design Officer to application Ref 20/03816/FULL

1.0 INTRODUCTION

1.1 These representations are submitted by Esquire Developments Ltd in response to Tunbridge Wells Borough Council's (TWBC) Regulation 19 Pre-Submission Local Plan Consultation December.

1.2 Esquire Developments has a number of land interests across the Borough, and specifically land at Wilsley Farm, Wilsley Green, Cranbrook. The site is being promoted for up to 20 dwellings on 0.96ha of land (**Appendix 1**).

1.3 The Regulation 18 Local Plan identified the site as a suitable allocation for up to 20 residential dwellings under Policy AL/CR1 (**Appendix 2**). The Pre-Submission Local Plan has removed the site as a potential allocation.

1.4 Notwithstanding the emerging nature of the Local Plan, Esquire Developments undertook positive preapplication engagement with TWBC throughout 2020. That pre-application advice recognised the sites emerging allocation, but based on the present lack of a 5-year supply of land for housing, supported the principle of development on the site and an early planning application submission.

1.5 In December 2020, a full application (ref 20/03816/FULL) was submitted to the Council for 20 dwellings (**Appendix 3 for DAS**). In January 2021, the Pre-Submission Local Plan was released - identifying the site's removal as an emerging allocation. In April 2021, the application was subsequently refused by delegated authority (**Appendix 4**) for 7No. reasons for refusal (**Appendix 5**). The site is acknowledged and not being major development in the AONB.

1.6 The site was assessed in the 2019 TWBC SHELAA (Site Ref 125) and was confirmed as being suitable for development (**Appendix 6**). However, the 2021 SHELAA now contradicts that position suggesting the site is now unsuitable (**Appendix 7**). The site was also subject to assessment in the Sustainability Appraisals as 'Reasonable Alternative Site Ref 125 ' (**Appendix 8**).

1.7 These representations assess the spatial strategy with emphasis on the support (or lack of) for SMEs and meeting the requirements of Paragraph 68 of the NPPF. They also assess the suitability of the site selection process for Cranbrook.

1.8 We have significant concerns with the Pre-Submission consultation document. It does not support the growth of SMEs, has not identified sufficient land to meet paragraph 68 of the NPPF and there is over reliance on the delivery of dwellings from the two strategic locations. The Council is also flawed in its site selection process in respect of AONB development.

1.9 These representations draw upon the representations prepared by the Kent SME Developers Network and contained within **Appendix 9**. We wholly support the content of those representations.

i) About Esquire Developments

1.10 Esquire Developments is a multi award winning SME Housebuilder based in Longfield, Kent. Founded in 2011, we have quickly established ourselves through the delivery of high quality bespoke residential developments in Kent. We were most recently awarded Gold for Best Small House Builder in the Country 2020 by WhatHouse.

1.11 Esquire Developments has adopted a tailored approach to its developments adapting designs and layouts to reflect local characteristics and respect local community needs. This is done through our expert local knowledge and understanding of a place, but also positively engaging with the local community allowing for a focussed approach to planning, design and greater understanding of the needs of the local community.

1.12 Each development is bespoke and there are no fixed house types. This allows us to be totally flexible when it comes to choosing the right mix and design of each home. This is reflected in the high-quality architecture and use of materials, but also quality of open spaces and the environment in which each development sits within.

1.13 Esquire Developments also delivers commercial buildings such as office space and children's nurseries to complement developments where local demand identifies such a need. This means our developments can meet a local community's needs in a number of ways, whether that is for people to live, work and play.

1.14 As an SME Housebuilder, Esquire Developments can expediently deliver a high-quality product that brings variation and choice to the market and complement volume housebuilders.

1.15 Esquire Developments Managing Director presently chairs the local Kent SME Developer Network. The SME Network is a collection of active SMEs in Kent to bring together collective thought and best practice as well as sharing knowledge to increase and improve the delivery of development in the local area by SME Developers.

ii) Content of Representations

1.16 These representations are structured as follows:

Section 2.0: The Spatial Strategy and Lack of Support for SME Housebuilders .

Section 4.0: The Suitability of the Site to accommodate Development.

Section 4.0: Conclusions.

1.17 Notwithstanding specific land interests, these representations have been prepared in objective terms and assessed against the prevailing planning policy and guidance framework set out within the National Planning Policy Framework (NPPF) (February 2019) and National Planning Policy Guidance (PPG) (March 2014 as amended).

1.18 In summary the headline points are as follows:

5.1 It is considered that the Pre-Submission Regulation 19 Local Plan is **unsound**. Alongside wholly supporting the Kent SME Representations, our comments are summarised as:

- . We are wholly disappointed that the Council is failing to recognise the role of SMEs in its Pre-Submission Plan. This is evident on the basis that the Local Plan is wholly silent with reference to SMEs.
- . The plan fails to allocate 10% of its housing numbers on sites of 1ha or less as required by NPPF Paragraph 68.
- . The plan fails to provide a sufficient evidence base, namely demonstrating a quantitative and qualitative approach to supporting SME sites.
- . The plan is over-reliant on the anticipated delivery of its strategic large-scale sites in which the largest comprises an oligopoly of National Volume Housebuilders and the other has no developer yet on board;
- . The Plan fails to provide for a robust housing trajectory and requires the identification of smaller sites to provide for a more effective plan.
- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.
- . The Council has undertaken a flawed approach to site selection in the AONB and misapplied paragraphs 171 and 172 of the Framework.
- . The Council has not appropriately assessed the exceptional circumstances required for major AONB release and failed to recognise the role played by non-major AONB sites.
- . The Council has retrofitted its evidence base to suit its current position in respect of the 2019 and 2021 SHELAA conclusions of the site.
- . The site is considered to wholly meet the requirements of the plan, being an SME led, non-major site of under 1ha of land in a sustainable location.
- . Accordingly, the plan is considered **unsound** as it is:
 - o Not Positively Prepared as it does not fulfil paragraph 68 (a) of the NPPF regarding 10% provision of small sites and has sought to reduce its plan period to reduce housing numbers;
 - o Not justified as the appropriate evidence base is lacking, particularly relating to
 - housing delivery and NPPF Paragraph 72 (d).
 - identifying sites with the least environmental or amenity value as per paragraph 171 of the framework;
 - has not appropriately assessed the exceptional circumstances to justify major AONB development.

- o Not effective as the reliance on larger sites reduces the opportunity to diversify the housing market (especially in Cranbrook) and will not deliver the required housing within the plan period.
- o Is not consistent with National Policy as it does not conform to Paragraph 68, Paragraph 171 and paragraph 172.

2.0 RESPONSE TO THE SPATIAL STRATEGY AND LACK OF SME SUPPORT

2.1 The Kent SME Developers Network has prepared comprehensive representations in respect of the proposed spatial strategy and lack of SME support and opportunities. The representations are attached in **Appendix 9** of this document and therefore the arguments made in that document are not repeated in detail here.

2.2 We wholly support the content of the SME representations and share the view that the spatial strategy is not sound. We echo the disappointment and lack of support to SMEs by TWBC within the plan and that SMEs have been disregarded in totality. TWBC's attitude to SMEs is not reflective of Central Government's attitude - which has recognised SMEs as being of 'National Importance'.

2.3 We have serious concerns with the Policy Vacuum within the Local Plan in delivering high-quality small-scale sites. The Plan is reliant on at least 1,670 dwellings coming forward under windfall. Alongside the concerns that the Strategic Sites will not deliver the scale of growth envisaged in the plan period (5,590 dwellings), and that a more realistic figure of 2,450 dwellings is likely to be delivered. Consequently, a further 2,140 dwellings should be allocated elsewhere in the plan.

2.4 Indeed, there has been a significant 'shift' in the Council's Spatial Strategy from the Regulation 18 Local Plan with a significant reduction in the numbers of dwellings envisaged in certain locations and the subsequent removal of a number of sites. Table 2.1 compares the proposed housing distribution between the Regulation 18 Consultation document and Regulation 19 Pre-Submission Plan.

[TWBC: for table, please see full representation attached as a supporting document]

2.5 Table 2.1 demonstrates that overall, there has been a reduction in allocated sites from between 890 dwellings to 1,455 dwellings. The most significant locations which saw a reduction include Hawkhurst, Cranbrook and Paddock Wood. Hawkhurst and Cranbrook are recognised as being both main settlements within the Borough and crucially perform critical roles within the rural areas of the Borough.

2.6 It is not immediately clear within the Local Plan as to where the 'missing allocations' are redistributed to, and we seek clarification on this point. However, a review of the Local Plan period from the Regulation 18 Consultation document and the Regulation 19 Consultation document identify the Regulation 18 Local Plan was based on a 20-yr plan period of 2016 – 2036 and confirmed the housing need as being 13,560 dwellings. The Regulation 19 Local Plan has 'moved the goalposts' and has a plan period of now only 18 years of 2020 – 2038 and a housing requirement of 12,200.

2.7 This change subsequently results in the Regulation 19 Local Plan requiring to identify 1,360 dwellings fewer dwellings. This is not considered to be a proactive approach and there has been no justification by the Council why the change in plan period from the Regulation 18 to regulation 19 was sought – other than to reduce the number of dwellings to allocate.

2.8 Indeed, as a result of the bringing forward of the base date of the plan from 2016 to 2020, the subsequent back log of unmet housing need from 2016 - 2020 is simply 'written off' – again further reinforcing the lack of a positive approach to meeting needs within the Borough.

2.9 The impact of the Council's approach is that a number of smaller sites have fallen victim to the change in strategy. This is a point highlighted by the SME Network representations, where it is evident that the 10% target required by paragraph 64 of the NPPF is not being met on a Borough wide basis and detailed further in section 3 of this statement.

2.10 The site adjacent to Wilsley Farm is a specific example of this. The site lies under 1ha and is under the control of an SME. It was identified as an emerging allocation in the Regulation 18 Local Plan. It meets the exact criteria paragraph 68 of the NPPF is seeking to achieve, and yet the site has been removed from the Councils Local Plan. There are a number of sites in similar situations.

2.11 Whilst we recognise the Council has sought to justify its position on the reduction in dwellings in Cranbrook and Hawkhurst (and other locations) due to cumulative impacts on the AONB (amongst other things), its subsequent site selection and SA is flawed as it does not factor into account those sites that are being promoted by SMEs or of a scale that is required to be delivered in the Local Plan

under Paragraph 68 of the NPPF. Furthermore, the Council has now sought to artificially change its Evidence Base to suit its position – as shown in the change in assessment of the Site between the 2019 SHELAA and 2021 SHEELA.

2.12 The Spatial Strategy further ignores the benefits an SME can bring in both design quality and carbon efficiencies.

2.13 The SME Representations (**Appendix 9**) reference SME site typology which is recognised as marginalising SMEs to rural fringe locations. Whilst an SME can deliver a bespoke development that is both appropriate in scale and design to reflect the local area, these sites often have to work harder to justify their sustainability credentials or other such matters (i.e. landscape impact) often on the basis that a bus service is infrequent or the local primary school is in the next village. As a result, SME schemes of this nature are often declared to be too heavily reliant on the use of car, and thus automatically assumed to be unsustainable and either applications are refused, or sites not progressed to allocation.

2.14 However, this is a too simplistic approach to take, as sustainability also includes the effect of carbon footprint from the buildings themselves and consequently the overall emissions released from a scheme (including both dwellings and vehicles). Together these components will tackle Climate Change and whilst it is recognised that rural fringe locations may result in increased vehicle trips, through efficient build techniques that SMEs can deliver and other behavioural trends (such as electric vehicles, online shopping and home working), the emissions deriving from an SME built rural fringe site does not necessarily result in an increased emissions output from a traditional built scheme in the urban area by a volume housebuilder meeting only standard building regulations. This point is further emphasised when volume housebuilders are present in more rural locations – such as is the case in Cranbrook.

2.15 **Appendix 10** of these representations contain a report titled '*Current and Future Sustainability Trends in relation to Carbon Emissions, Behavioural Trends and Technological Advances*' commissioned by Esquire Developments and prepared by i-transport and Daedalus Environmental. The report seeks to link the nuanced behavioural changes relating to electric vehicles, online shopping and working from home in rural fringe locations. The report assesses the likely car trips from these locations and undertakes a case study to demonstrate that by building carbon efficient homes, the emissions released from the increased number of (short) car trips can be off-set and that when the combined picture is assessed, there is no material increase in emissions output from a rural fringe location to an urban location using current building regulations.

2.16 Figure 6 from the report (below) demonstrates that over the life cycle of a development, whilst transport related CO2 emissions are greater for a rural fringe location, the CO2 emissions from the dwellings built by Esquire Developments are less, and when combined, the overall CO2 emissions are actually more favourable than a standard housebuilder in an urban location.

[TWBC: for graph, please see full representation attached as a supporting document]

2.17 It is anticipated that over time, as Building Regulations improve, the gap between SME and standard build emissions closes. Conversely, as electric vehicles become more common (and indeed fossil fuel cars will no longer be sold as new from 2030), the gap in car emissions will also reduce. Given the Local Plan runs 8 years beyond the 2030 target date, it is considered appropriate that this plan recognises the changing nature of sustainability and plans for this effect now.

2.18 This more nuanced approach demonstrates that sites which have been marked as unsustainable because they are not located within the identified travel distances to certain facilities is incorrect. The SHLAA should be revisited with this in mind as well an assessment of which sites are being actively promoted by SME developers, and not simply landowner, promoters of volume house builders.

2.19 In addition to the above carbon efficiencies, it is considered that SMEs can bring forward better quality schemes than volume housebuilders. This can have 2 positive effects on designations such as the AONB. The first being the bespoke nature of the house types and quality of materials and architecture can better respond to the AONB design code, and secondly the sites themselves are smaller in nature and thus the impact of any 1 development is less (and thus cumulatively less) often not being considered 'major' development in the AONB. This issue has been overlooked by the Council in its spatial strategy and site selection process (set out in section 3).

2.20 By way of example, in Cranbrook and Sissinghurst, a number of larger sites have been permitted to Volume Housebuilders.

[TWBC: for table, please see full representation attached as a supporting document]

2.21 In total, in just 3 number sites, a total of 405 dwellings are being built by volume Housebuilders. This compares to a number of smaller SME type applications that have recently all been refused by the Council – all of which were Regulation 18 allocated sites that have now subsequently been removed in the Regulation 19 Local Plan, namely:

[TWBC: for table, please see full representation attached as a supporting document]

2.22 Tables 2.2. and 2.3 demonstrate that just 3No. volume housebuilders have permission in excess of 400 dwellings in Cranbrook and Sissinghurst. However, 5No. Regulation 18 Local Plan sites totalling just 155 dwellings have all been refused by the LPA in the last 18 months alone and at a time when there was/is a lack of a 5-year supply of land for housing.

2.23 Whilst it is recognised that each application must be determined on its own merits, the above is a clear demonstration that the smaller SME site typologies are being regularly refused by the Council. It is arguable that the Council is exacerbating the decline of SMEs and is 'part of the problem', preferring a few number of volume housebuilders on large sites and encouraging the lack of diversity in the housing market.

2.24 Had the sites in Table 2.3 been approved or indeed continued to be identified as emerging allocations in the Regulation 19 Local Plan, it would represent the opportunity to :

- 1 support smaller SME type sites;
- 2 support SMEs themselves;
- 3 Result in a significant choice in house design, product, carbon efficiencies; and
- 4 Not undermine the wider spatial strategy or have such significant adverse impact on the AONB when taken cumulatively (especially in the light that these 5 sites alone still falls under the two largest volume housebuilder schemes).

2.25 The Council's site selection and strategy for Cranbrook and Sissinghurst is exacerbating the decline in SMEs. The Council is failing to support SMEs both in the wider Local Plan and this is evidenced in Cranbrook and Sissinghurst through the Council's initial identification of suitable sites for allocation, and then their removal in favour of Volume Housebuilder schemes.

2.26 This is most clearly demonstrated in the sites selected for allocation in the Regulation 19 Local Plan. It shows that 3 of the 5No. sites in Cranbrook and Sissinghurst are controlled by Volume Housebuilders and account for 92% of the total housing numbers in Cranbrook and Sissinghurst (and 100% in Cranbrook). Of the 2No. remaining sites, one is controlled by a self build company, and the last is controlled by a recognised SME, albeit an application for less than half of the allocated number was withdrawn in 2017 – suggesting there are potentially deliverability issues with that specific site.

[TWBC: for table, please see full representation attached as a supporting document]

2.27 The Councils Strategy has had insufficient regard to SME developers both in respect of the quantum of sites identified under paragraph 68 of the Framework, but also it has actively chosen to refuse or deallocate sites that are either being promoted for SME developers or are smaller scale in nature.

2.28 The Council's position is therefore unsound, as it is not consistent with National Policy nor is it an effective plan.

3.0 SUITABILITY OF LAND ADJACENT TO WILSLEY FARM TO ACCOMMODATE GROWTH

3.1 Land adjacent to Wilsley Farm is considered a wholly appropriate site for allocation in the emerging Local Plan.

3.2 Cranbrook is recognised by the Council as being a sustainable location for growth. Whilst it is constrained with AONB that washes over the settlement, that designation in itself is not an overriding barrier that precludes an appropriate amount of growth in order to meet the wider housing needs. Indeed, all the proposed allocations in the Regulation 19 Local plan for Cranbrook and Sissinghurst are within the AONB and most are near to Conservation Areas. In this regard, many of the sites display similar characteristics.

3.3 The site was identified in the Draft Local Plan (Regulation 18) consultation which was undertaken in September- November 2019. The Consultation identified, under Policy STR/CRS 1 'The Strategy for Cranbrook and Sissinghurst Parish' that the area should accommodate approximately 718 -803 new dwellings across 9No. sites.

3.4 The consultation document identified the Site as being allocated for residential development of between 15-20 dwellings under Policy AL/CRS 1 Land adjoining Wilsley Farm, adjacent to Angley Road and Whitewell Lane (**Appendix 2**).

3.5 Policy AL/CRS1 at that time set out a number of criteria in which any scheme should accord with. These were detailed criteria relating specifically to the development of the site and reflected the Council's recognition at that time that the site was suitable as a potential allocation for residential development.

3.6 In this respect, the Evidence Base prepared at that time had assessed the site (both within the 2019 SHELAA and Sustainability Appraisal) and accordingly concluded the site was appropriate as a proposed allocation and selected as one of 9No. sites identified for development. The acceptance and recognition of the suitability of the Site by Council Officers was not a passing whim, or indeed just a SHLEAA suitable site. It was a site that was recognised as being sustainable and accordingly subject to a detailed policy to guide future development.

3.7 Following the identification of the Site in the Regulation 18 Local Plan and after the consultation ended, Esquire Developments agreed an Option with the landowner to bring forward the site. Esquire Developments subsequently undertook 2No. pre-application meetings with the Council throughout 2020 to discuss the suitability of the site and the appropriateness of coming forward with a planning application.

3.8 On both occasions, the pre-application response (**Appendix 11**), acknowledged the emerging allocation of the site, but gave that position little weight due to the status of the plan at that time. However, due to the Council's then (and present) Housing Land Supply position, concluded that the principle of development of the site was acceptable and that the submission of an application would be appropriate.

3.9 The application was duly submitted in December 2020 on the basis of this positive pre-application advice.

3.10 However, in January 2021, without any prior warning or notification (indeed the Council's Case Officer was unaware), the site was removed from the Pre-Submission version of the Local Plan.

3.11 At that time, there was no specific supporting material to confirm justification as to why the site was removed from the Local Plan, other than the fact that the spatial strategy had changed and the allocated numbers for Cranbrook and Sissinghurst was reduced – by around 50%.

3.12 At that time, Esquire sought reasoning from the Council as to why the site has been moved. Esquire were informally advised that the Policy team had concluded that it was due to the impact of the access on the hedgerow and Conservation Area. However, this position did not reflect the pre-application advice received nor was that position reflected in the detailed application response from the Council's Conversation and Design Officer (**Appendix 12**). Notwithstanding, the 2021 SHELAA (**Appendix 7**) has been retro-fitted to suit the Council's position of not supporting the site – even though there has been no material change to the site or its surrounding from 2019 to 2021.

3.13 It is evident that the Policy team and the Development Management team are acting independently of each other, are not communicating what each is doing and coming to different conclusions on the potential impact of the development. This is a wholly unacceptable position and again only demonstrates how the Council's actions are working against SME developers and elevating planning risk.

3.14 Notwithstanding that the Council cannot presently demonstrate a 5-yr supply of land for housing (the primary basis in which the principle of development on the application was agreed), the Council refused the Planning Application in April 2021. This was even in light of a 'less than substantial harm (at the lower end of the scale) to the Conservation Area', positive comments in respect of the proposed design and quality of the architecture and that there was a 'moderate to low impact' on the wider AONB landscape.

3.15 In order to understand further the Council's change in attitude, it is clear that the overall reduction in housing numbers in Cranbrook has had an impact on the number of allocations required in Cranbrook and Sissinghurst. The Development Strategy Topic Paper sets out the Council's approach to Cranbrook and the sites selected.

3.16 Para 6.13 of the topic paper states that *'The focus here is on the further regard (since preparation of the Draft Local Plan) to likely opportunities for meeting development needs in a way that reduces the pressure on Green Belt land and for major development in the High Weald AONB in particular.'*

This looks firstly at need arising within the borough and, secondly, at any unmet need, essentially for housing, from neighbouring areas'

3.17 The above statement specifically only refers to how development needs can be met in a way that 'reduces...major development in the AONB in particular'. Indeed, the Topic Paper continues to only assess major development in the AONB as it repeats National Guidance of paragraph 172 which is specifically concerned with 'major' development.

3.18 The Topic Paper usefully assess the principle of developing in the AONB and confirms that as no neighbouring authorities are prepared to accommodate TWBC's housing need, development in the AONB is necessary (para 6.21) in order to meet the needs.

3.19 Under Section 6 Part D of the Topic Paper, the Council assess various scenarios as to what scale of growth is deemed appropriate, including 'major' development in the AONB. Again, by way of example, para 6.25 refers:

6.25 Therefore and having regard to the comments on the Draft Local Plan, further consideration has been given to levels of growth that are less than that required to meet identified development needs. These are:

- 1) Growth reduced below the housing need level to one that does not involve any loss of Green Belt*
- 2) Growth reduced below the housing need to one that does not involve any major development in the High Weald AONB*

3.20 Again, only references are made to 'major' AONB development. A theme that is flawed but forms the fundamental basis for the Council's strategy and site selection process.

3.21 Section H of the Topic Paper assesses Development in the High Weald AONB and seeks to justify the Council's position. However, the Council's approach, as set out in Part H and subsequent Appendices of the Topic Paper are fundamentally flawed, misleading and has resulted in an incorrect site selection process in regard to sites located within the AONB.

3.22 It is evident the Council has undertaken time and effort to understand the impact of growth on the AONB. This is evident in the Topic Paper and Section H. The Council rightly acknowledges National Policy and Guidance, including the Countryside and Rights of Way Act 2000, The NPPF Paragraph 171 and 172 and Footnote 55, the PPG and the High Weald AONMB Management Plan.

3.23 However, the Council has not pursued the appropriate sequential approach to assessing sites in the AONB.

3.24 Instead (and as paragraph 6.111 and 6.112 of the Topic Paper confirm), the Council has first established that there is a need to develop in the AONB (the correct starting point). However, the Council then 'leap' immediately to the issue of 'major' development in the AONB as required by paragraph 172 of the NPPF without first fully testing paragraph 171 of the Framework.

3.25 Paragraph 171, (whilst referenced in para 6.121 of the Topic Paper), is wholly 'put in the corner' by the Council and the remainder of the Topic Paper and site selection process. The Council has become blinded and fixated on the notion of major AONB release, without first exploring and maximising 'non major' AONB release.

3.26 Paragraph 171 is clear that '*LPAS should favour allocating land with the least environmental or amenity value, where they are consistent with other policies in the framework*'. Paragraph 172 goes onto to describe 'major' development in the AONB should be refused, other than in exceptional circumstances. Footnote 55 confirms the definition of major development in the AONB.

3.27 The NPPF therefore applies a sequential approach to development in the AONB (and other protected areas). Firstly, you should locate development away from these areas, and then, if development requires to go in these areas (as the Council acknowledge is the case), that they must be achieved with those sites with the 'least environmental or amenity value'. The Council is still operating within the parameters of paragraph 171 of the NPPF, but has chosen to skip this step and move onto paragraph 172 and seek major AONB release.

3.28 This whole position is contrary to the AONB Management Plan Objective S2, which the Topic Paper itself acknowledges in para 6.162 is crucial to achieve. If the Council pursued the correct methodology as required by Paragraph 171 and the AONB Management Plan, then this would naturally lead to the conclusion of allocating all of the appropriate non major AONB sites in the first instance.

3.29 This has not occurred and is a fundamental flaw in the Council's approach.

3.30 Major development allocation in the AONB is therefore a matter of 'last resort' and subject to 'exceptional circumstances'. Crucially part b of exception criteria contained in paragraph 172 seeks that *'the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way'* needs to be assessed. **The Council has failed to recognise the role of non-major sites in being able to 'meet the need for it in some other way'** and accordingly misdirected itself when undertaking the exceptional circumstances test.

3.31 The appropriate site selection criteria in Cranbrook is to firstly identify and allocate all the 'non major' developments and then understand what the remaining balance of housing is required to be allocated as major development.

3.32 However, we do not see this in the site selection criteria. In fact, there is no evidence base that sets out why previously allocated sites were removed, instead only a high-level SA and a retrofitted 2021 SHELAA that seeks to provide commentary on the alternative Sites in Cranbrook.

3.33 The Topic Paper reaffirms that only the sites that have been selected as preferred allocations in the Regulation 19 Plan have been assessed as being major development or not. Indeed Appendix 4 of the Topic Paper undertakes analysis of the net beneficial effect on the AONB as a whole due to the reduction in overall quantum of development in Cranbrook, but does not go onto undertake any further assessment on the impact on the AONB by first assessing non major sites, and then major or a combination thereof.

3.34 This is a fundamental flaw in the Evidence Base and needs to be rectified to make the plan sound as it is not currently consistent with National Policy.

3.35 Furthermore, the Topic Paper further suggests that the Council has allocated the greater part (69%) as smaller schemes (para6.162). it is unclear what the Council define as smaller scheme but clarity is sought as to how this % figure reflects in actual numbers of dwellings. By way of example, it is misleading to suggest only 10% of allocations are major developments in the AONB. This has no relevance to the wider plan or the impact upon the AONB itself.

3.36 By way of example, in Cranbrook, Appendices 2 and 4 confirm that all 3 sites allocated are deemed major development by the Council. This means that in Cranbrook, 100% of the allocated sites and 100% of the total number of houses being delivered are on 'major' AONB sites. This is against the grain of the suggested Evidence Base and the misleading picture the Council is seeking to present within the Topic Paper.

3.37 We suggest that the site allocation criteria in Cranbrook is reassessed. The site at Wilsley Farm is a wholly appropriate allocation and supported by the Regulation 18 Local Plan and its Evidence Base. The 2021 Evidence Base has been retrofitted and the Council has misdirected itself in how to approach allocation within the AONB.

3.38 The allocation of the site would represent as non-major AONB site in control of an SME developer that is under 1ha in size. The site has been tested within the appropriate evidence base and would go some way to rectify the Councils present deficiencies in its Local Plan.

3.39 We consider the site is wholly in keeping with the Councils evidence base in as far that it has a low environmental and visual impact. Furthermore, the allocation of this site will go some way to support SMEs and be included as a site that is under 1ha in size in which the Council is also failing to comply with (para 68).

3.40 The Council has not pursued its own evidence base in respect of sequentially assessing non major AONB sites before allocating major AONB development sites. The Evidence Base is therefore not robust, and the plan is not effective as a result.

4.0 SUMMARY

4.1 These representations have been prepared by Esquire Developments, a multi -award winning SME Housebuilder based in Longfield, Kent. Esquire has land interests throughout the Borough including specifically Land adjacent to Wilsley Farm, Wilsley Green Cranbrook.

5.2 Land adjacent to Wilsley Farm is being promoted for a residential scheme for up to 20No. Residential dwellings. The site was subject to a recent planning application that was refused by TWBC in April 2021.

5.3 It is considered that the Pre-Submission Regulation 19 Local Plan is **unsound**. Alongside wholly supporting the Kent SME Representations, our comments are summarised as:

- . We are wholly disappointed that the Council is failing to recognise the role of SMEs in its Pre-Submission Plan. This is evident on the basis that the Local Plan is wholly silent with reference to SMEs.
- . The plan fails to allocate 10% of its housing numbers on sites of 1ha or less as required by NPPF Paragraph 68.
- . The plan fails to provide a sufficient evidence base, namely demonstrating a quantitative and qualitative approach to supporting SME sites.
- . The plan is over-reliant on the anticipated delivery of its strategic large-scale sites in which the largest comprises an oligopoly of National Volume Housebuilders and the other has no developer yet on board;
- . The Plan fails to provide for a robust housing trajectory and requires the identification of smaller sites to provide for a more effective plan.
- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.
- . The Council has undertaken a flawed approach to site selection in the AONB and misapplied paragraphs 171 and 172 of the Framework.
- . The Council has not appropriately assessed the exceptional circumstances required for major AONB release and failed to recognise the role played by non-major AONB sites.
- . The Council has retrofitted its evidence base to suit its current position in respect of the 2019 and 2021 SHELAA conclusions of the site.
- . The site is considered to wholly meet the requirements of the plan, being an SME led, non-major site of under 1ha of land in a sustainable location.
- . Accordingly, the plan is considered **unsound** as it is:
 - o Not Positively Prepared as it does not fulfil paragraph 68 (a) of the NPPF regarding 10% provision of small sites and has sought to reduce its plan period to reduce housing numbers;
 - o Not justified as the appropriate evidence base is lacking, particularly relating to
 - housing delivery and NPPF Paragraph 72 (d).
 - identifying sites with the least environmental or amenity value as per paragraph 171 of the framework;
 - has not appropriately assessed the exceptional circumstances to justify major AONB development.
 - o Not effective as the reliance on larger sites reduces the opportunity to diversify the housing market (especially in Cranbrook) and will not deliver the required housing within the plan period.
 - o Is not consistent with National Policy as it does not conform to Paragraph 68, Paragraph 171 and paragraph 172.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

See attached representations

[TWBC: the paragraphs below are two relevant extracts from the full representation, which is attached as a supporting document]

3.37 We suggest that the site allocation criteria in Cranbrook is reassessed. The site at Wilsley Farm is a wholly appropriate allocation and supported by the Regulation 18 Local Plan and its Evidence Base. The 2021 Evidence Base has been retrofitted and the Council has misdirected itself in how to approach allocation within the AONB.

3.38 The allocation of the site would represent as non-major AONB site in control of an SME developer that is under 1ha in size. The site has been tested within the appropriate evidence base and would go some way to rectify the Councils present deficiencies in its Local Plan.

3.39 We consider the site is wholly in keeping with the Councils evidence base in as far that it has a low environmental and visual impact. Furthermore, the allocation of this site will go some way to support SMEs and be included as a site that is under 1ha in size in which the Council is also failing to comply with (para 68).

3.40 The Council has not pursued its own evidence base in respect of sequentially assessing non major AONB sites before allocating major AONB development sites. The Evidence Base is therefore not robust, and the plan is not effective as a result.

- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Due to the content and extent of the representations require verbal exploration with the Inspector.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1792 Esquire Developments SI Representation with Appendices.pdf](#)

Respondent's Name and/or Organisation	Mrs Anne Etherington Rich
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1: The Strategy for Paddock Wood, including land at east Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This land is Green Belt land and should only be built upon if an “exceptional circumstance” exists. TWBC’s own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan’s aims without using the Green Belt land at East Capel. The comment above about coalescence and the creation of a conurbation from Paddock Wood right across to Tonbridge is very relevant here, as is the land’s use as a flood plain. Building here, even with flood risk mitigation and “betterment” could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the impact of climate change.

I think that TWBC want to fill Tudeley and East Capel with housing until they coalesce with Tonbridge to the West and Paddock Wood to the East, ultimately creating a massive conurbation that will dwarf Tunbridge Wells town centre. TWBC is using Capel to dump their housing needs on green fields and meadows, polluting a rural area rather than spreading development across the borough on brownfield sites or placing the garden settlement in the middle of the borough, to make it accessible north and south. The developments in Tudeley and East Capel are unsustainable and place huge pressure on Tonbridge

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tudeley is a settlement that has existed for hundreds of years and is recorded in the Domesday Book. Now TWBC want to destroy it. Your chosen method of destruction is to turn this settlement into a "Garden Village" which sounds very pleasant but in reality means dumping a housing estate of 2,800+ houses on land that is at present both farmland and Greenbelt land, swamping and overwhelming the current residents of this small settlement.

I read in my copy of Autumn 2019 Local that TWBC want to make a positive contribution to combating climate change and I am confused. Surely we should be treasuring and protecting our farmland, so that we can grow the crops we need rather than importing them from abroad, thereby lessening our carbon footprint.

The same applies to our Green Belt land. Green Belts are the lungs of this country and as such should be strongly protected. Tudeley is wholly within the Green Belt and to my mind forcing 2800+ homes on the current settlement is akin to planting a cancer seed in those lungs.

I begin to wonder if the lunatics have taken over the asylum.

The bulk of the land slopes down from the B2017 to Tudeley Hale and is dissected by the railway line. It is served by two narrow country roads, one, Sherenden Road is more a lane than road and goes under the railway via a small, height restricted bridge. The other, Hartlake Road, is slightly wider and goes from Tudeley to Golden Green. At the Tudeley end is a sign saying it is not suitable for HGV's and it crosses the railway via a narrow bridge. Hartlake Road has become a "rat run" at the start & end of most weekdays as people drive to work or schools. Outside of commuting times it is quieter with large tractors & farm vehicles going about their business, however, when there are road works or an accident in Tonbridge, drivers use the road to get from the north of Tonbridge to the south.

Hartlake Road crosses the flood plain, so at times of flood it is impassable and is closed.

These are the only two roads that serve both parts of the proposed building site, so it is hard to imagine how construction traffic will access the land north of the rail line, unless of course it comes into Hartlake Road via Golden Green. I wonder, do the residents of Golden Green realise their lives could be disrupted by this traffic for years?

The same applies with utilities. As far as I am aware gas & sewage pipes were only installed along the B2017 part of Tudeley, they certainly didn't extend to Tudeley Hale as it was deemed too expensive and not cost effective at the time. So these will need to be installed. Over or under the railway? Whichever option is favoured, it will mean road closure and disruption to the lives of the current residents, who will also have to endure several years of living near or by a building site.

As previously mentioned, the proposed building site land slopes down from the B2017 to Tudeley Hale. Beyond Tudeley Hale is the floodplain. Throughout the lower part of Tudeley Hale there is a network of drainage ditches that keep the farmland drained. At times of prolonged rain or flood these ditches become inundated with water and can overflow. Both my front & back gardens have been

flooded several times over the years, and the fields beside and behind my house have become waterlogged too. The prospect of flooding is a worry, particularly as we are told sea levels are likely to rise in coming years. Having a housing estate built on a sloping site that leads down to your locality adds to that worry. There will be run off from all that hard standing & tarmac, will it ALL be gathered and contained, or will some escape and find its way into the drainage ditches, increasing the risk of flood?

The pollution is a real worry too. 2,800 houses mean at least 2,800 extra vehicles on the roads around Tudeley, probably double that as most households have more than one car these days. Then there is the extra traffic from the other proposed sites in Capel. Our air quality is going to seriously diminish!

I know your plan is that everyone will use public transport, cycle or walk, but you don't live here. Take it from one that has relied on public transport for 40+ years, bus timetables are not respecters of appointments, be they with doctor, dentist, hospital or hairdresser. I have wasted many hours of my life getting an earlier bus than I want to because I have an appointment to keep.

As for cycling along the B2017, at present you would be foolhardy to attempt this at peak traffic times. My husband, also a non driver, cycles to and from work in Hildenborough every day, he starts work very early so thankfully he misses the peak traffic, but he gets wet when it rains, and freezes in the winter. Not many people, particularly commuters, would do this willingly.

People who have cars will use them, if you think otherwise you are seriously deluded.

Light pollution is also a concern. Away from the Crockhurst Street part of Tudeley there are no street lights or pavements. Here in Tudeley Hale, it is dark at night and you can see the stars. The lights from a housing estate on a sloping site would stick out like a sore thumb and would be seen for miles.

Likewise with noise pollution. Away from the B2017 Tudeley is a quiet peaceful, place. Tudeley Hale is in a valley and any sound tends to ricochet around the valley. 2,800 dwellings on what is at present farmland are likely to produce extra noise. Indeed, the building of those dwellings is likely to make the whole area noisier for years to come.

Your draft plan for Tudeley mentions often the provision of green spaces for leisure activities. Please don't bother, we already have them. It's called countryside. Here in Tudeley we have a good network of public footpaths that are well used. In Tudeley Hale at weekends and quiet times there are people rambling, leisure cycling, riding horses or making their way to Hartlake Bridge to do some fishing. Some people just walk towards the river so they can stop and look around at the scenery. Being in a valley means you get a beautiful view of fields, woodland and hedgerows that all slope up to the distant hills. We may not be within the AONB, but we should be! It's not just locals that do all these activities, a good percentage of the people come from Tonbridge or other surrounding areas to enjoy open space away from buildings and town life. Often they end their walk or bike ride at the local pub where they will sit in the garden with a cool drink & something to eat all the while looking at the view. If your plan goes ahead they will be looking at a housing estate, I suspect that they will not return.

The Covid Pandemic has highlighted just how valuable this green, open countryside is, as the numbers of walkers, cyclists & now runners, has increased enormously as people have sought somewhere that isn't too far from home to take their daily exercise. Sadly, they have not been able to visit the pub because it has been closed due to lockdown, but at least they have been able to enjoy the space, scenery and fresh air, which has been even fresher due to less traffic during the pandemic!

Your plan will create a visual scar across the landscape. Views from Tonbridge to the Low and High Weald will be impaired, including the setting of historic assets like All Saint's Church in Tudeley and the Hadlow Tower. The church at Tudeley may end up being surrounded by houses, bus lanes and sit next to a busy road in sight of a big roundabout. That will cause great harm to its value as a heritage asset of world renown (due to the complete set of Marc Chagall windows).

Most importantly is the wildlife. Our wildlife population in the area is wide and diverse. The land you want to build your housing estate on is not only greenbelt, not only farmland but is also home to the wildlife. What are all the birds and creatures supposed to do when you start building, removing hedgerows, cutting down trees, destroying their habitat? Pack their suitcases and move on? Where to?

The plan preparation process didn't include Tudeley (sites CA1 and CA2) until after the Issues and Options Process in 2017. This means that the largest housing area in the plan didn't go through most

of the plan preparation process. The Issues and Options process led to most people (60%) wanting a growth corridor led approach. Less than half wanted a garden settlement and that was when they didn't know the garden settlement would involve destruction of Green Belt. Protecting Green Belt was a key priority for people who participated in the Issues and Options consultation. I think that the plan should be re-written to implement a growth corridor led approach and to protect Green Belt land within the borough.

Earlier in the plan (in 4.40) you refer to Tudeley Village securing a long term option for the borough to deliver the needs of future generations. It is clear from this statement that you intend to add more and more housing to this "garden settlement" in each five year review of future Local Plans.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Finally; Though I live in Tudeley, my postal address is Tonbridge, my landline dialling code is Tonbridge, my doctor is in Tonbridge, I am a member of Tonbridge library, I do my shopping in Tonbridge and yet I pay my council tax to you, TWBC. If your plan should go ahead I suspect any new residents would do exactly the same, which to my mind doesn't seem very fair on Tonbridge, they provide the amenities and you get the money.

Therefore I strongly object to your plans for Tudeley.& Capel.

Future Notifications

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18)

[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated

and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that:[\[https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf\]](https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf)

"2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale."

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

"Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable"

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *"the residential aspect is not a sustainable location."* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior to* the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *"Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle."* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

"4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough's town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable

development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)"

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be “remote” and “isolated” and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *“Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard’s Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an ‘active travel link’ between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard's Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic

policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (St Albans City Council v Hunston Properties [2013] EWCA Civ 1610; Solihull Metropolitan B.C. v Gallagher Estates Ltd [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in Hunston and Gallagher in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially

unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_98a-b

Question 1	
Respondent's Name and/or Organisation	Euan Burrows
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1762, PSLP_1764, PSLP_1765 and PSLP_1766]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18)

[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated

and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that: [https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf]

"2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale."

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

"Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable"

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *"the residential aspect is not a sustainable location."* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *"Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle."* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

"4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough's town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)"

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be "remote" and "isolated" and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *"Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard's Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an 'active travel link' between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard's Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic

policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.;

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (St Albans City Council v Hunston Properties [2013] EWCA Civ 1610; Solihull Metropolitan B.C. v Gallagher Estates Ltd [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in Hunston and Gallagher in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially

unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_93a-b

Data inputter to enter their initials here AT

Question 1

Respondent's Name and/or Organisation Euan Burrows

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1762, PSLP_1764, PSLP_1765 and PSLP_1766]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18)

[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated

and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that: [https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf]

"2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale."

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

"Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable"

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *"the residential aspect is not a sustainable location."* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *"Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle."* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

"4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough's town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)"

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be "remote" and "isolated" and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *"Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard's Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an 'active travel link' between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard's Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic

policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (St Albans City Council v Hunston Properties [2013] EWCA Civ 1610; Solihull Metropolitan B.C. v Gallagher Estates Ltd [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in Hunston and Gallagher in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially

unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_98a-b

Question 1	
Respondent's Name and/or Organisation	Euan Burrows
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1762, PSLP_1764, PSLP_1765 and PSLP_1766]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18)

[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated

and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that: [https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf]

"2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale."

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

"Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable"

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *"the residential aspect is not a sustainable location."* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *"Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle."* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

"4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough's town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)"

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be "remote" and "isolated" and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *"Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard's Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an 'active travel link' between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard's Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic

policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.;

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (St Albans City Council v Hunston Properties [2013] EWCA Civ 1610; Solihull Metropolitan B.C. v Gallagher Estates Ltd [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in Hunston and Gallagher in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially

unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Karen Evelyn
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HO 3 - Land to the east of Horsmonden - Point 1.Horsmonden Overview 5.558

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have a concern that the highways assessment referred to in point 1 may not take into consideration the poor visibility at the junction, the narrowness of the road or street parking along the Goudhurst Road. The Goudhurst Road is a minor rural road as stated in 5.558.

At present, visibility on to the Goudhurst Road is poor to the left and right and combined with the narrow road width makes for a very unsafe junction. With on street parking along the Goudhurst Road this will only compound the problem.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The road access point does not support the potential increase in vehicle numbers entering and leaving the proposed housing site.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN1 Sustainable Design, Point 6. Residential Amenity. Points 1 & 2 Page 326

Policy EN27, Noise, Points 2 a. and b. Page 394

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Don't know

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy EN1 Sustainable Design, Point 6. Residential Amenity, Points 1 & 2 (Page 326) states '*Proposals should not cause significant harm to the .. occupiers of neighbouring properties...*'. This development will inevitably expose 1 Bassetts Villas to excessive noise, vibration, odour, air pollution, activity, vehicular movements and overlooking. The property is currently surrounded by orchards with very minimal activity and minimal noise and since the proposed development is located on a slope above and overlooking this property the noise, vibration, odour, air pollution, activity, vehicular movements and overlooking will inevitably be significant and detrimental.

Policy EN27, Noise - states Development will only be permitted where it can be demonstrated that re points 1 & 2 (page 394), the development will not expose existing users to noise or unacceptable noise. As the location of the development is so close to the boundaries of 1 Bassetts Villas and on a slope above the property, the noise levels will inevitably be unacceptable and hence under this development must not be permitted.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy EN1 Sustainable Design, Point 6. Residential Amenity, Points 1 & 2 (Page 326) states '*Proposals should not cause significant harm to the .. occupiers of neighbouring properties...*'. This development will inevitably expose 1 Bassetts Villas to excessive noise, vibration, odour, air pollution, activity, vehicular movements and overlooking. The property is currently surrounded by orchards with very minimal activity and minimal noise and since the proposed development is located on a slope above and overlooking this property the noise, vibration, odour, air pollution, activity, vehicular movements and overlooking will inevitably be significant and detrimental.

Policy EN27, Noise - states Development will only be permitted where it can be demonstrated that re points 1 & 2 (page 394), the development will not expose existing users to noise or unacceptable noise. As the location of the development is so close to the boundaries of 1 Bassetts Villas and on a slope above the property, the noise levels will inevitably be unacceptable and hence under this development must not be permitted.

As above, the proposed development is too close in proximity to 1 Bassetts Villas and therefore does not meet the policy criteria and must not be permitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I don't feel that the rights of 1 Bassetts Villas will otherwise be fairly represented.

Re Land to the east of Horsmonden - Policy AL/HO3, point 5.600 and Point 10 of Policy AL/HO3 - further to my submission on the 15/05/21 with Comment ID PSLP_138 I would like to add that property 1 & 2 Bassetts Villas dates back to the 1900s and is of late Victorian or early Edwardian construction. It is therefore likely to be significantly older than New Bassetts Cottages for which special consideration has been given in point 10. I therefore ask that 1 & 2 Bassetts Villas should be accounted for and shown respect by allocating open space to the north, west and south of the properties.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Land to the east of Horsmonden- Policy AL/HO 3, Point 5.600 and Point 10 of Policy AL/HO 3 Policy STR 2 Place Shaping and Design.	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Land to the east of Horsmonden- Policy AL/HO 3,
Point 5.600 and Point 10 of Policy AL/HO 3 refer to:

A terrace of cottages, New Bassetts Cottages (not listed, but non designated heritage assets) are located 'in the middle' of the site but outside the site boundaries. It will be important that any development takes account of, and respects, the nearby listed buildings and the setting of New Bassetts Cottages; the area immediately fronting these cottages (within the site boundary) is allocated as open space.

To the south west of the site is an additional pair of cottages 1 & 2 Bassetts Villas which are akin to non-designated heritage assets for which no consideration has been made. In the plan these residences are surrounded on all four sides by the proposed housing development and I believe the same consideration should be shown to these houses as for New Bassetts Cottages. The plan neither 'takes account of' nor 'respects' these properties as it does for New Bassetts Cottages. I can see no reason why they should be treated differently. 1 & 2 Bassetts Villas are Victorian properties and were originally used as the office for the surrounding apple farm and provided accommodation to the farm workers, as such it was very much part of the Fruit Belt Landscape Character Area as referred to in point 5.557.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1 & 2 Bassetts Villas should be accounted for and shown respect by allocating open space around the properties. A green and open space should be allowed to the north, west and south of the properties' boundaries to protect the amenity of the existing residents and their use with regard to noise, privacy and overbearing impact as required in Policy STR 2 Place Shaping and Design.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The impact to properties 1 & 2 bassetts Villas is significant and detrimental.

Future Notifications

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1

Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan is unsound in my view and in the views of my immediate and extended family, and friends. We do not accept that it is necessary and justified to construct large developments and new settlements on Green Belt land or on or near to AONB land. These protections were put into place to prevent over zealous development, urban sprawl and the conglomeration of once separate places.

We consider that most objectionable of all is the so called Tudeley Village which would be a development entirely out of keeping with the rural undeveloped location and would destroy large swathes of green belt which by the way is currently very pleasant green fields, woodland and a former quarry which is now a lake. This area is quiet, peaceful and serene and provides a large expanse of unspoilt land for wildlife, farming and natural outdoor space for local people.

Furthermore, this area lies between the settlements of Tonbridge and Paddock Wood, both of which are expanding in the direction of this proposal currently, or within this proposal are to be expanded. This means that regardless of the garden village principles the Tudeley Village does not protect from urban sprawl but will create an urban link between Tonbridge and Paddock Wood and therefore fail the test of being part of a sustainable plan or of being effective in terms of Green Belt.

There is an extremely popular campaign in motion to "Save Capel" opposing both of these developments including the expansions west of Paddock Wood. In addition a popular opposition to development at Ramsley exists. Given that these campaigns have support of at least 5000 respondents is it not surely required that these developments are removed from the local plan, we cannot accept these constant losses of AONB and Green Belt across the borough as it is not sustainable and does not respond to the climate crisis sufficiently.

The fields at Capel, Five Oak Green and Paddock Wood are pleasant places which currently serve to provide a home and refuge for wildlife and an effective green belt to those settlements and must therefore remain in place undeveloped, and should receive therefore enhanced protection. These fields and woods were loved by my relatives who lived in Five Oak Green and were places that they fought for during the Second World War by serving their country or doing their domestic duty.

Therefore we all oppose these devastating developments and insist that the borough reconsider that it must follow a prescribed government solution and that it should in fact scale back development across the borough rather than support additional growth. We recognise that some development is required but feel that it can be better located in these cases, and more sustainably achieved under a much reduced level of new allocations and greenfield across the board.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

---------------------------------------	----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 6

Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not consistent with national policy
---	---

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

SAFE ACCESS & ROAD SAFETY Paragraph 108 of National Planning Policy Framework states that safe and suitable access to the site should be achieved for all users. Upper Grosvenor Road is already a very busy and unsafe road with a long history of incidents and accidents particularly on the bend on which the access road (currently 202) will be created. We witness at least 3 incidents a year (not all attended by the police) (At least two known deaths.) It is already quite unsafe pulling out of drives on to such a busy road especially as cars parked on the road obscure the view and cars speed along Upper Grosvenor Road. The access road will be on sharp bend with a downhill slope so visibility will be very poor. The road will only get busier and with more housing, the number of parked cars will increase. (Parking may be part of the development but people always seem to have more cars and more visitors with cars than parking. There is already a parking overflow into UGR. Because people want to tuck their cars in off the road, people already park on the pavement blocking the pavements for prams and wheelchair users.) During the development no doubt the construction vehicles will block the road and decrease visibility further. There is a bus stop and Silverdale Lane, which gives on to Upper Grosvenor Road, opposite the proposed access road. There will be a lot happening at this junction and safety will be compromised. The road is used by children as St John's school is nearby. Children walk to schools such as TWGGS and Skinners via UGR and families need to be able to cross the road to go to the well used Grosvenor and Hilbert park, the entrance to which is about 500 metres from the proposed access road.

OVERDEVELOPMENT Further the proposed development overdevelops the site which is not in line with paragraph 117 of the NPPF which states planning policies should promote the effective use of land and ensure safe and healthy living conditions. It is a small strip and inappropriate shape (triangular) of land on which to put 45 units which will probably also have to make space for 50+ residents' cars. The development will be further cramped as many of the trees on the site are subject to tree protection orders so the developer will have to work round these orders. Development will lead to a loss of biodiversity. Such a densely developed site with so many units cramped into such a tiny space cannot lead to satisfactory healthy living conditions for future residents. Will the site have proper provision of community and green space for residents along with light, spacious, airy housing. And does the infrastructure exist to support the new residents such as school places and spaces at local doctors?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS3

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident in Tudeley since 1984 & write in respect of the above consultation to express my deepest concerns about the proposed land use planning strategy for Capel/Tudeley.

The policies referenced above promote a comprehensive mixed use development for Capel/Tudeley, in the form of a 'garden settlement', and encompassing approximately 2,800 dwellings; employment provision, a range of local services and facilities to serve such a settlement; and open space, leisure and recreation uses.

Also proposed is a new six form entry secondary school & primary school – which are to be located within the 'garden village'.

There are a number of very obvious, and very serious, problems with this proposed strategy, including (but not limited to):

- . Green Belt,
- . Infrastructure/deliverability,
- . Area of Outstanding Natural Beauty/Heritage Assets/visual impact,
- . Flooding,
- . Ecology, and
- . Major traffic issues
- . Noise, light & air pollution
- . Loss of prime agricultural land
- . Disproportionate allocation of new housing within the Capel Parish

These shall be briefly addressed in turn as follows:

Green Belt– The site for the new garden settlement falls within the Green Belt, wherein the primary aim of planning policy is to keep land permanently open. In terms of Local Plan preparation this means not releasing land from the Green Belt except in exceptional circumstances. I understand that exceptional circumstances cannot exist if there are alternative, non-Green Belt sites that might be available to accommodate the proposed development. In this case only a small proportion of Tunbridge Wells Borough is washed over by the Green Belt. There is a significant swathe of land to the east of the Borough that is not within the Green Belt, and is therefore free of such constraint. Has it genuinely and robustly been demonstrated that there are no alternative sites available that are outside of the Green Belt? If the answer to this is no, then exceptional circumstances simply cannot exist.

The intended expansion of Paddock Wood together with the new Tudeley Village Development, if allowed, would lead to a corridor of urban sprawl from Tonbridge to Paddock Wood effectively destroying the green belt buffer that currently exists & separates these areas.

Infrastructure/Deliverability –Clearly the delivery of a new garden settlement will be entirely dependent upon the provision, up front, of the infrastructure to serve such. The provision of such infrastructure is likely to be complicated by the fact that the proposed site is dissected by a railway line. In this context, timescales become important. For instance, by the time a (very large scale) planning application has

been determined, conditions have been discharged, and sufficient infrastructure works been undertaken to enable housing and other development to be delivered, it seems incredibly likely that it will be a number of years down the line. As such the strategy does nothing to alleviate housing and employment needs in the short to medium term; and does nothing to meet the stated objectives of producing a Local Plan.

There appears to have been very limited consultation with the major service providers for sewerage, water & power services in connection with the scheme.

These services are currently already stretched within the local area with poor water supply & inadequate foul & storm water services for the current population.

Area of Outstanding Natural Beauty/Heritage Assets –The site of the proposed garden village lies outside of, but adjacent to, the Area of Outstanding Natural Beauty. The National Planning Policy Framework (paragraph 172) states that ‘great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues’. Similarly, there are a number of Listed Buildings located around the perimeter of the proposed allocation, including my own home. The current (and historic) setting of those Listed Buildings is one of a distinctly rural environment, characterised by open fields, interspersed with historic field boundaries and other historic buildings. There is simply no way that the introduction of 2,800 new homes, employment, and associated facilities, on a large swathe of attractive, undeveloped, rural land cannot have a significant and detrimental visual impact upon the adjacent Area of Outstanding Natural Beauty, and upon the setting of the surrounding Listed Buildings.

Flooding –The site itself might not be subject to significant areas of flood risk, but adjoining areas certainly are. Surface water flooding has proven repeatedly to be an issue of serious local concern. Providing a new garden settlement on currently undeveloped, free draining, greenfield land – with the inevitable (considerable) increase in areas of hard surfacing and built form, will simply increase the prevalence of surface water flood risk on the areas of land that adjoin the proposed allocation.

Ecology –Given the extensive scale, and rural/undeveloped nature of the site of the proposed garden settlement, it seems inconceivable that it will not be home to protected species. With such a large scale development it is impossible to fully mitigate against such wholesale destruction of habitat.

Major traffic issues - I have concerns as to whether the traffic modelling that has been carried out to assess the impact of traffic generated by the new development has been fully substantiated & is accurate. There appears to be no consideration given to improving junctions with the major road system that the road between Five Oak Green & Tonbridge links into.

The existing road system during peak periods is often congested & the additional traffic both from & to the new development will exacerbate the current issues. The introduction of a new Secondary & primary School will lead to additional traffic from pupils attending the School from outside the new village development.

Noise, Light & Air pollution - Due to the size of the existing population within the Tudeley area there is very little noise, light or air pollution. This will not be the case once an additional 2,800 houses have been built together with the additional shops, offices & Schools that the plan refers to.

Loss of agricultural land - the proposed site for the new development currently consists of good grade quality agricultural land. Agricultural land has already been lost within the vicinity of the proposed development with land being allocated for additional mineral extraction / quarries. Recent experience has proved that once the material workings have been exhausted the quarries have been abandoned with very little landscaping / reinstatement works carried out & left inaccessible for local people to enjoy.

The extensive solar farm adjacent to the proposed village development that has been installed in recent years has also removed a large area of land from agriculture & has created a visual impact that is out of keeping with the general agricultural nature of the local area.

Both quarries & PV Farm have been created by the owners of the land that the proposed new village development is sited on.

Disproportionate allocation of new housing within the Capel Parish - It would appear that approximately 50% of the new housing requirement within this Local Plan has been allocated to this new Village Development which, bearing in mind the size of the current population of Tudeley & the

surrounding area, is disproportionate to the new housing numbers allocated elsewhere within the Borough.

This is not fair to the current inhabitants of the area whose needs have not been considered & who generally oppose the scheme.

In light of the foregoing matters, the proposed allocation of land at Capel/Tudeley must be removed from the emerging Local Plan, and an alternative, and more sustainable means of meeting housing and employment needs must be identified.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have just watched the video about how to comment on the local plan. Is this the means by which ordinary people are supposed to make comments on the decisions being taken about the places they live by people who, mostly, live elsewhere? It's complex, onerous, full of legalese, bureaucratic and off-putting, which is quite possibly the intention. All I wanted to do was comment on the proposed closure of Paddock Wood railway bridge to all traffic but buses and, presumably, the ambulances coming out of Eldon Way.

Currently cars travelling between Paddock Wood and Maidstone travel over that bridge. Traffic travelling between Paddock Wood and Tonbridge or Tunbridge Wells goes the other way, either up Badsell Road towards Five Oak Green or through Matfield to Kippings Cross and the A21.

If the bridge was to be closed then the majority of that Paddock Wood / Maidstone traffic would have to come down Badsell Road. Anyone who lives in Paddock Wood can well understand the consequences of that. At rush hour, in particular, the tailbacks at the Colts Hill/Badsell Road roundabout will be worse. Traffic will also tail back from the junction of Maidstone Road and Badsell Road in Paddock Wood. I see it every day as it is now. I can only imagine how much worse it will become if the bridge is closed.

Some traffic will probably also divert to using lanes like Lucks Lane and Queen Street.

I cannot imagine what the perceived problem might be that this proposal is intended to address. Whatever it might be, closing that bridge will end up causing even bigger problems in Paddock Wood.

TWBC should stop tinkering with our Town.

- 1 Having had a retail business on The Pantiles for 25 years, I am aware of how the lack of car parking has negatively impacted businesses in the area. I have no objection for flats to be built but would urge that all 52 car parking spaces are retained on The Pantiles. This is essential due to the reduction of parking spaces after the Union Square development (even when reopened) and the loss of on-street parking.
- 2 I welcome the improvement of pedestrian access to and within the Pantiles. In particular between the Upper and Lower Walks of The Pantiles. This could be done using improved signage to counter the effect of increased street furniture and parasols

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 19: Land to the north of Hawkenbury Recreation Ground

Map 19: Site Layout Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. I urge TWBC to stop the policy of selling off the land used by local football clubs and forcing their members to have to drive across the Town to Hubs for the following reasons:

- 1 Sports Hubs vs Local facilities add unnecessary traffic on Tunbridge Wells' roads. This policy is regressive and is counter to national and local policies regarding preventing pollution and protecting the environment.
- 2 Sporting facilities are essential to local communities and should be easily accessible to residents, rather than purely those that can afford to drive to the hubs some distance away.
- 3 Hawkenbury Village is already well served for sporting facilities, with the Hawkenbury Rec, with its football pitches and Astroturf. In addition, Hawkenbury hosts Forester's Football Club with its recently granted long lease for football pitches.
- 4 The roads and parking in Hakenbury Village were already overstretched before the 100's of new homes built in the Holyfield's and other developments. The recent residents parking zone has not increased the available areas for residents to park but just caused additional problems for friends and carers visiting them.
- 5 The junction at Halls Hole Road and Bayhall does not have the capacity to take an influx of thousands of extra cars arriving or leaving simultaneously from a stadium event. The access issue is not resolvable by changing the junction to a roundabout or road widening. The Bayhall Road is not only the access road for residents of Hawkenury Village, but a major road artery for those accessing Tunbridge Wells from the South. When, as is often the case, there are road works else in the town, and extra traffic is on Bayhall Road, the Traffic can back up to the HallsHole Road/Bayhall Road junction from the crossroads between Bayhall and the B2023 Pembury Road. This in turn can cause gridlock on the crossroads and access to Pembury Road/A21.
- 6 Many of the residents on the roads around the proposed site do not have driveways and rely on limited on-street parking,.Given the National rules banning the sale of petrol and diesel cars in nine years. Hawkenbury residents will be reliant on the electric charging points required in these streets to charge their vehicles to carry out their businesses and livelihoods. With this in mind, it will not be appropriate to have hundreds of non-residents cars using the limited on-street parking in the evenings and weekends caused by overspill from carparks.
- 7 If a stadium is to be built somewhere in the Borough, it should be in an area with good road links and the capacity to take peak influxes of thousands of extra cars, not in a village with congested roads and parking.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

The recent residents parking zone has not increased the available areas for residents to park but just caused additional problems for friends and carers visiting them.
- 3 I object to Tunbridge Wells using CPO's on greenbelt areas. The proposed site in Hawkenbury is adjacent to Sherbourne sheltered housing. It does not adequately consider the already congested roads and traffic junctions and the inability to protect the residents from the noise it will create, including late into the night
- 4 Sports Hubs vs Local facilities add unnecessary traffic on Tunbridge Wells' roads. This policy is regressive and is counter to national and local policies regarding preventing pollution and protecting the environment.
- 5 Sporting facilities are essential to local communities and should be easily accessible to residents, rather than purely those that can afford to drive to the hubs some distance away.
- 6 The junction at Halls Hole Road and Bayhall does not have the capacity to take an influx of thousands of extra cars arriving or leaving simultaneously from a stadium event. - 7 Many of the residents on the roads around the proposed site do not have driveways and rely on limited on-street parking, given the National rules banning the sale of petrol and diesel cars in nine years. Hawkenbury residents will be reliant on the electric charging points required in these streets to charge their vehicles to carry out their businesses and livelihoods. With this in mind, it will not be appropriate to have hundreds of non-residents cars using the limited on-street parking in the evenings and weekends caused by overspill from carparks.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 If a stadium is to be built somewhere in the Borough, it should be in an area with good road links and the capacity to take peak influxes of thousands of extra cars, not in a village with congested roads and parking.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Sandra Faulkner
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/HA 5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. The proposal to site a new Medical Centre in site 413 (AL/HA 5 Policy) is unsound and not compliant with planning laws surrounding building in AONB.

2. Birchfield Grove is not an appropriate road to manage unacceptable traffic flow should a Medical Centre be sited in the field to the north of Birchfield Grove and as such policy AL/HA 5 is unsound.

Submission 1. When the Pre Submission Local Plan was approved by the Tunbridge Wells Planning Committee early January 2021, the proposed medical centre was allocated to available land at the King George V (KGV) playing field at the Moor alongside the proposed new community centre (policy AL/HA 6).

There is ample land available at King George V playing field for both proposed buildings and also the required car parking. There is an existing community hall and sports facilities along with a childrens playground and offers both easy access by foot, bicycle or indeed car with an existing bus stop adjacent to the proposed facilities. The Parish Council would welcome discussion with the GP's to explore this possibility.

The new medical centre is currently proposed on a high ridge of over 200 feet in a field (AL/HA 5) that gently slopes down to the north from position of the proposed building and will be entirely visible. This will be more apparant and visible in the darker skies at night time when lighting will be required. This field is a very pleasant environment in an AONB with excellent biodiversity value.

Building in the AONB is permitted if the community interest outweighs the harm to the area. However, three conditions have to be met and this proposal fails the condition that there is no alternate available site. In this case there is an identified and available site at King George V playing field (AL/HA 6) as highlighted in the first edition of the Pre Submission Local Plan approved at the beginning of January.

This alternative site (AL/HA 6) is very accessible with ease of access by foot, bicycle, car and an adjacent bus stop for public transport. The land available is in a discreet location within the overall site of AL/HA 6 and having a proposed community centre and medical centre co-located meets with Tunbridge Wells Council's current policy whereby supporting (including a substantial grant) our local Cranbrook and Sissinghurst Parish Council in a mirror project as an example.

AL/HA 5, the land north of Birchfield Grove, as mentioned is in an AONB. It is currently part of a bigger site recently named as site 413 and historically as site 64. The landowner of site 413 has offered the two GP surgeries 0.79 hectare of the field (which is at its highest point) free of charge. It should be noted that in the DRAFT LOCAL PLAN site 413 was highlighted for a possible Medical Centre PLUS 100 houses. Both the Medical Centre and 100 houses were taken out of AL/HA 5 when the Pre Submission Local Plan was approved by the Tunbridge Wells Planning Committee in January 2021. We were informed that the withdrawal was due to AONB concerns plus a report suggested the new garden village at Capel was viable lessening the need for further development in Hawkhurst.

In February 2021 the Tunbridge Wells Full Council approved an amended version of the PSLP that located the Medical Centre back at AL/HA 5 or site 413 rather than AL/HA 6. I understand that the Head of Planning at Tunbridge Wells Council was informed by the landowner that the piece of land AL/HA 5 would be available to the GP's free of charge but this is not a reason to locate a Medical Centre in AONB nor should it be the "trojan horse" as the door opener for a further application to build 100 houses alongside the proposed Medical Centre,

There is history here. The landowner together with Ward Homes applied to build 100 plus houses in site 413 (AL/HA 5) when it was previously named site 64. This was turned down on appeal by the Inspector in 2014 on the grounds of spoiling the AONB, so what has changed since then - if anything planning laws for AONB have tightened?

Submission 2. Kent County Council has recently refused to support substantial planning applications in Hawkhurst until the traffic congestion caused by the crossroads in the centre of the Highgate district of the village is resolved. Recent traffic surveys undertaken point to traffic volumes at the crossroads well over capacity leading to large queues throughout the village and seriously poor air pollution due to the traffic queueing with engines running.

The GP's state in their promotional material that patients will walk or cycle to the proposed Medical Centre at AL/HA 5, the distance for most patients will be further than their current journeys and together with the topography of Hawkhurst it is more likely a car will be their preferred choice of transport. This will add further pressure on the crossroads and air quality as patients from the Moor sector of the village and also the western and northern side of the Highgate sector of the village are likely to use their car as choice of transport to the proposed Medical Centre,

The access road to Birchfield Grove is extremely poor both turning into Birchfield Grove and likewise off into Rye Road. The entrance junction is tight and cars turning into Birchfield Grove have to wait until any cars exiting Birchfield Grove turning right have joined Rye Road.

The site lines are poor exiting from Birchfield Grove and this section of Rye Road is notorious for speeding as it is the only part of Hawkhurst that the village Speedwatch programme does NOT monitor for some reason! Recent traffic surveys undertaken as part of planning approval for Birchfield Grove confirm that the 30mph speed limit is breached consistently and the average speed is nearer 40mph on most occasions with the result exiting Birchfield Grove is a lottery.

Indeed, while not suggesting speed was the cause, two children have been hit by vehicles in this stretch of Rye Road in the last 12 months.

It should be noted that a planning application for six bungalows in the field off Rye Road directly opposite Birchfield Grove was recently refused due to traffic difficulties accessing onto Rye Road from the proposed development. The access road was directly opposite Birchfield Grove.

The internal layout of Birchfield Grove is not conducive to managing heavier traffic volume. The road weaves or meanders in profile and is not the width to manage significant traffic flow.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of the Medical Centre and AL/HA 5 and explore possibility of locating in AL/HA 6 or alternative sites.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Respondent's Name and/or Organisation Helen Featherstone

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 9 Biodiversity Net Gain

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Swift numbers visiting the UK each summer have halved over the past few decades. One way we can help them is to provide nesting sites as they nest in crevices in buildings and many of these have been lost due to renovation or demolition. Tunbridge Wells is fortunate to have a swift colony and as a town we can support and encourage it. A reasonably priced and maintenance-free way to do this is to include swift bricks in the structure of a new building, obviously taking into account other aspects such as height and orientation of the building. Expert advice is available.

There is provision in the presubmission local plan, EN 9 paragraph 6.138. It is very disappointing that the Amelia Scott was built without any swift bricks. Sparrow terraces are included but there is evidence that while sparrows and other bird species make use of swift bricks and boxes, the reverse is not true, and swifts will not use sparrow terraces. Therefore I think the new plan should be more forceful in its requirement to consider provision of nesting bricks for swifts specifically, as well as other species, when any new construction takes place.

Protection of swifts - and other species- would also include a ban on the use of pesticides locally, since pesticides destroy their food source, which is insects flying above the town. This is a measure that has already been taken in other towns and cities including Paris.

I will email you with some further information. [TWBC: see attached document]

Thank you for your help and I'd be very grateful to be kept up to date with any developments.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 15 Local Green Space

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The landowners of Site Number 20 are in agreement with the representations of Rydon Homes, namely:

The proposed designation of this Site Number 20 as an LGS would conflict with Government guidance because:

- . Policy EN15 with respect of Site Number 20 is not positively prepared – Matfield is a sustainable settlement which is identified as having the ability to accommodate a level of planned growth. This site adjoins the Limits of Built Development, it has been promoted through the Council's Call for Sites as a potential candidate for development, it has been considered as one of only two potential sites for a replacement Primary School, and as such could in the future be a site for a sustainable expansion of the village.
- . Policy EN15 with respect of Site Number 20 is not consistent with national policy – the site is peripheral to the village with no public access. Whilst there is a public footpath adjacent to the western boundary this is not heavily used and is only for occasional recreational purposes. As such the sites designation fails the test of proximity. It is not local in character. It is quite at odds with the typical local character.
- . Policy EN15 with respect of Site Number 20 is not justified - the Council's benchmark for judgement on the extent of the land is at odds with Examiners decisions on this matter in NP Examinations. The land sought to be designated is an extensive tract of land. In addition, the Council has provided no evidence that the site is special in any way to the local community. The special amenity point overstates the wildlife richness on the site and in any event is not evidenced based by any studies.

For further detail, please refer to the full representations by Rydon Homes

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposed designation for Site Number 20 should therefore be deleted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The PSLP as it stands is likely to contravene Protocol 1, Article 1 of the Human Rights Act (The Protection of Property) and therefore is not legally compliant. Everyone has the right to peaceful enjoyment of their property. A Planning authority can only breach this fundamental right if it is in the public interest. Furthermore since the case of Britton vs SoS the courts concluded that the protection of the countryside falls within the interest of Article 8 (Respect for private and family life) and includes BOTH home and surroundings. There has to be a fair balance between the general interest and the rights of individual property owners and businesses. It may be necessary with some planning applications to compulsory purchase or to allow a certain amount of traffic noise to intrude a personal home but there has to be a fair balance. There must be objective and reasonable justification. The LA should try to ensure that policies and decisions do not interfere with the peaceful enjoyment of possessions. Human rights are clearly defined in law and Planning Authorities are obliged to treat everyone with dignity, respect and fairness. Proportionality is the key test.

There is nothing proportionate regarding TWBC allocating over 50% of its development on a parish which contains only 2% of the population of the borough. The rights of property owners and the rights of the community have to be balanced. There is NO benefit to this area, in these plans, for the existing community. The views of the community have been ignored from start to finish.

- . The whole of Capel will suffer from 15-20 years of severe disruption if this plan proceeds. That alone is likely to deter local businesses.
- . Capel will be significantly impacted by thousands of cars, traffic noise and pollution and the clear danger to public safety in a parish that already has severe speeding issues.
- . Capel will lose its precious countryside
- . The community has already suffered from severe stress and anxiety during the last two years with the threat of CPO's, and for some the impact of being suddenly being in the centre of a new town, for others loss of identity as they are threatened with being moved into an entirely different parish.

The community throughout Capel is strong and united. Five Oak Green might not be the exemplar of a quaint arcadian village but it is a close, tight and friendly community, which is more important than beautiful houses set in a sterile environment. People make places not houses. We are not Nimby's in Capel and are very aware of the need for truly affordable houses for our younger generation, suitable housing for our elderly and a share of development to bring economic prosperity.

BUT we shouldn't be the easy target for TWBC because we have a small population and they thought we wouldn't shout long and hard! Sadly they have ignored the shouting and objections at Reg. 18 and

rewarded us with another few hundred houses. Tudeley in particular was the easy option and deflected TWBC from its original course of a more equitable distribution of development amongst the rural villages. Capel has not been treated with dignity and respect throughout this whole process and a huge majority of the community will not be able to peacefully enjoy their properties nor the countryside surrounding them.

Due to the lack of objectivity, lack of proportionality, and lack of any community benefit the PSLP is unjustified, not positively prepared and therefore unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to objectively reassess all sites in the borough, work on their brown field register which is pitiful and find a more proportionate solution to the housing need.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because this has consumed my life for the last three years!

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because this has consumed my life for the last three years!

Future Notifications

Question 1	
Respondent's Name and/or Organisation	Maggie Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish

[TWBC: this representation has been input against Policies STR/SS 1, STR/SS 3 and STR/CA 1 – see Comment Numbers PSLP_1934, PSLP_1935 and PSLP_1937]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The PSLP as it stands is likely to contravene Protocol 1, Article 1 of the Human Rights Act (The Protection of Property) and therefore is not legally compliant. Everyone has the right to peaceful enjoyment of their property. A Planning authority can only breach this fundamental right if it is in the public interest. Furthermore since the case of Britton vs SoS the courts concluded that the protection of the countryside falls within the interest of Article 8 (Respect for private and family life) and includes BOTH home and surroundings. There has to be a fair balance between the general interest and the rights of individual property owners and businesses. It may be necessary with some planning applications to compulsory purchase or to allow a certain amount of traffic noise to intrude a personal home but there has to be a fair balance. There must be objective and reasonable justification. The LA should try to ensure that policies and decisions do not interfere with the peaceful enjoyment of possessions. Human rights are clearly defined in law and Planning Authorities are obliged to treat everyone with dignity, respect and fairness. Proportionality is the key test.

There is nothing proportionate regarding TWBC allocating over 50% of its development on a parish which contains only 2% of the population of the borough. The rights of property owners and the rights of the community have to be balanced. There is NO benefit to this area, in these plans, for the existing community. The views of the community have been ignored from start to finish.

- . The whole of Capel will suffer from 15-20 years of severe disruption if this plan proceeds. That alone is likely to deter local businesses.
- . Capel will be significantly impacted by thousands of cars, traffic noise and pollution and the clear danger to public safety in a parish that already has severe speeding issues.
- . Capel will lose its precious countryside
- . The community has already suffered from severe stress and anxiety during the last two years with the threat of CPO's, and for some the impact of being suddenly being in the centre of a new town, for others loss of identity as they are threatened with being moved into an entirely different parish.

The community throughout Capel is strong and united. Five Oak Green might not be the exemplar of a quaint arcadian village but it is a close, tight and friendly community, which is more important than beautiful houses set in a sterile environment. People make places not houses. We are not Nimby's in Capel and are very aware of the need for truly affordable houses for our younger generation, suitable housing for our elderly and a share of development to bring economic prosperity.

BUT we shouldn't be the easy target for TWBC because we have a small population and they thought we wouldn't shout long and hard! Sadly they have ignored the shouting and objections at Reg. 18 and

rewarded us with another few hundred houses. Tudeley in particular was the easy option and deflected TWBC from its original course of a more equitable distribution of development amongst the rural villages. Capel has not been treated with dignity and respect throughout this whole process and a huge majority of the community will not be able to peacefully enjoy their properties nor the countryside surrounding them.

Due to the lack of objectivity, lack of proportionality, and lack of any community benefit the PSLP is unjustified, not positively prepared and therefore unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to objectively reassess all sites in the borough, work on their brown field register which is pitiful and find a more proportionate solution to the housing need.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because this has consumed my life for the last three years!

Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph Number 1.26	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tonbridge BC, Sevenoaks BC & Wealden BC current Local Plans have been rejected by the Planning Inspector. How can TWBC commit to ANY new developments as they cannot reasonably calculate the housing requirement and infrastructure need. Maidstone BC has not yet submitted their Reg 19 Plan and their draft plan Reg 18 includes 2 new Garden Villages and may thousands more properties over a similar plan period.

All the above plans will place an excessive load on the current infrastructure in the whole of Mid & West Kent, far more than any KCC or TWBC Highways assessments has considered in the TWBC Plan.

Planning Inspectorate - Procedure Guide for Local Plan Examinations - Section 1.2 states:

"Particular attention should be given to the duty to cooperate"

TWBC has not co-operated as it has an unknown quantity and the impact upon the area MUST be considered in full. The documents do not reflect this at all. The plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC needs to consider the impact of housing developments in ALL neighbouring areas that have yet to be approved and reflect upon the impact of these thousands of homes on the general highways infrastructure.

Given how limited the options are within Tonbridge and Capel due to AONB, river Medway and railway lines crossing the area, these are very difficult to adequately resolve due to engineering difficulties

and their potential costs. s106 contributions alone will not fund this type of engineering and TWBC have failed to demonstrate where any additional funding will come from or even if the proposed highway infrastructure adequately satisfies need.

Traffic is not bounded by Boroughs but by need to travel of its residents and visitors.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I have spent many months examining the documents that TWBC have presented and they are so flawed that I feel I must be present to ensure the arguments presented are accurate.

Paragraph Number 1.1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

In the PSLP Page 13, it states that the plan period is 2020-2038. It is already 2021 and will be 2022 at earliest before the plan is approved and possibly 2023 before any works started. Given the delay to the plan, (potentially 3 yrs), the build program will need to be escalated to a minimum of 770 homes per year and the Highways infrastructure forecasts cannot therefore be met within a reasonable timescale as they rely upon completion of some of the proposed homes for funding. KCC is the overall owner of ALL public highways in Kent and given their lax attitude to highways improvements in Capel over the past 40yrs and there is no evidence this has changed or budgets committed prior to 2025 onwards, it is inevitable that the safety and wellbeing of the current residents of Capel, in particular Five Oak Green and those living on B2017, will be severely impacted for many years before any relief is in sight. This is an unsafe position which will violate our human rights to have a safe and healthy environment to live in and therefore the plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

If it were possible to revise plans and avoid any highways safety issues then we would advise revisiting the plan. However, Save Capel and Capel Parish Council, and their Consultants, have examined every detail of the plan regarding highways infrastructure and have proven the figures supplied by TWBC fall well short of the probable traffic counts and vehicle movements in the area. The PSLP promotes the building of new garden villages and estates in totally the wrong place. As such the PSLP is Unreliable and Unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The TWBC PSPLP has so many inaccuracies and false information that the Planning Inspector should be aware of these various issues. Residents in Capel have zero confidence in TWBC who we do not believe can be relied upon to offer clear and precise answers to questions accurately.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

2.33 identifies that to the north and west of Paddock Wood the land is “*particularly prone to flooding*”. The last major flood (2019) covered all of the area north of the railway line to a depth of almost 1m in places and generally to at least 0.75m overall. This link gives an indication of how serious it was.

<https://www.kentlive.news/news/kent-news/incredible-drone-footage-shows-flooding-3673436>

This is just one of several major floods experienced in the Medway Valley over just a couple of decades. In all cases serious property damage occurred and no amount of “ditch or drain clearing” has made any difference at all. In fact, by building even more in the Medway valley, the situation has worsened and so the next major flood may cost lives. Building another 30,000 homes in the Medway Valley is criminal. (TWBC 11k + Tonbridge & Malling Council 6.4k + Maidstone Borough Council (2 new garden villages) + developments already approved in Yalding.

The proposals to control flooding are quite simply ridiculous. North of the railway in Paddock Wood will require the movement of over 20 million tons of earth (brought in from elsewhere!) to raise homes in that area by 1m above current ground level.

The Plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Limit building in the Medway Valley to areas that have NOT experiencing flooding in the past 4 decades.

There are plenty of other sites that are brownfield, not in the green belt or simply away from the Medway Valley, but TWBC seems far too determined to destroy existing homes and then place new builds at risk of flooding too.

The original TWBC Call for Sites identified sufficient areas around the various parishes of Tunbridge Wells Borough to avoid any risk of flooding and to meet the housing need targets. TWBC, quite by surprise to Capel Parish Council, chose 2 sites for 95% of their targets in the full knowledge that flooding was a major issue.

The whole plan is Unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

TWBC cannot be trusted to reveal the truth about the sites they have chosen, and the ones they have deliberately crossed off as being unsuitable. Too much data is inaccurate.

Eg. Our plot (which we offered for building just 3 houses) is 200m from the railway line and was considered unsuitable as "too close to the railway line". By contrast, the proposed Tudeley Garden Village of 2,800 homes has a railway line running through the middle of it that takes diesel trains almost hourly and nuclear waste from Dungeness power station, yet that site is considered a perfect location. The Plan is utter nonsense.

TWBC consultants claim that there are NO diesel trains on that route to pollute the air. That is a clear demonstration of how little the consultants actually researched the facts to form a conclusion which is totally inaccurate.

One Capel Parish Council Councillor is a train driver on that route. I think his word is more reliable than those of desktop consultants.

What is even more annoying is that TWBC paid for that consultation out of our Council Tax funds, adding to their recent money wasting projects that they are more than a little embarrassed about.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

There is no sustainability in the proposals regarding Tudeley Garden Village, Capel Parish East and Paddock Wood West as the destruction of animal habitats and the impact upon the heritage in the area is totally unsustainable.

The PSLP is Unsound.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 5 clearly states "New residential and commercial development will be supported if sufficient infrastructure capacity is **either available, or can be provided in time to serve the development**," The PSLP fails to support this policy as most of the infrastructure necessary to support the proposed developments will not be started until a number of years after significant numbers of dwellings have been occupied. No up front funding is being made available either and so the PSLP is Unsound.

Similarly, as the infrastructure relies upon two major developments being constructed in tandem to release funding for the infrastructure, there is no guarantee that such funding will be available as planning application delays on one site alone can seriously impact ALL infrastructure. This has not been considered in the PSLP.

Therefore the PSLP is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

One solution is to use the public purse to allocate funding for ALL major highways infrastructure prior to any developments commencing, but this has a critical point of failure in that it will only require a single developer to delay start of works or withdraw their application and the whole plan is liable to fail or only be partly built. This is a serious risk that is not considered in the PSLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted. It is important that proper debate takes place.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

How does building an isolated new village at Tudeley fit with this policy when the majority of residents will not work in Tudeley? New residents will mostly already be employed elsewhere with a good salary and changing jobs could create mortgage problems for most potential property buyers. It is also questionable when the proposed new "industrial" workspace will be created at Tudeley as we have no timetable for the development except this broad figure of 2022-2038.

This policy is poorly thought through and is Unsound with regard to Tudeley Garden Village.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A far better alternative to TGV is to build a new village adjacent to the Kingstanding Business Park on the A21 at Castle Hill which has just been approved by TWBC for 85 hectares of warehousing and B1 industrial. This is also just 1 mile from the Tunbridge Wells new hospital where staff are desperately looking for property and there are cycleways and footpaths already linking these sites which also link to the railway in Tonbridge.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted. It is important that proper debate takes place.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 6 Transport and Parking	
Page 60 Policy STR 6 (c) (iii)	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The KCC & TWBC approach to road building in west Kent has for decades been an “after current budget period” item and nothing has changed here. TWBC in 2003 announced a “park and ride scheme” to solve all the issues in the Tunbridge Wells town but this has never been implemented and all sorts of other tricks have been announced and then dropped, wasting our time and money.

Colts Hill was first designed in the 1970s and changes to the plans made through to 2000 but always the excuse of “no current budget” was the KCC stance as they are the budget holders and NOT TWBC.

Jam tomorrow but in reality it is traffic jams today!

The latest proposals are to build half the bypass and join it to a new Five Oak Green bypass but only if Tudeley Garden Village is built.

If we consider the disruption in the area, particularly along A228/B2017/B2160 and various country lanes in Capel and Paddock Wood used as rat runs to avoid congestion whilst all these proposed works are ongoing; then add the 3 current estates being completed now in Paddock Wood (approx. 1500 homes) to the traffic nightmare, we soon discover that the PSLP will bring 25 yrs of total disruption to the area and actually drive business away instead of attracting it.

STR 6 states that FUNDING will be via development. Unfortunately, this cannot work as the development will only occur or be attractive to developers if the infrastructure is already in place. STR 6 is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Do not build houses where there is no infrastructure already in place and avoid areas that will suffer immense and long term disruption. If you need to build new garden villages then do so where major new highways already exist or are already close to the Highways England major roads network.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It appears that KCC & TWBC have reached no agreement at all regarding the potential Colts Hill bypass and the Five Oak Green bypass. The 2 companies used to examine the potential routes, David Lock Associates (main PSLP) and Stantec (Infrastructure Delivery Plan) do not even agree where the Five Oak Green bypass terminates on the existing B2017 or even the route it takes.

The PSLP approach is misleading, unclear and therefore unsound & unacceptable.

Map 29, Page 150 shows "improvements" to the whole of A228 Colts Hill plus the line of the proposed all off-line Colts Hill bypass, but then only to be developed for the northern section.

Maps 33 & 34 Page 164 & 165 the Five Oak Green bypass joins B2017 outside the school, whereas the Stantec plan shows the FOG bypass joining at the Alders Road/B2017 junction.

The funding situation is even more misleading. Policy STR 6 Page 59/60 c) states the new road will be "funded by development, although other funding opportunities will be investigated". What does this mean? TWBC state that if Tudeley Garden Village is approved then the FOG bypass will go ahead; yet it is clear that this has to be funded from somewhere and currently KCC & TWBC simply do not know or have not declared it.

The issue to then consider is that if Tudeley Garden Village is delayed or reduced in size, what happens to the potential funding of the FOG bypass? Again, it is unclear.

Now turn to page 469 of the PSLP. 6.577 – *The whole scheme (Colts Hill bypass) is not necessary to mitigate the impact.* This is utter nonsense. There is no actual evidence to support this. However, it is surely reasonable to consider that if you currently have both KCC & TWBC trying unsuccessfully for 43 yrs to fund a complete Colts Hill bypass, then one MUST assume they both consider it an absolute necessity (or it could be due to complete incompetence but we are not here to test that one!). If we then add the traffic from 1,600 homes currently being built in Paddock Wood to an already overloaded Colts Hill (the ONLY "A" class road in Capel Parish), plus the expansion to Paddock Wood industrial area that has been taking place for the past 40yrs, it is quite clear that a complete Colts Hill bypass is now an overdue project. The safety record alone is clear.

Now let's consider the B2017 through Five Oak Green. In 2016/17 local residents and Capel parish council (total at the time around 1,500 population) submitted a petition to both KCC & TWBC with 1,127 signatures demanding action regarding road safety and traffic calming measures on B2017 through Five Oak Green. (children were hit by cars, a dog being walked along a pavement by a lady with a pushchair was killed by a lorry etc etc). Capel Parish Council also undertook a £6,000 highways study to demonstrate the need for traffic calming and promote ideas to KCC.

The result is ZERO. We currently have zero traffic calming measures in Five Oak Green. No pelican or zebra crossings, no traffic islands, no roundels, no red tarmac, very narrow road and in some instances no pavements, blind bend and a 205 pupil primary school where lorries drive with wheels on the pavement to pass the parked cars. It took 8 yrs to get the speed limit reduced from 40mph to 30mph outside the school and despite TWBC now having 20mph in all of Tunbridge Wells town, we have nothing.

TWBC refused to register our properly informed petition and KCC wanted 10,000 signatures before they would accept it. We still have NO traffic calming at all and another child was knocked down earlier this year.

All these words about bypasses and yet it is obvious that the funding is not there and KCC (who run all of Kent Highways NOT TWBC) do not have any idea of when any new roads will be started, (let alone completed!) except it will be years AFTER the houses are built and our roads are clogged with developer's HGVs and others from the newly opened quarries in Capel.

If standard safety evaluation applications are applied to the data, children will have been killed in Five Oak Green on the back of this PSLP. The case against the PSLP is far too strong for it to be promoted any further.

DO NOT LET THIS CARNAGE TAKE PLACE. REJECT THE PSLP.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I think the above comments are sufficient. If TWBC would like to pay me the same daily rate as their consultants then I would be quite happy to help.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am the co-ordinator of the Kent Police Five Oak Green Community Speedwatch team, I am responsible for the Capel Road Safety Campaign (stalled due to PSLP) and have lived in Capel and Paddock Wood for 38yrs. (27 in Five Oak Green). I believe I have the ability to assist.

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 6 Transport and Parking	
Paragraph Number 4.98	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paddock Wood is mainly a distribution centre and many salaries are unlikely to be high enough to afford mortgages on a good proportion of available properties within the plan. It is unsound to assume residents will take local jobs and many will be commuting to London or elsewhere. Currently, many of the employees at the vast Transfesa distribution/warehousing area of Paddock Wood commute from other areas of Kent & East Sussex where property prices are much lower than in the TWBC area.

There are too many assumptions and therefore this policy is Unsound.

It is also worthy of note that the current Foal Hurst Wood development in Paddock Wood is being advertised in the Hong Kong press for those seeking UK homes.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Build new housing where the need is greatest and mortgages are within reach of local salaries, NOT in areas such as Tudeley where the estate will likely become elitist and unaffordable to many unless they commute and add to the already overloaded roads and railways.

At Tudeley in particular TWBC has, for ease of management, wrapped its arms around a single developer without considering the actual needs of the community.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted. It is important that proper debate takes place.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel
Paragraph Number 5.189

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The suggestion here is that the southern section of Colts Hill bypass will be held back for a number of years whilst KCC/TWBC assess the need following the completion of the Five Oak Green bypass and northern section of A228 Colts Hill bypass. This can only be described as rather lacking as the works required to build the northern section of A228 and junctions within it for Alders Road and Crittenden Road will all require substantial funding and these cannot be ignored by not building the southern section of the A228 bypass as the disruption to build this in later would prove unworkable due to the level of traffic using the new road.

It appears that KCC and TWBC do not agree what the correct solution is and this really is unacceptable and makes the whole A228 Colts Hill bypass project Unsound.

We also note there is no mention of road safety whilst all these works are ongoing or the health of those living on top of the A228 & B2017.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We would suggest that the whole issue regarding Colts Hill bypass and Five Oak Green bypass be revisited urgently and a more definitive solution be found that includes protection of the currently built environment and its residents.

Five Oak Green appears as a blot on TWBC's landscape and the residents are sick of hearing all the promises about bypasses and traffic calming. We daily see HGVs thundering through our village (53mph recorded by our local Speedwatch team) with narrow pavements, no controlled crossing points and no help to reduce the traffic speeds from KCC or TWBC. We are not even allowed traffic islands to cross the road as the road is too narrow.

HGVs mount the pavement by Capel Primary school at drop off/pick up times as they cannot pass the string of parked cars belonging to parents.

Any solutions agreed by KCC & TWBC should be properly discussed with full Capel Parish Council and other directly interested parties. To date, the representations to TWBC Joint Transportation Board have fallen on deaf ears.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted or missed. It is important that proper debate takes place.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

Paragraph Numbers: 5.218 and 5.219

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.218 New railway station – TWBC has rejected sites within their “call for sites” as they were “too close to the railway line”. Tudeley Garden Village has the main London/Ashford/Dover railway running through the centre of the site. How can this be approved when there are hourly diesel goods trains and the Dungeness Nuclear Waste train (once per week) along this line. The plan to build TGV is Unsound.

5.219 How will TWBC test this detail? How can they measure this? It is waffle. Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

5.218 As we cannot remove the railway then we must remove Tudeley Garden Village from the Plan.

5.219 As the whole issue of measuring damage elsewhere is unmeasurable then this cannot be modified. It is a nonsense statement.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted or missed. It is important that proper debate takes place.

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Besides the issues regarding water dispersal into the Medway Valley; there are major issues regarding habitat management. You cannot tell birds and wild animals to move home whilst you destroy their habitats and then move them back into a land which will be an unfit habitat with cats, dogs, children, noisy vehicles, street lighting and traffic.

The whole of the Tudeley area is a special area for wildlife, particularly as it is bordering AONB and within the beautiful Medway valley. To concrete over this landscape is obscene, unjustified as there are other options elsewhere, and will cause long term damage to the local wildlife environment.

The plan is Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Build at Castle Hill instead. TWBC claims about it being AONB and protected seem to have been totally ignored when they released AONB land bordering Castle Hill for the Kingstanding Business Park in March 2021.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted or missed. It is important that proper debate takes place.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Page 7. 1.7 TWBC has commissioned LUC to provide independent advice on the impact on the purposes of the Green Belt. Over the last 3 green belt studies produced by LUC it is apparent the brief was to gradually find ways to make it possible to remove greenbelt status from the strategic sites. Original policies by TWBC confirmed in their view it was vital to protect small towns and villages from urban sprawl – LUC have now in GB Study 3 concluded that the NPPF only refers to large towns and as this area is not next to Tunbridge Wells the MGB criteria is dispensable. This does not smack of independence. It appears too that DLA were also commissioned to make “the hat fit” Their brief was ‘to ensure that the infrastructure requirements for PW and East Capel reflect, and influence the work undertaken on the PW and and E.Capel Structure Report and Plan”.

Page 20. “This should include the provision of an offline A228 strategic link”.

This has not been considered important enough for 40 years. To build it on the back of some 6,000 new dwellings means it will be obsolete before it’s even completed.

Page 24

4.19- 4.230 Refers to the Church Farm estate being developed at present in PW by Countryside. Mascalls Farm (now called Foal Hurst Green) by Berkeley Homes and Mascalls Court Farm by Persimmon. Mascalls Farm has now had a planning application approved for an additional 100 dwellings - a 35% uplift. (It is likely the other developers will follow suit) If this is applied to Capel and Paddock Wood, the new developments will stretch from PW to Tonbridge engulfing Five Oak Green in one urban area. The total would be nearly 9,000, nearly 100% of the whole of TWBC requirement during the plan period. (It must not be forgotten that Hadlow Estates were happy

to extra land in the AONB to the south of Tudeley New Town for another 1200 houses). Once the erosion of the MGB is started there will be no stopping.

Page 30 4.39 The FOG By-Pass is totally dependant upon Tudeley being built.

Page 31. 4.41 The AONB to the S. of Alders Road can be ignored and the by pass driven through ancient orchard BUT the AONB at Castle Hill, a much preferred site by Capel Parish Council and many others, cant be built on because it is AONB (scruffy AONB as well!) This AONB has also suffered from the dualling of the A21 and TWBC were unanimous in agreeing that the adjacent site be approved for their key economic area.

Page 31 4.42 It seems the planners have no comprehension of Colts Hill. Most accidents occur at the junction of Alders Road and Crittenden Road. The original design for the Colts Hill by pass proposed a flyover from Alders to Crittenden, now the plan is to join the new link road into the main by pass by a cutting running into the AONB. It appears Stantec have pulled together a very rough and misleading design. A roundabout outside a school at the other end?? Pollution? Parent parking (yes they'll drive!)?? Very ill thought out.

Page 31. 4.42 A lack of understanding about the word “Capel” which TWBC have been informed about many times throughout the LP process. With the exception of the eastern end of the B2017 (where 220m is in PW) the whole of the rest of the B2017 westwards is within Capel. The Woodgate Way roundabout (junction with the A26) is in Capel.

Page 32. 4.45 East Capel may have been moved by TWBC planners, but East Capel starts from the East of Five Oak Green. The A228 is not the boundary of E. Capel.

Page 35 4.50 *The route connecting PW – Tudeley- Tonbridge is very hostile to bicycles.* Quite, and yet Stantec and SWECO talking a massive reduction in car use.

Page 40 4.74 This is an understatement. In FOG there is a single 250mm fibre pipe that pumps all effluent (around 500 homes and businesses) at pressure 3m underground to PW treatment plant, the pipe is old and has exceeded its lifetime Expectancy (source: Southern water) It is in need of replacement and works in the area are likely to cause significant disruption to any construction in E. Capel. The pipe has burst at least 9 times causing sinkholes, pollution above and underground & within the drainage ditch system that feed the Medway.

Page 44. Companies may have changed their operating methods but there is no evidence that the “built environment” is being reshaped due to the pandemic especially as this observation was made before the second lockdown.

Page 61 4.139

Mineral extraction in Capel. This has been very lightly touched on yet it fails to recognise the significant impact of extracting 10m tons of gravel per annum for 20yrs. The dust during the extraction process and then the huge 7 ton dumper trucks carrying the materials 600m across a site to the sorting area will impact many properties in Capel. HGV movements on the A228 are estimated to be around 80-120 vehicles a day – to date I have found no reference in the masterplan or PSLP that shows safe access points across the A228 with this sort of traffic considered.

Page 62 Given the strategic sites are in both in flood prone areas, surrounded by flood plain areas, in the MGB, adjacent to AONB served by rural lanes in the main this is probably one of the least sustainable areas in the borough and most constrained unlike the NE corner. Although the A228 has some capacity, the Dampiers corner roundabout is the busiest junction in the borough (SWECO) and is also a designated IA (Important area) DEFRA for noise pollution as is the Whetsted part.

Page 63 Cross boundary solutions? Where is the evidence that this is likely to happen? Why would neighbouring boroughs share infrastructure and flood alleviation schemes. KCC is the flood and highways lead and to date there has not been an accurate study of the flood issues throughout Capel. Sound solutions to the Colts Hill by pass have not been found for 47 years and there is no evidence to support this PSLP that funding has been sourced.

Page 68 Map. Where did DLA obtain their maps. It is Capel not Chaple Grange. They were informed of their misuse of names at their presentations but neither they nor TWBC have corrected. The map shows a pedestrian route crossing the A228. There is no crossing. There is a 100m section to walk along the A228 to reach the next PROW. It is unsafe, with 60mph vehicles and will be more so with the quarry traffic and the thousands more cars these developments might bring.

Page 71 TWBC and Hadlow Estates realising the secondary school was unsustainable being next to Tonbridge (compared to TMBC) the developers at PW (too far for their students to travel and therefore their sites become unsustainable), it is place near the primary school. To then decide to put a major junction (by pass roundabout) anywhere near these schools is dangerous, and totally unacceptable.

Page 73 Development should not be allowed to interrupt or dominate views across the landscape is a good sentiment but does not accord with siting thousands of homes on the edge of the AONB, on a slope at Tudeley and on the other side of Capel where the view from the AONB will be altered forever.

Page 79 Misleading maps that show bridleways as cycling and pedestrian routes. The language used suggests they exist already. They do not and they will need changing by statute as cycling is prohibited on bridleways.

Page 88 5.45 States that raised platforms will be needed of approx 1m around 11ha of the development in E Capel to ensure floodwaters remain outside the residential area. This would require 10,000,000 cubic metres of soil. Even at the cheaper price of £20 per ton, the cost would be in the region of £22m

before construction costs. The result of course would be to drive water elsewhere and flood other areas – as stated in other documents down to the Medway (and thence to E. Peckham & Yalding)

Page 107 6.7 The 2015 Infra. and Highways model is being ignored. As TWBC have changed their policy regarding use of MGB land there can be no assurance that anything within their LP will be built.

Page 108 6.13 If the Colts Hill by pass is essential to the LP, why is this separated out in the infrastructure plans as just the northern portion of the improvement on the A228? It states in 6.14 that KCC has the scheme costed at £46m yet this is not within their Highways budget for the current period to 2025. At the earliest it would not be completed until 2030 and possibly later if they did decide to build. 6.14 There are major drainage issues on Colts Hill and a new road is likely to increase the already unacceptable flooding in Five Oak Green.

Page 109 The entire page demonstrates that TWC and KCC have ignored the necessary improvements to Colts Hill for so long that they now face a major issue with timing and delivery of any solution. The impact on all the roads in the area of building a by pass later than 2023-25 is that they will have to build the whole project off- line and even then there will be capacity issues on the A228/B2017. They must look towards a new road that joins the A228 to the A21 at the Hop Farm and runs through the Medway Valley. The original bypass is outdated by 40+ years. This could have a junction near Hadlow and significantly reduce traffic levels, accidents and costs elsewhere. This would be a sensible and progressive solution. This road could also accommodate the Quarry HGVs for the planned extraction period of 20 years

Page 110 6.22 Agree with the statement “contributes largely to making the proposals unviable.

Page 120 Big error! This shows the hamlet of Capel NOT the main road running through Five Oak Green! The text compounds the error by saying it's the B2160 through Five Oak Green when in fact it's the main Maidstone road in Paddock Wood. Appalling

Page 121 Fig 24 Speed limits are wrong and highlights that this has been a rushed desk-top study. The inclusion of a major roundabout outside a primary school is utterly ludicrous.

Page 122 6.39

This is unsound. In pW of the 3 new developments currently approved and being built, a whole new drainage system has had to be installed, post development, to meet demand that was not considered necessary when the applications were approved. Should the same approach be adopted in E Capel then the house will be flooding before the estate completed.

Page 124. Table 9 *Construction (Colts Hill by pass) is likely to take place as the site is being built out.* This is not a sustainable option – a bicycle travelling on Colts Hill at present brings the whole area to gridlock – with construction of the dwellings at the same time as road closures, it is likely there will be severe economic impacts – companies will take their business away from the area. Colts Hill is also the main route for ambulance traffic between Maidstone and Pembury and they leave and return to the make ready depot in Paddock Wood.

Page 124 Table 9 Providing high quality active travel & public transport connections EARLY is not possible if the roads haven't been built to accommodate the buses! There is therefore unlikely to be any modal shift in travel habits.

Page 125 6.53 This masterplan excludes Tudeley village. There is no “helicopter” perspective without including Tudeley in one comprehensive masterplan of the strategic sites. TWBC is likely to lose control over many aspects of the masterplanning if this plan is taken forward. The several individual developers at PW will not adhere to this masterplan nor will Hadlow Estates calling in to question deliverability.

Page 126 6.56 6.57 These two statements are evidence that TWBC intends to approve any/all site expansions in the area above those already approved, so they can support the new critical infrastructure elsewhere through S106 agreements. If developers do not wish to build more than current, the whole infrastructure plan is likely to fail through lack of funds. TWBC is trying to underwrite the funding of infrastructure development that they can not guarantee they will receive. What is the mechanism to force developers to roll out the build in phases that suit critical infrastructure construction? “Land banking” is a major issue throughout the UK and again how will TWBC enforce the roll out of developments?

Page 130 Table 10, Long. Phase 3 is beyond 2032. It is clear there will be no highways improvement schemes adopted at least beyond 2032. How does this tally with the fact that this infrastructure is

either essential or critical. Independent highways consultants have concluded that it must be commenced prior to any build out of developments and for example the B2017 would be unable to manage the construction vehicles without vast “improvement”

Page 130 Table 11. Confirmation that the whole of Capel (and Paddock Wood) will be disrupted with construction works of dwellings and roads for many years. It has to be assumed that it will be some time after 2040 before the A228 and Five Oak Green by passes are completed. Confirmed by the HoP at a meeting of “15 – 20 years of disruption” and “Colts Hill is “likely to take considerable time to build”

Page 134 “Traffic management in PW” Medium. We assume that Medium means that Five Oak Green, so desperate for traffic calming measures already, will see no investment in highways until at least 2032. We will not be holding our breath as we will be too busy attending to people knocked down in the village!

Page 139 6.78 “Safety improvements at Colts Hill have been retained as the A228 is a key route for Paddock Wood traffic to access the wider strategic road network.” This is inaccurate. They have retained half a by pass and not the area where there are multiple RTCs (Crittenden/Alders junction). The A228 is a key route for some HGV drivers but most they can legally drive on the B2017 to reach the the A21 and Tonbridge (and vice versa) as it is 2.4 miles shorter in distance, does not involve Colts Hill where many delays can occur and the other many delays on the A264 accessing the A21 at Pembury where long queues format the traffic lights and 2 roundabouts before they join the A21. The by pass needs a re think anyway – it is a road to nowhere as TWBC & KCC Highways have found it impossible to find a solution to this bottleneck at Pembury.

Page 140 Table 14. Infrastructure not commencing until 2025 -2032?

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The masterplan is unsound, it is not justified. It has not been based on proportionate evidence. It is littered with inaccuracies, which if translated into further evidence bases means this plan is undeliverable. A reassessment of a more proportionate allocation of sites is called for. It is clear that deliverability of key infrastructure will not be “I before E” (expansion) – an assurance from our MP Greg Clark. To pretend that both strategic sites will follow garden village principles falls at the first hurdle – those successfully rolled out such as Poundbury are all situated on A roads. An isolated new village would be possible if in the wilds of Scotland perhaps but NOT in Kent which has the highest car ownership in the UK, suffers from high levels of HGV traffic from the continent and is already gridlocked at peak times.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As previously stated

Future Notifications

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

Policies Map (Inset Map No(s)) 33 and 34

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The main challenge for highway design is to provide a safe, efficient, future proofed and effective solution. The highways plan being promoted by David Lock Associates fails to do this and is Unsound. Map 33 illustrates the main errors that the new Five Oak Green bypass terminates outside of two schools and does not offer relief to rat running on Alders Road/Crittenden Road as the proposed bypass route will be longer and slower due to the number of junctions being introduced.

There is no recognition of the B2160 south beyond Paddock Wood which is the most direct route to the dualled A21 at Kippings Cross through Matfield. As the junction of B2017 & B2160 in Paddock Wood will become clogged with traffic (due to the railway bridge being closed to through traffic in Paddock Wood), many drivers will use the Matfield route to A21 via the back roads of Paddock Wood to avoid the B2017/B2160 junction.

The whole roads layout does not reflect the traffic levels that will be seen throughout the area.

The plan is therefore Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I am not paid to find the solutions that TWBC contracted consultants are supposed to offer as workable and effective solutions. I do of course offer my services at £1,250 per day (plus expenses) if TWBC wishes to recruit me, subject to the usual Ts & Cs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 1

Respondent's Name and/or Organisation Jeff Fenton

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish

Paragraph Numbers: 5.261 and 5.263

Page 174 STR/CA 1 (4.)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.261 ignores other hamlets within Capel Parish. These are: Crockhurst Street, Whetsted, Sherenden, Postern, old Capel hamlet (Alders Road) and East Capel along B2017 towards Paddock Wood.

5.263 fails to acknowledge that flooding is a regular occurrence in various parts of the parish due to the Alders Stream overflowing. The general amount of water that flows across the land from the higher levels to the south of the parish causes major problems. The river Medway can back up and flood areas to up to a metre of water to the north of the railway line in East Capel where a huge number of houses are proposed in the plan. No amount of flood prevention to date has stopped the flooding and this century has already seen many properties damaged and lives ruined. Desk top studies do not identify the real issues regarding flooding in this area and most of the data set is based upon figures for Paddock Wood which the EA admits that relatively handles 30% less water than Five Oak Green.

Page 174 STR/CA 1 4. It seems that TWBC is attempting to dismiss the seriousness of the flooding in the parish by providing compensatory improvements to the green belt. The flooding is caused by the weight of water flowing from within the AONB to the south of the parish and NOT from areas of green belt to the north of Five Oak Green which flood as a result. This statement is very misleading.

The flood alleviation/mitigation schemes in the Plan are Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Do not build on flood zones when there is other land available elsewhere within the borough of Tunbridge Wells.

Capel Parish Council were discussing with TWBC some additional housing within the parish, namely 440 homes within Five Oak Green, but this was withdrawn by TWBC when the Tudeley plan was revealed at a much later date.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted or missed. It is important that proper debate takes place.

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish
Page 174 STR/CA 1 (6.) (b.)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

b. open space, sports, and recreations facilities, including improvements to the football pitches at Five Oak Green Recreation Ground.

This item is a very clear example of just how little effort TWBC made to understand the issues in Capel parish and the main village of Five Oak Green. We do not have multiple football pitches. We have just one. It is maintained by Capel Parish Council and does not require any additional funding.

It should also be noted that in one of the plans for sites within Five Oak Green, the detail shows that TWBC have allocated building all over the recreation ground & allotments where we have a new play area (£130k sourced by a local charity with NO support from TWBC), recently revived cricket club with restored pavilion and a Multi Use Games Area (MUGA) installed in 2018 at a cost of £79k and of course the Capel Community Centre.

The PSLP is therefore Unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A good start would be to actually acknowledge what we currently have in Capel parish and then discuss with the various clubs and societies what we would like to see in the future. This should have been discussed prior to the publication of the PSLP. It was not and therefore the PSLP is Unsound

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As an Honorary President and one of the founders of the revived Capel Cricket Club which has in excess of 150 members from the local community, any discussions regarding Capel should have included those who actually complete many hours of voluntary work within the community. There is NO evidence this has been done and so our voice needs to be heard at any examination hearing.

Question 1

Respondent's Name and/or Organisation Jeff Fenton

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish

Paragraph Number: 5.264

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This whole section is disingenuous as it ignores the various issues with transportation in Capel. The Rural Lanes are very busy rat-runs all day and have a very poor accident record with many "near misses". The buses do not run beyond 7.15pm and not on Sundays.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The plan needs to reflect the actual facts and not just vague descriptions that suggest the bus services are running 24/7. They are not.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. Yes, I wish to participate in hearing session(s)
--	--

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As lead for Capel Road Safety Campaign and Co-ordinator for Kent Police Community Speedwatch, I have a good and realistic knowledge of highways in the area and the many issues that the PSLP has highlighted or missed. It is important that proper debate takes place.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BM 1 The Strategy for Brenchley and Matfield parish

Paragraph Numbers: 5.494 and 5.5

[TWBC: This representation has been input against Policies PSTR/BM 1 and AL/BM 1 - please see Comment Numbers PSLP_893 and PSLP_895]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This site at Coppers Lane/Maidstone Road Matfield is approx. 2.88 hectares. The number of dwellings approved by TWBC in a recent application is just 45, whereas if the standard 30 dwellings per hectare is used then there should be approx. 86 dwellings on this site. A similar site just across the main Maidstone road from this site achieved a very much greater number per hectare.

The alleged 40% affordable homes appears to be a very much exaggerated figure as the cost of these properties will be well above what any person on average or possibly medium salaries could ever afford.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

If we are to respect the need for improved numbers per hectare on all sites as large as this one, TWBC needs to explain why that is not the case for this site? Compare this to All Saints Church at Tudeley, recognised as one of the most visited country churches in the UK with its Marc Chagall windows and surrounded by open countryside, yet on their doorstep they will have 2,800 houses and a view of a primary school. It really is disgraceful.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I think we deserve to see fairness in the system and this site does not respect a fair number of homes for the size of site.

To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 9 Biodiversity Net Gain	
Paragraph Number 6.132	
Question 4	
Do you consider that the Local Plan:	
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

6.132 "The objective will be for all development to contribute towards delivering net gains for nature so that biodiversity across the borough as a whole is improved by the end of the plan period, and the existing network of sites and habitats is protected and strengthened with the retention and creation of robust, well managed green infrastructure".

There is no evidence that the two strategic sites will CONTRIBUTE towards delivering net gains and IMPROVE biodiversity across The Borough. The study conducted by the Durrell Institute last year across the four councils (one of which is Tunbridge Wells) who have adopted early 10% net biodiversity gains, indicates that these Councils have not achieved the goal. The introduction of thousands of domestic pets into two areas of countryside in itself will be hugely destructive.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

EN 9 To at least keep some balance with the natural environment the ownership of cats and dogs would need to be prohibited. Even with this measure it is unlikely that 10% net gain in biodiversity would be achieved with large new town. Smaller proportional development would allow for organic growth around existing settlements without the massive displacement of species as is already being seen in PW with unprecedented sightings of deer etc A few bat boxes is unlikely to cut the mustard especially in Capel which has a fantastic array of flora and fauna at present. The plan is therefore unsound as Development Management Policies and strategic policies are not deliverable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

For reasons previously stated

Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 13 Ancient Woodland and Veteran Trees

Paragraph Number 6.170

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

6.170 The Council will seek to prevent loss of, and to enhance, woodland cover, working proactively with woodland owners and relevant organisations to bring woodland back into management where possible. In the absence of site surveys and detailed assessments, the Council will assume a buffer of 25m from the edge of the woodland,

The route of the proposed FOG By Pass appears to run within a few metres or even through an

Area of ancient woodland. Moving it in either direction north or south would then have significant impact on the listed buildings either side.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

EN 13 The route of the FOG bypass if taken forward needs far more consideration as to its route. The Parish Council suggested that new thought should be given to a by pass for the whole of Paddock Wood and Five Oak Green. Possibly starting well north on the A228 and running into the A21. This needs to go back to the drawing board for a complete rethink. It seems odd that the much vaunted "virtually carless" Tudeley new town where all needs are catered for so everyone can walk or cycle warrants a by-pass!! This has contradiction has not been explained in the evidence base. As such the plan is unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 25 Flood Risk	
Paragraph Numbers: 6.276, 6.277, 6.279 and 6.280	
Question 4	
Do you consider that the Local Plan:	
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

6.276 In accordance with the NPPF, the Council is committed to managing flood risk from all sources, including wastewater, in the borough, taking account of advice from the Environment Agency, Kent County Council (as the Lead Local Flood Authority), and the Medway Internal Drainage Board.

Five Oak Green and many other areas of Capel still flood. TWBC and KCC have achieved nothing to reduce the flood risk except tinker around the edges cleaning ditches and drains. The last serious flood was as recent as February 2020 when areas such as the hamlet of Capel and Hartlake/Tudeley Hale flooded as well as the main settlement. The road from Tonbridge to Paddock was closed the length of Capel by the police. Much was made of the “leaky dams” installed on Hadlow Estates land which supposedly would alleviate the flood risk in FOG obviously though this appears not to have been the case.

6.277 It is essential that new development across the borough does not increase flood risk, and that any new development proposed in areas that are vulnerable to flood risk 'build in' additional local capacity in terms of flood mitigation and provide 'betterment' where possible:

This is unachievable without substantial investment around and south of Five Oak Green. The £1.75m (2016 last figure) proposed FOG Flood Alleviation Scheme by the EA is unfunded. The EA requested a “starter” fund of £250K from the Parish Council in 2016 just to put a funding bid in – this was an unrealistic figure for a small community to raise. Furthermore, in the IDP it is stated that the EA have yet to decide what scheme might be installed, and therefore no evidence of its potential to succeed. (The parish council in 2016 when asked to supply this funding asked if the scheme could be guaranteed successful – the EA were unable to supply this assurance)

6.279 The Council will therefore discourage inappropriate development in areas at known risk from flooding

6.280....without increasing flood risk on the site itself, and that there would be no increase to flood risk elsewhere.

Five Oak Green has recorded serious flooding for 50+ years (some exacerbated by previous development). East Capel, the site chosen to expand Paddock Wood is a floodplain and serves its purpose well. The topography of Tudeley suggests the run off into the Medway will be massive. There is no evidence that TWBC has “discouraged” the proposed development at either of the strategic sites, just the opposite. The risk to the existing community will be exacerbated and the communities with serious flood histories down stream of the Medway such as East Peckham and Yalding are extremely concerned about these proposals.

EN25 states that proposals for new development should contribute to an overall flood risk reduction

Neither the expansion of Paddock Wood nor the building of a new town where runoff will undoubtedly enter the Medway will contribute to a reduction in flood risk. Flood water has to be discharged

somewhere and as the community know in Five Oak Green, the arrival of the fire brigade and pumps does not improve the situation in a flood zone as there is nowhere to pump to.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Assess other areas that are not prone to flooding or within Flood Zone 3, nor on functional floodplains. This has not been evidenced as justified. If any calculations are incorrect and flooding is exacerbated due to these developments, elsewhere, who do we sue?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I wish to participate as a member of a community, it is important the voice of the community is heard

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Jeff Fenton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 26 Sustainable Drainage	
Paragraph Number 6.283	
Question 4	
Do you consider that the Local Plan:	
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There is no evidence that SUDS have worked in this area at all. A massive new pipeline is being installed by Southern Water around Paddock Wood, however this will only deal with the current new developments already being built out and will in no way reduce the issues of sewerage flooding suffered by the existing community. The valley he Policy does not recognise the seriousness of the existing flooding in the Medway valley and suggests there is a simple solution to any development. There will be some 30,000 new dwellings and businesses planned over the next decade right across the area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This Policy needs to be re-examined. Tunbridge Wells need to address the impact together with other boroughs of climate change and the impact of disproportionate placing of new development in flood zones.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As previously stated

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The housing allocations will become distorted as many London Boroughs will (and have previously) bought properties in this area to use as social housing for their own residents. This will distort the actual figures of housing available for the existing local community.

What mechanisms will be in place to properly monitor the "Build to rent Schemes" It appears that the new developments in Paddock Wood are being actively marketed in China, where owners will still reside and rent to the expected influx of Hongkinese.

Again, how will the allocations for social rented housing be monitored? Five Oak Green has a relatively large proportion of social housing already but it is evident many have moved from London Boroughs into the area and not from Tunbridge Wells.

It will be impossible for TWBC to monitor any of the housing that developers sell and to prevent developers ignoring any "rules" that TWBC might devise within planning applications.

It is worrying that TWBC might consider that any site can't support on-site affordable housing and this is a clause for some developers who only want to cater to the upper end of the market?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The PSLP has not received any support from the local community. It does not address the needs of the existing community. Five Oak Green in particular is in the unenviable position of being sandwiched between two large developments within its parish with no benefits from either. The MGB constraint, which ridiculously bisects private gardens at present, will be tightened around the village meaning there will be no growth or economic development. This is not justified and therefore the plan unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Local Cycling and Walking Infrastructure Plan: Phase 2

I have been made aware of the above which I see is dated March 2021.

I live in East Peckham and will therefore concentrate on your proposals for Paddock Wood.

If your proposals were to come to pass, Paddock Wood would certainly become a much more pleasant place for pedestrians and cyclists, principally because you would have turned it into a ghost town with no businesses and therefore no reason to visit the benighted place. Do you really have the powers to make changes that will, pretty much, instantly put perfectly good businesses such as Barsleys and Waitrose out of business.

The only sensible way into Paddock Wood from the North is along Maidstone Road. You propose closing it at the railway bridge to people in motor cars. Are you suggesting one detours through Lucks Lane or Wagon Lane? I happen to like my wing mirrors. On the Western side one could use Whetsted and Badsell Roads. Getting through the traffic lights at the end of Badsell Road is bad enough now, never mind with an increase in the traffic using it, plus extended waiting times to allow pedestrians and cyclists to cross at the lights, plus all the cars from the new housing estate being put up there. Oh yes, and just how well is that going for the builder?

I never cease to be astonished and some of the proposals which come out of the public sector, but this is madness of the highest order. How much time and money has been wasted on this nonsense which, for the good of Paddock Wood, simply must not come to pass.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Legal compliance and duty to cooperate

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement

was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Fernham's control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.1.6 Fernham Homes hope to work with the Council to agree a revised proposal. In the interim, these comments explain why we are concerned about the manner in which some sites have been omitted from the plan making process.

1.2 Land at Gate Farm, Hartley Road, Hartley (Cranbrook)

1.2.1 The site to which this representation relates is located on the northern side of Hartley Road/A229 and is approximately 1.48 hectares in area. It is located to the south west of Cranbrook outside built confines but adjacent to the built up area of Hartley.

[TWBC: to view site plan see full representation attached].

1.2.2 The land sits immediately adjacent to residential development to the north and commercial buildings are located on the west side of Glassenbury Road. The site falls entirely within the High Weald Area of Outstanding Natural Beauty AONB.

1.2.3 There are several listed buildings in the vicinity of the site, including:

(i) Hartley Gate Farmhouse (Grade II listed);(ii) Hartley Farmhouse (Grade II listed);(iii) Bull Farm House (Grade II listed); and(iv) Barn 50 Yards North of Bull Farmhouse (Grade II listed).

1.2.4 The surrounding area is characterised by the settlements of Hartley and Cranbrook, residential development with in and around those settlements, commercial developments, farmsteads and agricultural buildings as well as open agricultural land.

1.2.5 To the northeast are residential properties. Opposite the site is the well-established Hartley Dyke Commercial Centre, consisting of Juniors Day Nursery, the Hartley Dyke Coffee House and Farm Shop and several other commercial premises.

1.2.6 In terms of public transport, there are two bus stops located approximately 160m to the east of the site providing a service to Maidstone Town Centre, Loose, Staplehurst, Cranbrook and Hawkhurst. Staplehurst, approximately 10km to the north of the site, provides a regular train service to London, with up to 3no. trains per hour in peak periods (travel time under 1 hour to London Charing Cross and Cannon Street).

1.2.7 The site is not subject to any wider policy designations. The Environment Agency mapping also confirms that the site does not fall within a flood risk zone.

1.2.8 A high pressure water main and overhead power lines run through the site and represent design constraints.

1.2.9 The Hartley Road frontage of the site has been subject to previous smaller scale development proposals as follows:

- 84/00175/OUT - Outline application for 8 semi detached dwellings -Refused; and• 96/00283/FUL - 3 Detached dwellings – Refused. • 17/00795/FULL - Demolition of four derelict agricultural buildings and construction of four detached dwellings with associated parking, landscaping and access from Hartley Road (Withdrawn 08/02/18 following publication of officer's recommendation to refuse in advance of Planning Committee meeting).

1.2.10 The area immediately east of the site, between the built up area and Hartley Gate Farmhouse, has been subject to a planning appeal (APP/M2270/W/18/3203543) for the erection of 8 homes. The appeal was dismissed, but in doing so the Inspector narrowed the sole issue to the effect of the proposed vehicular access on highway safety (i.e. it was suitable in all other respects). The Inspector endorsed the principal of development and had no issue with the impacts of that scheme on the AONB, the character and appearance of the area and on settlement morphology.

1.2.11 Given the suitability of Fernham's land, an outline planning permission was progressed for 27 new homes and registered under Tunbridge Wells planning application reference 19/02170/OUT. However, this application was refused by Tunbridge Wells Borough Council for seven reasons:

(1) The development would cause significant harm to the rural character of the area, would have more than a minimal impact on the landscape character of the locality, would have a detrimental impact on the landscape setting of Cranbrook and would fail to conserve and enhance the special character of the High Weald Area of Outstanding Natural Beauty. It is therefore contrary to Policies LBD1, EN1 and EN25 of the Tunbridge Wells Borough Local Plan 2006, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy 2010, the aims and objectives of the Borough Landscape Character Area Assessment 2017 and the National Planning Policy Framework 2019(2) The application fails to

demonstrate that safe and suitable access to the site can be achieved for all users. It is thereby in conflict with Part 9 of the National Planning Policy Framework 2019, and saved policy TP4 of the Tunbridge Wells Local Plan 2006.(3) There is insufficient evidence to demonstrate that the proposal can result in a net gain in biodiversity. The proposal is thus contrary to Para 170 the National Planning Policy Framework 2019(4) The proposal would harm the setting of nearby listed buildings. It is not considered that there are sufficient public benefits, or any other material considerations, that outweigh this harm. The proposal is thus contrary to saved policy EN1 of the Tunbridge Wells Borough Local Plan 2006, Core Policy 4 of the Tunbridge Wells Borough Core Strategy 2010 and the National Planning Policy Framework 2019(5) The proposal would not provide developer contributions towards Secondary Education, Youth Provision and the Cranbrook Hub projects to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019, the Planning Practice Guidance, Core Policy CP1 of the Tunbridge Wells Core Strategy 2010 and Policies CS4 and R2 of the Tunbridge Wells Borough Local Plan 2006.(6) The proposal would not provide affordable housing within the proposed development. It would therefore conflict with the National Planning Policy Framework 2019, Core Policy 6 of the Tunbridge Wells Core Strategy 2010 and the Affordable Housing Supplementary Planning Document.(7) The proposal would not provide developer contributions towards new single premises for the three General Practices located in Cranbrook to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019 and Core Policy CP1 of the Tunbridge Wells Core Strategy 2010.

1.2.12 Not only did the Council refuse this application, but in seeking to defend the appeal the site was also removed from the Local Plan pre-submission draft.

1.2.13 An appeal was subsequently lodged (Appeal Ref: APP/M2270/W/20/3247977) during the life of which reasons for refusal 5 to 7 were resolved prior to determination (through the provision of a suitably worded Section 106 Legal Agreement). Reason for refusal 3 was also overcome as a result of providing further ecology information and a further commitment within the Section 106.

1.2.14 The main issues for the appeal (and so wider site suitability) were narrowed to:

(1) The impact of the proposed development on the character and appearance of the area including landscape character and the AONB;(2) Highways safety; and(3) Heritage harm.

1.2.15 The appeal was dismissed in February 2021, but in doing so the Inspector provided clear findings on a number of key matters that were in dispute and formed the basis for deleting the allocation. We summarise these findings below. A full copy of the appeal is included as Appendix 1.

Heritage

1.2.16 Paragraphs 50 to 64 directly responded to the heritage evidence, with the Inspector ultimately endorsing the appellant's evidence that heritage harm would be restricted to Hartley Gate Farmhouse only and in the less than substantial range. The Inspector rejected harm to wider assets. At paragraph 150 he concluded:

'Given the relatively low level of harm I have found in relation to the farmhouse and the significant housing and other positive attributes I have identified from the scheme, I find the heritage harm arising would be outweighed by the public benefits identified. Accordingly, the Framework does not provide a clear reason for refusing the development proposed in this specific regard'.

1.2.17 In our opinion, the Inspector provided a very clear conclusion that reason for refusal 4 was not a reasonable basis to withhold consent, nor did it provide a clear basis for disengaging the presumption in favour of sustainable development. As such, we consider the over estimation of heritage impacts contributed to an otherwise suitable allocation being omitted from the pre-submission plan.

Access and Highway Safety Matters

1.2.18 Paragraphs 65 to 88 of the appeal directly responds to the highway evidence. The Inspector's summary of highway matters stated:

'86. The A229 is a busy classified road. It reflects the accompanying dangers and relatively harsh pedestrian environment that might be expected, and improvements can always be made. Nevertheless, the evidence presented demonstrates the local highway network has no particular design flaws, and is capable of withstanding the relatively modest increase in vehicle and pedestrian movements that would arise from the scheme without incurring further undue additional risks or inconvenience. I also note possibilities for further detailed refinements to the scheme, particularly in terms of facilities for

pedestrian movement, and which were discussed at the Inquiry in relation to a possible planning condition should the appeal be allowed.

87. The Framework requires that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. The evidence against the proposed scheme falls significantly short of such a threshold.

88. I therefore conclude that the proposal would provide safe and suitable access for all users and would not be contrary to Policy TP4 of the Local Plan to the extent that it seeks, amongst other things, to ensure that proposals provide a safely located access with adequate visibility and that the traffic generated by the proposal would not compromise the safe and free flow of traffic or the safe use of the road by others'.

1.2.19 In our view, the Inspector provided a very clear conclusion that reason for refusal 2 was not supportable nor a reasonable basis to withhold consent and that the access was suitable for the quantum of development proposed. As such, we consider the dismissal of the site on highways grounds also wrongly contributed to the site being omitted from the pre-submission plan.

Location

1.2.20 At paragraph 117 the Inspector confirmed that the scheme enjoys a moderately sustainable location. Paragraph 124 also acknowledges that the Framework requires that, to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities and that planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. The scheme was deemed to be consistent with this aim and so modest weight was attached to these economic factors as a benefit.

Major Development

1.2.21 At paragraph 155 the Inspector confirms that the appeal scheme was not 'major' development.

Landscape Impact

1.2.22 Having regard to the above, reasons for refusal 2 to 7 were either overcome or dismissed by the Inspector. The only matter between parties relates to reason for refusal 1 and the associated impact upon the AONB.

1.2.23 In considering the conclusions, at paragraph 42, the Inspector is clear that the site may have potential for reintroduction of some sensitive built form, albeit a better balance has to be struck in relation to the legibility and distinctiveness of the AONB.

1.2.24 At paragraph 49 he concludes that the scheme would, by virtue of the extent of built development proposed (rather than principle) would be significantly harmful to the character and appearance of the appeal site and its surroundings.

1.2.25 In summary, all of the above commentary provides a clear basis to suggest that a revised scheme could integrate within the AONB setting. The Inspector stopped well short of concluding the site was unsuitable for development per se and as such we consider the deletion of the site, and subsequent impact it has had on evidence base and thus it is neither justified nor positively prepared.

1.2.26 We explain the wider relevance of the site being wrongly omitted in the context of the wider strategy within the subsequent sections of this representation.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.3 This representation comments on the following elements of the plan:

• *Vision and Strategic Objectives;* • *Development Strategy and Strategic Policies;* • *Place Shaping Policies;* and • *Development Management Policies.* *Vision and Strategic Objectives*

1.3.4 The pre-submission plan is underpinned by vision and strategic objectives.

1.3.5 The vision is set out below:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough.'

The Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents. In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities.*

Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs.

Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Local ambitions are:

• for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities; • for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding; • for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design; • for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs; • for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.6 In order to deliver the vision the plan sets a number of strategic objectives:

(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough; (2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population; (3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments; (4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments; (5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities;

(6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology; (7) To ensure that the borough is vibrant, culturally rich, and economically buoyant; (8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature; (9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met; (10) To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment; (11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters of soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.7 Response

1.3.8 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.9 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.10 We consider that objective 2 should be modified to read:

‘To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing’

1.3.11 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Fernham Homes Ltd
Question 2	
Agent's Name and Organisation (if applicable)	Bloomfields Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., with interest to the site submitted under the previous Call for Sites and considered under the Pre Submission Local Plan SHELAA as Site 143. This logical Site on the edge of Five Oak Green remains deliverable and available under the stewardship of this local housebuilder and as an organic and sustainable addition to the village, this site could be brought forward in a manner consistent with the Council's overarching delivery objectives.

[TWBC: Above comment from covering email]

Fernhams Homes Limited (FHL) is promoting land at Tolhurst Road, Five Oak Green, for residential development and in this context that FHL wishes to express its objections to the development strategy insofar as it relates to development at Capel, as set out in Draft Policy STR/CA1.

The development strategy is based upon meeting, in full, the assessed local housing need for the area along with a "buffer" for flexibility. This is welcome, in principle, since the Plan's evidence base indicates very limited scope to apportion unmet housing need to neighbouring authorities, since neighbouring authorities experience many of the same constraints as Tunbridge Wells.

In this context the Council is asked to consider that The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa, rather than the 678dpa that the authority commits to delivery within policy STR1. It is understood that the Housing Needs Topic Paper indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa. The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the authority should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

It is agreed that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider that a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is unfortunately not positively prepared, is not justified and is therefore not sound or legally compliant.

Also, as a result of this, the development strategy must respond pragmatically but sensitively to the Borough's principal constraints, namely the High Weald Area of Outstanding Natural Beauty (AONB) and the Metropolitan Green Belt. The need to safeguard these areas must be carefully balanced against the need to achieve a sustainable pattern of growth and, in general terms, undertaking this balancing act has been found by Inspectors to be justified through local plan examinations elsewhere in the country (e.g. Guildford and Central Bedfordshire).

Green Belt

Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development. The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated: 'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist. 'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than four times double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. This needs to be considered in the context that the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider

the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact in any meaningful way exists only on contained sites that affect one's perception of openness within the site and from immediate vantage points.

The conclusion that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation is therefore agreed. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

That said, the contribution to development needs from the non-constrained area of the Borough must, within reason, be maximised to limit the extent of Green Belt release and encroachment by new development within the AONB. In Green Belt release terms, this is essential to making the case for "exceptional circumstances" as per paragraphs 136 and 137 of the National Planning Policy Framework (NPPF), and, in AONB terms, to demonstrate that great weight has been provided to conserving and enhancing the AONB and limiting the scale and extent of development within the AONB (NPPF, paragraph 172).

Given the above, FHL welcomes the decision (described at paragraph 4.48 of the Plan's supporting text) to reduce the level of growth previously proposed in the AONB as being beneficial to the overall soundness of the Plan. In part compensation, the Plan has seen a greater focus on urban intensification and brownfield which has been identified as a lynchpin of the development strategy in Draft Policy STR 1. It must be recognised, however, that urban intensification and brownfield redevelopment have limits and those sites that are available may not be quick to come forward given the myriad of issues that typically affect the deliverability of urban and brownfield land. By way of using urban land to its fullest potential in order to avoid directing growth to the Borough's more sensitive areas, the Brownfield and Urban Land Topic Paper (January 2021) details a very exhaustive approach to ensuring that these opportunities are maximised whilst ensuring that the level of growth planned through these means is deliverable and realistic.

Strategy

Combined with the two strategic proposals in the Plan, Tudeley Village and the expansion of Paddock Wood, both of which exist within close proximity to each other and have complex infrastructure and phasing requirements, over-reliance on urban intensification and brownfield sites coming forward could result in a "top-heavy" development strategy unless it is accompanied by a wider dispersal of small to medium sized sites that are capable of yielding housing completions quickly as well as contributing to the viability and vitality of rural areas.

With regards to the trajectory of delivery in relation to the Tudeley village, Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver' provides evidence of the speed and rate of delivery of large-scale housing. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, it is considered that housing may evidently be unlikely to be delivered at Tudeley until around 8 years after the granting of planning permission.

In fact, the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic. It is considered that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. The considered over reliance upon Tudeley Garden Village means that if it is not delivered as planned there would not be any flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

It is therefore welcome that the Plan provides for these opportunities as they will diversify the sources of housing supply and ensure that the Plan retains flexibility to respond to changing circumstances. We would note from Figure 3 of the Housing Supply and Trajectory Topic Paper (February 2021) that expected housing completions within the plan period will ensure a consistent and steady supply to meet ongoing need, particularly in the earlier years, which is important given the Plan's reliance on strategic sites.

As set out above, opportunities for dispersing growth to the rural area generally will be limited by the AONB and the Green Belt. Paragraph 7.16 also identifies the concerns expressed at the Draft local Plan stage about unduly and disproportionately large scales of growth at smaller villages, whereas the proposed allocation of sites such as that at land at Tolhurst Road, Five Oak Green, will ensure a more natural and ultimately more sustainable development as it is at a level whereby growth in Five Oak Green which can also enable the expansion of services and facilities to improve the sustainability credentials of the settlement which, in addition to being in the spirit of the Planning Practice Guidance and the National Planning Policy Framework, can facilitate delivery of the Plan's strategic objective of improving infrastructure, local services and amenities in line with community needs.

In general terms, we consider allocating a material level of growth at Five Oak Green to be sound and fully supported by the Plan's evidence base.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. However, it is considered that the Local Plan strategy relies too heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council has applied overly optimistic projections to the delivery of housing for the Tudeley Garden Village and it is considered that a more realistic timeframe should be adopted for the delivery trajectory of the Tudeley.

In the intervening time, it is considered that further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Five Oak Green where it is considered that sites such as our client's land at should be added to offset the loss of the housing relied upon. For this reason, we object to the exclusion of our client's land at Tolhurst Road, Five Oak Green.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land at Tolhurst Road, Five Oak Green, for development and is seeking changes to Draft Policy STR1. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

FHL supports the general thrust of the Sustainability Appraisal (SA) insofar as it substantiates the preferred development strategy as being preferable against the reasonable alternatives. The SA examines a number of scenarios for the distribution of growth across the Borough including, critically, a scenario which would meet full housing need but does not involve Green Belt release. This scenario (Growth Strategy 6) demonstrates that no Green Belt release would involve major strategic growth at a number of the Borough's rural settlements including those within the AONB thus demonstrating that some Green Belt release is necessary in order to deliver a sustainable pattern of development. We note that no scenario has been tested that would see full housing need met in areas completely outside the AONB. However, this would clearly involve similar major strategic growth in rural settlements by obviating the contribution of Royal Tunbridge Wells and Southborough to meeting housing needs or else by generating excessive reliance on strategic expansions to Paddock Wood and Tudeley Village, which would most likely need to be enlarged. The SA therefore substantiates the need to deliver some growth within Green Belt and AONB.

We note that failure to meet standard housing need by avoiding the AONB or the Green Belt were accompanied by significant negative scores in relation to the delivery of new housing and economic development, as would be expected. We also noted scenarios that would see significant concentrations of growth within the AONB associated with significantly negative environmental effects particularly as regard to landscape, once more as expected. As a result, the SA supports the key limbs of the preferred development strategy of meeting full housing need and reducing the scale of development within the AONB from the Draft Local Plan as against the reasonable alternatives. However, the preferred spatial strategy (i.e. Growth Strategy 13) would still result in the concentration of significant development within the AONB alongside significant Green Belt release to accommodate a new settlement and the transformational expansion of Paddock Wood. The contribution by urban and brownfield land has also been maximised to the reasonable extent possible. As a result, the preferred development strategy is finely balanced and whilst noting since the Regulation 18 consultation the quantum of development has been decreased in some smaller rural settlements beyond the Green Belt and AONB, it is not practical to do so further without resulting in negative environmental effects and/or compromising the deliverability of the development strategy.

Question 1	
Respondent's Name and/or Organisation	Fernham Homes Ltd
Question 2	
Agent's Name and Organisation (if applicable)	Bloomfields Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., who seek to support the site currently drafted for providing housing and a significant community facilities at Sissinghurst (under Policy STR CRS 1), subject to important modifications which ensures the viable delivery of the site.

[TWBC: Above comment from covering email]

Fernhams Homes Limited (FHL) is promoting land south of The Street, Sissinghurst for residential development. It is welcome that the Pre-Submission Local Plan ("the Plan") proposes to allocate this site for development and it is in this context that FHL wishes to express its general support for the development strategy as set out in Draft Policy STR /CRS1.

The development strategy is based upon meeting, in full, the assessed local housing need for the area along with a "buffer" for flexibility. This is welcome, in principle, since the Plan's evidence base indicates very limited scope to apportion unmet housing need to neighbouring authorities, since neighbouring authorities experience many of the same constraints as Tunbridge Wells.

We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider that a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is unfortunately not positively prepared, is not justified and is therefore not sound or legally complaint.

Also, as a result of this, the development strategy must respond pragmatically but sensitively to the Borough's principal constraints, namely the High Weald Area of Outstanding Natural Beauty (AONB)

and the Metropolitan Green Belt. The need to safeguard these areas must be carefully balanced against the need to achieve a sustainable pattern of growth and, in general terms, undertaking this balancing act has been found by Inspectors to be justified through local plan examinations elsewhere in the country (e.g. Guildford and Central Bedfordshire).

That said, the contribution to development needs from the non-constrained area of the Borough must, within reason, be maximised to limit the extent of Green Belt release and encroachment by new development within the AONB. In Green Belt release terms, this is essential to making the case for “exceptional circumstances” as per paragraphs 136 and 137 of the National Planning Policy Framework (NPPF), and, in AONB terms, to demonstrating that great weight has been provided to conserving and enhancing the AONB and limiting the scale and extent of development within the AONB (NPPF, paragraph 172). Implicitly, the need to maximise areas beyond the Green Belt and AONB has already been acknowledged by the Plan’s proposed transformational expansion of Paddock Wood, which apart from being a sustainable location, also has the advantage of avoiding the AONB and would entail only some Green Belt release. This “avoidance” strategy should run through the Plan’s as a whole in order for it to be sound in its conformity with national policy.

Given the above, FHL welcomes the decision (described at paragraph 4.48 of the Plan’s supporting text) to reduce the level of growth previously proposed in the AONB as being beneficial to the overall soundness of the Plan. In part compensation, the Plan has seen a greater focus on urban intensification and brownfield which has been identified as a lynchpin of the development strategy in Draft Policy STR 1. It must be recognised, however, that urban intensification and brownfield redevelopment have limits and those sites that are available may not be quick to come forward given the myriad of issues that typically affect the deliverability of urban and brownfield land. By way of using urban land to its fullest potential in order to avoid directing growth to the Borough’s more sensitive areas, the Brownfield and Urban Land Topic Paper (January 2021) details a very exhaustive approach to ensuring that these opportunities are maximised whilst ensuring that the level of growth planned through these means is deliverable and realistic.

Combined with the two strategic proposals in the Plan, Tudeley Village and the expansion of Paddock Wood, both of which exist within close proximity to each other and have complex infrastructure and phasing requirements, over-reliance on urban intensification and brownfield sites coming forward could result in a “top-heavy” development strategy unless it is accompanied by a wider dispersal of small to medium sized sites that are capable of yielding housing completions quickly as well as contributing to the viability and vitality of rural areas.

With regards to the trajectory of delivery in relation to the Tudeley village, Nathaniel Lichfield’s and Partners (NLP) - ‘Start to Finish: How Quickly do Large-Scale Housing Sites Deliver’ provides evidence of the speed and rate of delivery of large-scale housing. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, it is considered that housing may evidently be unlikely to be delivered at Tudeley until around 8 years after the granting of planning permission.

In fact, the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic. It is considered that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change. The considered over reliance upon Tudeley Garden Village means that if it is not delivered as planned there would not be any flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

As set out above, opportunities for dispersing growth to the rural area generally will be limited by the AONB and the Green Belt which is why Sissinghurst, as a sustainable settlement outside both of these areas, plays such a crucial role in the overall development strategy. We note from paragraph 6.66 of the Development Strategy Topic Paper (February 2021), for instance, that the outcome of the SHELAA

process has been to identify a number of suitable sites at Sissinghurst (February 2021), identifying it as one of the best performing rural settlements in terms of the availability of services and facilities.

Paragraph 7.16 also identifies the concerns expressed at the Draft local Plan stage about unduly and disproportionately large scales of growth at smaller villages, whereas the proposed allocation of sites such as that at land south of The Street, together with improved community facilities, will ensure a more natural and ultimately more sustainable development as it is at a level whereby growth in Sissinghurst can also enable the expansion of services and facilities to improve the sustainability credentials of the settlement which, in addition to being in the spirit of the Planning Practice Guidance and the National Planning Policy Framework, can facilitate delivery of the Plan's strategic objective of improving infrastructure, local services and amenities in line with community needs.

In general terms, we consider allocating a material level of growth at Sissinghurst to be sound and fully supported by the Plan's evidence base. In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. The Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements is not agreed. A vast number of residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

The contribution made by Sissinghurst and the non-AONB rural settlements generally to the development strategy should be expressly recognised in Draft Policy STR 1 as it is an issue of strategic importance to reasonably maximise the contribution of areas outside the AONB toward meeting development needs.

In so doing, drawing upon the evidence base, the development strategy should clearly set out the role and function of each higher order rural settlement, including Sissinghurst, in order to explain more clearly in broad, strategic terms the role each one plays its part in delivering the Plan's overall strategy. For Sissinghurst, we would request express recognition for the important role the settlement will play in meeting housing needs over the plan period in a sustainable location that is not affected by fundamental landscape or Green Belt constraints.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Draft Policy STR 1 or a further policy should identify a clear hierarchy of settlements and growth areas to guide the apportionment of housing and explain how each one will play a part in delivering the Plan's development strategy. We note that Limb 3 of Draft Policy STR 1 already does this in respect of strategic allocations but this should be extended to the Borough's rural settlements alongside an express recognition that development outside the Green Belt and AONB should be maximised in order to safeguard these important designations to the extent consistent with broader sustainability objectives.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land South of The Street, Sissinghurst for development and is seeking changes to Draft Policy STR1. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

FHL supports the general thrust of the Sustainability Appraisal (SA) insofar as it substantiates the preferred development strategy as being preferable against the reasonable alternatives. The SA examines a number of scenarios for the distribution of growth across the Borough including, critically, a scenario which would meet full housing need but does not involve Green Belt release. This scenario (Growth Strategy 6) demonstrates that no Green Belt release would involve major strategic growth at a number of the Borough's rural settlements including those within the AONB thus demonstrating that some Green Belt release is necessary in order to deliver a sustainable pattern of development. We note that no scenario has been tested that would see full housing need met in areas completely outside the AONB. However, this would clearly involve similar major strategic growth in rural settlements by obviating the contribution of Royal Tunbridge Wells and Southborough to meeting housing needs or else by generating excessive reliance on strategic expansions to Paddock Wood and Tudeley Village, which would most likely need to be enlarged. The SA therefore substantiates the need to deliver some growth within Green Belt and AONB.

We note that failure to meet standard housing need by avoiding the AONB or the Green Belt were accompanied by significant negative scores in relation to the delivery of new housing and economic development, as would be expected. We also noted scenarios that would see significant concentrations of growth within the AONB associated with significantly negative environmental effects particularly as regard to landscape, once more as expected. As a result, the SA supports the key limbs of the preferred development strategy of meeting full housing need and reducing the scale of development within the AONB from the Draft Local Plan as against the reasonable alternatives. However, the preferred spatial strategy (i.e. Growth Strategy 13) would still result in the concentration of significant development within the AONB alongside significant Green Belt release to accommodate a new settlement and the transformational expansion of Paddock Wood. The contribution by urban and brownfield land has also been maximised to the reasonable extent possible. As a result, the preferred development strategy is finely balanced and whilst noting since the Regulation 18 consultation the quantum of development has been decreased in some smaller rural settlements beyond the Green Belt and AONB, it is not practical to do so further without resulting in negative environmental effects and/or compromising the deliverability of the development strategy.

Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Fernham's control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury

Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.1.6 Fernham Homes hope to work with the Council to agree a revised proposal. In the interim, these comments explain why we are concerned about the manner in which some sites have been omitted from the plan making process.

1.2 Land at Gate Farm, Hartley Road, Hartley (Cranbrook)

1.2.1 The site to which this representation relates is located on the northern side of Hartley Road/A229 and is approximately 1.48 hectares in area. It is located to the south west of Cranbrook outside built confines but adjacent to the built up area of Hartley.

[TWBC: to view site plan see full representation attached].

1.2.2 The land sits immediately adjacent to residential development to the north and commercial buildings are located on the west side of Glassenbury Road. The site falls entirely within the High Weald Area of Outstanding Natural Beauty AONB.

1.2.3 There are several listed buildings in the vicinity of the site, including:

(i) Hartley Gate Farmhouse (Grade II listed);(ii) Hartley Farmhouse (Grade II listed);(iii) Bull Farm House (Grade II listed); and(iv) Barn 50 Yards North of Bull Farmhouse (Grade II listed).

1.2.4 The surrounding area is characterised by the settlements of Hartley and Cranbrook, residential development with in and around those settlements, commercial developments, farmsteads and agricultural buildings as well as open agricultural land.

1.2.5 To the northeast are residential properties. Opposite the site is the well-established Hartley Dyke Commercial Centre, consisting of Juniors Day Nursery, the Hartley Dyke Coffee House and Farm Shop and several other commercial premises.

1.2.6 In terms of public transport, there are two bus stops located approximately 160m to the east of the site providing a service to Maidstone Town Centre, Loose, Staplehurst, Cranbrook and Hawkhurst. Staplehurst, approximately 10km to the north of the site, provides a regular train service to London, with up to 3no. trains per hour in peak periods (travel time under 1 hour to London Charing Cross and Cannon Street).

1.2.7 The site is not subject to any wider policy designations. The Environment Agency mapping also confirms that the site does not fall within a flood risk zone.

1.2.8 A high pressure water main and overhead power lines run through the site and represent design constraints.

1.2.9 The Hartley Road frontage of the site has been subject to previous smaller scale development proposals as follows:

- 84/00175/OUT - Outline application for 8 semi detached dwellings -Refused; and• 96/00283/FUL - 3 Detached dwellings – Refused. • 17/00795/FULL - Demolition of four derelict agricultural buildings and construction of four detached dwellings with associated parking, landscaping and access from Hartley Road (Withdrawn 08/02/18 following publication of officer's recommendation to refuse in advance of Planning Committee meeting).

1.2.10 The area immediately east of the site, between the built up area and Hartley Gate Farmhouse, has been subject to a planning appeal (APP/M2270/W/18/3203543) for the erection of 8 homes. The appeal was dismissed, but in doing so the Inspector narrowed the sole issue to the effect of the proposed vehicular access on highway safety (i.e. it was suitable in all other respects). The Inspector endorsed the principal of development and had no issue with the impacts of that scheme on the AONB, the character and appearance of the area and on settlement morphology.

1.2.11 Given the suitability of Fernham's land, an outline planning permission was progressed for 27 new homes and registered under Tunbridge Wells planning application reference 19/02170/OUT. However, this application was refused by Tunbridge Wells Borough Council for seven reasons:

(1) The development would cause significant harm to the rural character of the area, would have more than a minimal impact on the landscape character of the locality, would have a detrimental impact on the landscape setting of Cranbrook and would fail to conserve and enhance the special character of the High Weald Area of Outstanding Natural Beauty. It is therefore contrary to Policies LBD1, EN1 and EN25 of the Tunbridge Wells Borough Local Plan 2006, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy 2010, the aims and objectives of the Borough Landscape Character Area Assessment 2017 and the National Planning Policy Framework 2019(2) The application fails to demonstrate that safe and suitable access to the site can be achieved for all users. It is thereby in conflict with Part 9 of the National Planning Policy Framework 2019, and saved policy TP4 of the Tunbridge Wells Local Plan 2006.(3) There is insufficient evidence to demonstrate that the proposal can result in a net gain in biodiversity. The proposal is thus contrary to Para 170 the National Planning Policy Framework 2019(4) The proposal would harm the setting of nearby listed buildings. It is not considered that there are sufficient public benefits, or any other material considerations, that outweigh this harm. The proposal is thus contrary to saved policy EN1 of the Tunbridge Wells Borough Local Plan 2006, Core Policy 4 of the Tunbridge Wells Borough Core Strategy 2010 and the National Planning Policy Framework 2019(5) The proposal would not provide developer contributions towards Secondary Education, Youth Provision and the Cranbrook Hub projects to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019, the Planning Practice Guidance, Core Policy CP1 of the Tunbridge Wells Core Strategy 2010 and Policies CS4 and R2 of the Tunbridge Wells Borough Local Plan 2006.(6) The proposal would not provide affordable housing within the proposed development. It would therefore conflict with the National Planning Policy Framework 2019, Core Policy 6 of the Tunbridge Wells Core Strategy 2010 and the Affordable Housing Supplementary Planning Document.(7) The proposal would not provide developer contributions towards new single premises for the three General Practices located in Cranbrook to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019 and Core Policy CP1 of the Tunbridge Wells Core Strategy 2010.

1.2.12 Not only did the Council refuse this application, but in seeking to defend the appeal the site was also removed from the Local Plan pre-submission draft.

1.2.13 An appeal was subsequently lodged (Appeal Ref: APP/M2270/W/20/3247977) during the life of which reasons for refusal 5 to 7 were resolved prior to determination (through the provision of a suitably worded Section 106 Legal Agreement). Reason for refusal 3 was also overcome as a result of providing further ecology information and a further commitment within the Section 106.

1.2.14 The main issues for the appeal (and so wider site suitability) were narrowed to:

(1) The impact of the proposed development on the character and appearance of the area including landscape character and the AONB;(2) Highways safety; and(3) Heritage harm.

1.2.15 The appeal was dismissed in February 2021, but in doing so the Inspector provided clear findings on a number of key matters that were in dispute and formed the basis for deleting the allocation. We summarise these findings below. A full copy of the appeal is included as Appendix 1.

Heritage

1.2.16 Paragraphs 50 to 64 directly responded to the heritage evidence, with the Inspector ultimately endorsing the appellant's evidence that heritage harm would be restricted to Hartley Gate Farmhouse only and in the less than substantial range. The Inspector rejected harm to wider assets. At paragraph 150 he concluded:

'Given the relatively low level of harm I have found in relation to the farmhouse and the significant housing and other positive attributes I have identified from the scheme, I find the heritage harm arising would be outweighed by the public benefits identified. Accordingly, the Framework does not provide a clear reason for refusing the development proposed in this specific regard'.

1.2.17 In our opinion, the Inspector provided a very clear conclusion that reason for refusal 4 was not a reasonable basis to withhold consent, nor did it provide a clear basis for disengaging the presumption in favour of sustainable development. As such, we consider the over estimation of heritage impacts contributed to an otherwise suitable allocation being omitted from the pre-submission plan.

Access and Highway Safety Matters

1.2.18 Paragraphs 65 to 88 of the appeal directly responds to the highway evidence. The Inspector's summary of highway matters stated:

'86. The A229 is a busy classified road. It reflects the accompanying dangers and relatively harsh pedestrian environment that might be expected, and improvements can always be made. Nevertheless, the evidence presented demonstrates the local highway network has no particular design flaws, and is capable of withstanding the relatively modest increase in vehicle and pedestrian movements that would arise from the scheme without incurring further undue additional risks or inconvenience. I also note possibilities for further detailed refinements to the scheme, particularly in terms of facilities for pedestrian movement, and which were discussed at the Inquiry in relation to a possible planning condition should the appeal be allowed.

87. The Framework requires that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. The evidence against the proposed scheme falls significantly short of such a threshold.

88. I therefore conclude that the proposal would provide safe and suitable access for all users and would not be contrary to Policy TP4 of the Local Plan to the extent that it seeks, amongst other things, to ensure that proposals provide a safely located access with adequate visibility and that the traffic generated by the proposal would not compromise the safe and free flow of traffic or the safe use of the road by others'.

1.2.19 In our view, the Inspector provided a very clear conclusion that reason for refusal 2 was not supportable nor a reasonable basis to withhold consent and that the access was suitable for the quantum of development proposed. As such, we consider the dismissal of the site on highways grounds also wrongly contributed to the site being omitted from the pre-submission plan.

Location

1.2.20 At paragraph 117 the Inspector confirmed that the scheme enjoys a moderately sustainable location. Paragraph 124 also acknowledges that the Framework requires that, to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities and that planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. The scheme was deemed to be consistent with this aim and so modest weight was attached to these economic factors as a benefit.

Major Development

1.2.21 At paragraph 155 the Inspector confirms that the appeal scheme was not 'major' development.

Landscape Impact

1.2.22 Having regard to the above, reasons for refusal 2 to 7 were either overcome or dismissed by the Inspector. The only matter between parties relates to reason for refusal 1 and the associated impact upon the AONB.

1.2.23 In considering the conclusions, at paragraph 42, the Inspector is clear that the site may have potential for reintroduction of some sensitive built form, albeit a better balance has to be struck in relation to the legibility and distinctiveness of the AONB.

1.2.24 At paragraph 49 he concludes that the scheme would, by virtue of the extent of built development proposed (rather than principle) would be significantly harmful to the character and appearance of the appeal site and its surroundings.

1.2.25 In summary, all of the above commentary provides a clear basis to suggest that a revised scheme could integrate within the AONB setting. The Inspector stopped well short of concluding the site was unsuitable for development per se and as such we consider the deletion of the site, and subsequent impact it has had on evidence base and thus it is neither justified nor positively prepared.

1.2.26 We explain the wider relevance of the site being wrongly omitted in the context of the wider strategy within the subsequent sections of this representation.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

Development Strategy and Strategic Policies (Policy STR1)

1.3.12 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.3.13 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.3.14 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.3.15 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.3.16 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: to view copy of Local Plan Figure 5 Key Diagram see full representation attached].

1.3.17 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 duplicated here - see full representation attached]

1.3.18 By way of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.3.19 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.3.20 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.3.21 The full proposed distribution of development is set out below.

[TWBC: to view copy of Local Plan Table 4 Distribution of housing allocations see full representation attached].

Response

1.3.22 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent Neighbours, we consider the review process should surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.3.23 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have

concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.3.24 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.3.25 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, housing is unlikely to be delivered at Tudeley until circa 8 years after the first planning permission is approved.

1.3.26 After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.3.27 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council, with minimal units being delivered within the current plan period.

1.3.28 Taking the above into account, our view is that the Council have applied overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.3.29 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.3.30 Kings Hill is an extremely prudent example to consider in the context of the Paddock Wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases we delivered at lower rates given the need to front load infrastructure.

1.3.31 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

1.3.32 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.3.33 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.3.34 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites such as our client's land should be added to offset the loss of the housing relied upon from Tudeley.

1.3.35 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.3.36 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.3.37 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.3.38 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

1.3.39 As explained, our client's land is suitable, available and achievable and was, in our view, removed as response to our client's planning appeal rather than as a result of and robust planning evidence. Indeed, the appeal process itself made clear that six of the seven reasons for refusal could not be substantiated, whilst impact on the AONB could be mitigated with an alternative scale and design approach. In short, our client's site represents a suitable location to reinsert a site that will deliver in the short term.

Green Belt vs AONB Release

1.3.40 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.3.41 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.3.42 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.3.43 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.3.44 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.3.45 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in

achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.3.46 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than four times double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and so it is distinctly possible to channel much of the development beyond this designated area.

1.3.47 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.3.48 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.3.49 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.3.50 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;

(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.3.51 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.3.52 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met. For example, on the sites like our clients that were wrongly omitted.

1.3.53 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.3.54 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.3.55 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.3.56 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.3.57 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.3.58 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.3.59 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.3.60 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.3.61 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.3.62 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.3.63 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.3.64 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas so as to preserve the status quo in the more affluent villages whilst not delivering housing of all tenures throughout the entire borough meeting the borough wide housing need.

Housing Delivery

1.3.65 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.3.66 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.3.67 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced

legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.3.68 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: to view table of housing completion rates 2010 to 2015 see full representation attached].

1.3.69 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times to ensure the new plan is sufficiently flexible.

1.3.70 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: to view table of housing completion rates 2015 to 2020 (statement of common ground) with table note 1 The completions data for 22019/20 is yet to be formally published until the next Authority Monitoring Report 2020 is complete. However, the number of confirmed housing completions has been provided by the LPA as 474 for this latest monitoring year.see full representation attached].

1.3.71 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.3.72 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.3.73 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.3.74 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.3.75 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.3.76 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: to view table of information extracted from the LPA's published supply statements see full representation attached].

1.3.77 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.3.78 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery of housing. We see no evidence to suggest that this step change will occur and therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.3.79 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.3.80 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.3.81 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.3.82 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.3.83 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.84 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely immediately deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.84 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely immediately deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Fernham Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Bloomfields Ltd

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., with interest to the site submitted under the previous Call for Sites and considered under the Pre Submission Local Plan SHELAA as Site 143. This logical Site on the edge of Five Oak Green remains deliverable and available under the stewardship of this local housebuilder and as an organic and sustainable addition to the village, this site could be brought forward in a manner consistent with the Council's overarching delivery objectives.

[TWBC: Above comment from covering email]

Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to smaller areas of land which do not make any noteworthy contribution towards the purposes of the Green Belt, including locations on the edge of existing settlements, like the land at Tolhurst Road, Five Oak Green, The Street Sissinghurst and Hartley. Growth at such a settlement would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

Additional development at other existing settlements would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the villages of Five Oak Green, Hartley and Sissinghurst.

It is understood from the Council's Viability Assessment that development of Tudeley is only viable where property values exceed that expected elsewhere in the Borough. However, FHL has carried out its own positive viability appraisals of others sites known to be viable and available for development at property values expected elsewhere in the Borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For the reasons detailed above, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification given that there are other more appropriate and available sites for development across the Borough, including those at Hartley, Five Oak Green and Sissinghurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land at Tolhurst Road, Five Oak Green, The Street Sissinghurst, and Hartley, for development and is seeking changes to Draft Policy STR9. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	Bloomfields Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., with interest to the site submitted under the previous Call for Sites and considered under the Pre Submission Local Plan SHELAA as Site 143. This logical Site on the edge of Five Oak Green remains deliverable and available under the stewardship of this local housebuilder and as an organic and sustainable addition to the village, this site could be brought forward in a manner consistent with the Council's overarching delivery objectives.

[TWBC: Above comment from covering email]

Fernhams Homes Limited (FHL) is promoting land at Tolhurst Road, Five Oak Green (site 143), for residential development. It is in this context that FHL wishes to express its objections to the development strategy insofar as it relates to development at Capel, as set out in Draft Policy STR/CA1. It is considered that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing.

Draft Policy STR/CA 1 sets out the Plan's ambitions in respect of Capel which is based on the provision of a new garden settlement at Tudeley Village, which will deliver approximately 2,800 dwellings and a range of associated services and infrastructure over the plan period and beyond, and to accommodate approximately 2,060 dwellings on land at east Capel as part of the extension to Paddock Wood.

The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

The over-reliance of the site within the trajectory need not be terminal however. The solution would be to ensure that any delivery from Tudeley were assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from

a Green Belt perspective. In the intervening time, further sites such as the already well contained site at Tolhurst Road should be added to offset the loss of the housing relied upon in the earlier stages of the delivery plan period.

Such an approach would also support the wider strategy and general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area with a single larger development. For this reason the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements is strongly disagreed.

In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt.

In this case, land at Tolhurst Road provides a logical opportunity in helping to meet identified housing needs and could provide for development which would be well-contained on the edge of the existing settlement, resulting in sensible and organic growth. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

Summary

Taking the above into consideration, it is considered that Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, it is not considered that there is any evidence which exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed, including the release of smaller land which would result in a more sustainable pattern of growth in Capel at Site 143 - Tolhurst Road.

There is support for the principle of the plan-led system and in setting out our representations upon these policies, it is hoped that the Council can work with this Agent between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

As set out within comments provided by FHL in relation to draft Policy STR1, the proposed trajectory of housing delivery at Tudeley in particular is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic. It is considered that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

Given the above, FHL objects to draft Policy STR/CA 1 in its current form and has requested that Inset Map 7 is amended to incorporate land at Tolhurst Road, and a modification as set out below, in order to ensure that TWBC is capable of meeting its need in full during the period of the Plan and the

development strategy responds pragmatically but sensitively to the Borough's principal constraints, namely the High Weald Area of Outstanding Natural Beauty (AONB) and the Metropolitan Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land at Tolhurst Road, Five Oak Green, for development and is seeking changes to Draft Policy STR1. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes to it as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

FHL supports the general thrust of the Sustainability Appraisal (SA) insofar as it substantiates the preferred development strategy as being preferable against the reasonable alternatives. The SA examines a number of scenarios for the distribution of growth across the Borough including, critically, a scenario which would meet full housing need but does not involve Green Belt release. This scenario (Growth Strategy 6) demonstrates that no Green Belt release would involve major strategic growth at a number of the Borough's rural settlements including those within the AONB thus demonstrating that some Green Belt release is necessary in order to deliver a sustainable pattern of development. We note that no scenario has been tested that would see full housing need met in areas completely outside the AONB. However, this would clearly involve similar major strategic growth in rural settlements by obviating the contribution of Royal Tunbridge Wells and Southborough to meeting housing needs or else by generating excessive reliance on strategic expansions to Paddock Wood and Tudeley Village, which would most likely need to be enlarged. The SA therefore substantiates the need to deliver some growth within Green Belt and AONB.

We note that failure to meet standard housing need by avoiding the AONB or the Green Belt were accompanied by significant negative scores in relation to the delivery of new housing and economic development, as would be expected. We also noted scenarios that would see significant concentrations of growth within the AONB associated with significantly negative environmental effects particularly as regard to landscape, once more as expected. As a result, the SA supports the key limbs of the preferred development strategy of meeting full housing need and reducing the scale of development within the AONB from the Draft Local Plan as against the reasonable alternatives. However, the preferred spatial strategy (i.e. Growth Strategy 13) would still result in the concentration of significant development within the AONB alongside significant Green Belt release to accommodate a new settlement and the transformational expansion of Paddock Wood. The contribution by urban and brownfield land has also been maximised to the reasonable extent possible. As a result, the preferred development strategy is finely balanced and whilst noting since the Regulation 18 consultation the quantum of development has been decreased in some smaller rural settlements beyond the Green Belt and AONB, it is not

practical to do so further without resulting in negative environmental effects and/or compromising the deliverability of the development strategy.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_509 (Vision and Objectives), PSLP_510 (Section 4: Policy STR1 - the Development Strategy), PSLP_511 - Section 5: Cranbrook & Sissinghurst Policy STR/CRS1: The Strategy for Cranbrook & Sissinghurst parish; PSLP_532 - Development Management Policies and PSLP_533 - Legal Compliance and Duty to Cooperate].

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Fernham's

control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.1.6 Fernham Homes hope to work with the Council to agree a revised proposal. In the interim, these comments explain why we are concerned about the manner in which some sites have been omitted from the plan making process.

1.2 Land at Gate Farm, Hartley Road, Hartley (Cranbrook)

1.2.1 The site to which this representation relates is located on the northern side of Hartley Road/A229 and is approximately 1.48 hectares in area. It is located to the south west of Cranbrook outside built confines but adjacent to the built up area of Hartley.

[TWBC: to view site plan see full representation attached].

1.2.2 The land sits immediately adjacent to residential development to the north and commercial buildings are located on the west side of Glassenbury Road. The site falls entirely within the High Weald Area of Outstanding Natural Beauty AONB.

1.2.3 There are several listed buildings in the vicinity of the site, including:

(i) Hartley Gate Farmhouse (Grade II listed);(ii) Hartley Farmhouse (Grade II listed);(iii) Bull Farm House (Grade II listed); and(iv) Barn 50 Yards North of Bull Farmhouse (Grade II listed).

1.2.4 The surrounding area is characterised by the settlements of Hartley and Cranbrook, residential development with in and around those settlements, commercial developments, farmsteads and agricultural buildings as well as open agricultural land.

1.2.5 To the northeast are residential properties. Opposite the site is the well-established Hartley Dyke Commercial Centre, consisting of Juniors Day Nursery, the Hartley Dyke Coffee House and Farm Shop and several other commercial premises.

1.2.6 In terms of public transport, there are two bus stops located approximately 160m to the east of the site providing a service to Maidstone Town Centre, Loose, Staplehurst, Cranbrook and Hawkhurst. Staplehurst, approximately 10km to the north of the site, provides a regular train service to London, with up to 3no. trains per hour in peak periods (travel time under 1 hour to London Charing Cross and Cannon Street).

1.2.7 The site is not subject to any wider policy designations. The Environment Agency mapping also confirms that the site does not fall within a flood risk zone.

1.2.8 A high pressure water main and overhead power lines run through the site and represent design constraints.

1.2.9 The Hartley Road frontage of the site has been subject to previous smaller scale development proposals as follows:

- 84/00175/OUT - Outline application for 8 semi detached dwellings -Refused; and• 96/00283/FUL - 3 Detached dwellings – Refused. • 17/00795/FULL - Demolition of four derelict agricultural buildings and construction of four detached dwellings with associated parking, landscaping and access from Hartley Road (Withdrawn 08/02/18 following publication of officer's recommendation to refuse in advance of Planning Committee meeting).

1.2.10 The area immediately east of the site, between the built up area and Hartley Gate Farmhouse, has been subject to a planning appeal (APP/M2270/W/18/3203543) for the erection of 8 homes. The appeal was dismissed, but in doing so the Inspector narrowed the sole issue to the effect of the proposed vehicular access on highway safety (i.e. it was suitable in all other respects). The Inspector endorsed the principal of development and had no issue with the impacts of that scheme on the AONB, the character and appearance of the area and on settlement morphology.

1.2.11 Given the suitability of Fernham's land, an outline planning permission was progressed for 27 new homes and registered under Tunbridge Wells planning application reference 19/02170/OUT. However, this application was refused by Tunbridge Wells Borough Council for seven reasons:

(1) The development would cause significant harm to the rural character of the area, would have more than a minimal impact on the landscape character of the locality, would have a detrimental impact on the landscape setting of Cranbrook and would fail to conserve and enhance the special character of the High Weald Area of Outstanding Natural Beauty. It is therefore contrary to Policies LBD1, EN1 and EN25 of the Tunbridge Wells Borough Local Plan 2006, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy 2010, the aims and objectives of the Borough Landscape Character Area Assessment 2017 and the National Planning Policy Framework 2019(2) The application fails to demonstrate that safe and suitable access to the site can be achieved for all users. It is thereby in conflict with Part 9 of the National Planning Policy Framework 2019, and saved policy TP4 of the Tunbridge Wells Local Plan 2006.(3) There is insufficient evidence to demonstrate that the proposal can result in a net gain in biodiversity. The proposal is thus contrary to Para 170 the National Planning Policy Framework 2019(4) The proposal would harm the setting of nearby listed buildings. It is not considered that there are sufficient public benefits, or any other material considerations, that outweigh this harm. The proposal is thus contrary to saved policy EN1 of the Tunbridge Wells Borough Local Plan 2006, Core Policy 4 of the Tunbridge Wells Borough Core Strategy 2010 and the National Planning Policy Framework 2019(5) The proposal would not provide developer contributions towards Secondary Education, Youth Provision and the Cranbrook Hub projects to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019, the Planning Practice Guidance, Core Policy CP1 of the Tunbridge Wells Core Strategy 2010 and Policies CS4 and R2 of the Tunbridge Wells Borough Local Plan 2006.(6) The proposal would not provide affordable housing within the proposed development. It would therefore conflict with the National Planning Policy Framework 2019, Core Policy 6 of the Tunbridge Wells Core Strategy 2010 and the Affordable Housing Supplementary Planning Document.(7) The proposal would not provide developer contributions towards new single premises for the three General Practices located in Cranbrook to mitigate the impact of the proposal. It would therefore conflict with the National Planning Policy Framework 2019 and Core Policy CP1 of the Tunbridge Wells Core Strategy 2010.

1.2.12 Not only did the Council refuse this application, but in seeking to defend the appeal the site was also removed from the Local Plan pre-submission draft.

1.2.13 An appeal was subsequently lodged (Appeal Ref: APP/M2270/W/20/3247977) during the life of which reasons for refusal 5 to 7 were resolved prior to determination (through the provision of a suitably worded Section 106 Legal Agreement). Reason for refusal 3 was also overcome as a result of providing further ecology information and a further commitment within the Section 106.

1.2.14 The main issues for the appeal (and so wider site suitability) were narrowed to:

(1) The impact of the proposed development on the character and appearance of the area including landscape character and the AONB;(2) Highways safety; and(3) Heritage harm.

1.2.15 The appeal was dismissed in February 2021, but in doing so the Inspector provided clear findings on a number of key matters that were in dispute and formed the basis for deleting the allocation. We summarise these findings below. A full copy of the appeal is included as Appendix 1.

Heritage

1.2.16 Paragraphs 50 to 64 directly responded to the heritage evidence, with the Inspector ultimately endorsing the appellant's evidence that heritage harm would be restricted to Hartley Gate Farmhouse only and in the less than substantial range. The Inspector rejected harm to wider assets. At paragraph 150 he concluded:

'Given the relatively low level of harm I have found in relation to the farmhouse and the significant housing and other positive attributes I have identified from the scheme, I find the heritage harm arising would be outweighed by the public benefits identified. Accordingly, the Framework does not provide a clear reason for refusing the development proposed in this specific regard'.

1.2.17 In our opinion, the Inspector provided a very clear conclusion that reason for refusal 4 was not a reasonable basis to withhold consent, nor did it provide a clear basis for disengaging the presumption in favour of sustainable development. As such, we consider the over estimation of heritage impacts contributed to an otherwise suitable allocation being omitted from the pre-submission plan.

Access and Highway Safety Matters

1.2.18 Paragraphs 65 to 88 of the appeal directly responds to the highway evidence. The Inspector's summary of highway matters stated:

'86. The A229 is a busy classified road. It reflects the accompanying dangers and relatively harsh pedestrian environment that might be expected, and improvements can always be made. Nevertheless, the evidence presented demonstrates the local highway network has no particular design flaws, and is capable of withstanding the relatively modest increase in vehicle and pedestrian movements that would arise from the scheme without incurring further undue additional risks or inconvenience. I also note possibilities for further detailed refinements to the scheme, particularly in terms of facilities for pedestrian movement, and which were discussed at the Inquiry in relation to a possible planning condition should the appeal be allowed.

87. The Framework requires that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. The evidence against the proposed scheme falls significantly short of such a threshold.

88. I therefore conclude that the proposal would provide safe and suitable access for all users and would not be contrary to Policy TP4 of the Local Plan to the extent that it seeks, amongst other things, to ensure that proposals provide a safely located access with adequate visibility and that the traffic generated by the proposal would not compromise the safe and free flow of traffic or the safe use of the road by others'.

1.2.19 In our view, the Inspector provided a very clear conclusion that reason for refusal 2 was not supportable nor a reasonable basis to withhold consent and that the access was suitable for the quantum of development proposed. As such, we consider the dismissal of the site on highways grounds also wrongly contributed to the site being omitted from the pre-submission plan.

Location

1.2.20 At paragraph 117 the Inspector confirmed that the scheme enjoys a moderately sustainable location. Paragraph 124 also acknowledges that the Framework requires that, to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities and that planning policies should identify opportunities for villages to grow and thrive, especially where this will support local services. The scheme was deemed to be consistent with this aim and so modest weight was attached to these economic factors as a benefit.

Major Development

1.2.21 At paragraph 155 the Inspector confirms that the appeal scheme was not 'major' development.

Landscape Impact

1.2.22 Having regard to the above, reasons for refusal 2 to 7 were either overcome or dismissed by the Inspector. The only matter between parties relates to reason for refusal 1 and the associated impact upon the AONB.

1.2.23 In considering the conclusions, at paragraph 42, the Inspector is clear that the site may have potential for reintroduction of some sensitive built form, albeit a better balance has to be struck in relation to the legibility and distinctiveness of the AONB.

1.2.24 At paragraph 49 he concludes that the scheme would, by virtue of the extent of built development proposed (rather than principle) would be significantly harmful to the character and appearance of the appeal site and its surroundings.

1.2.25 In summary, all of the above commentary provides a clear basis to suggest that a revised scheme could integrate within the AONB setting. The Inspector stopped well short of concluding the site was unsuitable for development per se and as such we consider the deletion of the site, and subsequent impact it has had on evidence base and thus it is neither justified nor positively prepared.

1.2.26 We explain the wider relevance of the site being wrongly omitted in the context of the wider strategy within the subsequent sections of this representation.

Place Shaping Policies

1.3.85 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

1.3.86 Policy STR/CR1 sets the proposed strategy for Cranbrook and Sissinghurst parish and states that Approximately 415 to 429 net new dwellings will be allocated. This represents a substantial reduction on the 718-803 new dwellings that were proposed as part of the Regulation 18 plan. Furthermore, the draft allocations for Hartley have been removed in their entirety.

[TWBC: for extract of proposed proposal map for Cranbrook see full representation attached].

1.3.87 Based on the above context, the place shaping aspects of the strategy are unsound and require modification, including the redistribution of housing proposed at Tudeley to genuinely deliverable sites like our client's land at Hartley that is not major development and is not requiring of an 'exceptional circumstances' case for the land to be released.

1.3.88 As outlined above, Hartley is a moderately sustainable location as found by the Inspector during the course of the recent appeal. Indeed, it is situated within the heart of the hamlet of Hartley and in close proximity to the range of services available in Cranbrook.

1.3.89 The site benefits from good access to public transport links. The bus stops in closest proximity to the site are located on the A229 Hartley Road, approximately 3 minutes' walk to the south of the site access. From these bus stops, Routes 5 and 349 are accessible providing links to Maidstone and Hastings. Further bus stops are located approximately 5 minutes' walk to the north of the site access, again on the A229 Hartley Road. In addition to Routes 5 and 349, Routes 267 and 268 can also be accessed providing links to Tonbridge and Tunbridge Wells. Accordingly, there are opportunities for access to services and facilities without reliance upon private vehicle.

1.3.90 Staplehurst Railway Station is located approximately 11km to the north of the site (via the A229 Hartley Road), equating to a 14-minute drive. From this station, destinations including London Charing Cross, Tonbridge, Ramsgate and Dover Priory can be accessed, with trains departing to and from London up to six times per hour during weekday peak periods. Additionally, Etchingham Railway Station is located approximately 12km to the west of the site by road and provides access to regular train services between Hastings, Tunbridge Wells and London.

1.3.91 Within the vicinity of the site, there are a number of Public Rights of Way (PRoW) provided, as shown in Figure 2 2 of the supporting Transport Statement [CD6.10]. These routes provide safe, pleasant off-carriageway access to the surrounding countryside. National Cycle Route 18 routes along Park Lane and Water Lane, approximately 1.1km to the south of the site access. This route provides a link between Canterbury and Tunbridge Wells, via Ashford and Tenterden.

1.3.92 In addition to transport linkages, there is access to services by foot. Hartley Farm House and Coffee Shop are accessible from the site in under a five-minute walk. Additionally, a number of services and amenities can be accessed in nearby Cranbrook. These services include further public transport facilities, a supermarket, places of worship, primary and secondary schools, a doctors' surgery, dental practices, banks, a pharmacy, a post office and several public houses. Cranbrook can be accessed via a 25-minute walk, a 6-minute cycle, a 9-minute bus journey or a 4-minute drive.

1.3.93 From a wider perspective, achieving sustainable development means that the planning system has three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives). These being economic, social and environmental objectives.

1.3.94 In this respect, the site is suitable, sustainable, available and deliverable for development, and would help contribute to the borough's immediate housing need in a timely manner. Household expenditure generated by future residents will help to support economic activity locally and help to sustain the jobs and services within the local area. The new dwellings will also contribute to the public purse in respect of Council Tax and the New Homes Bonus. The scheme will also be capable of contributing to local services and infrastructure.

1.3.95 The site has the opportunity to provide for a quality residential development to meet the needs of the local population. The proposed development can provide circa 25 additional homes (40% of

which would be affordable) to meet this supply and therefore can positively contribute towards the social role identified in the NPPF. This includes a policy compliant mix of market and affordable units.

1.3.96 Having regard to these matters, we challenge the LPA's deletion of the site. Paragraph 103 of the NPPF is clear that the planning system should actively manage patterns of growth and development should be focused on locations which are or can be made sustainable through limiting the need to travel and offering a genuine choice of transport modes. The close proximity of the site to Cranbrook and the services offers residents far greater access to facilities than many of the smaller rural settlements that have defined LBD such as Benenden, Brenchley and other tier three settlements. Accordingly, in a boroughwide context, the appeal site is sustainable.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.96 Having regard to these matters, we challenge the LPA's deletion of the site. Paragraph 103 of the NPPF is clear that the planning system should actively manage patterns of growth and development should be focused on locations which are or can be made sustainable through limiting the need to travel and offering a genuine choice of transport modes. The close proximity of the site to Cranbrook and the services offers residents far greater access to facilities than many of the smaller rural settlements that have defined LBD such as Benenden, Brenchley and other tier three settlements. Accordingly, in a boroughwide context, the appeal site is sustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., who seek to support the site currently drafted for providing housing and a significant community facilities at Sissinghurst (under Policy STR CRS 1), subject to important modifications which ensures the viable delivery of the site.

[TWBC: Above comment from covering email]

Fernham Homes Limited (FHL) is promoting land south of The Street, Sissinghurst ("the Site") for residential development and a new village hall. It is welcome that the Pre-Submission Local Plan ("the Plan") proposes to allocate this site for development and it is in this context that FHL wishes to express its general support for the Plan's strategy for Sissinghurst.

Draft Policy STR/CRS 1 sets out the Plan's ambitions in respect of Sissinghurst which is based on the provision of 38 new dwellings over the plan period. Paragraph 5.277 says Sissinghurst is identified as having some growth potential, which is regarded as commensurate with its services and constraints, also following testing of higher development levels. FHL supports the apportionment of this level of growth to the village as it will help deliver the Plan's strategic objective of improving infrastructure, local services and amenities in line with community needs and to ameliorate the loss of Green Belt and encroachment within the Area of Outstanding Natural Beauty in order to meet development needs.

As the Draft Policy recognises, development in Sissinghurst brings the need to mitigate impacts on local infrastructure including recreation provision. We consider that these requirements have been informed by a comprehensive understanding of local infrastructure needs as set out in the Infrastructure Delivery Plan (IDP). However, as is recognised within paragraph 5.282 of the Plan's supporting text, it is also proposed that St George's Hall at Sissinghurst is re-provided as part of Policy AL/CRS 6 Land south of The Street, Sissinghurst (the site area includes St George's Hall), which requires a replacement community hall as part of the delivery of the site allocation. FHL suggests that wording of this Paragraph

should be reconsidered as the intention, following lengthy discussions with the Parish Council and St Georges Institute, is not to re-provide this same facility, but to provide new facilities of an altogether different and improved offering.

In addition to providing the land for the new village hall, the Site can also provide a proportionate capital contribution. However, for the reasons set out in FHL's representations to Draft Policy AL/CRS 6, in the event that the requirement for providing 30 percent affordable housing were not to be deleted in order that an independent and site-specific viability considerations can be taken into account as part of any planning application, it is strongly considered that other sites that are being brought forward in Cranbrook and Sissinghurst should also provide financial contributions towards the hall's construction in order to mitigate the impact of these sites on community provision.

To support this contention, FHL would note that the Borough Council has already secured a financial contribution towards the provision of a new village hall at Horsmonden under planning permission reference 18/01976/FULL in relation to 49 dwellings at Gibbet Lane/Furnace Lane, Horsmonden. The relevance of this is that those contributions were sought despite another site in Horsmonden also being allocated with the criterion that a village hall would be provided. Therein lies the same principle point as at Sissinghurst, that the burden of costs associated with the provision for the community facility should be shared (or 'pooled') across development sites within the same area, unless the provision for the community facility is required in order to make the development acceptable in planning terms. In which case the viability of other obligations, including that of affordable housing provision should also be accounted.

Given the above, FHL has requested a modification to Draft Policy STR/CRS1 as set out below to recognise the need for a new village hall and requirement for sites coming forward in the village to contribute towards its provision, to be applied only in the event that the requirement for providing 30 percent affordable housing were not to be deleted from draft Policy STR/CRS1, in order that an independent and site-specific viability considerations can be taken into account as part of any planning application.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Criterion 9. Seek developer contributions, either in kind (normally land) and/or financial, from residential schemes to be used towards the provision of:

g. a new Sissinghurst village hall and associated parking.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land South of The Street, Sissinghurst for development and is seeking changes to Draft Policy STR/CRS 1. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to this Draft Policy and to articulate its case for suggested changes as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

These representations are submitted on behalf of our esteemed clients and local housebuilders Fernham Homes Ltd., who seek to support the site currently drafted for providing housing and a significant community facilities at Sissinghurst (under Policy STR CRS 1), subject to important modifications which ensures the viable delivery of the site.

[TWBC: Above comment from covering email]

Fernham Homes Limited (FHL) is promoting land south of The Street, Sissinghurst ("the Site") for residential development and for a new village hall. It is welcome that the Pre-Submission Local Plan ("the Plan") proposes to allocate this site for development and it is in this context that FHL wishes to express its general support for Draft Policy AL/HO2, as elaborated in our further representations to the policy. However, there are several detailed requirements set out by Draft Policy AL/HO2 which are unsound for want of justification, effectiveness, and consistency with national policy thus requiring modification. The reasons for this are set out below:

The Policy seeks to allocate the Site for providing 'approximately 20 dwellings, of which 30 percent shall be affordable housing', together with the provision of a replacement village hall and associated parking.

FHL remains fully committed to providing land on the Site for a new village hall as well as a proportionate capital contribution towards its construction, as part of a housing development. However, the size and nature of the new village hall and therefore its land take is still the subject of discussion with the local community and it is not justified at this stage for the Plan to pre-empt the costs of the land and build required for it.

FHL has commissioned a comprehensive Framework Plan which has been informed by a full understanding of the Site's opportunities and constraints. The Framework Plan demonstrates how 20 dwellings and a new village hall can be provided on the Site in a manner that fully respects the local character and context as well as the detailed requirements of Draft Policy AL/CRS 6.

As a general strategic point, it is essential to the overall soundness of the Plan that it demonstrates it has exhausted the possibility of directing proportionate growth towards sustainable sites outside of the Green Belt and Area of Outstanding Natural Beauty (AONB). Optimising the potential of sites that have been allocated in this area is vital to ensuring that encroachment into the Green Belt and AONB is minimised.

Criterion 1 - Vehicular access into the site to be informed by a highways assessment, to include provision of adequate visibility splays within the site and/or on highway land

FHL is working with the Parish Council at St George's Institute and would like to provide assurance that all land required for the delivery of the Site and adequate visibility splays is now entirely within the control of the developer.

As a moot point, Paragraph 5.331 of the Pre-Submission Local Plan says 'there is currently a lack of vehicular access into the site'. Whilst it is agreed that a new access will be required to facilitate development, it is not true to say that there is a lack of vehicular access, as the existing double garages and St George's Hall are both served by existing accesses.

Criterion 3 - Development to have regard to the setting of the Sissinghurst Conservation Area and nearby listed buildings

The vast majority of the Site is not visible from the nearby Sissinghurst Conservation Area or nearby Listed Buildings. However, it is agreed that the Site is visible from public vantage points within the Sissinghurst Conservation Area, and therefore it is sensible that regard is had to the setting of the CA. It is worth noting that Paragraph 5.333 of the Pre-Submission Local Plan says 'there are listed buildings adjacent to the site'. Whereas the boundaries of the site are known to abut the boundary of the curtilage of only one listed building (singular).

Criterion 6 – Provision of replacement village hall and associated parking

FHL remains committed to working with the local community to play its part in the delivery of a new village hall. Village Hall proposals are at an advanced stage, with public consultation to commence in due course. It is clear from work carried out to date that the requirement is not for a replacement of the existing St George's Institute with a similar facility, but a requirement to deliver a completed new, larger and improved village hall facility. Associated parking provision will also significantly increase above that which is currently provided.

The inclusion of this Criterion is supported in principle and the provision of these facilities should be paramount as part of any development brought forward. However, there are strong viability which indicate that the Site would not be able to deliver both the new facilities required plus a 30 percent affordable housing provision. It is strongly considered that the viability merits of the Site must be considered in detail at the planning application stage.

By virtue of the requirement for providing 30 percent affordable housing, in addition to the site-specific requirement for providing a new village hall, it is considered that Policy AL/CRS6 fails to achieve this, and for that and the above reasons the requirement for providing 30 percent affordable housing should be deleted in order that an independent and site-specific viability considerations can be taken into account as part of any planning application.

Criterion 8 - A suitable legal mechanism shall be put in place to ensure that the provision of the replacement village hall is tied to the delivery of the housing, at a suitable stage of the development, to be agreed at the planning application stage

Whilst the Site can provide the necessary land and an appropriate capital contribution for a replacement village hall to be secured through legal agreement at suitable trigger points, it is clear that the costs associated with the provision of the new village hall facilities and associated parking could not be accounted for at this early stage of the Plan-making process. It is important that any planning obligations, as well as being necessary to make the development acceptable in planning terms, must also directly relate to the development proposed and be fairly and reasonably related in scale and in kind to it (National Planning Policy Framework, paragraph 56).

However, it is strongly considered that it is not appropriate that the Site is required to both make a provision for the new village facilities and also provide a substantial provision for affordable housing. There are strong site-specific viability grounds which demonstrate that the provision of both affordable housing and a new village hall will make the site unviable.

Whilst FHL is completely behind this and committed to providing this improved facility, in this instance, the new village hall will not only benefit future residents of the Site, but also the village at large and other sites that have been allocated around Cranbrook and Sissinghurst.

Therefore, in the event that the requirement for providing 30 percent affordable housing were not to be deleted in order that an independent and site-specific viability considerations can be taken into account as part of any planning application, it is strongly considered that other sites that are being brought forward in Cranbrook and Sissinghurst should also provide financial contributions towards the hall's construction in order to mitigate the impact of these sites on community provision.

As set out in FHL's representations to Draft Policy STR/CRS 1 (The Strategy for Cranbrook and Sissinghurst parish), this should be expressly recognised within the Plan as well as in Draft Policy AL/CRS 6. We propose that this clause is altered in accordance with the schedule of proposed modifications below in order to make Draft Policy AL/CRS 6 consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This site, as defined on the Cranbrook and Sissinghurst Policies Map, is allocated for a mixed use scheme, including residential development providing approximately 20 dwellings, ~~of which 30 percent shall be affordable housing, (or) unless otherwise demonstrated to be viable,~~ and a replacement community hall

Criterion 6 - Provision of ~~replacement~~ new village hall and associated parking

Criterion 9 - Contributions are to be provided to mitigate the impact of the development, in accordance with Policy STR/CRS 1, and taking into account the viability of the delivery of the development, together with the provision of the new village hall facility and associated parking.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Fernham Homes Limited is promoting Land South of The Street, Sissinghurst for development and is seeking changes to Draft Policy AL/CRS 6. Fernham Homes Limited requests participation in the hearing sessions in order to contribute to discussions in relation to the Site and to articulate its case for why for modifications are necessary for the soundness of Draft Policy AL/CRS 6, as well as to address any relevant points raised by the Local Planning Authority, the Inspector or by stakeholders.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Fernham Homes (hereafter referred to as 'Fernham') in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

Development Management Policies

1.3.97 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.3.98 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.3.99 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.3.100 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.3.101 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction.

Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to provide clear direction to the user.

1.3.102 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a supporting SPD not policy.

1.3.103 Turning to housing policies, policy H2 states that development should make efficient use of land, having full regard to the context of the site, including its character, landscape setting, topography, surrounding built form, and access to infrastructure and services.

1.3.104 In our view, this policy adds nothing beyond the advice contained in the NPPF and therefore adds little. It also goes against the principle of preparing succinct Local Plans.

1.3.105 Policy H3 sets out affordable housing requirements. Whilst we support the general thrust of the objectives and the securing of affordable provision, we object to the rounding up of the calculations and contributions being based on a net rather than gross number of units. For small scale proposals this will often see the proposed percentage increase to closer to 45% and 35% respectively. Such thresholds would therefore need to be tested and justified by evidence. A pragmatic approach would be to apply traditional rounding up or down.

1.3.106 The phasing of affordable provision also needs to be sufficiently flexible so as to not prohibit wider delivery. In this regard, we consider that entering into contract with a registered affordable prior ahead of the 50% occupation should provide the certainty of delivery, but without risking a wider delay in market delivery. The timing of affordable delivery should also be dictated by scale, size and type of site.

1.3.107 The Council will be aware of wider country wide discussions regarding the viability of providing social rented accommodation as part of a wider offer. Such provision is becoming increasingly difficult and without robust policy in place that addresses this matter, this matter is likely to significantly slow delivery.

1.3.108 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.3.109 Finally, paragraph 6.335 has regard to development viability and places the onus on the Developer to demonstrate the 'price paid for land' when testing viability. It also requires applicants to factor in on site mitigation measures as well as measures to mitigate the impact of development. By way of response, viability assessments should be based upon Benchmark Land Value in accordance with the NPPF/NPPG guidance. Furthermore, the detailed constraints and infrastructure needs are not always known at the outset, nor is it possible to make informed decisions on mitigating matters such as biodiversity net gain until late in the development process. As such, viability cases must be assessed in an open manner based on the merits and unique circumstances of the sites on their own merits. Failure to recognise this means that the plan is neither positively prepared nor effective.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Fernham Homes in response to the Tunbridge Wells Borough Council Pre-submission Local Plan development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village.

1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.108 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Comment

Consultee	Mrs Jill Field [REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Jill Field [REDACTED]
Comment ID	PSLP_855
Response Date	26/05/21 14:13
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Jill Field
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_855 and PSLP_856]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the

Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);

- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new

primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

Comment

Consultee	Mrs Jill Field [REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Jill Field [REDACTED]
Comment ID	PSLP_856
Response Date	26/05/21 14:13
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.2
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Jill Field
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_855 and PSLP_856]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The **Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the

Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);

- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new

primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites

158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Katharine Findlay
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived here in Capel for 18 years. We came down from London to live in a quiet village atmosphere surrounded by beautiful countryside. We worked here for 7 years and now are enjoying our retirement surrounded by farmland and enjoying friends in the area.

We have noticed a build up of traffic here, which alarms us. Flooding has happened quite a few times in Five Oak Green. The proposed development is overwhelmingly inappropriate for our rural location. Including the Paddock Wood and East Capel (Policy STR/SS1)

Environment

This area is green belt land, which is so important to keep. This is an area of outstanding natural beauty. The level of housing proposed would destroy the area and take away our enjoyment of the green spaces, walking, watching nature and peacefulness.

Transport/ Road

As public transport is poor, our roads are totally inadequate for more traffic. The proposed road - "Five Oak Green bypass" will mean the village is divided , and some villagers will be unable to walk to the only shop and will also be a barrier to community life.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The plan for such a large town on green belt land in such a delicately balanced rural environment seems a rushed proposal to please the governments targets and not local needs.

Have brown sites been considered or other land with good infrastructure in place already.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Policy AL/HA 5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The removal of Site 413 from the Local Plan was followed by reinserting a part of it (the 'Site' at 0.79 acres) to take a medical centre, all within a very few weeks at the start of this year and with no consultation. This does not seem to fulfil the LPA's 'duty to cooperate'.

Traffic flows along Rye Road are only getting progressively worse with the passage of time and KCC Highways have already stated that the Hawkhurst crossroads is at full capacity. The proposed medical centre would not only incorporate the village's two doctors' surgeries but would also contain other medical facilities. There are indications that car parking for over fifty cars would be needed on site. Patients living on the other three sides of the crossroads away from Rye Road would most likely drive to the centre given that the Site is a good ten minutes' walk from the crossroads. The result would be an increase in traffic flow along Rye Road and severe congestion on Birchfield Grove which is a twisting road initially designed to service 26 houses (which were sold to the buyers on that basis). On these considerations the Policy is not sound, not positively prepared and not justified.

The Site is on top of the ridge on which most of Hawkhurst stands and dominates the countryside to the north. This is a particularly beautiful part of the AONB and the siting of the medical centre here with a large car park would be a discordant feature, not to say a blight, on the landscape. In 2014 an appeal relating to an application to build houses in this area, then called Site 64, was dismissed citing the damage that would be done to the AONB (13/00014, 14 April 2014). The same principles apply now as they did in 2014. King George V Playing Fields had appeared in the Local Plan with provision for a medical centre until that was changed, again without consultation, earlier this year. This site is much more appropriate to host a medical centre given that the site could accommodate this in addition to the community centre planned in the same area and given too that damage to the AONB would be much less since it is already somewhat developed and has a much less commanding view of the surroundings. Given that a better alternative exists, there are no 'exceptional circumstances' that would justify the Policy. On AONB considerations, therefore, the Policy is not sound, not positively prepared and not justified. Nor is it consistent with National Policy given the conditions set out in Section 15 of the National Planning Policy Framework.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The only modification that could make the Local Plan compliant and sound in relation to Policy AL/HA 5 would be its removal from the site proposed and siting it at King George V Playing Fields.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived at The Old Vicarage with my family since 1998 and remain appalled at the continuing proposals for Tudeley Village and TWBC's apparent disregard in the PSLP to the widely and strongly held opposition to the unsound possibility of "Tudeley Village". This response relates to site allocation.

Section 8 of the Sustainability Analysis (Potential Development Sites) shows that Plot 440 is classed a reasonable alternative site within Table 49 and Figure 12 but is not covered at all within Appendix H so is excluded for no reason and no analysis or reasoning for that has been put forward by TWBC.

I am the joint owner of The Old Vicarage and its land, all of which forms Plot 440. There is no logical or coherent reason why this 3.5 acre/1.41 hectare site should not have been allocated for development in the PSLP. It is large enough to provide a yield of over 10 dwellings and possibly in excess of 30 (see the SHELAA referred to in the strategic assessment undertaken by TWBC). It has good access on two sides (east and north) of the plot direct onto the B2017 and new entry/exit road entrances could be made onto this site. For the plot to be not allocated appears to be in breach of TWBC methodologies, possibly because of TWBC's reliance on the draft Tudeley garden settlement proposal. It is also unclear why there is an insistence on 10 units per site; it might be preferable to spread small pockets of planned development of less than 10 units within existing settlements throughout the Borough, even within Capel Parish. Plot 440 is also well suited to such a smaller scale development as well.

Whether or not the proposal for the garden settlement at Tudeley (site SS3 in Sustainability Appraisal section 8 Figure 12) is accepted in whole or part, the current draft transport infrastructure proposal suggests that a large roundabout will be constructed at the junction of Hartlake Road and Tudeley Road/Crockhurst Street (B2017) which is likely to require some land to be taken from plot 440 (being land currently forming part of the Old Vicarage curtilage). It appears also to suggest widening of the B2017 between Tonbridge and two proposed junctions on the western and southern sides of the draft Tudeley garden settlement (see map 33 Transport Connections following s.5.229 of the PSLP). This proposed widening includes the entire section of the B2017 adjoining Plot 440 and is likely to require some land to be taken from it. No consultation about these proposals has taken place with the owners of plot 440.

Plot 440 falls on the perimeter of the AONB represented by the B2017. It adjoins the B2017 and is already impacted by traffic on the north and east boundaries of the plot that back onto the B2017. The views to open farmland and woods would be retained on the other two sides of the plot (west and south). The PSLP provides for a strategy to use AONB land spread across a number of settlements.

Whether or not the draft garden settlement at Tudeley is approved, housing could be provided on plot 440; it is inappropriate and unsound to permit or consider an initial development on site SS3 of up to

2,100 houses in the period to 2038 with potentially more to follow and to not permit development on plot 440. Part of that site SS3 is immediately opposite plot 440 and the planned road infrastructure in relation to that is going to impact negatively on plot 440.

If the garden settlement were refused, then plot 440 is still viable for development. The current transport infrastructure assists without additional cost as the plot is adjacent to the bus stop in Crockhurst Street opposite All Saints Church and opposite the bus stop at the Hartlake Road intersection. The plot boundary is next to the B2017 (see above). As is well known Tudeley is well placed for access to Tonbridge and the rail network, based on current road use. A permissive pathway exists that is accessed from the southern boundary of the plot and this leads to various footpaths and bridleways forming part of the High Weald network.

This site comprising plot 440 does not suffer from flooding and is within the existing urban settlement of Tudeley. It is not owned by the Hadlow Estate, although it adjoins Hadlow Estate land on all boundaries apart from the B2017 boundary.

It is noted that the proposed LBD has not been settled but why is the whole of the existing urban areas of Tudeley not incorporated? Plot 440 is within the land referred to as Option 3 in growth options for Tudeley in the Sustainability Analysis of February 2021 (see section 6.2.32 Figure 6 and Table 28). It is noted most of that option refers to land to the south and east of the current settlement and not the part of the existing hamlet where plot 440 is located. The rejection of growth option 3 appears unsound as in relative terms it scored as highly or better in some aspects than growth options 1 and 2. It is perverse that a draft proposal for a new settlement that radically changes an existing urban settlement excludes the whole of existing settlement as an area for limited building plots. As owners of plot 440 we are stakeholders in future infrastructure planning, assuming the draft garden settlement is approved in whole or part and should take part in discussions leading to future supplementary planning documents.

NOTE:

This response relates to the “not allocated” plot 440 of which I am joint owner (see above). I object to the unsound concept of the draft Tudeley garden settlement (a proposed town not a village within what PSLP describes as a small hamlet) and have made separate comments in relation to that. For the avoidance of doubt, the comments in this section/response are not to be taken or read as being supportive of the draft Tudeley garden settlement proposal; quite the opposite in fact.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I have been a resident of Tudeley since 1998. The draft proposals for site SS3 directly impact my property. In addition to that I consider that due process has not been followed in relation to my own property as per my comments in section 5 above.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See section 5 above

Future Notifications

Respondent's Name and/or Organisation	Nicholas Fisher
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived at The Old Vicarage with my family since 1998 and remain appalled at the continuing proposals for Tudeley Village and TWBC's apparent disregard in the PSLP to the widely and strongly held opposition to the unsound possibility of "Tudeley Village".

The creation of a proposed garden village settlement at Tudeley resulting in the first instance in 2,100 dwellings in the period to 2038, will cause immense harm to the residents of the Parish of Capel and to the residents of Tonbridge. It is completely out of scale with the current pattern of habitation in Capel Parish and particularly so in the case of Tudeley itself where no new houses appear to have been built or permitted to be built since I moved here with my family in 1998. In its own words TWBC describes Tudeley as a "small hamlet".

The methodology and justifications used to promote a garden settlement on Site SS3 appear flawed. There is a reliance on site SS3 as one of 2 major developments to provide over 50% of the proposed housing for the period to 2038. Both this site and site SS1 are in Capel Parish with only 2% of the TWBC population. Capel Parish has 918 dwellings and the plans for sites SS1 and SS3 would increase this number by approximately 500%. Over half of those are planned for site SS3.

The PSLP and Local Plan are almost entirely dependent on the successful implementation of the proposed garden settlement in Tudeley and the expansion of Paddock Wood by building on East Capel. I believe the planned units comprise over 60% of the new housing requirement. If these sites fail to deliver, which is possible bearing in mind realistic timeframes for planning and so on, then the associated proposed infrastructure that is entirely reliant on developer capital would also never be realised. This appears to stack risk on risk, where both areas of development in Capel Parish are inextricably linked and the failure of one is likely to lead to the collapse of the other and as a result the whole plan would fail. This does not appear a sound basis on which TWBC should rely.

The plan preparation process suggested by the PSLP did not include the Tudeley site SS3 until after the Issues and Options Process in 2017. This means that the largest housing area in the proposed local plan did not go through most of the plan preparation process. A great deal remains unclear.

The Issues and Options process led to most people (60%) wanting a growth corridor led approach. Less than half wanted a garden settlement and that was at a time when it was not clear a garden settlement would involve destruction of Green Belt. Protecting Green Belt was a key priority for people who participated in the Issues and Options consultation. TWBC's own Green Belt study shows harm caused by the release of Green Belt as high.

Another purpose of Green Belt is to prevent urban sprawl but the PSLP shows site SS3 as creating a settlement that in effect stretches to the edge of the planned STR/SS1 at Paddock Wood thereby creating a small conurbation.

It is unclear from the methodology if the conclusions reached in the spatial strategy are justified. Frittenden and Horsmonden that both share similar characteristics to site SS3, as does the Blantyre site at Goudhurst, which is partially brownfield, have all been discarded.

Other significant potential sites for development, for example in the A21 corridor and also at Castle Hill have been rejected. Is it correct that the proposed settlement at Tudeley is the only reasonable place for an entirely new settlement? It appears insufficient attention has been paid to the brownfield sites available within the Borough.

Most people living in the proposed Tudeley settlement will drive cars, despite initiatives to encourage bus and bicycle use. The costs of infrastructure on the Tonbridge & Malling side of the boundary will have to be carried by Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings. The cost to Tonbridge based businesses due to traffic issues may drive businesses from the area. There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, and not Tunbridge Wells or Paddock Wood, because Tonbridge is closer and more convenient.

It is foreseeable that people living in the proposed Tudeley settlement will use Tonbridge Station, rather than Paddock Wood, and Tonbridge town services will need more parking. The increase in traffic will be more than Tonbridge can cope with. The main roads in Tonbridge are already full at peak times and can't be made wider in most places.

The employment proposed within the Tudeley settlement is unlikely to be able support the income requirements of approximately 2000 individuals/families (using the unit numbers as a guide) and so it is inevitable that residents will be working elsewhere generating more road usage.

The road infrastructure is already inadequate to deal with the flow of current traffic. There will be a significant increase in traffic into Tonbridge from the B2017, exacerbating the extreme traffic congestion that exists on this road every morning and to a lesser extent in the early evening. The infrastructure proposals for the whole site are not certain and appear to be reliant on potential developer contributions. The necessary infrastructure for a viable settlement goes far wider than just roads. It is unclear how necessary infrastructure can be delivered and so the proposal for SS3 may not be viable.

There will be an increase in air, light and noise pollution that will spread across the boundary to Tonbridge & Malling and create a visual scar across the landscape.

Views from Tonbridge to the Low and High Weald will be impaired, including the setting of historic assets like All Saints Church in Tudeley and the Hadlow Tower. The church at Tudeley may end up being surrounded by houses, commercial premises, bus lanes and sit next to a planned expanded B2017 with new roundabouts and junctions. That will cause great harm to its value as a heritage asset of world renown, due to the crowning jewel of its Marc Chagall windows that are unique to place and setting and represent the only installation of its type in the world. It is one of the most popular Churches in Kent by reference to visitor numbers. Planning new sight lines and other mitigation will never override the potential damage.

The draft garden settlement at Tudeley can never be conceived as one settlement as it is divided by a railway line that has two very narrow, weak crossings (one on a bridge, one under a bridge). Putting in larger crossings at two more points as per the draft infrastructure plan may be possible but it won't tie the two halves of the settlement together enough to make it one settlement. It appears that garden settlement principles may have not been followed in terms of local engagement and support. The overwhelmingly negative responses to the Tudeley garden settlement proposals in the Regulation 18 consultation are evidence of that.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove the draft plans and associated draft infrastructure plans for SS3 "(Tudeley Village)" from the PSLP and Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I have been resident in Tudeley since 1998. The draft proposals for site SS3 including in particular the draft road infrastructure proposals impact my property which is opposite part of the site.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See section 5

Future Notifications

I have been a resident of Five Oak Green for nineteen years, also working from home.

I live in the lowest part of the village and subsequently have a risk of flooding from ground water, surface water and sewerage as the drainage systems are put under stress by substantial and increasing rainfall. Storm water combines with the foul water system with a resulting hydraulic overload. Twice this year already [February and May] we have had drains and sewers overflowing and toilets unusable for days at a time. Having liquid sewerage outside our doors and across our gardens is not pleasant. The whole village has seen increasing and unprecedented amounts of flooding in the last few years and the with climate change issue it seems likely to exacerbate.

All our foul water goes to the Paddock Wood treatment plant which is antiquated, difficult to repair and frequently fails as does the equally antiquated pipework. Paddock Wood has multiple ongoing developments that were struggling to connect to the sewerage infrastructure even before hundreds more homes were given planning approval. I know Southern Water have been forced [with help of MP Greg Clarke] into promising a new pumping station which will increase the capacity to a degree [and only to a degree] but I am concerned about their ability to fulfil this promise, given their track record of failings and fines amounting to many millions of pounds. The plan for this new facility - it's cost, location and start date seem illusive despite the latest new housing developemnt of 300 houses nearing completion and more on the way. To put so much more pressure on an already failing infrastructure is illogical. It is a Southern Water general policy to only plan for five years ahead - how can this be realistic ? How can it comply with government and climate change guidelines ?

Added to this - The Capel East area is a recognised flood risk zone. However much flood attenuaton is built in to the plan with good intentions by the developers how will this stop individuals, in time, adding extensions, paving over gardens and incrementally adding to the run off. Natural flood meadows cannot be replaced by artificial measures. It is lost as vital flood management asset and puts more pressure on the Envirement Agency to provide even more flood defenses.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

---------------------------------------	------------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS 3

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived and worked in Five Oak Green for almost twenty years and am constantly aware of the flood risk and have suffered flooding to my property. This occurs when there is excessive rainfall - storm water combines with foul water to create a hydraulic overload to the sewerage system and ground water comes up to meet it. I would not wish this situation on anybody.

To build 4000+ houses on a flood plain puts them at risk and potentially exacerbates the flood risk for Tonbridge, putting even more pressure on the Leigh barrier and puts a cumulative effect on the drainage infrastructure.

Foul drainage is tackled far too late in the planning process. Southern Water does not cope with the sewerage infrastructure as it is. Areas of Paddock Wood and Five Oak Green get sewerage overflows every time it rains heavily.

Even with flood retention schemes installed, who will stop residents from paving over gardens and driveways in the future adding to an increased run-off. Should the Environment Agency be forced into attempting even more solutions that could have been avoided ?

I worry that, with the increasing number of flood events across the country, insurance companies will not be interested in insuring houses built on flood plains, the Flood Re. scheme being not available to houses built after 2009. I worry for my own ability to insure my property when the flood risk is increased all around me.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

I am writing to object under Regulation 19 Phase to the TWBC “ Strategy for Capel Parish” (Policy STR/CA1) and to the inclusion of land in East Capel in “The Strategy for Paddock Wood” (Policy STR/PW1). (Tudeley and East Capel)

I have lived in this area for 30 years and in Capel for c28years. As a family we have explored the countryside and made great use of available footpaths and facilities.

When the call for development land went out from TWBC, we specifically didn't put our 7 acres up, as we felt the area wouldn't benefit from building on acres of green fields in the parish. Our land has road frontage and is neither Green Belt nor AONB status.

I object to the proposed plan, both where it is sited and the volume it proposes. It is based on a disproven target, developer wish-fulness, and very limited insight on the scope of impact and what would need to be funded by TWBC and residents. It brings with it a huge political risk as well as commercial risk of failure, puts vast swathes of the garden of England under yet more concrete and fails to address flooding which such a site alongside, and in, a known flood risk area will bring.

I would add that we in the First World decry the 3rd World for the devastation of their natural environment, their cutting down forests and their destruction of grasslands and for the climate costs these changes bring. And here we are in Tunbridge Wells, with challenging climate targets already proposing to destroy our own, much reduced already, natural environment. The TWBC plan is to decimate 100s of acres of prime and picturesque habitats to load yet more concrete and steel in its place. It is such hypocrisy.

Locations - Why Capel.

The Borough has nearly 50 Borough Councillors, only 1 of which lives in Capel Parish. The Borough has 18 parishes and Capel Parish (1 out of all 18) is getting 60%+ of the whole Borough's target. The imbalance is both stark and cavalier. Furthermore the plan refers to Capel as 'deprived' as if that gives the borough the right to ride roughshod across the constituents wishes.

And TWBC says that Southborough's air quality management problems will be alleviated by the new town at Tudeley. That is plainly nonsense. Traffic on the A26 through Southborough would more likely increase not have it reduced by Tudeley new town. And anyway it will add the AQMA issues into Tudeley.

Plan

Over the summer of 2019 when the plan was 1st proposed there were 3000 properties available either for sale or rent within a few miles of Paddock Wood. Existing development in the area is not finding buyers. Furthermore the ONS has advised that the targets for building are too high and based on discredited calculations and TWBC has not addressed this with Government.

The plan should not be taken further until Government addresses the target numbers.

Disconnected Proposals

The new town

- 1 There is no plan to alleviate traffic problems going into Tonbridge where the road to be used is already a choke point.
- 2 There is no planned new link between the north and south Tudeley new town developments across the railway. Existing bridges and the under pass are narrow and have traffic constraints. At least 2 new bridges would be required on the planned site if the blot of development is to have any chance of being a community.
- 3 The link road to the A228 from Tudeley New Town only addresses traffic going through between Tudeley and Colts Hill. It doesn't address traffic leaking through Paddock Wood traffic up to the A21 via Matfield, nor Badsell Road traffic and Paddock wood traffic past Transfesa.
- 4 The long-standing Colts Hill Bypass in the shape now being proposed by TWBC is not long enough to address the existing issues, let alone the vastly increased volumes. Nor does it address Kent's strategic link originally seen in the 25 year old proposal (accepted by TWBC) linking Pembury to Dampiers Corner.
- 5 The new development will increase traffic along the Pembury Road into Tunbridge Wells where traffic is already at a standstill during busy periods back to the A21. There is no plan element which considers the already creaking access to Tunbridge Wells.
- 6 Consideration has not been given to Tonbridge and that side of the boroughs' boundary. Tonbridge also has traffic problems and their station is already at capacity.
- 7 This development is being seen without consideration to the planned new houses elsewhere in Kent such as in Paddock Wood, in Marden, Staplehurst, Cranbrook, Maidstone and in Tonbridge. It is foolish to consider developments as isolated projects without external factors and there is no consideration from TWBC planners of how these will interplay and impact each other. At the very least there will be a major surge in traffic, already a weak point of both TWBC today and of the submitted plans.
- 8 Pembury hospital, new just a few years ago, doesn't have planned capacity for the new household population.

The Borough planners talk about developer levies as being the answer to many problems but are known to be unreliable. As cost escalate, the levy would run short. As new things are identified, the planned budget would not cover it and local taxes would get raised or services cut.

Bus funding by Developers is promised to help manage traffic, but it is not clear how that will work and whether it will work. Nor is it clear how it is funded when development stops. And the plan appears to rely on Autonomous buses, a technology that is not yet available and for which there are many hurdles, both technical and legal. Further there is an assumption people will use buses a great deal. That is not a proven fact, in reality the age of the bus is long gone and their use is a fringe aspect whatever we might wish - The main landowner uses his car to get to TWBC, not the Bus Stop on his doorstep for example.

TWBC Historic Failure to deliver

- 1 Over 40 years ago a planned development in Paddock Wood was stopped for a while when it was found there was no sewage capacity. History repeated itself with the present Paddock Wood estates being built.
- 2 When Transfesa was developed it was on the basis that Colts Hill would be bypassed. We still wait for that, despite reclassifying a small capacity 'B' road to an 'A' road to help the process.

Alternatives:

- 1 While a green field development is attractive to developers, it isn't to the community and no use of brownfield development is in the plan. Brownfield has not been properly investigated by TWBC for delivery of any significant part of the target. And we in the Western World decry other countries who rip out indigenous woods and plains for the development of Cities, seeing a very real risk to the world's climate. And Yet TWBC are looking to foist such a concrete plateau to hundreds of acres of green fields, hedgerows and woods.
- 2 A21 built infrastructure - Available Junctions and road capacity by castle hill and its proximity to existing sewerage is an opportunity ignored by TWBC Planners

Bearing these points in mind we can have little faith in the integrity, necessity and adequacy of the proposed plan. It should be dropped and the target addressed with Government.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am writing to object under Regulation 19 Phase to the TWBC “ Strategy for Capel Parish” (Policy STR/CA1) and to the inclusion of land in East Capel in “The Strategy for Paddock Wood” (Policy STR/PW1). (Tudeley and East Capel)

I have lived in this area for 30 years and in Capel for c28years. As a family we have explored the countryside and made great use of available footpaths and facilities.

When the call for development land went out from TWBC, we specifically didn't put our 7 acres up, as we felt the area wouldn't benefit from building on acres of green fields in the parish. Our land has road frontage and is neither Green Belt nor AONB status.

I object to the proposed plan, both where it is sited and the volume it proposes. It is based on a disproven target, developer wish-fulness, and very limited insight on the scope of impact and what would need to be funded by TWBC and residents. It brings with it a huge political risk as well as commercial risk of failure, puts vast swathes of the garden of England under yet more concrete and fails to address flooding which such a site alongside, and in, a known flood risk area will bring.

I would add that we in the First World decry the 3rd World for the devastation of their natural environment, their cutting down forests and their destruction of grasslands and for the climate costs these changes bring. And here we are in Tunbridge Wells, with challenging climate targets already proposing to destroy our own, much reduced already, natural environment. The TWBC plan is to decimate 100s of acres of prime and picturesque habitats to load yet more concrete and steel in its place. It is such hypocrisy.

Locations - Why Capel.

The Borough has nearly 50 Borough Councillors, only 1 of which lives in Capel Parish. The Borough has 18 parishes and Capel Parish (1 out of all 18) is getting 60%+ of the whole Borough's target. The imbalance is both stark and cavalier. Furthermore the plan refers to Capel as 'deprived' as if that gives the borough the right to ride roughshod across the constituents wishes.

And TWBC says that Southborough's air quality management problems will be alleviated by the new town at Tudeley. That is plainly nonsense. Traffic on the A26 through Southborough would more likely increase not have it reduced by Tudeley new town. And anyway it will add the AQMA issues into Tudeley.

Plan

Over the summer of 2019 when the plan was 1st proposed there were 3000 properties available either for sale or rent within a few miles of Paddock Wood. Existing development in the area is not finding buyers. Furthermore the ONS has advised that the targets for building are too high and based on discredited calculations and TWBC has not addressed this with Government.

The plan should not be taken further until Government addresses the target numbers.

Disconnected Proposals

The new town

- 1 There is no plan to alleviate traffic problems going into Tonbridge where the road to be used is already a choke point.
- 2 There is no planned new link between the north and south Tudeley new town developments across the railway. Existing bridges and the under pass are narrow and have traffic constraints. At least 2 new bridges would be required on the planned site if the blot of development is to have any chance of being a community.
- 3 The link road to the A228 from Tudeley New Town only addresses traffic going through between Tudeley and Colts Hill. It doesn't address traffic leaking through Paddock Wood traffic up to the A21 via Matfield, nor Badsell Road traffic and Paddock wood traffic past Transfesa.
- 4 The long-standing Colts Hill Bypass in the shape now being proposed by TWBC is not long enough to address the existing issues, let alone the vastly increased volumes. Nor does it address Kent's strategic link originally seen in the 25 year old proposal (accepted by TWBC) linking Pembury to Dampiers Corner.
- 5 The new development will increase traffic along the Pembury Road into Tunbridge Wells where traffic is already at a standstill during busy periods back to the A21. There is no plan element which considers the already creaking access to Tunbridge Wells.
- 6 Consideration has not been given to Tonbridge and that side of the boroughs' boundary. Tonbridge also has traffic problems and their station is already at capacity.
- 7 This development is being seen without consideration to the planned new houses elsewhere in Kent such as in Paddock Wood, in Marden, Staplehurst, Cranbrook, Maidstone and in Tonbridge. It is foolish to consider developments as isolated projects without external factors and there is no consideration from TWBC planners of how these will interplay and impact each other. At the very least there will be a major surge in traffic, already a weak point of both TWBC today and of the submitted plans.
- 8 Pembury hospital, new just a few years ago, doesn't have planned capacity for the new household population.

The Borough planners talk about developer levies as being the answer to many problems but are known to be unreliable. As cost escalate, the levy would run short. As new things are identified, the planned budget would not cover it and local taxes would get raised or services cut.

Bus funding by Developers is promised to help manage traffic, but it is not clear how that will work and whether it will work. Nor is it clear how it is funded when development stops. And the plan appears to rely on Autonomous buses, a technology that is not yet available and for which there are many hurdles, both technical and legal. Further there is an assumption people will use buses a great deal. That is not a proven fact, in reality the age of the bus is long gone and their use is a fringe aspect whatever we might wish - The main landowner uses his car to get to TWBC, not the Bus Stop on his doorstep for example.

TWBC Historic Failure to deliver

- 1 Over 40 years ago a planned development in Paddock Wood was stopped for a while when it was found there was no sewage capacity. History repeated itself with the present Paddock Wood estates being built.
- 2 When Transfesa was developed it was on the basis that Colts Hill would be bypassed. We still wait for that, despite reclassifying a small capacity 'B' road to an 'A' road to help the process.

Alternatives:

- 1 While a green field development is attractive to developers, it isn't to the community and no use of brownfield development is in the plan. Brownfield has not been properly investigated by TWBC for delivery of any significant part of the target. And we in the Western World decry other countries who rip out indigenous woods and plains for the development of Cities, seeing a very real risk to the world's climate. And Yet TWBC are looking to foist such a concrete plateau to hundreds of acres of green fields, hedgerows and woods.
- 2 A21 built infrastructure - Available Junctions and road capacity by castle hill and its proximity to existing sewerage is an opportunity ignored by TWBC Planners

Bearing these points in mind we can have little faith in the integrity, necessity and adequacy of the proposed plan. It should be dropped and the target addressed with Government.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Neil Franklin
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/PE 1 The Strategy for Pembury parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I believe that the proposed Local Plan is not fit for purpose. A lot has changed since this was first prepared. Under the Government's levelling-up agenda, more emphasis is to be placed on the north of England, so more development should be focussed there.

I believe that pressure should be put on the Government to reduce the requirements for development for councils in the south of England and especially in Kent (where the Government seems intent on destroying any remaining quality of life for current residents) and more especially affecting Tunbridge Wells borough.

Apart from the above, the currently-proposed plan still includes development proposals in the Metropolitan Green Belt where there appears to be no exceptional circumstances to justify it and also within the High Weald AONB. I do not believe there are any justifications for nibbling away at either of these areas. If any development is allowed in the Green Belt, then at least the affected area should be replaced in some way nearby.

I still feel that most of the proposed developments for Pembury parish are wrong and badly thought out. One example is the proposals for housing at Downingbury Farm (AL/PE 4) with access from the narrow, congested (especially at school times) south end of Church Road. Of course, I welcome the removal of the business area behind Downingbury Farm from the plan. In addition, the sites off Hastings Road (AL/PE 2 and AL/PE 3) are equally unacceptable – any developments accessed via the obstacle course called Hastings Road will just add to the difficulty of traversing that particular road section.

I have read the representations made by Pembury Parish Council and I must say that I support all they have said, except that (although there is a need for a by-pass of Colt's Hill on the A228), any new off-line road here must keep the loss of countryside to an absolute minimum and not carve-through the fields unnecessarily or ruin or blight as much of this countryside as seems to be proposed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans show different areas for development at the East End and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations.

Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
 - offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development.
- These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from ((see web link), Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic

importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF."

(see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

((see web link), Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13

above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link)

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Maureen Willson-Holmes ([REDACTED])
Email Address	[REDACTED]
Company / Organisation	Friends of East End
Address	[REDACTED] [REDACTED] Benenden TN17 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Friends of East End (Mrs Maureen Willson-Holmes - [REDACTED])
Comment ID	PSLP_1951
Response Date	04/06/21 12:29
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.2
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Maureen Willson-Holmes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph No(s) 5.420, 5.421

Policies Map (Inset Map No(s)) 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_1949 and PSLP_1951]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans show different areas for development at the East End and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations.

Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
 - offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development.
- These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only.

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from ((see web link), Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic

importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF."

(see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

((see web link), Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13

above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at (see web link)

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Consultation Point Section 1: Introduction ([View](#))

Status Processed

Submission Type Web

Version 0.1

Files GSP Friends of Tudeley Final.pdf

Question 1

Respondent's Name and/or Organisation Friends of Tudeley

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph 1.2.9 Duty to Cooperate

Paragraph 1.3.1 Habitats Regulations Assessment

Paragraph 1.3.3 Sustainability Appraisal

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 1.2.9 Duty to Cooperate

TWBC has failed to present sufficient evidence that the Duty To Cooperate has been fulfilled.

A new settlement such as the proposed Tudeley Village is exactly the sort of strategic planning issue on which cooperation is mandatory. TWBC has failed to provide evidence of genuine cooperation with neighbouring local authorities on strategic matters.

A detailed description of TWBC's failure to present sufficient evidence is in Section 2.0 of the attached report by Graham Simpkin Planning.

Paragraph 1.3.1 Habitats Regulations Assessment

TWBC has not demonstrated that the plan (in combination with other plans and projects) will have no adverse effect on site integrity.

There are no public statements from Natural England or neighbouring Councils (including Wealden Forest District Council) that concur with the TWBC assessment that the impact of development in Tunbridge Wells Borough (in combination with development in other local authority areas) will not adversely affect the integrity of Ashdown Forest SAC through nitrogen deposition.

A detailed description of the lack of appropriate assessment is in Section 3.2 of the attached report by Graham Simpkin Planning.

Paragraph 1.3.3 Sustainability Appraisal

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal. The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal.

The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Friends of Tudeley
---------------------------------------	--------------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph 3.2 Vision and Objectives

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan 'Vision' is unusual. Rather than inspirational and focused on the ambitions of a community, meeting development needs and protecting the environment, it instead includes direct references to development at Paddock Wood and an unnamed garden village. TWBC has not demonstrated that the plan is the most appropriate strategy. It is not justified by the evidence base and the evidence base was not proportionate.

The Vision and Objectives are not clearly articulated and their evolution (and relationship to strategic policies) has been confusing. The proposed garden village itself was named in the Objectives of an earlier version of the plan. Now it is unnamed in the Pre-Submission Local Plan version of the Vision and Objectives, which relies on a broad reference to 'establishing the role' that a garden settlement can make. Evolution of the plan (and Sustainability Appraisal) through the consultations is difficult to understand and the manner in which a garden village emerged as a preferred strategy seemed abrupt, such that the process was subject to retrospective justification. The evolution of the Vision and Objectives illustrates this. It is important to point out that, because the proposed garden settlement at Tudeley was listed as a plan objective at Reg 18, there would have been very few 'reasonable alternatives'. Indeed, none were identified.

A detailed description of the deficiencies in TWBC's Vision is in Section 4.2 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 4.2 The Development Strategy

The spatial strategy is not justified and not sustainable, and therefore the plan is unsound. The review of options available to TWBC (including the omission of one of the strategic sites) and a proactive search for settlement edge sites and previously developed/urban sites would have sustainability benefits. This would reduce the reliance on large sites to deliver housing and avoid the need to rely on a new settlement in the Green Belt. The sustainability impacts of the proposed Tudeley Village are significant and it is quite clear that the Sustainability Appraisal process was not the key driver for selecting the spatial strategy.

A detailed description of errors in the Development Strategy is in Section 4.5 of the attached report by Graham Simpkin Planning.

Paragraph 4.8 Housing Need

TWBC has not identified the most appropriate strategy to meet the identified housing need. The value of growth option 7 forming part of the preferred development option, perhaps with a large urban extension, was dismissed without adequate assessment. It could contribute to housing needs in a manner that is sensitive to the settlements at which it is located. The proposed strategy which includes a new settlement at Tudeley Village is not justified, nor consistent with achieving sustainable development.

If TWBC had fulfilled their Duty to Cooperate, it is possible that the proposed new settlement at Tudeley Village (and associated harm to the Green Belt) would not be required. This demonstrates the importance of discussing this issue with nearby Local Authorities with determination. Demonstrating that such discussions have occurred is essential to the Exceptional Circumstances case for alterations to Green Belt boundaries.

A detailed description of the issues caused (and opportunities missed) by TWBC's approach to Objectively Assessed Need is in Section 4.3 of the attached report by Graham Simpkin Planning

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Question 1	
Respondent's Name and/or Organisation	Friends of Tudeley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 1 The Development Strategy	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The spatial strategy is not justified and not sustainable, and therefore the plan is unsound. The review of options available to TWBC (including the omission of one of the strategic sites) and a proactive search for settlement edge sites and previously developed/urban sites would have sustainability benefits. This would reduce the reliance on large sites to deliver housing and avoid the need to rely on a new settlement in the Green Belt. The sustainability impacts of the proposed Tudeley Village are significant and it is quite clear that the Sustainability Appraisal process was not the key driver for selecting the spatial strategy.

A detailed description of errors in the Development Strategy is in Section 4.5 of the attached report by Graham Simpkin Planning.

TWBC has not identified the most appropriate strategy to meet the identified housing need. The value of growth option 7 forming part of the preferred development option, perhaps with a large urban extension, was dismissed without adequate assessment. It could contribute to housing needs in a manner that is sensitive to the settlements at which it is located. The proposed strategy which includes a new settlement at Tudeley Village is not justified, nor consistent with achieving sustainable development.

If TWBC had fulfilled their Duty to Cooperate, it is possible that the proposed new settlement at Tudeley Village (and associated harm to the Green Belt) would not be required. This demonstrates the importance of discussing this issue with nearby Local Authorities with determination. Demonstrating that such discussions have occurred is essential to the Exceptional Circumstances case for alterations to Green Belt boundaries.

A detailed description of the issues caused (and opportunities missed) by TWBC's approach to Objectively Assessed Need is in Section 4.3 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal.

The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Tunbridge Wells MP, Greg Clark, has said "Infrastructure First"; it therefore seemed reasonable to expect the draft Plan to contain a coherent timeline on the creation of infrastructure that will assure us that houses will be built only after the necessary infrastructure is in place. In fact, it contains no evidence of a deliverable infrastructure plan for the proposed Tudeley Village. The foundations and assumptions on which the approach to infrastructure is laid out in the Local Plan are fragile and in some cases farcical.

The speed at which the proposal for the Tudeley Village has been prepared means that sound infrastructure delivery planning cannot be demonstrated. The means of delivery, and timescale for delivery of important infrastructure items has not been carefully identified. A wide range of infrastructure is essential to the delivery of sustainable development, and habitat network (green infrastructure) improvements and community facilities must be carefully included in the delivery plans. It is essential that the timing of infrastructure provision must complement the delivery of policies and this does not appear to be the case. The plan is not effective.

A detailed description of the inadequacy of TWBC's approach to infrastructure is in section 4.6 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Friends of Tudeley has been advised by an expert transport consultant, Connect. Their detailed and comprehensive report is attached. A brief summary of the main points is as follows:

The Tudeley Village site cannot offer sustainable transport. There is no rail station and never will be. TWBC's evidence refers to a "4 buses an hour" bus service and has assumed that it would capture a 7.4% market share, but that has been assessed by a specialist public transport consultancy and shown to be a wholly unrealistic market share (and the service to be financially unviable).

Because of the lack of other options the new settlement will inevitably pour thousands of cars on to local roads, especially at peak hours. The local infrastructure will be swamped, even with road widening and physical junction changes. TWBC's own consultants have accepted that even the programme of road improvements put forward will not be enough to prevent overload.

Perhaps the most striking aspect of Connect's report is that on analysing the TWBC traffic evidence, Connect have discovered that for the roads to function around this new settlement TWBC are entirely reliant on a drop in car usage of about 62%. Without that drop, TWBC's consultants accept that the local road network will be overwhelmed. It is extraordinary for TWBC's plans to be based on a 62% drop in car usage. It is contrary to decades of UK travel behaviour trends, even in places with excellent public transport (which Tudeley Village will never have). The TWBC modelling is unrealistic and obviously unachievable, rendering the Plan unsound.

Without sustainable transport, the site is not sustainable. Residents will travel outside the development to shop, to take children to school (as a certainty for most of the plan period, and very likely thereafter), to receive medical care and to go to work. The primary school is not included in the first phases of development and the secondary school will not be built until the very end of the development phasing (beyond the Local Plan period) leading residents to seek access to places at schools that are already over capacity. Even once the new schools are built many residents will choose other schools (particularly given the number of established high quality schools in Tonbridge, including grammar schools) and will travel outside the settlement anyway. The settlement is too small to attract a major supermarket and so food shopping on site will be very limited. Shopping deliveries will add yet further traffic. The costings and timelines outlined in the Infrastructure Delivery Plan are fragmented and unconvincing, with many items essential for the settlement's operation marked only as 'desirable'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This Local Plan does not make sufficient effort to encourage mitigation of and adaptation to climate change. The Policy STR7 titled 'climate change' is startling in its lack of urgency and bears no relationship at all to the Government's nearly zero targets.

The failings of the largest strategic sites, including Tudeley Village, to contribute adequately to the Government's 'nearly zero' 2030 targets means that the plan does not secure development and use of land which will contribute to the mitigation of, and adaptation to, climate change consistent s19 (1A) of the Planning and Compulsory Purchase Act 2004.

A description of these failings is in Section 3.3 of the attached report by Graham Simpkin Planning.

Neil Williamson (Landscape Consultant and former President of the Landscape Institute) has prepared a Landscape Report for Friends of Tudeley to look at the setting of the proposed Tudeley Village. The report is attached.

Jillian Barr, Senior Planner at Graham Simpkin Planning, has prepared a report for Friends of Tudeley to look at planning issues relating to the proposed Tudeley Village. This report is also attached.

Both of these reports have strong arguments laid out that relate to this policy. A brief summary of the key points raised in the reports is as follows.

TWBC has failed to carry out any detailed landscape sensitivity analysis or a Landscape and Visual Impact Assessment (LVIA) for the Tudeley Village site. The landowner states that he has done so, but has declined to make it available. The result is that there is no publicly available evidence of the landscape and visual impact which the development of the Tudeley Village site would have. TWBC's Landscape Character Assessment from 2017 stated (specifically in relation to slopes such as the one on which the site lies) that "New developments can be highly visible on these slopes and detract from the essential countryside character". The reasonable requirement for proportionate evidence has not been met. It is a reasonable expectation that a full LVIA should be undertaken for a proposed development of 2,800 houses on a sensitive Green Belt site immediately adjoining the AONB. (Note that by contrast, a neighbouring planning authority (TMBC) commissioned full LVIA's for five new strategic housing allocation sites, all for fewer homes and some for less sensitive sites.)

The Tudeley Village site is a 'valued landscape' within NPPF terms. It should be categorised as being of "Very High" value in landscape assessment terms and its protection and enhancement should be afforded commensurate weight.

The landscape sensitivity of the Tudeley Village site (i.e. its vulnerability to being adversely affected by the proposed development) is also "Very High". TWBC has not carried out any adequate landscape sensitivity analysis. This is a very serious omission in terms of the soundness of the Plan.

TWBC has failed to make any adequate assessment of the overall impact on tranquility or the more specific impact on light pollution, despite the fact that this proposal involves the creation of a new settlement in a sensitive rural landscape (with a dramatically greater impact on tranquility than extending an existing urban area). Neither landscape nor ecological significance have been addressed by TWBC in any meaningful way. The proposed masterplan includes features that TWBC's own AONB setting report has identified as being particularly harmful.

Development of this site will inevitably have significant adverse effects both on the setting of the AONB and directly on the AONB itself.

The harm to All Saints' Church in Tudeley (home to the only complete set of Marc Chagall stained glass windows in the world) and numerous other heritage assets has not been justified. The density of listed rural buildings is notable and together they sit in the open agricultural setting. The public benefits of development are unlikely to outweigh the harm to All Saints' Church and other heritage assets in Tudeley. A heritage impact assessment must be completed.

The development of Tudeley Village and other sites in this Local Plan may harm the integrity of Ashdown Forest SAC through nitrogen deposition. There is no evidence that Natural England and neighbouring Councils (including Wealden Forest District Council) concur with TWBC's assessment of the levels of nitrogen deposition resulting from their development.

TWBC's evidence contains material inconsistencies about the importance of the AONB setting as between this site (where that is discounted) and a Horsmonden site (where proximity to AONB is cited as the reason for not taking the site forward, even though that site was less contiguous to AONB than Tudeley and was not Green Belt).

No site should be allocated for a substantial new settlement in advance of detailed assessment work being undertaken (and made available for public scrutiny) on the existing landscape, ecological and heritage resources and assets, how the development will affect them, and how they are to be protected and enhanced. To date, TWBC has failed to do this work. The proposed development is therefore not consistent with national and local guidance and the Plan is not sound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Neil Williamson (Landscape Consultant and former President of the Landscape Institute) has prepared a Landscape Report for Friends of Tudeley. The report is attached (see Section 5: Green Belt).

Graham Simpkin Planning have prepared a report for Friends of Tudeley. This report is also attached (see Section 4.7: Policy STR9 Green Belt).

Both reports contain detailed arguments against releasing Green Belt for the proposed development of Tudeley Village which are briefly summarised as follows.

In 2017 TWBC concluded that development of land including the Tudeley site would cause "Very High" harm to the Green Belt. In 2020, however, once the development had been proposed, TWBC commissioned a new study focusing on a smaller area which downgraded the harm to "High". The methodology used to justify this downgrading cannot be justified. There is a high degree of certainty that there would be adverse landscape and visual impacts on the Green Belt. This site represents the very best landscape of this whole area of Green Belt. It is landscape of very high value, in very good condition. Harm to it would be irreparable.

The release of Green Belt land for a new settlement at Tudeley is not justified, nor is it consistent with national policy which states that Green Belt boundaries should only be altered where 'exceptional circumstances' are fully evidenced and explained. The fact that a large proportion of land in Tunbridge Wells Borough is constrained (designated Green Belt or AONB) is not itself 'exceptional circumstances' for releasing Green Belt land. The Green Belt asset does not become less important because there is more of it.

TWBC have not demonstrated Exceptional Circumstances that justify the release of Green Belt land at Tudeley for a new settlement because the land is not needed to meet housing needs. TWBC should revisit reasonable alternatives (strategic options 7 and 8) as well as a range of sources of small sites supply. Neighbouring councils at Maidstone and Ashford should have been approached to meet some of this housing need.

If Green Belt release is required, then settlement edge sites should be considered in detail to determine if parts of proposed sites make a weaker contribution to Green Belt purposes. Land that is already strongly related to built development will often make a weaker contribution to the first three Green Belt purposes, being less likely to be perceived as sprawl (purpose 1), narrowing the gap between towns (purpose 2) or encroachment into the countryside (purpose 3).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 1

Respondent's Name and/or Organisation	Friends of Tudeley
---------------------------------------	--------------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS3 The Strategy for Tudeley Village

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
----------------------	----

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Friends of Tudeley has been advised by three expert consultants: Connect (Transport Consultants); Neil Williamson (Landscape Consultant and former President of the Landscape Institute); and Graham Simpkin Planning. Their reports are attached. They all consider this policy (STR/SS3 "The Strategy for Tudeley Village") to be unsound.

A brief summary of the main points developed is as follows.

Transport and Infrastructure (Connect)

The site cannot offer sustainable transport. There is no rail station and never will be. TWBC's evidence refers to a "4 buses an hour" bus service and has assumed that it would capture a 7.4% market share, but that has been assessed by a specialist public transport consultancy and shown to be a wholly unrealistic market share (and the service to be financially unviable).

Because of the lack of other options the new settlement will inevitably pour thousands of cars onto local roads, especially at peak hours. The local infrastructure will be swamped, even with road widening and physical junction changes. TWBC's own consultants have accepted that even the programme of road improvements put forward will not be enough to prevent overload.

Perhaps the most striking aspect of Connect's report is that on analysing the TWBC traffic evidence, Connect have discovered that for the roads to function around this new settlement TWBC are entirely reliant on a drop in car usage of about 62%. Without that drop, TWBC's consultants accept that the local road network will be overwhelmed. It is extraordinary for TWBC's plans to be based on a 62% drop in car usage. It is contrary to decades of UK travel behavior trends, even in places with excellent public transport (which Tudeley Village will never have). The TWBC modelling is unrealistic and obviously unachievable, rendering the Plan unsound.

Without sustainable transport, the site is not sustainable. Residents will travel outside the development to shop, to take children to school (as a certainty for most of the plan period, and very likely thereafter), to receive medical care and to go to work. The primary school is not included in the first phases of development and the secondary school will not be built until the very end of the development phasing (beyond the Local Plan period) leading residents to seek access to places at schools that are already over capacity. Even once the new schools are built many residents will choose other schools (particularly given the number of established high quality schools in Tonbridge, including grammar schools) and will travel outside the settlement anyway. The settlement is too small to attract a major supermarket and so food shopping on site will be very limited. Shopping deliveries will add yet further traffic. The

costings and timelines outlined in the Infrastructure Delivery Plan are fragmented and unconvincing, with many items essential for the settlement's operation marked only as 'desirable'.

Landscape (Neil Williamson)

The development of the proposed Tudeley Village allocation site would result in harm to the landscape, harm to the High Weald AONB and its setting and harm to the Green Belt. None of these harms have been adequately assessed by TWBC.

The susceptibility and sensitivity of the landscape of the Tudeley site are both to be classified as "Very High", yet neither have been adequately assessed by TWBC. Although TWBC has published assessments of the landscape sensitivity of other potential allocation sites in the area east of Tonbridge, it has not undertaken any such analysis of the Tudeley site. The locally exceptional landscape value of the Tudeley site has not been recognized by TWBC.

The extent of visibility of the site from the surrounding area including the AONB has not been adequately considered by TWBC. It will be considerable, given the wide, open nature of the local landscape. There are no Zone of Theoretical Visibility (ZTV) maps. No Landscape and Visual Impact Assessment (LVIA) has been undertaken by TWBC or made available by other parties for democratic scrutiny. Representations by the promoter underestimate the extent of visibility.

The absence of a rigorous landscape assessment of the Tudeley site is a very serious omission, given the scale of the proposed development and the sensitive location of the site within the Green Belt and immediately adjoining the High Weald AONB. Neighbouring planning authorities have undertaken full LVIAs for proposed strategic housing allocation sites even where the numbers of homes are smaller and, in some cases, the locations are less sensitive.

The Tudeley site currently enjoys a high level of tranquility, comparable to that of the adjoining parts of the AONB. The landscape and ecological impacts of light pollution and loss of tranquility have not been adequately assessed by TWBC. The tranquility of the site and the surrounding area including the adjacent parts of the AONB would be seriously and adversely affected by the proposed development. The AONB, its setting and the rural character of the B2017 road that forms its boundary would be harmed.

TWBC's published documents acknowledge that there would be harm to the setting of the AONB, but underestimate its extent and severity [see section 4]. TWBC's most recent Green Belt Study (2020) underestimates the harm to Green Belt Purpose 2 and greatly exaggerates the potential for mitigation and compensatory measures. The overall level of harm to the Green Belt would be Very High.

It is premature to consider the allocation of the Tudeley site for development until detailed studies have been undertaken of the landscape and visual effects, together with the effects on heritage and ecology that relate to both the development itself and the associated transportation infrastructure. This is required to provide sufficient evidence for the balance of planning harms and benefits to be adequately determined.

The Sustainability Appraisal of the Local Plan is flawed because it is based on inadequate environmental information in respect of the potential environmental effects of the Tudeley site allocation. No detailed analysis has been made publicly available of the landscape sensitivity or impact, or of the heritage or ecological assets and impacts.

There is no evidence that landscape implications have been adequately considered in the current development proposal or that the key garden settlement principle of enhancing the natural environment will be met.

The published masterplan for Tudeley Village conflicts with the recommendations of the Council's AONB Setting study (in that it proposes housing hard up against the B2017 road that forms the AONB boundary). The AONB Setting study recommended minimising development within the southern parts of the site and setting it back from the AONB boundary.

The proposed new settlement as illustrated in the published masterplan and proposed in Policy STR/SS 3 would be incompatible with proposed policies for the environment, including Policy STR 8 (Conserving and enhancing the natural, built and historic environment); Policy EN 1 (Sustainable design); Policy EN 8 (Outdoor lighting and dark skies); Policy EN 18 (Rural landscape); and Policy EN 19 (The High Weald AONB).

Policy STR/SS 3 would result in harm to the High Weald AONB and would be contrary to AONB Management Plan objectives R1 and R2 (impact on the B2017, a historic routeway) and objective OQ4 (impact on tranquility).

The new settlement as proposed would conflict with the Tunbridge Wells Borough Landscape Character Assessment (adopted SPD) in that it does not comply with landscape strategy for Character Area 13 [see paragraph 9.6].

The requirement in the Kent Design Guide (adopted SPD) that 'a rigorous investigation of the site will be required for all development' has clearly not been met for the Tudeley site. Since this is a requirement for all development sites within the Borough, there can be no justification for failing to apply the requirement to a proposal for a new settlement of 2,800 homes.

Taking all of the above into account, the Local Plan fails the test of soundness in respect of Policy STR/SS 3 for Tudeley Village, because:

- . appropriate and proportionate evidence on landscape and other environmental implications has not been provided; and
- . it does not accord with the NPPF, in that it fails to protect valued landscapes as required by paragraph 170 and would result in inappropriate development that would be harmful to the Green Belt, contrary to paragraphs 143 and 144.

Planning (Graham Simpkin Planning)

Section 33A of the Planning and Compulsory Purchase Act 2004 (as amended) requires that local planning authorities (and other prescribed bodies and persons) must co-operate in relation to planning of sustainable development. The duty is to engage constructively, actively and on an on-going basis in the preparation of a Local Plan as it relates to strategic matters. **A new settlement such as the proposed Tudeley Village is exactly the sort of strategic planning issue on which co-operation is mandatory.** TWBC needs to demonstrate clear evidence of collaboration from the earliest stages of plan preparation but has failed to do so; there is **no evidence of genuine cooperation with neighbouring local authorities on strategic matters.**

The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives. The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the SA.

The failings of the largest strategic sites (which are fundamental to the overarching strategy of the Local Plan) to contribute adequately to the Government's 'nearly zero' 2030 targets means that the plan does not secure development and use of land which will contribute to the mitigation of, and adaptation to, climate change consistent with S19 (1A) of the Planning and Compulsory Purchase Act 2004.

The spatial strategy is not justified or sustainable. Other reasonable options have not been assessed in detail and exceptional circumstances for development in the Green Belt have not been demonstrated. The evidence base is not proportionate and important gaps relating to nationally important site features means that sites such as the proposed Tudeley Village may not be deliverable.

TWBC has not identified the most appropriate strategy to meet the identified housing need. The value of growth option 7 forming part of the preferred development option, perhaps with a large urban extension, was dismissed without adequate assessment. It could contribute to housing needs in a manner that is sensitive to the settlements at which it is located. The proposed strategy which includes a new settlement is not justified, nor consistent with achieving sustainable development.

TWBC's over-reliance on strategic sites and lack of flexibility renders the plan not positively prepared, ineffective and in conflict with the NPPF. In addition to an urban extension, TWBC should incorporate more small and medium sites in the plan (instead of a new garden settlement), which are much less likely to be at risk of unexpected delay. More 'previously developed' sites (including unused agricultural buildings in suitable locations at the edge of settlements) should be identified, as could settlement edge development described in growth options 7 and 8. **It seems vanishingly unlikely that a garden village could deliver 150 homes per year by 2025 / 2026 and it is essential the plan includes development opportunities that can genuinely be delivered quickly.**

There is insufficient information to be able to assess matters related to heritage, air quality, landscape and protected species, for example, despite adverse impacts being inevitable and serious.

All in all, the plan has numerous deficiencies in respect of soundness and legal compliance. These deficiencies go to the heart of the strategy and the plan cannot be made sound by modifications. In any case, the failure to comply with the Duty to Co-operate would mean that the plan should not be adopted in its current form.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The likely environmental, social and economic effects of the Local Plan are not adequately nor accurately assessed in the Sustainability Appraisal.

The reasoning for selecting the proposed Tudeley Village site is inadequate and TWBC have not given sufficient reasoning why the Local Plan is the most sustainable strategy when considered against the reasonable alternatives.

A detailed description of the flaws in TWBC's Sustainability Appraisal is in Section 3.0 of the attached report by Graham Simpkin Planning.

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC's over-reliance on strategic sites and lack of flexibility renders the plan not positively prepared, ineffective and in conflict with the NPPF. In addition to an urban extension, TWBC should incorporate more small and medium sites in the plan (instead of a new garden settlement at Tudeley Village), which are much less likely to be at risk of unexpected delay. More 'previously developed' sites (including unused agricultural buildings in suitable locations at the edge of settlements) should be identified, as could settlement edge development described in growth options 7 and 8. It seems vanishingly unlikely that Tudeley Village could deliver 150 homes per year by 2025 / 2026 and it is essential the plan includes development opportunities that can genuinely be delivered quickly.

It is not sound planning, in terms of delivering housing for local people, for TWBC to place so much reliance on a single very large new housing estate in Tudeley. TWBC has put almost all its eggs into enormous new estates: at Tudeley, at East Capel and at Paddock Wood. The rest of the borough has only a few, much smaller, developments dotted about. This approach deprives residents of the borough of the opportunity to move to new housing in small developments closer to where they now live. This is especially true of affordable housing for young people setting up their first home and for housing for the elderly, who would like to downsize and stay close to their family and friends. The mega-estate at Tudeley Village is too big and complex to deliver and provides housing that is mostly too far from where it is wanted and needed.

A detailed description of housing delivery issues is in Section 4.4 of the attached report by Graham Simpkin Planning.

TWBC has not identified the most appropriate strategy to meet the identified housing need. The value of growth option 7 forming part of the preferred development option, perhaps with a large urban extension, was dismissed without adequate assessment. It could contribute to housing needs in a manner that is sensitive to the settlements at which it is located. The proposed strategy which includes a new settlement at Tudeley Village is not justified, nor consistent with achieving sustainable development.

If TWBC had fulfilled their Duty to Cooperate, it is possible that the proposed new settlement at Tudeley Village (and associated harm to the Green Belt) would not be required. This demonstrates the importance of discussing this issue with nearby Local Authorities with determination. Demonstrating that such discussions have occurred is essential to the Exceptional Circumstances case for alterations to Green Belt boundaries.

A detailed description of the issues caused (and opportunities missed) by TWBC's approach to Objectively Assessed Need is in Section 4.3 of the attached report by Graham Simpkin Planning.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Friends of Tudeley has been advised by an expert transport consultant, Connect. Their detailed and comprehensive report is attached. A brief summary of the main points is as follows:

The Tudeley Village site cannot offer sustainable transport. There is no rail station and never will be. TWBC's evidence refers to a "4 buses an hour" bus service and has assumed that it would capture a 7.4% market share, but that has been assessed by a specialist public transport consultancy and shown to be a wholly unrealistic market share (and the service to be financially unviable).

Because of the lack of other options the new settlement will inevitably pour thousands of cars on to local roads, especially at peak hours. The local infrastructure will be swamped, even with road widening and physical junction changes. TWBC's own consultants have accepted that even the programme of road improvements put forward will not be enough to prevent overload.

Perhaps the most striking aspect of Connect's report is that on analysing the TWBC traffic evidence, Connect have discovered that for the roads to function around this new settlement TWBC are entirely reliant on a drop in car usage of about 62%. Without that drop, TWBC's consultants accept that the local road network will be overwhelmed. It is extraordinary for TWBC's plans to be based on a 62% drop in car usage. It is contrary to decades of UK travel behaviour trends, even in places with excellent public transport (which Tudeley Village will never have). The TWBC modelling is unrealistic and obviously unachievable, rendering the Plan unsound.

Without sustainable transport, the site is not sustainable. Residents will travel outside the development to shop, to take children to school (as a certainty for most of the plan period, and very likely thereafter), to receive medical care and to go to work. The primary school is not included in the first phases of development and the secondary school will not be built until the very end of the development phasing (beyond the Local Plan period) leading residents to seek access to places at schools that are already over capacity. Even once the new schools are built many residents will choose other schools (particularly given the number of established high quality schools in Tonbridge, including grammar schools) and will travel outside the settlement anyway. The settlement is too small to attract a major supermarket and so food shopping on site will be very limited. Shopping deliveries will add yet further traffic. The costings and timelines outlined in the Infrastructure Delivery Plan are fragmented and unconvincing, with many items essential for the settlement's operation marked only as 'desirable'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove STR/SS3 The Strategy for Tudeley Village and all references to the proposed Tudeley Village from this Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Friends of Tudeley is an unincorporated association of local residents concerned about the soundness of TWBC's proposal to create a new settlement at Tudeley. We will make an important local contribution to the matters under discussion

Question 1	
Respondent's Name and/or Organisation	Friends of Woodbury Park Cemetery
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Comments on various aspects of Local Plan

[TWBC: see also separated comments on the following: Policies STR5 (PSLP_1557), STR8 (PSLP_1558), EN4 (PSLP_1560), EN9 (PSLP_1561), EN10 (PSLP_1562), EN12 (PSLP_1563), EN26 (PSLP_1564), H11 (PSLP_1565), Section 7 (PSLP_1566) and Policy AL/RTW 4 (PSLP_1567)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 **The Friends of Woodbury Park Cemetery (FWPC)** were established in 2006 to help protect, conserve and sympathetically enhance for public benefit and enjoyment Woodbury Park Cemetery, to record and foster its heritage of memorials and its ecological importance, and to develop its use as an educational resource .
 - 1 We plant and tend it all year round, focussing on preserving the rich habitat and enhancing biodiversity. We greet visitors, many from quite long distances, and answer their eager questions while encouraging them to become active supporters. We conserve its 600 historic memorials, and our research on the lives and times of the Victorians buried here is shared through walks, talks, and publications. Our projects for children and annual award scheme for primary schools are designed to encourage mindfulness, interest in sustainability, and pride in Tunbridge Wells past..
 - 1 **Woodbury Park Cemetery(WPC)** is a remarkable place requiring careful consideration and protection within the Borough Plan. One of Tunbridge Wells “*irreplaceable and valuable assets*”, and registered with Historic England as a garden of special historic interest, it provides :
 - . a unique visual record of Tunbridge Wells Victorian history and a place of learning for both children and adults ;
 - . a major collection of public sculpture on over 600 gravestones;
 - . an east/ west green pedestrian and wildlife link forming a significant element of the green infrastructure in an increasingly densely built part of the town, much of it in high-occupancy residential blocks surrounded by hardlandscaping;
 - . a habitat and haven with Local Nature Reserve status in the heart of the town protecting threatened rare flowers and wildlife. The Friends have won a Gold Award from the Kent Wildlife Trust for their conservation work there;
 - . a combination of quiet, interesting and beautiful commemorative surroundings that promotes mental and physical wellbeing and has become increasingly appreciated during COVID limitations;
 - . inspired artistic and practical use of its romantic topography, winding paths and mature trees to provide a secluded dignified burial place for thousands of local people. It is Grade II Heritage Listed as an excellent example of an early Victorian cemetery that has preserved almost intact its original layout and structures .
- Both Historic England and the Department of Justice have published detailed information and advice on managing cemeteries like WPC.
- 1 All these reasons, and their interactions that make WPC so special, also make it highly vulnerable to insensitive developments on its periphery. These can lead to serious damage to what it offers. Development controls have failed to prevent a recent major intrusion of this sort, an apartment block towering very close to the boundary, along with its parked cars and prison- like mesh fencing, which now blights the lower area and has caused part of the cemetery's Listed original sandstone wall to collapse. Pressure to permit further such insensitive redevelopments seems likely to increase with the precedent this has set and both local and national encouragement being given to redevelop and make much more intensive use of urban land . **The Local Plan needs to strengthen safeguards to protect such an important and historic Council asset and the cultural, environmental, health, heritage and other contributions it makes to Borough strategies.**
 - 1 Its detailed contents, alongside other key plans, will provide the legal basis for decisions on planning applications for development and the use of land surrounding the cemetery for the next 18 years, and are therefore critical to what WPC will be able to continue towards the Borough's

planning goals. **WPC needs more specific reference by name within the Plan and associated Policy plans and statements including those concerning Central Royal Tunbridge Wells.**

- 1 **The Borough's cemeteries and a possible unsound element in the Local Plan** The Plan could also benefit from a clearer policy and general criteria for treatment of all the borough's historic cemeteries generally as such. These are a distinctive and essential category of land use contributing to and affected by planning policies and the exercise of development control powers, including in cases where the Council are the owners. Collectively the Borough's cemeteries are guardians of the mortal remains of millions of its dead, with the prospect of as many more to come. Religious faiths, the bereaved and society generally all expect their dead to be treated with dignity in peaceful well-kept surroundings dedicated to the purpose, their graves marked and protected, some with memorial sculpture of great beauty.
- 1 National legislation provides for local authorities to take over their ownership and maintenance when C of E graveyards are closed to further burials, as happened to WPC in 1934 and may have also been the case in many other parts of the Borough. Growing importance is now being attached nationally to old graveyards for all the reasons applying to WPC. Some may now like them have been designated as nature reserves or have Heritage status. Most have not.
- 1 This situation has relevance across the whole Borough in relation to its land use provision and planning, strategic aims, development control, and its ownership responsibilities on behalf of the public. We are therefore very puzzled to find no mention of cemeteries, churchyards or burial grounds in the Sustainability Assessment and its implications for the contents of the Local Plan. It may of course have been assumed that under national planning guidance this category of specialised land use and its complexities is adequately covered via references to the categories of historic parks and gardens/nature reserves/commons/open spaces, green areas, heritage sites etc. Our experience with WPC indicates this is not always so.
- 1 **These matters run far beyond the scope and expertise of FWPC but suggest their omission from examination in the sustainability appraisal and thus their relevance to the Local Plan based on it may need revisiting to ensure the Borough's proposals are soundly based.**
- 1 Meanwhile in respect of the need to protect, conserve and enhance WPC in its multiple and in some case specialised roles, we would wish to see clarified and made explicit in planning guidance to all those making development applications that **overlooking, noise and visual intrusion in relation to cemeteries will be given extra weight in their consideration. We would also welcome developers being advised to be in touch with FWPC as informed neighbours on behalf of current and prospective users of cemetery, when preparing any proposals close to its periphery.**
- 1 **In any event it might be helpful to create a planning guide for developers close to cemeteries.** It would indeed be regrettable if the precedent that appears to have been set by the development referred to in para 4 were to pave the way for further serious detriments to WPC from similarly insensitive projects responding to the call for intensified high density redevelopment in the central town zone in which the cemetery stands, and the areas immediately adjoining.

12 We warmly welcome and strongly support as a context for urgent measures to reduce the threat of detriment to WPC the following strategic and policy sections of the Plan:

- . **STR 5** recognition of parks, amenity and natural green spaces.
- . **STR8** opportunities for biodiversity enhancements including the long term management of green corridors, development of green infrastructure networks and improving connectivity between habitats; the conservation and enhancement of historic parks and gardens and special regard to their settings.
- . **PN4** the requirement for developers to reflect the local distinctiveness and sensitivity to change of the historic environment and, in particular, to be required to demonstrate an understanding of heritage assets and their setting and associated significance, vulnerabilities and opportunities.
- . **PN9** proposals for developments to meet a biodiversity net gain position.
- . **PN10** protections for designated sites and habitats; and
- . **PN12** protections for ancient woodlands, veteran trees and trees, including in historic parks and gardens.
- . **PN26 Drainage** A policy of timely checks then prompt enforcement action could also play a useful part in securing the future of WPC. We urge TWBC to ensure the sustainable drainage requirements on future developers are adhered to and closely monitored. Local topography and soils mean Woodbury Park Cemetery and its adjoining triangle of woodland act as a natural drainage sump for their immediate surroundings, generating their own springs and a pond in the adjoining small wooded area of land. But in recent years it has suffered from time to time from

excess water flow from neighbouring streets and hard standings damaging paths, vegetation, memorials and the Chapel sandstone crag, . Adjoining developments must not be allowed to exacerbate this.

- . **424 and 6.425** In the context of heritage assets, landscape, trees and biodiversity such as that of WPC, we welcome the comments in these sections regarding residential extensions, alterations, outbuildings and annexes, and the need to consider the wider visual impact on the street scene and surrounding area. We wish to see added the appropriateness of boundary materials used and degree of privacy they offer to important sites like WPC. Some neighbours over the years have erected inappropriate or inadequate fencing or actual walls on top of the original sandstone cemetery walls . This detracts from privacy and visual enjoyment from the WPC side and has caused damage to parts of these historic boundaries .
- . **3, 7.17, 7.23** We strongly support the requirement to monitor the application of the Local Plan and urge this to give priority to historic assets like WPC and immediately tackle any unfavourable impacts.

13 Guidance within cemeteries for users We wish to raise also a guidance issue concerning sustainability **within** historic cemeteries. Adverse or inappropriate behaviour there can lead to costly unintentional damage, create safety risks from memorials, crush plants and bulbs and demoralise other users and volunteer workers. In the case of WPC footfall has steadily risen following the improvement work done by the Friends, new arrivals in the locality and the attraction of permissible outdoor activities during the COVID lockdowns. Current development permissions and the likely further impetus of the Plan's proposed local land allocations will increase it further.

We believe that users of the cemetery should be better and more authoritatively informed by a published set of byelaws clearly displayed at the entrance.

Matters covered would include the importance in order to avoid damage and danger, of sticking strictly to paths , not climbing on memorials , keeping dogs under control, avoiding trampling on graves or removing plants or foliage and of course no alcohol consumption, fires or camping. When the Friends encounter specific problems of this nature they often hear the not unreasonable words "Where does it say that ?".

14 AL/RTW4 Redevelopment proposal for 36-46 St John's Road

This major redevelopment offering accommodation for 80 elderly people is in a logical place for that purpose in relation to shops and facilities. However because of its close proximity to WPC its design must avoid adversely affecting that in any way. Coming at this time , conditions attached to it will be a test case of whether and how far the many welcome statements in the draft Local Plan, concerning protection of heritage assets and their settings, green infrastructure and biodiversity enhancement by developers can yet be reflected in the deployment of planning powers such as planning conditions and developers contributions **The developer should also if possible include action to bring positive benefit to the Cemetery which will be such an important contributor to their quality of life.**

- . The new structure will inevitably be much bulkier and much taller than the former bus garage. **The Friends would strongly oppose any visible intrusion on the traditional skyline when viewed from the cemetery, or any overlooking of it.**
- . Access from the site to WPC. While the bus garage was standing, the regular access to WPC from its premises by stressed bus drivers for a relaxed sandwich break was always via the vehicle exit onto Woodbury Park then the two minute walk via the cul de sac to the WPC gate. The building layout needs to cater for this. **FWPC would be 100 % opposed to any breach of the Listed cemetery wall to create a new access.**
- . The cemetery as a beautiful and peaceful place to sit or stroll will be a valuable amenity for the residents of the new block. However the current condition of some of the paths is poor due to increasingly heavy usage and intermittent flooding of stretches causing erosion, harmful wear and tear on exposed tree roots , plus trip hazards, and damage to adjoining graves by walkers take avoiding action in muddy sections. The additional surge in usage from this large new residential block while welcome in spreading further the benefits that the cemetery has to offer the community will undoubtedly aggravate this in a situation where we are still seeking affordable ways and resources for tackling both the drainage and resurfacing problems. **We suggest the developer should be asked to help find an agreed solution and design for this, especially while his ground workers will be close by preparing the St Johns Road site.**
- . Alternatively, in keeping with the Local Plan proposal that developers should make a net increase to local biodiversity, and given how vital it is for WPC as whole that it remains united with its

adjoining landlocked "triangle" in order to retain its canopy of trees and habitat of tangled marshy undergrowth, **we believe that a developer contribution would be desirable to help safeguard in perpetuity this linked area and its access onto Upper Grosvenor Road, perhaps to be a children's nature study area named in honour of a person of their choice.** This would be a major contribution to fostering biodiversity, help to reduce climate change, strengthen the town's green network and benefit generations of local children.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy EN 10 Protection of designated sites and Habitats

[TWBC: see also whole response on the whole Plan (PSLP_1549) and separated comments on the following: Policies STR5 (PSLP_1557), STR8 (PSLP_1558), EN4 (PSLP_1560), EN9 (PSLP_1561), EN10 (PSLP_1562), EN12 (PSLP_1563), EN26 (PSLP_1564), H11 (PSLP_1565), Section 7 (PSLP_1566) and Policy AL/RTW 4 (PSLP_1567)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

12 We warmly welcome and strongly support as a context for urgent measures to reduce the threat of detriment to WPC the following strategic and policy sections of the Plan:

. PN10 protections for designated sites and habitats; and

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

12 We warmly welcome and strongly support as a context for urgent measures to reduce the threat of detriment to WPC the following strategic and policy sections of the Plan:

- . **PN26 Drainage** A policy of timely checks then prompt enforcement action could also play a useful part in securing the future of WPC . We urge TWBC to ensure the sustainable drainage requirements on future developers are adhered to and closely monitored. Local topography and soils mean Woodbury Park Cemetery and its adjoining triangle of woodland act as a natural drainage sump for their immediate surroundings, generating their own springs and a pond in the adjoining small wooded area of land . But in recent years it has suffered from time to time from excess water flow from neighbouring streets and hard standings damaging paths, vegetation, memorials and the Chapel sandstone crag, . Adjoining developments must not be allowed to exacerbate this.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

12 We warmly welcome and strongly support as a context for urgent measures to reduce the threat of detriment to WPC the following strategic and policy sections of the Plan:

- . **424 and 6.425** In the context of heritage assets, landscape, trees and biodiversity such as that of WPC, we welcome the comments in these sections regarding residential extensions, alterations, outbuildings and annexes, and the need to consider the wider visual impact on the street scene and surrounding area. We wish to see added the appropriateness of boundary materials used and degree of privacy they offer to important sites like WPC. Some neighbours over the years have erected inappropriate or inadequate fencing or actual walls on top of the original sandstone cemetery walls . This detracts from privacy and visual enjoyment from the WPC side and has caused damage to parts of these historic boundaries .

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Frittenden Parish Council

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph 5.519

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 5.519 - Frittenden Parish Council is supporting a proposal to construct a community shop/cafe and it may be appropriate to seek contributions to the costs of constructing and running the community shop/cafe. Planning permission has recently been granted for the shop/cafe.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 5.519 should be amended to take account of the comment made above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I am writing on behalf of all concerned land owners at Lydd Farm in response to the Capel Bypass Road Route proposal, which was brought to our attention recently through social media posts by a local group. To date, we have not been contacted by anyone from TWBC or any other relevant authority in any official capacity to inform us of these plans.

If the proposal is accurate, it would mean that a new road could potentially cut right through our land, dividing the farmland and causing significant-and unnecessary-disruption and destruction, not only to the local wildlife but also to us and the other neighbouring properties.

We vehemently object to this plan and will do all in our power to oppose it. We are not willing to sell any land if the bypass route cuts through or near our property, and we do not support it in any way. The upcoming Tudeley and Capel developments-which have seemingly passed into the next stage of planning despite huge local opposition and without proper consideration of the more viable alternatives-have already dealt us and other local residents a huge blow in terms of decimating our local environment and potentially causing massive disruption and upheaval, so to hear this news on top was saddening and frustrating.

Please confirm that you will not be routing a new road through our land but, should you have any information or other response, we would be grateful if you could send it to the above address.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Vision and Strategic Objectives

1.5.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.5.5 The vision is set out below:

[TWBC: PSLP Vision duplicated here - see full representation attached]

1.5.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives duplicated here - see full representation attached]

Response

1.5.7 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment opportunities across the borough.

1.5.8 The master-planned approach to the strategic expansion of Paddock Wood is also welcomed. However, please note our comments on Policy EN3 in the relevant section below.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided into Policy STR/SS1 (PSLP_2061), Vision and Strategic Objectives (PSLP_2062), Policy STR1 (PSLP_2063), Policy STR4 (PSLP_2065) and Development Management Policies (PSLP_2075)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies

1.5.9 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.5.10 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 4 Ensuring Comprehensive Development

[TWBC: the full representation attached has been divided into Policy STR/SS1 (PSLP_2061), Vision and Strategic Objectives (PSLP_2062), Policy STR1 (PSLP_2063), Policy STR4 (PSLP_2065) and Development Management Policies (PSLP_2075)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Development Strategy and Strategic Policies

1.5.9 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.5.11 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.5.12 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that the initial masterplanning work already undertaken by David Lock Associates, to which we have also contributed, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.5.13 The proposed employment development at Swatlands Farm is in line with the masterplanning work which has been carried out to date. Given the importance of ensuring that employment proposals come forward at an early stage, to increase the prospects of expanded employment opportunities being available to existing and future residents as soon as possible, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these;• the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that “the key requirement should be to ensure that a coordinated approach to new developments which have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Place Shaping Policies

1.5.14 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

Policy STR/PW1

1.5.15 Policy STR/PW1 sets the Strategy for Paddock Wood and states that approximately 3,490-3,590 dwellings and accompanying infrastructure will be delivered via the planned extension to Paddock Wood.

1.5.16 We have **NO OBJECTION** to Policy STR/PW1.

Policy STR/SS1

1.5.17 Policy STR/SS1 sets the detailed strategy and states, amongst other things:

[TWBC: PSLP Policy STR/SS1 duplicated here - see full representation attached]

[TWBC: PSLP Policy Extract of proposed proposal map for Paddock Wood duplicated here - see full representation attached]

Comments in relation to Swatlands Farm

1.5.18 Gallaghers SUPPORT the proposals for employment development at Swatlands Farm, which falls within the northern parcel (edged red) as shown on Map 27. Swatlands Farm represents the southern part of site PW1_5 as identified in the Strategic Sites Masterplanning and Infrastructure Main Report.

1.5.19 In particular, my client SUPPORTS the inclusion of Swatlands Farm within the proposed Policy STR/SS1 allocation and within the Provisional Limits to Built Development as shown on the Policies Map.

1.5.20 They confirm that in relation to this site, it is deliverable over the plan period. My client's proposals will help to deliver additional high quality employment in the manner envisaged, including a mix of employment types and sizes in order to support the balanced economic and employment growth of Paddock Wood.

1.5.21 My client's land is capable of being developed in accordance with the principles set out in the PSLP. This land can be developed to provide additional high quality employment provision, and is easily accessed on foot from the town centre and railway station via existing footpaths.

1.5.22 The Strategic Sites Masterplanning and Infrastructure Main Report paragraph 4.38 encourages opportunities for smaller companies to be attracted to Paddock Wood to promote the balanced growth of the town, as well as providing opportunities for existing companies to expand and relocate. Gallaghers have a track record of providing a wide range of employment uses, and have previously constructed units Wrotham (Tonbridge & Malling). Further information on this development is included as Appendix 1.

1.5.23 Whilst viability work has been undertaken in relation to the residential parcels at Paddock Wood, it is not clear whether a similar exercise has been undertaken in relation to the employment development. Planning policies should take account of the fact that there are a number of landscape, flood risk, biodiversity and other constraints on these sites and that development requirements, for example sustainability requirements such as those set out in Policy EN3, need to be reasonably balanced in order to ensure that development can sensibly proceed.

1.5.24 Whilst we support the overall aims and objectives for the Swatlands Farm site as set out in the Strategic Sites Masterplanning and Infrastructure Main Report, we OBJECT to the proposal for Lucks Lane to be converted in its entirety to a pedestrian and cycle route, with a new parallel access road

to be provided to the south. Whilst we take no issue with the general concept of Lucks Lane being used primarily as a pedestrian and cycle route, the existing Lucks Lane/Maidstone Road junction should be retained as the main access point for the Swatlands Farm site. This is because:

- It is in the safest position to access the site from Maidstone Road taking into account visibility splay requirements;
- Driving a new access through to Maidstone Road would result in the unnecessary loss of several significant, well-established trees; and
- The parallel access road concept would further reduce the amount of land available for development within the Swatlands Farm parcel, especially when taking into account other constraints, and could render the scheme unviable.

1.5.25 As noted previously, there are already flood risk and biodiversity constraints on the site, which need to be respected. In order to make the best use of this key employment opportunity, it is essential that the Local Plan does not result in any further unnecessary reduction in net developable land, for example, by requiring the parallel access road concept.

1.5.26 It is also noted that the widening of Lucks Lane is identified as a potential mitigation measure in the Sweco Transport Assessment which underpins the Draft Local Plan, which supports our stance as set out above.

1.5.27 This objection could be remedied by amending the proposed masterplan, and making the equivalent changes to Maps 28 and 29 in the PSLP.

1.5.28 Furthermore, whilst the benefits of Design Review are recognised, and we do not object to the use of Design Review Panels being encouraged through policy, we do question whether their input at both the pre-application and post-submission stages for all applications within the SS1 masterplan area should be mandatory in all cases, regardless of the scale and nature of the proposal – which appears to be the case as Policy STR/SS1(5) is currently worded.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 6: Development Management Policies

[TWBC: the full representation attached has been divided into Policy STR/SS1 (PSLP_2061), Vision and Strategic Objectives (PSLP_2062), Policy STR1 (PSLP_2063), Policy STR4 (PSLP_2065) and Development Management Policies (PSLP_2075)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of Gallagher Properties Ltd (hereafter referred to as Gallagher) in respect of the Tunbridge Wells Borough Council Regulation 19 Pre-Submission Local Plan (PSLP) consultation.

1.1.2 These representations relate to land at Swatlands Farm, Lucks Lane that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 The Site

1.2.1 Our client is promoting employment development at Swatlands Farm, Lucks Lane, which formed site 347 of the Strategic Housing and Employment Land Availability Appraisal (SHELAA). The site location is shown on the plan overleaf. *[TWBC: see full representation attached]*

1.2.2 The site is located to the south-east of Maidstone Road and south of Lucks Lane. It lies adjacent to, but outside, the defined Limits to Built Development (LBD) boundary of Paddock Wood in the adopted Local Plan, but within the proposed Paddock Wood strategic development area and within the proposed LBD in the PSLP.

1.2.3 The site comprises an undeveloped parcel of agricultural land. It has a largely grassed surfaced with boundaries are marked by hedgerows and trees. A small wooded area lies to the west, adjacent to Maidstone Road, and a central tree/hedge line which partially divides the site. There is also a water course running along the rear boundary of the site and a small stream that runs across part of the site from Lucks Lane.

1.2.4 Gallaghers are proposing to develop the site for employment development. It is currently anticipated that a range of size and types of employment units could be provided on the site, providing up to 18,500 sqm of employment floorspace within up to seven buildings.

1.2.5 The Council's SHELAA site assessment confirms that the site is suitable for economic uses, and is available and deliverable. It is therefore identified as being suitable for an allocation in the Local Plan as a logical extension to a key employment area.

[TWBC: for site location plan see full representation attached]

1.2.6 The site is deliverable in the short term and therefore represents an excellent opportunity to deliver meaningful new employment, and by providing the type of units for which there is currently the highest level of demand. It is important that, whilst constraints clearly need to be respected, the Local Plan allows the best use to be made of what is a key employment growth opportunity.

1.3 Local Plan Background

1.3.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.3.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.3.3 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.5 Assessment of Soundness

1.5.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.5.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010,

and the Site Allocations Local Plan 2016. 1.5.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;• Development Strategy and Strategic Policies;
- Place Shaping Policies; and• Development Management Policies.

Development Management Policies

1.5.29 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.5.30 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.5.31 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.5.32 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.5.33 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.5.34 Furthermore, Policy EN2 sets out challenging BREEAM requirements for non-residential developments of more than 5,000sqm, with BREEAM Excellent required as mandatory in every case, with no flexibility provided within the policy to take account of specific circumstances. Whilst the importance of sustainable development is understood and agreed, as is the need for high sustainability standards on new developments, as highlighted elsewhere there are several competing constraints to be taken into account.

1.5.35 There is a significant danger that a policy requiring mandatory standards which go beyond those set at a national level without any scope for flexibility could have the unwanted side effect of preventing or deterring job-creating development from coming forward in a short timescale. At the very least, if it is to be retained, policy EN2 should include wording to recognise that sustainable design standards should be the highest that can be reasonably achieved in the circumstances of the site and taking into account viability considerations.

1.5.36 We therefore **OBJECT** to policies EN1, EN2 and EN3 on this basis.

1.5.37 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF EN4 on this basis.

1.5.38 Finally, the wording of Policy EN5 is currently unacceptable as it goes beyond what is required by the NPPF and is inconsistent with it. As currently worded, Policy EN5 currently requires all “proposals that affect a designated or nondesignated heritage asset, or its setting” to conserve or enhance the character, appearance, amenity and setting of the asset. As worded, that can mean any proposal that affects an asset, in any way, by any degree, whether or not it is designated. It is not acceptable to apply a blanket policy, whose restrictions go much further than national policy, to designated and non-designated heritage assets as if they were the same thing.

1.5.39 This sets a bar which will be almost impossibly high in some cases. The NPPF recognises that there will be cases where there will be harm to a designated or non-designated heritage asset, but where that harm can be outweighed in planning terms by other factors such as wider planning benefits,

or the potential for alternatives. Different tests apply depending on the designation status of the asset and the level of harm being caused.

1.5.40 We therefore **OBJECT** to Policy EN5. We recommended that it is deleted, because this issue can be addressed solely through existing national policy as expressed in the NPPF.

1.5.41 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.6 Summary and Conclusions

1.6.1 In summary, this representation has been prepared on behalf of Gallagher Properties in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.6.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Swatlands Farm.

1.6.3 We do however object to the detailed wording of certain aspects of Policy STR/SS1 as set out above, although the general principles are supported. We also have concerns about some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.5.40 We therefore **OBJECT** to Policy EN5. We recommended that it is deleted, because this issue can be addressed solely through existing national policy as expressed in the NPPF.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Dear Sir/Madam,

My family and I live at Church Farm Oast, next door to Tudeley Church. We have three children. Unsurprisingly, we have been actively against the "Tudeley New Village" plan, since day one. I list our concerns as follows:

Infrastructure/Roads – the B2017 is already crawling with traffic in both directions from Tonbridge to Paddock Wood, every morning of the week. Most of this traffic is heading in to Tonbridge, especially to the station. This road cannot possibly take more traffic during the rush hour, it will grind to a halt. In Five Oak Green, the traffic already travels dangerously fast past the school and through the village – there have been several near misses and minor incidents, this needs calming measures installed to ensure pedestrians, especially young children, are protected.

Schools – there is already a shortage of secondary school places in the area and more housing will only impact that shortage further.

Pollution – Increased traffic will of course add to the pollution in the area where many young children and wildlife live. This will of course have a negative impact if the plan were to go ahead. I know there is talk of cycle paths etc., but the reality is that the majority of new residents will have a number of cars that will likely be used daily. Of course this transcends to noise pollution, both in the form of vehicles, but also residents. Additional people will result in additional noise in the area, again effecting the wildlife and general feel of the area. A big concern of mine is that where we currently have quiet fields, if the plan went ahead, we may have loud party's taking place late in to the night in new residence and/or in the communal areas that are planned to be within a few meters of our boundary. Further to noise pollution there would also be light pollution – the beautiful clear skies that we are currently blessed with in the area, will not be as visible any longer and the views of our historic church, would be ruined.

Wildlife and Biodiversity – in the past year, in the field between the church and the railway line, we've seen Deer, Foxes, Geese, Rabbits, Foxes, Newts, Bats, Slow Worms, Red Kites, Buzzards and other birds of prey. Building on this land will permanently destroy the habitat for this wildlife. The farmland here is productive and of huge benefit to the UK's self subsistence along with all it does to aid biodiversity in the area.

MGB/AONB – The proposed plan is to build on MGB, surrounded by AONB (which will be hugely impacted as result of this plan). The idea of MGB is to separate towns and stop urban sprawl, but this plan will effectively bring Tonbridge and Paddock Wood together as one.

Brownfield and town center regeneration— There are huge amounts of Brownfield sites within the borough, that have not yet been considered for development. My understanding is that in order to build on MGB, the potential of all Brownfield sites, must be exhausted first. This has not happened.

Flooding – Areas of Tudeley and the surrounding villages, already have huge flooding issues. Additional building, in the areas planned, will only add to these problems. A lot of research on this has been done by Save Capel, so I won't repeat it here, but it is a huge concern of mine.

Water Supply/Sewerage – The issues at Paddock Wood around sewerage are well known and of great concern. How can we be sure that this issue will not be intensified with the new Plan.

Engagement – There has been very little engagement with the community and this plan process. With the exception of the Charette, which felt very much like a box ticking exercise, we have had no real engagement from the Hadlow Estate or TWBC. It is obvious to everyone that the TWBC feel they have found a very simple solution to their problem of needing to build more houses and they have been extremely lazy in moving this forwards. They have not looked at Brownfield, they have not engaged the public, they have not offered up solutions to the issues of infrastructure, flooding, destruction of MGB and they have refused to take the community's views in to consideration. They appear to have failed us, their constituents, on several grounds. There are quite a number of properties on the market in Paddock Wood and Tonbridge, suggesting that this area is not necessarily the most needy in terms of new houses – why is it that Capel is set to take nearly 50% of the borough's housing demands?

Whilst we appreciate houses are needed and the borough needs to accept it's fair share of the building requirements, it seems ridiculous that such a large number of the quota is intended to be dumped in such a small area and on MGB. We are positioned in an area of beautiful countryside, with well used footpaths, ancient woodlands and historic buildings of great interest and cultural value. There is not a demand within Capel for this volume of housing, we've carried out our own assessments and these are vastly lower than the proposed plan. A plan of this scale, would be a Ghost Town, an utter failure and at the expense of wildlife, biodiversity and the current Parish residents.

What is of greatest, personal, concern to my family and I, is the potential of new "communal space" coming right up to our boundary line, which is only a few meters from our house and my children's bedrooms. This boundary line joins the North facing boundary of the church, fencing in the graveyard. This should be a quiet space for remembering loved ones and contemplation, but if it is to border "communal space", there will be noise and potential raucous behavior, which is incredibly unfair on those paying their respects. To us, it will of course mean that we have increased security risk and noise levels at our property, in addition to losing the current views and wildlife of the area. This is all linked primarily to Phase 3 of the build, the area stretching from the church to the railway line.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make the plan legally compliant, the views of the community must be taken in to account. Brownfield sites and town center regeneration need to be reviewed and developed, before considering to build on MGB. Proper flood risk assessments need to be carried out. An understanding of where in the borough, housing is actually needed, would need to be sought. The sheer volume of housing being proposed for this area, is ridiculous and unnecessary, no proper thought has been given to transport links, schools, shops, leisure facilities, etc. Living where we have for the past 8 years, we know how overcrowded the roads already are and what flood issues we see every Winter and the struggle for school spaces, none of this has been properly considered within the plan. Proper wildlife and biodiversity

studies need to be carried out so that the impact of any development can be mapped out and balanced. TWBC needs to look at and consider the infrastructure requirements in terms of schools and roads, especially the knock on effect to surrounding areas, especially Tonbridge.

In summary, we can understand the need for around 400 houses being built over the next 10 years, for which the infrastructure will grow organically and without detriment to biodiversity of the area nor the community already living here.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My family have been residents in Hartlake Road, Golden Green for nearly 33 years. We have raised two children here, commuted to work via train into London and over this timeframe have seen several negative changes to the surrounding countryside and Tonbridge itself. Within our immediate environment we have experienced more flooding over the years including problems with sewage and a decrease of natural habitats for our local wildlife. Traffic has increased hugely and local infrastructure isn't coping well. With the implementation of the proposed local plan, these problems will worsen considerably. Arranging medical appointments will become much more difficult also. I am particularly concerned that arable land will be sold off for housing when this should be used as was intended to feed the people. Pollution will increase and the loss of habitat for our birds, animals and small invertebrates is unforgivable particularly as we are encouraged wherever we look to take care of our environment. As for affordable housing, will this be affordable housing for young, local people? I doubt it! Why are brownfield sites with the borough not being considered? I find it grossly unfair that TWBC will pocket the council taxes raised while our local town (Tonbridge) and TMBC villages will suffer the impact of the proposed plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

- . Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: For further comments by K LW Ltd. on Policy PSTR/BM 1 please see Comment Number PSLP_507]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy STR1. The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. In addition, the reliance on large strategic sites is going to result in the trajectory not being able to deliver sufficient housing early in the Plan period and so additional smaller sites are necessary to ensure delivery and so make the Plan effective.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy.

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in Sevenoaks District Council was unclear.

However, following the failure of their High Court challenge, Sevenoaks District Council is now required to begin the preparation of their Local Plan again. Since NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within Sevenoaks District. Not to do so would be contrary to NPPF policy and in our view this suggests that additional sites must be identified.

Given the stage reached in the Tunbridge Wells Local Plan process, it would be unreasonable for this Council to not assist Sevenoaks District in meeting part of its housing need. Paragraph 4.16 of the draft Local Plan postulates that Sevenoaks may have an unmet need of 1900 dwellings. Paragraph 4.18 also notes that sites may need to be greater in size to enable delivery of the numbers predicted. Paragraph 4.53-4.54 then explains that sites and other supply with sufficient capacity for 13,059 to 13,444 dwellings has been found. The mid point gives a buffer of 1,000 dwellings above the 12,200 requirement.

Notwithstanding the buffer and the situation in Sevenoaks, it is the case that Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan. It is a neighbouring authority and subject to constraints relating to Ashdown Forest and the Habitat Regulations. Since it is within the same housing market area, it may be necessary for Tunbridge Wells to consider meeting some of its unmet housing need. In fact, following the rejection by the Local Plan Inspector of Wealden's Submission Plan, Wealden have re-wound their Plan preparation process and started from the beginning with an issues and options consultation. It is likely that this Plan is several years from fruition.

There is also sufficient uncertainty with Tonbridge and Malling's Local Plan and this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. A shock to the local housing market seems likely with supply side constraint pushing up house prices. In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer. Tunbridge Wells Borough Council cannot legitimately argue against this strategy having removed housing allocations from the Regulation 18 draft Local Plan that were perfectly acceptable. We refer the Local Plan Inspector to Policy AL/BM2 of the Regulation 18 Draft Local Plan and other representations by our client, which seeks to 'reinstate' this housing allocation in Matfield.

In relation to delivery of new homes, we are of the view that additional smaller housing sites are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional smaller housing sites should be allocated in different locations. Since NPPF seeks to boost the supply of housing and there is nothing in the guidance preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. If over provision occurs, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve. Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines.

[TWBC: For table please see full representation attached as a supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify STR1 to increase housing numbers to meet the unmet needs of Sevenoaks DC and other adjoining authorities. Alter the Policy to identify a need for additional smaller sites. The policy may need to increase by a further 2-3,000 more dwellings.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The landowner wishes to be present to test the Council's strategy regarding housing numbers, the trajectory and the delivery of sites.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BM 1 The Strategy for Brenchley and Matfield parish

[TWBC: For further comments by K LW Ltd. on Policy STR 1 please see Comment Number PSLP_503]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy PSTR/BM1. The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas and delivering sufficient small sites to ensure the housing trajectory can be delivered. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate.

As a result of the lack of housing allocations the Plan cannot be said to be effective or consistent with National Policy.

1.0 History and Background

1.1 In the Draft Local Plan (Regulation 18) document, land at Matfield House was allocated for new housing under Policy AL/BM2. The policy anticipated a development of between 20-30 new dwellings and the criteria sought integration through pedestrian links with the wider village, access off Chestnut Lane and a proportion of affordable homes. The policy recognised the opportunities to undertake ecological enhancement to the undeveloped areas to the west of the housing site and the opportunity

for landscaping and amenity space. It was recognised that Matfield House was an important heritage asset but that the now unused orchard could be developed without any material effect. The site was deemed to be in sustainable location, close to the village and would comply with social, economic and environmental sustainability criteria of the NPPF.

1.2 Early Neighbourhood Plan meetings and round table design discussions also recognised the development potential of the site and the opportunities. In the draft Neighbourhood Plan of February 2020 the site was identified as one which was suitable for development (see Appendix 2 of that document).

1.3 In the Draft Local Plan (Regulation 19) document published on 26th March 2021, the Matfield House housing allocation is proposed to be removed in its entirety. In correspondence with Stephen Baughen Head of Planning, the key reasons for this change were identified below:

“As background to the decision which has been made to not include Matfield House (orchards and land) as a site allocation in the Tunbridge Wells Borough Council (TWBC) Pre-Submission Local Plan: - Concern was raised by the High Weald Area of Outstanding Natural Beauty (AONB) Unit at the Regulation 18 TWBC Draft Local Plan consultation stage relating to notable or priority grassland habitats on sites proposed to be allocated within the AONB. In response to this the Council commissioned a grassland survey of all sites with significant areas of grassland within the AONB. This survey was conducted during August 2020 and the report finalised in the autumn. - The report indicated that there were no grassland priority habitats on the proposed allocated sites but land at Matfield House might meet the criteria to be considered a priority habitat as Old Orchard. - The council then commissioned Kent Wildlife Trust (KWT) to undertake an assessment of the site against the criteria for ‘Old Orchard’. The priority habitat was confirmed by this report and the possibility of the allocation was discussed with KWT about whether to take the allocation forward. At the end of October KWT concluded in discussions that they could not support the proposed allocation. - Priority habitats receive a high level of protection through the National Planning Policy Framework NPPF)

(see web link)

and through the Local Plan, and there would be a very strong policy objection to any loss. It was therefore concluded to not include this site as an allocation in the TWBC Pre-Submission Local Plan.”

1.4 Following this, the landowner has engaged Grass Roots Ecology to test the reasons given for removing the site. The conclusions are noted below and in the accompanying reports. It is noted that Grass Roots Ecology adopted the same criteria as used by the Kent Wildlife Trust, however, the Kent Wildlife Trust make some slightly favourable conclusions as to the condition of the orchard. However, the existence of bramble and also undesirable species such as dock would suggest it is of moderate condition. 1.5 The grassland survey (provided by Greenspace Ecological Solutions for the Council) is generally in line with the conclusions drawn in the ecological appraisal report prepared by the landowner's ecologist, categorising the grassland as semi-improved neutral grassland of moderate to low botanical interest. The orchard therefore does not meet local wildlife site criteria with reference to the surveys that have been carried out as it lacks notable grassland, lichen, bryophyte, and invertebrate assemblages. Consequently, this site cannot be identified as priority grassland habitat or a Local Wildlife Site. There are no trees present which support bryophytes / lichen flora or support other features of substantive nature conservation value, such as unimproved grassland or wide hedges. In this context there are no inherent ecological reasons why the site should not be allocated for housing since its moderate quality and priority habitat can be off set with the net gain that is achievable. The following sections will review these conclusions in more detail.

2.0 Ecology Results

Habitats

2.1 It is noted that the development of the site would require the loss of Traditional Orchard (0.55ha), neutral semi-improved grassland (0.36ha), and amenity grassland (0.09ha). If proposed to be allocated, all hedgerows at the site would be retained.

2.2 Although the traditional orchard at the site qualifies as a NERC Act (2006) Habitat of Principal Importance (Maddock, 2011) when assessed against the Condition Assessment Criteria in the orchard is assessed at ‘moderate’ condition. The Bryophyte and Lichen surveys at the site demonstrate that important assemblages of these species are not present. In addition to this, the grassland at the site is only of neutral semi-improved quality, with the presence of injurious weeds and scattered bramble /scrub. It is therefore considered that the traditional orchard habitat at the site is of moderate condition

and does not meet Local Wildlife Site criteria. It is also noted that the grassland is not of sufficient quality to warrant protection for environmental reasons. As noted in the accompanying reports, the mitigation includes a 10% net bio-diversity gain and a more than 50% gain in Traditional Orchard. The reinstatement of the allocation would therefore deliver a material benefit. In relation to other fauna, there are none which would prevent the allocation from being reinstated:

Badger 2.3 No badger setts were observed during the survey, although what appears to be movement pathways to the northwest exist and indicate foraging. These should be retained and habitat enhanced.

Bats

2.4 No trees with bat roosting suitability are present at the Development Site. The activity surveys revealed the presence of foraging and commuting bats of at least eight species and mitigation through enhanced planting corridors is suggested.

Birds

2.5 During the breeding bird surveys a total of eighteen species of bird were recorded, of which three were BoCC 4 Red listed birds and listed in the Kent red data book: House sparrow, starling, and song thrush. House sparrow and Starling were recorded as probably breeders on site, and song thrush as possible breeder on site. One Kent Biodiversity Action Plan species was recorded on Site, dunnoek, recorded as a possible breeder. Mitigation in the form of retention of boundary hedgerows and trees is necessary together with enhanced foraging opportunities.

Great Crested Newt GCN

2.6 No GCN were recorded during the surveys.

Hazel Dormouse

2.7 No dormice were recorded within the Site Boundary. Dormice were only recorded in the hedgerows on the land under applicant ownership to the west of the site, within the west and north site boundaries at a distance of 145m west and 171m north west from the development site boundary. The hedgerow connections between these locations and the site are generally gappy and poor and the orchard trees are generally spaced wide apart with open crowns offering suboptimal habitat for dormice. It is therefore considered that impacts to hazel dormouse are unlikely to occur.

Invertebrates

2.8 The invertebrate surveys found five nationally scarce invertebrate species and one invertebrate Species of Principal Importance in England under Section 41 of the Natural Environment and Rural Communities (NERC) Act 2006 (formerly UK BAP). However, these were all recorded within the land to the west of the Development Site where impacts will not occur. The orchard trees didn't yield any of the scarce associated species. The orchard trees failed to support a notable invertebrate assemblage. The grassland is not species rich which is reflected in the limited number of phytophagous species present. This supports the 'moderate' classification.

Reptiles

2.9 Common lizard and grass snake were recorded on site during the reptile surveys. The proposed allocation would require the translocation to suitable receptor areas.

3.0 Suitability of the site and Need

Previous Allocation

3.1 In the Regulation 18 draft Local Plan, the site was allocated for between 20 and 30 new dwellings under Policy AL/BM2. In doing so the Council accepted that the site was in a sustainable location being located adjacent to the northern edge of the settlement of Matfield. Access was proposed off Chestnut Lane and this was supported by the Highway Authority, who reviewed all potential housing allocations. Neither the Council nor the applicant disagreed that the site could deliver the required affordable housing, mix of units and sufficient integration to secure pedestrian links to the centre of the village to the south. The land owner had discussions with Town and Country, who are the affordable housing provider which operate Marchants (adjacent and to the east of the site) to consider a pedestrian access through their land but in any event land ownership allowed access to the south between a residential cottage and sub station. It was noted that the site was close to Matfield House, a Grade 1 Listed Building, but since the site was related to land beyond its curtilage, redundant orchards and outside the conservation area, the effect on heritage assets was considered limited.

Regulation 19 Plan

3.2 The site was removed as an allocation when the Regulation 19 Plan was published. The reason given was very specific and related to the points noted in paragraph 1.3 above. However, the ecological reasoning for removing the allocation have been overcome by the submissions made here. Consequently, and based upon the evidence below, it is considered that site AL/BM2 of the Regulation 18 Local Plan should be reinstated as a housing allocation.

AONB and Conservation Area

3.3 In allocating the site under Policy AL/BM2 of the Regulation 18 Plan the Council accepted that the site would not impact unduly upon the AONB and that housing need justified the site. The removal of the site was undertaken as a reaction to the perceived grassland priority habitat. However, given the various surveys of this site it is considered that this is not now an issue and that the site can be reinstated. NPPF allows sites to be developed within the AONB where they meet certain criteria and the Council deemed these criteria to be met when they published the Regulation 18 draft Plan. In a similar fashion, the Council considered the effect of the Regulation 18 allocation on the nearby Conservation Area, the site is beyond the Conservation Area boundary and throughout the process the Council and landowner have agreed to preserve the integrity of the Conservation Area, despite initial proposals by the Parish Council neighbourhood Plan working group to see a larger site included within the Conservation Area. The proposed allocation retains the important views of the conservation area from the north including of Matfield House and the cupola of the clock tower.

Bio-diversity Enhancement and Loss of Orchard

3.4 In the net bio-diversity gain document, the landowner's ecologist has put together a series of mitigation and assessments which demonstrate that in reinstating the allocated site, a far greater benefit to bio-diversity can be delivered. A net gain of 10% gain can be achieved across the board and there can be a net gain in Traditional Orchard area of over 50% with enhancements to move it from 'moderate' to 'good'. If the allocation is not reinstated, then the ecological value of the site will continue to deteriorate as trees continue to die and eventually the traditional orchard will be lost.

3.5 We note that the Council has been comfortable in allocating strategic sites which also include sensitive habitat. Draft Policy STR/SS 1 – Paddock Wood and East Capel. In the master plan extract from Map 28 below, employment provision is directly proposed on Traditional Orchard as noted in the Tunbridge Wells Biodiversity Evidence base 2019 – see images:

[TWBC: For extract images please see full representation attached as a supporting document]

3.6 The orange areas denote Traditional Orchard. Swatland Farm is also noted as employment yet includes Traditional Orchard. In the context of the supply of Traditional Orchard, the table below clearly notes that such designations are the second most prolific in hectareage within the Borough, after deciduous woodland and setting aside river headwaters, which are materially different. The proposals only result in 0.55ha of traditional orchard lost which is 0.17% of the total habitat notwithstanding the bio net gain that is achievable on the promoted site. In view of the clear net biodiversity gain the reinstatement of the allocation would bring to this very small remnant orchard (in particular the enhancement of remaining orchard at the site) we feel that the allocation is warranted.

[TWBC: For table please see full representation attached as a supporting document]

4.0 Conclusions

4.1 The site was allocated under Policy AL/BM2 of the Regulation 18 Plan and was considered suitable, deliverable and achievable. Discussions with the Local Authority made significant headway in securing interest from an affordable housing provider and in securing pedestrian integration with the surrounding village.

4.2 The site was deemed to be sustainable and would help the village grow in a proportionate and sustainable manner.

4.3 The housing need situation in the area is complicated by the recent failings of two Local Authority development Plans and potentially the failure of the Tonbridge and Malling Plan (see other representations). In practice, these authorities form part of the same housing market area. Housing delivery in Tunbridge wells should seek to address more than the 1,000 buffer identified (see other representations). It is not to say that Tunbridge Wells should secure all the unmet need but a greater

proportion. This is especially warranted given the removal of sites from the Regulation 18 Plan, where such sites have been demonstrated to be acceptable.

4.4 Since this site is suitable from an environmental, social and economic perspective, we would seek the Inspector's support for further housing allocations and this site in particular.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify STR9PSTR/BM1, inset map 20 and 21, to include the site previously identified as AL/BM2 of the Regulation 18 Plan as a housing allocation for 20-30 dwellings and to lift the requirement for Brenchley and Matfield to 66-90 new dwellings.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Should housing numbers be required to be increased, the landowner reserves the right to be present to discuss alternate sites.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 503, 507 K LW for Garthwaite SI-1 Matfield Bio Net Gain.pdf](#)

General response to Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for your email dated 25 March 2021, regarding the above mentioned planning policy consultation.

Aerodrome Safeguarding is a legislative requirement for officially safeguarded aerodromes of which Gatwick Airport is one. Aerodrome safeguarding is the process used to ensure the safety of aircraft while taking off and landing, or flying in the vicinity of aerodromes.

It is vital that their safe operation is not impacted upon by buildings, structures or works which infringe the protected Obstacle Limitation Surfaces (OLS), impact on navigational aids utilised by the airport, distracting or confusing lighting or by development which has the potential to increase the number of birds or the bird hazard risk. Please note this list is not exhaustive.

The Royal Tunbridge Wells area is around 31km East from the ARP (Aerodrome Reference Point) at Gatwick Airport. At this distance the only potential impacts on aerodrome safeguarding would be in relation to instrument flight procedures (IFPs). In the area covered by the local plan only buildings/structures over 150m above ground level (AGL) would have a potential impact.

Later on this year we will be issuing a new consultation map requesting that we are consulted on any buildings/structures of 150m AGL or above.

The crane permit process is changing in the near future. Any crane operator wishing to erect a crane anywhere in the UK higher than 10m above ground level or higher than the immediately surrounding trees/structures will need to obtain a permit from the CAA before the crane is erected. For further details of this process please refer to CAP1096 'Guidance to Crane Operators on Aviation Lighting and Notification' available at www.caa.co.uk

Please note that the start date for crane permit applications being submitted to the CAA will not now be the 31st May, this is due to be extended.

Thank you for giving us the opportunity to comment on this document. If you have any queries please do not hesitate to contact me.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr & Mrs Gear in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr and Mrs Gear own Uphill, Benenden, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/BE 1). It is an established residential dwelling situated on the outer edge of the village. It lies outside of the defined 'limits to built development' (LBD), but adjacent to a predominantly residential area close to village services

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it is otherwise free from any restrictive planning designations.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site is suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons set out within this representation.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

1.3 Vision and Strategic Objectives

1.3.1 The pre-submission plan is underpinned by vision and strategic objectives. The vision states:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough.

The Council will work with stakeholders* to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents.

In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities.

Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs.

Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Local ambitions are:

- for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities;
- for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding;
- for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design;
- for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs;
- for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.2 In order to deliver the vision the plan sets a number of strategic objectives:

(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough;(2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population;(3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments;(4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments;(5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities;

(6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology;(7) To ensure that the borough is vibrant, culturally rich, and economically buoyant;(8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature;(9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met;(10) To support the goal to make the borough carbon neutral by 2030, and minimise

the impact of climate change on communities, the economy, and the environment;(11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.5 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.6 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.7 With the above modifications, the objectives and vision will then be positively prepared.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Mr and Mrs B Gear in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Benenden, but the detailed policy requires modification if the site is to be deemed deliverable and the allocation is to be found part of a sound strategy.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: this part of the response has been separated from the full representation submitted by DHA Planning. See full representation attached. See also PSLP_453 (Section 4 Policy STR1: the Development Strategy) and PSLP_454 (Section 5: Benenden - Policy AL/BE1)]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.5 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best complements the distinctive qualities of the borough'.

1.3.6 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.7 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr & Mrs Gear in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr and Mrs Gear own Uphill, Benenden, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/BE 1). It is an established residential dwelling situated on the outer edge of the village. It lies outside of the defined 'limits to built development' (LBD), but adjacent to a predominantly residential area close to village services

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it is otherwise free from any restrictive planning designations.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site is suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons set out within this representation.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

[TWBC: for section 1.3 response to Vision and Objectives see separate response PSLP_452].

1.4 Development Strategy and Strategic Policies (Policy STR1)

1.4.1 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.2 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.3 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.4.4 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.5 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: see full representation attached to view copy of Figure 5 Key Diagram]

1.4.6 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 has been duplicated here - see full representation attached]

1.4.7 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.8 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.9 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.10 The full proposed distribution of development is set out below.

[TWBC: to view copy of Table 4 Distribution of housing allocations see full representation attached].

Response

1.4.11 Our client agrees that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.12 In respect of the wider strategy, our client supports the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.4.13 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible.

1.5 AONB Release

1.5.1 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.5.2 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.5.3 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.5.4 With above criteria in mind, our clients consider there to be clear evidence of an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.5.5 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.5.6 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.5.7 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.5.8 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.5.9 Given the above constraints, planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the AONB is patently met and

with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.6 Housing Delivery

1.6.1 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.6.2 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.6.3 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area. Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table of housing completion rates 2010 to 2015 see full representation attached].

1.6.4 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.6.5 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table of housing completion rates 2015 to 2020 (statement of common ground) see full representation attached]. Tablenote: 1 The completions data for 2019/20 is yet to be formally published until the next Authority Monitoring Report 2020 is complete. However, the number of confirmed housing completions has been provided by the LPA as 474 for this latest monitoring year.

1.6.6 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.6.7 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that sites like our client's land are needed.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Mr and Mrs B Gear in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Benenden, but the detailed policy requires modification if the site is to be deemed deliverable and the allocation is to be found part of a sound strategy.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_452 (Vision and Objectives) and PSLP_454 (Section 5: Benenden - Policy AL/BE1)]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr & Mrs Gear in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr and Mrs Gear own Uphill, Benenden, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/BE 1). It is an established residential dwelling situated on the outer edge of the village. It lies outside of the defined 'limits to built development' (LBD), but adjacent to a predominantly residential area close to village services

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it is otherwise free from any restrictive planning designations.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site is suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons set out within this representation.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;

- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

[TWBC: for response to Section 1.3 Vision and Objectives see PSLP_452. For response to Policy STR1: the Development Strategy see PSLP_453].

1.7 Policy AL/BE 1 - Land adjacent to New Pond Road (known as Uphill), Benenden

1.7.1 By way of context, our client's land consists of a plot of approximately 0.77 hectares situated on the northern edge of Benenden close to the village centre to the east of New Pond Road, abutting more recent development at Hortons Close to the south.

1.7.2 The existing site comprises a single residential dwelling and curtilage with boundaries marked by substantial vegetation.

1.7.3 To the south lies recent residential development on Hortons Close and the centre of the village which contains a community shop/café and post office, a primary school, village hall, pub and bus stops serving routes between Tenterden and Tunbridge Wells.

1.7.4 Residential development in the centre of Benenden is relatively tighter knit and comprises semi-detached and detached dwelling of varying sizes. Along The Street (B2086), development is generally made up of larger detached dwellings.

[TWBC: for Figure 1: Site Overview Map see full representation attached].

1.7.5 The existing Limits to Built Development (LBD) for Benenden are drawn tightly around the built-up area but runs along the southern boundary of the land. It is therefore an edge of settlement location.

1.7.6 There are a small number of listed buildings that are located in the vicinity of the site all of which front The Street to the south and are visually and spatially separated from the proposal site by existing built form and vegetation. These include:

(A) The Old Manor House (and Gateway)(B) The Queen's Well(C) Benenden Playgroup(D) Fir Tree Cottage Ward and Sons Butchers(E) Laurel House(F) Laurel Cottages

(G) Ivydene Mersham Cottage(H) Gable Cottage and The Gables(I) Cleveland Cottage(J) Dunroamin, Oakdene, Madle Cottage, Forge Cottage and Dolphin Cottage(K) Benenden Grade II Listed Registered Park and Garden

1.7.7 From a wider heritage perspective, the site is located outside of the Conservation Area and historic core of the village.

1.7.8 The site and greater village are covered by the High Weald Area of Outstanding Natural Beauty (AONB) designation. As such there is no scope to expand Benenden without encroachment into the AONB.

1.7.9 Finally, it should be reiterated that the land has been included as a draft allocation within the Benenden Neighbourhood Plan.

1.7.10 Having regard to this context, proposed policy AL/BE 1 states:

'This site, as defined on the Benenden Policies Map, is allocated for residential development providing approximately 18-20 dwellings, of which 40 percent shall be affordable housing. Development on the site shall accord with the following requirements:

1. Provision of a single point of access onto New Pond Road; 2. Provision of a pedestrian footway from the site entrance, past Hortons Close, to the junction of New Pond Road and the B2086. This shall be designed having regard to the designation of this part of New Pond Road as an Important Landscape Approach; 3. Relocate the 30mph speed limit along New Pond Road to the north of the site; 4. Regard to be given to existing hedgerows and mature trees on site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment; 5. This site lies within, or very close to, the relevant impact risk zone for Parsonage Wood SSSI; hence an assessment of potential adverse effects on the SSSI as a result of the development will be required as part of any application, and if required the proposal shall include adequate mitigation measures, both during construction and on completion, to the satisfaction of Natural England to ensure no adverse effects on the SSSI as a result of the proposed development; 6. There is the potential for wood pasture or parkland, a BAP priority habitat, to be within 25m of the site. This should be taken into consideration as part of any detailed site-specific studies to inform development and any required mitigation; 7. The setting of the settlement character shall be maintained, and the impact on the nearby Benenden Conservation Area and the setting of nearby listed buildings reduced, including through the layout and design of the development being informed by a landscape and visual impact assessment and heritage assessment; 8. Demonstrate through the submission of relevant and proportionate archaeological investigations (as part of any planning application) that the proposal will not have a materially harmful impact on the archaeological environment; 9. Provide on-site amenity/natural green space and children's play space; 10. Contributions are to be provided to mitigate the impact of the development, in accordance with Policy PSTR/BE 1'.

Response

1.7.11 Our client supports the objective of the policy, but based on a threshold of 18 units, of which 40% of the homes would be expected to be affordable, there are significant compromises which need to be considered if the owners are to vacate their family home. As a consequence, we consider that the policy should be amended from 18 to 20 units to ensure that there is a reasonable financial incentive to do so.

1.7.12 Based on the definitions of the emerging strategy and case law, the site should also be subject to a 30% affordable housing policy requirement because it is brownfield (previously developed land). Indeed, the NPPF glossary defines PDL as:

'Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or was last occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill, where provision for restoration has been made through development management procedures; land in built-up areas such as residential gardens, parks, recreation grounds and allotments; and land that was previously developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape'.

1.7.13 As the site is situated outside of the settlement prescribed settlement confines, not in a built up area, it represents brownfield land in line with the High Court case of Dartford Borough Council v Secretary of State for Communities & Local Government (Ref: CO/4129/2015) which clarifies that gardens in rural areas are brownfield.

1.7.14 Finally, it can also be seen that there are substantial requests for supporting information and wider mitigation which will further impact upon the viability and attractiveness of the development, which will further necessitate the need to achieve 20 new homes on the site.

1.7.15 In summary, the site is suitable, available and deliverable for development and is actively being promoted by our client. However, we object to the lack of dialogue and engagement in formulating the detailed criteria of the policy. To be a sound and deliverable allocation the yield should be increased to a net 20 units and the affordable housing aspect reduced to 30% with flexibility to consider a commuted sum if viability dictates.

1.8 Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Mr and Mrs B Gear in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Benenden, but the detailed policy requires modification if the site is to be deemed deliverable and the allocation is to be found part of a sound strategy.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: this part of the response has been separated from the full response submitted by DHA Planning. See full representation attached. See also PSLP_452 (Vision and Objectives) and PSLP_453 (Section 4 Policy STR1: the Development Strategy)]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.7.15 In summary, the site is suitable, available and deliverable for development and is actively being promoted by our client. However, we object to the lack of dialogue and engagement in formulating the detailed criteria of the policy. To be a sound and deliverable allocation the yield should be increased to a net 20 units and the affordable housing aspect reduced to 30% with flexibility to consider a commuted sum if viability dictates.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Comment

Consultee	Mark Ginsberg [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Tudeley [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mark Ginsberg [REDACTED]
Comment ID	PSLP_1062
Response Date	03/06/21 12:12
Consultation Point	Policy STR/SS 3 The Strategy for Tudeley Village (View)
Status	Processed
Submission Type	Web
Version	0.8
Question 1	
Respondent's Name and/or Organisation	Mark Ginsberg
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I live at xxxx, Sherenden Road, Tudeley TN11 xxx [TWBC full postal address redacted for data protection] and have lived at this location for 25 years bringing up both my children here. I chose this location with my late wife due to the rural aspect having moved from an urban area. I feel fortunate to have this opportunity of a lovely place to live where we can all enjoy the vast benefits that this rural environment brings, the positive health benefits and tranquil and free open green spaces. I work in Tonbridge and able to regularly enjoy the incredible asset that I live amongst and that I, and visitors to the area, appreciate every day. We chose to live here because of the rural location and all that that offers.

GREENBELT

The proposed site sat within the Metropolitan Greenbelt. The purpose of the Greenbelt is to prevent urban sprawl and protect the countryside and the threat posed to wildlife and landscape. According to the NPPF, there are five stated purposes of including land within the green belt, these are to check the unrestricted sprawl of large built-up areas; to prevent neighbouring towns from merging into one another; to assist in safeguarding the countryside from encroachment; to preserve the setting and special character of historic towns and finally to assist in urban regeneration, by encouraging the recycling of derelict and other urban land. The NPPF states, developing on Greenbelt should only be in 'exceptional circumstances' and must be justified and evidenced and not to just alleviate demands for further housing.

It is not clear what the exceptional circumstances are at these sites of Tudeley and East Capel? A single landowner does not constitute exceptional circumstances and should not be considered in an intelligent and well thought out planning policy. These areas of Greenbelt have the above purposes and must be protected. In an area that is already considerably built up and congested part of the South East corner of the UK, the priority must be to save these precious green, rural landscapes for future generations. There are many alternatives, more suitable and sustainable sites throughout the Borough for building new homes which are available, for example the high number of Brownfield sites throughout Tunbridge Wells Borough. The site at Blantyre House and the government land around it. The extent of land in the north east of the Borough which is non designated land.

Save Capel campaign group undertook a survey of potential brownfield sites and have identified a number of locations that are not registered as such with the Borough and are prime sites for development.

Although the proposed development is being promoted as a garden village, the volume of 2800 homes does not make it a village other than on a planner's desktop. It will inevitably end up as a traditional housing type of development which is entirely unacceptable in this rural Greenbelt location, breaching every aspect of the need for Greenbelt. The Local Plan and the developer refer to this part of the plan as being modelled on Duchy sites such as Poundbury. This kind of 'sell' and idealism is wrong and

incorrect. Poundbury as a location is directly bolted on to the existing town of Dorchester and in its construction, it has the benefits of the transport links or rail and Strategic Road Network (SRN) encompassed within it. This proposed plan provides no rail nor immediate road and is not bolted on to a town within the borough but to that of a neighbouring borough, Tonbridge

INFRASTRUCTURE

The proximity of the site to the town of Tonbridge and the neighbouring Borough of the same name constitute considerable urban sprawl, especially when taken with the proposed new school site and the other planned sites in the Parish. Tonbridge will extend as urban to Paddock Wood. The choices made now must be prudent for our future. The areas of non-designated land must be prioritised ahead of any green belt development.

The area of this site is rich in its biodiversity. Tudeley is mentioned in the Domesday Book and there are records that show the land, which was even then noted for its richness for agriculture, was given as a gift from William the Conqueror to his half brother. 1000 years later the land is still agricultural and is a combination of grade 2 and grade 3 agricultural land. Grade 2 and 3 are very good and good respectively. The Planning office for TWBC are on record as referring to the agricultural land as poor during meetings held with Borough Councillors when voting on taking this option forward towards the plan. This was clear misinformation and untrue, to hear a planning office make such obvious untruths about the land raises serious concerns as to whether an abuse of process has taken place.

The building of a new town on this scale would destroy this rural environment where the biodiversity is rich and diverse, ancient trees and woodland remain, meadows, hedgerows and good quality agricultural land exists alongside each other with a small rural community built sympathetically within this rural setting. If the new town was built on the Tudeley site, the rural environment and landscape would be destroyed and lost forever, over 600 acres of very good/good agricultural land would go. It could never be replaced.

Due to the fact that Tudeley is a rural area and sustainable in that format there is no infrastructure in place to support a huge development of the proposed scale. The proposed site is NOT sustainable in that it is poorly served by public transport and residents will have no option but to drive to work. The current road infrastructure for the intended site is served only by narrow country lanes and there is inadequate capacity to accommodate the proposed housing development, the idea to close some roads would cause isolation to other rural areas such as Golden Green and the north side of East Peckham villages.

The roads are already at capacity from Tudeley into the neighbouring town of Tonbridge especially during peak rush hour times. The proposal to build new roads has yet to be produced in any planned format and these new roads would take up more Greenbelt. Any new Road would lead traffic to Tonbridge. Tonbridge itself is at road capacity. A new Road May bring the traffic in but would cause a bottleneck at Tonbridge, increase the problems within that town and impact on local, air quality, business costs and quality of life. For Tunbridge Wells to be prepared to inflict this type of devastation on a town of a neighbouring Borough displays a scant regard for cross Borough working as required in NPPF and for the communities that will suffer. Tunbridge Wells will pocket the council tax and Tonbridge and Malling will suffer the burden and demand.

The hugely detrimental impact on the neighbouring town of Tonbridge and its residents has already been recognised by its Borough Council who are strongly objecting over its soundness as a plan. Tonbridge & Nalling are still preparing their plan and will look to add housing in the area and plan around that, they should not have a neighbouring Borough's plans restrict their own provision to their own residents. Many of the residents within that town are also strongly objecting to the proposals. Residents of Tudeley being so close, use Tonbridge as their nearest town for most services including health, transport, retail and leisure services. an increase in population in the area would not only impact on the volume of traffic on the roads but would increase the number of commuters attempting to use Tonbridge railway station. Parking around the station is at capacity as are the commuter trains to London. With the other planned developments at sites already with suitable infrastructure such as Paddock Wood, Marden, Staplehurst and Ashford further along the line, trains may be at capacity prior to arrival at Tonbridge which is a rail hub. In addition to pressure on amenities such as health services, emergency services and schools.

The concern is that the development both in Tudeley and East Capel would result in the urbanisation of the entire area from Paddock Wood to Tonbridge destroying the Greenbelt and rural landscape permanently.

There is no railway station within close proximity of the proposed site. Network Rail have confirmed that there will not be a new railway station at Tudeley as it is too close to Tonbridge and Paddock Wood Stations for the 12 coach trains to alter their speed and to build a new station comes with huge cost implications. Despite this, within the plan, there is still a mention of a possible Rail Station in the future. Again, this is idealism and dreams. When the land was first offered it would seem that the idea of a rail station at the location would make it a near perfect location, without the station, it would be an urban carbuncle.

As mentioned previously, the proposed garden village development is split into two by the railway line and this goes against the principles for a garden village of one settlement and a fluid community. There are only two current crossings of this railway line, Hartlake Road bridge (Red Cow Bridge) which passes over the railway line. Hartlake Road is a wide single track road that allows vehicles travelling in opposite directions to pass; however, the bridge crossing is narrower and only allows two narrow vehicles to pass with extreme caution. The only other crossing is the road passing under the railway line at Sherenden Road. This road is a single track lane with the restricted height bridge being of the same width. The railway line is a main line used for both passenger and freight from the rest of Kent and Kent Ports and to impede this with any new crossing, which would be required would have extreme cost implications which would need to be recovered by developers and so would impact on final costs.

FLOODING

Much of the proposed development is on or near the floodplain. There have been limited flood risk assessments on the site and from living in the area, it is a known problem that the agricultural land floods. This problem will be exacerbated if 2800 homes are built on the Tudeley site and will impact not only on the immediate area but towns downstream of the River Medway, East Peckham and Yalding specifically. All these villages have their own flood issues that they are currently battling. The soil is Kent Clay and despite having a large number of irrigation culverts around most fields standing water remains moderate rainfall. Along the existing railway embankment within the planned development area there are storm type drains, where these drains exist the soil is wet for most of the year and during the winter months has several inches of standing water. Where the embankment lies by the main buildings of the current solar farm there is a permanent swamp due to the failure of the land to adequately drain. This combined with the changing climate and rising sea levels add significantly to the risk.

The proposed plan lies alongside an existing proposal to create an extensive quarry site increasing the current Stonecastle Quarries. The creation of the quarries on existing floodplain and adjacent to the River Medway May have a significant impact on the risk to flooding, the water table lying just below the surface. This fact may cause a significant risk to any adjacent housing development and will create a considerable challenge to develop a suitable sewerage facility which will be required to treat the waste for any development. In any case, the placing of a necessary sewage facility will be difficult and costly and represents a risk to the Medway River.

HOUSING

The current average house price in Tudeley is in excess of £700,000 and therefore represents an expensive location for home ownership. The idea that affordable housing can be included within any development at the location, which will be a high cost site for developers is hard to envisage. The likelihood is that what is termed affordable is in reality at the upper reach of the average household. Developers would seek to minimise the number of affordable to maximise profits and the result would mean a significant number of executive type houses. Within Five Oak Green, less than a mile from the proposed site sit two 5 bedrooomed new executive homes. Both of these homes were empty for a year since completion and ended on the rental market, this questions the need for such homes.

Similar developments in Kent have brought a number of purchasers moving from London with the ideology that they are moving to the country and the fact that they can get more house for their money against London prices. The availability of the good rail connections from Tonbridge will encourage this, irrespective of the saturation of the railway by existing commuters. This will also raise the number of vehicles that will be travelling towards rail stations.

The 2016 Government Garden Settlement paper raised questions on the need for a garden settlement. These included, the siting of a garden settlement should not be where there is an existing community, Tudeley has an existing community. Garden Settlements should seek to help support local businesses and local workers, there are no immediate existing local businesses and as stated above, many potential residents would be commuters for London. Garden settlements should have the support of the local

community, in the case of Tudeley this is a firm no and is not built of nimbyism but is supported not just by the local community but by CPRE, London Green Belt Council, Tonbridge and Malling Borough Council and many residents from Tonbridge and other towns and villages that would be significantly detrimentally affected by these proposed plans.

The site of the plan includes old iron works and more importantly Bank Farm which until recently had been a working agricultural farm. An issue with building on working farmland is the fact that farmers tend to bury their waste rather than dispose of it through commercial and costly means. The result of the iron works and farm sites within the planned site is that extensive and thorough surveys MUST take place before any works. Such surveys must look at any contaminants or hazardous waste or soil. To build housing without such a survey could lead to harm to residents and potential expensive law suits against the local authority or developers. Such a survey would be costly and take time but it is vital that such a survey be carried out before this plan is considered any further.

HERITAGE / HISTORICAL ASSETS

The proposed developments would not only alter the landscape forever but the detrimental effects of pollution would increase, in particular noise, light and air. This would impact on the immediate population and also on the heritage assets that are in the Parish and that form part of Tudeley's uniqueness. One historical asset that was chosen specifically for its location and quality of light is All Saints Church Tudeley and the world famous Marc Chagall windows. To this day this church attracts visitors from all over the world to enjoy and view the wonderful windows. On reading the visitors book recently the overriding common theme of response to the church and the setting was the word 'peaceful' used time and time again. This would disappear if the church was surrounded by 2800 houses and busy and congested roads. The whole of the area is steeped in history and is mentioned in the Domesday book. Heritage assets are irreplaceable and should be conserved for future generations, there are more than 140 listed buildings in the Parish of Capel.

LIAISON WITH TWBC

From the commencement of this process there has been a considerable lack of information, misinformation and a lack of detail from Tunbridge Wells Borough Council. Mistakes have been made and specifically to us, our home was not included and shown as a freehold property on the map of the site of Tudeley New Town. Bank Farm Cottages as a group of four cottages were covered in 'pink' and incorporated within the new town buildings. This has caused a great deal of upset and has been hugely unsettling to ourselves and our immediate neighbours as our home is one of the few properties in the centre of the proposed development. Despite being one of the few owner occupied homes, the proposed town centre is placed immediately to the front of our properties. There seems to be a total disregard for the individuals in our community and our homes and security.

This mistake was made verbally to the planning officer on 5th August 2019, a month before the Local Plan was published yet it still remained incorrectly shown on the maps. Making enquires of the main planning consultants state that our home and that of our neighbours were not included within the maps sent to the local authority and this suggests that it is indeed the local authority that have made the error. In any case it has rendered our property unsellable until the situation is corrected. If it was indeed the council's error then it is another display of poor planning and lack of attention to detail.

I would add that the Local Plan of over 500 pages makes it extremely difficult to 'translate', navigate and then to try and understand the process to respond. It should have been made so much more straightforward to encourage all to respond and have their say. This along with a very complicated portal which has continued to crash has meant that many hours have been lost by those trying to enter their response.

SUMMARY

The large scale, disproportionate proposed developments in Tudeley and East Capel are unsustainable and unsound. They contradict the key arguments to greenbelt land and the local authority have not fully considered all other options. The Parish of Capel currently consists of approximately 940 homes, to add 4000 new homes in these two sites alone would devastate this small strong rural community sitting between towns in greenbelt. The sites seem to have been chosen entirely on landownership and deliverability. The senior planner stated that having a single landowner makes it a good choice, that should not be the reason for which it is a good choice. Development should be spread across the whole borough and not concentrated in one corner, the Parish of Capel have been allocated 60% of

the Borough's development in the proposals regardless of the land being Greenbelt and its very close proximity to the neighbouring town and Borough, Tonbridge.

Any plans such as this will always have some objectors but planning policy states that they should have the general support of the community. These plans do not. In the recent local government elections the swing from the existing Councillor to the new Councillor was enormous, with the new Councillor taking 75% of the vote with a much increased turnout from 5 years ago. This was the local objection to the plan, however, the resistance goes further. The Conservatives themselves lost overall control of the council during the recent elections due to dissatisfaction with their decision making and strategy. Add to that, the concern from Tonbridge and its residents to this proposal, this is not a 'NIMBY' objection, but a real one.

The building of houses needs to be sustainable with environmentally friendly solutions and that reduce the impact on wildlife and nature, whilst meeting the needs of local people. The special circumstances of greenbelt MUST be adhered to and greenbelt should be a last resort, not a convenient option.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The insistence that Tunbridge Wells places the majority of its housing in the one location is unfair and unjust, not just to residents locally and across the Borough but also to the residents of the neighbouring Borough who will have to take the fallout from this proposal, I would go as far as to state that its underhand.

Brownfield seems to be ignored and there has been a constant blinkered approach to this plan. At one meeting, the now resigned Leader of the Council was quoted as stating to protesters, 'There's no point wasting your time, its going to happen'. That kind of comment by a person with such authority at the time, suggests deals have already been done, legitimate or not.

Another landowner offered a good size of land, still within Capel Parish, to the north of North farm Industrial Park. This site, which would be bolted on to the existing town of Tonbridge Wells and not inflict problems on a neighbouring borough offered short walks to High Brooms railway station from across the location and abutted the Strategic Road Network A21 to the east of the site. This proposal, which was supported by campaign groups and the local Parish Council was immediately dismissed by Tunbridge Wells without review or consideration yet it seems to have everything the Tudeley site has and more, without the need for increased roads, genuine transport infrastructure already available and accesible, in the case of rail, without needing a vehicle. Without splitting a site in two by a railway embankment; reduced risk of flooding and no negative impact on a neighbouring borough.

Why was this site dismissed so quickly?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Version	0.1
Question 1	
Respondent's Name and/or Organisation	Julia Glasser
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
5.91, 5.92, 5.93, 5.94	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident. There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend. Therefore: 1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point **5.92** The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt? The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan. **5.93** It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3. River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made) – Ref pages 7-9 Extracts: (page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom. (Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded. The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development. It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped

that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report. *5.94 Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints.* 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible. Previous planning for access - Refused (89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons: 1 a) The proposed access would be likely to create unacceptable additional hazard to traffic. 2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic 3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality. 4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park. No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access. Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational. There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes. Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location. In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area. 2. *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;* If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused. This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 Adequate servicing and parking to serve the expanded commercial use on the site;
- 2 Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage

Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic. 2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the "no cycling" rule there. 3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars. 4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.*

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access. 7. *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment; The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.*

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Bio-diversity is being highlighted world wide as being critical to the future of our planet and so I find it extraordinary that such a beautiful, peaceful area is being considered to be destroyed to create new housing when there are many other areas that would be more suitable. The calm and peace that many gain from walking through such delightful areas close to the town centre has been vital to the mental health of many, particularly during the past 15 months .

There have been deer , badgers, bats, foxes, bats, newts to name but a few, seen down there and to destroy that bio-diverse habitat that they have as their home, is irresponsible.

The loss of fauna would also directly affect the air and noise pollution for not only those enjoying the peace of the area, but the immediate neighbours as well.

The entrances proposed for this estate do not work either: the main entrance to the garden centre already causes traffic disruption on occasion and is hazardous to both enter and exit. The emergency exit by Cabbage Stalk Lane/ Hugershall Park would cause disruption in noise, calm and traffic should it be implemented and would probably cause major contamination to the water table which flows into the River Grom. Again, damaging immeasurable amounts of flora and fauna far beyond the immediate vicinity.

This development here would not be a wise choice as, in short, the road infrastructure cannot cope with such an increase in traffic.

There are currently many retail outlets which have shut down due to rates, the pandemic and a whole host of other reasons and it is these that I propose utilising as further residential housing. Also, there would appear to be an imbalance of new housing between the north and south of TW and maybe, the northern areas could be looked at more closely as since most traffic comes from the A21, it would help not having increased traffic flow straight through the town and historical common.

I believe the whole town structure needs to be looked at and a plan put in place that will not only increase housing, but possibly more importantly, holds on to a heritage that will encourage visitors to the area. Tunbridge Wells was a beautiful town, and we feel that we can get back to being a place that people want to visit and we are proud to live in. It wouldn't need to cost the town millions to do so either

Please consider this before irreversibly destroying such a beautiful area, which really should be protected, not built on

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

n/a

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I believe my comments above cover what my thoughts are

I would also comment that this form has been extremely difficult to comment on, it has deterred many from completing it

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR1: The Development Strategy

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction

- 1 These representations are submitted on behalf of Gleeson Strategic Land (Gleeson) who have previously made representations to the Council at all the 'plan making' stages of the new Borough wide Local Plan. Gleeson are concerned that notwithstanding these previous representations, the Council appears not to have taken them into account in producing the latest 'Pre-Submission' stage of the Local Plan.
- 1 The previous representations submitted on behalf of Gleeson related to the Council's proposed Development Strategy, the Council's Green Belt Study, Local Green Space Assessment and Strategic Housing and Employment Land Availability Assessment (SHELLA), which taken together, related to the promotion of an 'omission housing site' at Sandown Park on the northern side of Pembury Road at Royal Tunbridge Wells (RTW) – which is Green Belt land this in now the subject of a draft designation for Local Open Space (under Policy EN15) as shown on Inset Map 1 of the Pre-Submission draft version of the Local Plan (see the extract below).
[TWBC: for extract image, see full representation attached].
- 1 These further representations reflect Gleeson's continuing concerns that the Council has failed to properly consider the opportunity and benefit of releasing part of this land to contribute to the Council's housing requirement. Instead, the Council has unreasonable and without justification,

chosen to allocate the land as Local Open Space (which is the subject of separate representations submitted on behalf of Gleeson).

- 1 In order for these latest representations to be manageable as part of the Local Plan Examination, they have been submitted under the same headings as previously (i.e. in response to the Council's Development Plan Strategy, Green Belt Study, Local Open Space Assessment and SHELAA) but need also to be considered together to paint the wider picture of Gleeson's concerns about the way the draft local Plan has been produced.
- 1 These specific representations are focussed upon objections to the Council's proposed Development Strategy set out in draft Policies STR1 and STR/RTW1 and Policy Map 1 for Royal Tunbridge Wells and Southborough.

Gleeson's case for objecting to the draft Development Strategy

- 1 The Borough Council's proposed Development Strategy for the Borough is set out in draft Policy STR1 (Development Strategy) of the Pre-Submission Draft version of the Borough Local Plan (2020 – 2038) published in March 2021. The development strategy for Royal Tunbridge Wells and Southborough is set out in draft Policy STR/RTW1 and development proposals for this main 'regional hub' settlement are shown on Inset Map 1. Gleeson object to these draft policies in being fundamentally flawed in failing to have proper regard and weight to all available options to accommodate future growth and in particular, the available Gleeson site at Sandown Park at Royal Tunbridge Wells (RTW). For the reasons examined in these representations, it is Gleeson's case that this land is not only available but also it is suitable for housing use in a highly sustainable edge of settlement location and that as such it should be allocated for housing and open space use as a revision to Inset Map 1 of the Plan.
- 1 Gleeson welcome the Council's intention to meet in full the Borough's assessed housing requirement over the period 2021 – 2038 amounting to 12,200 additional dwellings (at an average of 678 dwellings per year). Based upon the Housing Land Supply. The Council's Housing Land Supply Assessment at 31st March 2020, confirms that based upon this requirement, a further 7,221 dwellings will be needed up to 2038 (taking into account existing housing allocations that remain unimplemented (276 dwellings) but excluding any provision for unmet housing need for an additional 1,900 dwellings required in neighbouring Sevenoaks District (referred to in paragraph 4.12 of the draft Plan).
- 1 Paragraph 4.43 of the draft Plan acknowledges that;
4.43 It is found that, even promoting all suitable SHELAA sites for allocation in the Local Plan, the borough could meet only a fraction of its housing need without the provision for strategic sites, namely the substantial expansion of Paddock Wood (including land at east Capel) and the creation of a new garden settlement at 'Tudeley Village'. With these proposals, the Local Plan can meet the housing need in line with the NPPF's standard method.
- 1 While it is undoubtedly the case the unmet part of the future housing requirement could not met without releasing Green Belt land at Paddock Wood and at Tudely Village, the main focus should rightly be upon making the best use of previously developed and underutilised land within the existing 'Limits to Development Boundaries' (LBDs) of settlements, but also in ensuring that all potentially suitable housing sites around the Borough's main regional hub settlement of RTW have first been properly examined and assessed so as to minimise the release of land in less sustainable Green Belt and other locations elsewhere.
- 1 Furthermore, when producing the initial 'Issues and Options' consultation document back in May 2017, the Council identified six possible options for meeting such needs or indeed, a combination of such options. The Distribution of Development Topic Paper (September 2019) confirms (at paragraph 5.5) that the option identified to potentially deliver development along the A21 on the eastern side of RTW as a 'Growth Corridor' was by far the most supported of the options by respondents (60%). The Council's current Core Strategy Development Plan Document adopted in June 2010 recognises RTW (together with Southborough) as the 'Main Urban Area' and in being by far the most sustainable settlement in the Borough with a wide range of facilities and which the former South East Plan (May 2009) recognised as performing an important role as a 'Regional Hub'. Indeed, the former South East Plan identified a need to review Green Belt land around RTW and Southborough as a potential location to accommodate future development needs in a sustainable manner.
- 1 Moreover, notwithstanding that RTW (with Southborough) is by far the largest and most sustainable settlement within the Borough, throughout the stages of the Local Plan production, there has been no joined-up approach in assessing housing potential on sites around the eastern side of

RTW that are also located within the potential A21 Growth Corridor, and this potential has not been assessed or weighed against alternatives. Instead, the Council's Green Belt study (Final Report dated July 2017) has in the main, ruled out the release of Green Belt land for housing purposes on the eastern side of RTW because of the claimed effect of this being 'high' when assessed against Green Belt Policy functions set out in paragraph 134 of the National Planning Policy Framework (NPPF) February 2019.

- 1 A clear example of this is the land being promoted for housing purposes by Gleeson at Sandown Park on the northern side of Pembury Road at RTW. Gleeson's proposals are shown on an illustrative masterplan (Appendix 1 attached) submitted to the Council previously, which should be considered in conjunction with other detailed supporting documents submitted as part of Gleeson's other representations in relation to the Pre-Submission draft Local Plan.
- 1 While this proposal would result in the removal of some 3 hectares of Green Belt land in order to provide 70 – 80 dwellings, this can be achieved in the form of a minor urban extension that would round off development within this eastern part of Tunbridge Wells. This can also be achieved without giving rise to any harm to the extent of the retained Green Belt land that would continue to prevent the urban coalescence of Tunbridge Wells with Pembury, which is located on the opposite side of the A21 to the east.
- 1 As part of Gleeson's proposals, some 3.3 hectares of associated land located between the proposed housing allocation and the A21 would be retained within the Green Belt, but managed and enhanced by new structural landscape planting and set aside for informal recreational use. This would therefore, not only retain the land's Green Belt function, but would also make compensatory strengthening improvements by landscape enhancement and future management, as well as providing new public access on informal open recreational space where there is none at present.
- 1 This proposal, which Gleeson originally presented to the Council back in March 2018, would be similar to the form of the proposed housing allocations elsewhere at RTW with land released from the Green Belt at proposed sites AL/RTW 5, AL/RTW 14 and at AL/RTW 19. The Council has not put forward any compelling justification as to why it would not be sustainable or in line with the Council's draft Development Strategy Policies STR1 and STR/RTW1.
- 1 For reasons set out in other current representations submitted on behalf of Gleeson, the Council's July 2017 Stage Two Green Belt Study is seriously flawed in the way that it has assessed the potential of the land for housing purposes. This is because the Council's Study assumes the removal of **all** of the Green Belt land between the current built up confines of RTW and the A21 Pembury by-pass and by concluding that in doing so the degree of harm would be 'high'.
- 1 As the Council was already aware from previous consultations with Gleeson in relation to this site, this **is not what was being proposed** and the Gleeson scheme has not therefore been assessed (or indeed reassessed) in any fair, reasonable or proportional way, nor has it been assessed against the much greater potential harm of removing land from the Green Belt at a wholly unsustainable location at Tudeley Village (which has also been assessed in the Green Belt Study as also having a 'High' adverse impact).
- 1 The Council's proposed Development Strategy should therefore, be reviewed in order to properly and fairly reassess the full potential of the releasing Green Belt land around RTW within the A21 corridor, as one of the most sustainable options to help meet the housing requirement, **before** considering and assessing other less sustainable options such as removal of the land from the Green Belt at other less sustainable locations beyond Tunbridge Wells.

List of Appendices

- 1 Illustrative Masterplan Drawing no. 1232/02. [TWBC: see full representation attached].

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Include the omission site for housing within the RTW Limit to Built Development for the reasons set out in the representations attached

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To present the case on behalf of Gleeson Strategic Land

Respondent's Name and/or Organisation Gleeson Strategic Land

Question 2

Agent's Name and Organisation (if applicable) Town & Country Planning Solutions

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. These representations are prepared and submitted on behalf of Gleeson Strategic Land (Gleeson) in relation to the Council's 'Tunbridge Wells Green Belt Study' Final Report dated July 2017 that has been prepared to inform the Development Strategy currently set out in draft Policy STR1 (Development Strategy) of the Pre-Submission draft of the Local Plan published in March 2021. Gleeson considers this study to be seriously flawed in failing to properly assess the housing potential of Green Belt land release adjoining Royal Tunbridge Wells (RTW) at Sandown Park, to the north of Pembury Road.
2. In response to the Council's 2017 Stage 2 Study, Gleeson commissioned its own Green Belt Assessment (dated February 2019) and this was previously submitted to the Council for its consideration on 10th May 2019. This is being resubmitted again as part of this current Regulation 19 representation (see Appendix 1 attached).
3. This Assessment by Gleeson relates to the part of the Council's Green Belt study associated with assessing potential harm if the land parcel 'TW5' (which extends between the Tunbridge Wells built

up area boundary to the west and the A21 Pembury by-pass to the east – see Appendix 2) were to be removed from the Green Belt judged against the five purposes of such Green Belt designation as set out in paragraph 134 of the National Planning Policy Framework (NPPF) February 2019.

4. The Gleeson proposal **does not** however, seek the release of the whole of the land parcel 'TW5' from the Green Belt. As shown on the illustrative Master Plan drawing reproduced in Appendix 3 attached, the Gleeson proposal seeks the release of approximately 3 hectares of land from the Green Belt to provide circa 70 – 80 dwellings on land immediately adjacent to the existing built up confines of Tunbridge Wells, thereby 'rounding off' existing development within this part of town. The adjoining 3.3 hectares of land immediately to the east of the proposed housing site would however, be retained within the Green Belt. The landscaped character of this 'retained land' would be enhanced by new structural planting and its proposed future maintenance as an area of publically accessible informal open recreational space, would strengthen the current contribution it makes to its Green Belt function.

5. The Green Belt Assessment undertaken by the Gleeson appointed consultants' 'The Environmental Dimension Partnership Ltd. (EDP) looks instead at how the Gleeson proposed Green Belt housing release and open space proposal performs when tested against the NPPF Green Belt functions. Based upon this assessment, the land proposed for housing use by Gleeson provides a 'low contribution to the Green Belt purposes' for the reasons set out in the EDP report. The EDP report concludes that the limited properties of the Green Belt land that the Gleeson site represents, together with the distinct relationship between the site and Tunbridge Wells; limited inter-visibility between the site and Pembury to the east and the comparatively effective defensible edge that the site would provide, would all combine to ensure that the removal of this land from the Green Belt would not cause unacceptable harm to the wider Green Belt function.

6. Indeed, the Gleeson proposal first presented to the Council over 3 years ago, would be similar and directly comparable to the Council's proposed housing allocations elsewhere at the edge of RTW as part of draft Policies AL/RTW5, AL/RTW14 and AL/RTW16. As with the Gleeson proposal, these three allocations would require the removal of Green Belt land for housing development and the retention of adjoining Green Belt land as associated open and recreational space.

7. For the reasons set out in the EDP Assessment (Appendix 2 attached), previously submitted to the Council as part of the submissions made at the Consultation draft Local Plan stage, Gleeson urged the Council to review its 2017 Green Belt study to properly assess the housing potential of the Gleeson land in order to fairly, reasonably and objectively assess this potential against other proposed Green Belt housing land release elsewhere in the Borough beyond RTW. The Council has failed to do so and therefore, Gleeson are seeking such a fair and reasonable formal review as part of the Examination of Pre-Submission Draft version of the Local Plan.

List of Appendices [TWBC: Please see supporting documents]

1. Extract from the TWBC Green Belt Study Stage 2 – Appendix A Royal Tunbridge Wells (Site no. TW5).
2. Land at Sandown Park, north of Pembury Road, Tunbridge Wells; Green Belt Assessment by The Environmental Dimension Partnership Ltd. (May 2019).
3. Illustrative Masterplan drawing no. 1232/02.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Include the omission site for housing within the RTW Limit to Built Development for the reasons set out in the representations attached

[TWBC: Please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

HB

Question 1

Respondent's Name and/or Organisation

Gleeson Strategic Land

Question 2

Agent's Name and Organisation (if applicable)

Town & Country Planning Solutions

Question 3

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 These representations on behalf of Gleeson Strategic Land (Gleeson) relate to the Pre-Submission draft version of the Tunbridge Wells Local Plan published in March 2021. Gleeson has an interest in land known as 'Sandown Park' located on the northern side of Pembury Road immediately adjoining the built up limits of Royal Tunbridge Wells (RTW) on the eastern edge of the town.
- 1 These representations (which comprise one of a number of other representations submitted to the Borough Council) relate to the Council's assessment of the land's potential for housing purposes in the latest iteration of the Strategic Housing and Employment Land Availability Assessment (SHELAA) and the Council's published 'Site Assessment Sheets for Royal Tunbridge Wells' dated January 2021.
- 1 Gleeson's have made representations to the Council at all stages leading up to the current Pre-Submission draft of the Local Plan being published in March 2021. In the Council's original 'Site Allocations Development Plan Document: Site Templates Green Belt and Rural Fringes Supporting Information' produced in February 2015, the land at Sandown Park was identified as site number 291 (see Appendix 1 attached). The land was noted as being 'adjacent to the high Weald Area of Outstanding Natural Beauty' (HWAONB), the boundary of which runs along the southern side of Pembury Road.
- 1 In April 2017, the Council then published a Strategic Housing and Employment Land Availability Assessment (SHELAA) as a 'Draft Interim Report' with the land at Sandown Park being identified as site no. 99 (see Appendix 2 attached). The site assessment not only noted the site as being 'enclosed' and 'well screened', but also noted its various sustainability credentials in relation to its proximity to local schools, the food store Tesco at Pembury to the east as well as local bus services and the National Cycle Route 18 adjacent to the site. This assessment made no mention (and presumably therefore, raised no significance) to the site being adjacent to the HWAONB boundary on the opposite side of Pembury Road to the south.
- 1 In response to this publication, Gleeson submitted representations explaining that since promoting the land for housing purposes at the Site Allocations Local Plan Examination in November 2015 (Representation no. SAL-S-732), extensive additional assessment work had been undertaken and various survey assessment reports and studies (in relation to ecology, landscape, archaeology, arboriculture and transport) in addition to an illustrative layout plan, were all submitted for the Council's consideration in May 2017.
- 1 Subsequent to this, further supporting documents were prepared and submitted to the Council as part of a 'pre-application' request by Gleeson on 2nd March 2018 (Appendix 3), to which the Council provided a response on 9th May 2018 (Appendix 4). While this consultation was through the Council's 'pre-application' advice service, it was made clear at the time that Gleeson's proposal related to submissions associated with the emerging Local Plan seeking the potential allocation of the land for housing proposes and for informal recreation.
- 1 On 10th May 2019 (Appendix 5), Gleeson responded to the matters raised by the Council in its pre-application advice dated 9th May 2018. This was accompanied by four additional supporting

/ amending documents (together with a consultation response from the Highway Authority that was dated 5th February 2019) to provide a revised Illustrative Layout Plan and a revised Access Drawing no. ITB12398-GA-005. In order to ensure that these supporting documents and illustrative drawings are considered as part of the Regulation 19 Examination, they have been resubmitted again with these current representations and now form Appendices 6 – 12 attached.

- 1 Given this previous dialogue with the Council and the submission of detailed and comprehensive supporting documents, it is of considerable concern to Gleeson that none of these previous representations were then been taken into account in the Council's subsequent iteration of the SHELAA dated July 2019, (in which site no. 99 formed part of the 'Site Assessment Sheets for Royal Tunbridge Wells' - Appendix 13) and in the most recent version of the SHELAA for Royal Tunbridge Wells January 2021 now forming Pre-Submission documents to be considered and assessed as part of the Local plan Examination .
- 1 Furthermore, the Council's previous 'Sustainability Appraisal' (published with the Consultation Draft of the Local Plan published in September 2019) for the site was also seriously flawed and the 'negative scores' given (which were not set out in any detail) were unjustified given that (as demonstrated by the supporting documents previously submitted to the Council by Gleeson), any impact is capable of being mitigated. Furthermore, significantly the Council's flawed assessment claimed (incorrectly) that the site is *"in the Area of Outstanding Natural Beauty"*.
- 1 The Council's 2019 Sustainability Assessment stated that *"Negative scores are given for air, climate change, heritage land use, landscape and noise"* and that *"high harm"* would be caused if the land were to be released from the Green Belt and there were also *"highway concerns"*.
- 1 The Council's Sustainability Appraisal (September 2019) included a table of 'scores' for the site (number 99) in Appendix E on page 165 which stated that;
"This site scores a number of neutral scores with some positive ones. Negative scores are given for air, climate change, heritage, land use, landscape and noise. The site is a greenfield site in the AONB, part of a Green Belt parcel of land that would cause high harm if released from the Green Belt. The location of the site along Pembury Road relative to distance to key services and facilities is likely to encourage car use. This has informed the air score and climate change score given. Noise score reflects location along the busy Pembury Road. The site forms part of the landscape setting of the main urban area of Tunbridge Wells and helps prevent coalescence between Tunbridge Wells and Pembury, the frontage is within the Conservation Area. This has influences the heritage and landscape scores given."
- 1 In the most recent version of the Council's 'Sustainability Appraisal of the Pre-Submission Local Plan' dated February 2021, the Gleeson site has simply been 'screened out' presumably as a consequence of the Council's previous flawed 2019 Sustainability Appraisal. The site (no. 99) is referred to as a 'reasonable alternative site' in the table on page 131 and its location is shown in Figure 10, but there is no updated assessment notwithstanding the comprehensive nature of the representations (and supporting documentation) submitted by Gleeson previously. Page 137 of the most recent Sustainability Appraisal merely states;
"On the whole, the reasonable alternatives that were not chosen for allocation had more negative scores than those that were allocated. In some locations across the settlement, reasonable alternative scores reflected the sensitivity of the local environment for example sites near the northern stretch of the Pembury Road."
- 1 As there has been no opportunity for Gleeson to have their objection to the Council's SHELAA Assessment and Sustainability Appraisal scoring for the site considered formally by an independent Local Plan Examiner, Gleeson's case has been restated again below;
 - i) 'Air score and climate change score'
- 1 The Council's previous Assessment stated *"The location of the site along the Pembury Road related to distance to key services and facilities is likely to encourage car use. This has informed the air score and the climate change score given"*.
- 2 As demonstrated by the Transport Assessment submitted to the Council previously however and as previously recognised by the Council in its 2015 'Site Templates' document, the site is in fact well located in relation to a number of local facilities including a number of schools within 200m – 2,800m distance, the Pembury Tesco store within 1,000m distance as well as Pembury Hospital within 1,500m distance. There are also convenient bus stops close by along both sides of Pembury Road which provide service connections to Tunbridge Wells town centre and the mainline rail station. In addition, the site is also well related to employment opportunities at North Farm Industrial

Estate and Knights Park. The Gleeson land is also located immediately adjacent to part of the designated National Cycle Network.

- 1 The site is therefore, in a sustainable location where there are opportunities for a range of means of transport that do not rely on car use. Indeed, as the largest town with the greatest range of facilities than any other settlement within the Borough, this edge-of-town location must reasonably be regarded as a far more sustainable location than other more remote sites being promoted elsewhere by the Council in the Pre-Submission draft Local Plan, which are bound to lead to much greater car use and longer car trips due to the lack of alternative means of transport and / or distance to facilities. This includes the Council's proposal for a new 'garden village' at Tudeley and at other locations elsewhere in the Borough.

ii) 'Heritage, land use'

- 1 The Archaeological and Heritage Assessment by EDP (May 2019) – Appendix 8, clearly demonstrates that the site could be developed in a form that would have no significant impact on any Heritage Assets (including the Tunbridge Wells Conservation Area boundary that runs along the Pembury Road frontage and the Grade II listed building located at Pembury Grange some 200m to the north of the site) and the site does not have any known significance in terms of archaeology.

iii) 'Landscape'

- 1 The site has been the subject of a comprehensive Landscape Impact Assessment (Appendix 7), which again demonstrates that the land is capable of development in form that would have no harmful impact upon the character and appearance of the site or its wider landscaped setting. The majority of the trees along the road frontage would be retained (save for the few that need to be removed in order to provide a suitable means of vehicular and pedestrian access) and these can be reinforced with new planting. As such, the landscape setting along this part of Pembury Road in approaching Tunbridge Wells from the east, would not be harmed and could be enhanced so that there would be no harmful impact upon the part of the Tunbridge Wells Conservation Area that extends along the northern side of Pembury Road.

iv) 'Noise'

- 1 Like any site abutting a road frontage, there is potential for some degree of exposure to road traffic and noise. The illustrative layout plan (Appendix 11) indicated however, that the proposed housing area would be set well back from the road frontage and with suitable sound mitigation measures adopted if required, there is no reason why road noise should in any way limit the site's potential for housing purposes.

v) 'Green Belt'

- 1 For the reasons put forward in the Green Belt Impact Assessment Report (Appendix 6) and in other separate representations submitted in relation to the Pre-Submission Draft Local Plan, the Council's own Green Belt Study (June 2017) in relation to this land is severely flawed and unreasonable. The Council's Green Belt Study looks at the effect of the removing the whole of the land between the existing built up area of Tunbridge Wells and the Pembury by-pass from the Green Belt, which is expressed as 'high', whereas this **is not** the proposal being put forward by Gleeson. It remains unclear why, given that Gleeson had raised concerns previously with the Council in the way that its Green Belt Study has been undertaken, there has been no revision in selecting suitable sites for proposed release within the Green Belt at this location.
- 1 The Gleeson proposal is not to release the whole of the 6.5 hectare area of land for development as appears to have been assessed in the Council's latest SHLAA iteration in July 2019 (Appendix 13). As clearly shown by the illustrative layout plan (Appendix 11) submitted to the Council previously, the Gleeson proposal is to only develop the western part of the site for 70 – 80 dwellings next to the existing development boundary and to retain the rest of the land within the Green Belt for use as informal recreation. Thus, the housing element released from the Green Belt would be closely related (and effectively round-off) existing built up limits to this part of RTW and the land to be retained within the Green Belt, as well as being made publically accessible for informal recreation, would help ensure retention of a significant green gap (with proposed structural planting and future management) so as to maintain and enhance its Green Belt function in preventing the coalescence between Tunbridge Wells and Pembury.
- 1 The Gleeson proposal submitted to the Council back in March 2018, would be in a similar form to that now proposed in relation to allocations AL/RTW5, AL/RTW14 and AL/RTW16 elsewhere

on the edge of RTW, that involve releasing land from the Green Belt for housing purposes but also retaining adjoining land within the Green Belt for associated recreational use.

vi) 'Highway' Impact

- 1 Following the submission of the previous supporting transport documents (Appendices 9 and 10), the Council is aware that Gleeson has had a previous dialogue with the Highway Authority at Kent County Council. The Highway Authority's latest response (Appendix 10) does not raise any fundamental concerns as to why a sustainable means of access for Pembury Road cannot be achieved as indicated on Access Drawing no. ITB12398-GA-005 (Appendix 12). This was modified in light of the Highway Authority's latest response and also so as to minimise its visual impact on this part of the road frontage in light of comments contained in the Council's 'Pre-Application Advice' response in May 2018 (Appendix 4).
- 1 The Council's supporting Consultation draft document 'Limits to Built Development) Topic Paper (August 2019) stated (in paragraph 7.2) that *"Reviewing the LBD's will also ensure that development will be focused in those settlements which are most sustainable in terms of providing facilities and services..."*. It also contained (at paragraph 7.6) a schedule of criteria that the Council claims to have used to determine land that should or should not be included within LBD's.
- 1 The assessment criteria is now set out in Table 1 of the Limits to Built Development Topic Paper publish in February 2021. The Gleeson proposal is to extend the RTW LBD to include approximately 3 hectares of land for housing purposes (for 70 – 80 dwellings) and release this land from the Green Belt. The proposal is also to retain the rest of the Gleeson land (some 3.3 hectares) immediately to the east of the housing allocation within the Green Belt and to undertake structural planting (with future management) so that this can become publically accessible as informal open recreational space.
- 1 Having regard to the Council's Table 1 criteria, the Gleeson proposal would be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside (criteria a); it would not result in coalescence and retain the gap with Pembury on the eastern side of the A21 (criteria b); it will have no adverse impact on landscape character with the layout, landscaping and open space proposed (criteria d), the release of the housing land from the Green Belt is justified on the same basis as the other edge of settlement allocations proposed at RTW, and with no adverse impact on other designated areas of national and local landscape, archaeological, geological, ecological or heritage importance (criteria d); the proposal will relate well and be in keeping with the form and function of RTW (criteria e); will not extend linear features or result in ribbon development as the housing element would reflect the depth of the site (criteria f) and the would be reasonable access to local facilities and services using non-private car mode (criteria g).
- 1 The various supporting documents produced by Gleeson and submitted to the Council previously (and resubmitted with these representations) demonstrate therefore, that this proposal would meet all the relevant criteria listed in the Topic Paper – selection criteria schedule, such as to warrant the allocation of the housing land and to accordingly extend the RTW LBD to include the land on Inset Map 1 of the Submission draft version of the Local Plan. Instead, the Gleeson land has not been fairly or properly objectively assessed in the Council's latest iteration of its SHLAA, nor has the proposed housing element been considered as a potential RTW LBD amendment on the schedules for RTW listed on pages 67 – 73 (and Figure 19) of the LBD Topic Paper.
- 1 Gleeson also considers that their site has previously been unreasonably assessed and given low sustainability scores when considered against other potential housing sites at RTW and most notably former SHELAA site 137, which was subsequently proposed to be released from the Green Belt to provide approximately 270 dwellings in the consultation version of the Local Plan as draft Policy AL/RTW 18 (now allocated under Policy AL/RTW16). The previous SHELAA Sustainability Assessment notes that *"The scores for this site are mixed"* and include negative scores for air quality due to increased car use on the A26 and in terms of noise, the site is near to the main Gatwick flight path as well as road noise. There are also negative Green Belt loss and landscape impact scores and a negative heritage score due to compromising the setting of a Hill Fort (a scheduled Ancient Monument) and the complete loss of an assart field.
- 1 As can be determined by comparing the Sustainability Appraisal for this now allocated site and the unallocated Gleeson land, the overall 'scores' for the two sites are similar and there is simply no sound justification for allocating one site and not the other. The Council approach to 'plan making' has clearly been inconsistent in this respect.

Conclusions

- 1 For the reasons set out in these representations on behalf of Gleeson, it is considered that the Council's latest SHLAA assessment for Royal Tunbridge Wells site no. 99 is severely flawed and that this has resulted in unjustified and unreasonably negative 'scores' that has counted against the Council considering this site as a suitable edge of main settlement Green Belt release for housing purposes. This in turn, has resulted in site no.99 being unreasonably excluded from the updated Sustainability Assessment and as a consequence, not allocated as a housing and informal open space allocation on Inset Map 1, with the RTW 'Limits to Built Development' boundary.
- 1 As such, it is Gleeson's case that the Council's evidence in support of its decision to exclude Site no.99 as a housing and open space allocation has not been positively prepared and is unjustified and ineffective and therefore, conflicts with Government advice set out in paragraph 35 of the National Planning Policy Framework (NPPF) February 2019.
- 1 Gleeson therefore, requests that the Examination Inspector now provides them with a formal opportunity to review the Council's SHLAA assessment (and Sustainability Appraisal) for Royal Tunbridge Wells site no. 99 in light of these representations, to ensure that the site is fairly assessed as a suitable housing alternative to others being promoted by the Council at the Regulation 19 stage, and to include the Gleeson land as an allocated site on Policy Map 1 of the Local Plan.
- 1 It should be noted that these representations should also be read in conjunction with other representations submitted on behalf of Gleeson in relation to the Council's proposed Development Strategy, Green Belt Review and the proposed new policy relating to Local Open Space Designations.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Include the omission site for housing within the RTW Limit to Built Development for the reasons Set out in the representations attached [TWBC: Please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To present the case on behalf of Gleeson Strategic Land

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See representations attached [TWBC: Please see supporting documents]

Question 1	
Respondent's Name and/or Organisation	Gleeson Strategic Land
Question 2	

Agent's Name and Organisation (if applicable) Town & Country Planning Solutions

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/RTW 1: The Strategy for Royal Tunbridge Wells

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction

- 1 These representations are submitted on behalf of Gleeson Strategic Land (Gleeson) who have previously made representations to the Council at all the 'plan making' stages of the new Borough wide Local Plan. Gleeson are concerned that notwithstanding these previous representations, the Council appears not to have taken them into account in producing the latest 'Pre-Submission' stage of the Local Plan.
- 1 The previous representations submitted on behalf of Gleeson related to the Council's proposed Development Strategy, the Council's Green Belt Study, Local Green Space Assessment and Strategic Housing and Employment Land Availability Assessment (SHELLA), which taken together, related to the promotion of an 'omission housing site' at Sandown Park on the northern side of Pembury Road at Royal Tunbridge Wells (RTW) – which is Green Belt land this in now the subject of a draft designation for Local Open Space (under Policy EN15) as shown on Inset Map 1 of the Pre-Submission draft version of the Local Plan (see the extract below).
[TWBC: for extract image, see full representation attached].
- 1 These further representations reflect Gleeson's continuing concerns that the Council has failed to properly consider the opportunity and benefit of releasing part of this land to contribute to the Council's housing requirement. Instead, the Council has unreasonable and without justification,

chosen to allocate the land as Local Open Space (which is the subject of separate representations submitted on behalf of Gleeson).

- 1 In order for these latest representations to be manageable as part of the Local Plan Examination, they have been submitted under the same headings as previously (i.e. in response to the Council's Development Plan Strategy, Green Belt Study, Local Open Space Assessment and SHELAA) but need also to be considered together to paint the wider picture of Gleeson's concerns about the way the draft local Plan has been produced.
- 1 These specific representations are focussed upon objections to the Council's proposed Development Strategy set out in draft Policies STR1 and STR/RTW1 and Policy Map 1 for Royal Tunbridge Wells and Southborough.

Gleeson's case for objecting to the draft Development Strategy

- 1 The Borough Council's proposed Development Strategy for the Borough is set out in draft Policy STR1 (Development Strategy) of the Pre-Submission Draft version of the Borough Local Plan (2020 – 2038) published in March 2021. The development strategy for Royal Tunbridge Wells and Southborough is set out in draft Policy STR/RTW1 and development proposals for this main 'regional hub' settlement are shown on Inset Map 1. Gleeson object to these draft policies in being fundamentally flawed in failing to have proper regard and weight to all available options to accommodate future growth and in particular, the available Gleeson site at Sandown Park at Royal Tunbridge Wells (RTW). For the reasons examined in these representations, it is Gleeson's case that this land is not only available but also it is suitable for housing use in a highly sustainable edge of settlement location and that as such it should be allocated for housing and open space use as a revision to Inset Map 1 of the Plan.
- 1 Gleeson welcome the Council's intention to meet in full the Borough's assessed housing requirement over the period 2021 – 2038 amounting to 12,200 additional dwellings (at an average of 678 dwellings per year). Based upon the Housing Land Supply. The Council's Housing Land Supply Assessment at 31st March 2020, confirms that based upon this requirement, a further 7,221 dwellings will be needed up to 2038 (taking into account existing housing allocations that remain unimplemented (276 dwellings) but excluding any provision for unmet housing need for an additional 1,900 dwellings required in neighbouring Sevenoaks District (referred to in paragraph 4.12 of the draft Plan).
- 1 Paragraph 4.43 of the draft Plan acknowledges that;
4.43 It is found that, even promoting all suitable SHELAA sites for allocation in the Local Plan, the borough could meet only a fraction of its housing need without the provision for strategic sites, namely the substantial expansion of Paddock Wood (including land at east Capel) and the creation of a new garden settlement at 'Tudeley Village'. With these proposals, the Local Plan can meet the housing need in line with the NPPF's standard method.
- 1 While it is undoubtedly the case the unmet part of the future housing requirement could not met without releasing Green Belt land at Paddock Wood and at Tudeley Village, the main focus should rightly be upon making the best use of previously developed and underutilised land within the existing 'Limits to Development Boundaries' (LBDs) of settlements, but also in ensuring that all potentially suitable housing sites around the Borough's main regional hub settlement of RTW have first been properly examined and assessed so as to minimise the release of land in less sustainable Green Belt and other locations elsewhere.
- 1 Furthermore, when producing the initial 'Issues and Options' consultation document back in May 2017, the Council identified six possible options for meeting such needs or indeed, a combination of such options. The Distribution of Development Topic Paper (September 2019) confirms (at paragraph 5.5) that the option identified to potentially deliver development along the A21 on the eastern side of RTW as a 'Growth Corridor' was by far the most supported of the options by respondents (60%). The Council's current Core Strategy Development Plan Document adopted in June 2010 recognises RTW (together with Southborough) as the 'Main Urban Area' and in being by far the most sustainable settlement in the Borough with a wide range of facilities and which the former South East Plan (May 2009) recognised as performing an important role as a 'Regional Hub'. Indeed, the former South East Plan identified a need to review Green Belt land around RTW and Southborough as a potential location to accommodate future development needs in a sustainable manner.
- 1 Moreover, notwithstanding that RTW (with Southborough) is by far the largest and most sustainable settlement within the Borough, throughout the stages of the Local Plan production, there has been no joined-up approach in assessing housing potential on sites around the eastern side of

RTW that are also located within the potential A21 Growth Corridor, and this potential has not been assessed or weighed against alternatives. Instead, the Council's Green Belt study (Final Report dated July 2017) has in the main, ruled out the release of Green Belt land for housing purposes on the eastern side of RTW because of the claimed effect of this being 'high' when assessed against Green Belt Policy functions set out in paragraph 134 of the National Planning Policy Framework (NPPF) February 2019.

- 1 A clear example of this is the land being promoted for housing purposes by Gleeson at Sandown Park on the northern side of Pembury Road at RTW. Gleeson's proposals are shown on an illustrative masterplan (Appendix 1 attached) submitted to the Council previously, which should be considered in conjunction with other detailed supporting documents submitted as part of Gleeson's other representations in relation to the Pre-Submission draft Local Plan.
- 1 While this proposal would result in the removal of some 3 hectares of Green Belt land in order to provide 70 – 80 dwellings, this can be achieved in the form of a minor urban extension that would round off development within this eastern part of Tunbridge Wells. This can also be achieved without giving rise to any harm to the extent of the retained Green Belt land that would continue to prevent the urban coalescence of Tunbridge Wells with Pembury, which is located on the opposite side of the A21 to the east.
- 1 As part of Gleeson's proposals, some 3.3 hectares of associated land located between the proposed housing allocation and the A21 would be retained within the Green Belt, but managed and enhanced by new structural landscape planting and set aside for informal recreational use. This would therefore, not only retain the land's Green Belt function, but would also make compensatory strengthening improvements by landscape enhancement and future management, as well as providing new public access on informal open recreational space where there is none at present.
- 1 This proposal, which Gleeson originally presented to the Council back in March 2018, would be similar to the form of the proposed housing allocations elsewhere at RTW with land released from the Green Belt at proposed sites AL/RTW 5, AL/RTW 14 and at AL/RTW 19. The Council has not put forward any compelling justification as to why it would not be sustainable or in line with the Council's draft Development Strategy Policies STR1 and STR/RTW1.
- 1 For reasons set out in other current representations submitted on behalf of Gleeson, the Council's July 2017 Stage Two Green Belt Study is seriously flawed in the way that it has assessed the potential of the land for housing purposes. This is because the Council's Study assumes the removal of **all** of the Green Belt land between the current built up confines of RTW and the A21 Pembury by-pass and by concluding that in doing so the degree of harm would be 'high'.
- 1 As the Council was already aware from previous consultations with Gleeson in relation to this site, this **is not what was being proposed** and the Gleeson scheme has not therefore been assessed (or indeed reassessed) in any fair, reasonable or proportional way, nor has it been assessed against the much greater potential harm of removing land from the Green Belt at a wholly unsustainable location at Tudeley Village (which has also been assessed in the Green Belt Study as also having a 'High' adverse impact).
- 1 The Council's proposed Development Strategy should therefore, be reviewed in order to properly and fairly reassess the full potential of the releasing Green Belt land around RTW within the A21 corridor, as one of the most sustainable options to help meet the housing requirement, **before** considering and assessing other less sustainable options such as removal of the land from the Green Belt at other less sustainable locations beyond Tunbridge Wells.

List of Appendices

- 1 Illustrative Masterplan Drawing no. 1232/02. [TWBC: see full representation attached].

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Include the omission site for housing within the RTW Limit to Built Development for the reasons set out in the representations attached

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To present the case on behalf of Gleeson Strategic Land

Question 1

Respondent's Name and/or Organisation Gleeson Strategic Land

Question 2

Agent's Name and Organisation (if applicable) Town & Country Planning Solutions

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 15 Local Green Space

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 These representations on behalf of Gleeson Strategic Land (Gleeson) relate to Draft Policy EN15 (Local Green Space) Appendix 2 and Inset Map 1 of the Pre-Submission draft version of the Tunbridge Wells Local Plan published in March 2021, together with the two associated background documents entitled Local Green Space Methodology and Local Green Space Assessment both dated February 2021. Gleeson has an interest in land known as 'Sandown Park' located on the northern side of the A264 Pembury Road immediately adjoining the built up limits of Royal Tunbridge Wells (RTW) on the eastern edge of the town. This land (the 'Gleeson land') is shown as a proposed 'Local Green Space' on Inset Map 1 of the Plan's draft Proposals Map and is listed as Site No. 217 in Appendix 2 of the draft Plan.

- 1 The land at Sandown Park has been the subject of a number of previous representations by Gleeson following the publication of the Council's previous 'Site Allocations Development Plan Document: Site Templates Green Belt and Rural Fringes Supporting Information' dated February 2015. In the Document, the Gleeson land was identified as site number 291. The land was also promoted by Gleeson for housing purposes at the Site Allocations Local Plan Examination in November 2015 (Representation no. SAL-S-732).
- 1 Subsequently, Gleeson also submitted representations in response to the Council's Strategic Housing and Employment Land Availability Assessment (SHELAA) 'Draft Interim Report' published in April 2017. Further supporting documents were prepared and submitted to the Council as part of a 'pre-application' advice request by Gleeson on 2nd March 2018 (Appendix 1) to which the Council provided a written response on 9th May 2018 (Appendix 2).
- 1 While this consultation was through the Council's 'pre-application advice service', it was made clear that the submissions were associated with the emerging Local Plan in relation to the potential allocation of the land for housing purposes and for informal recreation. An illustrative masterplan (revised to take account of the comments contained in the Council's pre-application response and subsequent consultations with the Highway Authority) is contained in Appendix 3 attached.
- 1 The Council's response (Appendix 2) stated that *"At present, given the Green Belt status and site constraints, it is unlikely that the Local Planning Authority would support housing development on this site"*, but it made no reference to any potential 'Local Green Space' designation. Thus, notwithstanding Gleeson's extensive consultations with the Council dating back to 2015, the draft proposal to designate the land as Local Green Space under the provisions of draft Policy EN17 of the subsequent Regulation 18 Consultation draft version of the Local Plan September 2019 came completely out-of-the-blue and appeared to be aimed as seeking to frustrate the potential for that part of the land (some 3 hectares) located closest to the existing settlement boundary, from being released from the Green Belt to provide some 78 – 80 dwellings in one of the most sustainable locations on the Borough – as put forward in the pre-application consultation to the Council in March 2018 (Appendix 1).
- 1 Gleeson objected to draft Policy EN17 not only in relation to the proposed allocation of the Sandown Park land as Local Green Space, but also object to draft Policy EN17 in its entirety as being contrary to paragraph 35 of the National Planning Policy Framework in being not positively proposed, justified, effective or consistent with national policy to promote sustainable development.
- 1 Gleeson's concerns and objections were set out in detail in the 'Local Green Space Assessment' (dated October 2019) prepared by Gleeson's consultants The Environmental Dimension Partnership Ltd. (EDP) reproduced in Appendix 4, which has been resubmitted as part of these current representations.
- 1 The EDP Assessment examined the Council's previous two supporting documents also published in September 2019; the 'draft Local Green Space Assessment' (dLGSA) and Local Green Space Designation Methodology (LGSDM) having regard in particular, policy and advice contained in the National Planning Policy Framework and National Planning Practice Guidance documents. Paragraph 99 of the NPPF confirms that Local Green Space can be designated through local and neighbourhood plans and *"allows communities to identify and protect green areas of particular importance to them"*, but this should be *"consistent with local plans of suitable developments and complement investment in sufficient homes, jobs and other essential services"*.
- 1 Paragraph 100 and 101 of the NPPF add however, that;
"100. The Local Green Space designation should only be used where the green space is:
a) In reasonably close proximity to the community it serves;
b) Demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and
c) Local in character and is not an extensive tract of land.
101. Policies for managing development within a Local Green Space should be consistent with those for Green Belts".
10. Appendix EDP 2b of the EDP Local Green Space Assessment contains extracts of the NPPG guidance relating to LGS designation. This includes;
"a means to provide special protection against development for green areas of particular importance to local community..." "where those spaces are demonstrably special to the local community".

- . *"in particular, plans must identify sufficient land in suitable locations to meet development needs and the Local Green Space designations should not be used in a way that undermines this aim of plan making".*
- . *"if land is already protected by Green Belt Policy... then consideration should be given to whether any additional local benefit would be gained by designation as Local Green Space".*
- . *"... the local planning authority... should contact land owners at an early stage about proposals to designate any part of their land as Local Green Space..." and*
- . *"if the features that make a green area special and locally significant are to be conserved, how it will be managed in the future is likely to be as important consideration".*
- 1 For the detailed reasons set out in the EDP Assessment (Appendix 4), the representations submitted on behalf of Gleeson's made the case that the Council's proposal to designate the Gleeson land as Local Green Space failed the second of the three combined tests for designation set out in paragraph 100 of the NPPF and directly conflicts with all the NPPG guidance set out above.
- 1 The Council provided no evidence that the Gleeson land is 'demonstrably special to the local community' sufficient to justify Local Green Space designation. It is clear that from the schedule on page 94 of the Council's previous dLGSA, that the proposed designation of the Gleeson land had (together with many others) not come about through any approach from the local community, but had instead resulted from an *"in-office suggestion"* (no doubt as a consequence of the previous Gleeson consultations to seek to release part of the land for housing purposes).
- 1 The dLGSA schedule acknowledged that the site is already subject to Green Belt policy, but make no mention that part of the land is also within a designated conservation area. The Council's 'Demonstrably Special' assessment was weak and referred only to its claimed visual amenity importance contributing to the character and approach to the settlement. Not only is this justification for designation at odds with the national policy and guidance, but also this is not a specific criteria for any such Local Green Space assessment listed in Table 2 of Appendix 1 of the Council's previous LGSDM, meaning that the Council had not followed its own methodology in selecting this site as Local Green Space.
- 1 Of the assessment criteria listed on the Council's previous Assessment Form included within the previous LGSDM, none were relevant for Local Green Space designation of the Gleeson land. As regards 'Beauty', the land is not within the High Weald Area of Outstanding Natural Beauty (contrary to what is erroneously stated in the Council's 2019 SHELAA for Site 99); the land is not of any 'Historical significance' as in the form proposed in the Gleeson Masterplan (Appendix 3) there would be no harmful impact upon any historic assets; the land has no 'Recreational value' as there is no public access or recreational use; the land has no 'Tranquillity', as it is immediately adjacent to the RTW built up area and A264 Pembury Road and the ecology reports submitted to the Council previously confirm that the land has no specific significance for 'Wildlife'.
- 1 In line with the NPPG guidance, paragraphs 2.11 and 4.7 of the Council's previous LGSDM emphasised that landowners would be contacted at an *"early stage"* and *"prior to the Plan first being made publically available"* i.e. prior to the start of the draft Local Plan consultation period that commenced on 20th September 2019. Notwithstanding the previous extensive consultations with the Council about the potential release of part of the Green Belt land for housing purposes (with complementary arrangements set aside for retaining adjoining land within the Green Belt with landscape planting and with future management as informal recreation open space), the Council had made no advanced contact with Gleeson about the proposed Local Green Space designation, which was only known about at the time the draft Plan was published in September 2019.
- 1 Perhaps most fundamentally of all, the Council had provided no soundly based assessment as to why Local Green Space designation was necessary given that the land already has Green Belt policy protection. The failure to note the Green Belt status of land was a serious omission and flawed in the Council's Site Assessment Form contained within Appendix 1 of the previous LGSDM (in which Table 2 lists the criteria to be assessed).
- 1 The Council's unjustified appraisal appeared instead to be aimed at frustrating Gleeson's Local Plan proposal and it is wholly illogical on the one hand to propose the release of Green Belt land for housing development at unsustainable locations such as a Capel and Tudley Village whilst on the other hand ignoring the potential to release Green Belt land as a much more sustainable, edge of settlement location at RTW. Thus, the Council's proposed designation also conflicted with national policy and guidance in being used in a way that clearly undermines the proper aims of plan making.

- 1 The Council's seriously flawed and unjustified approach to the proposed Local Green Space designation of the Gleeson land also brought into doubt the sound and reasonable justification of the other high number (some 227) of proposed Local Green Space sites listed in Appendix 2 of the Consultation draft Local Plan and as shown on the various Inset Maps of the Plan's main Proposal Map. Paragraph 2.11 of the previous LSGDM (and elsewhere) stated that following the draft Local Plan consultation, the Local Green Space designation might be changed prior to the formal submission of the Plan for Examination (i.e. at the Regulation 19 stage). The representations on behalf of Gleeson made the case that all of these previously proposed designations should be reviewed and carefully reassessed and judged against national policy and guidance, especially given that of the 383 sites assessed in the previous DLGSA, some 69 (18%) had not actually been promoted by the local community, but had instead resulted from an 'In Office Suggestion'. Of the 227 proposed Local Green Space designations in the Consultation draft Plan, some 44 (19.3%) were as a result of an 'In Office Suggestion'.
- 1 In making the previous representation the point was also made that two adjacent local authorities (Wealden and Rother Districts) who had also recently published Submission draft Local Plans, neither of which propose any specific policy or proposals relating to Local Green Space designations. In other words, neither of these adjoining authorities considered that there is any special justification to designate Local Green Space given other policy protection available, and this again cast doubt as to why Tunbridge Wells Borough considered that there was such special justification so as to designate as many as 227 sites as Local Green Space.
- 1 Furthermore, as set out in Section 5 of the EDP Local Green Space Assessment (Appendix 4), the Plymouth and South West Devon Joint Local Plan Case Study demonstrated clearly, that the similar approach to Local Green Space designation as followed by Tunbridge Wells Borough Council was fundamentally unsound. The Examination Inspector's comments (March 2019) are particularly relevant and on the same basis, the representations on behalf of Gleeson made the case the draft Policy EN17 should be deleted from the next stage (i.e. the Pre-Submission stage) of the Local Plan.
- 1 So what has changed since the submission of these previous representations? In addition to the draft Local Green Space Policy being renumber and changed from Policy EN17 to Policy EN15 in the Pre-Submission draft of the Plan, the Council claims to have now reviewed the methodology of the Local Green Space Assessment but there are still 177 Local Green Space sites listed in Appendix 2 of the draft Plan. This includes the Gleeson land at 'Site Number 217' ("Green space near Sandown Park") which is shown designated for this purpose on Inset Map 1 (Royal Tunbridge Wells and Southborough) – see extract below.

[TWBC: for extract image, see full representation attached].

- 1 Within the Council's Local Green Space Assessment February 2021, the Gleeson Land (site 217) is assessed as follow;

[TWBC: for table, see full representation attached].

- 1 Analysis of Appendix 2 of the draft Local Plan confirms that although there are now 61 fewer Local Green Space sites put forward, 4 of these are new sites that were previously rejected in the Council's previous Assessment, and Green Belt site's (such as Gleeson's) are still included (many based upon 'in house, Officer suggestions') notwithstanding that there is no sound planning policy justification or need for doing so. It remains Gleeson's case therefore, that as the Local Green Space designation of Green Belt land serves no planning policy purpose, all such designations should be deleted (and removed from the Plan's Inset Maps) in failing to be in accordance national policy advice contained in both the NPPF and NPPG.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Delete LGS Site no. 217 from Inset Map 1 and Appendix 2 for the reasons set out in the representations attached

[TWBC: Please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Question 1	
Respondent's Name and/or Organisation	Gold Property Development Ltd
Question 2	
Agent's Name and Organisation (if applicable)	Future Planning & Development Ltd
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR/SS 1, STR/SS 3 and PSTR/LA 1 – see Comment Numbers PSLP_1555, PSLP_1647, PSLP_1648 and PSLP_1649. Attachments uploaded as supporting information]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Future Planning and Development act on behalf of our client, Gold Property Developments Ltd, in respect of their site, Lamberhurst Winery, Lamberhurst Down, Lamberhurst. This site is being promoted for residential development; it being sustainably located on the edge of the village of Lamberhurst.

The proposed submission version of the Local Plan identifies the requirement for additional land for housing in Policy STR1 and sets out a strategy for meeting this need. The proposed approach principally relies upon the allocation of large scale housing sites arising from the strategic urban expansion of Paddock Wood and the proposed Tudeley Village new settlement. Other than Tunbridge Wells, the Plan proposes only limited housing allocations for the other centres in the Borough, as set out in Table 4 - Distribution of housing allocations.

While it is acknowledged that paragraph 72 of the NPPF supports the new settlements and major urban extensions in order to achieve the supply of a large number of new homes, this must be brought forward in tandem with smaller scale development that is delivered more flexibly and quickly. It is our view that the Council's proposed approach to delivering the homes needed by the Borough is fundamentally unsound, as it is entirely reliant on a small number of volume housebuilders to bring forward development at an unrealistic delivery rate. By contrast, a more even distribution of allocated sites across the Borough, which supports and enhances existing communities, would ensure a more

successful and continuous delivery of homes across the Borough and throughout the Plan period. Small and medium sized sites, usually brought forward by SME developers, rather than volume housebuilders, should play an important role in delivering housing within the Borough, but the proposed delivery strategy promotes the opposite of this.

We therefore submit that Policies STR/SS1 and STR/SS3 are unsound. These policies cannot be amended to be made sound, so long as the strategy of the proposed Plan is to achieve the required number of additional homes through large-scale development in just two locations, as opposed to a more proportionate expansion of existing sustainable settlements across the Borough. It is not that one or other of these two sites should not be brought forward for development, but that they must be balanced by the provision of more housing on smaller sites in other settlements.

Policy PSTR/LA 1 sets out a strategy for Lamberhurst parish. Point 2 of this policy proposes to build approximately 25-30 new dwellings on land at Spray Hill, which is expanded at Policy AL/LA 1. We have no objection to the allocation of this site for housing and agree that the provision of additional housing in Lamberhurst Down is a sensible approach to providing for housing need in a sustainable location. However, we consider PSTR/LA 1 to be unsound insofar as it follows Policy STR 1 and fails to deliver enough housing across the Borough, for the reasons set out above.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In order to deliver the homes required by the Local Plan consideration should be given to the allocation of Lamberhurst Winery (SHELAA site reference 423) for housing. This site is being brought forward by a SME developer and is proposed to be delivered as soon as possible following the grant of planning permission. Officers have confirmed that the development of part of this site for affordable housing for local people is considered acceptable in principle and a planning application for this element is to be submitted imminently. This could serve as a first phase for the wider development of the site.

Policy PSTR/LA 1 should be modified to include the allocation of around 125 dwellings at Lamberhurst Winery (SHELAA site reference 423) and an additional allocation policy should be included (AL/LA 2) for the allocation of this site.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to clearly set out the case for an appropriate approach to housing allocations

Future Notifications

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point.

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger

of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

1. *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic.
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut.

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rationale.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to

Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

3. Adequate servicing and parking to serve the expanded commercial use on the site;

4. Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.

2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.

3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.

4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

5. Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation

6. Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I write to register my objection to the ludicrous plan to close Hartlake Road permanently to through traffic.

It is a vital access route between the villages, for residents and businesses alike. The disruption to all the businesses along there would quite probably lead to their undoing - as if Covid 19 hasn't already caused enough heartache and pain.

As a long term resident of Tonbridge, as well as a local business owner I strongly object to such a disruptive move.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

Question 1

Respondent's Name and/or Organisation	Lance Goodship
---------------------------------------	----------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

4.48, Policy STR 1, The Development Strategy, point 5)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Don't know
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Local resident consensus represented by the 412 signatories of the petition (<https://www.change.org/Kingstanding>) do not believe that the nil detriment and safety requirement test to Longfield Road in national planning and transport policy can be fully achieved without the main entrance for the new business park to the north of North Farm/Kingstanding Way, Royal Tunbridge Wells, being connected directly to an A21 junction via a private road. In summary, residents disagree with point 5) under section 4.48 that the proposed design is 'well connected to the improved A21'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Section 4.48 point 5 should be changed to:

'Provides for a prestigious new business park to the north of North Farm/Kingstanding Way, Royal Tunbridge Wells, well connected to the improved A21 via a private road connected directly to the Longfield Road A21 junction or via a private road connected directly to the A21 junction near Half Moon Lane.'

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Only if required to provide any additional context or clarifications to the Inspector.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

A direct access private road to an A21 junction is possible via either of two existing gravel roads, one which connects to the A21 junction near Half Moon Lane and the other that connects to the North Farm A21 junction. Section 4.123 already provides Green Belt justification for building the business park on Green Belt land and if the existing gravels roads need to be widened into Green Belt land then there is no reason why the same justification cannot be used.

There is additional further justification related to Green Belt impact at section 5.99 related to the same business park proposal.

---------------------------------------	-----------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Pre-Submission Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The process for understanding the Local Plan is a matter of navigating through 140 separate documents, 400Mb of data and amounting to a total of 7,786 pages of documents. The process of understanding the intertwined nature of the documents for ordinary folk without training or experience of Town and Country Planning Laws is a challenge, and therefore difficult to conform to the expressed format of addressing particular policy, and thus this submission will be a more general assessment of the Local Plan.

I will attempt to put forward an overall suggestion that the plan should be returned to TWBC for a revision that takes account of some factors that I think are particularly relevant, and I suggest may expose significant flaws in the Local Plan as submitted.

The previous public consultation (Regulation 18 Consultation) resulted in some 8000 comments from some 2000 contributors. The plan was revised, and most of the objection were ignored, and the Plan was largely unchanged to the current submission here.

Once the Local Plan is accepted policy for development for the next decade is set out, and experience of the local planning process suggests that it is impossible to make any changes, even with the benefit of new evidence and opinion.

Thus it is vital for the Local Plan to be well thought out and consistent in applying the directing Policies, and setting out a plan that is able to deliver a fair and clear framework that has the best interests of the residents of Tunbridge Wells, rather than offering opportunity to land owners and developers.

The Local Plan should be returned for further consultation for the following reasons:

1

Many of the assumptions made that underpin the basis of the Local Plan are now out of date and irrelevant, and in light of changes to society and working and retail habits that will come about as a consequence of the pandemic these assumptions (data and common sense observations) should be re-assessed to provide a more realistic and up-to-date premises of the local plan. The post-pandemic effects are likely to cause great changes and the local plan must be delayed to take this into account.

2

The public consultation produced 8000 comments from 2000 respondents mostly against many parts of the local plan, and these objections have been swept aside and ignored. There is widespread opposition to the plans to build in Green Belt Land and building in the ANOB, and concerns over building in flood risk areas, and further concerns about the effects of climate change, sustainability, and other green issues. The response of the planning officers is to largely to ignore all opposing views and opinions, and commission further studies to bolster their case.

The recent local Council elections changed the balance of power in the Council, and the residents at Capel voted against the existing councillor in favour of an independent because of the opposition to the planned housing development in the Tudley Flood Plain.

3

The development on Green Belt Land and in the AONB should be the last resort, and all other location of available development land should be completely exhausted before any Green Belt Land is developed.

The Local Plan shows Green Belt Land and development in the AONB, and ignores many brown field sites, redevelopment of existing buildings, particularly retail and office buildings vacant because of changes in society due to post covid changes.

Development of Green Belt Land, provided -

1. to check unrestricted sprawl of large built up areas
2. to prevent neighbouring towns merging into one another
3. to assist in safeguarding the countryside from encroachment
4. to preserve the setting and special character of historic towns
5. to limit potential level of harm to the Green Belt associated with release

should not be included for development on the Local Plan.

Development in the AONB should not be included in the Local Plan.

4

The plan should be rejected and re-written to take account of a new assessment of the town centre and associated results of a post-pandemic economy where it is likely to be further shop and business closures, and where the availability of development opportunity and particularly change of use from commercial to residential occupancy must be considered as part of a whole local plan delivery.

5

The availability of brown field sites and change of use resulting from the post-pandemic economy, and changes in work patterns where office space is no longer required must change the assumptions that underpin the Local Plan, and thus the Local Plan should be rejected so these revised circumstances are reconsidered and incorporated in revised local plan.

6

The delivery of the local plan will so to speak lock the future development strategy of the town for the next decades and we must take more time to consider what sort of future we want for the town. Here is a chance to call a halt to pre-conceived ideas and generate a new and enlightened way to deal with development and progress in challenging times as we deliver a Local Plan for a post-pandemic society.

The Plan contains inconsistencies where the definitions of Green Belt and AONB are variously interpreted, in one location contradicting statements in another. It appears that this is an consistency that has been recognised by other comments.

The Plan ignores the value, aims and objectives of the Green Belt, and fails to protect Green Belt Land.

The Plan ignores the preservation of the AONB.

The Plan fails to deliver clear policy and direction for Carbon Emissions.

The plan fails to take account of the post covid pandemic economy and changes in work habits.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan should be returned to the consultation stage so the Plan can be re-written to take account of the invasion of Green Belt Land and development in AONB, and re-consider existing brown field sites for development first, as the conversion of existing buildings for alternative use (housing) is less impact on carbon footprint. As the first principle the plan should develop brown field sites particularly if they are in central locations, where the impact on sustainable transport and the requirement for car ownership and use of public transport can be delivered.

The Plan should be returned for consultation to take account of the post pandemic developments and changes in work and leisure activities, and take account of changes in social activities. For example offices and retail premises that are vacant should be the priority for redevelopment for housing, located in central areas where a sustainable transport policy can be delivered.

The Local Plan will shape the future of the borough for decades, and should be fit for purpose. The Plan is not sound in the current version and should be returned and re-submitted for consultation.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The citizens of Tunbridge Wells should be fighting for a change in this process, and I am sure there will be support from the people once they realise consultation will make a change and deliver a fair and equitable society that delivers the needs and best interests of the ordinary folk of the borough.

The Plan is conceived to allow the developers to set the agenda, and the call for sites favours developers and land owners to select the easy (and cheap) sites to develop where the most important factor is the profit, rather than delivering housing that meets the needs of those folk who are attempting to make

a start with a family for example, where low cost housing could available in the centre of town where a car is not essential, and use of an affordable public transport system can be used for essential travel.

There is not much evidence this is a priority in the Local Plan, and particularly in the post pandemic economy, the Plan should be returned for a proper re-assessment.

The Local Plan should be a document that directs the development of the Borough for the next period, but must be in the control of the local council and be adaptable as the economic and social factors change, so it must be possible for change in the future life of the Local Plan. As it is now the Local Plan sets policy in such tight terms that a mistake made at the writing stage sets the framework for 15 or 20 years, and this surely is not in the best interests of the people of Tunbridge Wells.

The threat to Green Belt Land in the Local Plan is an erosion of land set aside and protected by Law as designated Green Belt and all developments on Green Belt Land should be removed from the Local Plan. There are alternative sites in the Call for Sites list that should be considered and developed, even if costs are higher than a green field site.

Also there should be no development on sites in the AONB, also protected areas.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Foreword

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The process for understanding the Local Plan is a matter of navigating through 140 separate documents, 400Mb of data and amounting to a total of 7,786 pages of documents. The process of understanding the intertwined nature of the documents for ordinary folk without training or experience of Town and Country Planning Laws is a challenge, and therefore difficult to conform to the expressed format of addressing particular policy, and thus this submission will be a more general assessment of the Local Plan.

I will attempt to put forward an overall suggestion that the plan should be returned to TWBC for a revision that takes account of some factors that I think are particularly relevant, and I suggest may expose significant flaws in the Local Plan as submitted.

The previous public consultation (Regulation 18 Consultation) resulted in some 8000 comments from some 2000 contributors. The plan was revised, and most of the objection were ignored, and the Plan was largely unchanged to the current submission here.

Once the Local Plan is accepted policy for development for the next decade is set out, and experience of the local planning process suggests that it is impossible to make any changes, even with the benefit of new evidence and opinion.

Thus it is vital for the Local Plan to be well thought out and consistent in applying the directing Policies, and setting out a plan that is able to deliver a fair and clear framework that has the best interests of the residents of Tunbridge Wells, rather than offering opportunity to land owners and developers.

The Local Plan should be returned for further consultation for the following reasons:

1

Many of the assumptions made that underpin the basis of the Local Plan are now out of date and irrelevant, and in light of changes to society and working and retail habits that will come about as a consequence of the pandemic these assumptions (data and common sense observations) should be re-assessed to provide a more realistic and up-to-date premises of the local plan. The post-pandemic effects are likely to cause great changes and the local plan must be delayed to take this into account.

2

The public consultation produced 8000 comments from 2000 respondents mostly against many parts of the local plan, and these objections have been swept aside and ignored. There is widespread opposition to the plans to build in Green Belt Land and building in the ANOB, and concerns over building in flood risk areas, and further concerns about the effects of climate change, sustainability, and other green issues. The response of the planning officers is to largely to ignore all opposing views and opinions, and commission further studies to bolster their case.

The recent local Council elections changed the balance of power in the Council, and the residents at Capel voted against the existing councillor in favour of an independent because of the opposition to the planned housing development in the Tudley Flood Plain.

3

The development on Green Belt Land and in the AONB should be the last resort, and all other location of available development land should be completely exhausted before any Green Belt Land is developed.

The Local Plan shows Green Belt Land and development in the AONB, and ignores many brown field sites, redevelopment of existing buildings, particularly retail and office buildings vacant because of changes in society due to post covid changes.

Development of Green Belt Land, provided -

1. to check unrestricted sprawl of large built up areas
2. to prevent neighbouring towns merging into one another
3. to assist in safeguarding the countryside from encroachment
4. to preserve the setting and special character of historic towns
5. to limit potential level of harm to the Green Belt associated with release

should not be included for development on the Local Plan.

Development in the AONB should not be included in the Local Plan.

4

The plan should be rejected and re-written to take account of a new assessment of the town centre and associated results of a post-pandemic economy where it is likely to be further shop and business closures, and where the availability of development opportunity and particularly change of use from commercial to residential occupancy must be considered as part of a whole local plan delivery.

5

The availability of brown field sites and change of use resulting from the post-pandemic economy, and changes in work patterns where office space is no longer required must change the assumptions that underpin the Local Plan, and thus the Local Plan should be rejected so these revised circumstances are reconsidered and incorporated in revised local plan.

6

The delivery of the local plan will so to speak lock the future development strategy of the town for the next decades and we must take more time to consider what sort of future we want for the town. Here is a chance to call a halt to pre-conceived ideas and generate a new and enlightened way to deal with development and progress in challenging times as we deliver a Local Plan for a post-pandemic society.

The Plan contains inconsistencies where the definitions of Green Belt and AONB are variously interpreted, in one location contradicting statements in another. It appears that this is an consistency that has been recognised by other comments.

The Plan ignores the value, aims and objectives of the Green Belt, and fails to protect Green Belt Land.

The Plan ignores the preservation of the AONB.

The Plan fails to deliver clear policy and direction for Carbon Emissions.

The plan fails to take account of the post covid pandemic economy and changes in work habits.

The Local Plan should be returned to the consultation stage so the Plan can be re-written to take account of the invasion of Green Belt Land and development in AONB, and re-consider existing brown field sites for development first, as the conversion of existing buildings for alternative use (housing) is less impact on carbon footprint. As the first principle the plan should develop brown field sites particularly if they are in central locations, where the impact on sustainable transport and the requirement for car ownership and use of public transport can be delivered.

The Plan should be returned for consultation to take account of the post pandemic developments and changes in work and leisure activities, and take account of changes in social activities. For example

offices and retail premises that are vacant should be the priority for redevelopment for housing, located in central areas where a sustainable transport policy can be delivered.

The Local Plan will shape the future of the borough for decades, and should be fit for purpose. The Plan is not sound in the current version and should be returned and re-submitted for consultation.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered. I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

The citizens of Tunbridge Wells should be fighting for a change in this process, and I am sure there will be support from the people once they realise consultation will make a change and deliver a fair and equitable society that delivers the needs and best interests of the ordinary folk of the borough.

The Plan is conceived to allow the developers to set the agenda, and the call for sites favours developers and land owners to select the easy (and cheap) sites to develop where the most important factor is the profit, rather than delivering housing that meets the needs of those folk who are attempting to make a start with a family for example, where low cost housing could be available in the centre of town where a car is not essential, and use of an affordable public transport system can be used for essential travel.

There is not much evidence this is a priority in the Local Plan, and particularly in the post pandemic economy, the Plan should be returned for a proper re-assessment.

The Local Plan should be a document that directs the development of the Borough for the next period, but must be in the control of the local council and be adaptable as the economic and social factors change, so it must be possible for change in the future life of the Local Plan. As it is now the Local Plan sets policy in such tight terms that a mistake made at the writing stage sets the framework for 15 or 20 years, and this surely is not in the best interests of the people of Tunbridge Wells.

The threat to Green Belt Land in the Local Plan is an erosion of land set aside and protected by Law as designated Green Belt and all developments on Green Belt Land should be removed from the Local Plan. There are alternative sites in the Call for Sites list that should be considered and developed, even if costs are higher than a green field site.

Also there should be no development on sites in the AONB, also protected areas.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered. I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

The citizens of Tunbridge Wells should be fighting for a change in this process, and I am sure there will be support from the people once they realise consultation will make a change and deliver a fair and equitable society that delivers the needs and best interests of the ordinary folk of the borough.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Plan is conceived to allow the developers to set the agenda, and the call for sites favours developers and land owners to select the easy (and cheap) sites to develop where the most important factor is the profit, rather than delivering housing that meets the needs of those folk who are attempting to make a start with a family for example, where low cost housing could be available in the centre of town where a car is not essential, and use of an affordable public transport system can be used for essential travel.

There is not much evidence this is a priority in the Local Plan, and particularly in the post pandemic economy, the Plan should be returned for a proper re-assessment.

The Local Plan should be a document that directs the development of the Borough for the next period, but must be in the control of the local council and be adaptable as the economic and social factors change, so it must be possible for change in the future life of the Local Plan. As it is now the Local Plan sets policy in such tight terms that a mistake made at the writing stage sets the framework for 15 or 20 years, and this surely is not in the best interests of the people of Tunbridge Wells.

The threat to Green Belt Land in the Local Plan is an erosion of land set aside and protected by Law as designated Green Belt and all developments on Green Belt Land should be removed from the Local Plan. There are alternative sites in the Call for Sites list that should be considered and developed, even if costs are higher than a green field site.

Also there should be no development on sites in the AONB, also protected areas.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society,

as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation	Chris Gow
---------------------------------------	-----------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 3: Vision and Objectives**Vision**

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Here in particular the Local Plan is unsound as it does not take account to recent developments, and assumptions made that underpin the data used to build the Local Plan are out of date and are leading to false assumptions.

The Local Plan should be returned and rewritten with further consultation to take account of the post pandemic economy and social change, and the requirement to reassess priorities.

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan should be returned and rewritten with further consultation to take account of the post pandemic economy and social change, and the requirement to reassess priorities.

The local plan cannot be sound if it fails to take account of the post covid circumstances.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

If the Local Plan is returned to be rewritten, it is a great opportunity where Tunbridge Wells can be a council that takes the chance to re-think the Local Plan and deliver a Local Plan fit for purpose to build a structure for future development that reflects the importance of dealing with a post pandemic society, as well as taking account of local opinion, and re-assess a change of use in the town centre and commercial property in the borough.

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This policy must reflect a post covid pandemic factors, enconomic and social, where the Local Plan should be returned for this evaluation to take place, and further consultation to define policy where the post pandemic thinking can be considered for a revised Local Plan.

Local Plan fails to take any account of the post pandemic encomonic and social conditions, and superseeds the assumptions made in the data forming the base of the current Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Local Plan should be returned for further consultation and revision to consider post pandemic conditions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 5: Place Shaping Policies

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Here the assumptions are made concerning the Green Belt Land, but the protection is not delivered on the assessment of sites called in, and many examples of sites offered for inclusion in the Local Plan are on Green Belt Land, and this should not happen except exceptional circumstances, and there is no clear evidence that the circumstances are exceptional.

Green Belt Land is the very last resort when every other location is developed, far from the case in the Plan.

Development on Flood Plain should not be considered suitable for development, even if supported by studies and reports that declare it is safe to do so: these reports are wishful thinking, and evidence from other areas of the UK support a policy of NOT developing Flood Plain areas.

The developments included in the Local Plan that are on Green Belt Land, and AONB, and Flood Plains should be excluded from development.

The Local Plan should be returned for these revisions, and exclusions to be put in place, and further consultations undertaken.

The Local Plan fails to give protection to Green Belt Land, and AONB.

The Local Plan proposes development on Tudley Flood Plain, and this threatens the safety and security of homes, property and persons.

The Local plan should be returned for these failures to be addressed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

All land on Green Belt should be removed from development in the Local Plan, as Green Belt Land is protected.

All land in AONB should be removed from development in the Local Plan, and only separate consideration of each plot and building should be considered by the local Planning Committee, who should have the powers to approve or disapprove, without pressure from Planning Officers. This should be Planning Control be the local community.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

---------------------------------------	-----------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Types of Housing Delivery

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
----------------------	----

Is sound	No
----------	----

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There is no policy that directly applies to cheap housing for low paid sections of the community, and deals with no other type of housing.

There should be a policy that is only concerned with low cost housing.

The level of cost must be set with reference to local conditions, and is not workable if national calculations are applied.

Affordable housing and social housing disguise the requirement to build houses that are sold at a cost that is manageable by low paid workers or low income households.

The level of cost must be set with reference to local conditions, and is not workable if national calculations are applied.

Affordable housing and social housing disguise the requirement to build houses that are sold at a cost that is manageable by low paid workers or low income households.

Not having such a policy that delivers housing for low paid workers is failing to provide equitable opportunity to all members of the citizens of the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Economic Development	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There should be reference to the post covid pandemic economy which will have a serious impact on the decisions that shape the local plan.

The Local Plan should be returned and rewritten to take account of post pandemic economy and social changes.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan should be returned and rewritten to take account of post pandemic economy and social changes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The process of making and delivering a Local Plan is complex, and there is little opportunity to make a contribution in a way that allows the voice of the ordinary folk of the town heard, and where the principles of a fair and equitable society are delivered.

I can make a contribution to the Inspector, and be a spokesperson for the ordinary citizen in Tunbridge Wells Borough.

Policy ED 2Retention of Existing Employment Sites and Buildings	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- ☐ It is not positively prepared
- ☐ It is not effective
- ☐ It is not justified
- ☐ It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There should be freedom to change of use for retail and shop buildings and premises as the economy of the post pandemic changes and there should be the ability in the Local Plan to change these buildings and premises to residential use, providing possible low cost flats in areas where employment opportunities exist nearby for residents. This will reduce dependancy on cars, and provide opportunity to exploit affordable public transport.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? ☐ Yes, I wish to participate in hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan fails to preserve the identity of settlements, and has set aside land for development that will result in the merging to settlements and indistinct urban masses where local identity is lost.

For example the development between Southborough and Tunbridge Wells along the A 26 will result in urban sprawl and loss of individual identity. There are other examples in the Plan.

A stronger policy should be defined where this merging and development of urban sprawl is avoided.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There is inconsistent and ineffective policies to direct and control the use of private cars in the borough, and a lack of policies that will encourage the use of public transport or walking and cycling routes in the borough.

The diverse nature of the borough, covering rural and urban areas, means there has to be a series of policies that allows transport opportunity in the rural areas but restricts the use of personal car journeys.

There should be policies that control the car parking in urban areas, and the invasion of vehicles onto pedestrian space (pavements) so walking routes can be encouraged and deployed to promote clean air policy.

There should be policies to encourage Low Traffic Neighbourhoods in all urban areas across the borough to improve the amenity of residents, and to encourage sustainable walking and cycling travel.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My name is Mrs D Green of the above address, where I have lived for 34 years and previously for 20 years on the North side of Paddock Wood on Maidstone Road.

I am writing to you with regards yours plans to close the Railway Bridge to all traffic except Busses. I find this idea a bad one for many reasons but the main one is that my Mother who needs help to get anywhere, as she can no longer walk far due to ill health lives on the North side of the bridge. I walk to her if I am just visiting, but if she needs shopping or to be taken anywhere, or even calls us in an emergency it is currently quick for us to get to her by car. If your plans go ahead it will take at least 10 minutes to get to her on a good day if the traffic is good, if not longer. This frightens me.

The proposed plans in my opinion will cause far more congestion and pollution in and around Paddock Wood and are not going to make life better for the residents of the area and are just cutting off one side of the area from the other. This is not acceptable in my view.

By all means cut the speed limit if this will make the area safer but not residents off from each other.

I hope you seriously reconsider this decision as in my opinion it is definitely the wrong one.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS1

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a rambler in the area for many years and use the footpaths in the Paddock Wood / Capel area quite a lot because I enjoy the physical and mental benefits of walking in the area and to nearby villages. I have a deep love of nature and appreciate our need and reliance on it, not only for food production but for biodiversity, pollination and clean air.

There are many veteran and possibly ancient oaks in and between copses between Paddock and Capel as well as a rich diversity of wildlife in the quarry lakes in the vicinity; this with wetlands and ditches. The proposed removal of vast tracts of Green Belt would severely impact this wildlife severely and the essential and national activity of rambling, for me and countless others - permanently here for all future generations.

Wild animal life would be severely affected by mass house building, not just by having less space to survive but for lack of food. This would impact the food chain through appalling and irreversible damage to biodiversity in this region. This with the loss of Green Belt farmland would mean a marked decrease in the ability to feed our borough and to have good food quality and quantity from any land remaining. As all other boroughs in the country are facing the same prospects, the developments are not in the 'national interest' because they would contribute to the progressive lack of farming space. This is an alarming prospect because the UK simply cannot afford to import most of its food. The Local Plan is 'not consistent' with national policies for Green Belt and AONBs, and the mass release of Green Belt for development is 'unsustainable' because of the 'unique impact' on it of being converted en masse to housing.

'Exceptional circumstances' are needed to release Green Belt but there is none defined in NPPF or Planning Practice Guidance. Green Belt release may be ameliorated or reduced to the lowest reasonably practicable extent but in the case of Paddock Wood / Capel in this development, there would be 'High Harm' to it.

The amount of trees and hedgerows needing felling for the developments is also of deep concern to me. The clean air produced from trees is essential to counteract pollution, and birds and wildlife generally need contiguous hedgerows, copses and woods to form a country-wide network. Isolated wildlife areas in the midst of farmland and housing suffers for lack of accessibility to food, nesting places and mating partners and I am particularly concerned about 'veteran' trees, hedgerows and woods in and around Paddock Wood and Capel. Some trees in Capel are hundreds of years old and form part of our heritage as well as being there for pleasure and the appreciation of our natural environment. Plus, the long term detrimental effect on the leisure industry from the progressive lack of green space has not been adequately addressed and mapped in the Local Plan either.

The proposed 'green and blue' areas in the Neighbourhood Plan of Capel have not been legally defined in the Local Plan. There is no detailed account of how these will be mapped, created, maintained, protected or how any of this would be policed.

Fields used for hops and farming generally are part of our heritage and may be needed again if anything detrimental should happen to the national, European or world economy - as well as from having to

feed an increased population in coming decades. The threat of future pandemics like the current Covid 19 outbreak have also not been addressed. There could be a time when food imports are severely affected, resulting in starvation for whole regions no longer able to grow their own food locally and unable to import due to fears of disease transmission and unable to afford imports anyway.

There has not been enough use of brownfield sites such as of the old cinema site opposite the council offices in Tunbridge Wells. Inner town regeneration, though costing more initially, seeds tremendous and spectacular benefits later on in giving proximity to town centres and giving easy access to facilities and infrastructure already in place. Use of brownfield sites prevents towns and villages from merging into one another and exacerbating problems, as would be the case with the proposed mass house building in Paddock Wood / Capel. Brownfield usage also helps to stop inner towns becoming run-down, derelict, poverty-ridden crime spots covered in graffiti, that threaten to bring down whole regions and inevitably, house prices too.

This all amounts to a shocking failure of 'soundness'! This development must not proceed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The windfall targets of 'c + 10%' and 'c + 26%' should be abandoned and the Standard Calculation of the government be used instead. The Local Plan is based in part on a massive increase in population that is wholly unrealistic up to 2038 and i challenge that used and tabulated therein. There is a rich vein of brownfield land and thousands of vacant properties in the borough. These can easily be used long before any mass house building comes into play. As stated above, the benefits long term are fantastic.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

My deep appreciation of nature and the area as a rambler means i am highly valuable for any meetings being held. Please include me.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Local Plan as a whole should be suspended at central governmental level and submitted for a formal and independent review.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a rambler in the area for many years and use the footpaths in the Tudeley area quite a lot because I enjoy the physical and mental benefits of walking in the area and to nearby villages. I have a deep love of nature and appreciate our need and reliance on it, not only for food production but for biodiversity, pollination and clean air.

The proposed removal of vast tracts of Green Belt would severely impact this essential and national activity, for me and countless others - permanently here for all future generations.

Wild animal life would be severely affected by mass house building, not just by having less space to survive but for lack of food. This would impact the food chain through appalling and irreversible damage to biodiversity. This with the loss of Green Belt farmland would mean a marked decrease in the ability to feed our borough and to have good food quality and quantity from any land remaining. As all other boroughs in the country are facing the same prospects, the developments are not in the 'national interest' because it would contribute to the progressive lack of farming space. This is an alarming prospect because the UK simply cannot afford to import most of its food. The Local Plan is 'not consistent' with national policies for Green Belt and AONBs, and the mass release of Green Belt for development is 'unsustainable' because of the 'unique impact' on it of being converted en mass to housing.

'Exceptional circumstances' are needed to release Green Belt but there is none defined in NPPF or Planning Practice Guidance. Green Belt release may be ameliorated or reduced to the lowest reasonably practicable extent but in the case of Tudeley there would be 'High Harm' to it.

The amount of trees and hedgerows needing felling for the developments is also of deep concern to me. The clean air produced from trees is essential to counteract pollution, and birds and wildlife generally need contiguous hedgerows, copses and woods to form a country-wide network. Isolated wildlife areas in the midst of farmland and housing suffers for lack of accessibility to food, nesting places and mating partners and i am particularly concerned about 'veteran' trees, hedgerows and woods around Tudeley. Some trees in Tudeley are hundreds of years old and form part of our heritage as well as being there for pleasure and the appreciation of our natural environment. Plus, the long term detrimental effect on the leisure industry from the progressive lack of green space has not been addressed in the Local Plan either.

The proposed 'green and blue' areas in the Neighbourhood Plans have not been legally defined in the Local Plan. There is no detailed account of how these will be mapped, created, maintained, protected or how any of this would be policed.

Fields used farming are part of our heritage and may be needed again if anything detrimental should happen to the national, European or world economy - as well as from having to feed an increased population in coming decades. Use of brownfield sites prevents towns and villages from merging into one another and exacerbating problems, as would be the case with the proposed mass house building at Tudeley. Brownfield usage also helps to stop inner towns becoming run-down, derelict, poverty-ridden crime spots covered in graffiti, that threaten to bring down whole regions and inevitably, house prices too.

This all amounts to a shocking failure of 'soundness'!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Because the population of the UK and of the borough is not going to increase by the phenomenal rates proposed in the forecast in the Local Plan, which I challenge, the Standard Calculation of the government for house building should be used instead for the Local Plan and the 'c + 10%', 'c + 26%' and 'windfall' calculation tools abandoned. In addition, use of brownfield land and less emphasis on Tudeley is key.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

My love and passion for the area and awareness of the issues make me a highly valuable addition to any meetings. Please include me in as many of them as possible.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Use of brownfield sites and vacant properties in Tunbridge Wells is a more common sense approach rather than letting developers build more or less where they want to. I don't want to see needless destruction of countryside where other avenues are available. Having thousands of new homes in the borough within a generation would mean an incredible doubling of the population (looking at what's happening nationwide) and this is simply not a realistic forecast.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Vince Greene
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 14 years and have worked here for some of that time. I have a deep love of nature and our need and reliance on it, not only for food production but for biodiversity, pollination and clean air.

I am a ramblor of the countryside and enjoy the physical and mental benefits of walking around Paddock Wood and to nearby villages. The proposed removal of vast tracts of Green Belt would severely impact this essential and national activity, for me and countless others - permanently for all future generations.

Wild animal life would be severely affected by mass house building, not just by having less space to survive but for lack of food. This would impact the food chain through appalling and irreversible damage to biodiversity. This with the loss of Green Belt farmland would mean a marked decrease in the ability to feed our borough and to have good food quality and quantity from any land remaining. As all other boroughs in the country are facing the same prospects, the developments are not in the 'national interest'. This is an alarming prospect because the UK simply cannot afford to import most of its food. The Local Plan is 'not consistent' with national policies for Green Belt and AONBs, and the mass release of Green Belt for development is 'unsustainable' because of the 'unique impact' on it.

'Exceptional circumstances' are needed to release Green Belt but there is none defined in NPPF or Planning Practice Guidance. Green Belt release may be ameliorated or reduced to the lowest reasonably practicable extent but in the case of Paddock Wood there would be 'High Harm' to it. I suspect the release of Green Belt land near Tudely Brook Farm on Whetstead Road on Paddock Wood's north west corner has not fulfilled all legal requirements and might have to be reversed. The 'strong barrier' it is said to be creating here is not strong because it is a precedent to further Green Belt release.

The amount of trees and hedgerows needing felling for the developments is also of deep concern to me. The clean air produced from trees is essential to counteract pollution, and birds and wildlife generally need contiguous hedgerows, copses and woods to form a country-wide network. Isolated wildlife areas in the midst of farmland and housing suffers for lack of accessibility to food, nesting places and mating partners and I am particularly concerned about 'veteran' trees, hedgerows and woods such as Foal Hurst Wood in Paddock Wood. Some local trees in other parts of the town are hundreds of years old and form part of our heritage as well as being there for pleasure and the appreciation of our natural environment. Plus, the long term detrimental effect on the leisure industry from the progressive lack of green space has not been addressed in the Local Plan either.

The proposed 'green and blue' areas in the Neighbourhood Plan of Paddock Wood have not been legally defined in the Local Plan. There is no detailed account of how these will be mapped, created, maintained, protected or how any of this would be policed. I understand the proposed water attenuation ponds will be part of them but nothing is legally binding yet. I am also worried for the protection of Bluebell Wood in Paddock Wood off Church Road and of the seeming lack of definition between the new building site and the wood and orchard beyond.

Fields used for hops and farming generally are part of our heritage and may be needed again if anything should happen to the national, European or world economy - as well as from having to feed an increased population in coming decades. The threat of future pandemics like the current Covid 19 outbreak have also not been addressed. There could be a time when food imports are severely affected, resulting in starvation for whole regions no longer able to grow their own food locally and unable to import due to fears of disease transmission.

There is not enough provision for sewage treatment. I have seen the town centre flood very quickly many times as well as other areas of town like Church Road. The town's sewage and rain water run-off is at capacity. Consequently, the amount of potable and washing water needed for mass house building is not attainable. There are recent reports in the media of attenuation ponds in other parts of the country overflowing and of being accidentally contaminated with sewage in times of flooding. The proposed attenuation ponds for Paddock Wood are therefore a possible threat for the transmission of waterborne disease eradicated from the western world in the 19th century. The town also lies at the bottom of a huge regional basin.

I always find it a little unnerving walking through the Paddock Wood east car park as it is invariably full of cars manoeuvring or parked. There is therefore little to no space available for any more cars. The proposed increase in houses means there would be many more people wishing to use the shops, but they will find it very hard if not impossible to park there or anywhere else. They will not find many spaces in Commercial Road (the high street). I always see a traffic jam when I walk through there and the town centre is clearly at traffic capacity.

There has not been enough use of brownfield sites such as of the old cinema site opposite the council offices in Tunbridge Wells. Inner town regeneration, though costing more initially, seeds tremendous and spectacular benefits later on in giving proximity to town centres and giving easy access to facilities and infrastructure already in place. Use of brownfield sites prevents towns and villages from merging into one another and exacerbating problems raised above; as would be the case with Capel and Paddock Wood. Brownfield usage also helps to stop inner towns becoming run-down, derelict, poverty-ridden crime spots covered in graffiti, that threaten to bring down whole regions and inevitably, house prices too.

This all amounts to a shocking failure of soundness!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Because the population of the UK and of the borough of Tunbridge Wells is not going to increase at the phenomenal rate proposed to justify the massive development (birth rates are dropping markedly), the government's Standard Calculation for assessing house-building numbers must be used. The added 'c + 26%' figure for 'uncapped' and 'windfall' targets has to be abandoned!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

My alarm at the savage extent of the proposed developments together with my keen understanding of its needless long term detrimental effects, coupled with my deep concern about a fantastic region and it's natural environment make me an invaluable addition to any meetings and consultations. Please consider me for attendance and keep me informed.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Reevaluate brownfield site usage and regeneration of existing and vacant properties to significantly reduce housing development impact. Reinvigorating towns is a better long term strategy that is a more common sense approach that generates fewer problems but yields greater dividends for the future. There are a huge number of vacant properties in Tunbridge Wells!

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Mr & Mrs D L Gregory
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
AL/HA5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

FACTS:

- 1 In 2014 a previous housing scheme for 120 houses on the same site was dismissed on appeal to protect the landscape and natural beauty in an AONB
- 2 Without suitable direct access onto Rye Road, any further application was deemed unlikely to succeed.
- 3 In 2016 Riverdale Developments purchased land now forming Birchfield Grove to the south of Site 413 from Rydon Homes Ltd, who had previously purchased part of the garden of Birchfield House. These properties were marketed as having "stunning views over Kent countryside".
- 4 In 2020 Riverdale Developments filed Copy Access Deed of Easement for 5 years in favour of Rydon Homes, permitting access from Birchfield Grove across a narrow eco-strip to Site 413
- 5 Rydon Group's focus is in construction, maintenance and house building, as well as in health-care joint ventures
- 6 Rydon Group was the lead contractor overseeing the refurbishment of Grenfell Tower 2014-2016. The group is no longer allowed to bid for public contracts either by the Government or the Mayor of London
- 7 In 2020 TWBC's Draft Local Plan contained provision for a medical centre and 100 houses on Site 413
- 8 In Jan 2021 Site 413 was removed from the Pre-Submission Local Plan, and the medical centre was to be re-sited at KGV Playing Fields adjacent to the new Community Centre with shared parking availability
- 9 In Feb 2021 the doctors successfully lobbied for the medical centre to be reinstated on Site 413, as they had an offer of 0.79 hectare "free" land. This would clearly enhance the profitability of the new joint practice and inflate the potential selling price on retirement.
- 10 Hawkhurst Parish Council, speaking on behalf of the local community, would make land available at KGV. In addition, the Community Hospital is already an NHS facility, whilst the Golf Club Redevelopment Application includes mention of a medical centre facility.
- 11 Both the doctors and TWBC have declined to provide relevant information requested under the Freedom of Information Act.
- 12 KCC Highways acknowledge concerns about access into Rye Road and regard the Hawkhurst crossroads as being at full capacity.
- 13 As Site 413 is located at the eastern edge of the village, virtually all traffic from the medical centre would need to turn right into Rye Road, before distributing 3-ways at the crossroads.

QUESTIONS:

- 1 Why should the doctors' commercial interests trump the interests of the community?
- 2 Why should a carbuncle be allowed such a prominent position in an AONB, particularly when alternatives are readily available?

- 3 Are we to believe that the medical centre would not be followed by an Application for housing too?
- 4 How might the exit into Rye Road and the substantially increased traffic at the crossroads be accommodated?
- 5 Would it not be ironic for a medical centre to be the cause of further deterioration in air quality in the village?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The only possible modification to the Local Plan to make it sound is to remove AL/HA5 from the Plan and reposition the medical centre at King George V Playing Fields, adjacent to the new Community Centre.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This plan which proposes to prevent all vehicles except buses travelling to Paddock Wood via Maidstone Road has not been positively prepared. It has penalised a section of people living in the East Peckham, Maidstone direction. It is not effective because all that will happen is a larger volume of traffic will be forced onto an alternative route, via Five Oak Green direction. This is a heavily used road already without redirecting more traffic to it. It does not also take into account the large volume of residential development in that area which will have its own increase in traffic.

This major proposal has also not been widely advertised. Even Paddock Wood Town Council learned of it only recently. Such a change should be well advertised and a formal meeting held inviting all those concerned.

I support improved areas for cycling and pedestrians, however not everyone is physically able to adopt this method of transport, and public transport in this direction is an expensive alternative and has a very limited timetable. I cycled to Paddock Wood from East Peckham for some years, and asked for a cycle path from that direction but it would seem that was never a possibility. I therefore continued to cycle the journey, sharing with all manner of vehicles. The road speed could be reduced for safety, ie 40mph instead of 50-60mph.

The proposals do not take into account how people will be able to get to the Waitrose car park Paddock Wood for example if they proposed to close Commercial Road from the East Peckham direction. Cycling is all very well but you cannot shop for a family of 4 or 5 on a bicycle, therefore this plan has forgotten reality.

The proposed scheme may have looked at other towns for comparison, but the road system in Paddock Wood is much smaller in the variety of options available, and really cannot be used in the same way.

The amount of housing which is being added to the outskirts of the town will lead to more car users because of the distance to the centre.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is a fact that idling traffic stuck in jams creates more pollution than when traffic can flow through areas. The road leading to the bridge is blocked a lot of the time by parked cars which creates a hold up in both directions. I sympathise with those that park there but I believe there should be an allocated parking area off-road, perhaps on land which is vacant (ie near the dentist practice). It should also restrict parking during peak times to enable traffic to flow. I believe many other town centres would not have allowed parking on such a key road as has happened into Paddock Wood.

With regard to proposal of 20mph speed limits, I would like to add that the general public needs to be re-educated on the current range of speed limits, ie 30mph, 40mph, 50mph and so on. 20mph in a car is not a realistic one, and even a fast cyclist would probably travel faster than this.

The road speed where cyclists and vehicles share could be reduced for safety, ie 40mph instead of 50-60mph which would not inconvenience drivers too much if adhered to.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

There are major changes to residents and it needs a wide audience.

Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not effective because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I would suggest that this plan is not sound because the proposed development on Upper Grosvenor Road would not comply with the policies of the NPPF. I am of this opinion for the following reasons:

- 1 The site is not of a suitable size for such a development and planning applications in similar cramped sites are refused
- 2 Loss of essential green buffer zone between railway line and Upper Grosvenor Road. Substantial number of trees will be removed to accommodate such a large development
- 3 Light, noise and air pollution will be increased in the area
- 4 The need for density dictates that the apartments be deep blocks and will not be pleasant to live in due to removal of trees, cold, windowless spaces and limited ventilation.
- 5 Access - the small site and triangular shape are not suitable for a development of this size and its access requirements
- 6 Parking - overflow onto Upper Grosvenor Road and surrounding areas potentially hazardous
- 7 Increased risk of road traffic accidents in an area which already has a history of collisions, with two known deaths. A large number of school children travel along the road on foot. Road narrowing will only exacerbate this and hinder access for emergency vehicles. Speeding is already a problem on Upper Grosvenor Road.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposed development on Upper Grosvenor Road should not proceed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

A lot of the building is on greenbelt, but government policy is to preserve greenbelt.

Infrastructure First policy has not been implemented.

The scale of development is hugely inconsistent with the rest of the borough.

Building on floodplains is potentially problematic.

Public consultation has been ineffective.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The pandemic is changing our world. The speed of building seems precipitous when we don't know how many existing buildings will be left vacant when the world returns to normal. Brown field developments should be more fully exploited before the countryside is irrevocably damaged.

Infrastructure First should be more than words. Paddock Wood already struggles in some areas and the new builds will put (are already putting) massive pressure on our already stretched facilities. I understand the stamenet of

We are a small percentage of the borough but we are receiving a huge percentage of the borough's new builds. A wider distribution of building around the borough would be fairer. I am aware that Tonbridge and Malling delayed signing a Statement of Common Ground because of strains TWBC's gigantic developments would place on their services - I understand an uneasy agreement has been reached.

Paddock Wood floods. It would be better if sites for development be selected as *they are*, and not based on hypothetical future scenarios. If sites for development are selected based on future

projections, could that not mean that development can happen anywhere, regardless of flood risk and attached insurance issues? You should be mindful of the damage storms Ciara and Dennis inflicted on Wales after planning was granted in flood risk areas between 2016 and 2019. Residents there are still paying the price of that policy, which Dr Doug Parr, chief scientist at Greenpeace UK described as "literally planning for disaster".

As I write, I am acutely aware that my concerns are based on the research of myself and other residents of Paddock Wood - ergo, public consultation - what public consultation? We are in the midst of a global pandemic; would it not be better to put the brakes on until normal social interaction is possible again?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would like Paddock Wood residents to be fully aware of, and involved in any changes made to the future of Paddock Wood

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I grew up in Paddock Wood and have lived here for many years. For quite some time - long before the pandemic hit - it has been difficult to get doctor appointments. Residents are concerned this problem will get very much worse with a massive influx of new residents. In the booklet delivered by the Conservative Party just before the local elections, they make an effusive commitment to Infrastructure First: "When development does happen, our INFRASTRUCTURE FIRST policy means that schools, GP surgeries, open spaces and transport links are planned BEFORE housing". Does Paddock Wood have a new school? Has the GP surgery been expanded? Have we got more open space? Has our transport access been improved? Perhaps these things have been planned, but if they are merely going to catch up with the voracious pace of development here, that just isn't good enough and it is a very long way away from what has been promised. It is symbolised by the fact that a regeneration of the town centre was expected, but what has been delivered so far is a funeral director and a retirement home!

Several times I have spoken with people in the town, and a surprising number of people are unaware of the sheer scale of the developments, and unaware that the town will be a building site for the next almost two decades (I was told this by Steve Baughen himself). Many people simply don't know. That is a failure of public consultation. Don't believe me? Walk around Paddock Wood, show them exactly how many fields are about to be built over, and see how many people know. Many who do know tend to shrug and say something like "they'll do what they want, nobody can do anything about it". This isn't apathy, this is grim acceptance that they won't be listened to. Asthmatics like myself are complaining that our symptoms are worse since the building started, parents are concerned about the volume of traffic near the school, people should be aware that this is how it will be for the next almost two decades if the plans all go ahead.

I refer back to what I wrote in the previous answer, that sites should be selected as they exist rather

than based on future hypotheticals. My own home has come within a few millimetres of flooding on some occasions since I have lived here. All it takes is for your house to flood once for your life to be turned upside down. We are all worried about this. I have read the NPPF para 148 onwards, and what is set to happen in Paddock Wood seems at odds with what the document sets out with - I'm thinking in particular of para 149: "Plans should take a proactive approach to mitigating and adapting to climate change, taking into account the long-term implications for flood risk, coastal change, water supply, biodiversity and landscapes, and the risk of overheating from rising temperatures". I would also add that the building work seems precipitous at an uncertain time when we do not know what post-pandemic world we will be returning to; will there be changes of building usage after offices are left empty? Will commuter patterns be changed forever?

As I write this really incredibly complicated form, being completely unsure whether I'm putting the right bits in the right boxes, I am wondering how committed the powers that be are to transparency and public consultation. It seems designed to confuse and intimidate, and I am absolutely certain that a large number of concerned residents won't have made it this far. I feel strongly that a real, robust public engagement is needed. This clearly won't be possible until normal social interactions are allowed again.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Carolyn Gunstone
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Dear Sirs

I recently moved into East Peckham, being delighted with the area and very close, now I am widowed to my family. However I was aware at the time that development was planned at Capel.

Now however it is becoming very clear what such a vast development will effect all who live in the area. I really would like to express firstly, how almost cheeky it is for your council to propose such a development right on your border with Tonbridge and Malling district. The roads around here are very narrow and the fields are used for very productive farming. One that Covid has pointed out, even to people behaving like ostriches that we need to grow food well, we cannot continue to just import it from elsewhere. Your development would have major impact on all our small local roads. Your response would be perhaps to just widen them. The Medway valley doesn't respond well to flash floods as we have seen in the past. So more tarmac and concrete is certain to make this worse. Let alone a development on a hill, well wooded helping this environmental problem. That hill will be seen for miles around and the garden of England will be forever blighted. 4 thousand homes is the proposal. That means on an average of families 16 thousand more people and at least 4 thousand more cars. Medical care, schooling, in Tunbridge Wells or are you hoping to pass that issue into Tonbridge and Malling. I understand a new secondary school is planned at Summerhill. Edge of the busy A21, with all its potential pollution, I wonder if you have ever tried to drive on the Tudely road to the roundabout at 8-8-30 in the school morning, or tried to park and get on a commuter train. Or the other way into Paddock wood or Tunbridge Wells via the Pembury road or even the industrial park. These roads are at their absolute maximum now. Public transport would come to a standstill, let alone private cars.

I feel you as a council are taking the easy option. This area has seen the enormous deployment at Kings Hill. Do we actually need another. The centre of towns and cities are going to be quieter. Many companies are recognising there will be less need for the vast offices in their centres. It would make more sense to develop small sites by conversion of these spaces. People need homes, but we also need green spaces as lungs for our planet. Your proposal will severely damage any environmental credibility that you may aspire to. You cannot in 2021 propose such a damaging development. If you allow it to go ahead future generations living in this area will be living with the consequences for decades to come.

Please think environment first otherwise we will all be facing the consequences of your actions

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.
